CONGRESSIONAL RECORD.

PROCEEDINGS AND DEBATES OF THE FIFTY-THIRD CONGRESS.

SPECIAL SESSION OF THE SENATE.

SENATE.

SATURDAY, *March 4, 1893.*

Hon. ADLAI E. STEVENSON, Vice-President of the United States, having taken the oath of office at the close of the last regular session of the Fifty-second Congress, took the chair.

PRAYER.

Rev. J. G. BUTLER, D.D., Chaplain to the Senate, offered the following prayer:

O Thou, with whom is no variableness or shadow of turning, the unchangeable God, whose throne stands forever, and whose dominion ruleth over all; we seek a Father's blessing as we wait at the mercy seat. We bring to Thee our heart homage, God of our fathers, thanking Thee for our rich heritage of faith and of freedom, hallowed by the toils and tears, the valor and blood and prayers, of our patriot dead. We come with an abiding faith in God, who has led us all through our history, and pray that the blessings we so abundantly enjoy may abide upon the family of nations so honorably represented here to-day. Grant that this stream of mercy may flow throughout the world, and that all the people may have the freedom wherewith Christ makes free.

We look unto Thee for Thy guidance and blessing as we come to these solemnities, and pray that Thy peace may abide upon Thy servants the President and his Cabinet, upon the President of the Senate, and these Thy servants who to-day lay aside the perplexing responsibilities of public office, honored of men and blessed of God.

We commend to Thine especial favor Thy servant, the President-elect, called for the second time to these high and honorable and responsible trusts. O God, shield him by Thy power and let Thy banner over his home, in which Thou hast opened a wellspring of joy, ever be love. Gird him with Thy might. Guide him by Thy counsel. Control his judgment. Make him strong in purpose, and so do Thou direct his Administration with those associated with him in official relations that the blessing of God may continue more and more upon our Republic, which has ever been prospered of Heaven.

Bless, we pray Thee, our Vice-President, the President of the Senate, and those who to-day assume for the first time these responsibilities. So guide by Thy divine counsel, our Father, that in the future, as in the past, the unseen hand may lead us. Bless all the people of this great nation in their industries, in their homes, in their churches, in their schools, prospering every right endeavor, delivering us from lawlessness and vice, and bringing in the reign of peace and righteousness more and more, and among the nations of the world.

Guide us in the path of duty. Purify our hearts, we pray Thee, by the indwelling of Thy Spirit. O Lord, pardon what we have been. Sanctify what we are. Order what we shall be. And Thine shall be the glory and ours the eternal salvation, through Jesus Christ our Lord, who hath taught us when we pray to say:

"Our Father Who art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done upon earth as it is in heaven. Give us this day our daily bread. Forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil. For Thine is the kingdom, and the power, and the glory, forever. Amen."

ADDRESS OF THE VICE-PRESIDENT.

The VICE-PRESIDENT. Senators, deeply impressed with a sense of its responsibilities and of its dignities, I now enter upon the discharge of the duties of the high office to which I have been called.

I am not unmindful of the fact that among the occupants of this chair during the one hundred and four years of our constitutional history have been statesmen eminent alike for their talents and for their tireless devotion to public duty. Adams, Jefferson, and Calhoun honored its incumbency during the early days of the Republic, while Arthur, Hendricks, and Morton have at a later period of our history shed luster upon the office of President of the most august deliberative assembly known to men.

I assume the duties of the great trust confided to me with no feeling of self-confidence, but rather with that of grave distrust of my ability satisfactorily to meet its requirements. I may be pardoned for saying that it shall be my earnest endeavor to discharge the important duties which lie before me with no less of impartiality and courtesy than of firmness and fidelity. Earnestly invoking the coöperation, the forbearance, the charity of each of its members, I now enter upon my duties as Presiding Officer of the Senate.

The Secretary of the Senate will read the proclamation of the President of the United States convening the Senate in extraordinary session.

PROCLAMATION.

The Secretary (Mr. ANSON G. MCCOOK) read the following proclamation:

By the President of the United States of America:

Whereas public interest require that the Senate should be convened at 12 o'clock on the 4th day of March next to receive such communications as may be made by the Executive:

Now, therefore, I, Benjamin Harrison, President of the United States, do hereby proclaim and declare that an extraordinary occasion requires the Senate of the United States to convene at the Capitol, in the city of Washington, on the 4th day of March next, at 12 o'clock noon, of which all persons who shall at that time be entitled to act as members of that body are hereby required to take notice.

Given under my hand and the seal of the United States at Washington this 25th day of February, in the year of our Lord 1893, and of the Independence of the United States of America the one hundred and seventeenth.

BENJ. HARRISON.

By the President:

WILLIAM F. WHARTON,
Acting Secretary of State.

SWEARING IN OF SENATORS.

The VICE-PRESIDENT. The names of the newly elected Senators whose credentials are on file will now be called by the Secretary, and they will come forward and receive the oath of office four at a time.

The Secretary read the names of—

Nelson W. Aldrich, of the State of Rhode Island.
William V. Allen, of the State of Nebraska.
William B. Bate, of the State of Tennessee.
Francis M. Cockrell, of the State of Missouri.

As their names were called the respective Senators-elect came forward, and the oath prescribed by law was administered to them.

The Secretary called the names of—

John W. Daniel, of the State of Virginia.

Cushman K. Davis, of the State of Minnesota.
Charles J. Faulkner, of the State of West Virginia.
James Z. George, of the State of Mississippi.

As their names were called the respective Senators-elect came forward, and the oath prescribed by law was administered to them.

The Secretary called the names of—
Arthur P. Gorman, of the State of Maryland.
George Gray, of the State of Delaware.
Eugene Hale, of the State of Maine.
Joseph R. Hawley, of the State of Connecticut.

As their names were called the respective Senators-elect came forward, and the oath prescribed by law was administered to them.

The Secretary called the names of—
Henry Cabot Lodge, of the State of Massachusetts.
Roger Q. Mills, of the State of Texas.
John L. Mitchell, of the State of Wisconsin.
Edward Murphy, jr., of the State of New York.

As their names were called the respective Senators-elect came forward, and the oath prescribed by law was administered to them.

The Secretary called the names of—
Samuel Pasco, of the State of Florida.
Redfield Proctor, of the State of Vermont.
Matthew S. Quay, of the State of Pennsylvania.
William N. Roach, of the State of North Dakota.

As their names were called the respective Senators-elect (with the exception of Mr. Quay, who was absent) came forward, and the oath prescribed by law was administered to them:

The Secretary called the names of—
John Sherman, of the State of Ohio.
James Smith, jr., of the State of New Jersey.
William M. Stewart, of the State of Nevada.

As their names were called, the respective Senators-elect came forward and the oath prescribed by law was administered to them.

The Secretary called the names of—
Francis B. Stockbridge, of the State of Michigan.
David Turpie, of the State of Indiana.
Stephen M. White, of the State of California.

As their names were called, the respective Senators-elect came forward and the oath prescribed by law was administered to them.

SENATOR FROM KANSAS.

Mr. PEFFER. I present the credentials of John Martin, recently elected a Senator from Kansas for the term ending March 3, 1895, and ask that they be read and lie on the table for the present.

The VICE-PRESIDENT. The credentials will be read.

The credentials were read and ordered to be filed, as follows:

STATE OF KANSAS, *Executive Department.*

To the President of the Senate of the United States:

This is to certify that on the 25th day of January, in the year of our Lord 1893, John Martin was duly elected by the Legislature of Kansas a Senator to represent said State in the Senate of the United States for the unexpired term of six years commencing the 4th day of March, A. D. 1889, and ending March 4, 1895, and to fill the vacancy in said term happening by the decease of the Hon. Preston B. Plumb.

Witness his excellency, our governor, L. D. Lewelling, and our seal hereunto affixed, at Topeka, this 25th day of January, in the year of our Lord 1893, and of the Independence of the United States the one hundred and seventeenth.

[SEAL.] L. D. LEWELLING.

By the governor:

R. S. OSBORN, *Secretary of State.*

Mr. HOAR. The credentials of Mr. Martin seem to be in due form and to entitle him *prima facie* to be admitted to a seat in the Senate. If there be any question as to his title upon the merits the Senate can deal with it afterwards. I ask that the oath be administered to Mr. Martin.

Mr. PEFFER. Mr. Martin being present, I rose to ask that the oath of office be administered to him.

The VICE-PRESIDENT. The Senator-elect from Kansas will come forward and take the oath of office.

Mr. Martin was escorted to the Vice-President's desk by Mr. PEFFER, and the oath prescribed by law having been administered to him, he took his seat in the Senate.

SENATORS PRESENT.

The Senators-elect having been sworn and taken their seats in the Senate, the following Senators were present:

From the State of—
Alabama—James L. Pugh.
Arkansas—James H. Berry and James K. Jones.
California—Stephen M. White.
Colorado—Henry M. Teller and Edward O. Wolcott.
Connecticut—Joseph R. Hawley and Orville H. Platt.
Delaware—George Gray and Anthony Higgins.
Florida—Wilkinson Call and Samuel Pasco.
Georgia—John B. Gordon.
Idaho—Fred. T. Dubois and George L. Shoup.
Illinois—Shelby M. Cullom and John M. Palmer.
Indiana—David Turpie and Daniel W. Voorhees.
Iowa—William B. Allison and James F. Wilson.
Kansas—John Martin and William A. Peffer.
Kentucky—Joseph C. S. Blackburn and William Lindsay.
Louisiana—Donelson Caffery and Edward D. White.
Maine—William P. Frye and Eugene Hale.
Maryland—Charles H. Gibson and Arthur P. Gorman.
Massachusetts—George F. Hoar and Henry Cabot Lodge.
Michigan—James McMillan and Francis B. Stockbridge.
Minnesota—Cushman K. Davis and William D. Washburn.
Mississippi—James Z. George.
Missouri—Francis M. Cockrell and George G. Vest.
Montana—Thomas C. Power.
Nebraska—William V. Allen and Charles F. Manderson.
Nevada—John P. Jones and William M. Stewart.
New Hampshire—William E. Chandler and Jacob H. Gallinger.
New Jersey—John R. McPherson and James Smith, jr.
New York—David B. Hill and Edward Murphy, jr.
North Carolina—Matt W. Ransom and Zebulon B. Vance.
North Dakota—William N. Roach and Henry C. Hansbrough.
Ohio—Calvin S. Brice and John Sherman.
Oregon—John H. Mitchell.
Pennsylvania—James Donald Cameron.
Rhode Island—Nelson W. Aldrich and Nathan F. Dixon.
South Carolina—M. C. Butler and J. L. M. Irby.
South Dakota—James H. Kyle and R. F. Pettigrew.
Tennessee—William B. Bate and Isham G. Harris.
Texas—Richard Coke and Roger Q. Mills.
Vermont—Justin S. Morrill and Redfield Proctor.
Virginia—John W. Daniel and Eppa Hunton.
Washington—Watson C. Squire.
West Virginia—Johnson N. Camden and Charles J. Faulkner.
Wisconsin—John L. Mitchell and William F. Vilas.
Wyoming—Joseph M. Carey.

INAUGURATION CEREMONIES.

The persons entitled to admission on the floor of the Senate Chamber having been admitted to the places reserved for them, the President, Hon. GROVER CLEVELAND, of New York, entered the Senate Chamber accompanied by the late President, BENJAMIN HARRISON and Mr. TELLER, Mr. RANSOM, and Mr. MCPHERSON, members of the Committee of Arrangements, and was escorted to a seat in front of the Secretary's desk, and the late President and the members of the committee were seated on his right and left.

The VICE-PRESIDENT. The Sergeant-at-Arms will now execute the order of the Senate relative to the inaugural ceremonies of the President of the United States.

Those in the Senate Chamber proceeded to the platform on the central portico of the Capitol in the following order:

The marshal of the District of Columbia and the marshal of the Supreme Court.
The ex-Vice-President.
The Supreme Court.
The Sergeant-at-Arms of the Senate.
The Committee of Arrangements.
The President and the President-elect.
The Vice-President and the Secretary of the Senate.
Members of the Senate.
The Diplomatic Corps.
Heads of Departments.

The Major-General of the Army Commanding, the Admiral of the Navy, and the officers of the Army and Navy who, by name, have received the thanks of Congress.

Members of the House of Representatives and members-elect, governors of States, ex-members of the Senate of the United States, officers of the Senate, and officers of the House of Representatives.

All other persons who have been admitted to the floor of the Senate Chamber, followed by those who have been admitted to the galleries.

The President-elect delivered the following

INAUGURAL ADDRESS.

MY FELLOW-CITIZENS: In obedience to the mandate of my countrymen, I am about to dedicate myself to their service under the sanction of a solemn oath. Deeply moved by the expression of confidence and personal attachment which has called me to this service, I am sure my gratitude can make no better return than the pledge I now give before God and these witnesses of unreserved and complete devotion to the interests and welfare of those who have honored me.

I deem it fitting on this occasion, while indicating the opinions I hold concerning public questions of present importance, to also briefly refer to the existence of certain conditions and tendencies among our people which seem to menace the integrity and usefulness of their Government.

While every American citizen must contemplate with the utmost pride and enthusiasm the growth and expansion of our country, the sufficiency of our institutions to stand against the rudest shocks of violence, the wonderful thrift and enterprise of our people, and the demonstrated superiority of our free government, it behooves us to constantly watch for every symptom of insidious infirmity that threatens our national vigor.

The strong man who in the confidence of sturdy health courts the sternest activities of life and rejoices in the hardihood of constant labor may still have lurking near his vitals the unheeded disease that dooms him to sudden collapse.

It can not be doubted that our stupendous achievements as a people and our country's robust strength have given rise to a heedlessness of those laws governing our national health, which we can no more evade than human life can escape the laws of God and nature.

Manifestly nothing is more vital to our supremacy as a nation and to the beneficent purposes of our Government than a sound and stable currency. Its exposure to degradation should at once arouse to activity the most enlightened statesmanship; and the danger of depreciation in the purchasing power of the wages paid to toil should furnish the strongest incentive to prompt and conservative precaution.

In dealing with our present embarrassing situation as related to this subject we will be wise if we temper our confidence and faith in our national strength and resources with the frank concession that even these will not permit us to defy with impunity the inexorable laws of finance and trade. At the same time, in our efforts to adjust differences of opinion, we should be free from intolerance or passion, and our judgments should be unmoved by alluring phrases and unvexed by selfish interests.

I am confident that such an approach to the subject will result in prudent and effective remedial legislation. In the mean time, so far as the executive branch of the Government can intervene, none of the powers with which it is invested will be withheld when their exercise is deemed necessary to maintain our national credit or avert financial disaster.

Closely related to the exaggerated confidence in our country's greatness which tends to a disregard of the rules of national safety, another danger confronts us not less serious. I refer to the prevalence of a popular disposition to expect from the operation of the Government especial and direct individual advantages.

The verdict of our voters, which condemned the injustice of maintaining protection for protection's sake, enjoins upon the people's servants the duty of exposing and destroying the brood of kindred evils which are the unwholesome progeny of paternalism. This is the bane of republican institutions and the constant peril of our Government by the people. It degrades to the purposes of wily craft the plan of rule our fathers established and bequeathed to us as an object of our love and veneration. It perverts the patriotic sentiment of our countrymen, and tempts them to pitiful calculation of the sordid gain to be derived from their Government's maintenance. It undermines the self-reliance of our people, and substitutes in its place dependence upon governmental favoritism. It stifles the spirit of true Americanism and stupefies every ennobling trait of American citizenship.

The lessons of paternalism ought to be unlearned and the better lesson taught, that while the people should patriotically and cheerfully support their Government, its functions do not include the support of the people.

The acceptance of this principle leads to a refusal of bounties and subsidies, which burden the labor and thrift of a portion of our citizens, to aid ill-advised or languishing enterprises in which they have no concern. It leads also to a challenge of wild and reckless pension expenditure, which overleaps the bounds of grateful recognition of patriotic service and prostitutes to vicious uses the people's prompt and generous impulse to aid those disabled in their country's defense.

Every thoughtful American must realize the importance of checking at its beginning any tendency in public or private station to regard frugality and economy as virtues which we may safely outgrow. The toleration of this idea results in the waste of the people's money by their chosen servants, and encourages prodigality and extravagance in the home life of our countrymen.

Under our scheme of government the waste of public money is a crime against the citizen; and the contempt of our people for economy and frugality in their personal affairs deplorably saps the strength and sturdiness of our national character.

It is a plain dictate of honesty and good government that public expenditures should be limited by public necessity, and that this should be measured by the rules of strict economy; and it is equally clear that frugality among the people is the best guaranty of a contented and strong support of free institutions.

One mode of the misappropriation of public funds is avoided when appointments to office, instead of being the rewards of partisan activity, are awarded to those whose efficiency promises a fair return of work for the compensation paid to them. To secure the fitness and competency of appointees to office, and to remove from political action the demoralizing madness for spoils, civil-service reform has found a place in our public policy and laws. The benefits already gained through this instrumentality and the further usefulness it promises, entitle it to the hearty support and encouragement of all who desire to see our public service well performed or who hope for the elevation of political sentiment and the purification of political methods.

The existence of immense aggregations of kindred enterprises and combinations of business interests, formed for the purpose of limiting production and fixing prices, is inconsistent with the fair field which ought to be open to every independent activity. Legitimate strife in business should not be superseded by an enforced concession to the demands of combinations that have the power to destroy; nor should the people to be served lose the benefit of cheapness which usually results from wholesome competition. These aggregations and combinations frequently constitute conspiracies against the interests of the people, and in all their phases they are unnatural and opposed to our American sense of fairness. To the extent that they can be reached and restrained by Federal power, the General Government should relieve our citizens from their interference and exactions.

Loyalty to the principles upon which our Government rests positively demands that the equality before the law which it guarantees to every citizen should be justly and in good faith conceded in all parts of the land. The enjoyment of this right follows the badge of citizenship wherever found, and, unimpaired by race or color, it appeals for recognition to American manliness and fairness.

Our relations with the Indians located within our borders impose upon us responsibilities we can not escape. Humanity and consistency require us to treat them with forbearance, and in our dealings with them to honestly and considerately regard their rights and interests. Every effort should be made to lead them, through the paths of civilization and education, to self-supporting and independent citizenship. In the mean time, as the nation's wards they should be promptly defended against the cupidity of designing men and shielded from every influence or temptation that retards their advancement.

The people of the United States have decreed that on this day the control of their Government in its legislative and executive branches shall be given to a political party pledged in the most positive terms to the accomplishment of tariff reform. They have thus determined in favor of a more just and equitable system of Federal taxation. The agents they have chosen to carry out their purposes are bound by their promises, not less than by the command of their masters, to devote themselves unremittingly to this service.

While there should be no surrender of principle, our task must be undertaken wisely and without heedless vindictiveness. Our mission is not punishment, but the rectification of wrongs. If, in lifting burdens from the daily life of our people, we reduce inordinate and unequal advantages too long enjoyed, this is but a necessary incident of our return to right and justice. If we exact from unwilling minds acquiescence in the theory of an honest distribution of the fund of the governmental beneficence treasured up for all, we but insist upon a principle which underlies our free institutions. When we tear aside the delusions and misconceptions which have blinded our countrymen to their condition under vicious tariff laws, we but show them how far they have been led away from the paths of contentment and prosperity. When we proclaim that the necessity for revenue to support the Government furnishes the only justification for taxing the people, we announce a truth so plain that its denial would seem to indicate the extent to which judgment may be influenced by familiarity with perversions of the taxing power; and when we seek to reinstate the self-confidence and business enterprise of our citizens, by discrediting an abject dependence upon governmental favor, we strive to stimulate those elements of American character which support the hope of American achievement.

Anxiety for the redemption of the pledges which my party has made, and solicitude for the complete justification of the trust the people have reposed in us, constrain me to remind those with whom I am to coöperate that we can succeed in doing the work which has been especially set before us only by the most sincere, harmonious, and disinterested effort. Even if insuperable obstacles and opposition prevent the consummation of our task, we shall hardly be excused; and if failure can be traced to our fault or neglect, we may be sure the people will hold us to a swift and exacting accountability.

The oath I now take to preserve, protect, and defend the Constitution of the United States, not only impressively defines the

great responsibility I assume, but suggests obedience to constitutional commands as the rule by which my official conduct must be guided. I shall to the best of my ability, and within my sphere of duty, preserve the Constitution by loyally protecting every grant of Federal power it contains, by defending all its restraints when attacked by impatience and restlessness, and by enforcing its limitations and reservations in favor of the States and the people.

Fully impressed with the gravity of the duties that confront me and mindful of my weakness, I should be appalled if it were my lot to bear unaided the responsibilities which await me. I am, however, saved from discouragement when I remember that I shall have the support and the counsel and coöperation of wise and patriotic men who will stand at my side in cabinet places or will represent the people in their legislative halls.

I find also much comfort in remembering that my countrymen are just and generous and in the assurance that they will not condemn those who by sincere devotion to their service deserve their forbearance and approval.

Above all, I know there is a Supreme Being who rules the affairs of men and whose goodness and mercy have always followed the American people; and I know He will not turn from us now if we humbly and reverently seek His powerful aid.

The Senate returned to its Chamber at 2 o'clock and 3 minutes p. m., and the Vice-President resumed the chair.

NOTIFICATION TO THE PRESIDENT.

Mr. BLACKBURN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That a committee to consist of two Senators be appointed to wait on the President of the United States and inform him that the Senate is assembled and ready to receive any communication he may be pleased to make.

The VICE-PRESIDENT appointed Mr. BLACKBURN and Mr. ALLISON as the committee.

HOUR OF MEETING.

On motion of Mr. HARRIS, it was

Ordered, That the daily hour of meeting of the Senate be 12 o'clock m. until otherwise ordered.

Mr. GORMAN. I move that the Senate adjourn.

The motion was agreed to; and (at 2 o'clock and 5 minutes p. m.) the Senate adjourned until Monday, March 6, 1893, at 12 o'clock m.

MONDAY, *March 6, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

ALFRED H. COLQUITT, a Senator from the State of Georgia, JOSEPH N. DOLPH, a Senator from the State of Oregon, LELAND STANFORD, a Senator from the State of California, and EDWARD C. WALTHALL, a Senator from the State of Mississippi, appeared in their seats to-day.

The Journal of the proceedings of Saturday last was read and approved.

NOTIFICATION TO PRESIDENT.

Mr. BLACKBURN and Mr. ALLISON, the committee appointed to wait on the President of the United States, appeared at the bar of the Senate, and

Mr. BLACKBURN said: Mr. President, the committee appointed to wait upon the President and inform him of the fact that the Senate is in session and ready to receive any communication he may have to make have discharged that duty, and were requested by the President to state that he will very soon to-day communicate to the Senate in writing.

EXECUTIVE SESSION.

Mr. O. L. PRUDEN, one of the secretaries of the President, appeared at the bar and said: Mr. President, I am directed by the President of the United States to deliver to the Senate sundry messages in writing.

Mr. HARRIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were reopened.

ADJOURNMENT TO THURSDAY.

On motion of Mr. GORMAN, it was

Ordered, That when the Senate adjourn to-day it be to meet on Thursday next.

SWAMP LAND GRANT PATENTS.

Mr. CALL. I submit a resolution, which I send to the desk and ask to have read and lie on the table. It is my intention to obtain some action by the Senate upon it if I can do so.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved by the Senate, That the Secretary of the Interior be, and he is hereby, requested to suspend the approval or the issuing of patents to land under acts of Congress granting swamp and overflowed land and under the act of May 17, 1856, granting land to the States of Alabama and Florida in aid of the construction of certain lines of railway, until Congress shall hereafter authorize the approval of lists of such lands.

Mr. WOLCOTT. I object to the consideration of the resolution.

The VICE-PRESIDENT. The resolution will lie over until to-morrow.

Mr. CALL. The Senator from Colorado has no right under the rules to object to the consideration of the resolution. I do not design to ask its consideration to-day, but I shall do so on the next day's session of the Senate. I wish to say that there are precedents for this action, and it has been the practice of the Senate of late years to consider resolutions which relate to the action of this body alone.

Mr. WOLCOTT. My objection is made under the rules of the Senate. I do not care to go into the consideration of the other question.

Mr. CALL. The Senator has no right to make such an objection, because no present consideration has been asked of the resolution.

Mr. WOLCOTT. I suppose I have the right to object, and the Chair will pass upon the correctness of my objection.

Mr. COCKRELL. Let the resolution be printed.

Mr. BUTLER. The resolution goes over on one objection, and will be printed.

The VICE-PRESIDENT. So the Chair understands.

CHANGE OF INAUGURATION DAY.

Mr. SHERMAN. I introduce a joint resolution which I ask may lie on the table, to be referred hereafter to the Committee on the Judiciary. It is a joint resolution in amendment of the Constitution. I ask that it be read at length.

Mr. HARRIS. Do I understand the Senator to say it is a joint resolution?

Mr. SHERMAN. It is a joint resolution proposing an amendment to the Constitution, which I merely desire to introduce for reference. I ask that it be read and referred to the Committee on the Judiciary.

The joint resolution (S. R. 1) proposing an amendment to the Constitution of the United States was read the first time by its title, and the second time at length, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article be proposed to the Legislatures of the several States as an amendment to the Constitution of the United States, as part of the Constitution, namely:

The term of office of the President and of the Fifty-fourth Congress shall continue until noon of the 30th day of April in the year 1897. The Senators whose term would expire on the 4th day of March in the year 1897 shall continue in office until noon of the 30th day in April succeeding such expiration: and the 30th day of April, at noon, shall thereafter be substituted for the 4th day of March as the commencement and termination of the official term of the President, Vice-President, Senators, and Representatives in Congress.

Mr. HOAR. Before the joint resolution passes from the consideration of the Senate I desire to say that I hope the Senator from Ohio will have it referred to the Committee on Privileges and Elections. The subject has been considered by that committee more than once. I had the honor to introduce a joint resolution substantially like the one the Senator now introduces, and it passed the Senate on the report of that committee.

Mr. SHERMAN. I have no objection to the reference of the joint resolution even now to the Committee on Privileges and Elections. We can make the reference although the committees are not yet organized.

Mr. HARRIS. It was my fault that I did not hear the joint resolution. Let it be read again.

The joint resolution was again read.

Mr. HARRIS. I wish to ask what action the Senator from Ohio proposes to take?

Mr. SHERMAN. I wish the joint resolution to lie on the table to be hereafter referred to the Committee on Privileges and Elections.

Mr. HARRIS. Let it lie on the table for the present.

The VICE-PRESIDENT. The Senator from Ohio requests that the joint resolution lie on the table, to be referred hereafter to the Committee on Privileges and Elections.

Mr. HARRIS. Let it be printed.

The VICE-PRESIDENT. It will be printed. Without objection, this will be taken to be the action of the Senate.

Mr. HARRIS. I move that the Senate adjourn.

The motion was agreed to; and (at 12 o'clock and 32 minutes p. m.) the Senate adjourned until Thursday next, March 9, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 6, 1893.

SECRETARY OF STATE.

Walter Q. Gresham, of Illinois, to be Secretary of State, vice John W. Foster, resigned.

SECRETARY OF THE TREASURY.

John G. Carlisle, of Kentucky, to be Secretary of the Treasury, vice Charles Foster, resigned.

SECRETARY OF WAR.

Daniel S. Lamont, of New York, to be Secretary of War, vice Stephen B. Elkins, resigned.

ATTORNEY-GENERAL.

Richard Olney, of Massachusetts, to be Attorney-General, vice William H. H. Miller, resigned.

POSTMASTER-GENERAL.

Wilson S. Bissell, of New York, to be Postmaster-General, vice John Wanamaker, resigned.

POSTMASTER-GENERAL.

Wilson S. Bissell, of New York, to be Postmaster-General.

SECRETARY OF THE NAVY.

Hilary A. Herbert, of Alabama, to be Secretary of the Navy.

SECRETARY OF THE INTERIOR.

Hoke Smith, of Georgia, to be Secretary of the Interior.

SECRETARY OF AGRICULTURE.

Julius Sterling Morton, of Nebraska, to be Secretary of Agriculture.

THURSDAY, *March 9, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Monday last was read and approved.

SENATOR FROM MONTANA.

Mr. TELLER. I present the credentials of Hon. Lee Mantle, who has been appointed a Senator from the State of Montana by the governor of that State. I ask that the credentials be read and lie on the table until the Committee on Privileges and Elections is formed, and then referred to that committee.

The credentials were read, as follows:

Whereas a vacancy hath happened in the office of Senator in the Congress of the United States from the State of Montana by the expiration of the official term of Wilbur S. Sanders, which said vacancy happened at noon of the 4th day of March, 1893, which said date was during a recess of the Legislature of said State, which said recess still continues and said vacancy still exists: and

Whereas by section 3 of the Constitution of the United States, it is provided as to Senators in the Congress of the United States "if vacancies happen by resignation or otherwise during the recess of the Legislature of any State the executive thereof may make temporary appointments until the next meeting of the Legislature," and the exigency therein contemplated hath occurred:

Now, therefore, I, John E. Richards, governor of the State of Montana, by virtue of the power in me vested have appointed, and do hereby appoint, Lee Mantle to be a Senator in the Congress of the United States from the State of Montana to fill such vacancy until the next meeting of the Legislature of the State of Montana.

In witness whereof I have hereunto set my hand and caused the seal of the State of Montana to be hereto affixed at Helena, in said State, at 12.30 o'clock of the 4th day of March, in the year of our Lord 1893, and of the Independence of the United States of America the one hundred and seventeenth.

[SEAL.] J. E. RICHARDS, *Governor.*

By the governor:

L. ROTWITT, *Secretary of State.*

Mr. VANCE. There has been so much confusion in the Chamber and in the galleries that I must ask what is the motion with reference to the credentials which have just been read?

Mr. TELLER. If the Senator from North Carolina will allow me, I will state that I asked that the credentials lie on the table, to be referred to the Committee on Privileges and Elections when formed. I do not propose to ask the Senate to take any action at this time, as I understand there is another credential presenting exactly the same question of law which has not yet been submitted, and I understand it is the intention of the committee at an early day to look into the question of law and make a report to the Senate.

Mr. VANCE. That is satisfactory to this side of the Chamber. When the credentials of the Senator appointed from Wyoming are presented I shall ask that the same course be taken.

The VICE-PRESIDENT. The credentials will lie on the table.

ADJOURNMENT TO MONDAY.

Mr. GRAY. I move that when the Senate adjourns to-day it adjourn to meet on Monday next.

The motion was agreed to.

WITHDRAWAL OF PAPERS.

Mr. PROCTOR. I ask for the adoption of the following order:

Ordered, That N. J. Coffin have leave to withdraw his papers in connection with Senate bill 3638, from the files of the Senate, subject to the rules of the Senate.

The VICE-PRESIDENT. The order will be made as requested by the Senator from Vermont, in the absence of objection.

Sundry messages in writing were received from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries.

ELECTION OF SENATORS BY DIRECT VOTE OF THE PEOPLE.

Mr. MITCHELL of Oregon. I introduce a joint resolution, which I ask may be read the first and second times by title and lie on the table, to be referred to the Committee on Privileges and Elections when that committee is raised.

The joint resolution (S. R. 2) proposing an amendment to the Constitution of the United States, providing for the election of Senators by the votes of the qualified electors of the States, was read twice by its title.

Mr. MANDERSON. I hope the Senator from Oregon will simply permit the joint resolution to lie on the table without any order as to its reference to a committee until the question shall be determined by the Senate whether at this extraordinary session, which is called for executive purposes, we shall transact any legislative business.

Mr. MITCHELL of Oregon. Very well; I am willing the order of reference shall be left open. Let the joint resolution lie on the table.

The VICE-PRESIDENT. The joint resolution will lie on the table.

BUSINESS OF THE SESSION.

Mr. GORMAN. Before the subject passes from consideration I wish to suggest, as the Senator from Nebraska [Mr. MANDERSON] has done, that I think the uniform custom has been that at called executive sessions matters of legislation have not been introduced. There are some exceptions, it is true, but as my recollection serves me it has, by common consent heretofore, been understood that only such matters as the Senate alone can deal with should be presented for consideration at an extraordinary session. Otherwise, by the introduction of bills and joint resolutions legislative subjects will be brought before us for consideration.

I only throw out the suggestion, confirming the statement of the distinguished Senator from Nebraska, whether it would not be wise to follow the universal custom and not present matters of legislation at the present special session.

Mr. MITCHELL of Oregon. I wish to call the attention of the Senator from Maryland to the fact that four years ago I think the RECORD will show that both resolutions and bills were introduced.

Mr. SHERMAN. In consequence of conversation at the last meeting of the Senate, I looked into the precedents somewhat as to the course of the Senate in regard to business at a called or executive session, and I find that in nearly every called session, running back at least for forty years, the Senate has, I

think without exception, received sometimes petitions, sometimes resolutions, and sometimes other matters, but usually did not act upon them. I came to the conclusion, therefore, that whatever may be the policy and the desire of the Senate at the particular moment, the Senate being once convened by the President of the United States it can exercise all the powers it has under the Constitution of the United States; that it is a mere question of discretion as to what ought to be done.

As a general rule I think it would be better when an executive session is called to confine ourselves to executive business, or to that business which may be done by the Senate in respect to its own organization, as it may pass upon the right of a person claiming to be a Senator to a seat in this body, or do anything which it may properly and conclusively do by itself.

So I do not think there is any question of constitutional law involved, but it is merely a question of discretion. In following the general precedents I should feel inclined not to take up anything which can not be concluded and acted upon at the present time by the Senate, but to confine our action to passing upon treaties and executive messages, and also any questions relating to the organization of the body or the admission of new members.

Mr. HARRIS. I should like to ask the Senator from Ohio, who has been looking into the precedents, if he has found a single instance in the whole history of the Government where, when the Senate was convened in executive session, any action looking to legislation and requiring the action of both Houses of Congress has been entered upon?

Mr. SHERMAN. I have before me what occurred in 1873, when the Senate decided by two separate yea-and-nay votes that it would not receive petitions. I find that Mr. Howe had gathered the precedents, and he showed conclusively that at different periods from 1829 down petitions were received, that resolutions were offered in some cases, and there were presented resolutions of the legislative council of the Territory of Wisconsin.

As far back as 1829 "the Vice-President laid before the Senate a memorial of Messrs. Gales & Seaton, soliciting a subscription in behalf of the United States to a proposed compilation of executive and legislative documents," etc. There are various precedents as to what the Senate did or did not do, but it is clear that in every case it confined itself to those questions of which the Senate alone could take jurisdiction.

Mr. HARRIS. The presentation of a petition falls very far short of the introduction of a bill or joint resolution, which requires the action of both Houses of Congress and is in every essential respect the beginning of legislation. I hope the Senator from Ohio will not insist upon setting the precedent that the consideration of his joint resolution or even its introduction will set for those who shall come after us.

Mr. DOLPH. Mr. President, I am quite indifferent as to what rule the Senate may adopt in regard to the introduction of legislative business or business which requires the action of both Houses. The Senator from Florida [Mr. CALL] on Monday introduced a Senate resolution, which was legislative business, and the Senator from Ohio [Mr. SHERMAN] introduced a joint resolution, thus setting the precedent. To-day my colleague [Mr. MITCHELL] has introduced a joint resolution. I hold one in my hand which I have been urged to present. I think the question ought to be met upon the right to introduce such a resolution, and I am quite willing that it should be made upon my own offer to introduce such a resolution; but if the Senator from Ohio, my colleague, and other Senators are to be allowed to introduce resolutions which require the action of both Houses, I simply do not want to be left out of the procession.

Mr. HARRIS. Is the Senator's resolution a joint resolution?

Mr. DOLPH. It is a joint resolution.

Mr. HARRIS. Then I interpose an objection to its being introduced.

Mr. DOLPH. Let it be offered.

Mr. HARRIS. Very well; the Senator may offer it; and I object to its being received at this session.

Mr. BUTLER. I merely rose for the purpose of interposing an objection. Of course my friend from Oregon understands I do not object with a view of being discourteous to him.

Mr. DOLPH. It will not be so, because I have signified my entire willingness that the rule which we are to follow shall be adopted on my offer to introduce a joint resolution.

Mr. BUTLER. Exactly; and I rose simply for the purpose of interposing an objection to the introduction of the joint resolution, as the Senator from Tennessee [Mr. HARRIS] has already done.

Mr. CULLOM. Mr. President——

Mr. DOLPH. Let the joint resolution be read by title, that the matter may be intelligently placed before the Senate on the offer to introduce it.

Mr. CULLOM. Very well.

The VICE-PRESIDENT. The joint resolution will be read by title.

The SECRETARY. A joint resolution calling on the President to take such measures as he may deem necessary to consummate the agreement between the Governments of Spain and the United States for the relief of Antonio Maximo Mora, a naturalized citizen of the United States.

Mr. CULLOM. I have in my hand the CONGRESSIONAL RECORD, which perhaps is the same volume referred to by the Senator from Ohio. In 1873 Senator Howe introduced the petition of John Alsop, coheir of Thomas Jenkins, etc. The question of its reception was debated somewhat by different Senators. Among others the distinguished Senator from Ohio took part, and I think the Senator's views then were that such a paper ought not to be received by the Senate. Without detaining the Senate by reading what took place, I will state that the judgment of the Senate was, I think, finally, that while petitions might be presented to be retained or cared for during the vacation, they could not be received to be referred to committees for consideration as connected with legislation. That seems to have been the judgment of Senators then.

Mr. HOAR. Was it held that petitions ought not or could not be received under the Constitution?

Mr. CULLOM. It was the view of the Senate that they should not be received. The question whether it was constitutional or not I do not undertake to discuss, but the view expressed by Senator Hamlin, Senator Bayard, and I think Senator SHERMAN and others was that in an executive session, called as is this one, petitions for legislation should not be received, and they were finally rejected.

Mr. PLATT. Mr. President, this question arises every four years. I remember very distinctly we had a similar discussion four years ago. While I myself believe that it is competent for the Senate to transact at this session any business which it may transact at any other session, I have always been of the opinion that, as a matter of convenience and perhaps of propriety, it was well not to engage in legislative business. I have always understood in the fourteen years that I have been here that that course has been pursued by the Senate, as was suggested by the Senator from Maryland [Mr. GORMAN] a few moments ago, by common consent, without attempting to pass upon the question whether the Senate has the constitutional right to engage in legislation or not.

I am fully in sympathy with the idea of not entering upon legislative business at this session, but at the same time I wish to say, if the question of our right to do so was under consideration, I should be of the opinion that we have a perfect right to engage in legislative business. Therefore, in whatever course the Senate may take, I, for one, should not want to feel concluded by the opinion of the Senate, and should not want anything that we do to pass as the opinion of the Senate that we have not the right to engage in legislative business. I am quite willing to forego such business. I think it is better for our convenience and for all the proprieties of legislation that we should do so.

Mr. MITCHELL of Oregon. Mr. President, the Senator from Connecticut [Mr. PLATT] has stated precisely my view of this matter. I have no doubt at all as to our jurisdiction.

It has been said, however, that we have been convened in executive session by the President of the United States. We have not been convened in executive session by the President of the United States. The Senate has been convened in extraordinary session; and so far as the right of any Senator to introduce any matter of legislation is concerned, I have no doubt at all that that right exists; but I fully agree with the suggestion made by the Senator from Maryland [Mr. GORMAN], by the Senator from Connecticut, and other Senators, that it is bad policy even to introduce measures which require the action of both Houses; and I should not have introduced such a measure this morning except from the fact that the Senator from Florida [Mr. CALL] on Monday introduced a resolution and the Senator from Ohio [Mr. SHERMAN] also introduced a joint resolution proposing an amendment to the Constitution of the United States. I desired to present my joint resolution in order that it might be before the Senate in the event the Senate should decide to receive business of that kind.

Mr. VEST. If the Senator will permit me, I wish to make a single remark.

I recollect twelve years ago, under the identical circumstances which surround us to-day, I introduced a petition and a bill, coming, I remember distinctly, from merchants of the city of St. Louis, and some of the most eminent men who have ever been in this body were then members of it. This question was brought up and discussed and decided in the affirmative, that the Senate had the right to receive matters of that kind; and the petition was received and the bill was laid upon the table until the committees were formed.

Mr. MITCHELL of Oregon. It has been decided both ways by the Senate heretofore.

Mr. MANDERSON. Mr. President, like those who have spoken, I have no doubt, when the Senate is called in extraordinary session, under that constitutional power which vests in the President of the United States to call Congress or either House in extraordinary session, that it has the constitutional right to proceed to the consideration of any subject-matter, whether it be legislative or executive, which is within its jurisdictional power.

But we all understand the purpose for which the Senate is called in session when there is a change in the Executive. It is for the purpose of considering very largely executive business. There can be no possible objection, perhaps, to the receipt by the Senate of petitions, and that they shall lie upon the table or be placed upon the files for the future consideration of the Senate; but I see very grave objections to the introduction of bills and joint resolutions.

Bills or joint resolutions introduced at this executive session by a few members of the Senate have a certain precedence over matters which may be introduced by other Senators at the regular session which I do not think they should possess.

I should not think that either side or any member of this body would desire to go on either in committee or in the Senate with the consideration of that which requires the joint action of the two bodies, not that I hold to the view that the Senate can not at this time consider bills, but I consider it best that it should not.

I offer the resolution which I send to the desk, and ask for its present consideration.

The VICE-PRESIDENT. The resolution offered by the Senator from Nebraska will be read.

The Secretary read the resolution as follows:

Resolved, That it is the sense of the Senate that at this extraordinary session of the Senate the business transacted shall be confined to executive matters and those requiring the action of the Senate only.

Mr. TELLER. Understanding that that resolution is only a declaration of policy, I shall not object to it.

Mr. MANDERSON and Mr. BUTLER. That is all it is.

Mr. TELLER. That the Senate has a right to proceed as if the House of Representatives were in session I do not think can be successfully denied.

Mr. PLATT. This resolution is an admission of that.

Mr. TELLER. If it is an admission of that right, as some Senators suggest, it is all right.

I have looked into the precedents, and I am satisfied that the modern precedents are that we have the right to legislate. We can prepare bills and pass them and get them ready for the action of the other House. It is a mere question of policy. I do not want to legislate at this session, but I should not like to have any precedent made here which could be used against us hereafter, that the Senate has not the constitutional power to pass upon these questions.

Mr. DOLPH. Is the resolution of the Senator from Nebraska in order at this time? I was of the opinion that the presentation of the joint resolution offered by myself was the pending question.

Mr. BUTLER. That goes over for a day.

The VICE-PRESIDENT. The Chair will state to the Senator from Oregon that his joint resolution has been objected to and that it has gone over until to-morrow.

Mr. DOLPH. Is a joint resolution subject to objection on its presentation?

Mr. BUTLER. Certainly, the joint resolution goes over under objection.

The VICE-PRESIDENT. The first clause of Rule XIV will be read.

The Secretary read as follows:

1. Whenever a bill or joint resolution shall be offered, its introduction shall, if objected to, be postponed for one day.

Mr. SHERMAN. I ask that the resolution offered by the Senator from Nebraska [Mr. MANDERSON] may be again read.

The VICE-PRESIDENT. The resolution will be again read.

The Secretary read the resolution.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. DOLPH and Mr. COCKRELL. Let the resolution lie over.

Mr. SHERMAN. Treaties ought to be included in that resolution.

Mr. COCKRELL. I ask that the resolution be printed. I object to its present consideration.

The VICE-PRESIDENT. The Senator from Missouri objects to the immediate consideration of the resolution, and it will lie over under the rules and be printed.

Mr. HALE. I offer the resolution which I send to the desk as a substitute for the resolution offered by the Senator from Nebraska [Mr. MANDERSON].

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That no legislative business shall be received or entertained at the present session of the Senate.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. COCKRELL. Let it be printed and lie over.

The VICE-PRESIDENT. The Senator from Missouri objects, and the resolution will be printed and lie over.

Mr. HALE. I desire to modify the resolution by inserting the words "excepting treaties."

The VICE-PRESIDENT. The resolution will be read as modified.

The Secretary read the resolution as modified, as follows:

Resolved, That no legislative business excepting treaties shall be received or entertained at the present session of the Senate.

Mr. HARRIS. I wish to ask the Senator from Maine if he deems it necessary to except treaties? Does he consider the action of the Senate upon a treaty legislative business in contradistinction to executive business?

Mr. HALE. I put those words in out of abundant caution, because there are Senators who believe that when we adopt treaties and make them the law between us and other nations, they are perhaps the highest form of legislation.

Mr. HARRIS. No matter how important or how high the form, treaties are purely executive.

Mr. HALE. The insertion of the words will do no harm at any rate.

Mr. MILLS. A treaty might require legislation by both Houses in order to carry it into effect. Where a treaty deals with the taxing power we should certainly have to get the consent of the House of Representatives. I think the words well put in by the Senator from Maine.

Mr. McPHERSON. I should like to make a single inquiry. The resolution seems to be very broad, and I wish to know whether it would cover Senate resolutions?

Several SENATORS. No.

Mr. McPHERSON. I wish to call the attention of the Senator from Maryland [Mr. GORMAN], who objected to the presentation of resolutions, to the fact that it may be necessary in order to expedite the business of the session when we meet again, that some of the committees of the Senate should be required to perform certain labors during the recess. If the pending resolution would shut out all Senate resolutions which would be a direction to its committees, I should think that it ought to be changed or modified to the extent that the Senate might in open session direct certain committees to sit during the recess to perform labor which may be necessary and expedient for us to have at the coming session. Such resolutions should be permitted to be introduced and acted upon.

Mr. GORMAN. When the Senator from Ohio [Mr. SHERMAN] introduced a joint resolution to amend the Constitution of the United States on the second day of the session my recollection then was that it was an unusual procedure, and that the general determination on the part of the Senate in special executive sessions was not to receive any matter of legislation or to transact any business whatever except those matters which the Senate alone could deal with, which included, as a matter of course, the organization of its committees, instructions to its committees to perform any duty during the recess, questions relating to the organization of the body, and executive business.

I did not, however, at the time object, because of the experience of the Senator from Ohio; but, like him, I went back over the RECORD, and found the celebrated case to which he referred brought here by Mr. Howe in 1873, on the presentation of petitions, where, after long discussion and an objection on the part of the Senator from Ohio himself to the reception of petitions, by a yea and nay vote of 20 to 31 the Senate decided not to receive even petitions. While there have been one or two attempts since to introduce resolutions and bills, they have upon objection, as the Senator asked in that case, always been laid aside without any action whatever.

Mr. SHERMAN. Allow me to say that on the following day after that decision was made Mr. Howe again introduced the subject-matter—he, Mr. Bayard, I, and others taking part in the discussion—and the Senate yielded so far as to agree that petitions might be received, laid upon the table, and taken care of, not to be acted upon at that session. The next day there was another vote upon the question, Mr. Howe insisting upon his right of presenting the petitions. That vote reaffirmed the first vote, and that was the settlement of the matter. The petitions were received and laid upon the table, but not referred.

Mr. GORMAN. And with the distinct statement then made by the Senator from Ohio himself that it was a mere form, that

the Secretary might preserve the papers until the next session convened.

Mr. SHERMAN. That was what we thought the proper thing to do at that time.

Mr. GORMAN. Mr. Howe in that discussion went back to the beginning of the Government, and he found but very few cases, all of which are on page 77, volume 1, CONGRESSIONAL RECORD, Forty-third Congress, special session of the Senate. By common consent, without the adoption of any resolution, the uniform custom has been to exclude the presentation of legislative business.

I trust, even without the passage of a resolution now, we may have, by common consent, an understanding to-day that no petitions, joint resolutions, bills, or other legislative matter may be considered or presented at this session, but that the Senate will go on and deal exclusively with those matters within its jurisdiction, including all executive business, whether treaties or otherwise, and not pass resolutions.

Now, Mr. President, I ask unanimous consent that that shall be the rule at this executive session.

Mr. TELLER. For this session?

Mr. GORMAN. For this session.

Mr. CULLOM. Without the passage of any resolution on the subject?

Mr. GORMAN. Yes.

Mr. HOAR. Mr. President, I think the resolutions which have been offered had better go over and also the request for unanimous consent. I have no doubt that the Senate will, without an exception, come to the conclusion indicated by the Senator from Maryland, but there are reasons why I prefer to have these questions go over at present.

Mr. GORMAN. Very well; let the whole subject-matter go over.

The VICE-PRESIDENT. The resolutions have gone over under objection.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. CALL. I ask the Senator from Maryland to withdraw his motion for a moment that I may be allowed to say a word.

Mr. GORMAN. Very well.

Mr. CALL. The resolution which I introduced has to some extent provoked the observations which have been made upon the floor of the Senate. My resolution is a Senate resolution and asks no other action than the action of the Senate in the shape of a request on the Interior Department in reference to certain matters, carrying with it only that weight which an expression on the part of this body might have with an Executive Department of the Government.

Although it is a matter of great importance whether or not there has been a corrupt and an unauthorized misappropriation of great bodies of the public lands of the country, and although this body is peculiarly charged with the duty of protecting the people of the country against fraudulent administration of any kind, I am content, if it be the sense of the Senate, when charges are made of gross misconduct in reference to the administration of any of our great Departments, that there shall be no investigation of the subject at this time.

Upon the question of the power of the Senate, however, there can be no reasonable objection. Where is the limitation to it? Is not this a Senate? Is it not a body with full power to do those things which the Constitution authorizes it to do? Where is the limitation in the Constitution as to the power of this body in respect to the time in which they shall perform the functions assigned to them? It is true there can be no law without the action of the other House of Congress, but that is the only limitation.

There is neither restraint nor direction nor limitation as to the time in which this permanent branch of the Legislature, always capable of sitting, may discharge any function assigned to it. Who is to tell whether or not treaties or Senate resolutions will require in some of their branches the concurrence of the other House of Congress? Where is there a treaty which does not require some action on the part of the other House of Congress, or at least that may not require it?

So I think it is eminently proper, when a public exigency demands it, that this body in session should perform any function which it may possess.

In regard to the policy of entering upon legislation at this time, I am entirely indifferent what action the Senate may take. I am content to leave the subject of the resolution I introduced to the able and faithful man who is the President of the United States, and the accomplished and talented man, Mr. Smith, who is Secretary of the Interior. I have entire confidence that they will be true friends of the people and will defend them in all their rights and secure to even the poorest and humblest of them their right to their homes upon the public lands against the most powerful corporations and influences.

IMMIGRATION AND CONTRACT-LABOR LAWS.

Mr. CHANDLER. I offer a resolution for reference to the Committee on Printing when appointed.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That there be printed for the use of the Senate 2,000 copies of the act of March 3, 1893, "to facilitate the enforcement of the immigration and contract-labor laws of the United States," supplemented by Senate report, No. 787, of the first session of the present Congress, which accompanied the bill when reported to the Senate.

The VICE-PRESIDENT. The resolution will lie on the table, to be referred to the Committee on Printing when appointed.

NATIONAL UNIVERSITY.

Mr. PROCTOR. I offer a resolution for reference to the Committee on Printing when appointed.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That 5,000 copies of Senate bill No. 3824 "to establish a national university," and of the Senate report thereon, be printed in document form for the use of the Senate.

The VICE-PRESIDENT. The resolution will lie on the table, to be referred to the Committee on Printing when appointed.

CAPT. PHAROS B. BRUBAKER.

The VICE-PRESIDENT. The Chair lays before the Senate a message from the President of the United States, which will be read:

The Secretary read as follows:

To the Senate of the United States:

I transmit herewith a report submitted by the Secretary of State, in compliance with the resolution of the Senate of the 3d instant, calling for information relating to the capture and imprisonment of Capt. Pharos B. Brubaker by Honduras officials.

GROVER CLEVELAND.

EXECUTIVE MANSION,
Washington, March 9, 1893.

The VICE-PRESIDENT. The message will lie on the table.

Mr. COCKRELL. Let it lie on the table to be referred to the Committee on Foreign Relations, when formed.

The VICE-PRESIDENT. The order will be made as suggested by the Senator from Missouri, in the absence of objection.

EXECUTIVE SESSION.

Mr. GORMAN. I now renew my motion for an executive session.

The VICE-PRESIDENT. The question is on the motion of the Senator from Maryland that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seven minutes spent in executive session the doors were reopened, and (at 12 o'clock and 50 minutes p. m.) the Senate adjourned until Monday, March 13, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 9, 1893.

ASSISTANT SECRETARY OF STATE.

Josiah Quincy, of Massachusetts, to be Assistant Secretary of State, vice William F. Wharton, resigned.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Isaac P. Gray, of Indiana, to be envoy extraordinary and minister plenipotentiary of the United States to Mexico, vice Thomas Ryan, resigned.

CONSUL-GENERAL AT LONDON.

Patrick A. Collins, of Massachusetts, to be consul-general of the United States at London, vice John C. New, resigned.

ASSISTANT SURGEON, MARINE HOSPITAL SERVICE.

James H. Oakley, of Illinois, to be an assistant surgeon in the Marine Hospital Service of the United States.

FOURTH ASSISTANT POSTMASTER-GENERAL.

Robert A. Maxwell, of New York, to be Fourth Assistant Postmaster-General, vice Estes G. Rathbone, resigned.

RECEIVER OF PUBLIC MONEYS.

F. P. Gayle, of Roswell, N. Mex., to be receiver of public moneys at Roswell, N. Mex., vice Frank Lesnet, removed.

PROMOTIONS IN THE NAVY.

Lieut. (junior grade) Herbert O. Dunn, to be a lieutenant in the Navy from the 17th February, 1893, vice Lieut. Lovell K. Reynolds, deceased.

Ensign Joseph Beale, to be a lieutenant, junior grade, in the Navy from the 17th February, 1893, vice Lieut. (junior grade) H. O. Dunn, promoted.

Lieut. (junior grade) Arthur W. Dodd, to be a lieutenant in the Navy from the 25th of February, 1893, vice Lieut. R. R. Ingersoll, promoted.

Ensign Edward F. Lieper, to be a lieutenant, junior grade, in the Navy from the 25th of February, 1893, vice Lieut. (junior grade) Arthur W. Dodd, promoted.

ASSISTANT SURGEONS IN THE NAVY.

Alfred Brown Pusey, a resident of Kentucky, and Edward Mansfield Shipp, a resident of Virginia, to be assistant surgeons in the Navy, both to fill vacancies in that grade.

MONDAY, *March 13, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Thursday last was read and approved.

SWAMP LAND GRANT PATENTS.

The VICE-PRESIDENT. The Chair lays before the Senate a resolution submitted by the Senator from Florida [Mr. CALL] coming over from a previous day.

Mr. GORMAN. I ask that the resolution may lie on the table for the present.

The VICE-PRESIDENT. The Senator from Maryland asks that the resolution may lie on the table. That will be the order of the Senate in the absence of objection.

Mr. SHERMAN. I do not understand what the resolution is.

The VICE-PRESIDENT. The resolution will be stated.

The SECRETARY. A resolution by Mr. CALL, requesting the Secretary of the Interior to suspend the approval or the issuing of patents to land in certain cases in Alabama and Florida.

Mr. DOLPH. If there is to be any disposition made of the resolution I shall insist that it be referred to the Committee on Public Lands. The matter has been before that committee at a number of Congresses.

Mr. GORMAN. I merely suggested that the resolution had better lie on the table.

The VICE-PRESIDENT. That will be the order.

Mr. DOLPH. Very well.

BUSINESS OF THE SESSION.

The VICE-PRESIDENT. The Chair lays before the Senate a resolution, submitted by the Senator from Nebraska [Mr. MANDERSON], coming over from a previous day, which will be read.

The Secretary read the resolution submitted by Mr. MANDERSON on the 9th instant, as follows:

Resolved, That it is the sense of the Senate that at this extraordinary session of the Senate the business transacted shall be confined to executive matters, and those requiring the action of the Senate only.

Mr. MANDERSON. I desire to modify the resolution.

The VICE-PRESIDENT. The resolution will be read as modified.

The Secretary read the resolution as modified, as follows:

Resolved, That it is the sense of the Senate that at this extraordinary session of the Senate the business transacted shall be confined to the consideration of treaties and other executive matters and those requiring the action of the Senate only.

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

Mr. COCKRELL. Mr. President, I see no occasion for the passage of this resolution. It will amount to nothing. It would not bind us ten minutes nor ten seconds. I think the Constitution is quite broad enough. Referring to the President, it says in section 3 of article 2:

He may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper.

Now, what does that mean? It does not mean an executive session. The Constitution knows no such thing as an executive session. That is a mere matter of rule for the Senate. This is an extraordinary session under the Constitution, and it possesses every power and right and jurisdiction that the Senate would possess if the other House had been called with it. The President can call the House of Representatives in extraordinary session.

Mr. MANDERSON. If I may interrupt the Senator——

Mr. COCKRELL. Wait until I finish my statement.

Mr. MANDERSON. I simply want to be understood, that is all; and I am not understood by the Senator from Missouri.

Mr. COCKRELL. Very well.

Mr. MANDERSON. No one contends on this floor, and did not in the discussion the other day, but that the Senate when it is called in extraordinary session has every power. The resolution is simply a declaration of the sense of the Senate that we had better not consider legislative matters, and all I hope for it is that either by the force of unanimous consent or by the adoption of the resolution every one shall agree that legislative matters, as the introduction of bills and joint resolutions, shall not be indulged in. Of course I recognize the right of any Senator to introduce a bill or joint resolution notwithstanding this resolution, but we may prevent a flood of such business by passing a simple resolution.

Mr. COCKRELL. I desire to state expressly that in my judgment the President can call the House of Representatives in extraordinary session, and that body can meet and pass every solitary appropriation bill that is necessary to be passed, and can pass a tariff reform bill, and after it has passed them then the President can call the Senate in extraordinary session, or he can let the House continue in extraordinary session until the regular session of Congress, and then the Senate can take up and pass the bills which the House had passed when it was in extraordinary session.

I desire to say to the Senator from Nebraska that there is no occasion for the Senate to say to-day that it will not do a certain thing or that it will declare a certain policy. The Senate is able day by day to take care of itself and to prescribe what it will do. Why undertake at this early moment in the session to pass a resolution to bind us not to introduce any bill or joint resolution? It is simply child's play to undertake to bind the Senate in advance.

I see no occasion for the passage of any resolution. Let the Senate go on and day by day meet the responsibilities that may rest upon it, and let the majority decide how that responsibility shall be discharged.

Mr. HALE. I submitted at the last meeting of the Senate an amendment in the nature of a substitute for the resolution offered by the Senator from Nebraska, which I think the Chair has not laid before the Senate.

The VICE-PRESIDENT. The Chair will state to the Senator from Maine that the attention of the Senate will be called to his resolution in a moment.

Mr. HALE. It was offered as a substitute for the resolution of the Senator from Nebraska.

Mr. MANDERSON. I so understood it.

Mr. HALE. The Senator from Nebraska tells me he so understood it.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution of the Senator from Maine, which will be read.

The Secretary read the resolution submitted by Mr. HALE on the 9th instant as follows:

Resolved. That no legislative business excepting treaties shall be received or entertained at the present session of the Senate.

Mr. HALE. I find in the RECORD of March 10 the following:

Mr. HALE. I offer the resolution which I send to the desk as a substitute for the resolution offered by the Senator from Nebraska.

When I offered it I knew that I was seeking the same end the Senator from Nebraska has in view; and as he has modified his resolution this morning it covers every point.

The resolution which I offered was sent to the desk for the action of the Senate, because it is simply a declaration of what we shall do. It simply declares, in as few words as I could frame it, that at the present session no legislative business excepting treaties shall be received or entertained. It does not deal with the question as to what Senators think. I am, for one, not particularly interested in the investigation of what has been done in the past, or in the old discussions that arose over the Howe resolution. The simple question for us to consider, called together as we are here, is what we shall do, not what we believe we can do. That is not raised at all in my resolution.

I suppose everybody realizes that there is to be no legislation at this session. The question whether we have all the vast power as one branch that the Senator from Missouri has indicated is not before us. Nobody is going to invoke any such power. Everybody knows we are here for a simple purpose—to consider executive nominations and possibly an important treaty. I, for one, can not see what is gained by any Senator projecting legislative matter upon this session. The trouble will be that if we go on as the Senator from Missouri indicates and do not adopt a rule we all believe in every day will be taken up with these discussions. My object was to stop all that in a practical way and to say what I think we all believe we should do, that is, consider no legislative business.

Therefore I should hope that we might come to an agreement upon this resolution, unless, as suggested by the Senator from Maryland [Mr. GORMAN] the other day, without any vote we unanimously agree here to do what we are going to do. I have legislation of importance to my constituents, and important I think to the people of the United States, but I shall gain nothing by hurrying in a resolution to get into the newspapers and be reported as being foremost in it. I am willing to wait until the regular session, held for legislative business, and take my chance then. I think four-fifths, nine-tenths, perhaps every

Senator here, has the same feeling about the matter. That is all I seek by my resolution.

Mr. TELLER. Mr. President, I expressed my opinion at the former session of the Senate that we have the power to legislate as stated by the Senator from Missouri. I do not think there can be any question that the principle he lays down is a correct one, but I wish to suggest to the Senators on this side of the Chamber that the Executive has called the Senate in extraordinary session, and it would be rather becoming, I think, on our side to let the majority on the other side indicate what they want to do. I do not know what they want to do. I do not know what the Executive wants to do. The responsibility of legislation and of carrying on the Government now does not rest with us on this side of the Chamber, but with the other side. If they do not want to do anything, if that is their policy, I should be glad to have them say so, and it would be very agreeable to me, as suggested by a Senator near me, to promptly adjourn.

There are some things that the Senate can do beyond all question, and there are some things that the Senate may want to do. The Senate may want to pass some of the usual resolutions of inquiry or some of the usual resolutions of instruction, and about those I think there ought to be no controversy. Things that will go *nem. con.* I think we might properly consider; but things that are going to be contested it would be profitable for us probably to continue until the regular session in the fall.

I myself wanted to introduce a resolution and have it considered by the Senate touching the international monetary conference. If it is possible, I desire to have an expression of the Senate as to whether it is better for the international conference to reassemble; for I discover by the debates in Parliament the English people claim that whether the conference reassembles will depend entirely upon the wishes of the United States Government. But I do not want to introduce a resolution if it is to be simply laid on the table, or if by so doing I am to be accused of precipitating matters of controversy. I wish the Senate could determine just what we ought to do and what we shall do—not what we have the right to do, but what it is good policy for us to do at this session, and what we shall do.

Mr. GORMAN. Mr. President, since the adjournment of the Senate on Thursday I have gone over more carefully the precedents of the body upon this matter. I find that the first considerable debate upon the question occurred in 1851, at the called executive session at the beginning of the Thirty-second Congress, March 5, 1851. William R. King, afterwards Vice-President of the United States but then President *pro tempore* of the Senate, immediately after the prayer, directed the galleries to be cleared and announced that he could not receive any resolution or permit any business to be done until the doors had been closed. He proceeded to say that in the course of a long experience the Chair had known no instance of business being done at such a session until the galleries had been cleared.

Mr. Badger of North Carolina appealed from the decision of the Chair. The question was debated at that session at great length, and while it was almost universally conceded that no business which required the concurrent action of the other House could be done at such a session, there was some difference of opinion as to whether it was in the power of the Senate to transact such business as could be done by itself, independent of the House of Representatives. Finally Mr. Seward offered the following resolution, which has been practically adhered to ever since:

Resolved, That the Senate is not restricted at this session to the consideration of matters purely executive, but that such consideration may be extended to all matters proper to be transacted by the Senate without the coöperation of the House of Representatives.

That resolution has been practically adhered to from that day to this, with some slight exceptions, as was suggested at the last session of the Senate.

Without passing a resolution, and very few have been passed in the mean time, I ask unanimous consent that the resolutions which have been offered may be indefinitely postponed, and that the Senate will by unanimous consent agree not to consider matters which require the attention of the other House, but that all matters proper to be transacted by the Senate without the cooperation of the House may be considered at this session. I ask unanimous consent, first, that the resolutions may be indefinitely postponed; and then that the Senate will agree as I have suggested.

The VICE-PRESIDENT. The Senator from Maryland asks unanimous consent that the resolution proposed by the Senator from Nebraska [Mr. MANDERSON] and the resolution submitted by the Senator from Maine [Mr. HALE] be indefinitely postponed; and that the Senate unanimously agree——

Mr. GORMAN. That it is not restricted at this session to the consideration of matters purely executive, but that such consideration may be extended to all matters proper to be transacted by the Senate without the coöperation of the House of Representatives.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Maryland?

Mr. HOAR. It seems to me that would imply what the Senator from Maryland does not mean to imply, that the Senate has no power to go beyond those matters which can be completed without the coöperation of the House of Representatives. I conceive, and I suppose every Senator conceives, that we have the constitutional power to introduce and discuss and pass a joint resolution if we see fit.

Mr. GORMAN. I avoid that question by simply asking unanimous consent that at this session we shall not consider any subject which requires the action of the other House.

Mr. HOAR. The request is in the form of a resolution, I understand. I ask that the request for unanimous consent may be again stated.

Mr. GORMAN. I ask unanimous consent that the Senate agree at this session not to consider any matter which requires the cooperation of the House of Representatives.

Several SENATORS. That is right!

Mr. HALE. I hope that will be agreed to unanimously.

Mr. GEORGE. Mr. President, I do not know that the proposition is disputed that the Senate has all the powers now that it has when the House of Representatives is in session; or, in other words, this is a call in extraordinary session of the Senate of the United States, and not of anything else but of the Senate of the United States. When it is so called it has all the powers and all the functions which the Constitution of the United States vests in that body. I do not think that proposition is disputed.

I understand now, however, the proposition is that we make a rule of order by which we shall limit the functions of the Senate *pro hac vice;* that is, for this session.

Mr. President, I think it is perfectly competent for the Senate, by a vote upon any proposition which may be submitted to it, to say that we regard the consideration of that particular proposition as inopportune, and therefore decline to consider it; but I respectfully submit that it will be going a very long way to pass a rule of order, whether by a majority vote or by unanimous consent, by which we shall undertake to limit the powers and the functions of the Senate for this session. For that reason, if it requires unanimous consent to adopt such a rule, I decline to give my consent to it.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Maine [Mr. HALE] to the resolution offered by the Senator from Nebraska [Mr. MANDERSON]. The amendment will be stated.

The Secretary read as follows:

Resolved, That no legislative business excepting treaties shall be received or entertained at the present session of the Senate.

Mr. FRYE. Does my colleague mean by that that there shall be no consideration of Senate resolutions?

Mr. HALE. No; my intention was not to embrace Senate resolutions. My intention was merely to embrace such matters as the Senate itself can deal with, without coöperation on the part of the other body. I intended to reach, by a majority vote, precisely the object the Senator from Maryland [Mr. GORMAN] sought to reach by unanimous consent, as evidently unanimous consent can not be had.

Mr. HOAR. I move to amend the amendment of the Senator from Maine by adding this proviso:

Provided, That petitions and resolutions of State Legislatures may be received, to be referred to their appropriate committees at the next session.

Mr. ALLISON. I suggest to the Senator from Massachusetts that if his proviso is attached to the resolution, it in effect will limit the action of the Senate to the reception of such petitions and resolutions. It may be that the Senate will desire at this session to adopt some resolution expressing its views upon certain questions; and as I understand the resolution of the Senator from Maine [Mr. HALE], we are not precluded from so doing under it; but if we provide that certain other things may be done, then we exclude the idea that Senate resolutions are in order. I should prefer myself the phraseology suggested by the Senator from Maryland [Mr. GORMAN] as the true rule to guide us at this session. I think that would cover all the suggestions which have been made.

Mr. HOAR. I do not conceive that my amendment would limit business according to the idea suggested by the Senator from Iowa. It would seem to me that it would be disrespectful not to receive petitions and resolutions of State Legislatures or to postpone their presentation until the next session.

Mr. ALLISON. It seems to me perfectly clear that petitions can be received without the action of the other House; therefore the request of the Senator from Maryland will embrace every phase of this question.

Mr. HOAR. I have no objection to a resolution in the lan-

guage proposed by the Senator from Maryland. My amendment will be offered if the resolution of the Senator from Maine [Mr. HALE] is to be acted on, because I think we all should agree that it would be inconvenient to keep petitions and resolutions of State Legislatures until the next session. The resolution of the Senator from Maine is:

That no legislative business excepting treaties shall be received.

I merely stipulate that petitions and resolutions may be received.

Mr. MANDERSON. Mr. President, if the Senator from Maryland will introduce a resolution in the language he stated a few moments ago, as that accomplishes the purpose, I certainly shall be glad to withdraw the resolution I have offered.

Mr. HALE. And I shall be very glad to withdraw mine.

Mr. GORMAN. I trust Senators will withdraw the resolutions. If we can not have unanimous consent I think probably we had better go on and dispose of these questions as they arise. Therefore I trust the Senators from Nebraska and Maine will withdraw their resolutions.

Mr. HALE. If the Senator will introduce his proposition in writing as he stated it verbally I think there will be no difficulty in getting almost the united vote of the Senate to such an agreement. I am entirely willing to withdraw my resolution, because it raises certain points suggested by the Senator from Iowa [Mr. ALLISON] and the Senator from Massachusetts [Mr. HOAR]; the Senator from Nebraska [Mr. MANDERSON] is also willing and desirous of withdrawing his resolution; and we can settle the matter here and now.

Mr. COCKRELL. Mr. President, why pass any resolution? We have had these called sessions every four years, and I have witnessed a number of them. I witnessed them when gentlemen on the other side of the Chamber controlled the Senate, and they never introduced any resolution to attempt in the beginning of a session to determine every little thing that should be done.

Mr. HALE. Mr. President——

Mr. COCKRELL. Wait a minute.

Resolutions have been passed from time to time, such as the Senate thought it had jurisdiction of; other business has been introduced, and we were able to get along as Senators 21 years of age and of rational mind. The Democratic party had control of the Senate from 1879 to 1881, and we did not pass any resolution then declaring that we would in our rational mood bind our hands so that we could not do anything for the balance of the session.

I think the Senate is competent to take care of its business from day to day without attempting to pass a rule that we shall not do this thing or that thing. I think one Senator is as competent as another to determine whether he will introduce a resolution or not. The Senator from Ohio [Mr. SHERMAN] had a perfect right to introduce his joint resolution. He has not asked that it shall be acted upon. We shall form our committees, and if Senators want bills and resolutions referred to committees for consideration it is their right to have them so referred; but no committee will undertake to report them back at this session so as to keep the Senate here indefinitely. If a committee should arrogate to itself the right to pursue such a course the Senate can very easily lay the matter on the table.

I see no earthly reason why we should begin to pass resolutions declaratory of our purposes as to what shall be done in the future. "Sufficient unto the day is the evil thereof."

Mr. HALE. Mr. President, I suppose the object Senators had in introducing such resolutions as have been presented was to avoid taking up the time just as it has been taken up to-day. It was seen at once when we began here that an attempt was to be made to turn this into a legislative session, to deal with subjects other than that for which we were called here, and whether we had a right to do so or not was the particular question that would be debated, as it has been here to-day. The object I had and the object, I have no doubt, that the Senator from Nebraska had, was to get us rid of these useless discussions.

I do not care if the majority are united upon this matter—it did not seem to me that they were united the other day—but if the majority in this Chamber, which is responsible for its business, is content and desirous that we do nothing, that we make no rule, that we drift along, and that every morning a half hour or an hour shall be consumed over some legislative proposition, I am entirely content, and I take it this side is content. The responsibility is with the other side, and not with us.

Mr. COCKRELL. Why, then, do you precipitate these resolutions? They did not come from this side.

Mr. HALE. I did not precipitate them.

Mr. COCKRELL. The Senator's side did.

Mr. HALE. The resolutions were called forth because Senators were taking up time in legislative business. It was only a proposition for the accommodation of the Senate.

Mr. MANDERSON. If the Senator from Maine will permit me, the resolutions were the outgrowth of a request for unanimous consent which came from the other side.

Mr. HALE. It was only putting in form what evidently nearly every Senator here believes; but, as I said, I do not care. We can stay here as long as the other side. If they want to do nothing, want to let debate continue, want legislative business introduced, want petitions and bills and all forms of legislative matters brought here, when the President has clearly brought us here for another purpose, the responsibility rests with them and not with us.

Mr. MANDERSON. Mr. President, I realize that the existing condition is one which it is a little difficult to adapt one's self to, but we are rapidly learning the lesson that we are in the minority on this side of the Chamber, and, so far as I am concerned, I shall certainly not try again to suggest any method of doing business. I desire, however, to call the attention of the Senator from Missouri [Mr. COCKRELL], who sees fit to rebuke us somewhat for even suggesting what shall be the course of action by the Senate, that these several resolutions came from that which seemed to be the unanimous desire of the Senate. After some consideration, and as a result of a request for unanimous action of the Senate, which came from the Senator from Maryland [Mr. GORMAN], who seemed to be in hearty accord with the Senator from Maine [Mr. HALE] and myself as to what was desired, the resolutions were introduced.

My objection to the consideration of legislative business, or rather the nonadoption of a resolution which would show the sense of the Senate in this regard, is not only that suggested by the Senator from Maine, but if Senators are to go on and introduce bills and joint resolutions for reference to committees we shall all desire to do the same thing. The Senator from Ohio [Mr. SHERMAN], as he had the undoubted right to do, introduced a joint resolution having reference to the change of the date of the inauguration of the President of the United States. The Senator from Oregon [Mr. MITCHELL] followed that with a joint resolution—and both resolutions by the way involve a change in the Constitution of the United States—as to the election of Senators by the people. These are proper resolutions to introduce and as proper to consider; but if they are to be introduced here and followed up by others it will be my own inclination, and I think the inclination of every other Senator, to gather up the bills which we introduced at the last session which failed, and reintroduce them, that they may have precedence over others.

I do not think we desire to do that. I certainly, for one, do not, but if the lists are to be opened to that sort of contest, I shall feel bound to prepare the numerous bills and joint resolutions which failed at the last session of the Senate, that we may act upon them again. To prevent this is the only object I have in view. But I bow with proper deference to the majority which rules. If it is not the desire of the other side that this resolution or any other shall be adopted, we simply shall have to submit to the inevitable.

Mr. GORMAN. I appreciate fully what has been said by the Senator from Nebraska [Mr. MANDERSON] and the Senator from Maine [Mr. HALE], that the only object is to keep the business of the Senate within the usual and reasonable bounds; but, of course, this question always brings up very great differences of opinion in the Senate. It has done so from the beginning, and probably will continue to do so to the end.

Mr. President, I have caused to be made an exhaustive examination of the precedents of the Senate in called executive sessions, and can not find a single instance, prior to the present session, in which a bill, a joint resolution, or any matter requiring the concurrent action of the House of Representatives has ever been presented or received, with the single exception of a concurrent resolution submitted by the Senator from Alabama [Mr. MORGAN] in April, 1881, in relation to "isthmus ship canals," which was objected to by Mr. Dawes of Massachusetts, on the ground that it required the concurrence of the House of Representatives; whereupon, after debate, the Senator from Alabama modified the resolution so as to make it a simple Senate resolution, when it was received and referred to the Committee on Foreign Relations.

I find in the early history of the Senate that many of the presiding officers held that no business of any character at called executive sessions similar to this could be received or acted upon in open session. Among others who took this view was Mr. William R. King, a most accomplished parliamentarian, who was President of the Senate in 1851.

At the called executive session of the Senate in March, 1881, the Senator from Indiana [Mr. VOORHEES] submitted a resolution concerning the attitude of national banks towards the refunding of the national debt; which was objected to by the Senator from Vermont [Mr. MORRILL] "as being out of order, this being an executive session, and the resolution clearly pointing to legislative business."

Mr. Ferry, of Michigan, who had been President *pro tempore* of the Senate, took the ground that the Senate was called in executive session and could not consider legislative business; whereupon the Senator from Indiana obtained permission of the Senate to make a statement concerning the precedents which had been observed by the Senate at such called executive sessions. The speech, which will be found in the CONGRESSIONAL RECORD, volume 12, Forty-seventh Congress, special session of the Senate, pages 37 to 40, is an elaborate review of all the precedents from 1825 to that date; but there is not a single instance cited of a bill, joint resolution, or other subject requiring the concurrent action of the House of Representatives having ever been presented or received, the whole current of the precedents being that the Senate can do, when the House is not in session, only such business as does not require the action of that body.

In recent times it has been held by such distinguished authority as Vice-President Hamlin, Judge Thurman of Ohio, Mr. Bayard and Mr. Saulsbury of Delaware, Mr. Garland of Arkansas, Mr. Stevenson of Kentucky, Justice Lamar of Mississippi, and others, that the Senate at a called executive session is not a legislative body, but is then assembled as a branch of the treaty-making and executive department of the Government. This position was also taken by the Senator from Mississippi [Mr. GEORGE] in an elaborate constitutional argument March 18, 1889.

While the instances are numerous in which it has been held that the Senate could transact any business relating to its organization and membership, the passage of resolutions of the Senate calling for information, etc., it has never heretofore been seriously contended by any considerable number of Senators that the Senate could transact in any such a session as this legislative business; and when the attention of the Senate was called to the question in 1873, it even refused to receive petitions.

As this body has always been conservative in its character, and has adhered with great pertinacity to the usages and customs of the past, I submit (laying aside for the moment the question of the right of the Senate to transact any business it may see proper) that we should at this session, convened for the purpose of acting upon executive matters, confine ourselves to action upon those matters, and of course considering, as they arise, questions relating to the organization and membership of the body, with which the Senate may unquestionably rightfully and properly deal.

I ask the privilege of the Senate to insert in the RECORD a statement of some of the precedents in this case, so that they may be printed for the convenience of Senators. I think it will probably be gratifying to some Senators other than myself to see them.

By unanimous consent the matter referred to was ordered to be printed in the RECORD, as follows:

At the called executive session of the Senate at the beginning of the Forty-third Congress, in 1873, CONGRESSIONAL RECORD, volume 1, special session of the Senate, pages 29 and 30, Mr. Chandler of Michigan and Mr. Fenton of New York presented petitions.

Mr. Hamlin, who had been Vice-President of the United States, objected to the presentation of petitions of a legislative character at a called executive session, saying: "We have no legislative functions whatever. The matter has been discussed and deliberately determined by the Senate, and we may just as well begin precisely as we are to go on. I object to any legislative business, and this is legislation."

Thereupon Mr. Fenton withdrew his petitions.

"The VICE-PRESIDENT. They will be withdrawn, and those presented by the Senator from Michigan [Mr. Chandler] will also be regarded as withdrawn, the point having been made."

On page 63, CONGRESSIONAL RECORD, volume 1, of same session, March 13, 1873, on certain petitions being presented—

Mr. SHERMAN said:

"I think myself it is objectionable in an executive session to present legislative petitions."

"The PRESIDENT *pro tempore* (Mr. Carpenter of Wisconsin). The Chair, on reflection, will rule all the petitions and memorials which have been offered, looking to legislation, out of order at the present session, regarding the standing objection which was made by the Senator from Maine [Mr. Hamlin] as continuing on that subject."

At the called executive session of the Senate in 1875, CONGRESSIONAL RECORD, volume 4, part 1, page 25, March 11, Mr. Clayton of Arkansas having submitted a resolution for the appointment of a select committee to visit the Indian Territory—

Mr. Ferry of Connecticut raised a question of order on the resolution that "at a called session of the Senate business of a legislative character or looking to legislation could not be entertained."

Mr. Hamlin said:

"Under the Constitution, however, I think that the Senate has no earthly power or constitutional right to pass any such resolution which is legislative in its character, or looking to any matter upon which legislation is subsequently to be had."

Mr. Hamlin denied even the right to withdraw petitions from the files of the Senate to be delivered to the parties. He furthermore said:

"The Senate is a part of Congress when the House of Representatives is in session; and it is not at any other time a part of Congress. It is an executive body, convened solely and exclusively for executive purposes." (*Ibid.*, page 26.)

He held that the Senate was limited by the proclamation of the President to the subjects for the consideration of which it had been convened.

Mr. SHERMAN said:

"We have no power to pass laws, because we can not pass laws except with the assent of the other House. * * * We can not send a bill to the House, because there is no House here."

"Mr. HAMLIN. But we may pass bills if the Senator's position is correct, and have them ready to submit to the House when they come.

"Mr. SHERMAN. I am inclined to think we can not."

Mr. Morton of Indiana took the ground that the Senate could do anything which did not require the cooperation of the House of Representatives.

Mr. Thurman of Ohio insisted that there was "no legislature of the Union now in session. The Senate when convened in executive session or special session, when the House of Representatives is not in session at all, is not a legislature. It is simply a body to which the Constitution confides certain duties in connection with the executive power—to ratify treaties, the power to confirm nominations, and the power of course to decide upon the qualifications, returns, and elections of its own members. That is necessarily inherent in the Senate. * * * but it has not one particle of legislative power, for it is not a legislature.

"There is no legislature of this Government except when both Houses are convened. * * * We must confine ourselves to that which the Senate sitting alone, when there is no session of Congress, has the power to do, and it has no power whatever to do one single legislative act—no more power than any seventy-four gentlemen of the United States who might get together have power to do legislative acts."

The question of order was submitted to the Senate, whereupon Mr. Anthony of Rhode Island moved to lay the whole subject on the table; which was agreed to—yeas 40, nays 22. (CONGRESSIONAL RECORD, volume 4, Part I, special session of the Senate, page 27.)

At the same session, March 20, 1875, CONGRESSIONAL RECORD, volume 4, Part I, special session of the Senate, pages 92 and 93, on a resolution submitted by Mr. Frelinghuysen of New Jersey relative to the condition of Louisiana—

Mr. Bayard of Delaware raised the point of order that the resolution, "if not legislative in its character, is equivalent to legislation. It is intended to have legislative effect, and is not, therefore, consonant to the object of this special session of the Senate."

He took the ground that the special session was called by the President of the United States as "an executive session for the purpose of considering such nominations as he (the President) might see fit to lay before it, and for the performance of its constitutional duty in relation to such treaties as he might propose for its concurrence."

He also held that no other matters could be considered at such a called session except the question of the membership of the body.

March 23, 1875, CONGRESSIONAL RECORD, page 147, Mr. Bayard said:

"The Senate of the United States is but one portion of the legislative branch of the Government. By itself it has no legislative power whatever; and only in conjunction with the other House of Congress and the action of the President of the United States can it have legislative power at all."

Mr. Saulsbury of Delaware said:

"We are now convened in extraordinary session, and certain it is that in our capacity as a Senate, convened under the proclamation of the President of the United States, we do not possess the powers which we ordinarily possess when we meet as a legislative body. Our power of legislation is entirely gone. We can only perform the functions pertaining to our character as an executive council. We may deal with questions affecting the constitution of this body, * * * but we may not deal directly or indirectly, in my judgment, with questions which do not pertain either to the constitution of this body itself or to the questions with which it has to deal in its character as an executive council." (*Ibid.*, page 30.)

Similar views were expressed by other leading Senators on both sides of the Chamber.

At the called session of the Senate March 5, 1881, CONGRESSIONAL RECORD, volume 12, Forty-seventh Congress, page 4, Vice-President Arthur decided that at an extraordinary session of the Senate petitions for legislation could not be received.

April 6, 1881, page 211, same volume of RECORD, the Vice-President ruled that petitions could not be received "except by unanimous consent, as the rule in reference to the morning hour does not apply to an executive session of the Senate."

At the same session, March 23, 1881, Mr. VOORHEES of Indiana offered a resolution concerning the attitude of national banks towards the refunding of the national debt.

Mr. MORRILL of Vermont objected to its reception "as being out of order, this being an executive session and the resolution clearly pointing to legislative business."

Mr. Ferry of Michigan (who had been President *pro tempore* of the Senate) took the ground that the Senate was called in executive session, and could not consider legislative business, whereupon—

Mr. VOORHEES obtained permission of the Senate to make a statement concerning the precedents of the Senate as to its action at such called executive sessions. The speech, which will be found in the CONGRESSIONAL RECORD, volume 12, Forty-seventh Congress, special session of the Senate, pages 37–40, contains all the precedents from 1825 to that date; but there is not a single instance cited of a bill, joint resolution, or other subject requiring the concurrent action of the House of Representatives having ever been presented or received, the whole current of the precedents being that the Senate can do, when the House is not in session, only such business as does not require the concurrence of the other body.

April 1, 1881, same volume, page 154, Mr. Lamar of Mississippi said:

"We are here as part of the treaty-making department of the Government, and also as part of the executive department. We were called here for the purpose of adjusting our relations with foreign nations and confirming appointments nominated by the President. This, and this alone, is the business for which this body was convened. It is here in no legislative capacity, but simply, I repeat, as a branch of the treaty-making and executive department of the Government."

On a petition which Mr. MCPHERSON of New Jersey asked to present in relation to the arrest and imprisonment in a British jail of Michael Boyton, an American citizen—

Mr. HARRIS of Tennessee said:

"I suppose the propriety of receiving the petition depends altogether upon its character. If it be in respect to executive business, I should think it would be in order to receive it; if it be upon a legislative subject, it would not be in order." (*Ibid.*, p. 192.)

Mr. Bayard of Delaware, April 6, 1881, CONGRESSIONAL RECORD, page 214, said:

"In the absence of the other House of Congress, no such thing as practical legislation can be begun here, because it can not be considered by the House of Representatives at the same session of the same Congress."

April 27, 1881, Mr. MORGAN of Alabama submitted a concurrent resolution in relation to "isthmus ship canals," which was objected to by Mr. Dawes of Massachusetts on the ground that it required the concurrence of the House of Representatives; whereupon, after debate, Mr. MORGAN modified the resolution so as to make it a simple Senate resolution, when it was referred to the Committee on Foreign Relations.

After the death of President Garfield in 1881, and the accession of Vice-President Arthur to the Presidency, there having been no President *pro tem-*

pore of the Senate elected at the preceding session, and there being imminent danger, as the law relating to the Presidential succession then stood, that the Government would be left without a head in the event of the death of the then President, a special executive session was called by President Arthur, which assembled October 10, 1881.

At that session Mr. Garland, of Arkansas, afterwards Attorney-General, said:

"It is very evident that we can not do any legislative business at this extra session of the Senate. We can only perform executive business."—CONGRESSIONAL RECORD, volume 12, Forty-seventh Congress, special session of the Senate, 1881, page 516.

At the extraordinary session of the Senate convened by the proclamation of President Cleveland, March 4, 1889, on a resolution submitted by Mr. CALL of Florida for the appointment of a special committee to investigate and report on the relations of the United States with the Island of Cuba and the other West Indies, a very interesting debate occurred as to the power of the Senate to act upon such a resolution at a called session of the Senate alone, from which I quote the following from the CONGRESSIONAL RECORD, volume 21, Part I, page 23, special session of the Senate:

Mr. GRAY of Delaware said:

"Mr. President, if from the resolution as reported at the desk we are to understand the scope of this proposition of the Senator from Florida, it is that a committee shall be now constituted which shall proceed to consider matters of public interest with a view to legislative action; and the resolution goes on to authorize this committee to make its investigations and to report to the Senate. I do not understand that this body, convened as it is in extraordinary session, is clothed with any legislative function whatever, and I think it is exceedingly important that we should maintain the distinction between this executive session and the ordinary legislative session in which we are one branch of the lawmaking or legislative power of the Federal Government.

* * * * * * *

"There is no possible action that could be taken by the Senate on a report made by this proposed committee that would not in my opinion be legislative action. If the Senator from Florida has the idea and maintains that this proposition of his looks merely to performing some executive function, of course that puts it upon a different ground from the one on which I object to the resolution; but I can not understand, as I heard the resolution read, that anything can come as the ultimate result of the investigation proposed by this committee except action on the part of the Senate, and that action must be legislative action in connection with the other branch of Congress. If that be so, it comes clearly within the scope of the objection that I made. I think we should be very careful to confine ourselves within our just powers and not proceed to business which it is not competent for the Senate to transact at this extraordinary session.

Mr. SHERMAN of Ohio said:

"Everything that can be done by the Senate at any time can be done by the Senate when assembled in extraordinary session. It is true we can not pass a bill so as to make it a law, but we might consider a bill, we might inquire into a bill, we might pass resolutions. We can not make a charge on the public Treasury, because that requires the assent of both Houses; but we can express our opinions and do anything that the Senate of the United States may lawfully and rightfully do. We might pass a bill, so far as we are concerned, but it would seem to be idle work, the other House not being in session to act upon it.

"But here is the point, and all the precedents referred to turn on this: That in every case the Senate has by its vote and by its rule limited its action. For instance, in July, 1861, when both Houses were convened in extraordinary session, one of the first acts done by the two Houses was to declare that no measure should be adopted or introduced except that which related to the subject-matter, that was the rebellion then existing in the United States. So eight years ago a similar, not rule, but practice was adopted. Objection was made to the introduction of resolutions and also to the introduction of bills, but petitions were presented.

"So in 1873 petitions and resolutions were presented and the point of order was made, not as to the right to introduce those resolutions, but as to whether it was expedient or wise, having been convened in extraordinary session, for the Senate to consider or even to introduce resolutions looking to legislative action. It was not denied that we might receive those resolutions and might receive those petitions, and, if you choose, refer them to appropriate committees already organized, but it was held not to be wise to do it, because as we could not complete anything we had better not do anything, and therefore the petitions were laid upon the table.

* * * * * * * *

"We are here without the power to enact laws, without the power to act upon laws, but we have the power to act upon resolutions. There can be no great use, however, in our expediting matters by undertaking to introduce petitions for the passage of certain bills. Doing so would not really expedite matters in the least. Therefore, in my judgment, we ought to confine ourselves (unless there is some strong reason for making an exception as to a particular subject-matter) simply to discharging the duties imposed upon us in confirming nominations and in passing upon treaties; we should confine ourselves simply to those duties that we can conclude and terminate by our separate action."

Mr. PLATT of Connecticut said:

"There is certainly nothing in the proclamation which limits the power of the Senate to do business at this session. There is nothing in the proclamation that requires this to be a short or temporary session of the Senate. We may continue in session until next December. And for one I believe, and have always believed since I have examined the question, that it is in the power of the Senate at a session like this to transact any business that it can transact at the regular sessions of the Senate.

"It would seem to be somewhat futile to pass bills, because the other House is not in session so that we can send them to the other House; but if it were thought best in order to facilitate the business of the coming session I believe that we could pass bills and send them to the other House when it shall be convened next December in regular session, and I have never understood that any settlement of this question has ever been made which in any way limited the right of the Senate to transact any business in this session which it could transact in a regular session.

* * * * * * * *

"I think it is true that we have not passed bills at these called sessions, but very many resolutions which are entirely outside of executive matters and entirely outside of matters relating to treaties have been passed at almost every special session of the Senate." (*Ibid.*, pages 23 and 24.)

Mr. GRAY again said:

"Mr. President, the Senate of the United States convened in extraordinary session, as the Senate is now convened, in the absence of the other House, undoubtedly has in one sense the power to do anything that it is its will to do. I do not dispute that. There is no text of the Constitution that forbids it doing anything, taking any order of proceeding, making any investigation that it may by its vote determine upon. This is not a question of order, properly so called, but it is a question of propriety. The question to be considered is of the competence of the Senate, to be determined by a consideration of the legislative power as conferred by the Constitution, taking into account the scheme of our Government and the appropriate depositaries of its various powers. It is a matter which ought to be carefully and gravely considered by the Senate before it commits itself to a precedent which, as seems to me, is so unwarranted as the one proposed by the unmodified resolution of the Senator from Florida.

"It is true this question has been before the Senate heretofore. It is not remarkable that it should often have been, as it has been, decided in various ways. In 1873 on the reception of a petition looking to matters of general concern presented to the Senate at one of its extraordinary sessions called by the President in the same manner and for the same purpose as this has been called, the question was debated at some length, and I find here an expression of opinion from Senators on both sides, Senators whose opinions are entitled to the greatest respect, in regard to this question of propriety and competency on that matter of the reception of general petitions and having them referred. The then Senator from Wisconsin, Mr. Carpenter, a man of unusual ability as well as of unusual brilliancy, said:

"'But the real question is'—

"That was March 14, 1873—

"'not whether the Senate could do such a thing, but whether the Senate alone, at an extra session, should enter upon business which belongs to the Congress of the United States. The Senate, of course, could receive petitions; the Senate could perhaps pass bills; but the question is, whether it would be proper to do it. The ruling that was made yesterday, as I understood it then and understand it now, is following the precedents that have been determined by the Senate where the objection was made.'

"In that same debate the Senator from Ohio, the present senior Senator from that State [Mr. SHERMAN], said:

"'Mr President, my friend from Wisconsin [Mr. Howe] seeks to establish a precedent. I submit to him whether on the whole, if we are to do that, it is not better for us to establish the precedent that the Senate shall not undertake to do what it can not do. The Senate is always disposed to exercise all the power it possesses, and sometimes we go a little beyond the line. Now, when the point is distinctly made, I submit to the Senator whether it is not better for the Senate to be content with what it has the right to do, rather than to undertake to do what it has not the right to do. The Senate has no power at this session to do anything of a legislative character. All legislative power is conferred upon Congress, and both Houses must be in session at the same time or legislation can not be done; and then the Constitution provides that neither House can adjourn more than a specified number of days without the consent of the other. If this petition is in the nature of legislative business, it is the business of Congress, not the business of the Senate alone.'

"So I say now that here is a resolution to create a committee to take into consideration business which can not be the business of the Senate alone, but is necessarily the business of Congress.

"The Senator from Ohio went on to say:

"'The Senate for certain purposes is a distinct political body, performing other duties besides those of legislation. The Senate shares with the President in the executive power. In certain cases it shares in the judicial power; in certain other cases it shares in the legislative power, but when it shares in the legislative power it must be as part of the Congress assembled, and the two Houses of Congress must both be in session.'

"Further on in the course of the same speech the Senator from Ohio said:

"'Therefore, since the point of order is made, I submit to the Senate whether we ought not now to settle forever the question that this body has no power, when separated from the House of Representatives, when not in Congress assembled, to do anything of a legislative character. The various propositions which have been made here since this session commenced are all right.'

"Mr. SHERMAN. From what page does the Senator read?

"Mr. GRAY. Page 79 of the CONGRESSIONAL RECORD for the special session of 1873. The debate was on March 14, 1873:

"'We have the power to pass upon the election and qualifications of our members, upon their right to hold seats here. Each House is by the Constitution the judge of that question, and we may act upon it. We are not in Congress assembled, but we may pass on executive business. We may continue our committees; we may direct our committees during the vacation to perform certain duties. We may do that under the rules of the Senate, because the Constitution authorizes each House to prescribe rules for its own government. Hence we may, under our rules, continue our committees in action during the vacation. Therefore the resolution offered by the honorable Senator from Michigan this morning is perfectly within our power. We may continue all our committees during the vacation, because it is a power expressly given to us by our rules, and those rules are authorized by the Constitution of the United States. But, sir, the same Constitution declares that all legislative power, everything that affects legislation, which makes laws, shall be done in Congress assembled. These petitions are not addressed to the Senate; they are addressed "to the Senate and the House of Representatives in Congress assembled." Why, therefore, receive petitions not addressed to us? If a petition is addressed to me as a member of the Senate, or even in a semiofficial capacity, I can not present it under the rules and usages of the Senate.'

"Then the Senator from Ohio went on to quote from a debate which had occurred in the Senate at the called session of March, 1861, when Mr. Powell of Kentucky undertook to present a petition:

"'Mr. POWELL. I present a petition of various citizens of Superior, Wis., praying for the adoption of the Crittenden compromise.

"'Mr. FESSENDEN. That can hardly be presented, I apprehend, at this session. We can not do any legislative business, and I think it improper to present petitions for matters of legislation.

"'Mr. POWELL. Why not?

"'Mr. FESSENDEN. Congress is not in session.

"'Mr. POWELL. I am aware of that. I merely wish to present the petition and let it lie on the table.

"'Mr. FESSENDEN. My question was as to the propriety of presenting it at all. It is a precedent. It calls for legislation. I raise the question upon the propriety of it. It is nothing in reference to the petition itself, but simply because I doubt whether there is any propriety in receiving it.

"'Mr. POWELL. I can see no impropriety in that. The petition is addresed to the Senate, and is respectful in its terms.

"'The VICE-PRESIDENT. Does the Senator from Maine raise the question?

"'Mr. FESSENDEN. Yes, sir.

"'The VICE-PRESIDENT. The impression of the Chair is, that such communications have been received at previous sessions, simply for the purpose of placing them on the files of the Senate, and not for the action of the Senate.

"'Mr. FESSENDEN. Very well, sir; I take no appeal.

"'The VICE-PRESIDENT. This communication, therefore, will be placed on the files of the Senate.'

"I will not weary the Senate with reading further from the discussion of

this point, which was carried on at great length; but it seems to me that every objection made by the Senator from Ohio to the reception and reference of those petitions in 1873 lies to the adoption of this resolution. Those petitions could undoubtedly have been received by the Senate and could have been referred; that is, the Senate had the power to do it. There was no constitutional inhibition in the text of the Constitution which forbade their doing it, nor is there any that forbids the Senate entertaining this resolution; but, as I said before, as a matter of propriety, as a matter of competency on the part of the Senate, inasmuch as this resolution looks to legislation, looks to some action which makes necessary the presence of the other branch of Congress, it seems to me that we should not undertake the first step toward considering it when we are not present in Congress assembled, but merely convened in extraordinary session as a Senate alone, and as such vested with no legislative power whatever.

"Mr. SHERMAN. Mr. President, I do not find fault with anything that I said in 1873; it is exactly in accordance with my position now; but the question as to whether we should enter upon these matters of legislation was then a question of propriety. I am of the same opinion now, that we ought not to enter upon anything that we can not complete as a Senate; but even then, in 1873, although petitions were ruled out because they were addressed to both Houses of Congress, by a vote of nearly two to one on two separate occasions petitions were excluded because they were purely legislative in their character, resolutions of various kinds were adopted and acted upon. So a distinction was made in 1873 that is palpable to the eye of every one between legislative proceedings and mere resolutions of inquiry to get information in regard to legislative matters or in regard to executive business. For instance, on the very date from which the Senator reads, I find a resolution introduced by the then Senator from Michigan——

"Mr. GRAY. From what page is the Senator reading?

"Mr. SHERMAN. From page 77.

"'Mr. CHANDLER. I offer the following resolution, and ask for its present consideration:

"'*Resolved*, That the Committee on Commerce be authorized and directed to sit during the recess, and to investigate and report upon the subject of subsidies to steamship lines, and what lines, if any, should be subsidized; also, upon the propriety of paying bounties to shipbuilders,' etc.

"Instituting an inquiry into the whole subject of subsidies to steamship lines, and that was objected to because it had not been printed, and it was ordered to be printed and laid over one day, and it was taken up subsequently and considered. So the Senate at the very time when this debate occurred, while they refused to receive petitions and enter upon the consideration of petitions, did receive resolutions.

"Mr. GRAY. The Senator from Ohio will allow me to say that that resolution and a great many others, I believe, of the same character as the one proposed by the Senator from Florida [Mr. CALL] have been adopted by the Senate, and they have generally been adopted by unanimous consent, as the Senator from Ohio, if he will pardon me, on page 78 of the volume before me, said in relation to just that point:

"'Mr. SHERMAN. It was done by unanimous consent without objection. By that kind of logic I can show that there are no rules in the Senate at all, because every rule in the Senate has been violated by unanimous consent. Unless the point was made, I insist that a precedent was not established by the Senate, because every rule has been violated. There is no rule on the whole list but what has been waived over and over again by unanimous consent; but that does not establish what the rule is."

"Mr. SHERMAN. The Senate can do what it has a right to do by unanimous consent, and it can do what it has a right to do by a majority vote; so that it makes no difference and there is nothing in that point. As a matter of course, if the Senate has the power to do anything, it is for it to determine. Usually all these matters are done by unanimous consent; any of them may be by a majority vote, and a majority of one vote makes it the act of the Senate just as much as if it was done by a unanimous vote. A question of order may be waived by a unanimous vote, but a question of power can not be. There is the difference.

"I say, then, it is a mere question of expediency, a mere question of propriety. I do not differ with the Senator from Delaware that on the question of expediency and propriety the Senate had better confine itself simply to executive business or to resolutions which affect its organization and separate business; but as to its power, I claim that the Senate of the United States has the power to go on now and pass bills or do anything which the Constitution authorizes it to do where the presence of the House of Representatives is not required. We can not send messages to the other House; we can make no progress towards the final passage of the bills; but whatever the Constitution authorizes the Senate to do, that may be done properly at this time." (Pages 24 and 25.)

In the same debate (pages 26 and 27) Mr. GEORGE of Mississippi said:

"I do not think that the Senate can exercise any legislative power when assembled in what is called 'extraordinary session,' the House of Representatives not being in session. All the powers that this body can exercise are powers granted by the Constitution of the United States. No legislative power is granted by the Constitution of the United States to the Senate, none to the House of Representatives. The grant made by the Constitution is in the language read by the Senator from Florida, and which I shall read again:

"'All legislative powers herein granted shall be vested in a Congress—

"Not in a Senate, not in a House of Representatives, but 'in a Congress.' Reading all of that section of the Constitution, we find what a Congress is:

"'All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.'

"There is no Congress and can be no Congress under the Constitution unless there be a Senate and House of Representatives.

"Mr. PLATT. May I ask the Senator a question?

"Mr. GEORGE. Not now. There must be both a Senate and a House of Representatives, and in order to constitute that Congress, that Senate and that House of Representatives must be organized according to the Constitution, and must be assembled, both of them, at a time and place prescribed by law. Unless there is such an assemblage of both Houses, both of a Senate and of a House of Representatives, at a time and place prescribed by law, there is no body in existence entitled to be called 'a Congress,' in which, by that clause of the Constitution which I have just read, all legislative power is vested.

"'Congress' itself in its literal meaning simply means an assemblage, a coming together, a coming together of the representatives of the States and of the people, and it is inaccurate and unconstitutional language to apply the term 'Congress' to any individuals, though they be Senators or Representatives, unless they be organized and assembled as a Congress in pursuance of law. The assembling of the Senate in extraordinary session by proclamation of the President is not an assemblage of Congress. It is not a Congress, and therefore is not a body in which the Constitution vests legislative power. It is not in that condition even a part of Congress. It is the assemblage of a body which may, under certain circumstances and in accordance with law and when the other body is assembled also, become then, and not till then, a part of the Congress of the United States.

"To show that is correct I have but to call the attention of Senators to the formula prefixed to every bill and to every joint resolution ever passed by the Congress, which is in these words:

"'*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.*'

"That formula was adopted at the very first session of Congress held under the Constitution, and it has been adhered to from that time to this. That formula expresses this idea that there must be an assembly in Congress of both the Senate and the House of Representatives before that constitutional body is formed in which legislative power is vested by the Constitution.

"Mr. GRAY. The Senator from Mississippi will allow me to say that I understood the Senator from Ohio [Mr. SHERMAN] and the Senator from Connecticut [Mr. PLATT] both to contend that it was competent for the Senate of the United States convened in extraordinary session, in the absence of the House of Representatives, to pass a bill.

"Mr. HARRIS. To transact any legislative business.

"Mr. GEORGE. To do any legislative business whatever; a pretension which I am trying to overturn and which I think has been sufficiently overturned by the mere calling of the attention of the Senate to that part of the Constitution which was read by the Senator from Florida [Mr. CALL], and which I have also read.

"Mr. President, there is no Senate, there is no House of Representatives, constitutionally speaking, until each body has been assembled according to law. We have seventy-six members of this body. The seventy-six individuals who hold commissions from the thirty-eight States as their Senators might all meet together at the same time and place, and unless that time and that place were designated by law, which law clothed them with their character as a Senate, they would not be competent to perform any act whatever, legislative, executive, or anything else. Any act intended to be officially performed by these seventy-six Senators assembled at a particular place and time not specified by law would be as valueless in law as the acts of any other seventy-six persons in the United States assembled at any time and place.

"There is, then, no Senate unless it be assembled at the time and place fixed by law. There is no House of Representatives now, because there is no body composed of three hundred and twenty-five Representatives of the different States assembled at a time and place fixed by the law and the Constitution for the performance of their duties.

"So we stand to-day in this wise, that there is a Senate of the United States and there is no actual House of Representatives. There have been, it is true, so many men elected to the House of Representatives who, when the time arrives which is fixed by law, may assemble together at the place fixed by law, and then, organizing themselves as the Constitution requires them to be organized, they will constitute a House of Representatives.

"Now, having made that clear beyond controversy, I go back to the Constitution, and when Senators claim that this body now assembled, lawfully it is true, and in pursuance of the proclamation of the President, may exercise legislative power, I call their attention to the Constitution, which says—I will read it again:

"'All legislative power'—not a part of them, but 'all legislative power herein granted shall be vested in a Congress of the United States,' and that, too, 'in a Congress of the United States, which shall consist,' not of a Senate alone, but 'of a Senate and House of Representatives.' Then, sir, there being no House of Representatives, there is no body, no organized body, in which by the terms of the Constitution any part of the legislative power of this Government can be vested. For though there is a Senate, yet there is no Congress, and it is only in the Congress that legislative power is vested by the Constitution.

"Mr. SPOONER. Will the Senator allow me to ask him a question?

"Mr. GEORGE. Yes, sir.

"Mr. SPOONER. I understand the Senator to argue that this body is not one of the Houses of Congress under the Constitution.

"Mr. GEORGE. No, I did not say that.

"Mr. PLATT. Sitting now.

"Mr. SPOONER. Sitting now. Did I understand the Senator?

"Mr. GEORGE. I did not say that.

"Mr. SPOONER. Does the Senator say that sitting now this body is not a part of Congress?

"Mr. GEORGE. I say that the Senate as now organized and as now sitting is not one of the two constituent bodies, is not *per se* a Congress of the United States, but is only one of two constituent bodies, both of which must be convened in order that a Congress may be constituted in which by the Constitution legislative power is vested. There is no legislative power vested by the Constitution in the Senate. There is no legislative power vested by the Constitution in the House of Representatives. The legislative power is vested in a Congress. That is what the Constitution says. What now is a Congress? A Congress must be, if it be a constitutional Congress, according to the express words of the Constitution, composed of both the Senate and the House of Representatives, and there is no such body in existence. There is no answer to that.

"Mr. GRAY. The proposition of the Senator from Mississippi, if he will pardon me, is that the Senate of the United States or the House of Representatives, when convened in the absence of the other body, is not under the Constitution in any sense the depositary of legislative power.

"Mr. GEORGE. It is not the depositary of any legislative power whatever.

"Mr. HARRIS. And is not a legislative body.

"Mr. GEORGE. And is not a legislative body. As unanswerable as that position must be when tested by the language of the first section of the first article of the Constitution, it becomes, if possible, even more clear when we consider another clause of the Constitution to which I invite the attention of the Senate. The fourth clause of the fifth section of the first article of the Constitution reads in this wise:

"'Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days.'

"Alone this provision would be of no value in determining this question, but taken with the first section of the first article on which I have commented it shows in the strongest and most conclusive manner that the body of Congress mentioned in the first section in which legislative power is vested shall not exercise any of its powers unless both Houses be in session. When both Houses get here under the clause to which I have called the attention of the Senate, although being in legal session, yet the Constitution so considers the necessity of having both branches in actual session when legislative duties are performed that it provides that neither House shall adjourn without the consent of the other for more than three days. So that, though the Congress be regularly convened, the Constitution by this clause provides against the transaction of business by one branch alone, except by its own consent.

"Mr. President, I am not bound to furnish the motives and the reasoning upon which the framers of the Constitution proceeded in making that instrument. It is sufficient if we can understand the plain meaning of its terms used in the Constitution. According to its plain meaning, if there be any proposition not mathematical, merely of a moral character, which can be said to be demonstrated, it is demonstrated by a consideration of the

clauses of the Constitution to which I have called attention that legislative power can not be exercised except when both Houses are in session.

PHILADELPHIA HARBOR IMPROVEMENT.

Mr. FRYE. I desire to offer a resolution and to ask its immediate consideration. I will state the necessity for it.

The contractors for the improvement of the harbor at Philadelphia some two months ago failed. Proposals were issued, bids were received, and the lowest bidder was a Canadian company, about whose ability to complete the contract the Secretary of War had very serious doubts. He rejected the bids, and he was about to issue new proposals. The Senator from Pennsylvania [Mr. QUAY], who felt very desirous that the Secretary of War should give the award to the next highest bidder, on the 27th of February introduced and secured the passage of the following resolution:

Resolved, That the Secretary of War be required to furnish for the information of the Senate copies of all papers and documents relating to the proposals for the improvement of the harbor of Philadelphia, under date of January 31, A. D. 1893, and that he be requested to suspend action upon said proposals until the information has been received and considered by the Senate.

The information which was received was referred to the Committee on Commerce and ordered to be printed. I have no doubt when the Senator from Pennsylvania left the city for the South, being somewhat in ill health, he forgot entirely the scope of the resolution which had passed the Senate. Now, the Secretary of War regards it as a request which he ought to be bound by—of course he knows he is not legally bound by it—but a request which ought to bind him, and he will not issue any proposals or accept any bids which have been made in relation to this work. Therefore the whole season is liable to be lost. What is worse than that, the removal of the islands in the harbor having commenced, the currents of the stream are changed in such a way that already great damage is being done to the harbor itself.

The work of removing the islands must be kept *pari passu* with the building of the shores in order to preserve the present condition of the harbor.

I did not discover this until the day before yesterday. Knowing that it was a matter of the utmost importance to Philadelphia, and not knowing where the Senator from Pennsylvania was, I telegraphed myself to Philadelphia the condition of things. They evidently found the Senator, for I have here, under date of March 10, the following telegram:

The resolution requesting the Secretary of War to suspend action upon the contract for the removal of the islands in the harbor of Philadelphia has accomplished the purpose and should be rescinded. Will you have the kindness to attend to it?

Mr. President, I offer the resolution which I send to the desk, and ask for its immediate consideration.

The VICE-PRESIDENT. If there be no objection, the resolution will be reported by the Secretary.

The Secretary read the resolution, as follows:

Resolved, That so much of Senate resolution of February 27 last as requested the Secretary of War to suspend action in relation to the improvement of the harbor of Philadelphia is hereby rescinded.

Mr. FRYE. I thought the resolutions which were under consideration a few moments ago had been withdrawn. I find, however, they have not been, and therefore I ask unanimous consent that they may be temporarily laid aside, and that the resolution which I have offered shall be considered. It will take but a moment.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Maine? The Chair hears none.

Mr. HARRIS. Is this resolution to rescind a former Senate resolution?

Mr. FRYE. It is to rescind a portion of a former resolution which is still in existence.

Mr. HARRIS. It is simply a Senate, and not a concurrent or joint resolution?

Mr. FRYE. It is a Senate resolution only.

The VICE-PRESIDENT. Is there objection to the immediate consideration of the resolution submitted by the Senator from Maine? The Chair hears none. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT TO WEDNESDAY.

Mr. GORMAN. I move that when the Senate adjourn to-day it be to meet on Wednesday next.

The motion was agreed to.

BUSINESS OF THE SESSION.

The Senate resumed the consideration of the resolution submitted by Mr. MANDERSON on the 9th instant, relative to the business of the session.

The VICE-PRESIDENT. The question now before the Senate is upon agreeing to the amendment offered by the Senator from Massachusetts [Mr. HOAR] to the amendment offered by the Senator from Maine [Mr. HALE] to the resolution submitted by the Senator from Nebraska [Mr. MANDERSON].

Mr. VEST. I move that the Senate do now adjourn.

The VICE-PRESIDENT. The question is on the motion of the Senator from Missouri.

The motion was agreed to; and (at 12 o'clock and 45 minutes p. m.) the Senate adjourned until Wednesday, March 15, 1893, at 12 o'clock m.

WEDNESDAY, *March 15, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Monday last was read and approved.

Mr. O. L. PRUDEN, one of the private secretaries of the President of the United States, communicated to the Senate sundry messages in writing.

SENATOR FROM WYOMING.

Mr. VANCE. I present the credentials of Hon. Asahel C. Beckwith, appointed a Senator from the State of Wyoming. I ask that the credentials be read and referred to the Committee on Privileges and Elections when appointed, and that meanwhile they lie on the table.

The credentials were read, and ordered to lie on the table, as follows:

STATE OF WYOMING, EXECUTIVE DEPARTMENT.

To all persons to whom these presents shall come, greeting:

Know ye, that the executive of said State hereby appoints Asahel C. Beckwith, a duly qualified citizen of said State and an inhabitant thereof, a Senator from the said State of Wyoming, to fill the vacancy happening in the Senate of the United States by the expiration of the term of Francis E. Warren on the 3d day of March, in the year of our Lord 1893, during the recess of the Legislature of said State, and by the nonelection of said Francis E. Warren's successor.

To have and to hold the said office of Senator of the United States until the next meeting of the Legislature of said State.

In testimony whereof I have caused these letters to be made patent and the great seal of the State to be hereunto affixed.

Given under my hand at the city of Cheyenne on the 9th day of March, A. D. 1893.

JOHN E. OSBORNE, *Governor.*

By the governor:

AMOS W. BARBER, *Secretary of State.*

PROPOSED USE OF PENSION OFFICE BUILDING.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, in response to a resolution of the 28th ultimo, relative to the use of the Pension Office building for musical concerts on the first day of the week, commonly called Sunday, transmitting the correspondence relating to the subject and stating that permission to use the building for the purpose referred to in the resolution was expressly refused by the Secretary of the Interior; which, on motion of Mr. HAWLEY, was, with the accompanying papers, ordered to lie on the table and be printed.

ANNEXATION OF HAWAIIAN ISLANDS.

The VICE-PRESIDENT. The Chair lays before the Senate a memorial of the senate and house of representatives of the Commonwealth of Massachusetts, which will be read.

The Secretary read the memorial, as follows:

COMMONWEALTH OF MASSACHUSETTS, *in the year 1893.*

Resolutions relative to the annexation of the Hawaiian Islands.

Resolved, That it is the sense of this General Court that it is expedient that the Hawaiian Islands should be annexed to the United States, and that the interests of the United States, commercially and strategically will be promoted thereby.

Resolved, That copies of this resolution be sent to the presiding officers of both branches of Congress, and also to the Senators and Representatives in Congress from this Commonwealth.

HOUSE OF REPRESENTATIVES, *February 13, 1893.*

Adopted. Sent up for concurrence.

EDWARD A. MCLAUGHLIN, *Clerk.*

SENATE, *March 2, 1893.*

Adopted in concurrence.

HENRY D. COOLIDGE, *Clerk.*

A true copy. Attest:

EDWARD H. MCLAUGHLIN,
Clerk of the House of Representatives.

Mr. HARRIS. From whom does the memorial come?

The VICE-PRESIDENT. From the Legislature of Massachusetts.

Mr. SHERMAN. I think the memorial ought to have been presented elsewhere. My attention was not called to it at the

moment. I think it ought to have been presented in executive session. It had better lie on the table for the present.

Mr. HOAR. The memorial does not contemplate any particular form or method of annexation.

Mr. SHERMAN. That is true.

Mr. HOAR. Hawaii may be annexed as Texas was, by a joint resolution.

The VICE-PRESIDENT. The memorial will lie on the table for the present.

EXECUTIVE SESSION.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened.

RECESS.

Mr. GORMAN (at 12 o'clock and 20 minutes p. m.). I move that the Senate take a recess until half past 3 o'clock.

The motion was agreed to; and at the expiration of the recess (at 3 o'clock and 30 minutes p. m.) the Senate reassembled.

AMENDMENT OF THE RULES.

Mr. SHERMAN. I desire to give notice of an amendment of the rules, which I ask to have read and referred to the Committee on Rules.

The VICE-PRESIDENT. The notice will be read.

The Secretary read, as follows:

Notice is hereby given of a motion to amend Rule XVI, by adding after the words, "Committee on Commerce," in clause 1, the words, "and bills making appropriations for the District of Columbia, which shall be referred to the Committee on the District of Columbia;" so as to read:

"All general appropriation bills shall be referred to the Committee on Appropriations, except bills making appropriations for rivers and harbors, which shall be referred to the Committee on Commerce, and bills making appropriations for the District of Columbia, which shall be referred to the Committee on the District of Columbia," etc.

Mr. SHERMAN. I ask that the notice be referred to the Committee on Rules.

The VICE-PRESIDENT. The notice will be referred to the Committee on Rules and printed.

Mr. DOLPH. I rose to make a parliamentary inquiry, but the notice has been referred. I was about to inquire if the amendment proposed would without further notice leave the whole matter of the disposition of appropriation bills open when it came up for consideration in the Senate.

Mr. SHERMAN. In answer I will state the rules require that any amendment to the rules must be made after written notice, so that notice of amendment will have to be given in the case suggested by the Senator from Oregon.

Mr. HARRIS. I desire to suggest to the Senator from Ohio that he has simply given notice, which was very proper under the rules, but the notice can not be referred. When he prepares his resolution making the amendment the resolution can be referred to the Committee on Rules, but not the notice.

Mr. SHERMAN. It is the ordinary way, I think, that a notice shall be referred to the Committee on Rules, and if they think such an amendment of the rules ought to be made they will so report. I have one precedent before me, where a case of that kind occurred. It is to the effect that the Committee on Rules must first determine whether the amendment of which notice is given is a wise provision, and if so, then they will in their own language report the amendment to the Senate. Such was the report made by the Senator from Rhode Island [Mr. ALDRICH], the chairman of the Committee on Rules, in a recent case.

Mr. HARRIS. So far as I have introduced resolutions looking to an amendment of the rules, I have offered the resolution and issued the notice at the same time, but the resolution goes to the committee. The notice is simply in conformity to Rule XL, which requires a notice showing exactly what rule is to be amended, and how amended.

Mr. SHERMAN. If the Senator thinks that is a better form I am perfectly willing to follow it.

Mr. HARRIS. Just let the notice lie on the table and the Senator can at leisure prepare his resolution.

Mr. SHERMAN. All right.

The VICE-PRESIDENT. That will be the order of the Senate.

Mr. SHERMAN. Notice will be given according to Rule XL.

COMMITTEES OF THE SENATE.

Mr. GORMAN. I ask unanimous consent that the Senate proceed to the election of the committees of the body.

The VICE-PRESIDENT. The Chair hears no objection.

Mr. GORMAN. I ask for the adoption of the following order:

Ordered, That so much of Rule XXIV of the Senate as provides for the appointment of the standing and other committees of the Senate by ballot be suspended.

Mr. CULLOM. That is always done.

The VICE-PRESIDENT. Is there objection to the adoption of the order? The Chair hears none, and the order is agreed to.

Mr. GORMAN. I submit the resolution I send to the desk and ask for its present consideration.

The VICE-PRESIDENT. The resolution will be read by the Secretary.

The Secretary read as follows:

STANDING COMMITTEES.

Resolved, That the following constitute the standing and select committees of the Senate of the United States for the Fifty-third Congress:

On Agriculture and Forestry: Messrs. George (chairman), Bate, Ransom, Peffer, Roach, McMillan, Washburn, Proctor, Hansbrough.

On Appropriations: Messrs. Cockrell (chairman), Call, Gorman, Blackburn, Brice, Allison, Hale, Cullom, Teller.

To Audit and Control the Contingent Expenses of the Senate: Messrs. White of Louisiana (chairman), Camden, Jones of Nevada.

On the Census: Messrs. Turpie (chairman), Berry, White of California, Murphy, Peffer, Hale, Stockbridge, Dixon, Hansbrough.

On Civil Service and Retrenchment: Messrs. Call (chairman), Walthall, Gordon, Irby, Cockrell, Stanford, Washburn, Morrill, Lodge.

On Claims: Messrs. Pasco (chairman), Daniel, Berry, Caffery, Allen of Nebraska, Mitchell of Oregon, Davis, Stewart, Peffer.

On Coast Defenses: Messrs. Gordon (chairman), Irby, Mills, White of California, Smith, Squire, Dolph, Hawley, Higgins.

On Commerce: Messrs. Ransom (chairman), Coke, Vest, Gorman, White of Louisiana, White of California, Murphy, Frye, Jones of Nevada, Dolph, Cullom, Washburn, Quay.

On the District of Columbia: Messrs. Harris (chairman), Faulkner, Gibson, Hunton, Smith, Martin, McMillan, Wolcott, Gallinger, Hansbrough, Proctor.

On Education and Labor: Messrs. Kyle (chairman), George, Hunton, Caffery, Murphy, Carey, Stanford, Washburn, Lodge.

On Engrossed Bills: Messrs. Allison (chairman), Cockrell, Martin.

On Enrolled Bills: Messrs. Caffery (chairman), Mitchell of Wisconsin, Dubois.

On Epidemic Diseases: Messrs. Jones of Nevada (chairman), Stockbridge, Gallinger, Quay, Harris, Irby, White of Louisiana.

To Examine the Several Branches of the Civil Service: Messrs. Peffer (chairman), Gray, Vilas, Power, Gallinger.

On Finance: Messrs. Voorhees (chairman), McPherson, Harris, Vance, Vest, Jones of Arkansas, Morrill, Sherman, Jones of Nevada, Allison, Aldrich.

On Fisheries: Messrs. Coke (chairman), Call, Gibson, Hill, Mitchell of Wisconsin, Stockbridge, Stanford, Squire, Power.

On Foreign Relations: Messrs. Morgan (chairman), Butler, Gray, Turpie, Daniel, Sherman, Frye, Dolph, Davis.

On Immigration: Messrs. Hill (chairman), Voorhees, McPherson, Faulkner, Harris, Stewart, Chandler, Squire, Proctor, Dubois, Lodge.

On Improvement of the Mississippi River and its Tributaries: Messrs. Bate (chairman), Walthall, Palmer, Peffer, Washburn, Pettigrew, Power.

On Indian Affairs: Messrs. Jones of Arkansas (chairman), Morgan, Smith, Roach, Allen of Nebraska, Stewart, Platt, Stockbridge, Manderson, Pettigrew, Shoup.

On Interstate Commerce: Messrs. Butler (chairman), Gorman, Brice, White of Louisiana, Camden, Lindsay, Cullom, Wilson, Chandler, Wolcott, Higgins.

On Irrigation and Reclamation of Arid Lands: Messrs. White of California (chairman), Jones of Arkansas, Kyle, Roach, Brice, Stewart, Dubois, Carey, Hansbrough.

On the Judiciary: Messrs. Pugh (chairman), Coke, George, Vilas, Hill, Lindsay, Hoar, Wilson, Teller, Platt, Mitchell of Oregon.

On the Library: Messrs. Mills (chairman), Voorhees, Wolcott.

On Manufactures: Messrs. Gibson (chairman), Smith, Caffery, Higgins, Gallinger.

On Military Affairs: Messrs. Walthall (chairman), Cockrell, Bate, Palmer, Mitchell of Wisconsin, Hawley, Cameron, Manderson, Davis.

On Mines and Mining: Messrs. Stewart (chairman), Bate, Call, Irby, Mills, Jones of Nevada, Power, Shoup, Allison.

On Naval Affairs: Messrs. McPherson (chairman), Butler, Blackburn, Gibson, Camden, Cameron, Hale, Stanford, Stockbridge.

On Organization, Conduct, and Expenditures of the Executive Departments: Messrs. Smith (chairman), Cockrell, Hill, Walthall, Caffery, Wilson, Proctor, Dubois, Lodge.

On Patents: Messrs. Gray (chairman), Kyle, Mills, Berry, Dixon, Platt, Wilson.

On Pensions: Messrs. Palmer (chairman), Brice, Vilas, Camden, Caffery, Gorman, Shoup, Hansbrough, Gallinger, Hawley.

On Post-Offices and Post-Roads: Messrs. Colquitt (chairman), Vilas, Irby, Mills, Hunton, Hill, Mitchell of Oregon, McMillan, Wolcott, Dixon, Washburn.

On Printing: Messrs. Gorman (chairman), Ransom, Manderson.

On Private Land Claims: Messrs. Hale (chairman), Teller, Dixon, Ransom, Colquitt, Pasco, Berry.

On Privileges and Elections: Messrs. Vance (chairman), Gray, Pugh, Turpie, Palmer, Hoar, Mitchell of Oregon, Chandler, Higgins.

On Public Buildings and Grounds: Messrs. Vest (chairman), Daniel, Pasco, Brice, Gordon, Stanford, Morrill, Quay, Squire.

On Public Lands: Messrs. Berry (chairman), Walthall, Pasco, Vilas, Martin, Allen of Nebraska, Dolph, Pettigrew, Carey, Power, Dubois.

On Railroads: Messrs. Camden (chairman), Berry, Gordon, Palmer, Martin, Blackburn, Hawley, Stockbridge, Pettigrew, Power, Peffer.

On Relations with Canada: Messrs. Murphy (chairman), Pugh, Colquitt, Hunton, Mitchell of Wisconsin, Hoar, Hale, Dolph, Higgins.

On the Revision of the Laws of the United States: Messrs. Daniel (chairman), Call, Lindsay, Wilson, Platt.

On Revolutionary Claims: Messrs. Cameron (chairman), Frye, Aldrich, Coke, Pugh.

On Rules: Messrs. Blackburn (chairman), Harris, Gorman, Aldrich, Manderson.

On Territories: Messrs. Faulkner (chairman), Hill, Blackburn, Bate, Call, White of California, Platt, Davis, Carey, Shoup, Hansbrough.

On Transportation Routes to the Seaboard: Messrs. Irby (chairman), George, Turpie, Gordon, Ransom, Gallinger, Squire, Mitchell of Oregon, Aldrich.

On Pacific Railroads: Messrs. Brice (chairman), Morgan, Faulkner, White of Louisiana, Murphy, Davis, Carey, Wolcott, McMillan.

On Indian Depredations: Messrs. Lindsay (chairman), Faulkner, Kyle, White of Louisiana, Cockrell, Shoup, Chandler, Pettigrew, Carey.

SELECT COMMITTEES.

To Investigate the Condition of the Potomac River Front of Washington: Messrs. Frye (chairman), Sherman, Proctor, McPherson, Ransom, Hunton.

To Inquire into all Claims of Citizens of the United States against the Government of Nicaragua: Messrs. Hawley (chairman), Stewart, Mitchell of Oregon, Morgan, Palmer.
On Woman Suffrage: Messrs. Hoar (chairman), Quay, Vance, George, Blackburn, McPherson.
On Additional Accommodations for the Library of Congress: Messrs. Morrill (chairman), Dixon, Voorhees, Butler, Pugh.
On the Five Civilized Tribes of Indians: Messrs. Teller (chairman), Platt, Butler, Pasco, Roach.
On Transportation and Sale of Meat Products: Messrs. Platt (chairman), Power, Vest, Coke, Allen of Nebraska.
To Establish the University of the United States: Messrs. Hunton (chairman), Kyle, Vance, Jones of Arkansas, Turpie, Proctor, Sherman, Dolph, Washburn.
On the Quadro-Centennial: Messrs. Vilas (chairman), Colquitt, Vest, Gray, Daniel, Gibson, Voorhees, Lindsay, Pettigrew, Sherman, Cameron, Hawley, Wilson, Cullom.
To Investigate the Geological Survey: Messrs. Martin (chairman), Jones of Arkansas, Ransom, Wolcott, Carey.
On National Banks: Messrs. Mitchell of Wisconsin (chairman), Vance, Colquitt, Chandler, Manderson.
On Forest Reservations: Messrs. Allen of Nebraska (chairman), Kyle, Morgan, Teller, Davis.
On Corporations in the District of Columbia: Messrs. Aldrich (chairman), McMillan, Gorman, Brice, Harris.
To Investigate Trespassers upon Indian Lands: Messrs. Roach (chairman), Butler, Higgins.

The PRESIDING OFFICER (Mr. HARRIS in the chair). The question is on agreeing to the resolution of the Senator from Maryland [Mr. GORMAN].

The resolution was agreed to.

Mr. MANDERSON. I ask consent that in addition to the list that has been read, which will of course appear in the RECORD, there also appear an alphabetical list of Senators in the usual form, with the committees to which they are assigned. Such a list can very easily be prepared.

Mr. COCKRELL. And that the list of committees be printed as a separate document.

Mr. MANDERSON. And that both lists be printed as a document.

The PRESIDING OFFICER. It will be so ordered if there be no objection. The Chair hears none.

UNITED STATES SENATORS ALPHABETICALLY ARRANGED, SHOWING THE COMMITTEES OF WHICH THEY ARE MEMBERS.

ADLAI E. STEVENSON, Vice-President of the United States and President of the Senate.

CLERK TO COMMITTEE ON PACIFIC RAILROADS.

Mr. BRICE submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Pacific Railroads be, and is hereby, authorized to employ a clerk, at an annual salary of $2,220 per annum, to be paid out of the contingent fund of the Senate until otherwise provided for.

Mr. MILLS. I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 47 minutes p. m.) the Senate adjourned until to-morrow, Thursday, March 16, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 15, 1893.

ASSISTANT ATTORNEY-GENERAL.

Edward B. Whitney, of New York, to be Assistant Attorney-General, vice Abraham X. Parker, resigned.

ASSISTANT SECRETARY OF THE NAVY.

William McAdoo, of New Jersey, to be Assistant Secretary of the Navy, vice James R. Soley, resigned.

POSTMASTERS.

Dale J. Crittenberger, to be postmaster at Anderson, in the county of Madison and State of Indiana, in the place of Hiram J. Daniels, resigned.

Charles H. Long, to be postmaster at Tipton, in the county of Cedar and State of Iowa, in the place of Mrs. Lucy Bowers, whose commission expires March 21, 1893.

Stephen Smith, to be postmaster at Tama, in the county of Tama and State of Iowa, in the place of Charles J. Wonser, resigned.

Joseph E. Swindlehurst, to be postmaster at Livingston, in the county of Park and State of Montana, in the place of Stiles M. Parks, resigned.

Robert B. Brown, to be postmaster at Meadville, in the county of Crawford and State of Pennsylvania, in the place of Orrin H. Hollister, removed.

ASSOCIATE PROFESSOR OF MATHEMATICS, MILITARY ACADEMY.

First Lieut. Wright P. Edgerton, Second Artillery, to be associate professor of mathematics, March 14, 1893, to fill an original vacancy.

PROMOTIONS IN THE ARMY.

Quartermaster's Department.

Capt. Charles W. Williams, assistant quartermaster, to be quartermaster with the rank of major, March 4, 1893, vice McGonnigle, retired from active service.

Cavalry arm.

Capt. James N. Wheelan, Second Cavalry, to be major, March 7, 1893, vice Harris, Eighth Cavalry, retired from active service.

Capt. Adam Kramer, Sixth Cavalry, to be major, March 8, 1893, vice Adam, Sixth Cavalry, retired from active service.

First Lieut. Frederick W. Sibley, Second Cavalry, to be captain, March 7, 1893, vice Wheelan, Second Cavalry, promoted.

First Lieut. Benjamin H. Cheever, Sixth Cavalry, to be captain, March 8, 1893, vice Kramer, Sixth Cavalry, promoted.

Second Lieut. Harry G. Trout, Ninth Cavalry, to be first lieutenant, March 7, 1893, vice Sibley, Second Cavalry, promoted.

Second Lieut. Edward C. Brooks, Eighth Cavalry, to be first lieutenant, March 8, 1893, vice Cheever, Sixth Cavalry, promoted.

Infantry arm.

Maj. Richard Comba, Ninth Infantry, to be lieutenant-colonel, March 8, 1893, vice Whittemore, Twelfth Infantry, retired from active service.

Capt. Ezra P. Ewers, Fifth Infantry, to be major, March 7, 1893, vice Comba, Ninth Infantry, promoted.

First Lieut. William H. C. Bowen, Fifth Infantry, to be captain, March 7, 1893, vice Ewers, Fifth Infantry, promoted.

Second Lieut. George B. Davis, Twenty-third Infantry, to be first lieutenant, March 7, 1893, vice Bowen, Fifth Infantry, promoted.

PROMOTIONS IN THE NAVY.

Passed Assistant Engineer Charles W. Rae, to be a chief engineer in the Navy from the 21st February, 1893, vice Chief Engineer Robert B. Hine, retired (subject to the examinations required by law).

Assistant Engineer William H. Allderdice, to be a passed assistant engineer in the Navy from the 21st February, 1893, vice Passed Assistant Engineer Charles W. Rae, promoted.

THURSDAY, *March 16, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

ADJOURNMENT TO MONDAY.

Mr. BATE. I move that when the Senate adjourn to-day it be to meet on Monday next.

The motion was agreed to.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the Legislature of Washington, praying that action be taken by Congress for the protection of Puget Sound and the entire coast; which was referred to the Committee on Coast Defenses.

He also presented a petition of the Legislature of Washington, praying that an appropriation be made for the survey and improvement of the western coast of that State north of Grays Harbor and the Ozeete River; which was referred to the Committee on Commerce.

He also presented a petition of the Legislature of Washington, praying for the enactment of legislation to protect the country from infectious diseases; which was referred to the Committee on Epidemic Diseases.

He also presented a petition of the Legislature of Washington, praying for the creation of a new light-house district which shall embrace all the aids to navigation on the Straits of Juan de Fuca, Puget Sound, Washington Sound, and all the adjacent and tributary waters thereto, and also all Alaskan waters; which was referred to the Committee on Commerce.

He also presented a petition of the Legislature of Washington, praying for the annexation of the Hawaiian Islands; which was referred to the Committee on Foreign Relations.

He also presented a petition of the Legislature of Washington, praying for an amendment to the Constitution of the United States providing for the election of United States Senators by a popular vote; which was referred to the Committee on Privileges and Elections.

He also presented a petition of the Legislature of Washington, praying for the early completion of the Nicaragua Canal; which was referred to the Committee on Foreign Relations.

He also presented a petition of the Second Legislative Assembly of Oklahoma Territory, praying that the provisions of section 2301, Supplement of the Revised Statutes, be amended so as to apply to the Public Land Strip; which was referred to the Committee on Public Lands.

He also presented a petition of the National Assembly, League of American Wheelmen, praying that an appropriation be made for the continuance and early completion of the work of the United States Geological Survey; which was referred to the Committee on Appropriations.

Mr. HANSBROUGH presented a petition of the Legislature of North Dakota, praying that all telegraph lines be placed under Government control; which was referred to the Committee on the Judiciary.

He also presented petitions of the Legislature of North Dakota, praying for the removal of the duty on binding-twine and for the passage of a graduated income-tax law; which were referred to the Committee on Finance.

He also presented a petition of the Legislature of North Dakota, praying for a change in the plans for the expenditure of the balance of the appropriation for the erection of a penitentiary building at Grafton, N. Dak., under the provisions of an act of Congress, so that the building may be used as an institution for the feeble-minded; which was referred to the Committee on Public Buildings and Grounds.

He also presented a petition of the Legislature of North Dakota, praying for an amendment of the law regulating the allotment of the national militia fund; which was referred to the Committee on Military Affairs.

He also presented a petition of the Legislature of North Dakota, praying for the passage of what is known as the "good roads bill;" which was referred to the Committee on Agriculture and Forestry.

CLERK TO SELECT COMMITTEE ON NATIONAL BANKS.

Mr. MITCHELL of Wisconsin submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Select Committee on National Banks be, and it is hereby, authorized to employ a clerk at an annual salary of $1,440, to be paid out of the contingent fund of the Senate until otherwise provided for.

Mr. GORMAN. I move that the Senate adjourn.

The motion was agreed to; and (at 12 o'clock and 10 minutes p. m.) the Senate adjourned until Monday, March 20, 1893, at 12 o'clock m.

MONDAY, *March 20, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Thursday last was read and approved.

ADJOURNMENT TO WEDNESDAY.

Mr. FAULKNER. I move that when the Senate adjourn to-day it be to meet on Wednesday next.

The motion was agreed to.

REGENT OF SMITHSONIAN INSTITUTION.

The VICE-PRESIDENT. Pursuant to section 5581 of the Revised Statutes, the Vice-President appoints the Senator from Delaware, Hon. GEORGE GRAY, to be a regent of the Smithsonian Institution, to fill the vacancy occasioned by the expiration of his term of office.

SENATOR FROM WASHINGTON.

Mr. SQUIRE presented the credentials of John B. Allen, appointed by the governor of Washington a Senator from that State; which were read, and referred to the Committee on Privileges and Elections, as follows:

STATE OF WASHINGTON, *Executive Department.*

To the President of the Senate of the United States and to all to whom these presents may come, greeting:

Whereas the term of office of Hon. John B. Allen as a Senator in Congress from the State of Washington expired March 3, A. D. 1893; and

Whereas the Legislature of the State which assembled January 9, A. D. 1893, finally adjourned March 9, A. D. 1893, without electing a Senator in Congress from said State to fill the vacancy occasioned by the expiration of the term of Senator Allen; and

Whereas by reason of the premises a vacancy exists and happens during the recess of the Legislature in the office of Senator in Congress from the State of Washington:

Now, therefore, I, J. H. McGraw, executive of the State of Washington, by reason of the premises, and by virtue of the authority in me vested as such executive by the Constitution of the United States, do hereby appoint said John B. Allen, a native-born citizen of the United States over the age of 30 years and an inhabitant of the State, a Senator in Congress from the State of Washington to fill such vacancy until the next meeting of the Legislature of the State.

In witness whereof I have hereunto set my hand and caused the seal of the State of Washington to be affixed hereto, at Olympia, this 10th day of March, A. D. 1893, and of the Independence of the United States the one hundred and seventeenth.

[SEAL.] J. H. McGRAW.

By the governor:

J. H. PRICE, *Secretary of State.*

CLERK TO SELECT COMMITTEE ON GEOLOGICAL SURVEY.

Mr. MARTIN submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Select Committee to Investigate the Geological Survey be, and it hereby is, authorized to employ a clerk at an annual salary of $1,440, to be paid out of the contingent fund of the Senate, until otherwise provided for.

ORDER OF BUSINESS.

Mr. HOAR. I rise to a question of order.

The VICE-PRESIDENT. The Senator from Massachusetts will state his question of order.

Mr. HOAR. It is that the rules of the Senate require the presentation of routine business in a regular order, first petitions, and afterwards reports of committees, bills, and resolutions.

The VICE-PRESIDENT. The point of order of the Senator from Massachusetts is well taken, and routine business will be called in regular order. The presentation of petitions and memorials is first in order.

Mr. PASCO. What is the point of order made?

The VICE-PRESIDENT. The regular order is called for, which is the presentation of petitions and memorials.

Mr. SHERMAN. It is usual to first lay before the Senate messages from the President and communications from heads of Departments. I take the liberty of suggesting that that order precedes the presentation of petitions and memorials.

REPORT ON PHOSPHATE INDUSTRY.

The VICE-PRESIDENT laid before the Senate a communication from the Commissioner of Labor, transmitting, in response to a resolution of the Senate of December 4, 1890, a special report relating to the phosphate industry of the United States; which, with the accompanying papers, was, on motion of Mr. CALL, referred to the Committee on Printing, and ordered to be printed.

LONG ISLAND SOUND COAST DEFENSES.

Mr. HAWLEY presented a petition of the Legislature of Connecticut, praying for improved defenses of the eastern entrance to Long Island Sound; which was read, and referred to the Committee on Coast Defenses, as follows:

STATE OF CONNECTICUT, GENERAL ASSEMBLY,
January Session, A. D. 1893.

House joint resolution No. 354, concerning the defense of the eastern entrance of Long Island Sound.

Resolved by this Assembly:

SECTION 1. That the proposed erection of suitable coast defenses at the

eastern entrance to Long Island Sound is hereby approved, and a sufficient application of funds appropriated for seacoast defenses by the Congress of the United States according to plans prepared by the Chief Engineer of the United States Army, under direction of the Secretary of War, is hereby recommended and urged as a necessity in order that this important part of the coast may be properly protected.

SEC. 2. The secretary is hereby directed to forward copies of this resolution to the Senators and Representatives from this State in Congress.

Passed senate March 2, 1893.

Passed house of representatives March 2, 1893.

STATE OF CONNECTICUT, *ss.*,
Office of the Secretary:

I hereby certify that the foregoing is a true copy of record in this office.

In testimony whereof, I have hereunto set my hand and affixed the seal of said State, at Hartford, this 6th day of March, A. D. 1893.

[SEAL.] JOHN J. PHELAN, *Secretary.*

(Mr. O. L. Pruden, one of the private secretaries of the President of the United States, communicated to the Senate sundry messages in writing.)

REPORT ON COST OF MANUFACTURED PRODUCTS.

Mr. McPHERSON submitted the following resolution, which was read:

Resolved, That the Commissioner of Labor is hereby directed to make a report to the Senate at the opening of the Fifty-third Congress comprehending the facts already collected by him, or to be obtained from other sources, of the total cost and also actual labor cost of producing various iron and steel products, such as bar iron, steel rails, etc., and leading articles in the textile industry, and of such other articles for which the cost of production has been or may be approximately obtained, and in his report to state the facts in parallel columns for this and other countries for which they have been or may be obtained.

Mr. McPHERSON. If there is no objection I ask for the immediate consideration of the resolution.

Mr. COCKRELL. Let it be referred to the Committee on Education and Labor.

Mr. PLATT. Why not the Committee on Finance?

Mr. COCKRELL. Let it go to the Committee on Finance, then.

The VICE-PRESIDENT. Does the Senator from Missouri submit a motion to refer?

Mr. COCKRELL. I move that the resolution be referred to the Committee on Finance.

The motion was agreed to.

Mr. VEST. I move that the Senate proceed to the consideration of executive business.

Mr. WHITE of Louisiana. I ask the Senator from Missouri to withhold his motion for a few minutes that I may submit some reports.

Mr. SHERMAN. I rise to offer a resolution.

Mr. VEST. I will yield to allow routine business to be transacted.

The VICE-PRESIDENT. The Senator from Missouri withdraws his motion.

AMENDMENT OF THE RULES—APPROPRIATION BILLS.

Mr. SHERMAN. In pursuance of the notice I gave the other day, I introduce a resolution, which I ask to have referred to the Committee on Rules.

The resolution was read, and referred to the Committee on Rules, as follows:

Resolved, That Rule XVI be amended by adding after the words "Committee on Commerce," in clause 1, the words "and bills making appropriations for the District of Columbia, which shall be referred to the Committee on the District of Columbia;" so as to read:

"All general appropriation bills shall be referred to the Committee on Appropriations, except bills making appropriations for rivers and harbors, which shall be referred to the Committee on Commerce, and bills making appropriations for the District of Columbia, which shall be referred to the Committee on the District of Columbia," etc.

Mr. BUTLER. I submit a resolution, which I ask be referred to the Committee on Rules.

The resolution was read, as follows:

Resolved, That paragraph 1 of Rule XVI of the standing rules of the Senate be amended by striking out the words "All general appropriation bills shall be referred to the Committee on Appropriations, except bills making appropriations for rivers and harbors, which shall be referred to the Committee on Commerce," and inserting the following:

"The general appropriation bills shall be referred to committees as follows:

"To the Committee on Appropriations: The bills for legislative, executive, and judicial expenses, for sundry civil expenses, for pensions, and for all deficiencies.

"To the Committee on Agriculture: The bill for the Agricultural Department.

"To the Committee on Foreign Relations: The consular and diplomatic bill.

"To the Committee on Military Affairs: The bill for the military establishment, including the Military Academy.

"To the Committee on Naval Affairs: The bill for the naval establishment.

"To the Committee on Post-Offices and Post-Roads: The Post-Office appropriation bill.

"To the Committee on Indian Affairs: The bill for Indians and Indian tribes.

"To the Committee on Commerce: The bill for rivers and harbors.

"To the Committee on Coast Defenses: The fortifications bill; and

"To the Committee on the District of Columbia: The bill making appropriations for the District."

Mr. HARRIS. Let the resolution be printed.

The VICE-PRESIDENT. The resolution will be referred to the Committee on Rules and printed.

REPORT ON IMMIGRATION.

Mr. CHANDLER submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That there be printed and bound in paper covers, for the use of the Senate, 1,000 copies of the Report No. 1333, of the Committee on Immigration, made at the second session of the Fifty-second Congress, with the testimony accompanying said report.

REPORT ON FAILED NATIONAL BANKS.

Mr. CHANDLER submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That there be printed and bound in paper covers, for the use of the Senate, 2,250 copies of the Report No. 1286, of the Committee on Failed National Banks, made at the second session of the Fifty-second Congress, with the testimony accompanying said report.

INDIAN DEPREDATION CLAIMS.

Mr. KYLE. I submit a resolution for reference to the Committee on Indian Depredations.

The resolution was read, as follows:

Resolved, That the Committee on Indian Depredations be, and hereby is, directed to make inquiry concerning all Indian depredation claims which at any time have been or may be presented in the Court of Claims under the act of March 3, 1891, especially those in which unpaid judgments have been hitherto rendered, or may be rendered prior to the conclusion of the inquiry; and also into the manner in which such claims have been defended in behalf of the Indians and the United States; and generally into the workings of said act of March 3, 1891; and concerning all other Indian depredation claims not covered by said act, and to make such recommendations relative to any or all of said claims and for additional legislation as said committee may deem expedient; said committee, either as a full committee or through subcommittees, being hereby empowered to sit during the recess of the Senate, to send for persons and papers, and to employ a stenographer and expert, the expenses of the inquiry to be paid from the contingent fund of the Senate.

Mr. HARRIS. The resolution had better be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The Senator from South Dakota desires to have it referred to the Committee on Indian Depredations.

Mr. KYLE. I wish to have the Committee on Indian Depredations consider the resolution before action is had upon it.

Mr. HARRIS. I have no objection to its going to that committee, but before the Senate can finally consider it it must go, under the law, to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The resolution will be referred, in the first instance, to the Committee on Indian Depredations.

PHOTOGRAPHIC COPIES OF SENATE ARCHIVES.

Mr. ALLISON. I submit a resolution and ask that it be referred to the Committee on Rules, as I think that is the proper committee to consider the subject. It is a matter of some importance to the Senate.

The resolution was read and referred to the Committee on Rules, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, directed to allow, under his supervision, the representative of the Department of Justice on the board of management of the World's Columbian Exposition to have photographic copies made of certain ancient executive communications on file in the archives of the United States Senate, for exhibition at the World's Columbian Exposition, as follows: The nominations by the President of the Chief Justices and the Associate Justices of the Supreme Court of the United States, embraced in Nos. 1, 2, 6, 7, 14, 16, 27, 28, 31, 35, 37, 40; also nominations of Ellsworth and Fuller, and Jefferson's address to the Senate on taking the oath of office.

STATE QUARANTINE PROPERTY.

Mr. CHANDLER submitted the following resolution, which was referred to the Committee on Epidemic Diseases:

The Secretary of the Treasury is hereby directed to ascertain, by means of a suitable board of officers appointed for that purpose, or otherwise, the value of the real or personal property belonging to any State or municipal government designed or used for quarantine purposes; also to ascertain at what price such property may be purchased by the United States, and to report the result of these inquiries at the first session of the next Congress.

CLERKS TO SELECT COMMITTEES.

Mr. WHITE of Louisiana. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by the Senator from Wisconsin [Mr. MITCHELL] on the 16th instant, providing for a clerk to the Select Committee on National Banks, to report a substitute therefor, and I ask for its present consideration.

The substitute was read, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay the clerks to the following committees their salaries at the rate of $1,440 per annum, from the 16th day of March instant, or so soon thereafter as they shall qualify:

To Investigate the Geological Survey; on National Banks; on Forest Reservations in California; on Corporations in the District of Columbia; and to Investigate Trespassers upon Cherokee Lands; the said salaries to be paid from the contingent fund of the Senate.

Mr. COCKRELL. The words "in California" should be stricken out after the words "forest reservations." It is designated the Select Committee on Forest Reservations.

Mr. WHITE of Louisiana. I will strike out those words.

Mr. COCKRELL. The word "Cherokee" should be stricken out and the word "Indian" inserted; so as to read: "To investigate trespassers upon Indian lands."

Mr. WHITE of Louisiana. I will so modify the resolution. I ask unanimous consent for its consideration at this time.

Mr. SHERMAN. I have not been able to hear the resolution. I think the Senator from Louisiana had better allow it to be printed and go over.

The VICE-PRESIDENT. The resolution will be read as modified.

The resolution was read as modified, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay the clerks to the following committees their salaries at the rate of $1,440 per annum, from the 16th day of March instant, or so soon thereafter as they shall qualify:

To Investigate the Geological Survey; on National Banks; on Forest Reservations; on Corporations in the District of Columbia; and to Investigate Trespassers upon Indian Lands; the said salaries to be paid from the contingent fund of the Senate.

Mr. CULLOM. I wish to inquire if the resolution comes from the Committee on Contingent Expenses.

Mr. WHITE of Louisiana. It is reported by me from that committee.

Mr. CHANDLER. I ask the Senator from Louisiana to be kind enough, as he desires the present consideration of the resolution, to state what change it makes in the existing law as to the payment of clerks.

Mr. WHITE of Louisiana. I will state the practical effect of the resolution. Under the legislative, etc., appropriation act there were certain designated committees authorized to employ clerks, those committees being mentioned nominally in the act. Then there was a general provision authorizing twenty-three clerks to committees. Then there was a general provision providing that where a Senator was chairman of a committee he should not be entitled to a secretary. By the make-up of the committees since that statute was passed the committees designated here and one other were not embraced in the enumeration. If this resolution be not passed the effect will be to deprive the chairmen of these committees of the secretaries which they would otherwise have. The effect of the resolution is simply to put them upon a footing of equality.

Mr. CHANDLER. I understand perfectly the difficulty the Senator has sought to obviate. Does the resolution propose to pay these clerks any more than they would receive as clerks of Senators?

Mr. WHITE of Louisiana. It proposes to pay them the same that clerks of other committees of the same grade received.

Mr. CHANDLER. What sum is that?

Mr. WHITE of Louisiana. Fourteen hundred and forty dollars, instead of the sum they would receive as secretaries.

Mr. CHANDLER. It is the purpose of the Committee to Audit and Control the Contingent Expenses of the Senate that all the committees of this grade shall have $1,440 clerks?

Mr. WHITE of Louisiana. Yes, that they shall be treated exactly alike except as to those committees where a greater sum is provided for clerks by the terms of the statute.

Mr. CHANDLER. The salaries of the clerks of Senators without committees will be how much under the new law?

Mr. WHITE of Louisiana. Twelve hundred dollars a year.

Mr. CHANDLER. I think the resolution had better go over until to-morrow.

The VICE-PRESIDENT. Objection being made, the resolution will go over.

CLERK TO COMMITTEE ON PACIFIC RAILROADS.

Mr. WHITE of Louisiana. I am also directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by the Senator from Ohio [Mr. BRICE] on the 15th instant, to report a substitute therefor, which I ask to have read and considered at this time.

The VICE-PRESIDENT. The substitute reported by the committee will be read.

The Secretary read the proposed substitute, as follows:

Resolved, That the Committee on Pacific Railroads be, and it is hereby, authorized to employ a clerk at an annual salary of $1,440, from the 16th day of March, instant, or so soon thereafter as the said clerk shall qualify, and that the Secretary of the Senate be, and he is hereby, authorized and directed to pay the salary of the said clerk out of the contingent fund of the Senate.

The VICE-PRESIDENT. The question is on agreeing to the amendment in the nature of a substitute.

The amendment was agreed to.

The resolution as amended was agreed to.

COMMITTEE MEMBERSHIP.

Mr. CALL submitted the following resolution; which was ordered to lie on the table and be printed:

Resolved, That the Committees on Naval Affairs, Military Affairs, Judiciary, Foreign Relations, Appropriations, Commerce, Interstate Commerce, shall each consist of fifteen members.

REPRINT OF INDIAN APPROPRIATION ACT.

Mr. COCKRELL. I offer the resolution which I send to the desk, and ask for its present consideration. It is a resolution simply to print additional copies of the Indian appropriation law, for which there is a very great demand in consequence of legislation affecting the opening of the Cherokee Outlet. All the copies in the document room have already been exhausted.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That there be printed for the use of the Senate 500 additional copies of public act No. 125, being "An act making appropriations for current and contingent expenses, and fulfilling treaty stipulations with Indian tribes, for fiscal year ending June 30, 1894."

Mr. HALE. Before the Senator gets a vote upon the resolution, I wish to ask him if he has examined the Indian appropriation bill, to which it refers, with a view to the correctness of its enrollment?

I regret to say that in several appropriation bills passed in the last days of the last session of the last Congress many errors in enrollment have crept in. I had occasion this morning to examine the naval appropriation bill, and I found more than ninety errors in it, mainly of punctuation and the omission of letters, but occasionally the omission of important words and the changing of one word to another. Senators will bear in mind that even in the matter of punctuation, the insertion of a comma or a semicolon in the wrong place may change the purport and spirit of the provisions of a law.

Mr. HOAR. Such an error made one of the most important changes in a tariff act.

Mr. HALE. And, as the Senator on my right reminds me, a very important change in tariff legislation occurred in this fashion.

Now, I hope the Senator from Missouri, who I know is vigilant in this as in all matters, has examined this bill carefully and has seen that nothing has crept in through enrollment which Congress did not intend. There are in some of the appropriation bills grave questions raised by the errors which have occurred in the enrollment.

Mr. CULLOM. In which House?

Mr. HALE. In the other House, I am bound to say upon information which has been given to me. There is one case where an appropriation considered of immediate and necessary importance was made for $37,000, and it is enrolled and is a part of the law for $37.

This is a subject which ought to command the attention of those Senators and members of the other House who will have the responsibility for legislation hereafter. The enrolling force ought to be an expert, a well known and well established force, otherwise Congress is at the mercy of it, and the gravest of errors may creep in.

Mr. MCPHERSON. May I inquire of the Senator from Maine to what particular appropriation bill he is calling the attention of the Senate?

Mr. HALE. The Senator from Missouri [Mr. COCKRELL] asks that a reprint be made of the Indian appropriation law, and I asked him, before such order is made, to examine, if he had not already done so, to see if it is correctly enrolled. I think it has been stated to me that there is some error in that bill, but of that I am not sure.

Mr. HOAR. I wish to add my testimony to some extent to the facts stated by the Senator from Maine [Mr. HALE], though I have not, of course, the same familiarity with appropriation bills which he has; but in one appropriation bill I discover that there was a substitution of a word which materially changed an appropriation of some consequence—not a very important one, but it was an amendment which I moved, which was referred to the Committee on the District of Columbia, reported back by that committee, it being in print, referred to the Appropriations Committee, reported back by that committee in print, and the printed amendment being moved in the Senate and sent up by the Senator from Maine himself to the Secretary's desk, and then pasted into the bill as the amendment adopted. That appears in the law with the substitution of the words "the coming year" for "the current year." I went into the Secretary's office to inquire as to how the mistake arose, but they could not inform me.

The possibility of such a thing is of infinite importance in legislation. It offers room for the grossest malpractice, and indicates somewhere a very great failure in the security and safety of our legislative mechanism. I hope the Committee on Enrolled Bills of the Senate, when it starts in its duty, will make a very careful and thorough investigation of the manner in which the integrity of our legislation is preserved, and that there will be a reform.

I am not criticising what happened in antecedent Congresses, but in the last. I call the attention of the Senator from Missouri [Mr. COCKRELL], an experienced Senator, who is chairman of

the Committee on Appropriations, and who will have these great bills in his charge, to the necessity of insisting that this matter be examined by the Committee on Enrolled Bills to the bottom, so that there may be no possibility of a comma, still less of a word, getting into a bill or being struck out of a bill without the knowledge of the Senate itself.

Mr. DAVIS. Mr. President, I desire to add my contribution to the matter under discussion, and I trust that the whole may receive a most searching investigation.

It will be remembered that in the sundry civil bill a very vigorous and animated discussion arose over the retention of a proviso in that bill whereby the effect of a certain statute of repose as to land entries was entirely taken away and the contests thrown open again as if that statute never existed. After much discussion that proviso was struck out, so that the antecedent statutes of repose remained for the protection of the citizens of the Northwest especially. When that bill came to be enrolled the proviso which the Senate had stricken out, and which action of the Senate had been agreed upon in conference, appeared in the enrolled bill, as I am informed, and the whole matter was set at large so far as those titles are concerned. The existence of that proviso, which had thus been stricken out and agreed to be stricken out, was discovered by the vigilance of the clerk of the Committee on Appropriations happily in time to correct the enrollment and save the rights which the Senate had thus restored to the people whom I represented in the debate upon this floor at that time.

Mr. ALLISON. Mr. President, bills are enrolled when passed in the House where they originate, and all these errors and defects—and there were quite a number of them at the last session—so far as I know, were found in the appropriation bills, and they were not enrolled in this body or by the clerks of this body.

I think I can say, after considerable observation and experience, of our own clerks that the enrollments here are absolutely accurate and the examinations are accurate. It is true that it is difficult at the closing hours of a session, when a great number of bills are passing between the two Houses, perhaps, to make these enrollments without errors; but I think some of the errors at the last session were inexcusable. I regret very much that they were made, but I know of no way—and I should be glad to have a way pointed out if it can be—whereby the Senate can exercise jurisdiction over the enrolling clerks of the House of Representatives. It seems to me that where bills are enrolled in the other House there is no way whereby the Senate can exercise control over them.

It is true as to the case suggested by the Senator from Minnesota [Mr. DAVIS] that the clerk of the Committee on Appropriations of the House and the clerk of the Committee on Appropriations of the Senate did undertake to make an examination of these bills so far as they could with a view to ascertain the correctness of the enrollment. A number of errors were corrected by them before the enrolled bills were signed, and that alluded to by the Senator was one of the errors which was discovered and corrected by the clerks of the Committees on Appropriations of the two Houses.

I quite agree that this is a proper discussion, but I know of no way whereby the difficulty can be corrected unless there shall be some joint arrangement between the two Houses as to the method and manner of enrolling bills.

Mr. COCKRELL. Mr. President, in response to the Senator from Maine [Mr. HALE] I desire to say that I regret that I have not even had time yet to read the Indian appropriation bill as it became a law, and if I had the time to read it and discovered any possible number of errors in it, neither I nor the Senate at this session have any power to reform or correct them. It is a law; it is in existence, and must be construed by the courts until some legislation is enacted by Congress amendatory of, repealing, or modifying it. Therefore I have not looked at the bill at all; but it is the law, and in the form it is now it must go into operation and must receive construction at the hands of the courts. Because there may be errors in the law is no reason why we should undertake to suppress the circulation of it.

Mr. HALE. Mr. President, my suggestion was not made with any view of suppressing the publication of the act, but I think it would be a matter of satisfaction to the Senator himself, who is a careful legislator and who is to have very broad control and jurisdiction over the appropriation bills, to find out if there are errors in the Indian appropriation act such as have been discovered in other acts, because it is by finding these things out and realizing the harm they may do that we shall be able to correct them in the future.

I do not object to the Senator's resolution. I do not deny his proposition that the bill as printed, signed, and coming to us as the law is the chart that we have to follow for the next year. That is undoubtedly so; but if there are errors in it and they are exposed and brought to public notice, there will be less likelihood of such errors occurring hereafter.

Mr. COCKRELL. That is all true, and in due time, when other pressing matters are laid aside or disposed of, that question will be considered.

I desire to call the attention of the Senator and of the Senate to the fact that scarcely a Congress passes when some mistake of this kind is not made. We all know, when we begin to think about it and investigate it, what is the cause of these errors. It is the immense pressure of business upon Congress in the closing days of the short session, which expires by limitation at 12 o'clock on the 4th day of March. We have to get the appropriation bills through. As I understand—and it is no secret—three of the important appropriation bills were never carefully compared and could not be unless we could have extended the existence of that Congress ten or twelve hours. Those bills had to be passed or an extra session of Congress be called, and they had to be passed in their uncompared form. Therefore necessarily there were errors in them, and this happens at almost every short session of Congress.

Mr. DAVIS. I should like to ask the Senator from Missouri if he thinks the pressure of business accounts for writing in a long proviso after it was stricken out of the bill?

Mr. COCKRELL. If there had been any comparison of the bill does not the Senator know that the proviso would not have been written there? In that case it would have been stricken out.

Mr. DAVIS. When the bill went to the enrolling clerks of the other House the proviso had been stricken out, and it was written in there. Pressure of business does not account for that.

Mr. COCKRELL. I shall not detain the Senate. I wish simply to say that these things come up, and they come up largely from the pressure of business in the closing hours of a Congress. If the existence of the second session of a Congress could be extended until the 30th day of April, in my judgment it would give time in which all the appropriation bills could be properly considered; but between the first Monday in December and the 4th day of March Congress has to enact thirteen large appropriation bills. They have to be prepared in the other House and come here and be considered. Ordinarily it takes from six to eight months for Congress to pass these bills, and yet at a short session they are to be pressed through in so short a time that mistakes have occurred and will continue to occur, and some errors will be made and some inaccuracies will creep in. We shall simply have to do the best we can. As we have done heretofore in regard to the tariff act of October 1, 1890, we shall have to pass a law amendatory of it, explaining what is left out, and this will have to be done from Congress to Congress.

Mr. DUBOIS. Mr. President, I think it due to the Senate, to the Committee on Enrolled Bills, and to myself to make a statement.

One of the members of that committee was absent and another member of the committee was at home sick, so that I have acted as chairman of that committee during most of the recent session of the Senate. No bill went from here that was not carefully compared and corrected by that committee. So far as the Senate is concerned there have been no mistakes in enrolled bills. I desire to emphasize the statement of the Senator from Iowa [Mr. ALLISON], that the Senate is not responsible for any errors which may appear in these bills as they have become laws.

Mr. STEWART. Mr. President, this matter will never be righted until bills are prepared and acted upon more deliberately earlier in the session. Mistakes must necessarily occur when a vast amount of business is done in the last hours of a session when Senators do not have an opportunity even to know what the bills are, and the pressure is such from day to day that bills are passed through here which can not be amended or discussed. This want of deliberation has become a growing evil. I hope the Committee on Rules will, in connection with the committee of the other House, frame some rule or make some arrangement whereby legislative matters may be considered and appropriation bills may be considered properly, and that the bills may then be properly enrolled.

It has become an absolute necessity to good government that Senators should have an opportunity to know what the bills are, that the clerks should have an opportunity to properly enroll them, and that they be carefully looked over by the enrolling committees.

The habit of doing the largest part of the legislation of a session in a hurried manner is a great evil, and this circumstance may work good by calling attention to this growing and terrible evil, which exists in rushing through the whole mass of business of a session in a few hours, when a large number of Senators are out of the body on conference committees, and when Senators are denied the privilege of debating or calling attention to the various items in a bill because if they should do so it would involve the necessity of an extra session.

Mr. GORMAN. Mr. President, I only wish to say a word. I

think it is due at all events to the officers of this body to say that there are no more expert and correct engrossing clerks to be found anywhere than here.

My attention has been called to this subject; I have looked over it somewhat, and I was very much concerned about the result, owing to the condition of legislation at the very last hours of the last session.

The Senator from Missouri [Mr. COCKRELL] says that these errors always occur at short sessions. I submit to the Senator from Maine [Mr. HALE], and the Senator from Iowa [Mr. ALLISON], who practically had charge of the appropriation bills in this body, that seldom in the history of the Government, certainly not within my time, have the appropriation bills been so delayed as they were at the recent session.

The Senator from Iowa, the chairman of the Committee on Appropriations, pressed these bills to the best of his ability, but he was antagonized, as he always is, with other matters of minor importance, and more or less delay occurred. So it was that in the last three days of the session, when two or three great appropriation bills absolutely necessary for the Government had to be passed or else we should have had an extra session of Congress, those bills were delayed here by useless discussion of other matters. The result was that when they went elsewhere to be enrolled there was not sufficient time in which to do it. There was great carelessness, I admit.

I hold in my hand the naval appropriation bill as it became a law. The errors in that bill of misspelling and of misnaming places are almost without number. They occur upon nearly every page of the bill. For instance, "quarterman" for "quartermaster," errors in punctuation, etc., showing great carelessness on the part of the clerk who did this work. The fact remains, however, that if the clock had been at the standard time, the bill, even in its imperfect form, would never have been presented for the signature of the President. It is a lesson which I trust no Senator will forget hereafter, and press small minor matters in the place of the consideration of appropriation bills at the last hours of the session. It is to be regretted that this has occurred, but it is a wonder that greater errors have not occurred.

I repeat now, in the presence of this body, that but for the determination of the gentlemen in charge of these great appropriation bills, and the Executive whose duty it is under the Constitution to approve them, we should probably have had an extra session of Congress. The clerks were worn out working day after day and night after night, Sundays included, and it is no wonder that these errors occurred with men less experienced than those we have on this side.

Those are the facts. The responsibility ought not to be put alone upon the faithful men who have discharged their duty to the best of their ability, but it is with both bodies as well as it is with the clerks. The Senator from Iowa, the Senator from Maine, and the Senator from Missouri, know too well that every moment of that long last night of the session we were engaged in struggling to bring to a conclusion of some sort two great appropriation bills, and there was but an hour or two left in which the clerks could transcribe the result of our work.

Mr. STEWART. The Senator must be aware that the clerks of the House of Representatives have the burden of this work, and they ought not to be reflected upon by any remarks because they did not have time to properly do the work.

Mr. GORMAN. I tried to make that statement as plain and emphatic as I could. I say that it is the case, and it is a lesson for the two bodies who deal with these bills. Therefore the Senators who shape and control these bills should not be interfered with in the consideration of them in the last few days of a session; the clerks should have time to properly enroll them; and those charged with such duty the time to carefully compare them.

Mr. HIGGINS. May I ask the Senator if the lack of time on the part of the clerks of the House of Representatives could account for bad spelling?

Mr. GORMAN. In the few short hours in which they had this work to do anything might occur. I said a moment ago frankly that there were more mistakes made at the recent session than I have ever known before. The bill I hold in my hand contains many for which there is no excuse; but the fault is not alone with the clerks.

Mr. PLATT. Is it not true that there is so small a regular enrolling force in another body that it is utterly impossible for them to make the enrollment, and therefore when the passage of bills is deferred until the last moment, inexperienced people have to be called in to assist the regular enrolling force?

Mr. GORMAN. I will answer the Senator from Connecticut by saying that his statement is absolutely true. That occurs in both bodies. At the last session there were six extra men employed to help to get this work in shape so that the bills could be signed in due season. I say again that the great fault has been with the members of the two legislative bodies in delaying the appropriation bills at the last hours of the session, and expecting the impossible of the enrolling clerks.

Mr. CULLOM. The Senator from Maryland will allow me a remark.

Mr. GORMAN. Certainly.

Mr. CULLOM. Referring to the bill on which this discussion seems to have arisen, the Indian appropriation bill, the Senator from Maryland will remember that between 6 and 7 o'clock in the morning on the 4th day of March the conference committee was at work on that bill, and it was not until 7 o'clock or later that the conference report was agreed to by this body. Before it got through and was signed by the presiding officers of the two Houses it must have been well on to 9 o'clock in the morning or probably later.

Mr. PLATT. It was not signed by the presiding officers until probably 12 o'clock.

Mr. GORMAN. The bill probably did not reach here from another branch, enrolled imperfectly as it had been, until 1 o'clock by the standard time and 12 o'clock by ours. Therefore I say we ought not to gibbet these men on whom we imposed a task which it was not physically possible for them to perform. Hereafter I trust when the chairman of the Committee on Appropriations comes in with a bill in the last few days of an expiring Congress, by common consent, he shall meet with no antagonism. Then we may get these bills through earlier, and there will be opportunity to properly compare and enroll them. There is too much at stake to have this work done hastily. Everything depends upon its being properly done. I am glad that the attention of the Senate has been called to the matter, so that we may all be impressed with the importance of more speedy action and less interference with the passage of appropriation bills hereafter.

The VICE-PRESIDENT. The question is on agreeing to the resolution offered by the Senator from Missouri [Mr. COCKRELL].

Mr. McPHERSON. I should like to have the resolution again read.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution.

Mr. HARRIS. May I inquire if the resolution has been reported from the Committee on Printing?

The VICE-PRESIDENT. The resolution was offered by the Senator from Missouri.

Mr. GORMAN. The resolution is only for the reprint of a bill, and it is not necessary that it should go to the Committee on Printing.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

EXECUTIVE SESSION.

Mr. VEST. I now renew my motion that the Senate proceed to the consideration of executive business.

The VICE-PRESIDENT. The question is on the motion of the Senator from Missouri.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty minutes spent in executive session the doors were reopened, and (at 1 o'clock and 40 minutes p. m.) the Senate adjourned until Wednesday, March 22, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 20, 1893.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

John E. Risley, of New York, to be envoy extraordinary and minister plenipotentiary of the United States to Denmark, vice Clark E. Carr, resigned.

James B. Eustis, of Louisiana, to be envoy extraordinary and minister plenipotentiary of the United States to France, vice T. Jefferson Coolidge, resigned.

Theodore Runyon, of New Jersey, to be envoy extraordinary and minister plenipotentiary of the United States to Germany, vice William Walter Phelps, resigned.

SOLICITOR FOR THE DEPARTMENT OF STATE.

Walter D. Dabney, of Virginia, to be solicitor for the Department of State, vice Frank C. Partridge, resigned.

CIRCUIT JUDGE.

James G. Jenkins, of Wisconsin, to be United States circuit judge for the seventh judicial circuit, vice Walter Q. Gresham, resigned.

JUDGE UNITED STATES COURT FOR INDIAN TERRITORY.

Charles B. Stuart, of Texas, to be judge of the United States

court for the Indian Territory, vice James N. Shackelford, whose term will expire March 26, 1893.

UNITED STATES ATTORNEYS.

Joseph W. House, of Arkansas, to be attorney of the United States for the eastern district of Arkansas, vice Charles C. Waters, whose term will expire March 27, 1893.

Frank B. Burke, of Indiana, to be attorney of the United States for the district of Indiana, vice Smiley N. Chambers, whose term expired March 13, 1893.

Clifford L. Jackson, of the Indian Territory, to be attorney of the United States court for the Indian Territory, vice Zachariah T. Walrond, whose term will expire March 26, 1893.

UNITED STATES MARSHALS.

Abner Gaines, of Arkansas, to be marshal of the United States for the eastern district of Arkansas, vice Oscar M. Spellman, whose term will expire March 27, 1893.

William H. Hawkins, of Indiana, to be marshal of the United States for the district of Indiana, vice William L. Dunlap, whose term expires March 20, 1893.

James J. McAlester, of the Indian Territory, to be marshal of the United States court for the Indian Territory, vice Thomas B. Needles, whose term will expire March 26, 1893.

David T. Guyton, of Mississippi, to be marshal of the United States for the northern district of Mississippi, vice John S. Burton, whose term expires March 20, 1893.

FIRST AUDITOR OF THE TREASURY.

Ernest P. Baldwin, of Maryland, to be First Auditor of the Treasury, to succeed George P. Fisher, resigned.

FIFTH AUDITOR OF THE TREASURY.

Thomas Holcomb, of Delaware, to be Fifth Auditor of the Treasury, to succeed Ernst G. Timme, resigned.

COMMISSIONER OF RAILROADS.

Wade Hampton, of Columbia, S. C., to be Commissioner of Railroads, vice Horace A. Taylor, resigned.

POSTMASTERS.

Julius W. Lancaster, to be postmaster at Dardanelle, in the county of Yell and State of Arkansas, in the place of James F. George, whose commission expires March 27, 1893.

Reese B. Hogins, to be postmaster at Russellville, in the county of Pope and State of Arkansas, in the place of Walter W. Brashear, whose commission expires March 27, 1893.

John A. Dyson, to be postmaster at Washington, in the county of Wilkes and State of Georgia, in the place of Susie T. Gatchell, removed.

William L. Isenhower, to be postmaster at Bloomfield, in the county of Greene and State of Indiana, the appointment of a postmaster for the said office having, by law, become vested in the President on and after October 1, 1892; John A. Pate, who was appointed and commissioned as postmaster at this office, and nominated to the Senate, not having been confirmed.

Louis E. Rowley, to be postmaster at Lansing, in the county of Ingham and State of Michigan, in the place of Seymour Foster, resigned.

W. L. Berry, to be postmaster at Madison, in the county of Madison and State of Nebraska, in the place of Mortimer L. Stewart, resigned.

Charles E. Clark, to be postmaster at Matawan, in the county of Monmouth and State of New Jersey, in the place of Orville Van Wickle, whose commission expires March 21, 1893.

William H. McCabe, to be postmaster at Coshocton, in the county of Coshocton and State of Ohio, in the place of Joseph K. Johnson, whose commission expires March 26, 1893.

Guy W. Junker, to be postmaster at Beaumont, in the county of Jefferson and State of Texas, in the place of Charles L. Nash, resigned.

Paul J. Millard, to be postmaster at Antigo, in the county of Langlade and State of Wisconsin, in the place of William H. Blinn, resigned.

Frank Warring, to be postmaster at Florence, in the county of Florence and State of Wisconsin, in the place of Frank R. Whittlesey, resigned.

De Witt S. Johnson, to be postmaster at Rhinelander, in the county of Oneida and State of Wisconsin, in the place of William L. Beers, whose commission expired March 13, 1893.

Stephen A. D. Keister, to be postmaster at Lander, in the county of Fremont and State of Wyoming, in the place of Isaac O. Wynn, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 20, 1893.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

Isaac P. Gray, of Indiana, to be envoy extraordinary and minister plenipotentiary of the United States to Mexico.

James B. Eustis, of Louisiana, to be envoy extraordinary and minister plenipotentiary of the United States to France.

COMMISSIONER OF RAILROADS.

Wade Hampton, of South Carolina, to be Commissioner of Railroads.

CONSUL-GENERAL.

Patrick A. Collins, of Massachusetts, to be consul-general of the United States at London.

ASSISTANT SECRETARY OF STATE.

Josiah Quincy, of Massachusetts, to be Assistant Secretray of State.

ASSISTANT SECRETARY OF THE NAVY.

William McAdoo, of New Jersey, to be Assistant Secretary of the Navy.

FOURTH ASSISTANT POSTMASTER-GENERAL.

Robert A. Maxwell, of New York, to be Fourth Assistant Postmaster-General.

APPOINTMENT IN THE MARINE HOSPITAL SERVICE.

James H. Oakley, of Illinois, to be an assistant surgeon in the Marine Hospital Service of the United States.

APPOINTMENTS IN THE NAVY.

Alfred Brown Pusey, a resident of Kentucky, and Edward Mansfield Shipp, a resident of Virginia, to be assistant surgeons in the Navy.

PROMOTIONS IN THE NAVY.

Lieut. (junior grade) Herbert O. Dunn, to be a lieutenant.

Ensign Joseph Beale, to be a lieutenant, junior grade, in the Navy.

Lieut. (junior grade) Arthur W. Dodd, to be a lieutenant.

Ensign Edward F. Leiper, to be a lieutenant, junior grade, in the Navy.

Passed Assistant Engineer Charles W. Rae, to be a chief engineer.

Assistant Engineer William H. Alderdice, to be a passed assistant engineer.

PROMOTIONS IN THE ARMY.

Quartermaster's Department.

Capt. Charles W. Williams, assistant quartermaster, to be quartermaster.

Cavalry arm.

Capt. James N. Wheelan, Second Cavalry, to be major.

Capt. Adam Kramer, Sixth Cavalry, to be major.

First Lieut. Frederick W. Sibley, Second Cavalry, to be captain.

First Lieut. Benjamin H. Cheever, Sixth Cavalry, to be captain.

Second Lieut. Harry G. Trout, Ninth Cavalry, to be first lieutenant.

Second Lieut. Edward C. Brooks, Eighth Cavalry, to be first lieutenant.

Infantry arm.

Maj. Richard Comba, Ninth Infantry, to be lieutenant-colonel.

Capt. Ezra P. Ewers, Fifth Infantry, to be major.

First Lieut. William H. C. Bowen, Fifth Infantry, to be captain.

Second Lieut. George B. Davis, Twenty-third Infantry, to be first lieutenant.

MILITARY ACADEMY.

First Lieut. Wright P. Edgerton, Second Artillery, to be associate professor of mathematics.

POSTMASTERS.

Stephen Smith, to be postmaster at Tama, in the county of Tama and State of Iowa.

Dale J. Crittenberger, to be postmaster at Anderson, in the county of Madison and State of Indiana.

Charles H. Long, to be postmaster at Tipton, in the county of Cedar and State of Iowa.

WEDNESDAY, *March 22, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D.D.

The Journal of the proceedings of Monday last was read and approved.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented a petition of the National Citizens' Industrial Alliance of New York, praying that the people of the United States be "relieved from the oppressions and exactions of the Bell Telephone Company;" which was referred to the Committee on Patents.

He also presented a petition of the Legislature of Kansas, praying for the passage of House bill No. 6595 for raising ad-

ditional revenue, and for other purposes; which was referred to the Committee on Finance.

CLERKS TO SELECT COMMITTEES.

Mr. COCKRELL. In acting upon the amendments to the resolution providing for clerks to sundry committees, reported from the Committee on Contingent Expenses upon Monday, I think there was one amendment not agreed to; and I should like to have the resolution laid before the Senate and the amendment made. In the designation of one of the committees I moved to strike out the word "Cherokee" and insert the word "Indian," so as to read "Indian lands" instead of "Cherokee lands." I understand the record at the desk does not show that that amendment was agreed to. I wish to call up the resolution and have that amendment made, and then the resolution adopted.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution reported by Mr. WHITE of Louisiana, from the Committee to Audit and Control the Contingent Expenses of the Senate on the 20th instant, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay the clerks to the following committees their salaries at the rate of $1,440 per annum, from the 16th of March instant, or so soon thereafter as they shall qualify:

To Investigate the Geological Survey; on National Banks; on Forest Reservation; on Corporations in the District of Columbia; and to Investigate Trespassers upon Cherokee Lands; the said salaries to be paid from the contingent fund of the Senate.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Before the word "Lands" strike out "Cherokee" and insert "Indian;" so as to read:

And to Investigate Trespassers upon Indian Lands.

The VICE-PRESIDENT. The resolution will be so modified, if there be no objection. The question is on agreeing to the resolution as modified.

Mr. CHANDLER. I have examined the subject since Monday, and I see it is necessary that the resolution shall be passed in order that the five Senators who are the chairmen of these committees may have clerks. The legislative, etc., appropriation act provided for thirty special committee clerks, with salaries ranging from $3,000 down to $2,220; for twenty-three clerks to committees at $1,440 a year, and for thirty-five annual clerks to Senators who are not chairmen of committees at $1,200. Now, there are five new committees created, and as the appropriation was for clerks to Senators who are not chairmen of committees of course there is no way to pay the clerks of the chairmen of these committees except from the contingent fund of the Senate. Therefore for that purpose it is right that the resolution should pass.

However, I call the attention of the Senator from Missouri [Mr. COCKRELL], who is chairman of the Committee on Appropriations, to the fact that in the organization of the committees we have created five new chairmanships, and by this resolution, while there will be saved $6,000 from the appropriation for 35 clerks, there will be taken $7,200, or an increase of $1,200, out of the contingent fund of the Senate; that is to say, $7,200 will be taken from the contingent fund and $6,000 will be saved from the appropriation for 35 clerks. I should like to ask the Senator from Missouri whether the appropriation for the contingent fund is sufficient to pay the $7,200, or where in any of the acts, if he can tell me, the appropriation is contained.

Mr. COCKRELL. I suppose the chairman of the Committee on Contingent Expenses ascertained that fact. It may run the contingent fund of the Senate rather low to have the clerks paid in this way, but the chairman who investigated the matter and whose attention was called to it insisted upon having it done in this manner.

There is no increase of committees, but simply certain committees which have been in existence for a long time were made regular committees. They were select committees and they have had chairmen, but they were not authorized to have clerks except at special times. Some of those have simply been made regular committees and others that are not regular committees have been authorized to employ an annual clerk.

Mr. CHANDLER. The Senator from Missouri thinks that this increased expenditure is correct and judicious, I suppose, and that it is wise to take this money out of the appropriation for the contingent expenses of the Senate?

Mr. COCKRELL. I have not investigated the different funds. It was left entirely to the chairman of the Committee on Contingent Expenses to investigate and see out of what funds this payment ought to come.

Mr. CHANDLER. I repeat, it is right that the resolution should pass in order that the clerks of these Senators may be paid, but it is an increase of the committees of the Senate by five.

Mr. COCKRELL. It is ridiculous to talk that way. The Senator knows it is not an increase of the committees of the Senate. Every one of these committees existed before. There is no use in talking about that. State the facts as they are. Every one of these committees existed before, but they were not regular standing or select committees and they were not entitled to annual clerks. All the difference is, as in the case of the Senator from New Hampshire who had the Committee on Failed National Banks, and we made it the Committee on National Banks. It is a continuation of the same committee.

Mr. CHANDLER. But there was not an extra clerk provided for that committee.

Mr. COCKRELL. That is true. I stated that we create clerks for these committees.

Mr. CHANDLER. I say it is an increase of clerks over those provided for in the appropriation act.

Mr. COCKRELL. There is no doubt about that.

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

REPORT ON COST OF MANUFACTURED PRODUCTS.

Mr. MCPHERSON. From the Committee on Finance I report back a resolution amended by the committee as a substitute for the resolution I had the honor to offer on Monday last. It is the custom of the Senate, when a resolution calls for an appropriation of money from the contingent fund of the Senate, to report it back and have it referred to the Committee on the Contingent Expenses of the Senate. I ask that that course be taken.

The VICE-PRESIDENT. The resolution reported as a substitute by the Committee on Finance will be read.

The Secretary read the resolution, as follows:

Resolved, That the Commissioner of Labor is hereby directed to make a report to the Senate at the opening of the Fifty-third Congress comprehending the facts already collected by him, or to be obtained from other sources, of the total cost, including all the elements thereof, and also actual labor cost of producing various iron and steel products, such as bar iron, steel rails, and other articles of iron and steel, and also the leading articles of textile industry, and of such other articles for which the cost of production has been or may be approximately obtained, and in his report to state the facts in parallel columns for this and other countries from which they have been or may be obtained; and that the Committee on Finance, or any subcommittee thereof, is hereby authorized to make such further investigations in respect to the same matters as it shall deem important, and with power to summon and examine witnesses, to send for persons and papers, and to administer oaths; and the expenses of such investigations, when made by said Finance Committee, shall be paid out of the contingent fund of the Senate.

Mr. PLATT. I should like to make an inquiry with regard to the resolution, so that I may understand exactly what is contemplated by it. The first part of it seems to be a direction to the Commissioner of Labor to do certain work, and the last part of the resolution seems to contemplate that the Committee on Finance is to do the same work. I should like a little explanation of that.

Mr. MCPHERSON. The Senator from Connecticut is partially right, but not altogether. I hold in my hand a copy of the report made by the Commissioner of Labor. It contains 1,440 pages of printed matter, with figures, statistics, and information touching one single industry in the United States, the metal industry. I do not know but that coal is included; I think it is. This is a report made in 1890. It is Executive Document No. 265. The Commissioner of Labor is preparing like reports with respect to the textile industries, and I suppose before he completes his labors (the information has been largely gathered) the work will comprise several volumes of the size I hold in my hand.

What is asked for in this resolution is that the Commissioner of Labor may compile his own report. It is so involved that it is almost impossible to ascertain conclusions. Conclusions are what we want to reach. Let him compile his own report to the extent merely of giving a computation in parallel columns of the full cost and the labor cost. It may not take a publication larger than the sheet of paper I now hold in my hand. There has been a good deal of discussion in the Senate touching a proper understanding of the report. We want the Commissioner of Labor to make his own compilation of his report, and then, in addition to that, if the Committee on Finance wish to make any further investigation touching the matter, that they shall have the privilege of doing so.

[Mr. O. L. PRUDEN, one of the private secretaries of the President of the United States, communicated to the Senate sundry messages in writing.]

Mr. PLATT. I see that by the resolution the proposition is that the Commissioner of Labor shall make his report at the opening of the Fifty-third Congress, so that the conclusions of the Commissioner of Labor will only be obtained then by the committee, I understand.

Mr. MCPHERSON. No; the Senator is wrong in one respect. The Commissioner of Labor writes me this morning a letter in which he makes the statement that he is now continually receiving information from foreign countries which was hardly obtainable by him when the collection of statistics was made; that a good many manufacturers refused to give him any information,

manufacturers abroad as well as manufacturers in this country; that they are now willing to give him the information, and that he is continually in receipt of information both from manufacturers in this country and manufacturers abroad, from labor bureaus in this country and from labor bureaus abroad, all of which would be brought down to the time of his report, say, in December, 1893.

I do not say that any supplemental investigation will be desired by the committee; I do not say that any will be made; but it is proposed that if they shall so desire they may have the privilege of making any further supplemental investigation of matters in this country, and if they do it the expense must necessarily be paid out of the contingent fund of the Senate. As to what the Commissioner of Labor does there is no expenditure incurred; that is done by the force in his Department.

Mr. PLATT. Then I do not understand that the committee desire to be conducting the investigation at the same time with the Commissioner of Labor.

Mr. McPHERSON. Not at all. All that the Commissioner of Labor does is to give us a compilation of his own report.

Mr. FRYE. Mr. President, I hope the Senator from Connecticut will not interfere with this attempt to obtain correct information. My recollection is that the Senator from New Jersey, in the last tariff discussion, gave the country more misinformation on these subjects than it has ever received from any quarter before; and if he can get real light I hope the Senator from Connecticut will allow him to do it.

Mr. PLATT. I was not interfering, Mr. President. I confess that I was not entirely satisfied with the partial report made by the Commissioner of Labor. I felt that it was very far from stating the exact facts about the cost of production and the labor cost of production. I simply desired to know whether the Finance Committee were to take the matter up independently as a committee while they were obtaining authority for the Commissioner of Labor to complete his work.

Mr. McPHERSON. If the Finance Committee shall deem it important in order to give them further information, and, as the Senator from Maine states, correct information, we want the opportunity of doing it; and the resolution asks for just that amount of power.

Mr. HOAR. There is some reason in the constitution of the Departments, I believe, why the Senate makes a direct request of this officer instead of the Secretary of the Treasury or some other head of a Department. Will the Senator state that?

Mr. McPHERSON. I did not understand the Senator's question.

Mr. HOAR. I wish to know why it is that this direction is given to the Commissioner of Labor. Is he not a subordinate of the Secretary of the Treasury?

Mr. McPHERSON. No; it is an independent Department, I think.

Mr. HOAR. What I want is to have the Senate understand from some member of the Finance Committee why it is that we give directions to this official and not to the Cabinet officer.

Mr. McPHERSON. It is an independent Department, is it not?

Mr. ALLISON. It is.

Mr. McPHERSON. That is the reason.

Mr. ALLISON. It is an independent Department, and its object is to gather statistics on industrial questions. So I think the Commissioner of Labor is a very proper person to make the inquiry. I should like to see the resolution in print. It must be referred to the Committee on Contingent Expenses, and I ask that it be printed.

The VICE-PRESIDENT. The resolution will be printed and referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

RESIGNATION OF PRESIDENT PRO TEMPORE.

Mr. MANDERSON. Mr. President, two years ago there came to me the distinguished honor of election as the President *pro tempore* of the Senate. No suitable time has seemed to come when I could make that recognition of this distinction which I should like to do, and I desire now to express my deep sense of obligation and my very hearty thanks to my political associates on this side of the Chamber, by whom the distinction was proposed, and at the same time to thank very heartily those of opposing politics, who made no nomination against the selection of the Republican caucus. There came, therefore, to me this place by the unanimous vote of the Senate of the United States. I thank all from the depths of my heart for this distinction, and I further want to express my obligation for that forbearance on the part of all which has enabled me when I have been the occupant of the chair to administer, I hope with some satisfaction to the Senate, the duties that devolved upon me.

Recognizing a change of condition and perhaps also a change of theory, I now tender my resignation of the position to the Senate and ask to be excused from further duty in that regard.

Mr. SHERMAN. I move that the resignation of the honorable Senator from Nebraska [Mr. MANDERSON] as President *pro tempore* of the Senate be received and accepted.

The motion was agreed to.

Mr. VOORHEES. Mr. President, at the close of the last session the Senator from Maryland [Mr. GORMAN] offered a resolution, which was unanimously adopted by this body, thanking the distinguished Senator from Nebraska [Mr. MANDERSON] for the able, courteous, and most satisfactory manner in which he had discharged the duties of the high office which he has just now resigned. There the matter might rest; but it has been suggested that in addition, in taking leave of him in his official capacity as President *pro tempore* of the Senate, we express on this side our thanks anew and our best wishes for him in every relation of life hereafter. The relations just sundered were delightful. He rendered them pleasant to us all; and we will bear them in memory as long as we remain here and through life.

ELECTION OF PRESIDENT PRO TEMPORE.

Mr. GORMAN submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Senate now proceed to elect a President *pro tempore* of the Senate.

Mr. COCKRELL. Mr. President, it affords me a great deal of pleasure to offer the resolution I send to the desk, and to ask for its immediate consideration.

The VICE-PRESIDENT. The resolution will be read.

The resolution was read, as follows:

Resolved, That ISHAM G. HARRIS, a Senator from the State of Tennessee, be and he hereby is, elected President *pro tempore* of the Senate, to hold office during the pleasure of the Senate, and in accordance with the resolution of the Senate adopted on the 12th day of March, 1890, on the subject.

The VICE-PRESIDENT. The Senator from Missouri asks for the present consideration of the resolution.

The resolution was considered by unanimous consent, and agreed to.

The VICE-PRESIDENT. The Senator from Tennessee will come forward and take the oath of office.

Mr. HARRIS was escorted to the Vice-President's desk by Mr. MANDERSON, and the oath of office was administered to him.

The PRESIDENT *pro tempore*. Senators, I am profoundly grateful for the honor you do me in this election, and it shall be my most earnest object and purpose to deserve the kindness and confidence which have conferred it upon me. My thanks, Senators, my thanks.

Mr. McPHERSON. I offer the resolution which I send to the desk, and ask for its immediate consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Secretary wait upon the President of the United States and inform him that the Senate has elected Hon. ISHAM G. HARRIS, a Senator from the State of Tennessee, President of the Senate *pro tempore*, in place of CHARLES F. MANDERSON, to hold and exercise the office in the absence of the Vice-President from time to time during the pleasure of the Senate, in accordance with the terms of its resolution passed March 12, 1890.

By unanimous consent, the Senate proceeded to consider the resolution.

Mr. SHERMAN. I move to insert, after the name "MANDERSON," the word "resigned."

Mr. McPHERSON. I thank the Senator from Ohio for his suggestion, and I just rose for the purpose of modifying the resolution in that way. It was an accidental omission.

The VICE-PRESIDENT. The resolution will be so modified. The question is on its adoption as modified.

The resolution as modified was agreed to.

JOINT COMMISSION ON EXECUTIVE DEPARTMENTS.

Mr. CULLOM. Before the close of the last session of Congress I was named by the President of the Senate as one of a commission on the part of the Senate for the discharge of certain duties, the Senator from Missouri [Mr. COCKRELL] being the chairman of the commission. As it will not be within my power to give attention to the commission during the coming recess, I desire to resign my place upon it, so that another Senator may be appointed.

Mr. PLATT. Mr. President, I do not know but that it is perfectly competent for the Senator from Illinois to resign to the Senate, but, as I understand, this commission was created by an act of both Houses; it is a law providing for the appointment of a commission; and the appointment of that part of it which was to consist of members of the Fifty-third Congress in the Senate devolved upon the last presiding officer of the Senate. I do not know but that it is competent for the Senator to resign to the Senate, but I do not wish that resignation to be accepted until we can have an opportunity to look into the question.

Mr. GORMAN. Mr. President, I concur with what the Sen-

ator from Connecticut [Mr. PLATT] has just said. The provision for the appointment of this commission was contained in the legislative, etc., appropriation act passed at the late session. It was an extraordinary provision, which the Senate Committee on Appropriations recommended should be stricken out and the Senate concurred in that view, but afterwards in conference the Senate conferees were compelled to give way, and the provision was finally adopted. I doubted the propriety of it at the time, and the more I think of it the more I am convinced that it was a most extraordinary thing for an expiring Congress to provide that the then presiding officer of the House of Representatives and the President of the Senate should make these appointments without any provision whatever for filling vacancies that might occur. It was a commission authorized by law. I will read the provision:

That a joint commission, consisting of three Senators, members of the Fifty-third Congress, to be appointed by the present President of the Senate, and three members elect to the House of Representatives of the Fifty-third Congress, to be appointed by the Speaker of the House of Representatives of the Fifty-second Congress, shall, during the Fifty-third Congress, inquire into and examine the status of the laws organizing the Executive Departments, bureaus, divisions, and other Government establishments at the national capital; the rules, regulations, and methods for the conduct of the same.

I shall not read the remainder of the verbiage; but that is the provision as to the appointment. When that power has been once exercised there is no right under the statute to fill a vacancy which may occur. I suggest to the Senator from Illinois, who I know very reluctantly accepted the appointment, or permitted his name to be used, that there is now no escape for him whatever.

Mr. CULLOM. If the Senator will allow me a word, I shall not shirk any duty that is imposed upon me. I got the impression, however, that while the language of the act did seem to preclude the idea that a successor could be appointed if I resigned, there ought to be, and I am inclined to believe there is, an innate power in the Senate to keep its portion of any commission or committee intact by the appointment of Senators to fill vacancies. Whether or not that is correct I do not know, but I was supported in that suggestion by one or two gentlemen who are lawyers, and I concluded, under the circumstances, if that could be taken as a correct construction, that I should like to give way, so that another Senator, who could more conveniently attend to the duties, might be appointed.

I will say, however, if it should be determined by the Senate or the Vice-President that no appointment can be made in my place, I shall most cheerfully consent to remain on the commission and discharge the duties as best I may. If, on the other hand, a vacancy can be filled, I shall be glad to be excused, so that another Senator may be appointed in my place.

Mr. GORMAN. I trust the Senator from Illinois, who can only remain on the commission at great sacrifice to himself and his business interests, will not raise this question, and will permit his name to remain upon the commission. One of the strong reasons and arguments put forth by the advocates of this extraordinary provision was that the two Houses were different in politics, that the then Vice-President belonged to the party of the Senator from Illinois and that the Speaker of the House of Representatives was a Democrat, and that therefore in making up the commission it would be made up fairly by them with a view to the actual business operations of the Departments. That was the argument which was used, and it had some weight, though I confess it had not with me, because I believed it was a bad precedent. I thought that Congress ought not to engage in that work, but having done it and the Senator having been appointed on the commission, I think he owes it to the Senate and to the country to continue to serve, and I trust the Vice-President himself, no matter what the opinion of lawyers may be on this question, will refuse to exercise the power, even if he has it, and let the commission stand and do its work as best it can.

Mr. HOAR. I move to refer the request of the Senator from Illinois [Mr. CULLOM] to the Committee on Privileges and Elections.

It seems to me this presents a very grave question, indeed, and one with which the Senate ought to deal. The Constitution of the United States provides:

No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

A practice seems to be growing up of establishing certain public duties or functions, which are in all respects analogous to those performed by civil officers, and imposing them upon members of this or the other House. The President of the United States has within the last year sent abroad members of this body, whom we all esteem, men fitted for the grave and delicate responsibilities which were imposed upon them, to represent this country in dealing with foreign nations in one case, and in another of representing this country before a great tribunal which is to determine a great international dispute. It is a very serious question in my mind whether such function is not the function of a civil officer, and whether all the reasons which the framers of the Constitution had in the prohibition which I have read do not apply to such a case as that.

There were two prominent reasons for that prohibition: First, that the mind of the Senator or Representative should be engrossed by his public and official duties in this body or in the other—and they are enough to engross all the capacities of the ablest intelligence; and, next, that there should be no influence of patronage or conferring of public honor or emolument exerted by the executive power over the legislative power. The President of the United States selects a member of this or the other House for an office, which is a great public honor in itself, one of the greatest public honors that this Government can bestow, an office which is accompanied with the incident of a journey to Europe, a support in Europe in luxury or comfort, and an opportunity to enjoy the delights and pleasures of the best foreign society, conferring upon a member of this body advantages which men of wealth, however well occupied in their private affairs, eagerly seek at a large personal cost to themselves.

No man has a higher regard than I for the gentlemen selected in the past and the gentleman now performing such functions abroad, but it seems to me that it is time the Senate considered whether this practice should go on and whether there are to be taken from their seats in the Senate and sent abroad members of this body on missions which involve the office of ambassador or envoy extraordinary or minister plenipotentiary in everything but name.

This is a kindred question. We have the right under the Constitution to select our own officers; we have the right to appoint our own committees and to change them from time to time. Here is a function which can be defended only on the ground that the person performing it is performing a Senatorial service, is acting as a representative of the Senate to obtain information for its action and conduct, and it is seriously claimed that the statute which the other House has initiated, and on the terms of which it has insisted against the judgment of the representatives of the Senate, puts it out of the power of the Senate to change that officer or to prevent his service during the time the commission shall last.

Mr. BUTLER. May I ask the Senator a question?

Mr. HOAR. Let me add this one sentence, and then I shall yield to the Senator from South Carolina for his question.

Suppose it had happened that instead of one House being Democratic, both Houses had been Republican, and that in advance of a coming change of the party politics of both Houses a statute had been passed providing that certain Senate commissioners should be appointed by the then Presiding Officer of the Senate and certain House commissioners by the then Speaker of the House of Representatives, and under circumstances which made it impossible for either body to change the constitution of that commission.

I will now hear the Senator from South Carolina.

Mr. BUTLER. I agree with what the Senator from Massachusetts has just said in regard to the Senate and House of Representatives, but I wanted to call his attention to the Supreme Court of the United States, and to inquire if, in his judgment, the argument does not apply just as well to members of the Supreme Court of the United States as to Senators or Members of the House of Representatives?

Mr. HOAR. I think it does very largely. I know the precedent of Chief Justice Jay, who left his seat upon the bench to negotiate a famous treaty in the Administration of Gen. Washington, but in the case of a justice of the Supreme Court there is no constitutional prohibition, if I recollect aright, against holding any other office.

Mr. BUTLER. I think not. I was just looking as to that.

Mr. HOAR. But the principle is very largely the same.

Mr. BUTLER. It occurred to me so.

Mr. HOAR. It seems to me that the time for the Senate to deal with this question is when no human being can suppose that there is any dissatisfaction with the selection of the persons who have been so selected.

If the Senator from Illinois is to act upon this commission at all, he must act as a Senator, and in no other capacity or function; and if he is to act upon the commission as a Senator, that action must necessarily and constitutionally be during the pleasure of the Senate. It seems to me he has entirely and most correctly conceived his relation to the matter by the proposition which he has made.

If the Senator from Alabama [Mr. MORGAN], whom we all respect, or the Senator from Nevada [Mr. JONES], or the Senator

from Iowa [Mr. ALLISON], whom we all respect, went abroad to perform an important constitutional function, to meet the officials of other nations, they went abroad either as Senators—in which case they should not receive instructions from the Administration and should not report to the Administration, but should take their instructions from us and make their report to us—or they went abroad as civil officers.

I move the reference of the matter to the Committee on Privileges and Elections.

Mr. CULLOM. I do not think I ever got into an office before which I could not resign and let somebody else fill. I think I can resign now, but a question more important is whether, if I resign and thus create a vacancy, it can be filled by the present Presiding Officer of the Senate.

Referring to the suggestions of the Senator from Massachusetts, I think that the commission provided by the statute stands in an entirely different relation from any other which has been indicated or cited by him. The work imposed upon this commission, as it is termed in the statute, is a work which pertains specially to the Senate and the House of Representatives.

Mr. BUTLER. It is legislation.

Mr. CULLOM. That is to say, it pertains to legislation and to the organization of the Executive Departments under the law. So that, so far as the *personnel* or the making up of the commission of Senators and Representatives is concerned, there is no set of men who can perform the duties as well as Senators and Representatives. I think there is that distinction between the organization of this commission and any commission appointed outside to go abroad or anywhere else.

Mr. HOAR. The Senator will observe that I did not state that this commission was improper. I only stated that it could be supported only on the theory which the Senator himself has taken up.

Mr. CULLOM. Without taking up the time of the Senate further, I am inclined, in view of the variety of opinion which seems to exist here, if the Senate will allow me, to withdraw my effort at resigning and let the matter go.

Mr. BUTLER. That is the best solution of the difficulty.

Mr. ALLISON. Before this matter passes from the consideration of the Senate, I desire to make an observation or two respecting the commission referred to.

It may be that the view taken by the Senator from Massachusetts [Mr. HOAR] is the true view; which is, that although this commission is appointed by the authority of a statute and designated as a commission, it is in fact and in form only a joint committee of the two Houses, and being a joint committee of the two Houses, it is within the competency of any member of it at any time to resign, and within the competency of the then Presiding Officer or the body itself to select a successor.

I regret to say that I do not regard the view of the Senator from Massachusetts as the correct one. I think if a statute creates a commission it is a commission within the meaning of the statute; whether it is an office within the meaning of the Constitution is quite another question.

The provision for the creation of this commission is similar to provisions which have been hitherto inserted in the statutes. Although, as the Senator from Maryland [Mr. GORMAN] well said, the Senate itself was opposed to the creation of this commission, yet in view of the comity which ought to prevail between the two Houses as respects matters of this character, the conference committee on the part of the Senate, of which I was a member, yielded to the request of the House of Representatives and allowed this provision to remain.

It was argued to us by the conferees on the part of the House that an examination into the several Departments of our Government by competent members of the two Houses acting together would enable us in the future to make certain reforms respecting the administration of the Departments and the cost of maintaining them. It was argued to us that in view of the expiration of the Fifty-second Congress there was no method by which this joint action could be had, unless by a method provided for by statute; that the House of Representatives itself would be dissolved, that no new House would be organized until October or December, and that it was important in a practical sense that this investigation should be pursued during the long vacation. On these arguments the conferees on the part of the Senate yielded to the request made by the House in view of the fact that there would be no power to organize the House branch of the commission in the meantime.

It seems to me, although I may be mistaken as respects the true construction of this provision, that the commission having been created without any authority being given to fill vacancies, it is not within the competency of the Presiding Officer of the Senate to fill a vacancy, although I should not raise that question, because I have no doubt, should that power be exercised, there would be no objection to any Senator accepting this position under the circumstances and relieving the Senator from Illinois, and that his views and examinations as a member of the commission would be respected. Therefore I do not agree with the Senator from Massachusetts respecting the method of dealing with this question.

I appreciate the criticism of the Senator as respects members of this body, or of the other, accepting or engaging in other duties and occupations aside from their Senatorial or representative positions. It so happens that, without any fault of my own or any consideration of my own, I was selected by the President of the United States as a member of the monetary conference recently assembled at Brussels. The Senator from Nevada [Mr. JONES] was also designated by the President of the United States for the execution of whatever mission we had in charge, and a member of the House of Representatives was also so designated. That designation came to me unsought, and, I wish to say, without even consulting my convenience as to whether I could accept the position. Not having an opportunity of seeing the President after my designation and selection, I accepted the trust, and so far as I could discharged the duties, leaving my home on the day of the election and returning to this capital on the 3d day of January last.

The Senator from Massachusetts seems to think that either I discharged those duties, if they were duties, as a Senator of the United States or that I discharged them as an officer of the United States. With the highest respect for his opinion and learning upon constitutional questions, as I understand, I neither discharged those duties as a Senator nor as an officer of the United States. I took no oath of office, I was required to take none; I received no appointment as an officer, I was not required to receive such an appointment. I was selected as a delegate to the monetary conference at Brussels, which, in the very nature of its calling and in the nature of its service, could exert no official power to bind the Government of the United States or any other government in the world. So that I do not even by implication desire it to be understood that I vacated my seat in the Senate by accepting another office, nor do I wish it understood that in accepting that duty, requested of me by the President of the United States, I in any way failed to discharge my just obligation, as I understood it, to the people of the State of Iowa, who sent me here as a member of this body.

So I think the analogy between the designation of the President for the service which the Senator from Nevada, Mr. McCreary, of the House of Representatives, and I accepted from the President of the United States and that to be performed by this commission is not so clear. This is entirely a different service. In my view neither of these services in any sense constitutes an office in the sense of the Constitution. This service is performed without compensation; it is a service in the line of the duties of Senators and Representatives who are called upon day by day to legislate respecting the Executive Departments; it is a method of giving them further and fuller information respecting their duties here; and it is a part, as I understand, of the duties of the members of this body in the nature of the work of a committee.

Mr. GORMAN. Do I understand the Senator to hold that the Vice-President has a right to make an appointment on this commission?

Mr. ALLISON. I do not. I do not think any such power is conferred. It is an imperfection, if I may use that word, in the statute itself. If the Senator from Illinois shall vacate his place on the commission, there being no provision in the statute itself for its being filled, it seems to me it will remain vacant, although I say I shall not raise that question myself.

Mr. GORMAN. As the statute reads "the present President of the Senate," that is, the then Vice-President on the 3d day of March, I ask the Senator whether an appointment could now be made by the Vice-President to fill a vacancy on the commission? The language of the provision is peculiar—"to be appointed by the present President of the Senate." That would seem to exclude the possibility of any other Presiding Officer making that appointment.

Mr. ALLISON. Undoubtedly. That was, as the Senator very well knows, not only the phraseology of the statute, but it was the intent and purpose of it.

Mr. CALL. Mr. President, there is another point of view in which the suggestion of the Senator from Massachusetts has a great deal of force, and that is the question of how far the President of the United States and the two Houses of Congress by a statute can discharge the duties which are imposed upon the Senate in its separate capacity. The Senate is charged with the appointment of its committees and with investigations which are necessary to the performance of legislative duties. If it be true that by a statute one committee of this body can be superseded and its functions transferred to a joint committee of the two Houses of Congress, then it is true as to all the committees of this body and its methods of legislation, and a statute of the

United States, having the assent of the President, can abolish all the committees of this body and all its methods of proceedings.

Mr. President, the Constitution is perfectly plain. Each House, and each House alone, has the power, and the exclusive power, for the constitution of its committees and the appointment of the methods in which its business shall be transacted. In my judgment it is not competent for the Congress of the United States to create a commission which shall be composed of members of the two Houses to perform committee duties or legislative duties, or to conduct investigations which have been prescribed or may be prescribed by the law of each body to its committee.

The Senate has just selected a committee charged with this investigation, and it is met by a statute creating a commission charged with the performance of the same duties. Which is valid, the commission, the President of the United States and each House of Congress authorizing it, or the body which by the Constitution has been created by the Senate and charged with these duties?

It seems to me entirely plain that this matter should be referred in some shape to the Committee on Privileges and Elections to ascertain how far it is competent for the two Houses of Congress and the President of the United States to create a joint committee which shall perform the duties required to be done by the separate action of these two bodies.

Mr. HOAR. Mr. President, I am very sure that the honorable Senator from Iowa [Mr. ALLISON] does not for a moment conceive that there was any element of personal disrespect to him in the observations which I deemed it my duty to make.

Mr. ALLISON. Not at all.

Mr. HOAR. If I were to state far within bounds my regard for that Senator, his modest nature would suspect me of gross flattery.

I have no doubt when the Senator undertook his functions as a representative of this Government at the Brussels Conference there was a general opinion of the people of the United States that he was the fittest person within our borders who could have been selected. He had not only the special gift which that function required, but his service upon the Finance Committee here had made him, more than almost any, certainly as much as any other member of this body and more than any other person who could be found for the service, conversant with the perplexing and difficult subject with which he had to deal; but I made up my mind some time ago that it would be my duty when an opportunity offered to call the attention of the Senate to this grave and serious question.

Now, my honorable friend says it was not an office, because he did not take an oath, because no oath was required, and because there was no emolument. It seems to me, whether a particular function be that of a public office depends not upon the safeguard of the oath, but upon the thing to be transacted, and if the receiving instructions from the President of the United States, bearing those instructions abroad, communicating them to the representatives of a foreign government, enforcing them in debate, hearing and weighing their views in return, reporting them to his own countrymen, and concurring in the action of a body whose action, if unanimous, is very likely to affect and bind the action of the governments represented, be not in its nature and essence a public office, then it seems to me that the function of no foreign ambassador or agent, special or general, envoy ordinary or envoy extraordinary, is a public office. I am hardly ready to concur in the view that the having a journey to Europe at the public charge, dwelling in a foreign capital at the public charge, and coming home at the public charge is not an emolument of office. I think it is an emolument which would be very eagerly sought.

So in regard to the Bering Sea arbitration. No member of this body can be appointed under this constitutional provision and under the statute which reënforces it to act as an associate counsel for the United States in any ordinary suit here; and what is the difference, except in degree and dignity, between that and the Bering Sea arbitration?

The Senator from Iowa being sincere in his view, was right in undertaking this function, because, as we all know, it was a function which he undertook at great personal inconvenience, at the risk of great personal labor, and undoubtedly with the most absolute and sincere reluctance. So there is nothing personal or individual in the suggestion which I make.

Mr. President, the other suggestion which my honorable friend makes is that the main and principal object was to gain information as a Senator. Is the President of the United States charged with the duty of picking out particular Senators and sending them abroad to gain information in their Senatorial office? If the information which they gain is to be communicated to the Senate it is the function of a Senate committee that is being performed; if it is not to gain information for the Senate the difficulty seems to be greater with that view than with any other.

If the Senator from Illinois [Mr. CULLOM], as I understand, withdraws his resignation, of course my motion to commit will fall with the withdrawal; but I wish to add one other word.

It seems to me that whatever there may be of weight in the objection which I have stated in regard to the selection by the President is still more grave when you consider the undertaking to regulate this matter by statute. The statute of last winter did nothing more and nothing less than to appoint a permanent committee of the Senate and the House of Representatives, which the Senate, if the view of the Senator from Maryland and of the Senator from Iowa is right, when it changes its political complexion, can not change, that is more directly in violation of the Constitution than the other proceeding in my judgment.

Mr. CALL. Mr. President, before further proceeding is had, I should like to ask a question of the Senator, which ought to be submitted to a committee. The Senate at this session, since the passage of that law, has created a committee and charged it with this particular duty. Which is to prevail, the action of the Senate or the act passed by the two Houses and approved by the President, who have disappeared and will never exist again? Can Congress by a permanent law, as the Senator from Massachusetts has said, create a committee of this body to perform duties which the Senate at a subsequent session, in the exercise of its constitutional duty, has prescribed to others? What is to become of the action of this body in pursuance of the Constitution creating this committee and charging it with duties? Can it be said that a statute of a Congress which has expired is now binding upon the Senate and supersedes the committee which it has created and the duty it has imposed upon it?

Mr. CULLOM. In view of the variety of opinion here as to the power of the President of the Senate to make an appointment in case of a vacancy on the commission, I ask leave to withdraw my resignation as a member of the commission, and I shall try to discharge my part of the duties as best I can.

The VICE-PRESIDENT. The Senator from Illinois asks leave to withdraw his resignation as a member of the commission. In the absence of objection, the resignation will be withdrawn.

LABOR TROUBLES IN IDAHO.

Mr. McPHERSON. I move that the Senate proceed to the consideration of executive business.

Mr. DUBOIS. I ask the Senator to withhold his motion for a moment, that I may offer a resolution.

Mr. McPHERSON. I will withhold the motion for that purpose.

Mr. DUBOIS. I offer a resolution, which I send to the desk and ask that it be read.

The VICE-PRESIDENT. The resolution will be reported.

The Secretary read the resolution, as follows:

Resolved, That a select committee of seven Senators be appointed by the President of the Senate, whose duty it shall be to investigate and report to the Senate the facts in relation to the recent serious difficulties existing between the employing silver-mine owners and the working miners of Idaho, as to the employment for private purposes of armed bodies of men, or detectives, in connection with said difficulties. The investigation shall extend to and embrace, in addition, an inquiry into the causes and necessity for the employment of United States soldiers, and the conduct of such soldiers. The committee shall ascertain if present serious difficulties exist between employers and employés, or if justice has been or is being denied any one through a suspension of the writ of habeas corpus, or through any dereliction of duty on the part of United States courts.

The committee shall also inquire into the character, objects, and purposes of the miners' union; and whether the obligations required of its members conflicts or conflicted with the obligations and duties these members owe to the State and Government as law-abiding citizens. In addition to the testimony and conclusions of fact the committee will consider and report, by bill or otherwise, what legislation, if any, will tend to prevent a recurrence of similar troubles. Said committee, either as a full committee or through subcommittees thereof, shall have authority to send for persons and papers, administer oaths to witnesses, and take testimony in Washington or elsewhere, according to its discretion, during the present session or approaching recess of Congress, and to employ a clerk, messenger, and stenographer; the expenses of the investigation to be paid from the contingent fund of the Senate.

Mr. DUBOIS. I move that the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. McPHERSON. I now renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty-five minutes spent in executive session the doors were reopened, and (at 2 o'clock p. m.) the Senate adjourned until to-morrow, Thursday, March 23, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 22, 1893.

FIRST ASSISTANT SECRETARY OF THE INTERIOR.

William H. Sims, of Columbus, Miss., to be First Assistant Secretary of the Interior, vice George Chandler, resigned.

UNITED STATES CIRCUIT JUDGE.

Horace H. Lurton, of Tennessee, to be United States circuit judge for the sixth judicial circuit, vice Howell E. Jackson, resigned.

UNITED STATES MARSHALS.

Frank E. White, of Nebraska, to be marshal of the United States for the district of Nebraska, vice Brad D. Slaughter, whose term expired March 19, 1893.

George Pfeiffer, jr., of New Jersey, to be marshal of the United States for the district of New Jersey, vice William Budd Deacon, whose term expired March 20, 1893.

COMMISSIONER OF PATENTS.

John S. Seymour, of Norwalk, Conn., to be Commissioner of Patents, vice William E. Simonds, resigned.

COMMISSIONER OF THE GENERAL LAND OFFICE.

Silas W. Lamoreux, of Horicon, Wis., to be Commissioner of the General Land Office, vice William M. Stone, resigned.

ASSISTANT COMMISSIONER OF THE GENERAL LAND OFFICE.

Edward A. Bowers, of Washington, D. C., to be Assistant Commissioner of the General Land Office, vice Manning M. Rose, resigned.

SECOND DEPUTY COMMISSIONER OF PENSIONS.

Henry C. Bell, of Marshall, Ill., to be Second Deputy Commissioner of Pensions, vice Charles P. Lincoln, resigned.

COLLECTOR OF INTERNAL REVENUE.

John J. Carter, of Louisiana, to be collector of internal revenue for the district of Louisiana, to succeed Homer C. Powers, resigned.

CONSUL-GENERAL AT VIENNA.

Max Judd, of Missouri, to be consul-general of the United States at Vienna, vice Julius Goldschmidt, recalled.

POSTMASTERS.

William T. England, to be postmaster at Van Buren, in the county of Crawford and State of Arkansas, in the place of Alvis Smith, resigned.

Philip Zoercher, to be postmaster at Tell City, in the county of Perry and State of Indiana, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1893.

Charles F. Chase, to be postmaster at Atlantic, in the county of Cass and State of Iowa, in the place of Charles H. Everitt, resigned.

William C. Hall, to be postmaster at Sweet Springs, in the county of Saline and State of Missouri, in the place of George W. Smith, removed.

Neri A. Hanna, to be postmaster at Cadiz, in the county of Harrison and State of Ohio, in the place of Charles S. McCoy, whose commission expired March 21, 1893.

Miss Lela Tyns, to be postmaster at Groesbeck, in the county of Limestone and State of Texas, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1892; Alonzo L. Steele, who was appointed by the President November 18, 1892, and confirmed by the Senate December 14, 1892, having declined the appointment.

Frank D. Hoy, to be postmaster at Point Pleasant, in the county of Mason and State of West Virginia, in the place of Fulton M. Whaley, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 22, 1893.

UNITED STATES ATTORNEY.

Frank B. Burke, of Indiana, to be attorney of the United States for the district of Indiana.

UNITED STATES MARSHALS.

David T. Guyton, of Mississippi, to be marshal of the United States for the northern district of Mississippi.

William H. Hawkins, of Indiana, to be marshal of the United States for the district of Indiana.

THURSDAY, *March 23, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

COLUMBIA INSTITUTION FOR DEAF AND DUMB.

The VICE-PRESIDENT. The Senator from Connecticut, Mr. HAWLEY, having declined reappointment as a member on the part of the Senate of the board of directors of the Columbia Institution for the Instruction of the Deaf and Dumb, the Vice-President appoints to fill the vacancy the Senator from Mississippi, Mr. WALTHALL.

Mr. HAWLEY. The word "declined" is quite a proper one to be used in this connection; but I did not decline reappointment by reason of any dissatisfaction, for I have found the duties of the place very interesting and agreeable. However, at the end of my term of six years, as the Senator from Mississippi, who is now reappointed, served a very short term just before me, my personal preference is that he shall go back on the board. He is familiar with the institution and interested in it.

The VICE-PRESIDENT. It was at the suggestion of the Senator from Connecticut [Mr. HAWLEY] that the appointment of the Senator from Mississippi [Mr. WALTHALL] was made.

JOINT COMMISSION ON EXECUTIVE DEPARTMENTS.

Mr. CALL. I submit the resolutions I send to the desk, and ask that they be read and lie on the table.

The resolutions were read, as follows:

Resolved, That the enactment in the act making appropriations for legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1894, and for other purposes, approved March 3, 1893, creating a commission to be composed of members of the Senate and the House, appointed by a President of the Senate and a Speaker of the House whose terms of office expired on the 4th day of March current, to examine into the civil service in the executive branches of the United States and to report and recommend to the present and future Congresses their opinion in relation to the exercise of the legislative powers of each and both Houses of the Congress which shall convene in December, 1893, in respect to the civil service of the United States, is in derogation of the constitutional right, power, and prerogative of each House and otherwise violative of the Constitution, and is absolutely null and void.

Resolved, second, That the Constitution confers on "each House" the sovereign and exclusive power to prescribe its rules of proceeding, and therein of the creation of its committees and the duties and powers which shall be imposed and conferred upon them, both to recommend changes in existing law and to enact new laws, and to obtain the information necessary for the exercise of their legislative power, and the members of each House can derive no power or authority of right in respect to any exercise of legislative functions from any other source than the separate and exclusive power of "each House" as they shall be organized, and during their constitutional term of official life to prescribe, regulate, and direct all their rules of procedure and the exercise of their legislative function.

Mr. GORMAN. I suggest that the resolutions had better be referred to the Committee on Privileges and Elections.

Mr. CALL. I prefer that they shall lie on the table for the present. I wish to make some observations upon them. They may then be referred.

Mr. HARRIS. Let them be printed, then, and lie on the table.

Mr. GORMAN. Very well.

The VICE-PRESIDENT. That will be the order of the Senate.

AMENDMENT OF RULES—PENSION APPROPRIATION BILLS.

Mr. PALMER submitted the following resolution; which was referred to the Committee on Rules:

Resolved, That Rule XVI be amended by adding, after the words "Committee on Commerce," in clause 1, the words, "and pension appropriation bills, which shall be referred to the Committee on Pensions;" so as to read: "All general appropriation bills shall be referred to the Committee on Appropriations, except for rivers and harbors, which shall be referred to the Committee on Commerce, and pension appropriation bills, which shall be referred to the Committee on Pensions."

CLERK TO SELECT COMMITTEE ON LIBRARY OF CONGRESS.

Mr. VOORHEES submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Additional Accommodations for the Library of Congress be, and hereby is, authorized to employ a clerk from March 16 to June 30, 1893, inclusive, at the rate of $1,440 per annum, to be paid out of the contingent fund of the Senate.

ADJOURNMENT TO MONDAY.

On motion of Mr. GORMAN, it was

Ordered, That when the Senate adjourn to-day it be to meet on Monday next.

EXECUTIVE SESSION.

Mr. DANIEL. I move that the Senate resolve itself into executive session.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty-two minutes spent in executive session, the doors were reopened and (at 12 o'clock and 52 minutes p. m.) the Senate adjourned until Monday, March 27, 1893, at 12 o'clock m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 23, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Theodore Runyon, of New Jersey, to be envoy extraordinary and minister plenipotentiary of the United States to Germany.

ASSISTANT ATTORNEY-GENERAL.

Edward B. Whitney, of New York, to be Assistant Attorney-General.

TERRITORIAL JUDGE.

Charles B. Stuart, of Texas, to be judge of the United States court for the Indian Territory.

SOLICITOR DEPARTMENT OF STATE.

Walter D. Dabney, of Virginia, to be Solicitor for the Department of State.

CIRCUIT JUDGE.

James G. Jenkins, of Wisconsin, to be United States circuit judge for the seventh judicial circuit.

FIRST AUDITOR OF THE TREASURY.

Ernest P. Baldwin, of Maryland, to be First Auditor of the Treasury.

FIFTH AUDITOR OF THE TREASURY.

Thomas Holcomb, of Delaware, to be Fifth Auditor of the Treasury.

UNITED STATES MARSHAL.

Abner Gaines, of Arkansas, to be marshal of the United States for the eastern district of Arkansas.

UNITED STATES ATTORNEYS.

Clifford L. Jackson, of the Indian Territory, to be attorney of the United States court for the Indian Territory.

Joseph W. House, of Arkansas, to be attorney of the United States for the eastern district of Arkansas.

POSTMASTERS.

Guy W. Junker, to be postmaster at Beaumont, in the county of Jefferson and State of Texas.

Reese B. Hogins, to be postmaster at Russellville, in the county of Pope and State of Arkansas.

Julius W. Lancaster, to be postmaster at Dardanelle, in the county of Yell and State of Arkansas.

Louis E. Rowley, to be postmaster at Lansing, in the county of Ingham and State of Michigan.

William L. Isenhower, to be postmaster at Bloomfield, in the county of Greene and State of Indiana.

Stephen A. D. Keister, to be postmaster at Lander, in the county of Fremont and State of Wyoming.

Frank Warring, to be postmaster at Florence, in the county of Florence and State of Wisconsin.

Paul J. Millard, to be postmaster at Antigo, in the county of Langlade and State of Wisconsin.

Joseph E. Swindlehurst, to be postmaster at Livingston, in the county of Park and State of Montana.

Robert B. Brown, to be postmaster at Meadville, in the county of Crawford and State of Pennsylvania.

W. L. Berry, to be postmaster at Madison, in the county of Madison and State of Nebraska.

De Witt S. Johnson, to be postmaster at Rhinelander, in the county of Oneida and State of Wisconsin.

MONDAY, *March 27, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Thursday last was read and approved.

PERSONAL EXPLANATION.

Mr. CALL. Mr. President, I rise to a question of privilege. I ask to have read the extract from a newspaper which I send to the desk.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

CALL GETTING MAD.

The struggle for office in Washington is developing many curious things. One member of Congress from Mississippi pitched into Cleveland while in the committee room last week because the President would not appoint the Congressman's friends to positions as requested, saying, "Cleveland is going to do as he pleases, and not as the Senators and Representatives desire, and it is useless for us to call on him or suggest any more names. He only says, 'File your application, and if other Democrats do not oppose the appointment I will give it due consideration.'"

Thursday the Washington correspondent of the New Orleans Delta sent that paper the following dispatch, which will be read with interest by Floridians:

"There is considerable muttering among the Senators at Cleveland's non-action in regard to nominations, and among the loudest in his criticism is CALL of Florida. He does not disguise his disgust, and talks about Cleveland's slowness openly in the corridors and in the elevators of the Capitol after the Senate has adjourned."

Mr. CALL. Mr. President, that statement has been extensively circulated by the land-grant corporations of the State of Florida, I presume for the purpose of creating some prejudice against me. I wish to state in my place in the Senate that it is absolutely false; that I have never criticised the President's policy either in the corridors, the elevators, or in private. I know of nothing to disapprove in his policy, and I expect to give him my loyal support. The President is an able and patriotic man; the country has confidence in him and his Cabinet, and it is only right that he should be supported in his efforts to settle on a just basis the great questions which now confront us.

EXECUTIVE COMMUNICATION.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the Senate of February 27, 1893, a copy of the report of the commission to select wool samples for use in the custom-houses of the United States, and also of a circular issued by the Department on the subject under date of the 21st ultimo; which, with the accompanying papers, was on motion of Mr. SHERMAN, ordered to lie on the table and be printed.

PRESENTATION OF PETITIONS.

The VICE-PRESIDENT. The Chair presents a petition of the Hatters' National Unions of New York City, praying that the people of the United States be "relieved from the oppressions and exactions of the Bell Telephone Company;" which will be referred to the Committee on Patents.

Mr. GORMAN. I trust that by common consent petitions relating to legislation may not be presented at this session. It is true we have not adopted the resolution which was under consideration, but that has been almost the uniform practice of the body, and without the passage of a resolution I trust that petitions will be simply put on file and kept to be presented at the next regular session.

Mr. CULLOM. I desire to state that on my own part I have withheld the introduction of petitions, and I have received a pretty large number of them.

Mr. GORMAN. I will state to the Senator from Illinois that similar action was taken, I think, when Vice-President Wheeler occupied the chair, who felt it his duty to present a petition, and the same suggestion was made that I now make. I trust the rule I suggest will be followed by unanimous consent at this session.

Mr. CULLOM. I should like myself to present the petitions I have received if the presentation of petitions is to be the rule.

The VICE-PRESIDENT. The Chair desires to state that, inasmuch as the Senate had taken no action on the subject, the Chair thought it proper to bring before the Senate what was called to his attention officially.

Mr. GORMAN. I understand the action of the Chair perfectly. I ask unanimous consent that petitions may be merely filed with the Secretary, to be presented hereafter at the regular session.

The VICE-PRESIDENT. Without objection that will be taken as the order of the Senate.

Mr. HOAR. I desire that the request of the Senator from Maryland may be stated by the Chair. I was not able to hear it.

The VICE-PRESIDENT. The Senator from Maryland asked unanimous consent that further petitions may not be presented, but may be filed with the Secretary. Has the Chair stated correctly the request of the Senator from Maryland?

Mr. GORMAN. The Chair has stated practically the request. I stated that heretofore the Vice-President (I think Vice-President Wheeler) presented a petition, and by general consent it was agreed that such papers should be simply filed with the Secretary as a matter of convenience for safe-keeping until the regular session, when they should be presented. I ask that that rule may be observed now.

Mr. HOAR. I make no objection. I suggest to the Senator from Maryland, however, that it might be well, as a mark of the usual respect always observed in such cases, that resolutions of State Legislatures, which are of course in the nature of petitions, shall be printed in the RECORD.

Mr. GORMAN. We have already pursued that course, and there will be no objection to it.

The VICE-PRESIDENT. The Chair hears no objection to the request of the Senator from Maryland, and it is so ordered.

SENATOR FROM MONTANA.

Mr. HOAR. I am directed by the Committee on Privileges and Elections, to whom were referred the credentials of Lee Mantle, claiming a seat in the Senate from the State of Montana, to submit a report. There is a resolution accompanying the report, which I ask to have read.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

Mr. VANCE. I have endeavored to have the views of the minority ready for submission at the same time with the report of the committee, but I have not been able to do so. I ask that I may be permitted to submit the views of the minority to-morrow or at the next meeting of the Senate, and that the report of the committee submitted by the Senator from Massachusetts be withheld from being printed until to-morrow, so that both may be printed together.

Mr. HOAR. I was about to ask that the report lie on the table to be printed with the views of the minority when submitted. I suppose the views of the minority might be handed to the Secretary in order to save time if the Senate is not in session when the Senator from North Carolina is ready to submit them.

Mr. VANCE. Yes; if the Senate is not in session to-morrow. That will be satisfactory.

The VICE-PRESIDENT. The report, with the accompanying resolution, will lie on the table, to be printed with the views of the minority when submitted.

SENATOR FROM WYOMING.

Mr. HOAR. I am directed by the Committee on Privileges and Elections, to whom was referred the claim of Asahel C. Beckwith to be admitted to a seat in the Senate from the State of Wyoming, to submit a report, accompanied by a resolution.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That Asahel C. Beckwith is entitled to be admitted to a seat as a Senator from the State of Wyoming.

Mr. HOAR. Let this report also lie on the table. It depends on the same principle with the preceding report.

The VICE-PRESIDENT. It will be so ordered.

SENATOR FROM WASHINGTON.

Mr. HOAR. I am directed by the Committee on Privileges and Elections, to whom was referred the claim of John B. Allen to be admitted to a seat in the Senate from the State of Washington, to submit a report accompanied by a resolution. It will take the same direction.

The resolution was read, as follows:

Resolved, That John B. Allen is entitled to be admitted to a seat as a Senator from the State of Washington.

The VICE-PRESIDENT. The same order will be taken as in the previous cases.

EXECUTION OF RECENT IMMIGRATION ACT.

Mr. CHANDLER submitted the following resolution; which was read:

Resolved, That the Secretary of the Treasury be directed to transmit to the Senate copies of any orders, regulations, and forms of lists, manifests, and certificates prepared and issued by the Treasury Department in execution of the immigration act of March 3, 1893, together with copies of all correspondence concerning such orders, regulations, and forms between said Department and Government officials, steamship agents, and other persons.

Mr. CHANDLER. I ask that the resolution may go over until to-morrow.

Mr. HARRIS. It will be printed?

The VICE-PRESIDENT. The resolution will go over, and be printed.

INQUIRY BY COMMITTEE ON IMMIGRATION.

Mr. CHANDLER submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Immigration be authorized and directed to make inquiry into the condition and character of the alien immigrants coming to the United States for the purpose of supplying labor for the coal, iron, and other mines of the country; and further to inquire whether the laws against the admission of laborers under contract are effectually enforced, and whether the immigration laws are economically administered, without an excessive force of officers, clerks, inspectors, special agents, and other employés; and also generally to inquire into the workings of the new immigration law of March 3, 1893, and prior immigration laws, and concerning any suspected evasions and violations thereof; for the purposes of which inquiry the committee may act as a full committee or through subcommittees duly appointed by its chairman, and may take testimony during the recess of the Senate at such places as may be most convenient, and send for persons and papers, and employ a stenographer, the expenses of the inquiry to be paid from the contingent fund of the Senate.

[Mr. O. L. PRUDEN, one of the secretaries of the President of the United States, communicated to the Senate sundry messages in writing.]

JOINT COMMISSION ON EXECUTIVE DEPARTMENTS.

Mr. CALL. I ask the Senate to take up for consideration the resolutions I introduced on the last legislative day, which now lie on the table.

The VICE-PRESIDENT. The resolutions will be read.

The Secretary read the resolutions submitted by Mr. CALL on the 23d instant, as follows:

Resolved, That the enactment in the act making appropriations for legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1894, and for other purposes, approved March 3, 1893, creating a commission to be composed of members of the Senate and the House, appointed by a President of the Senate and a Speaker of the House whose terms of office expired on the 4th Day of March current, to examine into the civil service in the executive branches of the United States and to report and recommend to the present and future Congresses their opinion in relation to the exercise of the legislative powers of each and both Houses of the Congress which shall convene in December, 1893, in respect to the civil service of the United States, is in derogation of the constitutional right, power, and prerogative of each House and otherwise violative of the Constitution, and is absolutely null and void.

Resolved, second, That the Constitution confers on "each House," the sovereign and exclusive power to prescribe its rules of proceeding, and therein of the creation of its committees and the duties and powers which shall be imposed and conferred upon them, both to recommend changes in existing law and to enact new laws, and to obtain the information necessary for the exercise of their legislative power, and the members of each House can derive no power or authority or right in respect to any exercise of legislative functions from any other source than the separate and exclusive power of "each House" as they shall be organized, and during their constitutional term of official life to prescribe, regulate, and direct all their rules of procedure and the exercise of their legislative function.

The VICE-PRESIDENT. The question is on agreeing to the resolutions.

Mr. CALL. Mr. President, the enactment in the appropriation act for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1894, approved March 3, 1893, providing for a joint commission of three Senators of the Fifty-third Congress and three members-elect to the House of Representatives, to be appointed by the President of the Senate whose term of office was to expire on the 4th of March, 1893, and by the Speaker of the House, who was to become *functus officio* on the 4th of March, 1893, is, in my judgment, the most dangerous violation of the Constitution and of the rights and liberties of the people that has ever occurred in the history of this Government.

It is practically an overthrow of the constitutional powers of this body. It is an opening for the influences of wealth and corporate power to control the money appropriations of this Government and the exercise of the political power which has been conferred on the sovereign legislative department of the Government. I think it is of such importance, that the people of this country will demand a reason of Congress why such an innovation of their rights and liberties should be permitted to go unnoticed and unrebuked.

Let us examine the provisions of that act. It is an act which is to take effect in the future, and it proposes to give to the Speaker of an expired House and the President of an expired Senate—that is to say in the term for which they were chosen—the power to designate officers and members of the incoming Congress for specific duties. It is an act which proposes to supersede and annul the power of "each House" of each Congress to determine its rules of proceeding. It confers power on persons designated by the President and Speaker of the session ending March 4, 1893, to summon the President and his Secretaries before them.

It is either a legislative power or an executive power or a judicial power. If it be legislative, it is by the Constitution amenable only to the control of the House, of which the Speaker is the officer, and the Senate, of which the President of the Senate is the officer. But the act proposes to give to two persons who will become private citizens on the 4th of March, 1893, the right to designate the members of this body who shall perform certain duties. What are those duties? As I said, if they are duties which are legislative and appertain to this body, then these officers can only be designated by the Fifty-third Congress, commencing on the 4th of March, 1893, under the Constitution of the United States, which says that "each House may determine the rules of its proceeding," and therein of the committees who shall be charged with public duties, and therein of the public duty with which the committees shall be charged.

Mr. President, what are the duties imposed on the three Senators designated by the former President of this body and the three members-elect of the House? Who are to determine who are the members-elect of the House and what members are elected to the House? The men whom the House shall judge to be returned elected and qualified. Election is of two descriptions: One the choice of the people; the other the judgment of the House to which they belong as to their election, returns, and qualifications.

Now, it is proposed by this law to give to the Speaker of an expired House, whose term of office has ended, the right to determine and adjudge the returns and qualifications of the members elected to that House. How can he exercise this function constitutionally? And how dangerous to the liberties of this country to allow the officer of the expired House or the President of a Senate who is about to go out of office, who are no longer

amenable to the judgment of the legislative bodies, to designate the members of the two bodies who are to perform important duties!

But let us go further. What are the duties which this commission imposes upon these officers? Let us see. They are to "inquire into and examine the status of the laws organizing the Executive Departments, bureaus, divisions, and other Government establishments at the national capital." Is or is not that a duty of the Senate? Can the Senate delegate its authority and power to examine and inquire into the status of the laws governing the Executive Departments, bureaus, divisions, and other Government establishments at the national capital to any one but members of this body, and under rules of proceeding determined by "each recurring House?" To inquire and report to each House is a legislative function of each House. The rules of proceeding of each House can not be determined by the President and by both Houses.

The rules, regulations, and methods providing for the conduct of their proceedings; the time and attention devoted to the operations thereof must be determined by each House. Whose duty is it under the Constitution to examine into the methods in which the executive officers of this Government perform their duties? Is it not the President of the United States? What have the committees even of this body to do with the manner in which the President of the United States shall perform his duties or the heads of Departments theirs unless it be upon an impeachment of them?

The manner in which they shall perform their executive duties is prescribed by the Constitution, viz, under the supervision of the President. Whether any modification of these laws can be made to secure greater efficiency and economy, whether a reduction in the number or compensation of the persons authorized to be employed in the Executive Departments or Bureaus can be made without injury to the public service is a question for each House in the enactment of laws. "The commission shall have no jurisdiction to inquire into and report on pension legislation;" it is authorized to employ three experts, who shall render such assistance as the commission may require in the prosecution of the investigation therein required, and shall receive such compensation as the commission shall determine to be just and reasonable.

By what authority can a commission of the members of the Senate and of the House decide for these two Houses what compensation shall be reasonable and just to the persons they employ? Are they legislative or executive in this authority to employ persons and determine their compensation? It may be a hundred thousand dollars so far as this law is concerned. Their power to determine this compensation is unlimited, and it is no answer to the proposition to say that the persons designated will perform this duty economically and faithfully.

The authority given to them is to employ and to pay whatever compensation in their judgment they may see proper to give. Is it safe and in accord with our Constitution to intrust this power to engage the public credit of the people of the United States to six men, subject to no authority, selected by the Speakers of expired Senates and Houses of Congress—that is, an authority conferred by the nomination of the President of a Senate that has expired and by the Speaker of a House that has expired upon Senators and Representatives designated by these officers of a past Congress?

To whom are the members of this body responsible, Mr. President? They are responsible alone to this, the Senate of the Fifty-third Congress. To whom are the members of the House of Representatives responsible? They are responsible alone to the House of Representatives of the Fifty-third Congress; but here they are designated by an authority which has passed away, and absolute power is conferred upon them; they are not amenable to the Senate or to the House, but are to judge and decide for themselves as to the compensation which shall be paid and the assistance which they shall require. But that is not all:

> The heads of the respective Executive Departments shall detail from time to time such officers and employés as may be requested by said commission in their investigations.

By this act the whole executive force of this Government is placed at the disposal of this body of three Senators and three Representatives elect, but unqualified, placed at their absolute command, without responsibility to this body and without the action of this the Fifty-third Congress.

> Said commission or any subcommittee thereof shall have power to send for persons and papers, and to administer oaths, and such process shall be issued and such oaths administered by the chairman of the commission or subcommittee, and the commission may report, by bill or otherwise, to their respective Houses of the Fifty-third Congress. All necessary expenses of said commission shall be paid out of any money in the Treasury not otherwise appropriated upon vouchers approved jointly by the chairman of said commission.

These six members of proconsular authority and power have vested in them the dignity and power of the Senate and the House by the selection and will of officials whose terms of office have expired.

What kind of an authority is that, Mr. President, to confer upon three members of the Senate and three members of the House of Representatives, to determine for themselves, without responsibility and without any act of appropriation by the Congress to which they are amenable, the amount of money useful or necessary in the performance of certain duties, and to issue their warrant upon the Treasury of the United States for the payment of this judgment in their own favor?

The Constitution of the United States contains this provision:

> No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Is it an office under the United States to inquire and report as to the conduct of all public officials, to advise as to changes in the existing law, to issue warrants on the Treasury?

What does that mean? Does it mean that a President of the Senate and a Speaker of the House of Representatives, under a statute of the United States, may respectively designate three Senators and three members of the House of Representatives to constitute a commission, with authority to draw money from the Treasury, to incur expenses, and to adjudicate for themselves the amount of money to be used in the performance of a public duty? Does it mean that a civil office is a public function either executive, legislative, or judicial, and that a member of Congress can exercise no public function except that which is legislative, no judicial or executive public function?

If it be true that this power which the Senator from Maryland [Mr. GORMAN] and the Senator from Illinois [Mr. CULLOM] contend is a lawful authority under this statute, and that the appointee of a defunct Speaker of the House of Representatives and of a President of the Senate whose term has expired is irrevocable and beyond the reach of any authority, then this mysterious power may be exercised for the destruction of this Government and the rights of the people.

The Constitution of the United States creates this Senate a permanent legislative body, and thus makes it the people's greatest protection against usurpations of power and the misappropriation of the public money. In the very fact of its permanent character, ever ready to be called into action upon its own adjournment for the protection of the rights of the people, permanent in its sessions and its character and in the exercise of its great functions, with the power to try, convict, impeach, and remove all other officers of every other department of the Government, it is by the Constitution the protector of the liberties of the people in a superior degree even to the House of Representatives, against the influences of wealth, of social station, of personal ambition, and of arbitrary power.

What is the chief feature of the Senate, this guardian of liberty and the rights of the people? What is the chief and essential power it possesses? The power of the Senate as constituted consists in its separate and distinct organization, in the fact that the legislative power of these bodies can be exercised only by "each House" separately, not jointly or concurrently, except in the enactment of permanent law, and in that provision of the Constitution which asserts that the functions of this legislative power shall be exercised by each of the two Houses of Congress consists the substantial distinction and provision for the permanence of this Government and the protection of its constitutional limitations of power.

The Senate and the House each may determine the rules of its proceedings. So no other power can determine them. Is it a rule of proceeding of each House to inquire into the condition of the Executive Departments and into the manner in which public duties shall be performed, into changes and modifications of existing law? To what end shall a commission, irresponsible and beyond the control of the Senate or the House, be allowed to supersede this power of "each House" to determine its own proceedings?

Mr. President, here is an instance of six members of these two distinct bodies, constituted by a statute upon the appointment of officers whose term of office has expired, vested with distinction above their associates, charged with duties carrying with them emoluments and the expenditure of public money, in derogation of the rules with which this body has determined shall be its methods of legislation and its manner of proceeding.

Suppose this commission shall summon the President of the United States before it to inquire into the manner in which his subordinates have performed their duty; suppose the principle had been extended further, and they had been authorized to inquire into the manner in which the judicial department dis-

charged its duty, and they had summoned the Chief Justice of the United States and the clerks of the courts to ascertain in what manner they had performed their duties, what would be the reply? The reply would be that this is a government coördinate, of legislative, executive, and judicial powers, and there is no power in either of these departments to encroach upon the duties of the other.

For the purposes of legislation inquiries may be made by each House of Congress in order to aid them in devising the laws necessary to provide for the enforcement of the laws by the executive department of the Government and for their determination by the judiciary, but for no other purpose, except by process of impeachment, can any commission constituted either in part or in whole, even if it were lawful to do so, of members of this body, interfere with the proper and orderly operations of the other departments of this Government.

Then, again, let us inquire for what reason is it that a President of a Senate whose term of office is about to expire shall be required to designate members of the body to perform the constitutional duties of another Congress; for what reason of public convenience, of utility in legislation shall this power be exercised by which one Congress; with the aid of the President of the United States, shall deprive a future Congress of their power to determine upon their proceeding? Of what significance is the declaration, "each House may determine the rules of its proceedings?" Each House means each recurring House, each House chosen by the people—the Senate one-third every two years and the whole membership of the House every two years.

Mr. President, in my judgment this enactment marks a growing indifference to the rights of the people and the obligations of the Constitution; it marks our want of appreciation of the great dignity of the power invested in this body, its great usefulness as the protector of the people's rights under the Constitution of the country. For one, in my place here I desire to protest against it.

Here is a provision in a statute of the United States superceding the power of the Senate in the appointment of its committees. Here is a commission charged with a duty which, by the subsequent action of this body in the exercise of its constitutional power to determine its own rules of proceeding, this body has at this very session devolved upon committees and charged them with the performance of the same duties; and they are met in the performance of these duties by a commission of Senators appointed, not by the present President of this Senate, not by the Vice-President of the United States, but by virtue of a statute appointed by a former President and Speaker of an expired Congress—Senators of the Fifty-third Congress designated for public duties by the Presiding Officer of the Fifty-second Congress and members elect of the House of Representatives, unqualified, designated for the performance of the duties of that House by the Speaker of the Fifty-second Congress.

Of what avail is the constitutional declaration that "each House may determine the rules of its proceedings" if this is to stand? Has not the Senate at this session prescribed, and may not the House at its next session prescribe, the rule of proceeding, the committees which shall discharge these duties, the subjects of inquiry by them, and are they not met with a provision in a statute of the United States that a former Congress and its former President and Speaker, and not the rules of each House, shall determine the duties of these Senators and Representatives?

It seems to me that if we have any just sense of the dignity and power of this body, if we have any desire to preserve the equality of the States, if we are to exclude the influences of wealth and power from this Senate, if the functions which have been assigned in the Federal Constitution to this body are to continue intact and to be so exercised as to preserve the respect and confidence of the people, we shall not hesitate to pass these resolutions declaring this action of the last Congress to be in derogation of the constitutional rights and prerogatives of the Senate. If there can be any proposition plainer than that it is unconstitutional on the part of a Congress about to expire to attempt to control the action of a succeeding Congress in respect to the duties which shall be imposed upon its members and the manner of their performance, then I must confess I fail to see it.

It seems to me that the contradiction is direct and positive, that this enactment of Congress in an appropriation act is in denial of the authority which this body has exercised under the Constitution of prescribing its rules of proceeding, the committees which shall execute its will, and the subjects which shall be committed to their jurisdiction. We have a committee charged with the duty of inquiring into the civil service, so charged by the standing rules of this body, so charged by its creation at this session; and yet we have a statute conferring power and emoluments and giving the key of the Treasury to an unlimited extent to three unsworn members of the House of Representatives and three Senators of this body, nominated by the President of an expired Senate and the Speaker of an expired House. If the provision which authorizes these six men, three Senators and three members of the House, to determine the necessary and proper amount of the expenses of their proceedings and to issue their warrant upon the Treasury of the United States without further inquiry for its payment, be law and free government and a defense of the rights of the people, I fail to understand it.

It may be unimportant in this instance; but in the example it is full of danger. In the example it may license the drawing from the Treasury of the United States of an unlimited amount of money upon the judgment of three Senators, not nominated by the rules of this body nor by its Presiding Officer, and, according to the Senator from Maryland and the Senator from Illinois, not responsible to it, whose places can not be filled even by the order of this body if there be resignations. This is a strange and mysterious law, without authority, without reason, without constitutional right, and in derogation of the principles of this Government.

Mr. President, I shall be glad to have a vote upon the resolutions.

Mr. HARRIS. If no Senator desires to be heard further upon the resolutions, I suggest that they be referred to the Committee on Privileges and Elections, where they may be carefully considered and reported upon.

Mr. ALLISON. I trust the Senator from Tennessee will not make that motion at this moment. I think one or two Senators desire to be briefly heard upon the subject.

Mr. HARRIS. Of course I shall not make the motion if any Senator desires to be heard.

Mr. ALLISON. I suggest that the resolutions lie upon the table, to be called up hereafter.

The PRESIDING OFFICER (Mr. COCKRELL in the chair). Does the Senator from Florida object to the resolutions going over?

Mr. CALL. No, sir; let them lie over.

The PRESIDING OFFICER. The resolution will be laid aside for further consideration. What is the further pleasure of the Senate?

EXECUTIVE SESSION.

Mr. COKE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 1 hour and 30 minutes spent in executive session the doors were reopened, and (at 2 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, March 28, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 27, 1893.

UNITED STATES DISTRICT JUDGE.

William H. Seaman, of Wisconsin, to be United States district judge for the eastern district of Wisconsin, vice James G. Jenkins, appointed circuit judge.

ASSOCIATE JUSTICE SUPREME COURT OF NEW MEXICO.

Albert B. Fall, of New Mexico Territory, to be associate justice of the supreme court of the Territory of New Mexico, vice John R. McFie, whose term expired March 23, 1893.

SOLICITOR OF THE TREASURY.

Felix A. Reeve, of Tennessee, to be Solicitor of the Treasury, vice William P. Hepburn, resigned.

UNITED STATES ATTORNEYS.

William T. Gary, of Georgia, to be attorney of the United States for the southern district of Georgia, vice Marion Erwin, whose term will expire March 30, 1893.

Joseph S. James, of Georgia, to be attorney of the United States for the northern district of Georgia, vice Sion A. Darnell, whose term will expire April 2, 1893.

George J. Denis, of California, to be attorney of the United States for the southern district of California, vice Matthew T. Allen, resigned.

UNITED STATES MARSHALS.

Thomas J. Allison, of North Carolina, to be marshal of the United States for the western district of North Carolina, vice Tyre Glenn, whose term will expire March 30, 1893.

James Blackburn, of Kentucky, to be marshal of the United States for the district of Kentucky, vice Drury J. Burchett, whose term will expire April 2, 1893.

Frank Leverett, of Georgia, to be marshal of the United States for the southern district of Georgia, vice Walter P. Corbett, whose term expires March 27, 1893.

CONSUL-GENERAL.

Samuel E. Morss, of Indiana, to be consul-general of the United States at Paris, vice Adam E. King, recalled.

CONSULS.

C. W. Chancellor, of Maryland, to be consul of the United States at Havre, vice Oscar F. Williams, recalled.

Allan B. Morse, of Michigan, to be consul of the United States at Glasgow, vice Levi W. Brown, recalled.

George F. Parker, of New York, to be consul of the United States at Birmingham, vice Adam Everly, recalled.

ASSISTANT SURGEON MARINE HOSPITAL SERVICE.

Seaton Norman, of Indiana, to be an assistant surgeon in the Marine Hospital Service of the United States, in accordance with the act of Congress approved March 1, 1893.

ASSISTANT COMMISSIONER OF PATENTS.

Samuel T. Fisher, of Canton, Mass., to be Assistant Commissioner of Patents, vice Nathaniel L. Frothingham, resigned.

INDIAN AGENT.

Francisco Estudillo, of San Jacinto, Cal., to be agent for the Indians of the Mission Tule River (consolidated) Agency in California, vice Horatio N. Rust, resigned.

REGISTER OF THE LAND OFFICE.

Robert E. Wilson, of Jackson, Miss., to be register of the land office at Jackson, Miss., vice Henry Kernaghan, to be removed.

PROMOTIONS IN THE NAVY.

Medical Inspector John H. Clark, to be a medical director in the Navy, from March 4, 1893, vice Medical Director William T. Ford, retired.

Surg. James M. Flint, to be a medical inspector in the Navy, from March 4, 1893, vice Medical Inspector John H. Clark, promoted.

Passed Assistant Surg. Nelson H. Drake, to be a surgeon in the Navy, from March 4, 1893, vice Surg. James M. Flint, promoted.

Ensign Joseph H. Rohrbacher, to be a lieutenant (junior grade) in the Navy from the 7th March, 1893, vice Lieut. (junior grade) R. P. Schwerin, resigned.

POSTMASTERS.

Crawford B. Andrews, to be postmaster at Prescott, in the county of Nevada and State of Arkansas, in the place of Zachariah T. Grayson, whose commission expires March 30, 1893.

William P. Powell, to be postmaster at Hope, in the county of Hempstead and State of Arkansas, in the place of John M. Kinser, whose commission expires March 29, 1893.

Mrs. Amelia H. Bates, to be postmaster at Sonoma, in the county of Sonoma and State of California, in the place of Emma Hope, resigned.

John H. Swartwout, to be postmaster at Stamford, in the county of Fairfield and State of Connecticut, in the place of Henry E. Smith, deceased.

James E. Brown, to be postmaser at Newnan, in the county of Coweta and State of Georgia, in the place of Robert F. Milner, whose commission expires March 27, 1893.

William M. Dunbar, to be postmaster at Augusta, in the county of Richmond and State of Georgia, in the place of Jabez T. Denning, removed.

Samuel Harris, to be postmaster at Franklin, in the county of Johnson and State of Indiana, in the place of William B. Ellis, resigned.

Henry C. Ulen, to be postmaster at Lebanon, in the county of Boone and State of Indiana, in the place of Felix Shumate, resigned.

Rollin M. Clark, to be postmaster at Keokuk, in the county of Lee and State of Iowa, in the place of Richard Root, whose commission expired March 13, 1893.

Henry Heimiller, to be postmaster at Versailles, in the county of Woodford and State of Kentucky, in the place of Joseph N. Reid, whose commission expires April 1, 1893.

Francis M. Mumford, to be postmaster at Bayou Sara, in the parish of West Feliciana and State of Louisiana, in the place of Francis M. Mumford, whose commission expired February 28, 1893.

Oliver Wells, to be postmaster at Marshfield, in the county of Webster and State of Missouri, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1893.

Walter P. Horne, to be postmaster at Suspension Bridge, in the county of Niagara and State of New York, in the place of John C. Lammerts, resigned.

John P. Kerr, to be postmaster at Asheville, in the county of Buncombe and State of North Carolina, in place of George W. Cannon, whose commission expires March 27, 1893.

Thomas H. Craig, to be postmaster at Athens, in the county of Athens and State of Ohio, in the place of George W. Baker, whose commission expired March 23, 1893.

Lewis Green, to be postmaster at Logan, in the county of Hocking and State of Ohio, in the place of Francis S. Bursell, whose commission expires April 1, 1893.

James F. Johnson, to be postmaster at Pendleton, in the county of Umatilla and State of Oregon, in the place of Benjamin S. Burroughs, resigned.

W. B. Woody, to be postmaster at Rockdale, in the county of Milam and State of Texas, in the place of John C. Witcher, resigned; Hugh L. Witcher, who was appointed by the President November 18, 1892, and confirmed by the Senate December 14, 1892, not having been commissioned.

Charles D. Denit, to be postmaster at Salem, in the county of Roanoke and State of Virginia, in the place of W. Lee Brand, whose commission expires March 29, 1893.

Henry I. Tuggle, to be postmaster at Martinsville, in the county of Henry and State of Virginia, in the place of Charles W. Jones, whose commission expires March 27, 1893.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 27, 1893.

CIRCUIT JUDGE.

Horace H. Lurton, of Tennessee, to be United States circuit judge for the sixth judicial circuit.

COMMISSIONER OF THE GENERAL LAND OFFICE.

Silas W. Lamoreux, of Horicon, Wis., to be Commissioner of the General Land Office.

TUESDAY, *March 28, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

Mr. O. L. PRUDEN, one of the secretaries of the President of the United States, communicated to the Senate sundry messages in writing.

The VICE-PRESIDENT. What is the pleasure of the Senate?

Mr. HOAR. The regular order.

Mr. FRYE. Petitions and memorials.

The VICE-PRESIDENT. The Chair reminds the Senator from Maine of the action of the Senate taken yesterday.

Mr. COCKRELL. The presentation of petitions and memorials is the first order of business.

Mr. SHERMAN. The call for reports of committees and then for resolutions I think would be a proper form of procedure.

Mr. COCKRELL. I understand that yesterday morning, by unanimous consent, the form of the presentation of petitions, introduction of bills, etc., was dispensed with.

Mr. SHERMAN. By unanimous consent it was agreed that all petitions should be handed to the Secretary, to be kept by him until the regular legislative session.

Mr. HOAR. But that did not include memorials of Legislatures.

Mr. SHERMAN. It did not.

Mr. HOAR. Therefore the regular order would be the ordinary call, and memorials of Legislatures would be presented under the first call for petitions and memorials.

The VICE-PRESIDENT. If there are none such, reports of standing and select committees are in order.

SELECT COMMITTEE ON ADDITIONAL ACCOMMODATIONS FOR THE LIBRARY OF CONGRESS.

Mr. WHITE of Louisiana. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate to report back a substitute for the resolution to authorize the Select Committee on Additional Accommodations for the Library of Congress to employ a clerk, and I ask for its present consideration.

The substitute resolution was read, as follows:

Resolved, That the Select Committee on Additional Accommodations for the Library of Congress be, and hereby is, authorized to sit during the recess of the Senate and to employ a clerk.

The Senate, by unanimous consent, proceeded to consider the resolution.

Mr. DOLPH. I desire to ask the chairman of the Committee on Contingent Expenses if there is not some general provision fixing compensation and providing for the payment of clerks?

Mr. WHITE of Louisiana. If the Senator will allow me, I have a communication in my hand addressed to the First Comptroller and his reply, by which it is made perfectly manifest that by reason of the provision in the deficiency appropriation act of last session this committee is without the means of paying

its clerk unless it is provided for by resolution. I send the communications to the desk and ask that they be read.

The VICE-PRESIDENT. The communications will be read.

The Secretary read as follows:

MARCH 22, 1893.

SIR: The bill making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1893, approved July 16, 1892, provided for "twenty-four clerks to committees, at $6 per day each, during the session." The act to supply deficiencies, etc., approved March 3, 1893, provided for the pay of these twenty-four committee clerks from the 4th to the 31st of March, at which time it was supposed that the executive session of the Senate would terminate. The act making appropriations for the legislative, executive, and judicial expenses of the Government, approved March 3, 1893, provided for twenty-three clerks to committees, at $1,440 per annum, and was made immediately available. The same act makes one of the twenty-four clerks provided for in the act of July 16, 1892, at $3 per day, viz, the clerk to the Committee on Additional Accommodations for the Library of Congress, annual, at a salary of $2,220, taking effect on the 1st day of July, 1893. I respectfully ask that you decide whether this clerk can not be paid from the 4th of March to the 31st of March at the rate fixed by the act of July 16, 1892, and, inasmuch as there will be a large surplus in the appropriations for the session employés, can he not also be paid at the same rate to the 30th of June from this surplus, a resolution of the Senate being passed to continue the clerk until that date, when the new appropriation will go into effect? At that time he will go on the roll as an annual clerk at $2,220 per annum.

Very respectfully,

ANSON G. McCOOK, *Secretary.*

Hon. A. C. MATTHEWS,
Comptroller.

TREASURY DEPARTMENT,
OFFICE OF THE FIRST COMPTROLLER,
Washington, D. C., March 24, 1893.

SIR: In reply to your letter of 22d instant I have to say that the salary of $2,220 per annum provided for a clerk to the Committee on Additional Accommodations for the Library of Congress in the legislative act of March 3, 1893, is not available until July 1, 1893.

The present salary of the clerk to that committee is $6 per diem, and he can be paid at that rate from the 4th to the 31st of March out of the appropriation made in the deficiency act of March 3, 1893.

If his services are continued by a resolution of the Senate after March 31, he can be paid $6 per diem to June 30, 1893, from the same fund, not by virtue of the fact that there will be a surplus of the appropriation, but because he was "in the service of the Senate" at the date of the passage of the act, and there is no limit of time, except to the fiscal year 1893, of the appropriation, and because Congress evidently did not intend to discriminate against this one committee clerk when it made the salaries appropriated for the twenty-three others immediately available and his salary not available until July 1, 1893.

Under ordinary circumstances, or if the position were one created merely by a Senate resolution, payment could, of course, be made only out of the contingent fund of the Senate.

Respectfully, yours,

A. C. MATTHEWS,
Comptroller.

Hon. ANSON G. McCOOK,
Secretary United States Senate, Washington, D. C.

Mr. WHITE of Louisiana. I ask for the adoption of the resolution.

The resolution was agreed to.

CLERK TO SELECT COMMITTEE ON GEOLOGICAL SURVEY.

Mr. WHITE of Louisiana. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate to report adversely the resolution submitted by the Senator from Kansas [Mr. MARTIN], authorizing the Select Committee to Investigate the Geological Survey to employ a clerk at an annual salary of $1,440. The resolution is reported adversely because the clerk is already provided for.

The VICE-PRESIDENT. The resolution will be indefinitely postponed if there be no objection.

ORDER OF BUSINESS.

Mr. CHANDLER. If there are no further reports of committees, I ask for the consideration of the resolution submitted by me yesterday.

Mr. GORMAN. Has the regular order been concluded?

The VICE-PRESIDENT. Not yet.

Mr. GORMAN. What is the pending order?

The VICE-PRESIDENT. Reports of committees are still in order. If there be none, the Chair recognizes the Senator from New Hampshire [Mr. CHANDLER].

Mr. HOAR. I desire to inquire whether the next order should not first be called.

The VICE-PRESIDENT. The introduction of bills and resolutions is in order.

Mr. HARRIS. That call is for legislative session. There is no such thing, it seems to me, at this session of the Senate.

OFFICERS OF THE SENATE.

Mr. GORMAN. I submit sundry resolutions, which I ask may be read for information in the order in which they stand, and lie on the table.

The VICE-PRESIDENT. The resolutions will be read.

The Secretary read the resolutions, as follows:

Resolved, That the Senate do now proceed to the election of its Secretary Sergeant-at-Arms and Doorkeeper, and Chaplain.

Resolved, That the officers to be elected as aforesaid shall, unless said offices become vacant in the mean while by death, resignation, or otherwise, only enter upon the discharge of their duties on the 30th day of June next, being at the end of the present fiscal year, and the present incumbents of said offices, as aforesaid, shall continue to be the incumbents thereof and exercise the duties of their respective offices until the end of the present fiscal year, as aforesaid, when the officers to be elected as hereinabove provided shall, as hereinabove stated, enter upon the discharge of their duties.

Resolved, That William R. Cox, of North Carolina, be, and he is hereby, elected Secretary of the Senate, his term of office to begin on the 30th day of June next, being the end of the present fiscal year, until which time the present incumbent shall continue to be Secretary of the Senate, unless the office of Secretary becomes vacant by death, resignation, or otherwise before the end of the present fiscal year, in which event the said William R. Cox shall be at once Secretary of the Senate and enter upon the discharge of his duties as Secretary.

Resolved, That Richard J. Bright, of Indiana, be, and is hereby, elected Sergeant-at-Arms and Doorkeeper of the Senate, his term of office to begin on the 30th day of June next, being the end of the present fiscal year, until which time the present incumbent shall continue to be Sergeant-at-Arms and Doorkeeper, unless the office of Sergeant-at-Arms and Doorkeeper becomes vacant by death, resignation, or otherwise before the end of the present fiscal year, in which event the said Richard J. Bright shall be at once Sergeant-at-Arms and Doorkeeper of the Senate and enter upon the discharge of his duties in said office.

Resolved, That William H. Milburn, D. D., of Illinois, be, and he is hereby, elected Chaplain of the Senate, his term of office to begin on the 30th day of June next, being the end of the present fiscal year, until which time the present incumbent shall continue to be Chaplain of the Senate, unless the office of Chaplain becomes vacant by death, resignation, or otherwise before the end of the present fiscal year, in which event the said William H. Milburn, D. D., shall be at once Chaplain of the Senate and enter upon the discharge of his duties as Chaplain.

Mr. GORMAN. I ask that the resolutions may lie on the table and be printed.

The VICE-PRESIDENT. Such will be the order in the absence of objection.

SENATOR FROM MONTANA.

Mr. HOAR. I desire to give notice that to-morrow, after the conclusion of the morning business, I shall call up the report of the Committee on Privileges and Elections in the case of Mr. Mantle, and the other cases will follow when that is disposed of. This notice is given by an arrangement with and at the request of the Senator from North Carolina [Mr. VANCE], who desires to have the matter taken up when the Senate are ready for its consideration.

Mr. VEST. May I inquire of the Senator from Massachusetts why it is that the report of the majority of the Committee on Privileges and Elections is not printed and upon our desks this morning?

Mr. HOAR. I do not know; I suppose it will be circulated in a few minutes. It went to the Printer last night.

Mr. VEST. I have the views of the minority, but not the report of the majority.

Mr. HOAR. Whoever is charged with distributing such documents will circulate them.

Mr. FRYE. The order was that they should be printed together.

Mr. HOAR. The order was that they should be printed together. The copy the Senator from Missouri has of the views of the minority is probably one made for the use of the committee and not the one made for the Senate.

Mr. VEST. That is possibly the case.

CHARGES AGAINST SENATOR ROACH.

Mr. HOAR submitted the following resolution; which was read:

Resolved, That the Committee on Privileges and Elections be directed to investigate the allegations recently extensively made in the public press charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with the offense of criminal embezzlement, to report the facts of the transactions referred to, and further to report what is the duty of the Senate in regard thereto. For that purpose the committee shall have authority to send for persons and papers, to administer oaths, to employ a stenographer, and to act through a subcommittee.

Mr. GORMAN. I ask that the resolution may lie on the table. Let it be printed and go over.

Mr. HOAR. Does the Senator mean to have it lie on the table, or go over under the rule?

Mr. GORMAN. To go over under the rule.

Mr. HOAR. That does not put it on the table.

The VICE-PRESIDENT. The resolution will go over and be printed.

EXECUTION OF RECENT IMMIGRATION ACT.

Mr. CHANDLER. I ask for the consideration of the resolution submitted by me yesterday.

The VICE-PRESIDENT. The Chair lays before the Senate a resolution coming over from a previous day, which will be read.

The resolution submitted yesterday by Mr. CHANDLER was read, as follows:

Resolved, That the Secretary of the Treasury be directed to transmit to the Senate copies of any orders, regulations, and forms of lists, manifests, and certificates prepared and issued by the Treasury Department in execution of the immigration act of March 3, 1893, together with copies of all correspondence concerning such orders, regulations, and forms between said Department and Government officials, steamship agents, and other persons.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

PRINTING OF CIVIL SERVICE COMMISSION REPORT.

Mr. COCKRELL. I have not written it out, but I want to have a resolution adopted directing the Public Printer to inform the Senate what is the cause of the delay in the publication of the last report of the Civil Service Commission, which ought to have been out months ago.

The VICE-PRESIDENT. The resolution will be reduced to writing and read by the Secretary.

The Secretary read as follows:

Resolved, That the Public Printer be directed to inform the Senate as to the causes of delay in the printing of the last report of the Civil Service Commission.

The VICE-PRESIDENT. Does the Senator from Missouri desire the immediate consideration of the resolution?

Mr. COCKRELL. I ask for its present consideration.

The resolution was considered by unanimous consent, and agreed to.

EXECUTIVE SESSION.

Mr. HARRIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 12 o'clock and 33 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, March 29, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 28, 1893.

UNITED STATES ATTORNEY.

Ezra W. Miller, of South Dakota, to be attorney of the United States for the district of South Dakota, vice William B. Sterling, resigned.

CONSUL-GENERAL.

George G. Dillard, of Mississippi, to be consul-general of the United States at Guayaquil, vice William B. Sorsby, recalled.

POSTMASTERS.

J. E. Horsman, to be postmaster at Rice Lake, in the county of Barron and State of Wisconsin, in the place of Ole E. Waugulld, whose commission expires March 29, 1893.

Thomas F. Solon, to be postmaster at West Superior, in the county of Douglas and State of Wisconsin, in the place of Graham L. Rice, whose commission expired March 21, 1893.

WEDNESDAY, *March 29, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

PRINTING OF CIVIL SERVICE COMMISSION REPORT.

The VICE-PRESIDENT laid before the Senate a letter from the Public Printer, in response to a resolution of the 28th instant, concerning the causes of delay in the printing of the last report of the Civil Service Commission; which, on motion of Mr. COCKRELL, was ordered to lie on the table, and be printed.

[Mr. O. L. PRUDEN, one of the secretaries of the President of the United States, communicated to the Senate sundry messages in writing.]

CAUSE OF FINANCIAL DEPRESSION.

Mr. TELLER. I present the petition of B. F. Rice, formerly a member of this body, praying for the appointment of a committee to investigate the cause of the continuous financial depression throughout the country, and to ascertain how far the present mode of Federal taxation is responsible for such depression, also praying for appropriate legislation to correct any evils found to exist. I ask that the petition be printed as a document and referred to the Committee on Finance.

The VICE-PRESIDENT. If there be no objection that will be the order of the Senate.

INTERSTATE COMMERCE INVESTIGATION.

Mr. HIGGINS. I submit a resolution, and ask that it be read and referred to the Committee on Interstate Commerce.

The resolution was read, as follows:

Resolved, That the Committee on Interstate Commerce be, and is hereby, authorized to inquire whether or not the methods prevailing in the transportation of freight and passengers over the great railroad lines of the country, and the conditions and necessities of travelers and shippers and of the transportation companies justify or require a repeal or modification of section 5 of the interstate commerce act of February 4, 1887, which prohibits pooling under any circumstances; and that said committee be further authorized to inquire whether the system of closing and sealing cars engaged in transporting merchandise from one of the States of the Union into another State through foreign territory, or from such territory into any State, or from such territory through the United States into foreign territory, or any system of bonding merchandise so transported, needs to be abolished, modified, or further regulated by law, and whether all railroads engaged in such traffic should either be required to conform to all the provisions of the said interstate commerce act, or be prohibited from continuing such transportation business; the said committee being hereby empowered to sit during the recess of the Senate, to act by subcommittees if deemed necessary, to take testimony at convenient points, to send for witnesses, books, and papers, and employ a stenographer, and to have its expenses paid from the contingent fund of the Senate.

Mr. COCKRELL. Let the resolution be referred.

The VICE-PRESIDENT. The resolution will be referred to the Committee on Interstate Commerce.

Mr. COCKRELL. That is right.

Mr. CULLOM. I think the resolution ought to be referred to the committee.

Mr. COCKRELL. It has been referred.

SENATOR FROM MONTANA.

Mr. HOAR. I call up as a matter of privilege the resolution in regard to the admission of Mr. Mantle.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution reported from the Committee on Privileges and Elections on the 27th instant, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

Mr. HOAR. I am disposed to take the sense of the Senate as to whether the reports, which have been printed and I suppose laid on the tables of all Senators, shall be read at the desk. Unless some Senator calls for the reading of the report and the views of the minority I shall not ask to have them read. The Senator from Alabama [Mr. PUGH] is prepared to state the views of the majority of the committee.

Mr. HARRIS. Will the Senator from Massachusetts allow me to suggest to him that the report of the committee is laid upon the tables of Senators for the first time this morning? I doubt whether any Senator outside of the committee has had an opportunity to examine it. I am sure I have not. In view of this fact, I shall be glad, if it suits the convenience of the Senator from Massachusetts, that the matter may go over to another day so that Senators may have an opportunity to examine the report with some care. To have it read at the desk communicates wonderfully little information to the Senate, and in the hurry and confusion of business here we can not examine the report with any degree of satisfaction.

Mr. HOAR. That will undoubtedly be the course taken; that is, the matter will go over so that Senators will have a full opportunity to consider the report before a final vote is asked; but I think it would be well to proceed with the debate. Some Senators are ready to speak to-day. Arrangement was made that the debate should begin to-day for the convenience of a Senator who desires to leave the city. So, as I suggested, nobody calling for the reading of the report at the desk, the debate had better proceed for a little while, and then the matter will go over.

Mr. HARRIS. Of course I shall have no objection to the suggestion last made by the Senator from Massachusetts.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. HOAR. I understand the resolution takes its place under the rule, that a question on the credential of a Senator proceeds as of right until it is disposed of. It is a matter of the highest privilege, and I have simply called up the resolution.

The VICE-PRESIDENT. The resolution is before the Senate, and the question is on agreeing to the same.

Mr. PUGH. Mr. President, the importance of the question presented by the reports of the majority and minority of the Committee on Privileges and Elections will be conceded, and the necessity for a solution of it by the Senate that will be accepted hereafter as final can not be questioned. The conditions and results inseparable from the discussion, consideration, and determination of the right of the appointee of a governor to fill the vacancy existing in the Senate have unfortunately been influenced more or less by the fact that the appointee was a Democrat or Republican, as is shown by the division of the votes of Senators on party lines, and when once committed it is difficult for the Senator on reconsideration of the same question to give due weight to arguments against the soundness of his former decision. The question as it is now presented is freer from political surroundings and in a better condition to be decided on its real merits than at any time when heretofore determined.

The first inquiry to which I direct the attention of the Senate is as to the facts in each of the three cases of the States of Montana, Wyoming, and Washington. In each of the cases the terms of the Senator elected by the Legislature of his State expired on

the 4th day of this present month. In each of the States the Legislature had met and organized some time prior to the 4th of March, when the seat of one of the Senators from each State was vacated by operation of the Constitution. In each of the States the Legislature, in accordance with the act of Congress of 1866, proceeded to elect a Senator to fill the vacancy, and continued in daily session to elect until the existence of the Legislature was terminated by an express provision of the constitution of each State, and when thus terminated the power of the Legislature in each State expired, leaving the seat of each of the Senators vacated and the three States without their constitutional representation.

In the case of Montana and Wyoming, the sessions of the Legislature expired by constitutional limitation a few days before the 4th of March, when the seats of the Senators were vacated. In the case of the State of Washington, the Legislature expired by constitutional limitation after the 4th of March; so that in the former two States the vacancy occurred after the termination of the life of the Legislature, and of course during its recess, while in the State of Washington the vacancy in the Senate occurred when the Legislature was in session.

The foregoing are the undisputed facts and all the facts upon which the question of constitutional law arises, whether the governors of the States are invested with the power of filling the vacancies in the Senate of the United States admitted to exist in the manner and under the circumstances I have stated. We can look nowhere for the power to fill these vacancies in the Senate except in the Constitution of the United States.

In the first article and third section of the Constitution we find the following words:

The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

The above quotations are all the provisions of the Constitution relating to filling and keeping the Senate full of two Senators from each State at all times. It will be observed that there are only two modes provided of securing to each State at all times a full representation by two Senators: (1) By having them "chosen" permanently by the Legislature of the State, and (2) when "vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies."

How is representation kept full in the House of Representatives?

The second section of the Constitution provides for representation in the House on the basis of population, and that "each State shall have at least one representative," and "when vacancies happen in the representation from any State the executive authority thereof shall issue writs of election to fill such vacancies."

Each House shall be the judge of the elections, returns, and qualifications of its own members.

How are all the offices of the United States kept full so that the public service may suffer no detriment?

The second section of Article II provides that the President "shall nominate, and by and with the advice and consent of the Senate shall appoint * * * all officers of the United States," and "the President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session."

The foregoing extracts from the Constitution embrace everything in it relating directly or indirectly to every aspect of the questions before the Senate. The next source of information to which I call the special attention of the Senate is what was said and done in the convention that framed the above provisions of the Constitution to shed light on their objects and true meaning.

In Elliott's Debates, found in the Madison Papers, at page 377 Mr. Rutledge, on the 6th of August, 1787, reported from the committee of detail as follows:

Article V, section 1. The Senate of the United States shall be chosen by the Legislatures of the several States. Each Legislature shall choose two members. Vacancies may be supplied by the executive until the next meeting of the Legislature. Each member shall have one vote.

This provision, reported by the committee of detail, was under consideration on the 9th of August. The whole proceeding on Article V, section 1, as I have quoted it, appears as follows, just as it stands in the Debates:

Mr. Wilson objected to vacancies in the Senate being supplied by the executives of the States. It was unnecessary, as the Legislatures will meet so frequently. It removes the appointment too far from the people, the executives in most of the States being elected by the Legislatures. As he had always thought of the appointment of the executive by the legislative department wrong, so it was still more so that the executive should elect into the legislative department.

Mr. Randolph thought it necessary in order to prevent inconvenient chasms in the Senate. In some States the Legislatures meet but once a year. As the Senate will have more power and consist of a smaller number than the other House, vacancies there will be of more consequence. The executives might be safely trusted, he thought, for so short a time.

Mr. ELLSWORTH. It is only said that the executives may supply vacancies. When the legislative meeting happens to be near the power will not be exerted. As there will be but two members from a State, vacancies may be of great moment.

You see that the word happens is used by Mr. Ellsworth in reference to the meeting of the Legislature, which is always fixed by law.

Mr. WILLIAMSON. Senators may resign or not accept. This provision is therefore absolutely necessary.

On the question of striking out "vacancies shall be supplied by the executives," the vote stood—Pennsylvania, aye 1; New Hampshire, Massachusetts, Connecticut, New Jersey, Virginia, North Carolina, South Carolina, Georgia, no 8; Maryland, divided.

Mr. Williamson moved to insert, after "vacancies shall be supplied by the executives," the words, "unless other provision shall be made by the Legislature of the State."

Mr. Ellsworth was willing to trust the Legislature or the executive of a State, but not to give the former a discretion to refer appointments for the Senate to whom they pleased.

On the question on Mr. Williamson's motion, Maryland, North Carolina, South Carolina, and Georgia, aye—4; New Hampshire, Connecticut, Massachusetts, New Jersey, Pennsylvania, and Virginia, no—6.

Now Mr. Madison speaks, and I desire Senators to hear him:

Mr. Madison, in order to prevent doubts—

About what? The power of the executives to fill vacancies whenever or however they might happen? Certainly not, as he had just voted against striking out the words giving executives power to fill vacancies that happen to exist without any reference to how or what caused them to happen to exist——

Mr. MITCHELL of Oregon. Will it disturb the Senator if I ask him a question?

Mr. PUGH. Yes, sir, it will disturb me; but I will answer any question the Senator desires to ask me after I get through.

Mr. MITCHELL of Oregon. I simply wanted to know how the clause read when the motion was made to strike out the word "vacancy."

Mr. PUGH. It read just as I have stated it.

Mr. MITCHELL of Oregon. I should like to hear it.

Mr. PUGH. It read just as it was reported from the committee of detail.

Mr. MITCHELL of Oregon. I should like to know that before we go further, because it is very important.

Mr. PUGH. I should say it is; and that is exactly what I am urging. It is the crucial test of the power of the governor, in my judgment. On the question of striking out "vacancies shall be supplied by the executives" there was no limitation or qualification in the power reported in the Constitution from the committee of detail, and eight States to one voted against striking out those words.

Then what did Madison say were the doubts he desired to remove?—

in order to prevent doubts whether resignations could be made by Senators, or whether they could refuse to accept, moved to strike out the words after "vacancies" and insert the words "happening by refusals to accept, resignations, or otherwise, may be supplied by the Legislature of the State in the representation of which such vacancies shall happen, or by the executive thereof until the next meeting of the Legislature."

Making the power of the Legislature and the governor to fill vacancies that happen coequal.

Mr. HOAR. Will the honorable Senator from Alabama permit me to make a suggestion, which I dare say may be in his plan of remarks, that that difficulty arose from the rule in the English House of Commons, which is familiar to all Senators, which did not permit a member of the House of Commons to vacate his office by resignation.

Mr. PUGH. And thereby create a vacancy.

Mr. HOAR. To this day I believe the fiction is kept up, and when a member of the House of Commons desires to vacate his seat he accepts another office—the Chiltern Hundreds; he gets out of it in that way. That was what made that language seem necessary to Mr. Madison.

Mr. PUGH. It was upon that state of facts that doubts arose as to the right of a Senator to resign and thereby create a vacancy.

Mr. GOUVERNEUR MORRIS. This is absolutely necessary; as members chosen in the Senate are disqualified from being appointed to any office by section 9 of this article, it will be in the power of a Legislature, by appointing a man a Senator against his consent, to deprive the United States of his services.

The motion of Mr. Madison was agreed to *nem. con.*

Here is proof as strong as language can make it that no opposition was ever expressed in the convention that framed the Constitution, except by one State, to granting power to the executives of the States to fill vacancies that happen in the Senate

from any cause at any time. No mention was made of how a vacancy should happen, or that it should be of any particular kind or character, to be imparted to it by the cause or event or fact that produced it. There was no attempt to limit the executive power to fill vacancies.

Mr. VANCE. If it will not disturb the Senator, I shall be glad to ask him what became of Mr. Madison's proposed amendment to the Constitution?

Mr. PUGH. It was adopted without a word of dissent.

Mr. VANCE. That is not in the Constitution now, is it?

Mr. PUGH. It is, leaving out the words "refusal to accept." It is confined now to "resignation, or otherwise." I will explain that in a minute.

Mr. VANCE. I should like to know how it came that that material portion of the amendment was left out.

Mr. PUGH. I shall enlighten the Senator in the remarks I shall proceed to make.

The existence of the vacancy from any cause was the crucial test of executive power to fill it. Then, why were the words "by resignation, or otherwise," inserted? Plainly and undoubtedly for the purpose, as declared then and there by Madison, the author and mover of the language, and by Gouverneur Morris, the supporter of Madison's motion, of removing all doubt as to the right of Senators to resign, and not doubts as to the power of the executives to fill vacancies to keep the Senate full to preserve the equality of representation.

The manifest and declared purpose for inserting the words "by resignation or otherwise" was to protect the rights of Senators, and not to interfere with or limit or qualify the power of the governors to fill all vacancies that happen to exist in the Senate. The word "resignation" removed all doubts as to the rights of Senators by express specification, and the words "or otherwise" were added to preserve the power of the executives to fill vacancies to the full extent that it would exist by the use of the words which eight States refused to strike out on the motion of a single State.

Mr. President, I have read to the Senate every provision of the Constitution and all that was said by the authors of these provisions at the time they were adopted, and it seems to me there is nothing upon which to base a reasonable doubt, and all the minority of the committee can do is to turn the Senate into a college of philologists, to teach each other etymology, syntax, and prosody, and speculate on what Washington and Franklin and Madison and Ellsworth and Gouverneur Morris really intended, that then existing and future generations, who were to be governed under the Constitution to be submitted to each State for ratification, should understand from the language of the Constitution and where the power was invested to keep the Senate and House and executive offices full, so that each State should have two Senators in the Senate and at least one Representative in the House and every executive office an incumbent.

The language of the Constitution was not selected by philologists or technical lawyers, but by statesmen, who used plain, comprehensive words to give expression to their strong common sense and practical knowledge of the fundamental objects and uses of free representative government.

The words in the Constitution that give rise to all the contention and difference of opinion as to where the power resides to fill vacancies in the Senate are the following:

> And if vacancies happen, by resignation or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

I have shown all the history of the use of these words. It is an axiomatic rule of construction of words and sentences, wherever found, to ascertain the intention, purpose, and object of those using the language, and then, if practicable, to adopt the meaning that will execute the intention and accomplish the object of the authors.

There can be no controversy about the importance of the object intended to be accomplished by declaring that "the Senate of the United States shall be composed of two Senators from each State, and each Senator shall have one vote." How shall two Senators be assured to each State at all times? Was it considered possible under any circumstances or conditions existing or that could exist at any time that a State could be deprived of its full representation by two Senators?

If such a possibility could have been discovered by the framers of the Constitution in the insufficiency or uncertainty in the meaning of the words used to provide against such a material and revolutionary probability or possibility, would they have failed to avoid it by the insertion of words that would have excluded all doubts as to the happenings of such possible consequences? It is a reflection upon the capacity and intelligence of the framers of the Constitution to charge that their paramount object to keep the Senate full is to be defeated by their intentional or careless or ignorant selection of words to carry out their main purpose that they ought to have known were wholly inadequate to accomplish such object. What language of the Constitution can be tortured into the discovery of the intention, desire, or anticipation of its framers that the power should exist anywhere in the framework of our dual system of government by action or nonaction of any of the agencies provided to keep the Senate full to deprive any State of equal representation in that great lawmaking body?

It is claimed by the philologists in the Senate who deny the power of the governors of Montana, Wyoming, and Washington to fill the vacancies in the Senate from those States that no such vacancies exist in the Senate, because the vacancies there did not "happen" in a constitutional sense: that the only "vacancies" the governors can fill are those that "happen" in the sense that word was used in the Constitution, and that is, that "happen" is a descriptive term, used by the framers of the Constitution to define particular kinds of vacancies—vacancies having a specific character imparted to them by the cause or event or fact that produced them; that the cause, event, or fact that produced the vacancies that "happen" in a constitutional sense is an accidental cause, an accidental event, an accidental fact happening by chance, that no power of foresight, forethought, or anticipation could discover, such as the resignation, death, or removal of a Senator.

The existence of vacancies in the Senate from those States mentioned must be admitted as a physical fact, shown by ocular demonstration. Each of these States has only one Senator, when the Constitution in mandatory language requires that each of them shall have two Senators. Neither is it denied that the constitutional right to two Senators is just as much impaired by a vacancy that exists from any cause as it is by a vacancy that happens by chance or accident. The framers of the Constitution must have known that any other vacancy was the same in effect as a vacancy that happens by chance or accident. They provided for a vacancy that happened by chance or accident, but a vacancy that was an anticipated certainty, like the termination of a six-year term on the 4th of March, they made no provision for filling except by an election by the State Legislature.

A vacancy that happened by chance or accident pending a six-year term could be filled in two ways—by an election by the Legislature or by an appointment by the governor. But vacancies that exist by operation of law, it is claimed by the minority, can only be filled by the Legislature, and that vacancies that happen in a six-year term by the occurrence of an unexpected fact can be filled by the governor or the Legislature. There is no conceivable reason for and no possible evil to be remedied by this difference in the power to fill vacancies in the Senate. There is about as much substance in the difference and reason for it as there is in the difference between tweedledum and tweedledee.

If we take Washington and Franklin among the dictionaries, with which the philologists in the Senate must presume these illustrious statesmen were familiar and must have frequently consulted to find fit and proper words to convey their exact meaning, we are unable to discover any word in the English language that could be preferred to the word "happen" to give expression to their full meaning as to the "vacancies" the executives were to have the power to fill in the Senate.

Mr. Whitney, the author of the Century Dictionary, has shown us much learning and research in his analysis of English words to ascertain their derivation and most reliable meaning as any philologist who ever published a dictionary. He enjoyed the advantage of having studied the dictionaries and works of all his predecessors, and his Century Dictionary is established as among the highest standard authorities.

In the Century Dictionary the word "happen" is defined in its particular and general meaning, and it embraces completely the accidental and chance causes and the causes that can be anticipated. "Happen," says the Century Dictionary: "1. To occur by chance: occur unexpectedly or unaccountably; in general, to occur; to take place." In other words, and unmistakably, the general definition in the dictionaries, "vacancies that happen to exist," as decided by every Attorney-General of the United States in analogous cases where the same words are used in the Constitution.

Mr. President, I will now call the attention of the Senate to the last cases involving the identical question now before the Senate, and which adjudications by the Senate would be treated as *res adjudicata* by any court in the United States. Speaking for myself, however, I have never considered that the principles and doctrines of *res adjudicata* could be applied and treated as conclusive upon Senators on a reconsideration of the same question involving the right of representation of a State in the Senate. But former decisions of the Senate, made upon full discussion and deliberation, are certainly entitled to great weight when the same question is presented on another hearing.

In 1879 the credentials of Charles H. Bell were presented, and recited that he had been appointed a Senator by the governor of the State of New Hampshire to fill the vacancy happening in the Senate of the United States by the expiration of the term of Bainbridge Wadleigh, on March 3, 1879, during the recess of the Legislature of said State.

A majority of the Committee on Privileges and Elections reported adversely to the right of Bell to be seated and based their decision solely upon the ground that the Legislature of the State was alone invested with the power of filling a vacancy happening at the beginning of a term of six years, and that the power of the governor to fill vacancies by appointment was confined exclusively to those happening during a term by causes that could not be anticipated.

After an able and exhaustive argument Bell was seated and the power of the governor sustained to fill the vacancy by a vote of 35 yeas against 28 nays.

In 1885 the credentials of Henry W. Blair were presented, showing that he had been appointed a Senator from New Hampshire by the executive to fill a vacancy in the Senate happening in the Senate on the 4th of March, 1885, during the recess of the Senate. The same identical question decided in the Bell case six years before was reargued and fully considered, and the power of the governor to fill the vacancy happening at the beginning of a new term of six years was again sustained by a vote of 36 yeas against 20 nays.

In March, 1893, before the Senate met in extraordinary session, the credentials of SAMUEL PASCO were presented and read to the Senate, and recited on their face that he was appointed by the governor of Florida to fill a vacancy in the Senate happening on the 4th of this month, in the beginning of a new term of six years.

The appointment was made by the governor before the vacancy happened on the 4th of March, during the recess of the Legislature, and before it could assemble to elect a Senator. The facts in the Montana and Wyoming and Florida cases are precisely the same, except that the cases of Montana and Wyoming are made stronger by the fact that the Legislatures in both States had made an exhaustive effort to elect Senators and were engaged in the effort when the life of both Legislatures expired by a provision of the constitution of each State, thereby making a vacancy by an event it was impossible to anticipate. Tell me why the Senator from Florida was seated without dissent from these Senators who now deny the right of the appointees from Montana and Wyoming to be seated. Where is the difference in principle between the four appointments by the governors of the States now represented by only one Senator?

The report of the minority must stand or fall on the broad ground that no power exists anywhere to fill a seat in the Senate that is vacated at the end of two, four, and six years except in the Legislature of the State, and that the only power a governor has to fill a vacancy is when such vacancies happen during the recess of the Legislature and pending the existence of the regular term that was filled at its beginning by the Legislature. And yet the Senator from Florida is now occupying a seat by the appointment of his governor that was vacated on the 4th of March by a law fixed and organic and absolute in causing a vacancy on a day certain. What can be the excuse for this discrimination in favor of Florida? The only suggestion of an excuse is that the Legislature of Florida was not in session and had not met before the seat was vacated, and by the constitution of the State no Legislature having the power to elect could meet until next month or some time after the seat was vacated.

Let us test the validity of this excuse for allowing the governor of Florida to fill a seat in the Senate at the beginning of a new term. If the power of the Legislature to fill such a vacancy resides only in the Legislature, as stated in the minority report, where does the governor of Florida get the power to appoint on account of the absence of a Legislature to elect? Is it a vacancy that "happens by resignation or otherwise" in the constitutional sense, as urged by the minority report? Certainly not, as the vacancy was caused by an event fixed by law and known to be absolutely certain to exist on the 4th of this month.

Why did not the governor of Florida call the Legislature together in extraordinary session to select a Senator? Did the framers of the Constitution ever imagine that a governor would call an extra session of the Legislature to fill a vacancy in the Senate? If so, why did they confer the power of appointment on the governor to fill a vacancy in the Senate that happened to exist from any cause at any time? They made it the governor's duty, and conferred on him the power to issue writs of election by the people when a vacancy happened in the House of Representatives. Why not authorize and require the governor to call the Legislature together when a "vacancy happened in the Senate, by resignation or otherwise, during the recess of the Legislature?" Was there no reason for this difference in the power of the governor to fill vacancies that happen in the Senate and in the House of Representatives? Let us make a further application of the rule of constitutional construction urged in the minority report.

According to that rule the event that confers power upon the governor to fill a vacancy in the Senate must have three indispensable qualities:

1. The vacancy must make a gap or vacuum in a six-year term.

2. The vacancy must "happen by resignation or otherwise"—that is, by an event like resignation, that can not be foreseen or anticipated—an event that happens by chance or accident.

3. That such a vacancy must happen as specified "during the recess of the Legislature."

As to the first quality: In the case of Florida, the event that caused the vacancy at the beginning of a term was known to be inevitable, and yet the governor appointed, and his appointee was seated on the first day of the new term. The same thing on the same facts was done in the cases of Bell and Blair from New Hampshire.

As to the second quality; the event must be incapable of being anticipated, like the resignation or death or expulsion of a Senator. In the cases of Montana and Wyoming, the Legislatures in both States "chosen next preceding the expiration of the time for which the Senators were elected" met and organized and proceeded from day to day in accordance with the act of Congress of 1866 to elect a Senator, and the members of each Legislature being unable to agree upon any person who could obtain the votes of a "majority of all the members elected to both houses being present and voting," the Legislatures were adjourned by the provision in the constitution of each State limiting the duration of their sessions.

It is claimed by some Senators that the Legislatures in Montana, Wyoming, and Washington failed to discharge their duty, and one Senator went so far as to say the Legislatures had refused to elect, and that the failure or refusal to keep the Senate full is chargeable to the Legislatures, who are responsible to their States for not supplying equal representation by two Senators. All the States in the Union are made to suffer by unjust and unequal taxation and extravagant appropriations because three States failed or were unable to elect their Senators to begin a new term, and thereby keep the Senate full for the equal benefit of all the States. The late bill known as the force bill would have been the law to-day if one Senator from any State opposed to such legislation had been kept out of his seat and the State deprived of its equal representation for the reasons urged against the seating of the appointees of the governors of Montana, Wyoming, and Washington.

Are Senators prepared to establish the rule, in utter contravention of the paramount object of the Constitution to keep the Senate full, that no vacancy exists in the Senate on account of the absence of one or more Senators that any Legislature in the State failed to fill when it had the power and the opportunity to elect a Senator?

Three or more parties exist by regular organization in several States. These parties are organized to favor or oppose specific measures, principles, and policies. Their differences are fundamental and irreconcilable. They all have the same right to their opinions, and feel the force of the same obligations to adhere firmly to their convictions and to be faithful to the people they represent in their State Legislatures. The representatives of each of these parties are in the minority; neither party has a majority or can secure a majority in the Legislature who will agree to vote for the same man for Senator. Neither of these parties will agree to surrender their opinions and convictions.

Is it right for the Senate to establish the tyrannical and arbitrary and inflexible rule that the three or more parties that have minority power in a State Legislature shall surrender their opinions and convictions and disregard their pledges and fidelity to their constituents and come to some agreement that will unite a majority on one person for Senator, or suffer the penalty of unequal representation and the impairment of the integrity and fundamental policy underlying the framework in our fabric of government?

As to the third quality of the vacancy, that it must happen during the recess of the Legislature: When the seat of the Senator from Washington was vacated the Legislature of that State chosen next before the 4th of March was in session, and had been many weeks before engaged in the effort to elect a Senator, and several days after the new term had commenced, and the seat in the Senate was vacated by the expiration of the last term, the Legislature exhausted all its power to bring a majority to agree upon one man for Senator, and were unable to do so up to the last hour the constitution of the State allowed the Legislature to continue in session.

When the Legislature expired by a constitutional provision the

vacancy made when it was in session continued to exist after the adjournment and during the recess of the Legislature. But the minority Senators may claim that the vacancy must happen as well by accident as during the recess of the Legislature, and that it is not enough that the vacancy exists during the recess of the Legislature. No continuing vacancy during the recess of the Legislature can confer power on the governor to fill it by appointment; it must happen during the recess.

Suppose that while a six-years' term is pending a gap or vacancy happens in it by the resignation, death, or expulsion of a Senator, and that at the time the vacancy happens the Legislature of the State is in session. The law of 1866 provides, in section 17, that—

> Whenever during the session of the Legislature of any State a vacancy occurs in the representation of any State in the Senate, similar proceedings to fill such vacancy shall be had on the second Tuesday after the Legislature has organized and has notice of such vacancy.

Suppose that in any State whose constitution limits the sessions of the Legislature a Senator resigns, dies, or is expelled while the Legislature is in session, and when it receives notice of the vacancy, and before the second Tuesday thereafter when the Legislature can proceed to fill the vacancy by electing a Senator, the duration of the legislative session is terminated by provision of the State constitution, then how can the governor fill the vacancy that happens when the Legislature is in session?

Mr. President, the importance of the question involved in the cases before the Senate is my apology for consuming so much time in its discussion as one of the members of the Committee on Privileges and Elections who made the majority report.

Mr. MITCHELL of Oregon. Mr. President, I desire to submit some remarks on this question, but I prefer not to go on to-day if it be the pleasure of the Senate to let the matter go over until to-morrow.

Mr. HARRIS. Will the Senator yield to me in order that I may move that the Senate proceed to the consideration of executive business?

Mr. MITCHELL of Oregon. I yield to the Senator from Tennessee for that purpose.

Mr. HOAR. If the Senator from Tennessee will pardon me, I wish to occupy a moment in calling the attention of the Senate to a statement which I may as well make now as at any other time.

Mr. HARRIS. Certainly.

Mr. HOAR. When the Bell case, which has been cited by the Senator from Alabama [Mr. PUGH], and which was the first of the recent precedents affecting this question, was before the Senate, I was charged with presenting the views of the minority, which were adopted by the Senate. The majority of the committee thought the governor of New Hampshire could not appoint a Senator for a vacancy existing at the beginning of a Senatorial term. The Senate, as is well known to everybody, held otherwise, and determined that Mr. Bell was entitled to the seat under the appointment of the governor, the Legislature of the State not having made a choice.

Mr. Blair afterward presented himself under the same circumstances, and on a full discussion the question was again determined the same way, and he was admitted to the Senate.

Then Mr. Marston, from the same State, claimed a seat under the same circumstances precisely, and was admitted without debate.

In the discussion of the first of these cases, Mr. Carpenter, of Wisconsin, proposed a question to me which I should like to have read at the Secretary's desk, and also my answer to the question.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

> Mr. CARPENTER. Will the Senator allow me to ask him a question?
>
> Mr. HOAR. Certainly.
>
> Mr. CARPENTER. I do it for information. I want to vote with the Senator if I can on this question. The difficulty in my mind is that I think the emphatic word in the constitutional provision is "happen." Take the case of Wisconsin. Our Legislature assembles on the first Monday of January. It has to elect to fill up the vacancy that is to occur in March. The Legislature generally sits until about the last of April. Suppose they begin on the day fixed by the act of Congress to ballot for Senator; they make no choice; they ballot up to and past the 4th of March without making an election. A vacancy then occurs; by the Constitution the term expires, and the Legislature sits still, with that vacancy running on, balloting for thirty days and unable to make a choice, and finally adjourns without making a choice. Could the governor then appoint a Senator upon the ground that that was a vacancy happening in the recess of the Legislature?
>
> Mr. HOAR. I think not; and for the reason not that it would not be a vacancy, but that the power is qualified by the other words, as uniformly construed, that the governor may appoint "until the next meeting of the Legislature." Therefore, if the Legislature should meet after the vacancy occurred, the governor not having appointed, and fail to elect, the literal answer would be that in the particular case the Senator supposes the vacancy would not have happened in the recess; but I suppose the Senator could easily vary that by supposing the Legislature not to be in session on a particular day, and therefore I make the other answer, which is that the governor's right to appoint until the next meeting of the Legislature is uniformly construed to mean that after the Legislature has met the entire constitutional authority of the governor, so far as relates to that vacancy, is gone.

Mr. HOAR. Mr. President, it will be seen that the question proposed to me by Mr. Carpenter did not affect the determination of the Bell and Blair cases, and that it had no relation to the determination of the first two of the three pending cases.

Mr. VANCE. It was *obiter dictum*.

Mr. HOAR. Yes. Mr. Carpenter put to me the precise condition which occurs in the case of Mr. Allen, of Washington. The Legislature of Washington sat until after the beginning of the term, till the 10th of March, continuing to ballot, and then adjourned, having failed to elect, the office being vacant on the 4th of March and thereafter.

It will be observed that that question was put to me in debate and that the answer was *obiter dictum*. Almost immediately on reflection after that debate was over I became satisfied that I had erred in that answer, and that the principle which I think affects all this class of cases—that is, that the Senate should be kept full—would require the Senate to give the broad construction which is proposed to be given in the case of Mr. Allen, of Washington; and I have myself made, I should think, a half dozen reports since where this general class of questions has come up; for instance, in the case of Mr. Chilton, of Texas, where the broad ground was taken. I have changed my mind in regard to the particular question propounded to me by Mr. Carpenter.

Mr. PLATT. I should like to inquire of the Senator from Massachusetts whether it was not agreed by everybody who discussed the Bell case, as well as by himself, that if a vacancy had happened during the recess of the Legislature, and the Legislature had met and refused or declined to fill that vacancy, the governor could not thereafter appoint. As I remember that discussion, Mr. Cameron of Wisconsin, who concurred with the Senator, admitted that distinctly, and I think every Senator whose attention was called to it admitted it.

Mr. VEST. Mr. Edmunds.

Mr. GRAY. Mr. Edmunds admitted it.

Mr. PLATT. Mr. Edmunds admitted it, and I think every Senator whose attention was called to the question, as well as the Senator from Massachusetts, in that discussion admitted that the governor would have no right to appoint under those circumstances.

Mr. VEST. If the Senator from Connecticut will permit me——

Mr. HOAR. The Senator from Connecticut has asked me a question, but I can defer the answer if the Senator from Missouri desires.

Mr. VEST. If the Senator from Connecticut will permit me, I will supplement his answer, and then the Senator from Massachusetts can reply to both of us. If Senators will turn to the record of proceedings in the Blair case in 1885, they will find that I stated in the argument I made then that the Legislature of New Hampshire had met and declined to elect, and it was admitted on all sides that the governor had no right to appoint. Both the Senators from New Hampshire immediately controverted the fact that the Legislature had met after the vacancy had occurred and had failed to elect, and by no Senator was it ever pretended that if the Legislature had met and had failed to elect then the governor could appoint.

Mr. HOAR. I am not prepared, without an examination of the RECORD, to controvert the statement of the Senator from Missouri or to answer the statement of the Senator from Connecticut in regard to anybody except myself. I supposed that the precedents of the Senate had settled the question that when a vacancy occurred the governor might appoint only to the end of the next session, but if the Legislature met, the governor having either once appointed or having failed to appoint in the case that I put, and there had been an intervening session of the Legislature, the constitutional power of the governor was gone.

I am satisfied now not only that there are no precedents or judgments of the Senate to that effect, but that the doctrine itself was a mistake, and that the only constitutional limitation on the power of the governor is to appoint until the next session of the Legislature, which has been held by the Senate to mean to appoint until the adjournment of the next session of the Legislature, and that a Senator so appointed vacating his seat when the Legislature adjourns, if there be no election in the mean time, the governor may make a new appointment.

In other words, my opinion is, both on principle and on authority, if the judgments of the Senate are authority, that the words "if a vacancy happen" mean if there be a vacancy, and the term "happen" does not, of course, apply to the expiration of the previous term, but to the fact that no Legislature has met and made an election in the mean time; and that then when there is a vacancy the governor may appoint until the end of the next ses-

sion of the Legislature, and if there is a vacancy after that he may appoint again and again.

I think that is the constitutional purpose. I think that is the answer to the question which would have been given by every member of the convention that framed the Constitution. I think it is the doctrine required by a consideration not only of the rights of the States but of the due and constitutional construction of this body.

I do not propose to address the Senate at length to-day, but I wished to call attention in the outset of the debate to the fact that this answer, given in haste to a question put in the midst of a speech on the other proposition, was an answer which I now do not adhere to.

Mr. GEORGE. If the Senator from Massachusetts will give me his attention, I wish to know if it be his position (I thought he expressed himself a little doubtfully on the subject) if the governor shall appoint and the Legislature shall meet and fail to elect and then adjourn, whether the governor shall then make a new appointment or whether the old appointment stands?

Mr. HOAR. I think the governor should make a new appointment.

Mr. GEORGE. So, in the Senator's view of the Constitution, whenever there has been a meeting of the Legislature and a failure to elect, even if the Legislature should meet annually for the whole term of six years, there must be a new appointment six times by the governor?

Mr. HOAR. Yes.

Mr. PLATT. Three times.

Mr. HOAR. I will answer the question if the Senator will permit me. That is exactly my proposition, if I correctly understand the point of the question of the Senator from Mississippi. Whenever there is a vacancy in the Senate the Legislature being in session must fill it, but if they can not fill it because of failure to agree between the two houses in old times, or a failure to agree where there were three candidates, upon any one by the friends of any two, it is an inability and not a refusal in my judgment. Then comes in the authority of the great representative of the sovereignty of the State in many other matters of importance, and the Senate has its representation and the people of the United States have their Senate, which they are entitled to. All the States are entitled to a Senate consisting of two persons from every State.

I am gratified that this question now arises under circumstances where it can be settled without any thought or imputation of partisanship upon any Senator delivering his judgment, because, although it happens there are two Republicans and one Democrat affected by these three reports, there is a Senator in this body who took his seat on the 4th of March without question whose title depends upon virtually the same thing.

Mr. HIGGINS. A Democratic Senator?

Mr. HOAR. Yes. So the rights to their seats of two Democrats and of two Republicans are dependent upon this general principle.

Mr. PLATT. Mr. President——

Mr. VEST. If the Senator from Connecticut will permit me, I wish to make a single remark in reply to the Senator from Massachusetts, and the Senator from Alabama, who made the same point, and that was, that we sat here silently and permitted the Senator from Florida [Mr. PASCO] to be sworn in without question. After the decision of the Blair case in 1885, which affirmed the decision in the Bell case in 1879, I have been so well satisfied that the opinion of the Senate was against me upon this question that I have never raised it; not that I ever gave up the correctness of my opinion, but because I considered it useless to bring it before the Senate again. The successor of Mr. Blair, or rather, I believe, the intervening Senator between Mr. Bell and Mr. Blair, was sworn in without opposition.

Mr. HOAR. No; first Bell, then Blair, and then Marston.

Mr. VEST. Marston was sworn in without opposition.

Mr. HOAR. The last.

Mr. VEST. I have not changed my opinion on the subject, because I did not object to the swearing in of that Senator, and the Senator from Florida himself knows that I affirmed to him privately my opinion that he was not entitled to a seat on this floor, in my judgment, although the ruling of the Senate in the Bell case and the Blair case had been otherwise. I did not raise the question, but I never considered myself estopped from doing it at any time if I saw proper to raise it.

Mr. HOAR. The Senator certainly did not understand me—I do not know what the Senator from Alabama said on that point—as implying that any Senator had committed himself by his silence. All I said was that it was fortunate the question arose when there could be no imputation of a partisan judgment upon anybody, because the question affects two persons on each side of the Chamber. That is all I said.

Mr. VEST. Exactly, and the Senator from Alabama used it as an argument.

Mr. HOAR. No; not the least in the world.

Mr. VEST. The Senator from Alabama did; not the Senator from Massachusetts.

Mr. HOAR. I do not know about that.

Mr. PLATT. Mr. President, of course I do not want to discuss this question now, but since the Senator from Massachusetts has frankly admitted what the logic of the majority report drives every Senator to admit, namely, that where a Legislature has met after a vacancy has happened during the recess of the Legislature and failed to fill it, still the governor has power to make the appointment, and so on, after every successive Legislature has failed, to still keep making appointments until the six years expire, I desire to say just one thing in reply, and that is, that any such construction of the Constitution reads out of it what I think is the controlling clause in this whole matter. I wish to refer to it:

> The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years.

If it be so, that, the Legislature failing to act and fill these vacancies, the governor at the close of each Legislature so failing to act can make appointments and thus fill out the whole term of six years, you might just as well strike out that clause of the Constitution, which I think is the controlling clause. I want to say—because I think perhaps this is the important thing in the whole discussion—that any construction of the Constitution which makes it possible to take away from the Legislatures of the States the power of choosing Senators must be a wrong construction.

Mr. HOAR. I may be allowed to observe, in reply to my friend from Connecticut, that there is no human or constitutional power to take away from a Legislature its right to fill these vacancies, but it may be an impossibility. Now, here are two bodies who, until the statute of 1866, when Senators were required to be elected by joint ballot, must concur. They are two persons, artificial persons it is true, but persons moved by the sense of public obligation of duty, with the right of choice. They are moved by an obligation to the constituency that elected them to carry out their views. Suppose it happens that the house of representatives in a State think it a destruction to everything that is of interest and of importance to the public to have Mr. A sit in the Senate, and prefer Mr. B, and the other body think it is equally destructive to have Mr. B sit in the Senate and prefer Mr. A. One body think a protective tariff is a monopoly, a robbery, bringing the country to destruction, enriching the few for the benefit of the many.

Mr. GRAY. At the expense of the many.

Mr. HOAR. Yes; enriching the few at the expense of the many, to their injury. The other body think this same policy is essential to the comfort of every workingman's home. Is a Legislature to be said to refuse to execute its constitutional duty when that condition of things which has happened in this country again and again exists? It is as much an impossibility to honest men on either side as if they were manacled and fettered or their tongues cut out before they were asked to make the answer.

Mr. MITCHELL of Oregon. May I ask the Senator a question?

Mr. HOAR. Let me state this proposition, if you please. Therefore, I do not conceive that the controlling clause is what my friend from Connecticut thinks it is, that the Legislature shall choose, and that that is to interpret every word and sentence and arrangement and part of the mechanism of the Constitution. I think that the controlling clause is that there shall be a Senate, and that in that Senate every State shall have an equal representation, not that Connecticut shall have one man while Texas has two. That is the controlling clause, and that is a clause which is put in for the benefit not of a particular State and not of a particular State Legislature, but for the benefit of the whole people of the United States alike.

The controlling clause is that there shall be a Senate. It is a clause which the framers of our Constitution deemed of so much importance, that while the American people have the constitutional power, a power incident to all self-government, to change every other thing in the Constitution by the action of three-fourths of the States and two-thirds of their representatives in this and the other Chamber, this provision, that there shall be always, every hour and every instant, as far as human ingenuity will contrive a means of it, two Senators sitting in this Chamber when it is in session, can not be changed unless every single State, Nevada and Rhode Island as well as New York and Pennsylvania and Ohio, agree.

Mr. MITCHELL of Oregon. Now, will the Senator answer a question? The Senator from Massachusetts insists in his report and in his argument that the great purpose of the framers of the

Constitution in providing that the executives of States might appoint to vacancies in the Senate was that the Senate might be kept full. That the Senate "may be kept full, always full," is the language of the report of the Senator. He emphasizes that position here to-day in his argument, and he builds his whole superstructure upon the theory that the sole purpose of the constitutional convention was that the Senate should always have two Senators from each State.

Now, the question I desire to ask the Senator is, Does the construction the Senator places upon the Constituti on result in that? Will that construction, if adopted by the Senate and enforced by the States respectively to its fullest extent, always, under all circumstances, keep two Senators here from each State?

Mr. HOAR. Yes; so far as human ingenuity can bring it to pass.

Mr. MITCHELL of Oregon. What does the Senator mean by so far as human ingenuity can bring it to pass? Does he mean that it will keep two Senators here all the while except for the little time that it may take a Legislature, if it happens to be in session, to elect a Senator and that Senator to come to the Capitol to be sworn in in the one case, or in the case of a governor so long as he, the governor, is required to have notice of the death or resignation or expiration of the term and shall have time to make an appointment and that appointee get here and take the oath? Does the Senator mean that?

Mr. HOAR. The Senator's question seems to have a pretty large beam and a very small scale. If I understand the Senator I do mean that exactly.

Mr. MITCHELL of Oregon. The Senator does mean that?

Mr. HOAR. If I understand the Senator correctly.

Mr. MITCHELL of Oregon. I will show in a moment, I think to the satisfaction not only of the Senator from Massachusetts but to the satisfaction of every other Senator here, that even under the construction for which he contends cases may occur where a State would be nearly two years with but one Senator. I will state a case. The Legislatures of a great many of the States convene biennially, none of them more than once a year, and many of them, especially in the West, convene but once in every two years. My own State for instance is in that condition.

The Legislature of the State of Oregon adjourned two or three weeks ago. It will not meet again, unless convened in extraordinary session by the governor of that State, for two years, lacking two or three weeks, whatever time has elapsed since the Legislature adjourned. Suppose that to-day either my colleague or myself should die, or be expelled, or resign, there would be a vacancy which not only the Senator from Massachusetts but every other Senator here on both sides of the Chamber will concede the governor would have a right to fill by temporary appointment.

Now, suppose our respected governor in Oregon, following in the path marked out by the three Legislatures of Montana, Wyoming, and Washington, should say, "I will not appoint anybody"—in other words, would do just what the Legislatures have done in those States, fail to perform a constitutional duty. His friends go to him and say, "Governor Pennoyer, if you will not do that, then it is your duty to reconvene the Legislature of Oregon in extraordinary session, for the purpose of filling the vacancy that has occurred." He says, "I will not do that, either;" and by refusing to appoint and by refusing to convene the Legislature the seat made vacant by my death, expulsion, or resignation remains vacant for two years under the construction the Senator applies to the Constitution.

Mr. HOAR. Under the Senator's construction also.

Mr. MITCHELL of Oregon. Under mine also; but the difference between the Senator and myself is, he is contending that the great purpose of the Constitution was that there should be always two Senators in their seats here from each State. I do not contend that that was the purpose. I say that was not the controlling purpose.

Mr. HOAR. Now, Mr. President, if I am not trespassing upon the patience of the Senate too much, I will state that the proposition of the honorable Senator from Oregon was answered on this floor a generation ago by Daniel Webster, in his great debate with Mr. Calhoun, in which he expressly said that the whole Constitution depended upon the sense of duty and obligation of the State officers. He pointed out that the members of State Legislatures and the executives of the States were bound by the same oath of office and the same constitutional obligation that the Senators here or members of the other House were bound by, and if that sense of personal duty failed to operate and the States failed to send Senators to this Chamber, then he said, rather hesitatingly, things would occur which would bring to an end certainly any other government on the face of the earth.

Mr. MITCHELL of Oregon. But the doctrine was it must depend on the consciences of the members of the Legislature.

Mr. HOAR. That is exactly it. The distinction between the case the Senator puts and the case I put is that I put the case of a clear impossibility for men acting as honest men to choose. We have put the constitutional constraint upon the members of a Legislature by the statute of 1866, providing that if either House refuse to elect or the houses do not concur they shall meet in joint ballot; but when a majority fail to agree upon any Senator that is not a case of refusal.

It is a case of conscientious impossibility, where men are acting under their sense of public obligation, and that is one of the cases which the Constitution properly provides for. The case the Senator from Oregon puts is a case of a great public officer refusing to perform his sworn constitutional duty. He says: "I will neither appoint, nor will I call the Legislature together to elect." That is an impeachable offense.

Mr. MITCHELL of Oregon. Will the Senator allow me to ask who is to determine? Are we, as a Senate, to sit here and determine whether the Legislature where they have failed to elect did it wantonly, or did it because they were unable to agree? Can we pass upon that question here?

Mr. HOAR. Not at all here——

Mr. MITCHELL of Oregon. Who will determine it?

Mr. HOAR. But the presumption is that they could not agree and there is no Senator chosen, and therefore the Constitution has provided for filling the vacancy by the executive.

Mr. VILAS. Mr. President——

Mr. HOAR. I am answering the question of the Senator from Oregon, and I say again that he supposes what is applicable to every government, if it can be presumed, and that is, that an officer appointed, with a great public obligation, wantonly and in violation of his duty and in violation of his oath of office, refuses to act. Suppose the question was whether the Supreme Court of the United States had jurisdiction over a certain class of constitutional questions, and I were to come in here and say, "Why, if that court has not jurisdiction over that class of questions they can not be considered; no other court has jurisdiction; and therefore, in doubtful language, of course, we would suppose it was meant to give it to them."

The Senator from Oregon might just as well reply to such an argument as that, "What are you going to do if the Supreme Court refuses to decide a case that is before it?" Or suppose the power was given to the Chief Justice of the United States. The Chief Justice of the United States is the officer to preside over this tribunal if the President of the United States be impeached. The Senator from Oregon might as well turn on me and ask me to interpret some question depending upon an argument like this in a process of impeachment by saying, "What are we going to do if the Chief Justice of the United States refuses to attend and to preside?" The answer is, "We will impeach him;" that is all.

Mr. MITCHELL of Oregon. Now, just a moment. I was endeavoring to show that while under the construction placed on the Constitution by the Senator from Massachusetts the Constitutional Convention had undertaken to provide a substitute who should appoint a Senator in case the Legislature whose constitutional duty it was to choose a Senator failed to perform the constitutional function——

Mr. HOAR. Mr. President.

Mr. MITCHELL of Oregon. I do not yield now.

Mr. HOAR. I beg pardon.

Mr. MITCHELL of Oregon. The Constitutional Convention desired to do that thing in reference to the Legislature, and did do it as a matter of fact, as the Senator thinks they did in the provisions they adopted. Then if the great purpose was to keep the Senate always full and always have at all times two Senators here, why did they not provide by some provision for some power, some tribunal, some officer that should designate a Senator to sit in the Senate with his colleague in the event the governor failed to appoint or failed to reconvene the Legislature?

Mr. HOAR. Because in the case of the Legislature they provided a body that with all the constitutional purpose to do their duty may be unable to do it by failing to agree, and therefore they very properly provided for that case by referring it to the executive. When you get to the executive you have got to a body, to a person, to an authority, to a power that can not be unable to perform the duty, that has the ability. It is only a question of sheer refusal to do a constitutional duty, and the Constitution can not provide for that in regard to any officer whatever. Suppose the President of the United States says he will not do his duty?

Mr. VILAS. I should like to invite the attention of the Senator from Massachusetts to one view in reference to the question which has been asked by the Senator from Oregon. It has been determined by the courts in England and many times by the courts in this country—the Supreme Court of the United States as well as by the supreme tribunals of several of the

States—that whenever a public officer is charged with the performance of a public duty for the common benefit of the public at large any citizen has a right to invoke the judicial tribunals to compel him by mandamus to perform that duty. The question is, when the Constitution, after having considered that the legislative power might, not by refusal but by the inability which the Senator from Massachusetts has justly characterized as being a failure to elect, fail to fill the vacancy, thereupon devolved the duty upon the governor, whether he could not be compelled by the supreme court of the State at the suit of citizens, or any citizen suing in behalf of all interested, to discharge the duty which he refused to perform?

Mr. GRAY. May I ask the Senator from Wisconsin a question?

Mr. VILAS. Certainly.

Mr. GRAY. I ask him whether his proposition is that where a vacancy happens in the recess of a Legislature and the governor may temporarily appoint a person to fill such vacancy, the constitutional provision imposes upon the governor in the interest of the public of the State such a duty as a supreme court having that prerogative will compel the performance of by mandamus, the language being "may" and not "shall."

Mr. VILAS. I suppose that I can ask of no lawyer in the Senate rather than the Senator from Delaware the admission that the word "may" always means "must" when it imposes upon or grants to a public officer a duty for a public purpose. The authorities are overwhelming upon that point, I believe, and I speak only from them.

Mr. PEFFER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Kansas?

Mr. PEFFER. For a question.

Mr. VILAS. Certainly.

Mr. PEFFER. I desire to ask the Senator from Wisconsin by what process such a proceeding would be instituted. The Senator, I understand, alleges that in the case about which we are speaking the governor might be compelled by a writ of mandamus to perform the duty of appointing a Senator. The question I ask is, by what means, by what process, could such a proceeding be instituted, and by whom?

Mr. VILAS. I have already indicated that. It has been so often discussed, that it may now be said to be settled law that a public duty imposed upon a public officer for the common benefit of the public may be enforced by a judicial tribunal at the suit of any citizen interested as one of the community in the performance of that duty.

Mr. MITCHELL of Oregon. Suppose you could mandamus the governor of a State, which I deny as far as I am concerned individually. Suppose a proceeding was commenced on the part of certain citizens in a proper court and a peremptory mandamus issued by that court directing the governor to appoint a Senator, or if not that, directing him to reconvene the Legislature in session, and suppose the governor failed to obey the mandate, what could you do? How would you get the Senator? That is what I want to know.

Mr. VILAS. Whenever you enter into the construction of a great instrument like the Constitution there are two elements that require acknowledgment. One is the infirmity of human foresight and the other is the poverty of human language. It may be that constitution-makers did not reach to the ultimate possibility that the executive force would be found disobedient to the judicial mandate, the executive being by the constitution and the laws peculiarly and especially charged with the execution of judicial authority and direction. When the time comes that the greatest officers of the State shall pay no regard to the ultimate judgment of the highest tribunals of the States we may well conceive that our Government has ceased to be one of law and become one of anarchy.

But I only intend in what I have said a mere suggestion for the examination of any interested in it.

Mr. HARRIS. If no other Senator is inclined to occupy the floor at this time, I move that the Senate proceed to the consideration of——

Mr. PLATT. I have been endeavoring for the last half hour to get an opportunity to make a reply to a single suggestion of the Senator from Massachusetts [Mr. HOAR].

The VICE-PRESIDENT. The Chair recognizes the Senator from Connecticut.

Mr. HARRIS. I withdraw the half sentence I have uttered, and shall not utter it again to-day.

Mr. PLATT. Mr. President, the failure in the argument of the Senator from Massachusetts, in his reply to the Senator from Oregon [Mr. MITCHELL], is this: He assumes that the Constitution places upon the governor of a State an absolute duty to make an appointment to fill a vacancy which happens in the recess of the Legislature. I conceive that it places no duty whatever upon the governor of a State to make an appointment; and I think it is announced now for the first time in all the discussions on these questions, running back nearly a century, that there is any obligation or duty imposed upon the governor of a State to make the appointment.

The Senator from Wisconsin [Mr. VILAS] seems to have fallen into the same error. Each of the Senators holds that the word "may" in the Constitution means "shall." The very discussion in the Constitutional Convention, which was alluded to by the Senator from Alabama [Mr. PUGH] in his speech to-day, shows that that was not the intention, that that was not the meaning of the word "may" as used in the Constitution. The language is this:

> And if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

Mr. Ellsworth, when this matter was under discussion in the Constitutional Convention, in reference to that point said:

> It is only said that the executive may supply vacancies. When the legislative meeting happens to be near, the power will not be exerted.

If the controlling purpose of the Constitution was to keep the Senate full, why did not its framers use the word "shall"—"the governor shall make temporary appointments until the next meeting of the Legislature"?

Then, immediately after, when the Constitution refers to the Legislature filling vacancies, it does use the word "shall:"

> The executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

The distinction being taken in the clause itself. In the discussion of it, Mr. Ellsworth, a member of the Constitutional Convention from my own State, put that interpretation upon the word "may," when he said that if the meeting of the Legislature was near the power of the governor would not be exercised.

Mr. MITCHELL of Oregon. I now yield to the Senator from Maryland.

Mr. GORMAN. I understand the Senator from Oregon does not desire to go on with his remarks until to-morrow?

Mr. MITCHELL of Oregon. I desire to take the floor to-morrow.

Mr. GORMAN. With the permission of the Senator, I will present some reports. Let the pending question go over until to-morrow by common consent.

Mr. MANDERSON. What is the motion? I thought the Senator made a motion.

Mr. GORMAN. The Senator from Oregon has taken the floor, and desires to proceed on the pending question to-morrow. The resolution will go over until to-morrow, as I understand.

Mr. GEORGE. With the permission of the Senator from Oregon [Mr. MITCHELL] I should like to state a difficulty which I have in the constitutional construction which has been placed upon the clause now under consideration by some members of the Senate.

As was well said by the Senator from Connecticut [Mr. PLATT] in opposition to the suggestion made by the Senator from Wisconsin [Mr. VILAS] that the word "may" in this clause should have the construction of "shall" or "must," in the very same clause of the Constitution in which it is said that the governor may make temporary appointments when it comes to impose a duty, the Constitution in its very next language says the Legislature "shall" elect.

It is one of the fundamental rules of construction, of constitutions at least, when two phrases are thus brought into juxtaposition with reference to the same subject-matter, and when those two phrases in their ordinary signification have different meanings, that it is not within the just power of a construing body to give to both phrases exactly the same meaning——

Mr. HOAR. Will the Senator allow me to ask him a question right there?

Mr. GEORGE. In a minute.

Because we are to presume that when the framers of the Constitution said "may" with reference to the appointment of the governor, and in the very same sentence and in the language following as applied to the Legislature they say "shall," it is not within the power of rational and reasonable construction to say that in this change of language the framers of the Constitution meant identically the same thing, and there is no instance which has been pointed out, or I believe can be pointed out, in the Constitution, where the word "may" has legitimately the construction of "shall," especially so in reference to elections. In every single instance in which the elections of Senators and Representatives are spoken of in the Constitution the word "shall" is used, and not the word "may."

Now I will give way to the Senator from Massachusetts.

Mr. HOAR. I want to ask the Senator a question, and call his

attention to a clause in the Constitution on the same page, if he will allow me.

Mr. GEORGE. Certainly.

Mr. HOAR. On the first two lines of page 39, the very page where this matter we are discussing occurs, is this:

Representatives and direct taxes shall be apportioned among the several States which may be included within this Union.

Does the Senator think the word "may" means something different there from what it would if the language read "the several States which shall be included within this Union"?

Mr. GRAY. The word "shall" could not be properly used there.

Mr. HOAR. I was asking the Senator from Mississippi.

Mr. GEORGE. There is no duty imposed on any one or attempted to be imposed upon any one by the words "may be."

Mr. HOAR. The Senator says they must have different meanings if different words are used in the same clause. Here are two different words in the same clause which have the same meaning.

Mr. GEORGE. The word "may" was used there because of the fact that there may be at one time one number of States and at another time another number of States, and it was used to express that idea; but the difficulty in this matter, which I desire to suggest to the attention of Senators who have given this subject more attention than I have, is this: Senators have assumed, especially has the Senator from Massachusetts [Mr. HOAR] assumed, and so far as I can see—and I want to call his attention to it—without any authority in the Constitution for that assumption, that the Constitution provides that the Senate shall always be full, that there shall always be two Senators from each State. There is no such provision in the Constitution.

I want to call the attention of the Senators to the exact provision on that subject. Article I, section 3, of the Constitution, the first provision which relates to the Senate of the United States, reads as follows:

The Senate of the United States shall be composed of two Senators from each State—

Now, if that clause of the Constitution had stopped there, I admit there would be some slight ground for the assumption of the Senator from Massachusetts—

shall be composed of two Senators from each State—

But, sir, there comes another clause which is fundamental in its character, which qualifies that—

two Senators from each State, chosen by the Legislature thereof.

That is the mandate of the Constitution, that "the Senate of the United States shall be composed of the two Senators from each State"—not at all events, not elected or selected in any way that may suit the convenience of the States, but "composed of two Senators from each State, chosen by the Legislature thereof;" and it is as much the fundamental idea of the Constitution that the two Senators from each State shall be chosen by the Legislature thereof as that there shall be two Senators.

So I assume, unless some argument can be produced which I have not heard, that the broad proposition, which is likely, if not well considered, to mislead the minds of Senators upon this subject, that the meaning of the Constitution is that the Senate shall always be full, and always be composed of two Senators from each State, is not true except *sub modo*, except they be chosen by the Legislature of each State. That is the mandate of the Constitution. If there were no other clause in the Constitution in relation to Senators than the one to which I have called attention, it would be utterly impossible to seat a member in this body unless he be chosen by the Legislature.

There is another idea which was brought out by the answer of the Senator from Massachusetts to the question which I propounded to him to which I desire to call the attention of the Senate.

Before I get to that idea, however, I will state that it is as much the fundamental policy of the Constitution that the Senators composing this body shall be chosen for six years as it is that there shall be two Senators and they be chosen by the Legislature.

In the adjustment of political forces in the Legislature of the Union, in Congress, it was a main object of the framers of the Constitution that there should be one body directly responsible to the people with short terms, and the term of those Representatives is fixed at two years. It was a part of the scheme of the Constitution, and as important a part of the scheme of the Constitution as any other part of it, that when we came to the Senate, for the purpose of giving more stability to the deliberations of one branch of the Legislature, the members of that branch should have a longer term than was given to the others. And for the manifest purpose, as expressed in the debates in the Constitutional Convention, that there should be one body with a long term, which would not be swayed by every wind of popular passion and popular prejudice.

So I wish to call the attention of the Senate to that fact, that the term of six years for Senators is one of the fundamental ideas of the Constitution, one of the schemes which the framers of the Constitution resorted to for the purpose of having proper legislation.

Now I come to the answer made to my question by the Senator from Massachusetts. His answer is the logical sequence of his position. His answer was that in case a temporary appointment was made and the Legislature met and failed or refused—I do not care which word you use—to make an appointment or to make an election, then the term of the Senator who had the temporary appointment ceased, a new vacancy arose, and then there was to be another appointment, and so on through the whole series of six years, whereby this very remarkable result would follow—a result, too, in direct contradiction of the policy of the Constitution—that instead of having a Senate composed of two Senators chosen by the Legislatures of the several States for the term of six years, we should have more or less, according to the fault or default of governors and Legislatures, a Senate composed partly of men who held their term of office by appointment from governors of States and for terms less than six years. So the whole term of six years assigned by the Constitution to a Senator might in a State—and there are several of that sort—where the Legislature met annually be filled by six temporary appointments, each appointee holding his term only for one year. I wish to call the attention of Senators to that difficulty in the matter.

I did not intend to go into this debate this morning, but only to state the difficulties which have arisen from a plain departure, as I am bound to say, from the plain language of the Constitution by which we get into these difficulties. First, if we adopt the contention of the Senator from Massachusetts, we abolish the fundamental rule of the Constitution that two Senators shall be chosen from each State by the Legislature thereof for the term of six years; we get rid of that entirely, and we have a Senate composed of temporary appointments, or largely composed of temporary appointments, for short periods of time, directly in the face of the main and fundamental provision of the Constitution.

Now we come to the exception. Notwithstanding that main and primary provision, we have an exception. What is that? That if vacancies occur during the recess of the Legislature—I want to get that exactly right, and I shall read the language of the Constitution:

If vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State—

What is the plain meaning of that? Can there be any doubt about the meaning of that? There must be a vacancy happening, and that happening must be during the recess of the Legislature. Recollect, Mr. President, we are now talking about an exception to the general rule fixed by the Constitution.

If vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State—

That must occur. Unless that occurs there is no power anywhere granted by the Constitution to fill a vacancy. Then what happens?—

the executive thereof may make temporary appointments—

Not "shall"—

until the next meeting of the Legislature.

Originally there was doubt and dispute as to the termination of the executive appointments. It was insisted that these temporary appointments expired on the day that the Legislature met, and that idea was entertained by some of our ablest statesmen, but for convenience it was finally held that the Legislature was to be considered as being held only for one day, or, in other words, I believe according to the rule of the British Parliament, where all the statutes passed during a session of Parliament, which may have lasted say for months, even though passed on the last day of the session took effect from the first day.

On that sort of an idea it was held and settled that the appointment did not expire on the first day of the session, but only on the last day, in case there was no election in the meantime. We have got that much, contrary to the plain meaning of the words of the Constitution. I accept that as settled. It has been settled over and over again. But what next does the Constitution say?

The executive thereof may make temporary appointments until the next meeting of the Legislature—

When that Legislature meets, then what? I will read the language:

which—

That is the Legislature—

shall then fill such vacancies.

When the plain mandate of the Constitution is that when the Legislature meets it shall then fill the vacancies, how are we to get at the conclusion that if the Legislature fails to discharge

its constitutional duty to fill the vacancy then somebody else may fill it? That is exactly the position of the majority of the committee in this case, because they say it is inconvenient to have a vacancy in the Senate, because they say—and that, too, without warrant in the Constitution—that the Constitution says that the Senate shall always be full, when the Constitution only says that there shall be "two Senators from each State, chosen by the Legislature thereof." On account of that misconception they say that when the Constitution says the vacancy shall then be filled by the Legislature, they assume or reach the conclusion that if the Legislature will not do it, then the Constitution meant as if it had read in this way "which shall then fill such vacancies," and if they fail to do it, then the governor may again appoint.

Mr. President, I submit to honorable Senators to do away with this idea of convenience, to look to the mandate of the Constitution, and when they do that they will find that the authority to fill a place in this body is plainly fixed, first, in the Legislature as a duty which they can not avoid or evade without a disregard of their constitutional obligations; and then in order to fill up a hiatus from a vacancy happening—some time or other I shall talk a little more about that, but I will not do it to-day—during the recess—not at any other time—the governor may appoint. Instead of that being the rule, they argue, in order to carry out a supposed theory of the Constitution, that the Senate shall always be full, that the power shall be conferred upon a governor to fill a seat in this body without warrant in the Constitution.

Mr. President, I insist, with due respect to those who differ from me, that it is as important to the stability of our Government and to the rights of the American people that the Senator who takes a seat in this body shall take it by an authority authorized by the Constitution. That is more important than this chimerical idea, not found in the Constitution, that somehow or other at all events, whether in accordance with the Constitution or against it, we must always have two Senators here representing each State. We do not help the States or maintain their just right to representation in this body by seating as their representatives men selected by agencies not authorized by the Constitution.

Mr. GORMAN. As the Senator from Oregon [Mr. MITCHELL] has taken the floor and wishes to address the Senate to-morrow, I suppose the pending resolution will go over. I therefore ask the privilege of the Senate to make certain reports from the Committee on Printing for the printing of certain documents, and I shall ask the present consideration of each.

Mr. MANDERSON. The Senator asks unanimous consent for their consideration, I understand?

Mr. GORMAN. I ask unanimous consent for their consideration at the present time.

The VICE-PRESIDENT. The reports referred to by the Senator from Maryland will be received in the absence of objection.

REPORT ON FAILED NATIONAL BANKS.

Mr. GORMAN. I report from the Committee on Printing the resolution submitted by the Senator from New Hampshire [Mr. CHANDLER] on the 20th instant for the printing of the report of the Committee on Failed National Banks; which I ask may be considered at this time.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That there be printed and bound in paper covers, for the use of the Senate, 2,250 copies of the Report No. 1286, of the Committee on Failed National Banks, made at the second session of the Fifty-second Congress, with the testimony accompanying said report.

REPORT ON IMMIGRATION.

Mr. GORMAN. I also report from the Committee on Printing the resolution submitted by the Senator from New Hampshire [Mr. CHANDLER] on the 20th instant, for the printing of the report of the Committee on Immigration, for which I ask present consideration.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That there be printed and bound in paper covers, for the use of the Senate, 1,000 copies of the Report No. 1333, of the Committee on Immigration, made at the second session of the Fifty-second Congress, with the testimony accompanying said report.

IMMIGRATION AND CONTRACT-LABOR LAWS.

Mr. GORMAN. I am also directed by the Committee on Printing to report the resolution submitted by the Senator from New Hampshire [Mr. CHANDLER] on the 9th instant, for the printing of extra copies of the act "to facilitate the enforcement of immigration and contract-labor laws of the United States," etc.; which I ask may be considered at this time.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That there be printed for the use of the Senate 2,000 copies of the act of March 3, 1893, "to facilitate the enforcement of the immigration and contract-labor laws of the United States," supplemented by Senate Report No. 787, of the first session of the present Congress, which accompanied the bill when reported to the Senate.

NATIONAL UNIVERSITY.

Mr. GORMAN. I am also instructed by the Committee on Printing to report the resolution submitted by the Senator from Vermont [Mr. PROCTOR] on the 9th instant, for the printing of extra copies of the bill "to establish a national university," and of the report thereon; which I ask may be now considered.

The resolution was considered by unanimous consent, and agreed to, as follows:

Resolved, That 5,000 copies of Senate bill No. 3824 "to establish a national university," and of the Senate report thereon, be printed in document form for the use of the Senate.

CHARGES AGAINST SENATOR POWER.

Mr. POWER. Mr. President, I rise to a question of personal privilege, and wish to make a brief statement.

Mr. MANDERSON. I hope the Senator will ask unanimous consent that he be heard, as there is now pending a question of the highest personal privilege, which under the rules must be continued. There will certainly be no objection to the Senator's request, but I wish he would put it in that form.

Mr. POWER. I shall do so. I ask unanimous consent to be heard.

The VICE-PRESIDENT. Without objection, the Senator from Montana will proceed.

Mr. POWER. Mr. President, the Senate have no doubt seen the Washington Post of this morning. My success in party strife has caused a competitor to try to vent his spleen on me through the press and in every conceivable manner possible. These attacks have been made continuously since my election to the Senate. Out of respect to my State, the country, and the Senate, I can not allow these aspersions to go without notice, and will be brief.

While it may be humiliating, under the circumstances, I respectfully court the most careful and thorough investigation by a special committee on every statement and insinuation; in fact, as a member of this body, I demand it. In naming this committee, I would most respectfully ask that the cause of the remarks made by the Senator from Indiana [Mr. TURPIE] be thoroughly looked into. He saw fit, in his speech delivered during the contest before the Senate in which I was interested, to use language that does not become a Senator, unless he can prove at least some of the allegations made. I ask this, believing that the Senator does not want to do anyone an injustice knowingly.

Mr. VEST. I have the kindest possible feeling for the Senator from Montana [Mr POWER]; he knows that; therefore anything which I say is not at all personal to him. I have, however, very decided opinions in regard to this thing of asking for examination by committees as to newspaper statements.

I remember once several years ago—I can not give the exact date—when one of the Senators from Louisiana, Mr. Kellogg, rose as the Senator from Montana has risen here to-day, read a newspaper article assailing his personal character, demanded a committee, and offered a resolution calling for a committee to investigate the charges.

The Senator from Ohio then with us, Mr. Thurman, stated my opinion so exactly—and it will be found in the RECORD—that I simply repeat it. He said then what I think will suggest itself to the good sense of every Senator and the public at large, that if the Senate of the Uuited States is to appoint committees to enter into the investigation of all personal charges against Senators in the public press, we might as well dismiss all other business and go into that matter exclusively.

There is not a Senator on this floor who has not been libeled in one way or another from one motive or another. If the Senator from Montana can rise here and demand a committee of investigation and have one, why, as a matter of course, that makes it incumbent on all the balance of us to do the same thing.

As the Senator from Ohio then said, I say now, the courts of the country are open to all Senators. They have no more privileges than any other citizens. If they see proper to establish their characters by judicial proceedings, they can do so. They can institute actions for libel or actions for slander. As long as that is the case, it is absolutely unnecessary, it seems to me, to talk about a committee of investigation.

Mr. GRAY. I did not quite understand the proposition of the Senator from Montana, and I rose for information. Of course I shall not object to any demand he makes for an investigation in regard to a personal charge, but I did not quite understand whether the charge he wishes investigated is one recently made in the public press or the charge to which he alluded as made by the Senator from Indiana [Mr. TURPIE] some two or three years ago.

Mr. POWER. I referred to the remarks of the Senator from

Indiana, but should not have referred to them at this time had not the matter again been brought up through the press this morning, and I now appeal to him and to the Senate to make this investigation. I believe, in fact I have learned since these remarks were made by the Senator from Indiana, that he would not have made them had he known they were untrue, and I know that the source of his information at the time was biased.

Mr. GRAY. I thank the Senator from Montana. Then I understand, which I did not understand before, that the allusion in the press to which he referred is an allusion to the remarks made by the Senator from Indiana some three years ago.

Mr. POWER. And other allusions.

Mr. GRAY. I understand.

Mr. VEST. I understood the Senator from Montana to call for a committee. That is the reason why I made the remarks I did.

Mr. CHANDLER. I venture to offer a resolution relating to this subject, which I have just written, by way of disposing of it.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That the request of the Senator from Montana that an investigation be made into the facts alleged against him in the public press be referred to the Committee on Privileges and Elections.

Mr. GORMAN. I trust that the resolution will go over. We had a resolution offered yesterday proposing to enter upon an entirely new theory so far as the practice of this body is concerned, and I think it would be wise, and I trust the Senate will agree, to fix a day later on for the consideration of these matters. If we are to enter upon investigations in relation to matters and transactions that have occurred prior to the election of members of this body, we had better take up the question deliberately, and dispose of all the cases that may be brought to the attention of the Senate. Possibly, as my friend on my right [Mr. VEST] suggests, it may result in an examination of everybody, certainly of quite a number. I suggest that the resolution go over until we can reach the question in an orderly way, and if we are to enter upon it, dispose of it very thoroughly and completely and for all time.

Mr. CHANDLER. I suggest to the Senator from Maryland that my resolution does not provide for an investigation, but merely refers the request of the Senator from Montana to the Committee on Privileges and Elections. Does he object to that?

Mr. GORMAN. I do for the moment. I think we had better dispose of the matter in some way after a little further consideration.

The VICE-PRESIDENT. The resolution will go over and be printed.

REPORT ON PHOSPHATE INDUSTRY.

Mr. CALL submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That the number of copies authorized by law of the report of the Commissioner of Labor on phosphates, made by direction of the resolution of the Senate, shall be printed.

CONSIDERATION OF QUESTIONS OF PRIVILEGE.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. MANDERSON. I hope the Senator from Maryland will not make that motion, but put it in the form of a request for unanimous consent. I desire to call the attention of the Senator and of the Senate to the provision of the rules with reference to matters of privilege such as are now under consideration by the Senate. This later matter of strictly personal privilege was entertained by the Senate for a few moments by unanimous consent. I submit that under the rules of this body when it has entered upon the consideration of the right of a Senator to his seat no business either of a legislative or executive character can be transacted until that matter is disposed of. The rule is quite explicit, as it seems to me, and I will take the privilege of reading it.

RULE VI.

1. The presentation of the credentials of Senators elect and other questions of privilege shall always be in order, except during the reading and correction of the Journal, while a question of order or a motion to adjourn is pending, or while the Senate is dividing; and all questions and motions arising or made upon the presentation of such credentials shall be proceeded with until disposed of.

There is but one other matter mentioned in the rules where there is this explicit direction to the Senate to proceed with the matter until finally disposed of, and that is the correction of the minutes of proceedings or the Journal of the Senate. Turning to Rule III, I read:

The reading of the Journal shall not be suspended unless by unanimous consent; and when any motion shall be made to amend or correct the same, it shall be deemed a privileged question, and proceeded with until disposed of.

The reason for the rule which applies to this matter of high privilege is apparent. We have heard argument this morning on both sides of the grave question involved in the proposed resolution that seats Mr. Mantle, of Montana, and upon the disposition of that resolution depend three seats in this body. It has seemed to me in thinking over this question that just as nature abhors a vacuum so does the Constitution of the United States abhor a vacuum in this body, and upon any question, whether legislative or whether it shall arise upon treaty or upon questions of consenting and advising to nominations made by the President, the Senate is not in a condition to proceed with that business until this matter is disposed of and all the States have their full representation upon this floor, as required by the Constitution.

It is not a question that pertains alone to the gentlemen who are knocking at our doors for admission; it pertains to the Senate as a constitutionally organized body, and until it is decided either that they are entitled to their seats or they are not, until there is final disposition of the question, no motion, I submit, except a motion to adjourn, is in order.

I will not take the time of the Senate to refer to Cushing upon this matter. The rule of the Senate is in conformity with the general parliamentary practice. While I have no possible objection, and I do not think any Senator here perhaps will have objection, to the Senate going into executive session, I hope the Senator from Maryland will put it in a form that will comply with the rule and ask unanimous consent rather than make a motion.

Mr. GEORGE. Will the Senator name the rule he read from?

Mr. MANDERSON. Rule VI, on page 141 of the last edition of the Manual.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. MANDERSON. I raise the question of order upon the motion, that it is not in order.

Mr. GORMAN. I submit to the distinguished Senator from Nebraska that nobody ever held in this body that when a question is pending, no matter of how high a privilege, a motion to adjourn, or a motion to adjourn to a fixed time, or a motion to proceed to the consideration of executive business can not be made. The fact that a matter of the highest privilege is before the body only means that it must be considered to the exclusion of other ordinary business whenever the Senate is prepared for the consideration of the measure; but that we have to remain in continuous session, without adjourning——

Mr. MANDERSON. I do not so claim.

Mr. GORMAN. Or refuse to go into executive session.

Mr. MANDERSON. I do not so claim. I stated especially that we could adjourn, but that motion is recognized by Rule V.

Mr. GORMAN. So is the motion to go into executive session. Rule XXII provides:

When a question is pending no motion shall be received but—
To adjourn,
To adjourn to a day certain, or that when the Senate adjourn, it shall be to a day certain,
To take a recess,
To proceed to the consideration of executive business,
To lay on the table,
To postpone indefinitely.

Mr. MANDERSON. Yes; "to postpone to a day certain; to commit; to amend."

Mr. GORMAN. As a matter of course.

Mr. MANDERSON. But those motions certainly do not apply to questions of privilege which rest upon themselves, but to the ordinary parliamentary questions before the body.

Mr. GORMAN. But "when a question is pending" is the language of the rule. I submit to the Chair that the question has never been suggested before that we could not proceed to the consideration of executive business or adjourn when a question of privilege is being disposed of.

Mr. CHANDLER. I ask that Rule VI be read.

The VICE-PRESIDENT. The rule will be read.

The Secretary read as follows:

RULE VI.

PRESENTATION OF CREDENTIALS.

1. The presentation of the credentials of Senators-elect and other questions of privilege shall always be in order, except during the reading and correction of the Journal, while a question of order or a motion to adjourn is pending, or while the Senate is dividing; and all questions and motions arising or made upon the presentation of such credentials shall be proceeded with until disposed of.

Mr. CHANDLER. I desire to call the attention of the Senator from Maryland——

Mr. GORMAN. I ask in the same connection that Rule XXII be read, and then we shall have the whole matter before us.

The VICE-PRESIDENT. Rule XXII will be read.

The Secretary read as follows:

RULE XXII.

PRECEDENCE OF MOTIONS.

When a question is pending no motion shall be received but—
To adjourn,
To adjourn to a day certain, or that when the Senate adjourn, it shall be to a day certain,
To take a recess,
To proceed to the consideration of executive business,
To lay on the table,
To postpone indefinitely,
To postpone to a day certain,
To commit,
To amend;
which several motions shall have precedence as they stand arranged; and the motions relating to adjournment, to take a recess, to proceed to the consideration of executive business, to lay on the table, shall be decided without debate.

Mr. CHANDLER. I am glad the Senator from Maryland had the last rule read, because by examining the two in connection he will see it is very clear that Rule XXII applies when ordinary subjects are before the Senate.

Mr. COCKRELL. It applies to any business on earth.

Mr. CHANDLER. It applies when questions which are not privileged, or questions which are not governed by special rules, are before the Senate, but it is very clear that questions of privilege are governed by a special rule, just as the question of the correction of the Journal is governed by a special rule. I think when the Senator from Maryland comes to look at the two rules he will see that the question of privilege connected with the credentials of a Senator is one of the highest possible privilege and is not governed at all by the twenty-second rule.

Mr. COCKRELL. Mr. President, that rule is explicit. It does not make any difference on earth what kind of business is pending before the Senate, a motion to adjourn is in order, a motion to proceed to the consideration of executive business is in order, a motion to postpone indefinitely is in order. Any one of those motions is in order, and there can be no question about it. If these motions were not in order the Senate would be bound to continue in session indefinitely until a question of privilege was utterly disposed of. This is the first time that anyone ever raised such a question in this body.

Mr. CHANDLER. Will the Senator from Missouri allow me to call his attention to a fact?

Mr. COCKRELL. As a matter of course.

Mr. CHANDLER. I want to call the Senator's attention to the fact that when he says a motion to adjourn would not be in order, there is in the sixth rule an express reservation that a motion to adjourn may intervene when a question of privilege is under discussion.

Mr. COCKRELL. Any motion is in order, to adjourn, to postpone indefinitely, or anything else.

Mr. CHANDLER. But no other motion is in order when a question concerning the right of a member to a seat is pending.

Mr. COCKRELL. It is ridiculous to talk about a motion to proceed to the consideration of executive business not being in order.

Mr. GORMAN. Let the Chair decide the question.

The VICE-PRESIDENT. Will the Senator from Maryland state his motion?

Mr. GORMAN. I move that the Senate now proceed to the consideration of executive business.

Mr. MANDERSON. Upon which I make the point of order that under the rule the motion can not be entertained. I wish to make merely one suggestion in reply to the Senator from Missouri. How would it be possible for the Senate to proceed until the question of high privilege, such as that is now before us, is disposed of, if a motion to postpone it to a day certain was to be permitted, or how could it be disposed of if a motion to lay it on the table or to postpone it indefinitely was in order? As the rule is explicit as to this particular sort of privilege, it is evident that the general rule which applies to the precedence of motions does not apply to this character of privilege, but to the ordinary parliamentary business.

Mr. GEORGE. I desire to ask the Senator from Nebraska a question.

Mr. FRYE. Is this discussion in order?

The VICE-PRESIDENT. The Chair thinks it is.

Mr. GEORGE. Does the objection of the Senator from Nebraska go to the extent of holding that the Senate can not consider any other business until all the debate about the right of the Senators from Montana, Wyoming, and Washington to their seats is disposed of?

Mr. MANDERSON. Certainly it does, because it involves the integrity of the Senate itself, its constitutional composition.

Mr. GEORGE. I do not know a great deal about the rules, but Rule VI reads in this way:

The presentation of the credentials of Senators-elect and other questions of privilege shall always be in order.

I understand the Senator's objection to go to the point now stated. If that be correct, how was it possible upon the presentation of the credentials of these Senators for the Senate to refer them to the Committee on Privileges and Elections or to do anything else except to proceed to the consideration of that matter?

Mr. MANDERSON. That is provided for. The credentials can undoubtedly be referred to the Committee on Privileges and Elections for their report, but when the report comes in and a resolution is reported to seat a Senator, then it partakes of that order of high privilege to which I have referred.

Mr. GEORGE. Then I understand the Senator to mean that whilst the presentation of the credentials may be postponed by referring them to the committee for report, when the report comes in we are bound to consider them to the exclusion of everything else. Now, if that be his position, there is nothing in the rule which authorizes him to make that statement.

Mr. CULLOM. Let the Chair decide.

The VICE-PRESIDENT. The Chair overrules the point of order, and will entertain the motion of the Senator from Maryland that the Senate proceed to the consideration of executive business. The question is on agreeing to the motion.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty minutes spent in executive session the doors were reopened, and (at 3 o'clock and 25 minutes p. m.) the Senate adjourned until to-morrow, Thursday, March 30, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 29, 1893.

SUPERINTENDENT OF IMMIGRATION.

Herman Stump, of Maryland, to be Superintendent of Immigration, to succeed William D. Owen, resigned.

COLLECTOR OF CUSTOMS.

William P. Thompson, of Maine, to be collector of customs for the district of Belfast, in the State of Maine, in place of George B. Ferguson, deceased.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 27, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

John E. Risley, of New York, to be envoy extraordinary and minister plenipotentiary of the United States to Denmark.

CONSUL-GENERAL.

Max Judd, of Missouri, to be consul-general of the United States at Vienna.

COMMISSIONER OF PATENTS.

John S. Seymour, of Norwalk, Conn., to be Commissioner of Patents.

SECOND DEPUTY COMMISSIONER OF PENSIONS.

Henry C. Bell, of Marshall, Ill., to be Second Deputy Commissioner of Pensions.

FIRST ASSISTANT SECRETARY OF THE INTERIOR.

William H. Sims, of Columbus, Miss., to be First Assistant Secretary of the Interior.

ASSISTANT COMMISSIONER OF THE GENERAL LAND OFFICE.

Edward A. Bowers, of Washington, D. C., to be Assistant Commissioner of the General Land Office.

UNITED STATES MARSHALS.

George Pfeiffer, jr., of New Jersey, to be marshal of the United States for the district of New Jersey.

Frank E. White, of Nebraska, to be marshal of the United States for the district of Nebraska.

RECEIVER OF PUBLIC MONEYS.

F. P. Gayle, of Roswell, N. Mex., to be receiver of public moneys at Roswell, N. Mex.

POSTMASTERS.

Miss Lela Tyns, to be postmaster at Groesbeck, in the county of Limestone and State of Texas.

Neri A. Hanna, to be postmaster at Cadiz, in the county of Harrison and State of Ohio.

William T. England, to be postmaster at Van Buren, in the county of Crawford and State of Arkansas.

Charles E. Clark, to be postmaster at Matawan, in the county of Monmouth and State of New Jersey.

William C. Hall, to be postmaster at Sweet Springs, in the county of Saline and State of Missouri.

Charles F. Chase, to be postmaster at Atlantic, in the county of Cass and State of Iowa.

Philip Zoercher, to be postmaster at Tell City, in the county of Perry and State of Indiana.

THURSDAY, *March 30, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The VICE-PRESIDENT. The Journal of yesterday's proceedings will be read.

Mr. MANDERSON. I suggest that there is no quorum of the Senate present, so that the Journal under the rules can not be read.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Dubois,	Martin,	Roach,
Bate,	Gallinger,	Mills,	Sherman,
Berry,	Gibson,	Mitchell, Wis.	Smith,
Brice,	Gorman,	Morrill,	Stockbridge,
Caffery,	Gray,	Murphy,	Teller,
Call,	Hoar,	Palmer,	Turpie,
Carey,	Hunton,	Pasco,	Vance,
Chandler,	Kyle,	Peffer,	Vest,
Cockrell,	Lindsay,	Pettigrew,	Vilas,
Coke,	McMillan,	Power,	White, Cal.
Cullom,	McPherson,	Proctor,	White, La.
Dolph,	Manderson,	Ransom,	

The VICE-PRESIDENT. Forty-seven Senators have responded to their names. A quorum being present, the Journal of yesterday's proceedings will be read.

The Journal of yesterday's proceedings was read and approved.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

WITHDRAWAL OF PAPERS.

Mr. CULLOM. I ask for the adoption of an order simply for the withdrawal of some papers.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the order will be read.

The order was read, as follows:

Ordered, That Maria N. Flint have leave to withdraw her papers from the files of the Senate.

Mr. CULLOM. I understand that there has been no adverse report made.

The VICE-PRESIDENT. The Chair hears no objection, and the order will be agreed to.

Mr. HARRIS. Let the order be granted on the condition imposed by the rule; that is, that copies shall be left, unless there has been no adverse report.

The VICE-PRESIDENT. Without objection that will be the order of the Senate.

On motion of Mr. DOLPH, it was

Ordered, That Arthur M. Thorp be permitted to withdraw his papers from the files of the Senate.

CHARGES AGAINST SENATOR POWER.

Mr. CHANDLER. Yesterday, after the request was made by the Senator from Montana [Mr. POWER] for an investigation, I submitted a resolution, which went over until to-day. I ask unanimous consent to withdraw that resolution and substitute for it the resolution I send to the desk.

The VICE-PRESIDENT. Is there objection? The Chair hears none. The substitute resolution will be read.

The Secretary read as follows:

Resolved, That the Committee on Privileges and Elections be, and hereby is, directed to investigate the statements derogatory to the Senator from Montana [Mr. POWER] contained in the Washington Post of Wednesday, March 29, 1893, and to report whether any, and if so what, action should be taken thereon by the Senate; and said committee is hereby empowered to send for and examine persons and papers, to employ a stenographer, and to have its expenses paid from the contingent fund of the Senate.

Mr. HARRIS. Let the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. VEST. Mr. President, I shall not object to the resolution. Yesterday I expressed my opinion in regard to investigating newspaper charges by committees of the Senate, and I reassert my deliberate opinion that if we go into this matter we might as well set aside all other business.

The VICE-PRESIDENT. The Chair will interrupt the Senator from Missouri to inquire whether there is objection to the present consideration of the resolution.

Mr. HARRIS. The resolution under the law must go to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The question is whether that order shall be taken now. Is there unanimous consent? The Chair has stated that the business before the Senate is the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which is now in order.

Mr. SHERMAN. I rise to a question of order. I think it is perfectly clear that under the rules as they now stand, even pending a question of special privilege like the admission of a Senator, the morning hour is expressly reserved, and morning business is now the order. As a matter of course the resolution reported by the Senator from Massachusetts will come up whenever the Senate gets through with the morning-hour business. Here is the rule, on page 142 of the Manual. It provides that—

Until the morning business shall have been concluded, and so announced from the chair, or until the hour of 1 o'clock has arrived, no motion to proceed to the consideration of any bill, resolution, report of a committee, or other subject upon the Calendar shall be entertained by the Presiding Officer, unless by unanimous consent.

Under this clause of Rule VII it is perfectly clear that the morning-hour business is in order.

Mr. CULLOM. I think consent was granted by the Senate on the statement of the Presiding Officer to take up the resolution reported by the Senator from Massachusetts.

Mr. SHERMAN. I know, but the morning business displaces it, and that is only in order after the morning business.

Mr. CULLOM. The resolution was laid before the Senate a few moments ago, and by consent I think it was agreed to be taken up.

Mr. SHERMAN. The Chair very naturally and very properly, I think, in the debate yesterday, assumed that the business of passing upon the right of a member overrides the morning hour, but it is perfectly clear that under Rule VII the morning business displaces everything until it is disposed of, and then the special question of privilege comes up after the morning business, or at 1 o'clock.

Mr. HARRIS. If the Senator will allow me, I should be glad to inquire whether he thinks that if a motion had been made to correct the Journal the rule he has referred to would require the Senate to proceed with the ordinary call for morning business during and through the morning hour, or would it not have to consider and determine that question before any other business was entered upon? It seems to me this question is somewhat parallel to an amendment of the Journal.

Mr. SHERMAN. Rule IV expressly provides for the Journal:

The proceedings of the Senate shall be briefly and accurately stated on the Journal.

Rule III provides that—

The Presiding Officer having taken the chair, and a quorum being present, the Journal of the preceding day shall be read, and any mistake made in the entries corrected. The reading of the Journal shall not be suspended unless by unanimous consent; and when any motion shall be made to amend or correct the same, it shall be deemed a privileged question, and proceeded with until disposed of.

When the Journal is read, the first thing to be done is that it must be approved. That is done *sub silentio*. Then the morning business comes in. That is the rule; though it is not material now, except I think it would be better to go through with the call for morning business in the ordinary way.

Mr. VEST. I am not responsible for the resolution coming here. It was offered by the Senator from New Hampshire, and the Chair took up the question immediately as to substituting it for the resolution submitted yesterday.

Mr. CHANDLER. I wish to say to the Senator from Missouri that I did not intend to ask for the present consideration of the resolution.

Mr. VEST. I think the Senator from Ohio is right. The Journal ought to be read and approved, and then routine business be received.

Mr. CHANDLER. I merely asked for the substitution of the resolution for the one presented by me yesterday, and now I ask that it shall go over until to-morrow.

Mr. GORMAN. That is right.

Mr. VEST. Let the resolution go over.

The VICE-PRESIDENT. The resolution submitted by the Senator from New Hampshire will go over under the rule.

LEAVE OF ABSENCE.

Mr. TELLER. I ask that I may be permitted to be absent from the Senate during the remainder of this extraordinary session.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and the request of the Senator from Colorado is granted.

SENATOR FROM MONTANA.

Mr. MITCHELL of Oregon. What is before the Senate?

The VICE-PRESIDENT. The Chair decides that the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections is now before the Senate. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

Mr. MITCHELL of Oregon. Mr. President, the question involved in the proposition now before the Senate is not only one of the highest privilege, but of transcendent importance. It is one, the solution of which does not depend on the determination of any question of fact, but rests solely upon constitutional and statuory construction. It is therefore a question in the consideration and determination of which no element of partisanship can be permitted, and I am sure will not be permitted to enter. It may seem somewhat strange that there should be, after a lapse of over one hundred years since the adoption of our Constitution, room for any serious differences of opinion as to whether the executive of a State has or has not the constitutional power in a given case to confer upon a citizen by appointment the right to a seat temporarily or otherwise in this body, and yet the report in the case under consideration and the debate now in progress clearly show that this is so.

The right upon the part of a citizen to a seat in the Senate of the United States is one that can only exist in virtue of the exercise in some proper form by a State speaking through some authorized officer or tribunal of a high constitutional function. When, therefore, a citizen of any State claims that this function has been so exercised as to clothe him with this constitutional right he should not be turned away from the doors of the Senate with a wave of the hand, or without the most careful consideration of the questions involved. This much is due the citizen claiming the seat and nothing less than this is due both the State and the executive of the State whence he comes.

But aside from the rights of the claimant and of the State, all of which are entitled to the highest consideration and the most faithful guardianship, there are still other and higher interests involved, demanding no less of careful and thorough investigation, of correct constitutional interpretation, and they are those relating not only to the conservation of the integrity of the Constitution, but also of that of the Senate itself. It will be conceded, I take it by all, it is of the utmost importance that the *personnel*, the constituent parts of this most exalted legislative body, not only in this country, but in the world, should forever be kept free from any taint in the title under which they hold.

We are told with great confidence that the theory of the Constitution is that it was so constructed in its various provisions relating to the choosing of United States Senators that the Senate shall always have its full complement of members present in this body. So that in the language of the report of the majority the Senate "shall be kept full—always full." Grant, for the sake of the argument, that this is so; and grant further, that it is always a matter of deep regret that there should be a vacant seat from any State for any considerable length of time, yet in all confidence I submit that an occasional vacancy for a brief time in the representation of a State, or two States, or a half dozen States for that matter, is an evil infinitesimal in degree and character, in importance and consequences, compared with that overshadowing evil which must necessarily result from the recognition of a construction, or the approval of a doctrine that will eventuate in admitting to a seat in the Senate a single member who is lacking in the proper constitutional title. There is but one way, it is respectfully submitted, by which Senators can be rightfully chosen under our present Constitution, either for a full term or to fill a vacancy, and that is by the Legislatures of the States respectively.

The executive of a State has no constitutional power to choose a Senator for a State, no not for even the briefest possible period of time; that belongs alone and exclusively under the Constitution to the Legislature. The executive, however, is, by a certain carefully prescribed, clearly defined, limited constitutional grant, clothed with the prerogative which he alone can exercise, as I shall confidently contend, only *after* a Senator has been thus chosen by the proper constitutional authority—the Legislature—and a vacancy in that Senator's term so chosen subsequently happens "by resignation or otherwise" by which he can, in the event such vacancy or vacancies happen "during the recess of the Legislature," not choose a Senator, not even fill the vacancy, but make "temporary appointments until the next meeting of the Legislature, which shall *then* fill such vacancy."

The primary and constitutional power, therefore, both of choosing Senators for full terms, whether these full terms be for two, four, or six years, and also of *filling vacancies* which may occur in those terms belongs under the Constitution *exclusively* to the Legislature of the State, and the only constitutional power inhering in the executive of a State in respect of this important function, is not to choose a Senator, not to fill a vacancy, because these are functions vested clearly by the Constitution *exclusively* in the Legislature, but to make "temporary appointments" in case vacancies happen by resignation or otherwise during the recess of the Legislature.

Section 3, Article I, of the Constitution provides in part as follows:

> The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.
>
> Immediately after they shall have assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation or otherwise during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

In giving construction, therefore, to these clauses of the Constitution, and in order to determine the precise scope and extent of the constitutional power of the executive of a State thereunder, it is of the utmost importance to bear in mind the important fact, to which all must give assent, that both the choosing of a Senator for a full term, as well also as the *filling* of any vacancy that may happen in that term, by resignation or otherwise, not only belongs under the Constitution *exclusively* to the Legislature, but is by the express terms of the Constitution made *mandatory* on such Legislature. The clause in the Constitution correctly paraphrased reads:

> The Senate of the United States shall be composed of two Senators, who *shall* be chosen by the Legislature thereof for six years.

While as to vacancies happening by resignation or otherwise during a recess of a Legislature, they, using the precise language of the Constitution, without any transposition or interpolation of terms, "*shall* be filled by the Legislature which shall meet next after the making of a temporary appointment."

The clause reads, "until the next meeting of the Legislature, which *shall* then fill such vacancies," while the power of the executive to appoint under the Constitution is not only limited to that of making temporary appointments until the next meeting of the Legislature in cases where vacancies happen by resignation or otherwise during the recess of such Legislature, but it is not mandatory, as in the case of the Legislature whose duty it is to choose both for a full term, and also to fill vacancies, but left *optional* with the executive, the language of the Constitution being "the executive thereof *may* make temporary appointments."

I now come, before proceeding to a review of the history of the Constitutional Convention and of Senatorial discussion and action on this and kindred questions, and before attempting to state what I conceive to be the proper construction to be placed on the constitutional provision I have just quoted, to consider further the pivotal point in the report of the committee, and upon which so much reliance seems to be placed by the able Senator from Massachusetts, namely, that the construction for which he insists was not only intended by the framers of the Constitution but is necessary, to the end that the Senate of the United States shall, to use the language of the report, "be full, always full." And in this connection I agree in advance that it was the intention of the Convention which framed the Constitution to provide all the necessary machinery with appropriate and ample powers, whereby in case such machinery, should be kept in proper motion, performing at all times its proper functions, each State should at all times be represented in the Senate of the United States by two Senators.

That it was, in other words, the purpose and meaning of the men who framed the Constitution to clothe all necessary officers and tribunals within each State with that ample power in respect of the appointment of United States Senators, both for full terms and to fill vacancies, so that in case those officers and tribunals exercised their appropriate constitutional functions in the manner and at the times authorized and required of them, respectively, by the Constitution, that then there never would be an interregnum in the representation of any State—never a time except such proper reasonable time as might be necessary for the exercise of the power of appointment in the manner required by the Constitution, and such further time as might be necessary to enable the Senator chosen to appear and take the oath of office—when any State should not be fully represented by two Senators.

There is therefore no room for controversy on this point between the majority and minority of the Committee on Privileges and Elections respecting this case—no room upon this point for any difference of opinion between the distinguished Senator from Massachusetts [Mr. HOAR] and myself, unless indeed it should be contended by him, unless indeed this report of the majority means and is intended to mean, that it was not only the intention of the framers of the Constitution to provide for the choosing of Senators in a manner which should, in the event of the proper performance of duty upon that tribunal or officer designated by the Constitution

to represent the State in the matter of the appointment of Senators, result in always keeping the Senate full, but also to provide for the filling of a vacancy that might result from a declination, refusal, or inability, if you please, of such tribunal or officer to perform this constitutional function.

If the contention of the report in this case and that of the honorable Senator who submitted it is the latter, then I most respectfully and emphatically dissent. While we all agree that it was the intention among other things of the men who made the Constitution to provide so that the Senate *might* as nearly as possible at all times be represented by two Senators from each State in the event the States complied with the constitutional mandate, yet if the contention of the report and of the honorable Senator is to go a step further and to insist that not only such was the intention, but also that it was the intention to provide for the filling of a vacancy that might occur by reason of the failure or refusal of the State to perform its constitutional functions, the performance of which could not but result in giving such State full and complete representation in the Senate at all times, then, Mr. President, we have come to the parting of the ways in this controversy.

While I insist, and the minority of the committee insist, that under the interpretation we place on the Constitution all has been done by the framers of that instrument necessary and proper to give a State full and complete representation in the Senate at all times by the constitutional provisions just quoted, and while we contend the framers of the Constitution provided in a clear and specific manner that Senators should be chosen exclusively by the Legislatures of the States respectively both for full terms and to fill vacancies, and clothed the executives of the States respectively with the power to make temporary appointments when vacancies happen by resignation or otherwise during a recess of the Legislature, it was never for one moment contemplated by the Convention which made that great instrument, as we believe, that either the Legislatures or the executives of great sovereign States would for any reason, or for any time, or under any circumstances, or on any account, omit to exercise at the proper time and in the proper manner this great constitutional function impressed upon them, and the *non-exercise* of which upon the part of any State is a direct step toward national disintegration.

Hence we confidently insist, while the Convention provided all the necessary machinery in a State appropriate and proper to enable such State to keep its full representation in the Senate of the United States at all times, under all circumstances, it was not the intention of that Convention to provide for any such emergency as that resulting from a deliberate failure of a State to exercise its constitutional functions through the machinery provided by the Constitution, and the performance of which would result in giving full representation at all times. To have done that would have been to have discredited in advance the stability, the permanency, the perpetuity of the great structure of government they were building. To have contemplated such a thing, much less to have been guilty of the unpardonable folly of attempting to provide against it, would have been to chisel with their own hands upon the very foundation stones of the Government they were establishing their own distrust as to its capacity to live. If these great founders of the Republic had in contemplation the possible failure of the Legislature of a State to perform a function so essential to the very existence of the Government, and the maintenance of its own rights, and had attempted to provide a substitute which in such event should come to the rescue of the State and perform that function, to the end that each State should at all times have a full representation in the Senate of the United States, as contended by the able Senator from Massachusetts, and if such a thing were necessary in order that there should be no interregnum in representation, in the event of the failure of the Legislature to perform its appropriate *mandatory* constitutional function, then, why not also for the same reason, and for the same purpose, and to the same great end, so heroically contended for by the Senator from Massachusetts, should not the Convention have gone a step further and clothed some officer or tribunal with power to appoint a Senator in the event the *executive* of a State failed to exercise his constitutional function, and did not make a temporary appointment in case of a vacancy happening during the recess of the Legislature?

If it were necessary, essential, appropriate, or proper, I respectfully submit, for the Constitutional Convention to anticipate in advance, or contemplate such a thing as the Legislature of a State failing to perform a great constitutional duty so absolutely essential, not only to the maintenance of its own sovereign rights, but also to the very existence and perpetuity of the Government, and the vindication of the right of such State to participate to the full extent of its rightful constitutional authority in the business of this great legislative body, and to provide in advance a remedy, thus discrediting their own work, then it would have been equally necessary, appropriate, and proper to have provided also in advance a remedy in the event of a failure on the part of the executive of a State to perform his constitutional function of equal importance to the existence of the Government and the preservation of the rights of a State in this body. In many of the States of the Union the recesses of the Legislature extend over a period of nearly two years—in all of them nearly a full year. Take the case of my own State, Oregon.

The Legislature meets in biennial session on the second Monday of January. Let us suppose a case, and to which I briefly alluded yesterday. My term expires March 4, 1897. The Legislature of Oregon adjourned in February last, some four weeks ago, and will not convene again, unless convened in extraordinary session, until the second Monday in January, 1895—nearly two years hence. Suppose I were to die, resign, or be expelled to-day, during this recess, then there would be such a vacancy in this body from the State of Oregon which we all agree the governor could constitutionally fill, by making a temporary appointment, or he could convene the Legislature in extraordinary session, and then it could fill it. We will all further agree that in such event it would be the duty, the constitutional duty of the executive of that State, to either make a temporary appointment or convene the Legislature in extraordinary session without delay, to the end that the great purpose of the framers of the Constitution might be carried out, namely, that each State should at all times have its proper representation in the Senate of the United States.

But suppose my good friend, Governor Pennoyer, for some reason peculiar to himself—and he has at times, I might say in this connection, some rather peculiar and odd views, not in harmony always with everyone else, following in the revolutionary path marked out by the recent action of the Legislatures of Montana, Wyoming, and Washington—not only refuses to make a temporary appointment, but also declines to convene the Legislature in extraordinary session, what is the result? Why, undoubtedly Oregon in such a case would be represented by but *one* Senator from that State, at least until the 1st of February, 1895, a period of nearly two years. Where does my distinguished friend, the Senator from Massachusetts, find any person or tribunal or power, which in such a situation could come to the rescue of the disfranchised State and provide the *second* Senator for the State of Oregon for two years?

Yet we find our distinguished friends making the remarkable argument here that this constitutional provision must be so construed that at all times, every day and every week and every month, there must be two Senators here from each State; and the majority of the committee insist, by implication at least, that by giving these provisions that construction for which they contend, there would always be two Senators here from each State. It is not true, Mr. President; it is bad logic; it is all wrong?

If no such power exists, what then becomes of the argument of the majority of the committee and of my venerable and respected friend, the able Senator from Massachusetts, to the effect that his interpretation of the Constitution will result in "keeping the United States Senate full—always full," and that it was the intention of the framers of the Constitution to provide for the immediate filling of *every vacancy* that might *occur* in the representation from any State, whether such vacancy happens by resignation or otherwise, or whether it *occurs*, or even *happens*, if you please, by reason of the properly constituted and authorized tribunals or officers whose business it is to represent the State, respectively, in the choosing of Senators, failing to perform their constitutional duty?

While I admit that among other things the Constitutional Convention had in view the adoption of such provision as would forever, as long as the Government lasts, preserve intact the *Senate* of the United States as one of the legislative branches of the Government, there was no great purpose upon the part of the convention to make provision that every seat in that Senate should at all times and under all circumstances be filled, or that each State should be compelled to have in the Senate two Senators at all times and under all circumstances. Therefore, to the end that the existence of the *Senate* should be maintained and preserved, the classification in the beginning was wisely provided for.

The great purpose of this classification was to so provide that the terms of one-third of the body should expire every two years, thus leaving a Senate composed of two-thirds of the whole body in existence at all times and under all circumstances, save an occasional vacancy that might occur by death, resignation, or other like cause, and under these wise provisions the Senate of the United States has existed for more than one hundred years. The Senate organized in 1789 is the Senate of to-day. There has never been but *one* Senate of the United States, and we trust there never will be but one.

If it were a fact, therefore, that the construction sought to be placed on the Constitution by the committee would result in providing for every possible emergency that might arise, for every vacancy, if you please, that might happen or *occur* by reason of the failure of a State to appoint a Senator through the constituted appointing power as required by the Constitution, then there might be some force in the position of the committee. If the construction claimed would justify the conclusion of the committee that it would result in keeping, in the language of the committee, "the Senate full, always full," then would the argument be clothed with greater weight and more convincing assurance. But unfortunately, as I have shown, this is not so. While the committee would by a forced construction of the language of the Constitution, by the rejection of the universally recognized maxim of statutory and constitutional construction, provide for filling a vacancy caused by a failure of the Legislature of a State to perform a great constitutional function, they find no means in the Constitution of supplying a vacancy resulting from the failure of the executive of a State to perform an equally important constitutional function.

The construction placed upon the Constitution by the minority of the committee, and for which I am contending, will result, provided Legislatures and governors of States do their duty, provided they never fail to perform the constitutional function impressed upon them by the great fundamental charter, in keeping, in the language of the report of the majority "the Senate full, always full," while the construction sought to be engrafted by the committee, and by the distinguished Senators from Massachusetts and Alabama on the provisions in question, seeks to meet an emergency caused by the failure of the Legislature *only* to perform its constitutional duty, while it makes no pretense whatever of providing for the filling of a vacancy resulting from the failure of a governor to perform his duty. The great fallacy of the argument of the report, and of the distinguished Senators, consists in the fact that the men who made the Constitution never intended to do either.

The Constitution clothed certain tribunals and officers in each State with ample powers whereby each in their turn performing their appropriate and constitutional functions, would enable the wheels of the Government to revolve in proper order, thus securing every right, not only of the people, but of the States in their sovereign capacity in so far as representation in the Senate of the United States is concerned. But having done this it "lays its hands on individual conscience and individual duty," and further, in the language of that great constitutional lawyer, Mr. Webster, the distinguished predecessor of his eminently worthy and able successor in this body, whose words, it occurs to me, have not been fitly chosen by the distinguished Senator from Massachusetts to sustain the report of the committee—

> The Constitution utters its behests in the name and by authority of the people, and it does not exact from States any plighted public faith to maintain it. On the contrary, it makes its own preservation depend on individual duty and individual obligation. Sir, the States can not omit to appoint Senators and electors. It is not a matter resting in State discretion or State pleasure. The Constitution has taken better care of its own preservation. It lays its hand on individual conscience and individual duty. It incapacitates any man to sit in the Legislature of a State who shall not have first taken his solemn oath to support the Constitution of the United States as they are to support their own State constitution. Nay, sir, they are as solemnly sworn to support it as we ourselves are, who are members of Congress.

The distinguished lawyer, proceeding further upon this great question, said:

> No member of a State Legislature can refuse to proceed, at the proper time, to elect Senators to Congress or to provide for the choice of electors of President and Vice-President any more than the members of this Senate can refuse, when the appointed day arrives, to meet the members of the other House to count the votes for those officers and ascertain who are chosen. In both cases the duty binds, and with equal strength, the conscience of the individual member, and it is imposed on all by an oath in the same words. Let it then never be said, sir, that it is a matter of discretion with the States whether they will continue the Government or break it up by refusing to appoint Senators and to elect electors. They have no discretion in the matter. The members of their Legislatures can not avoid doing either, so often as the time arrives, without a direct violation of their duty and their oaths; such a violation as would break up any other government.

Surely, Mr. President, Mr. Webster never dreamed that the Constitution provided or intended to provide a substitute whose duty it should be to appoint a Senator from a State to fill a vacancy caused by the failure of a State Legislature to choose a Senator at the time and in the manner it was its constitutional right and duty to do so. No, Mr. President, this great fabric of constitutional government, this model Republic of the world, was never constructed upon the theory that either the National Government or any State government would ever at any time fail to perform a constitutional function when and as required by the Constitution, and which is essential to its very existence. When sovereign States do this, then we stand in the presence of revolution, and then there is but one remedy, and that not a peaceful one.

Section 1, Article II, of the Constitution provides as follows:

> Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress, etc.

By this provision full power and authority are given to each State to enable it to be properly represented in the electoral college for the election of President and Vice-President of the United States.

But suppose the Legislature of a State refuse or for any reason omit to direct the manner in which such electors shall be appointed, or having directed they should be chosen either by the executive or by the qualified electors of the State, these decline to appoint such electors, would not such omission or refusal deprive such State of its proper representation in the electoral college, would it not deprive such State of any voice in the election of a President and Vice-President, and is there any power by which said State in such a case can be given its representation in the college, or a voice in the selection of a President and Vice President; and moreover is it not as important, yea, infinitely of greater importance, that each State should be represented in the electoral college and have a voice in the election of President and Vice-President as that each State should at all times have its full representation in the Senate?

But not only so. Would anyone contend that in such a case the action of the Legislature, or rather its nonaction, was not the act of and in every sense binding on the State. The distinguished Senator from Massachusetts in his report in this case, as also in his speech yesterday in support of that report, announces what seems to me the remarkable doctrine that the failure or refusal, or, to be entirely free from any charge of disingenuousness, to use his own language, "the inability of a majority of a State Legislature, where there is more than one candidate, to agree upon a Senator, is by no means equivalent to a refusal of a State to elect one."

Surely, Mr. President, this is a doctrine which can not for one moment be maintained. In what way? Through what organ? By what instrumentality alone can or does a State in its sovereign capacity speak or act? It is through the Legislature of each State, and through that alone, except, perhaps, in the single case of the temporary appointment of a Senator in case a vacancy happens during the recess of the Legislature by resignation or otherwise, and unless, indeed, Congress has provided that its sovereign will can be expressed at the ballot box or in some other way. For the present, in so far as the choosing of Senators is concerned, and in so far as filling vacancies is concerned, a State in its sovereign capacity must speak alone in the manner pointed out in the Constitution in the matter of choosing or refusing to choose a Senator for a full term, and that is through the Legislature whenever it has an opportunity to do so.

Therefore the act of a Legislature chosen next preceding the expiration of the time for which any Senator is elected, and whose constitutional and statutory duty it is to elect a successor, in either electing, or in omitting, or failing, or, if you please, in being unable, and therefore omitting, to choose such successor, is, I respectfully and confidently submit, the act of the State to all intents and purposes, and it will not do to say such inability upon the part of a Legislature to perform a great constitutional duty, which it has the clear power and opportunity to perform, is not binding upon or the act of the State.

I submit these considerations, Mr. President, in response to the following statement in the report of the committee:

> It is said that a failure by the Legislature to elect a Senator is a refusal by the State to be represented. The answer to that is twofold:
> First. That the Constitution of the United States did not mean to permit a State to refuse to be represented, and this constitutional purpose has been carried out as far as possible by the statute of 1866.
> Second. The inability of the majority of a State Legislature, where there is more than one candidate, to agree upon a Senator is by no means equivalent to a refusal of a State to elect one.

The minority of the committee most emphatically deny that proposition. I submit, Mr. President, in addition to what I have already said, inasmuch as the State can only speak in the choosing of Senators through its Legislature, the act of that Legislature, whatever may have been the motives of its members, or the reasons which have led to such action, whether such failure to elect is the deliberate and unanimous vote of every member of the body against an election, or whether it is the result of a disagreement among the members as to candidates, the action, the final act of the Legislature, whatever it may be, whether it results in the election or nonelection of a Senator, is the act of the State.

Mr. HOAR. What act?

Mr. MITCHELL of Oregon. The act of either electing the Senator or the act of doing nothing, not electing.

Mr. HOAR. If the Senator will pardon me, does he think doing nothing is an act? I think it is not.

Mr. MITCHELL of Oregon. I do most decidedly when ap-

plied to this particular provision. It being the act of the State, I submit such State is not in a position to insist that it is being deprived of its proper representation in the Senate of the United States without its consent.

And now, Mr. President, having said this much by way of brushing away some of the fog which it seems to me has enveloped the real questions at issue, I shall proceed to the main questions involved.

It is a rule of construction as old as the history of jurisprudence, that in considering the provisions of a constitution or statute that construction shall be adopted which will give some meaning to each clause and each word employed, provided this can be done and maintain the sense of the provision. To give a construction to a provision, therefore, when this can be done, for the purpose of conveying a different sense, for the purpose of either enlarging or restricting a power conferred, and which leaves out of the account—leaves wholly meaningless and entirely useless—a phrase or a word or words, is to ignore and set aside a rule of interpretation the utility and sacredness of which no lawyer will deny. Keeping, then, this rule steadily in view, let us endeavor to ascertain what is meant by the clause in the Constitution, which declares:

> And if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

And the precise question for our determination and the one involved in the case before us and which must determine as to the right of the governors of the States of Montana, Wyoming, and Washington to make the temporary appointments they have made, is this: Does this power on the part of the executive of a State to make temporary appointments extend to a case where the *full* term of a Senator has expired byoperation of law, when the Legislature of the State, whose constitutional and statutory duty it is to elect his successor, has had an opportunity to elect, but has failed to do so; or is it limited to cases where, during the *term* of a Senator, and before it has expired by operation of law, a vacancy happens—no matter how, whether by death, resignation, abandonment, expulsion, or in some similar way—in other words, by resignation or otherwise? The minority of the Committee on Privileges and Elections hold to the latter view, and I join in that view, of course, with great deference to the opinion of the majority, without the slightest doubt in my mind as to its correctness.

In giving construction to the clause of the Constitution just quoted, and in determining the question as to the power of the executive of a State to make a temporary appointment, it is proper we should consider the legislation of Congress upon the subject of the election of United States Senators. That legislation was in furtherance of aid of the States in the election of Senators and it placed a legislative construction upon the clauses of the Constitution just quoted by which two points, left vague and by no means entirely clear by the terms of the Constitution, were made plain and definite. Prior to this legislation it was a matter of uncertainty as to what particular Legislature should choose the successor to a Senator whose term either had expired or was about to expire, and therefore Congress in this act of July 25, 1866, provided that such Senators should be chosen by the Legislature of the State "which is chosen next preceding the expiration of the time for which any Senator was elected to represent such State in Congress."

The sixteenth section of the act provided in terms that whenever on the meeting of the Legislature of any State a vacancy exists in the representation of such State in the Senate, the Legislature shall proceed on the second Tuesday after the meeting and organization to elect a person to fill such vacancy, etc. This legislative construction, Mr. President, has, I believe, been universally accepted by Congress, by the Legislatures of the several States, and by the people generally of this country from that day until the present.

It is safe, therefore, to assume that the Constitution of the United States makes it the constitutional duty of the Legislature in each State which is chosen next preceding the expiration of the time for which a Senator was elected to represent such State in Congress to elect a successor, and keeping this view of the case constantly before us let us proceed to the consideration of the question as to whether or not the executive of a State has the constitutional power to make a temporary appointment for the beginning of a term in a case where the Legislature whose constitutional duty it was to choose a Senator for such term has had an opportunity to do so and has failed to perform its constitutional function.

With all deference, Mr. President, with that deferential humility and respect due certainly from me to the great ability, the legal learning, the ripe experience of the distinguished Senators of the Committee on Privileges and Elections from each side of this Chamber who have joined in the report of that committee, I must be permitted to enter my respectful but deliberate and emphatic protest that no such construction of these provisions of the Constitution was ever intended by the men who framed them.

In the light of these observations, let us consider the provisions of the Constitution under consideration and endeavor to arrive at a conclusion as to their correct interpretation.

The minority of the committee hold to the view that, inasmuch as the Constitution in plain and specific terms provides in the first instance for certain definite specific terms of Senators, first of six years, then four, then two years, by virtue of the classification to be made immediately after assembling in consequence of the first election, and then provides—

> If vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State—

that the vacancy contemplated and referred to is a vacancy occurring by resignation, or otherwise, in one or the other of these fixed and definitely-described terms, and that it has no reference whatever to any condition that may exist at the expiration of any of these regular terms, and this is so for a great number of reasons. First, because it is the constitutional duty of the Legislature of a State, not only in virtue of the provisions of the Constitution itself, but doubly so in virtue of the act of Congress of July 25, 1866, to provide by election in advance of such a vacancy for a successor to a Senator whose full term is about to expire. And it was never contemplated, as we submit, that the Legislature, no less than the executive, of a State would fail to perform this great constitutional function.

In other words, we confidently insist for the reasons already fully indicated that the vacancy referred to in the Constitution is a something that must be carved out of a *term* to which a Senator has been chosen. It is a vacancy that must "happen," not by a predetermined fact, not by the occurrence of something we all know long in advance of its occurrence is absolutely sure to occur at a certain date, but a vacancy which "happens by resignation or otherwise:" that is, which happens in *some such manner* as a *resignation*, in some *like manner*, some unexpected manner, in some manner that we did not anticipate, some manner we did not expect, some like unexpected and unanticipated manner such as death, abandonment, expulsion, or other like unexpected occurrence, and not only by resignation, but *otherwise*.

THE PROCEEDINGS OF THE CONSTITUTIONAL CONVENTION OF 1787 FURNISH A CONCLUSIVE ARGUMENT AGAINST THE CONSTRUCTION CONTENDED FOR BY THE MAJORITY OF THE COMMITTEE.

The able Senator from Alabama [Mr. PUGH], in his speech on yesterday, devoted considerable space to a consideration of the proceedings of the Convention which framed the Constitution, and thought he could see in these an argument in favor of that construction of that portion of the instrument relating to temporary appointments of Senators by the executives of States so ably contended for by him. A consideration of these proceedings is both interesting and instructive; but as I shall contend, and as I believe I can demonstrate, so far from furnishing any argument in favor of the construction for which he contends, they furnish a very strong argument against that construction. In the original "Plan of a Federal Constitution," submitted to the Convention by Mr. Charles Pinckney on the 29th day of May, 1787, it was provided that the Senate of the United States should be chosen by the House of Delegates. That plan contemplated assigning to each State, not an equal number of Senators, but to some States a greater and some a less number, and the provision in that plan relating to vacancies read as follows:

> As their terms of service expire the House of Delegates shall fill them up by elections for —— years; and they—
>
> That is the House of Delegates—
>
> shall fill all vacancies that arise from death or resignation for the time of service remaining of the members so dying or resiguing.

This plan, therefore, provided, as in the Constitution as it stands to-day, on this subject, a *tribunal*—not the Legislature of a State it is true, but the House of Delegates—as the House of Representatives was called at that time, whose constitutional duty it should be to not only choose Senators originally, but their successors from time to time as their terms might expire, and then provided that that same tribunal should fill vacancies occurring from death or resignation, thus keeping up clearly the distinction between the filling of a term originally and the filling of vacancies that might occur *in such term*, precisely as we claim is the case in the Constitution as finally adopted.

In the report of the committee of detail submitted to the convention by Mr. Rutledge August 6, 1787, the clause on this subject read as follows:

> The Senate of the United States shall be chosen by the Legislatures of the several States. Each Legislature shall choose two members. *Vacancies may be supplied by the executive until the next meeting of the Legislature.* Each member shall have one vote.

It will thus be seen that in this original draft from the committee of detail, the simple term "vacancies," without any limitation or qualification whatever, was employed. Neither the word "happen" nor the words "by resignation or otherwise" were included. It was simply, "*Vacancies* may be supplied by the executive until the next meeting of the Legislature."

When the matter came up for discussion in the Convention Mr. Wilson of Pennsylvania objected to vacancies in the Senate being supplied by the executives of the States. He said it was unnecessary, as the Legislatures will meet so frequently. "It removes," said he, "the appointment too far from the people, the executives in most of the States being elected by the Legislatures. As he had always thought the appointment of the executive by the legislative branch wrong, so it was still more so that the executive should elect into the legislative department."

While Mr. Randolph argued that it was necessary in order to prevent, to use his own language, "inconvenient chasms in the Senate."

"True," Mr. Williamson said, as stated by Senator PUGH in his argument yesterday, "that Senators might resign *or not accept*." He said that, but he did *not* say, true, a *Legislature may fail to elect*. He did not state that as a reason why this power should be given to an executive. Nobody said that in the Convention. They did say that a man duly chosen might die or might *refuse to accept*, but no one ever suggested in the Convention a case where the Legislature should *fail to elect*, and not one of the distinguished Senators who favor the report of the committee in this case can point it out.

Mr. VANCE. If my colleague on the committee will allow me, I should like to ask him a question which I think is pertinent in this connection.

Mr. MITCHELL of Oregon. Certainly.

Mr. VANCE. Can the Senator point out any case in the Constitution where a duty being primarily imposed upon an officer therein named, the performance of that duty is conferred upon another officer contingent upon the failure of the first officer to perform his duty?

Mr. MITCHELL of Oregon. There is no such case in the Constitution. It can not be found. I have been trying here for the last half hour or more to demonstrate that very thing. I have been trying to prove that the men who framed the Constitution, after having designated a tribunal to perform a constitutional function, never dreamed of providing a substitute to perform that constitutional function in the event of a failure upon the part of the tribunal thus constitutionally provided to do its duty.

"True," Mr. Williamson said, as stated by Senator PUGH in his argument yesterday, "that Senators might resign or not accept," and gave that as his reason why there should be some provision authorizing the executives to fill vacancies, and on the question being taken to strike out the words "vacancies shall be supplied by the executives," the vote was 1 in favor of striking out and 8 against it, while Maryland was divided.

Now, whatever may have been the intention of the committee of detail, whether they intended that the words "vacancies shall be supplied by the executives" should include a case of a vacancy occurring at the expiration of a term, it is absolutely clear beyond all question that the clause as reported by the committee of detail would, by proper construction, include a case such as that now before the Senate, and had the Convention stopped in its attempt to reform this particular provision of the report of the committee of detail with the vote refusing to strike out these words "vacancies shall be supplied by the executives," then I, for one, would have no trouble whatever in agreeing with the majority of the committee. But, unfortunately for the argument of the committee and of the able Senators from Alabama [Mr. PUGH] and from Massachusetts [Mr. HOAR], the convention, while they determined by this decisive vote that the executives of States should be empowered to fill vacancies, determined later on that they would define and fix by appropriate language the *character of the vacancies* which should thus be filled by the executives of States. And several propositions were submitted looking to limiting and qualifying the words "vacancies shall be supplied by the executives."

One motion made by Mr. Williamson was to insert, after the words "vacancies shall be supplied by the executives," the words "unless other provision shall be made by the Legislature," and this proposition was combated by Mr. Ellsworth, who declared that he was willing to trust the Legislature of a State, but not to give the former—the Legislature—a discretion to refer appointments for the Senate to whom they pleased. Consequently the motion of Mr. Williamson was voted down by 4 ayes and 6 noes. Then it was that Mr. Madison moved to strike out of the clause, as reported by the committee of detail, all after the words "vacancies," and insert in lieu thereof the words "happening by *refusals to accept*, resignations, or otherwise, may be supplied by the Legislature of the State in the representation of which such vacancies happen, or by the executive thereof until the next meeting of the Legislature." True, this proposition of Mr. Madison was in the first instance agreed to *nem. con.*

Now, Mr. President, if we were to admit that if the clause had remained in that form, that then the construction contended for by the committee and by the Senators from Massachusetts and Alabama would be the correct one; but this I deny and will conclusively show, I think in a moment, unfortunately again for the argument of the committee and of the distinguished Senators who hold to that view, this portion of the Constitution was not left in this form, but as signed by the members of the Convention was remodeled and put in form as it stands to-day.

In other words, the clause, "by refusals to accept," which was a part of Mr. Madison's motion, was stricken out, so that while by the report of the committee of detail, as well as amended by the motion of Mr. Madison, the executives of States were authorized until the next meeting of the Legislature to fill a vacancy that might occur, not only by resignation or some such like cause, but also a vacancy caused by a *refusal to accept* on the part of a person theretofore *duly chosen* Senator by the *Legislature*, the provision, as finally remodeled, was entirely changed in this respect. Whatever, therefore, may have been the intention originally, or even throughout, of some of the members of that Convention, it seems to me perfectly clear that the final action of the Convention—and that is what we must look to to get the final conclusion of the mind of the Convention—limited the vacancies which could be filled by the executive to those carved out of a term by resignation or some other like cause, such as death, abandonment, or expulsion.

Mr. HOAR. I should like to understand the Senator. I do not wish to interrupt the course of his argument, but I wish to know whether he holds that in case of a refusal to accept the executive might fill a vacancy at the beginning of a term.

Mr. MITCHELL of Oregon. I think that is a very serious question.

Mr. HOAR. I thought the Senator indicated an opinion upon that subject.

Mr. MITCHELL of Oregon. I think that is a question upon which there can be a great deal said on both sides.

Mr. HOAR. I have no doubt what the Senator says is true; but I thought the course of the Senator's argument just now indicated an opinion on his part that there could be action by the executive in case of refusal to accept at the beginning of a term.

Mr. MITCHELL of Oregon. No; I have not intended to express any opinion on that question. I understand the Senator distinctly.

Mr. HOAR. The Senator is not prepared to give an opinion?

Mr. MITCHELL of Oregon. It is not necessary for my present purpose to express an opinion on that subject. All I have meant to say is that if the clause in the report of the committee of detail as amended by the motion of Mr. Madison had remained a part of the Constitution to-day, then, as a matter of course, there would be no question but the executive would have power to appoint a Senator in a case where the Legislature had chosen a person for a term and that person had refused to accept.

Mr. GRAY. How does that case differ from a vacancy which exists according to the opinion of the majority of the committee by reason of the Legislature failing to elect at all to a full term?

Mr. MITCHELL of Oregon. There is a difference, and I think a very wide difference.

Mr. GRAY. Perhaps I do not understand the Senator. I supposed he was alluding to a vacancy that existed by reason of the election of a person to a full term in the United States Senate and the refusal of the person so elected to accept. Is that the case the Senator is discussing?

Mr. MITCHELL of Oregon. I made the statement that Mr. Madison's amendment did provide for the appointment by the executive to fill a vacancy which arose in a case where the Legislature had duly chosen a person——

Mr. GRAY. For a full term.

Mr. MITCHELL of Oregon. For a full term, and that person had refused to accept.

Mr. GRAY. What was the action of the Convention?

Mr. MITCHELL of Oregon. I will come to that later. The Senator will see in a moment.

Mr. GRAY. How does that differ, then, from the case of a vacancy existing, as the majority say, by reason of the Legislature not electing at all? There are two things necessary to complete an election: First, the action of the Legislature; and second, the acceptance of the person elected.

Mr. MITCHELL of Oregon. I am not prepared to say that there is in law any real difference, but there is this difference in so far as the facts are concerned: In the one case no person has been chosen at all by the Legislature for the full term, while

in the other case a person has been chosen, although he has never accepted.

Mr. HOAR. Suppose they chose a person who was not constitutionally qualified in the State, as Albert Gallatin was chosen?

Mr. MITCHELL of Oregon. If the Senator will allow me, my argument is that the Madison amendment provided for an additional kind of vacancy that could be filled by the executive which is not included in the Constitution as it stands to-day. That is my argument, and there is no escape from it, as I shall show in a moment.

Mr. GRAY. I do not think the Senator caught the drift of my question.

Mr. HOAR. I should like to ask the Senator from Oregon if he is willing to state his opinion on that very interesting question. Albert Gallatin was chosen by the Legislature of Pennsylvania a Senator, and it was objected that he had not been a citizen nine years. In that case Mr. Gallatin, not being admitted to the Senate and the Legislature having adjourned, could the governor fill the vacancy or not?

Mr. MITCHELL of Oregon. I have already said to the Senator from Massachusetts that it is not necessary for the purpose of my argument here to express an opinion upon that subject.

Mr. HOAR. Very well.

Mr. MITCHELL of Oregon. But I should say not, decidedly not, if I were driven to it; although I confess in a case of that kind there is much stronger reason for the argument that the governor might fill the vacancy than in the case for which my distinguished friend is contending.

Mr. HOAR. But in the case I put, if the Senator will pardon me, which was put to me yesterday by the Senator himself in an interruption, the Legislature have done their best and they can not conscientiously agree. In the Senator's case, where he thinks the governor might fill the vacancy, the Legislature have not done their best, because without sufficient inquiry they have elected a man who is not qualified. Yet he thinks that the governor may fill at the beginning of the term in one case and not in the other.

Mr. MITCHELL of Oregon. I inquired of the Senator yesterday when he made that same argument whether the Senate of the United States is to determine, and if not the Senate then what tribunal is to determine whether, in the case of the failure to elect by a Legislature, that failure to elect has been brought about by the Legislature trying their best to elect and failing, or by the wanton act of the Legislature, and the Senator answered that the Senate could not determine that question.

Mr. HOAR. No; I beg the Senator's pardon, I made no such answer. I answered that the presumption was that the Legislature had done their best of course.

Mr. MITCHELL of Oregon. Mr. President, I will now try to find out "where I am at." [Laughter.]

The Madison amendment—and to this I invite the especial attention of Senators—did not empower the executive of a State to make temporary appointments to fill a vacancy at the commencement of a Senatorial term except such vacancy arose, or happened if you please, in one particular way, and that by a refusal to accept. So that the very provisions relied on by the committee and the distinguished Senator from Alabama as an argument in their favor—I refer to the Madison amendment—recognized the primary and exclusive right of the Legislature to choose a Senator in the first instance, and only provided that vacancies arising from resignation or other like causes, and also vacancies happening by reason of the refusal of a person who had been duly chosen by the Legislature to accept, should be filled by temporary appointments of the executive until the next meeting of the Legislature. Here the well-recognized rule *expressio unius exclusio alterius* applies; that is to say, the Madison amendment limited the power of the executive to appoint a Senator for the beginning of a term to the *one* case of the vacancy occurring *by a refusal to accept*.

This being so, it excludes the idea at once that the executive could appoint at the beginning of a term to fill a vacancy caused either by the failure or refusal of the Legislature to elect or in any other manner. It is therefore perfectly clear to my mind that even if the Constitution to-day stood precisely as Mr. Madison's motion left it, there would be no constitutional power or authority whatever vested in the governor of any State to make temporary appointments to fill vacancies existing at the beginning of a term, save and except such vacancy was caused by the refusal to accept the position of a Senator elect, who had been duly chosen by the Legislature; and the only difference between the provision as left by the Madison amendment and the provision as it stands to-day in the Constitution is this, that in addition to the vacancies happening by resignation or other like manner, which the executive may fill under the Constitution as it now stands, there was added by the Madison amendment *one* and *only* one other vacancy, and that vacancy was specifically defined, and the language used in defining it moreover presupposed the election of a Senator by the Legislature for that very term, and that a vacancy happens by his refusal to accept. To the history therefore of the proceedings of the Constitutional Convention on this subject is the very last place the distinguished Senators from Massachusetts and Alabama should go for an argument to support their interpretation of the provision under consideration.

It must be remembered the Madison amendment did not designate a vacancy happening by the expiration of the term of a Senator and the failure of the Legislature to elect. It simply declared that one of the vacancies which might be filled by temporary appointment of the executive was where there was a "refusal to accept," clearly and unequivocally implying that the Legislature had done its duty, and that the vacancy happened not by the failure of the Legislature to do its duty, but by reason of the unforeseen circumstance of the failure of the person elected to accept the office. How, then, the distinguished Senators from Massachusetts and Alabama, or from any other State, great lawyers as they are, and we all must and do cheerfully acknowledge them to be such, can argue before this Senate that the adoption of the Madison amendment to the report of the committee of detail furnishes an argument in favor of the power of the executives of States to make temporary appointments of Senators in a case where the Legislature has failed to elect, is beyond my comprehension.

The Madison amendment, I respectfully submit, stands on all fours in principle with the position for which I am contending and in favor of the views which the minority of the Committee on Privileges and Elections declare, and that is, where a vacancy occurs, or happens, if you please, by reason of the Legislature failing to choose a Senator at the time it is their constitutional privilege and duty to do so, is not such a vacancy as can be filled by the executive of a State. Mr. Madison undoubtedly had this very principle in view when he, instead of declaring in his amendment that a *failure of the Legislature to elect* would create such a vacancy as the executive could fill, he simply said, "by refusal to accept."

The Madison amendment was simply equivalent to saying this: If a Senator's term is about to expire and the Legislature of a State whose business it is to choose a successor chooses that successor and after the adjournment of the Legislature and during its recess he should either refuse to accept or die, that then you have such a vacancy as the executive could fill by temporary appointment, thus fully recognizing the doctrine so prominently apparent in the Constitution that to the *Legislatures* and not the executives of States belong *primarily* and *exclusively* the constitutional right to choose Senators.

THE LEGAL AND ALSO THE COMMON-SENSE INTERPRETATION OF THE CONSTITUTIONAL CLAUSE IN QUESTION CONCLUSIVELY REJECTS THE CONTENTION OF THE REPORT OF THE MAJORITY, THAT THE EXECUTIVES OF STATES HAVE THE POWER TO MAKE TEMPORARY APPOINTMENTS TO VACANCIES OCCURRING BY REASON OF THE EXPIRATION OF A SENATOR'S TERM AND THE FAILURE OF THE LEGISLATURE TO CHOOSE A SUCCESSOR.

And now in attempting a construction of these constitutional provisions it is worth while to inquire if it were the intention of the framers of the Constitution to confer authority on the executives of States to make temporary appointments in *all* cases of vacancies in a seat that might *occur*, or, if you please, happen, why were the four words "by resignation or otherwise" inserted in the Constitution?

With these four words omitted there would be much reason for holding that the governor would have the power to temporarily appoint whenever there was a vacancy occurring during a recess of the Legislature, no matter how happening, no matter how occurring—whether by death, resignation, expulsion, or the expiration of a term. In other words, in such a case one might well hesitate to deny that the clause would mean what the majority of the committee contend it now means with these four words in. All would agree that an authority to fill vacancies *occurring*, if the word "occur" instead of "happen" had been used, would include all vacancies, no matter how occurring.

Most of us would, perhaps not all, agree that vacancies happening where there were no words of limitation upon the term "vacancies" would include all vacancies in a seat, no matter how occurring, and this is my view. And I will here state, in giving construction to this clause of the Constitution, I do not personally, perhaps, place so much weight as some do on the word "happen" as in and of itself, when unqualified by other words, as so distinctly controlling the interpretation, as I do on the words "by resignation or otherwise." The word "happen," I admit, may have different meanings, the meaning depending entirely on the sense in which it is used, on the connection in which it is employed, on the subject-matter to which it relates, on the event to which it is applied, and the qualifying words employed in connection with this word.

The word may, I concede, be employed and sometimes is employed to signify a thing occurring, or to occur, as stated in the report of the majority, and of which the date is unknown in advance; as, for instance, it would not perhaps be considered a solecism to say, it so happens the Columbian Exposition opens on May 1 next; it so happens my friend from Massachusetts will be a certain age on the next anniversary of his birth, and so on; but the most common, usual signification of the term is something occurring "unexpectedly," "unusual," "without notice," "that comes by chance."

Now, in construing the clause of the Constitution under consideration, following the rule of interpretation indicated, we must, if we can preserve the sense, give some meaning to the words "by resignation or otherwise." This can not only be done effectually, but the clause taken altogether, as it seems to me, absolutely requires it shall be done by regarding them as a definition of the preceding words "if vacancies happen," and as a limitation of the same. Therefore, while the word "happen" if used in another sense and without any qualifying words, might be properly held to refer to an occurrence to take place in the future, at a time certain, of which we have knowledge, it is more than clear to my mind that its use here with these qualifying words, these words of limitation, is to designate solely such vacancies as may unexpectedly *occur* or *happen* in the *term* of a Senator, such as death, resignation, expulsion, abandonment, the acceptance of an incompatible office, or other like manner.

Mr. GRAY. Right there, if it will not interrupt the Senator in his very interesting exposition of the word "happen," I should like to make a suggestion.

Mr. MITCHELL of Oregon. I yield with pleasure.

Mr. GRAY. I suggest to the Senator that the illustrations he has used to indicate that the word "happen" may have the signification attributed to it by the report of the majority as synonymous with "occur" or "take place," hardly bear out even in the cases he supposes that interpretation, because if we say that it so happens, as we may, that the birthday of the Senator from Massachusetts—which I believe was the Senator's illustration—comes on the 1st day of May, if that word "happens" is used with propriety it must refer to some other contemporaneous event, the happening of which is a matter that is unexpected and to which, for the purpose of the speaker, the quality of being unforeseen can be attributed. There is always understood in connection with such a phrase as that a reference to some contemporaneous matter which occurs unexpectedly on the same day.

Mr. MITCHELL of Oregon. The Senator is entirely right.

But what is the meaning of the word "otherwise" in the connection in which it is employed in the phrase, "If vacancies happen by resignation or *otherwise*."

The distinguished Senators from Massachusetts and Alabama, and other Senators who support the majority report, claim that the word "otherwise" in this connection, means "*in any other manner*," while we of the minority contend, that under the well-settled and universally recognized rules of constitutional and statutory construction, it means "*in like manner*," or some such manner as resignation.

It is a well-settled rule of judicial decision that where specific words are used, followed by more general words, the general words are qualified by the specific words. Innumerable authorities might be quoted to sustain this position. In Bishop on Statutory Crimes, page 246, we find this:

Lord Bacon observed that "as exception strengthens the force of a law in cases not excepted, so enumeration weakens it in cases enumerated." This doctrine is in part the foundation of the celebrated rule that where particular words are followed by general ones, as if after the enumeration of several classes of persons or things, the words are added "*and all others*," these general words are restricted in meaning to objects of the like kind with those specified. Therefore under statute 29 Charles II, chapter 7, section 1, providing that no tradesman, artificer, workman, laborer, or *other person whatsoever* should exercise his ordinary calling on the Lord's Day, the words "*other person*" were held not to include a farmer, who is not a person of the like denomination with those persons specifically mentioned. For as Bayley, J., said, "If all persons were meant, there was no need of the specific enumeration."

The books are full of illustrations similar in their nature and all tending to precisely the same end. I will attract attention to one or two which my distinguished friend, the chairman of the committee [Mr. VANCE], has so aptly set out in the report of the minority; for instance—I quote from the views of the minority—

It is thus stated by [Willis, justice, in Fenwick *vs.* Schmaltz (L. R. 3 C. P., 315, cited in Endlick, page 568):

"A general word which follows particular and specific words of the same nature as itself takes its meaning from them and is presumed to be restricted to the same genus as those words; or, in other words, as comprehending only things of the same kind as those designated by them, unless, of course, there is something to show that a wider sense was intended."

Now I will attract attention to one other case from the Supreme Court of the United States, set out in the views of the minority. It is the case of Ham *vs.* The State of Missouri, and will be found in 18 Howard, page 126:

The plaintiff in error was indicted for a trespass on land belonging to the State of Missouri, which had been granted in 1820 to that State for school purposes, being every sixteenth section of certain boundaries of land. Ham pleaded that by another act in 1811 the Congress of the United States had reserved and set apart from entry and sale certain lands against which there were outstanding claims until said claims had been settled. The terms of the grant to the State of Missouri were of every sixteenth section "unless the same had been sold or otherwise disposed of."

"*Unless the same had been sold or otherwise disposed of.*" Mr. Ham, who was indicted, claimed that because in 1811 the lands had been *reserved until certain claims could be settled*, they had been *otherwise disposed of* within the meaning of this section, and that therefore the land did not go to the State of Missouri. The Supreme Court of the United States knocked that argument into a cocked hat in about a minute, and here is what the court said:

The language and plain import of the sixth section of the act of the 3d of March, 1820, confer a clear and positive and unconditional donation of the sixteenth section in every township; and when these have been sold or otherwise disposed of other and equivalent lands are granted. Sale, necessarily signifying a legal sale by a competent authority, is a disposition, final and irrevocable, of the land. The phrase "or otherwise disposed of" must signify some disposition of the property equally efficient and equally incompatible with any right of the State, present or potential, as deducible from the act of 1820 and the ordinance of the same.

The minority of the committee proceed to say:

Here is an unequivocal avowal by the highest court in the United States of the existence of the rule, that the general term must be restricted and governed by the particular term, the particular term here being "sale." The court declared that the disposition "otherwise" must be equival nt and equally efficient in all its legal effects to a sale.

Another case often quoted in the books is, where a statute employed the words "wherry, lighter, or *other craft*, the word "craft" was held not to include a steam tug; because, although a steam tug is a "craft," yet it is not one of the same character as a "wherry" or a "lighter."

The late Senator Ben. Hill, of Georgia, universally conceded to be a lawyer of great ability, in the debate in the Bell case on the 3d of April, 1879, gave this definition to the words "if vacancies happen by resignation, or otherwise," as used in the Constitution. He said:

Now, the word "otherwise" there, as the Senator well knows, under the legal decisions, has a meaning; it has a very definite and well-settled meaning; and that is this: A vacancy that happens *otherwise* is one that is similar to those enumerated. For instance, a vacancy may happen by death, resignation, or *otherwise*. Otherwise, how? In some *similar method* upon the incumbent. The vacancy occurs by death upon the incumbent; the vacancy occurs by resignation—the act of the incumbent; and if so it occurs in any other wise the word means "any vacancy occurring otherwise;" that is in a similar manner upon the incumbent; that is, if the incumbent shall be expelled; that is, if the incumbent should not take his seat after he has been elected. The word "otherwise" there evidently means a vacancy happening in a similar manner by casualty to those specified."

Senator Hill, in further discussing this question and in defining the meaning of the word "otherwise," as used in the Constitution, used this language:

I find that this rule grew into a maxim in the days of Lord Hale and took, as all legal maxims did in those days, the Latin form, and was expressed in Latin thus: *Noscitur a sociis*, which means, "it is known from its associates." The meaning of the words is, "it may be known from the accompanying words."

Further quoting, he said:

Mr. Wharton in his Law Dictionary has the same legal maxim. He goes further. He quotes the language thus: *Noscitur ex socio, cognoscitur ex se.* It means this: He who can not be known from himself may be known from his associates; that is, you are not to get the meaning of the word "otherwise" from itself in this case. You must get its meaning from its association—from its connection.

But the Constitution itself in other clauses furnishes a most convincing argument in favor of the construction for which I am contending. We have two instances in other clauses of the Constitution where the term "happen" is used. Section 2, Article II, says:

The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session.

While section 2, Article I, provides:

When vacancies happen in the representation from any State the executive authority thereof shall issue writs of election to fill such vacancies.

These provisions, Mr. President, I am somewhat surprised, are quoted and relied on as an argument to support the construction contended for by the majority of the committee. For instance, it is said, and truly said, by the distinguished Senator from Massachusetts [Mr. HOAR] that under the first of these clauses it is well settled, in accordance with the opinions of several of our Attorneys-General and the practice of the Government, that where an office becomes vacant during the session of the Senate and the Senate adjourns before it has been filled, a vacancy happened during the recess of the Senate within the meaning of this clause of the Constitution, and that the President's power to fill the vacancy comes into life.

This, Mr. President, is quite true; but unfortunately in using it as an argument, the distinguished Senator assumes that the clause of the Constitution in this respect is in all respects similar, not only in phraseology, but meaning, with that relating to the temporary appointment of Senators by the executives of States. This, Mr. President, is the fatal vice in the argument of the distinguished Senator. The clauses are not similar, either in phraseology or meaning. They are widely different. In the one case the terms "*all* vacancies that may happen" are employed without any words of limitation or qualification whatever, while in the clause relating to the appointment of Senators it is, "if vacancies happen *by resignation or otherwise.*"

Here the qualifying words "by resignation or otherwise" are employed, while they are omitted in the constitutional provision to which attention has been attracted. The same is true in reference to the clause in section 2, Article I. There there is no limitation or qualification; no words whatever to qualify the meaning of the word "happen." "When vacancies happen in the representation from any State," not "when vacancies happen *by resignation or otherwise*," but "*when vacancies happen*," no matter how. So that, Mr. President, these clauses and the interpretation placed upon them in the past, so far from being arguments in favor of the construction contended for here by the majority of the committee, are just the reverse.

The Congress, in the Revised Statutes, section 1769, enacted as follows:

> The President is authorized to fill all vacancies which may happen during the recess of the Senate by reason of death, or resignation, *or expiration of term of office.*

Here it will be observed the distinction between this provision and the other provision of the Constitution is marked and specific. In the one case the executive of a State is authorized, where vacancies happen during the recess of the Legislature by resignation or otherwise, to make temporary appointments. Here Congress has added in this statute another kind of vacancy, to wit, "expiration of term of office." This legislation is in pursuance of that clause of the Constitution which declares in Article II, section 2, that "the President shall have power to fill up *all* vacancies that may happen during the recess of the Senate by granting commissions which shall expire at the end of their next session."

Here it will be observed the phraseology of the Constitution is wholly different from that relating to the temporary appointment of a Senator by the executive of a State. Here the President has not only the power to fill up all vacancies that may happen by resignation or otherwise, but all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session. In the one case there is a studied effort to specify the kind of vacancy—that is to say, one arising from resignation or through like cause, while in the other case there is no limitation whatever upon the power of the President to fill during the recess of the Senate. It is not only a vacancy occurring by death, by resignation, or any other like cause, but "*all* vacancies." And hence it was that Congress in enacting section 1769 of the Revised Statutes specified vacancies occurring not only by death and resignation, but by "*expiration of term of office*," all of which is clearly authorized by the provisions of the Constitution referred to. The same is true of that other provision to the effect that "when vacancies happen in the representation from any State the executive authority thereof shall issue writs of election to fill such vacancies."

Here it has very properly been held, as we have seen, that the executive of a State has the power to order the filling of all vacancies which have actually happened in the mode therein pointed out, no matter how a vacancy may have occurred—whether by death, resignation, or expiration of the term of members previous to the election of their successors. And this is necessarily so from the fact that no limit or qualification whatever appears in the constitutional provision limiting the vacancies specified to such as have occurred in a certain way as contradistinguished from vacancies which may occur or happen in anyway whatever. Therefore it is, Mr. President, that so far from the construction placed upon these several provisions of the Constitution being an argument in support of the committee in this case, they are each of them, as I view it, a most convincing argument to the contrary.

A leading Senator in discussing the Rantoul case in 1851 refers to this very subject in the following language:

> If the framers of the Constitution had intended to confer the same sort of power, they would have used the same terms—terms equivalent to each other in each case—but we find them using very different terms. This shows that the powers were conferred with different purposes in each case.

Another distinguished Senator, commenting upon the same question, said:

> I think there is a great deal of force in the comparison made by one of the Senators from South Carolina between the language used in this case and the language used in giving the President power to fill vacancies during the recess of the Senate. If the framers of the Constitution intended to apply the same rule to both, they would have used the same language in both cases, but we find them using very different language. I concur entirely with the Senator in relation to that point.

The committee in its report, and the distinguished and able constitutional lawyer who drew that report [Mr. HOAR] also in his remarks yesterday in support of it, place much stress by way of argument in favor of a liberal construction of the Constitution upon the fact that while the Constitution provides that in case vacancies happen by resignation or otherwise the executive may make temporary appointments until the next meeting of the Legislature, that it has been frequently held heretofore by the Senate, which I admit, that such temporary appointees hold their offices, not merely until the initial meeting, but until the end of the next Legislature, unless a Senator is duly elected before that time and his credentials presented to the Senate.

But I respectfully submit to my distinguished friend whether after all this construction of the clause in question is anything more than that which is plainly and clearly and necessarily authorized by the plain wording of the charter? Is the distinguished Senator, in other words, quite sure that the words "until the next meeting of the Legislature" were intended by the framers of the Constitution to apply to the duration of the term of the temporary appointee? On the contrary, do they not rather relate to the time within which, and fix definitely the period of time up to which the executive may continue to exercise the power of temporary appointment? In other words, are not these words, "until the next meeting of the Legislature," intended as a limitation upon the power of the executive to make such temporary appointments after the meeting of the next Legislature, although a vacancy may have happened by resignation or otherwise which may not be filled for days or weeks after such meeting?

This, I believe, is the true construction of this clause of the Constitution. And in this view I am supported by some of the ablest constitutional lawyers who have ever discussed it. Such was the view expressed in a report of the Judiciary Committee of this Senate, submitted January 16, 1854, in the case of Samuel S. Phelps, a temporary appointee from the State of Vermont, while similar views were expressed as stated in that report by many able Senators in the two previous cases of Mr. Winthrop and Mr. Rantoul of Massachusetts, in 1851; and of Mr. Meriwether and Mr. Nixon of Kentucky, in 1852. And a careful examination and reading of the Constitution itself leads strongly up to this conclusion.

The language of the Constitution is "if *vacancies happen* by resignation or otherwise during the recess of the Legislature of any State," not "if *a vacancy happens* by resignation or otherwise during the recess of the Legislature of any State," but "if *vacancies* happen," not "if vacancies happen in *several* States," not "if a vacancy happens in any State," but "if vacancies happen during the recess of the Legislature of any State, the executive thereof may make," not a "temporary *appointment*"—that is not the language of the Constitution, but he "may make temporary *appointments*," the plural term being used, "until the next meeting of the Legislature;" thus clearly showing that the framers of the Constitution, in agreeing to this provision, had in their minds the contingency of the happening of more than one vacancy from the same State during the recess of the Legislature, not more than one in the sense claimed in the majority report, where the claim is made that the plural was intended to include a vacancy occurring by a failure of the Legislature to elect, but in the sense that the temporary appointee might die, resign, refuse to accept, or be expelled, before the meeting of the Legislature, and hence what was intended by the language "may make temporary appointments until the next meeting of the Legislature" was that when and as often as any vacancy should occur" by resignation or otherwise during the recess of the Legislature of any State, that then the executive of such State should, at his option, have the power to make either one temporary appointment or more than one temporary appointment, should more than one such vacancy occur before the Legislature should meet and have an opportunity to elect, and might continue to thus exercise his constitutional power of making temporary appointments when and as often as any such vacancy should occur "*until* the next meeting of the Legislature, which shall then fill such vacancy or vacancies." Whether, therefore, Mr. President, the construction referred to by the venerable Senator from Massachusetts [Mr. HOAR], by which a temporary appointee to a vacancy is held to be entitled to hold his seat until the next Legislature either elects or has opportunity to choose a Senator, and which is cited as a controlling precedent for a most liberal construction of those clauses of the Constitution now under consideration, is or is not a liberal or literal construction of that clause depends entirely upon how the clause is regarded—what it means—what was the intention of the framers of the Con-

stitution by the use of the phraseology "*until* the next meeting of the Legislature."

If the latter portion of the clause of the Constitution, "the executive thereof may make temporary appointments until the next meeting of the Legislature," is to be construed as defining and fixing the period or duration of the term for which an appointee shall hold his office, then it would follow that in every case of a temporary appointment by the executive to fill a vacancy the appointee would continue to hold his office as Senator until the next meeting of the Legislature. If such is the construction, then there could be no exception, but every such appointee's tenure of office could not be interfered with, any more than can the six-year term of any one of us be interfered with, except by the happening in the case of a temporary appointee of the one *specific thing;* that is to say, "the next meeting of the Legislature."

But that this is not the construction that should be placed upon this clause of the Constitution may be shown to be evident by this illustration: Suppose my term as Senator is to expire on the 4th day of March next. Suppose on the 1st day of May next, during a recess of the Legislature, I resign. There would be a vacancy which the executive of my State clearly, as we would all agree, would have the power to fill. He makes a temporary appointment to fill such vacancy. The appointee is sworn in next December at the meeting of the Congress, but there is no session of the Legislature of Oregon between that date and the 4th of March next, when my term expires. On the contrary, there is no meeting of the Legislature until the January following.

Would it be contended by any Senator that the tenure of office of the temporary appointee of the executive would in such a case extend, in the language of the Constitution, "*until* the next meeting of the Legislature?" Or must it not be conceded by everyone that the term of office of such temporary appointee would be vacated on the 4th day of March next—the date of the expiration of my regular term? From this illustration and others that might be given, it is to my mind perfectly clear that the word "*until*" in the Constitution, instead of having relation to or defining the duration of the term of office of the temporary appointee of the executive, is a word of limitation upon the power of the executive to make an appointment.

Mr. DANIEL. Would it interrupt the Senator if I should ask him a question?

The PRESIDING OFFICER (Mr. MANDERSON in the chair). Does the Senator from Oregon yield to the Senator from Virginia?

Mr. MITCHELL of Oregon. Yes, sir.

Mr. DANIEL. When does the Senator from Oregon think that the appointment made by the executive expires?

Mr. MITCHELL of Oregon. I think it expires as soon as the Legislature that meets next after the appointment is made elects a successor and the credentials of the successor are presented to the Senate. If the Legislature goes through its session and fails to elect, then his term expires when the Legislature expires.

Mr. DANIEL. May I ask the Senator a further question?

Mr. MITCHELL of Oregon. Certainly.

Mr. DANIEL. From what part or word in the Constitution does the Senator collect the fact that the appointment expires when the Legislature meets if the governor has already filled the vacancy in a term which has been vacated? Where is there any limitation upon the duration of the term unless it be found in that clause of the Constitution "until the next meeting of the Legislature?"

Mr. MITCHELL of Oregon. I will come to that point presently.

But another and still stronger illustration will show conclusively that the words "until the next meeting of the Legislature" as used in the Constitution never were intended to fix the duration of the term of office of an appointee, much less to limit it to the next meeting of the Legislature.

Suppose my term of office expires on the 4th of March next; the Legislature of my State meeting next January elects my successor, his term commencing the 4th of March next; the Legislature then adjourns, and in February I resign my seat. There clearly again is a vacancy which the executive of my State has the power to fill under the Constitution, and he makes a temporary appointment, under the authority conferred on him by the Constitution authorizing him to make "temporary appointments," "until the next meeting of the Legislature;" but the Legislature does not meet again until the following January, will any Senator contend that such appointee could hold until the next meeting of the Legislature?

Will not every Senator on this floor concede in a moment that he would not, but on the contrary that his term would expire on the 4th day of March, when the Senator elected by the Legislature as my successor would succeed him? There is no more reason therefore for holding that the term of a temporary appointee by the executive expires immediately on the next meeting of the Legislature than there is for holding that his tenure of office extends until the next meeting of the Legislature.

The true construction, therefore, I take it, of this clause of the Constitution is simply this: That the power of the executive to appoint temporarily to a certain vacancy is limited to a certain specific period of time, namely, from the date when the vacancy happens "until the next meeting of the Legislature," but that the *term* of the person so temporarily appointed within that period of time to fill a vacancy may or may not, according to the circumstances of the case, extend "until the next meeting of the Legislature," and that the proper construction as to the duration is, no intervening circumstance happening to limit the term, that it extends until the next Legislature shall have adjourned, so that full opportunity may have been given to such Legislature to elect a successor. This opportunity afforded and the Legislature having adjourned without choosing a Senator, then the term of the temporary appointee is at once vacated.

This construction is not new. It is one that has received the sanction of some of the ablest lawyers who ever held seats in the Senate, not merely strict constructionists, but those of the opposite school of constitutional interpretation. It was advocated and urged as the proper construction by a number of leading Senators in the debate over the successorship to Henry Clay, notably by Senator Brooke, of Mississippi, who said:

It is contended that the Constitution limits or extends, as the case may be, the appointment by the executive to the next session of the Legislature. Such, sir, is not my reading or understanding of this clause. That clause reads as follows: "And if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies." Now, sir, my construction is that the word "until," which is the limitation, is a limitation upon the power of the governor, or rather upon the time within which he may exercise the power of appointment, and not upon the term of the appointment itself.

The late distinguished Senator from New Hampshire, Mr. Hale, in placing a construction upon the words of the Constitution "until the next meeting of the Legislature" in the contested case of Rantoul, from Massachusetts, on the 7th day of February, 1851 (volume 23, Congressional Globe, page 462), said:

There is another thing to which I wish to call the attention of the Senate. I find on page 31 of "Hickey's Constitution" the certificate of Mr. Buchanan, Secretary of State, that "this copy is correct in text, letter, and punctuation." I take it that it is so, and not to affect any great learning above all the rest of mankind, I wish to call the attention of the Senate to that clause of the Constitution which has been quoted in order to see what the adverb "until" qualifies. It strikes me that it qualifies the verb "make." Then the executive of a State may *make* temporary appointments *until* the next meeting of the Legislature. If that be the true grammatical construction of the clause, it means that the moment that the Legislature meets his power to make appointments expires; it is *functus officio*. Then the power is vested in the Legislature, "which shall then fill such vacancies." This "until" does not relate to the continuance of the person in office, but simply qualifies the time when the power shall be exercised by the governor——

Mr. HOAR. What case is that?

Mr. MITCHELL of Oregon. That was the case of Rantoul *vs.* Winthrop, a contested case as to whether Mr. Rantoul or Mr. Winthrop was entitled to a seat from Massachusetts, the Senator's own State. I quote from Mr. Hale, of New Hampshire, in the Rantoul case, from Massachusetts, in February, 1851. He said it—

simply qualifies the time when the power shall be exercised by the governor, and until the Legislature meets; then the power is vested in the Legislature. That, it strikes me, is the true grammatical as well as the commonsense interpretation of the Constitution. It does not follow that it is incumbent on the Legislature to make the appointment the first day; but when they have exercised their power and sent us the usual evidence of their action, we have no further duty to perform.

Senator Walker of Wisconsin, in the Rantoul debate in 1851, after quoting the clause of the Constitution, "until the next meeting of the Legislature," said:

That is as much as to say that the executive may make temporary appointments until such time as the Legislature shall next meet. What is to be done after that time? Then the Legislature shall "fill such vacancies." It seems to me clear that the Constitution intends by using these words to describe or point out who shall fill the vacancy at the two different periods. Until the next meeting of the Legislature the governor of the State shall fill it, after that the Legislature shall fill it, consequently the word "until" has nothing whatever to do with qualifying the term of Senator.

Continuing further, he said:

It seems to me that the construction of the Constitution would clearly express what was intended if it read thus: "And if vacancies happen by resignation or otherwise during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the Legislature shall meet;" but after the Legislature shall have met it "shall fill such vacancy." It will be observed also that the term "temporary appointments" in the plural is used. It does not say "temporary appointment." I take that to mean this: Suppose the governor makes one appointment to fill the vacancy temporarily, and that appointee dies or does not accept, he may appoint again. Suppose he dies or does not accept, the governor may make another appointment and keep on making appointments from time to time up to the period of the next meeting of the Legislature. The Constitution declares that the Legislature shall then fill the vacancy.

Senator Downs, in discussing the contested case of Rantoul in 1851, said:

Suppose the term of a Senator elected, not appointed, expires, and the Legislature does not elect. There is a vacancy which must be filled, and

there can be no doubt that when the Legislature adjourns without filling it the vacancy can not be filled until the Legislature meets again. It is expressly limited to that time by the Constitution.

Senator Downs, commenting upon and giving construction to the words, "until the next meeting of the Legislature," in the contested case of Rantoul, said:

I can not give the same construction as the Senator from South Carolina to the other clause of the Constitution when he supposed the word "until" to apply to the continuance of a Senator appointed by the governor. The Senator from Wisconsin properly took the ground that the "until" applied to the time the authority of the governor was to be exercised. It is necessarily so, because a vacancy might happen in the representation of a distant State—California for instance—and it would require a considerable time before a Senator elected could make his appearance and have his credentials presented. The idea of the Constitution was that the vacancy should be temporarily filled until the Legislature should elect, and the seat become entirely vacant when the Legislature adjourns without filling it."

Senator Underwood of Kentucky approved the views expressed by Senator Hale in the following language:

Now, the expression of the Constitution is that the governor is to make temporary appointments until the next meeting of the Legislature. I think it perfectly clear that the gentleman from New Hampshire [Mr. Hale] and the gentleman from Wisconsin [Mr. Walker] have demonstrated that the term "until" qualifies merely the time within which the governor is to exercise that power. Before the meeting of the Legislature the governor is to exercise the power of making temporary appointments; after the meeting of the Legislature nobody but the Legislature is to fill the vacancy.

This expression, therefore, does not limit the duration of the appointment, but only qualifies the time within which the power is to be exercised by the governor. It is to say to his appointee, "Go and take that seat and hold it and exercise the duties belonging to it." How long? Up to the time that an individual shall come with a commission from another authority. He is *locum tenens* of the seat until some other person comes with a commission That has been the construction of the Constitution from the beginning; that from a higher authority and says, "Give way to me; I am entitled to take it." is the report from the Judiciary Committee. It does seem to me that the language of the Constitution conveys these ideas just as plain as any language possibly could. It carries out the object and intent of the framers of the Government.

Senator Mason of Virginia in the debate in the Rantoul case said:

I submit, then, with perfect confidence that the word "until" is intended to limit the period within which the executive may appoint and to limit nothing else. The executive may appoint until the Legislature meets, but when the Legislature meets the power vested in the executive ends. The word "until," then, limits the time within which his duties shall be discharged by the executive and it limits nothing else. It has been construed by some, I believe, to limit the period during which the appointee of the executive shall continue in the Senate. It does not fix such limit at all. The term of the office is six years, and if a vacancy occurs in the term that vacancy, in the contemplation of the Constitution, is not filled until somebody is appointed for the whole of the remainder of the term.

Senator Mason, in further discussing the Rantoul case, said:

I submit, then, that the proper construction of the Constitution is that a temporary appointment by the executive does not fill the vacancy. It is an appointment temporary in itself, and that appointment ends when the vacancy is filled by the proper appointing power. Power is given to the executive not to make a "temporary appointment," but to make "temporary appointments;" for if the term used was in the singular number, when the executive made a single appointment his function would terminate; and if his appointee ceased to act in consequence of death, resignation, or otherwise, the place would remain vacant. The power then is given to make temporary appointments until the next meeting of the Legislature.

But, Mr. President, suppose I am wrong in this construction. Suppose the words "until the next meeting of the Legislature" are intended, not to limit the power of temporary appointment vested in the executive, but rather to limit the term of the person so temporarily appointed; even then I should confidently insist that the construction placed upon it as to the duration of such term in the case of Smith from Maryland in 1809, and which has been adhered to ever since without an exception, to the effect that the word "meeting," as used in the Constitution, has reference to and includes the whole of the next term or session of the Legislature, is not only not a strained construction or a liberal construction that can be used as an argument here by Senators in favor of the construction that the majority of the committee seek to place upon the language of the Constitution vesting the power of temporary appointment in the governor, but it is rather the only sensible construction warranted by the words used. As stated by Senator Butler of South Carolina, in the contested case of Rantoul in 1851, in discussing this very question—

The next ensuing Legislature that meets after executive appointment has the power to make an effectual appointment in the place of the sitting member. My colleague is mistaken in supposing that a sitting member under executive appointment can not hold his office longer than the day of the meeting of the Legislature; because to suppose that the Legislature must make an appointment on the very day that it meets is inconsistent with all the analogies upon subjects of this kind. Why, a court has but one term and it is a day; and the session of the Legislature is a unit and to the same purpose it may be regarded as a day—as an entire term. It is during that term that a Legislature has a right to exhaust this power.

The distinguished Senator from Mississippi [Mr. GEORGE] yesterday referred to the case of the British Parliament, where the whole term is treated as one day and all acts passed during the whole session relate back and take effect from the first day of the meeting of Parliament.

Again, Senator Davis of Massachusetts, in the same debate, in discussing this question said:

Now, it is a very fair construction of the term "meeting" that it is tantamount to and synonymous with the term "session." It applies, then, to any period of the session.

I refer to this for the purpose of answering, or trying at least to answer, the argument of the Senator from Massachusetts [Mr. HOAR], when he claims that a liberal construction was placed upon that provision of the Constitution, which extended the term of a temporary appointee not only to the first day of the meeting of the Legislature, but to the end of the session of the Legislature.

WHAT ARE THE PRECEDENTS?

Now, Mr. President, a few words as to the precedents.

It is an historical fact worthy of note, not to be lost sight of in the discussion of this important constitutional question, that in the very first case ever presented to the Senate in which the construction of this clause of the Constitution as to the power of the executive of a State to appoint a Senator was involved, the Senate, then composed of many of the very men who participated in the formation of the Constitution, adopted without hesitation that view of the Constitution for which I am now contending. That was the case of Kensey Johns, of Delaware.

Mr. HOAR. Before the Senator begins on that point will he permit an interruption?

Mr. MITCHELL of Oregon. Certainly.

Mr. HOAR. I think the Senator would like perhaps to correct one statement which has no relation to his argument. There was never any contested case between Mr. Rantoul and Mr. Winthrop. There was never any question raised, as I recollect, and I am quite sure I am right, in regard to Mr. Rantoul's title to his seat. I will state the facts. Mr. Winthrop raised the question himself. The Legislature having met, and Mr. Winthrop holding his seat by the appointment of the governor, he raised the question whether he should continue to sit. Thereupon the Senate voted that he could continue until the Legislature elected a successor and the credentials were presented.

Mr. Winthrop presented Mr. Rantoul's credentials and then vacated the seat voluntarily. After that, Mr. Rantoul not instantly appearing to claim his seat, a resolution was proposed in the Senate that a Senator under such circumstances was entitled to hold the seat after the presentation of his successor's credentials. The debate went on in the absence of both Senators, neither claiming the seat. Then somebody observed that it was a question of no practical application, and it was not worth while to discuss it any further. It does not affect at all the Senator's citation, but the Senator quoted it as if it was the case of Rantoul vs. Winthrop. There never was any contest.

Mr. MITCHELL of Oregon. The Senator is entirely right. He has stated the facts as they are. I simply spoke of it as a contested case in order to attract the attention of the Senator to it.

Mr. HOAR. I remember the case very well, but when the Senator spoke of it as a contest I was amazed; I thought it was something I had not seen.

Mr. MITCHELL of Oregon. No; the facts are as stated by the Senator, but it led to a long and a very able debate, in which at least many of the questions which we are now discussing were presented very ably and at great length.

Mr. VILAS. I should like to state a question to the Senator in connection with the point he has been discussing.

Mr. MITCHELL of Oregon. Certainly.

Mr. VILAS. Suppose first an appointment by the governor to a vacancy happening by resignation, do I understand the Senator to hold that at the next meeting of the Legislature, whether in special called session or in regular session under the constitution and laws of the State, if no election is made the commission terminates?

Mr. MITCHELL of Oregon. Yes, that is my view; that is, it terminates when the Legislature adjourns, not before, unless there has been an election.

Mr. VILAS. After the Legislature has adjourned failing or being unable to elect, there remains another vacancy. Can the governor appoint to that?

Mr. MITCHELL of Oregon. Not at all, in my opinion. The prerogative of the governor is exhausted; his power is gone by the meeting of the Legislature.

Mr. VILAS. That then makes two cases in which the Senator holds the governor can not appoint under his construction, one where the vacancy occurs by reason of the expiration of a regular term fully served out, and the other where a vacancy happens because the Legislature has not chosen to fill the vacancy.

Mr. MITCHELL of Oregon. That is my view precisely, and I think no distinction whatever can be drawn between the two cases, if indeed these constitute *two* vacancies, or merely a continuance of the *one* vacancy, because in either case the Legislature whose duty it is to choose a Senator has met and failed to perform its duty.

Mr. VILAS. But has not the vacancy in the second case happened by an accident, as it were?

Mr. MITCHELL of Oregon. Not at all. It has happened or continued to exist by reason of the failure of the Legislature to perform a constitutional function. That is my view.

When interrupted by the Senator from Massachusetts I was about to refer to the case of Kensey Johns, of Delaware, which was the first time in the history of the Government when the question we are now considering was brought to the attention of the Senate. In that case George Read, a Senator from the State of Delaware, resigned his seat in December, 1793, during the recess of the Legislature of that State. The Legislature met in January and adjourned in February, 1794, without choosing a Senator.

On the 19th of March Kensey Johns was appointed by the governor of said State to fill the vacancy, and when his case came before this body it was decided that Mr. Johns was not entitled to his seat for the reason that a session of the Legislature had intervened between the resignation of Mr. Read and the appointment of Mr. Johns. This is the very case put by the Senator from Wisconsin [Mr. VILAS]. The credentials of Mr. Johns in that case were referred to the Committee on Elections March 24, 1794, the committee being composed of Senators Bradley, Ellsworth, Mitchell, Rutherford, Brown, Livermore, and Taylor.

This committee, after reciting the facts, submitted a report March 28, 1794, accompanied by the following resolution:

Resolved, That Kensey Johns, appointed by the governor of the State of Delaware as a Senator of the United States for the said State, is not entitled to a seat in the Senate of the United States, a session of the Legislature of the said State having intervened between the resignation of said George Read and the appointment of said Kensey Johns.

This report was adopted on a yea-and-nay vote of 20 yeas and 7 nays. I have the vote here. It was a very decided vote—a two-thirds vote.

Mr. VANCE. Will my colleague on the committee allow me to ask him if he has taken pains to notice how many Senators who participated in that decision had been members of the Constitutional Convention?

Mr. MITCHELL of Oregon. I have not, I regret to say. I intended to look that up, but it slipped my mind. My impression is that there were quite a number.

Mr. DOLPH. I suggest to my colleague to read the vote.

Mr. MITCHELL of Oregon. I will read the vote. Those who voted "yea," that is, that he had no right to a seat, were: Senators Bradford, Bradley, Brown, Burr, Butler, Cabot, Edwards, Ellsworth, Frelinghuysen, Gunn, Hawkins, Jackson, King, Langdon, Livermore, Martin, Mitchell, Monroe, Robinson, and Taylor.

The nays were: Senators Foster, Izard, Morris, Potts, Rutherford, Strong, and Vining.

This case is infinitely stronger than the one now before the Senate, as in that case there was originally such a vacancy as the executive unquestionably had the right to fill by a temporary appointment "until the next meeting of the Legislature," because it was carved out of the term for which Mr. Read had been elected; but, although this was so, the Senate decided by this two-thirds vote that because a meeting of the Legislature had intervened subsequent to the happening of the vacancy it was the duty, and the exclusive duty, of such Legislature to fill the same under the provision of the Constitution, and that not having done so, then no such vacancy existed as is contemplated by the Constitution, which could be filled by the temporary appointment of the executive.

Subsequent to the determination of the case of Kensey Johns, a number of cases occurred between that date and the Lanman case in 1825, in which the temporary appointees were seated, but in reference to which, with a single exception, that of the case of Uriah Tracey, an appointee from the State of Connecticut in 1801, there was no question raised, just as in the case of my friend Senator PASCO, who was admitted the other day without a question being raised at all.

The cases seem to have gone along without the attention of any Senator having been called to them. These were the cases of William Cocke from Tennessee in 1797, of Uriah Tracey from Connecticut, March, 1801, of Mr. Condit of New Jersey in 1803, of Joseph Anderson from Tennessee and Mr. Smith of Maryland in March, 1809, Mr. Cutts of New Hampshire in 1813, and of John Williams from Tennessee in January, 1817. The vote in the case of Mr. Tracey of Connecticut, the only one upon which there was a division, was 13 in favor and 10 against the right of the member to take his seat. This was the state of the case when the case of Lanman, an appointee from the State of Connecticut, reached the Senate March 4, 1825, and then for the first time in the history of the Government was there a determination manifested upon the part of the Senate to take up, carefully consider, and determine as to the proper construction to be placed on the constitutional provision authorizing the executive of a State to fill a vacancy by a temporary appointment.

In that case the credentials of Mr. Lanman were referred to a select committee consisting of three members, composed of Senators Eaton, Edwards, and Tazewell; and to the end that the consideration of the question should not be merely perfunctory but thorough; to the end that all sides and all interests should be heard and duly considered, Mr. Van Buren on the 5th day of March, 1825, submitted the following resolution, which was adopted:

Resolved, That the Hon. James Lanman have leave to be heard at the bar of the Senate on the question as to his right to a seat therein under an appointment by the executive of Connecticut.

That there may be no misunderstanding as to the facts in the Lanman case, it should be stated that Mr. Lanman's term as Senator expired March 3, 1825. March 4, 1825, he produced credentials of appointment by the governor to fill the vacancy. The credentials of appointment were dated February 8, 1825, and set forth that the President of the United States had desired the Senate to convene on the 4th of March following and had caused official notice of that fact to be communicated to the governor; that they, the credentials, were "to take effect immediately after the 3d day of March, 1825, and to continue until the next meeting of the Legislature."

These were the facts.

The select committee appointed to consider the case were divided in opinion, Senator Edwards alone favoring the right of the executive to appoint, while Senators Eaton and Tazewell, the majority of the committee, denied the right of the executive to appoint. After some considerable discussion, which is set out at some length in Niles's Register, volume 28, page 32, the vote was taken on the resolution offered by Mr. Edwards, the minority of the select committee, to the effect that Mr. Lanman be qualified and take his seat in the Senate pursuant to the credentials of the governor.

On that vote, the roll being called, there were 18 yeas to 23 nays. The Senate of the United States, therefore, in the case of Mr. Lanman in 1825, after a thorough consideration of that case and of the precedents, decided by this emphatic vote that the executive of a State had no constitutional power to make a temporary appointment to fill a vacancy caused by the expiration of the term of a Senator in a case where the Legislature had failed to choose a Senator.

But it is insisted with great earnestness by the distinguished Senator from Massachusetts that the Lanman case, passed upon in the Eighteenth Congress (1825), did not involve the question now before the Senate, but on the contrary that the only question involved in that case was as to the power of the executive to make a temporary appointment in advance of the happening of a vacancy.

It occurs to me, after a very thorough investigation of the history of the times and of the history of the proceedings of the Senate occurring shortly thereafter, that this conclusion of the distinguished Senator is not justified.

It will be found by a reference to the case of Ambrose H. Sevier, a temporary appointee from the State of Arkansas, whose case was passed upon at the special session of the Senate in March, 1837, but twelve years subsequent to the Lanman case, that the Committee of the Judiciary of this body, then composed of Grundy (chairman), Crittenden, Morris, King of Georgia, and Wall, in their report favoring the seating of Mr. Sevier, referred to the Lanman case, cited the fact that the Senate refused to seat him by a vote of 23 to 18, and commented on and characterized it in the following language:

This decision seems to have been generally acquiesced in since that time, nor is it intended by the committee to call its correctness in question. The principle asserted in that case is that the Legislature of a State, by making elections themselves, shall provide for all vacancies which must occur at stated and known periods; and that the expiration of a regular term of service is not such a contingency as is embraced in the second section of the first article of the Constitution.

Mr. HOAR. My honorable friend does me an unintentional injustice.

Mr. MITCHELL of Oregon. Of course I do not mean to do that.

Mr. HOAR. He says that I claim the Lanman case did not proceed on the ground he is now advocating, but on other ground. All I have ever said was that it is impossible to tell on which of the two grounds it went; that there was high authority—Judge Story, Gordon's Digest, and the National Intelligencer one way, and the statement of Mr. Grundy the other way, the first saying it was on one ground and the other on another ground. If the Senator will pardon me, if he will look at my report he will see the statement in Appendix A, and I will detain him but half a minute:

There is no historical evidence from which we can determine whether the Senate rejected Mr. Lanman on the ground that the governor could not fill a vacancy happening at the beginning of the term, or on the ground that the

governor could not lawfully make the appointment in anticipation, before the vacancy occurred, and before he could possibly know whether the Legislature might be called together before that time.

Then I go on to quote, what the Senator quotes, the authorities on the other side, and then I sum it up at the end. I will not stop to read it.

Mr MITCHELL of Oregon. I stand corrected. Assume it to be true that that is the position of the Senator, that it does not appear from the history of the times what was the exact point upon which the case went.

Mr. HOAR. I went over all the evidence which the Senator quoted, and then quoted the evidence on the other side, and said it was of about equal authority.

Mr. MITCHELL of Oregon. I am endeavoring to show, however, that very shortly after that case was determined the Judiciary Committee of this body, in the case from Arkansas, referred to the Lanman case as having been decided upon the very point as to whether the executive of a State could fill a vacancy occurring by the expiration of a term.

And proceeding further the committee in the Sevier case said:

The case now under consideration is wholly different in principle. The time when Mr. Sevier was to go out of office under his election made by the Legislature of Arkansas was decided by lot agreeably to the provisions of the Constitution on that subject. After the decision thus made, the Legislature of Arkansas not being in session, could not supply the vacancy; and the case, in the opinion of the committee, comes fairly within the provision of the Constitution contained in the third section of the first article, which declares: "And if vacancies happen by resignation or otherwise during the recess of the Legislature of any State the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies."

Thus it will be seen, Mr. President, that the construction placed upon the Sevier case by the Judiciary Committee of this body, decided at a time when the Senate was doubtless composed of many of the same members composing the Senate when the Lanman case was under consideration, was entirely different from that now placed upon it, after a period of sixty-eight years has elapsed, by the distinguished Senator from Massachusetts.

"The principle asserted in that case" (referring to the Lanman case), say the Judiciary Committee of this body in 1837, was *not*, as contended for by the Senator from Massachusetts and the Senator from Alabama and others here to-day, that the executive of a State could not make a temporary appointment in advance of the happening of a vacancy, but rather "that the Legislature of a State by making elections themselves shall provide for all vacancies which must occur at *stated* and *known periods;* and that *the expiration of a regular term of service* is *not* such a contingency as is embraced in the second section of the first article of the Constitution."

The Senator from Massachusetts relies upon an article published in a newspaper, the National Intelligencer, and in the report of Mr. Bartlett, which it is assumed is accepted by Judge Story for the conclusion that the Lanman case was decided solely upon the ground that an appointment was made by the executive in advance of a vacancy; but in addition to the report of the Committee on the Judiciary of this body in the Sevier case, we have the statement of the late Senator Benton, of Missouri, in his Thirty Years' View, in which, referring to the Lanman case, he says:

Mr. Tazewell was the principal speaker against the validity of the appointment, arguing against it both on the words of the Constitution and the reason for the provision. The words of the Constitution are "if vacancies happen" (in the Senate) by resignation or otherwise during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature. "Happen" was held by Mr. Tazewell to be the governing word in this provision, and it always implied a contingency, and an unexpected one.

And Mr. Benton, commenting further on this decision, says:

And with this decision the subsequent practice of the Senate has conformed, leaving the States in part or in whole unrepresented when the Legislature failed to fill a regular vacancy.

But not only so. The decision made in the Lanman case in 1825 referred to, and the principle involved in it fully stated and approved by the full Judiciary Committee of the Senate in 1837, and by a vote of 26 yeas to 19 nays in the Sevier case in 1837, remained the established precedent followed by the Senate on every occasion and in every instance for a period of more than half a century; and is still the unreversed precedent of this body to-day after a lapse of sixty-eight years, unless, indeed, it can be successfully shown that that construction of the constitution so salutary in all respects, that precedent so firmly established and so faithfully followed through all this long period of our country's history, supported, sustained, and approved by a majority of the Committee on Privileges and Elections of the Senate so late as 1885, were broken down by a vote of the majority of this body, based upon a minority report from the Committee on Privileges and Elections submitted at that time by the distinguished Senator from Massachusetts [Mr. HOAR] in the case of Bell, a temporary appointee from the State of New Hampshire. That there is a wide distinction to a very great extent controlling in its nature between the Lanman case and those of Bell and Blair will be shown as I proceed.

But it is claimed by a majority of the committee in this case that the decision in the Sevier case is an authority for the construction now claimed by the committee. This can not be so, inasmuch as the committee who reported that case and a majority of the Senate who voted to sustain the report based their decision, not upon the ground that the executive of a State could by temporary appointment fill a vacancy caused by a failure of the Legislature to choose a Senator at the beginning of a term, but upon the other and wholly different ground that the vacancy in that case happened not by the expiration of the term of a Senator fixed by law, but by reason of the casting of a lot, and that, therefore, the case was not parallel with the case where a vacancy occurs by reason of the expiration of the term of a Senator for which he had been chosen by the Legislature. And it is true and a fact not to be lost sight of in this connection that while that was the view in the Sevier case, and which clearly distinguished it from the case of a vacancy occurring by the expiration of a term of a Senator, many of those who voted in the negative in that case, including Daniel Webster, the first Bayard, Henry Clay, Crittenden, King of Alabama, Prentiss, and others, failing to see the distinction thus drawn by the committee and by a majority of the Senate between that case and the case of a vacancy occurring by reason of the expiration of a term for which a Senator had been chosen, and the failure of the Legislature to elect a successor, voted against the seating of Sevier upon the ground clearly that in their judgment a vacancy that happened, either by the expiration of the term of a Senator whose term had been ended by full service of a full term, or by lot in fixing the different classes of Senators under the Constitution, was not such a vacancy as the Constitution intended should be filled, even temporarily, by the appointment of the executive of a State.

In the discussion which took place in the Senate in the celebrated case as to the successorship of Henry Clay much light is thrown upon the question now under consideration. Henry Clay was elected a Senator from the State of Kentucky for the full term of six years, commencing on the 4th of March of that year. On the 17th of December, 1851, he resigned his seat in the Senate, to take effect on the first Monday of September, 1852. The Legislature of Kentucky, then being in session, elected Mr. Dixon to fill the vacancy which was to happen on the first Monday of September thereafter, the time fixed by Mr. Clay at which his resignation should take effect.

On the 29th of June, 1852, over two months before his resignation was to take effect, Mr. Clay died. On the 6th of July the governor of Kentucky appointed Mr. Meriwether to hold the place until Mr. Clay's resignation should take effect, on the first Monday of September following. Under this commission Mr. Meriwether took his seat in the Senate in December, 1852. The question came up for discussion as to whether Mr. Dixon, elected by the Legislature of Kentucky in December, 1851, was entitled to his seat.

This state of case very naturally and very properly brought before the Senate for consideration the question as to the proper construction of those parts of the Constitution which relate to the choosing of Senators by the Legislature, both for full terms and to fill vacancies, as well also as the question as to the proper construction of that clause of the Constitution authorizing the executive of a State in certain emergencies to make temporary appointments. Mr. Stephen A. Douglas, in discussing the general subject, as will be found on page 90, volume 26, of the Congressional Globe, second session Thirty-second Congress, used this language:

Mr. GEORGE. Whose language is that?

Mr. MITCHELL of Oregon. Stephen A. Douglas, a pretty good lawyer, too. He said:

Where a Senatorial term has expired by its own limitation under the Constitution, and an absence of representation results from that cause, it is not a vacancy within the meaning of the Constitution. Vacancies happening in the representation in the Senate during a recess of the Legislature may be filled by the governor of a State.

I ask attention to this:

But I presume no man ever contended—certainly not since the Lanman case—that a governor under the power to fill vacancies could make an appointment to an original term of office.

But the distinguished jurist and statesman from Illinois (Mr. Douglas), proceeding further, emphasized the doctrine he was announcing in the following language:

Therefore, when we speak of vacancies happening in the constitutional sense, we must be understood as meaning cases where the term has once been filled and subsequently becomes vacant by resignation or otherwise.

And right here, in answer to the claim of my distinguished friend from Massachusetts, who seems to base his whole argument on the alleged fact and to contend with great earnestness that each State is entitled at all times to have two Senators in

their seats in the Senate, I might cite him to the words of Mr. Douglas in the Dixon-Meriwether cases from Kentucky, wherein, in answer to an argument made by Senator Jones of Kentucky, similar to that for which my distinguished friend from Massachusetts now contends, he said:

I apprehend that I will go as far as he or any other man in advocating the true rights of the States. What is the right of a State, then, as connected with representation in this body? It is a right derived from the Constitution of the United States to be represented in this body in pursuance of the Constitution. It is not a right to be represented as Kentucky pleases or as any other State pleases, but it is a right to be represented as the Constitution provides. She has no right to any other representation or mode of appointment than that authorized and prescribed by the Constitution. To allow her or to compel her to be represented here, then, in any other mode than that appointed in the Constitution is a violation of State rights and of State sovereignty too. The question here is, what is the mode of representation to which Kentucky is entitled in this case?

Why, sir, the Constitution provides that in the election of Senators generally it shall be done by the Legislature of each State; it provides by implication that in case of vacancies which occur during the session of the Legislature, the Legislature shall elect; but it also provides that if the vacancy occurs during the recess of the Legislature, the Legislature shall not elect in the first instance, but that the governor shall appoint, and that the appointment shall continue until the next meeting of the Legislature, and that the Legislature shall then elect.

In the same interesting debate, Lewis Cass, the great Senator from the State of Michigan, defined these provisions of the Constitution as follows:

How, then, stands this case, sir? The third clause of the first article of the Constitution provides for the composition of the Senate by fixing the term of service and the mode of selecting the Senators, permanent and temporary. It declares that "if vacancies happen, by resignation or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies." The regular terms of Senators are for six years, and the "vacancies" herein provided for are the *unexpired portions of such terms*, which are to be "filled" by the Legislature when it can act, and when it can not act to be occupied by *temporary executive appointments*. If, therefore, a Senator resign, or his seat is otherwise vacated, *except by the expiration of his term*, the "vacancy" is for his original period of service, to be temporarily appointed to by the governor or "filled" by the Legislature.

Mr. Underwood of Kentucky, in the great debate of 1852 upon this question, in his able argument undertook to enumerate the various ways in which a vacancy, such as is contemplated by the Constitution, may be created. He said:

There may be various ways of creating a vacancy. Death creates it *eo instanti;* there is a vacancy from the time of the last breath. That is one way. There may be judgment of expulsion upon impeachment and trial. As soon as the judgment is rendered the official life of the officer terminates and there is a vacancy from that period. There may be vacancy by abandonment, as where a man leaves the State which he was elected to represent. The time of the abandonment may be uncertain, but still an incumbent may vacate the office by abandonment. Then there may be vacancy by resignation.

But it will be seen, Mr. President, that in this enumeration the distinguished Senator fails to state that a vacancy, such as is recognized by the Constitution, may happen by the *expiration of the term of a Senator, and the failure of the Legislature to elect.* That, clearly in the judgment of Lewis Cass, the great Michigander, is *not* such a vacancy as was contemplated by the Constitution.

Mr. Seward, in the great debate as to the successorship of Henry Clay (Congressional Globe, second session Thirty-second Congress, p. 94), strongly, ably deprecating any construction of the Constitution that would tend to increase or strengthen the prerogatives of the governors of States relative to their power to appoint Senators of the United States, used this language:

Mr. President, this question has bearings upon the present of the State of Kentucky and also upon the future and the whole Union. A rejection of Mr. Dixon, who comes with the plenary commission unanimously confirmed by the Legislature and governor of Kentucky, and an admission on the contrary of Mr. Meriwether, who not only presents no such commission, but presents no claim and does not even appear, will, I think, deeply disturb Kentucky and alarm all the other States. This alarm will be increased by the fact that the proceeding will operate to strengthen and increase the provisional prerogative of the governors of the States at the expense of the power conferred by the Constitution on the Legislatures of the States; for nothing is clearer than that the power conferred on the governors to fill vacancies was designed to be but occasional and exceptional, and subordinate to that devolved on the Legislatures, which was designed to be general, complete, and supreme.

The great Senator from New York, continuing further, said:

You will also excite new and painful apprehensions of another and even more grave kind. The House of Representatives is a legislative assembly drawn out by representation of the whole Union as one undivided country and people; and the constitution of that House is a great centripetal power acting toward consolidation. But the Senate is composed of an equal delegation of the several States appointed by the States. Senators are in a manner ambassadors of the States, and the control exercised by the States in their appointment, without interference from the center, constitutes a centrifugal force important to the preservation of the State in their qualified constitutional independence.

Hitherto the Senate of the United States has received whomsoever has been sent by the States, only examining their qualifications when denied, or deciding judicially between contestants. But if now we reject one who is sent with full authority and whose title is not denied from without this body and call in one who is not sent with any such authority, we shall shake the confidence which has hitherto been enjoyed by the Senate, and raise alarm for the safety of the States and thus weaken the bonds of the Union.

Mr. Mason of Virginia, in this same celebrated debate, took strong ground in opposition to the view contended for by the distinguished Senators from Massachusetts and from Alabama and held to the doctrine established by the Senate in the Lanman case, and for which I am contending here to-day. Here is what he said:

The Constitution has created Senatorial terms and has declared that those terms shall last for six years; they are so arranged by another provision of the Constitution, that one-third of the Senate go out biennially. What is the language of the Constitution as affecting the duration of the term? The Constitution declares that the seats of the Senators of the first class shall be vacated at the end of two years; of the second class at the end of four; and of the third at the end of six years, thus creating the terms. The language of the Constitution is that the seat "shall be vacated" by the lapse of time, and then new terms commence.

A few words now as to the precedents. Until Lanman's case, according to my recollection, it was considered by the Senate, or rather it was decided by the Senate, manifestly without consideration, that it was competent for the State executive when a term expired in the recess of the Legislature to treat that as a vacancy and to fill it accordingly. Such a practice was common until the decision in Lanman's case. I confess that on looking at the Constitution my first impression was that the practice was correct, but on examining the Constitution and weighing it carefully and deliberately I can not entertain a doubt that the decision of Lanman's case was correct, and that when a term expires by constitutional limitation it is not a "vacancy", which the executive can fill.

Senator Butler, in discussing the Phelps case in 1854, said:

It must be conceded that the authority to choose a Senator to commence a new term of six years, after the efflux of a regular term, is exclusively vested in the State Legislature.

And referring to the Lanman case, he said:

In 1825 Lanman's case came up for consideration involving *both* questions.

That is to say, as well the question as to whether the governor could appoint at the commencement of a full term as the further question, if so, whether he could make such appointment in advance of the happening of the vacancy.

In that case, after a very full debate, it was solemnly decided that it was not competent for the governor of a State to put a member on this floor at the commencement of a term. In other words, it was decided that his power of appointment could not be substituted for the election of the State Legislature. Even if such had not been the decision in the case of Lanman, I take it for granted that such would be, and must necessarily be, the decision now.

In the great debate of 1852, Jefferson Davis, then a Senator from the State of Mississippi, expressed his views as to the construction of these clauses of the Constitution relative to choosing Senators:

Sir—

Said he—

there are two modes of electing Senators—the one by the Legislature of a State, the other by executive appointment. And how comes it, Mr. President, that there are two modes? It is well to understand the reason. It was foreseen by the framers of the Constitution that vacancies would occur—would "happen," as the Constitution expresses it—during the "recess" of the Legislature of a State, and consequently that a State would be deprived of its representation, for a time at least, unless that vacancy could be supplied. Hence it gives to the executive of a State the power of a temporary appointment, as the Constitution expresses it, a temporary appointment to hold until the Legislature, as I shall show you, has had an opportunity to appoint; and when the Legislature has once had that opportunity and declined or omitted to exercise its power, the executive no longer has any power over the subject. It has been justly enough observed here that the word "until," in the clause of the Constitution, qualifies the word "power;" that is, he shall appoint to hold until the Legislature discharges that duty or has an opportunity to discharge it.

Senator Underwood of Kentucky, in the contested case of Rantoul, used this language in this body:

The Constitution shows that it was never intended by its framers that a person should represent a State in this body if it could be avoided unless he came here by an election on the part of the Legislature of his State. The Constitution shows that an election is to be preferred to an executive appointment, and you ought to put such construction on the legislation of the country as will give authority to those appointed according to the provisions of that instrument, by the very fountain of power, the Legislature elected by the people; and if you were to continue Mr. Winthrop after being officially informed by the great seal of the State that the Legislature of the State had made such an election and appointed an officer to discharge the duties of the Senator, we would be going in violation of the spirit of our institutions by continuing in office an individual appointed by one man and allowing him to exercise powers, when the persons possessing the original fountains of power had showed their determination that he should not be continued. It is well known that from political associations I would much prefer the continuance of the present and sitting member to the admission of the other, but still the great principles of the Government are much more dear to me than men. And these are the principles which in the time to come I think ought to be carried out as they are proposed to be carried out by the report of the committee.

That great constitutional lawyer, Senator Badger of North Carolina, in the debate in the Phelps case in 1854, from which I quote, said:

The vacancies which the executive of a State is authorized to fill are never vacancies that happen by the efflux of time. They are not foreseen vacancies; they are vacancies that happen by resignation or otherwise. Mr. President, from an exceeding desire to give to this clause of the Constitution such a construction as would keep the Senate always full, I labored hard a year or two ago, when we had questions of this kind before us, to find out some method of supporting in my own mind a construction that a vacancy happening by efflux of time, and not filled beforehand by the Legislature, might be brought within this limited power conferred on the executive.

But, sir, I have been obliged to abandon it. "By resignation or otherwise," is the language. We must expound the word "*otherwise*" to apply to vacancies happening by *similar events;* that is, unforeseen events—death, resignation, appointment to an office which disqualifies, *but it can never be applied to the*

expiration of a term of a Senator which leaves a seat vacant on this floor. My opinion, therefore, is that the governor of a State has no power to fill a vacancy in this body which is brought about by the *expiration or efflux of the time for which the Senator was elected*—in other words, at the termination of his term in the Senate. It must be a vacancy *in the term* happening during the recess of the Legislature; it must be a vacancy in the term happening by resignation or other casualty. *That I understand to have been the express and solemn decision of the Senate in Lanman's case in 1825*, overruling one or two earlier decisions which had passed, perhaps, without full consideration.

The late Senator James A. Bayard, father of the late distinguished Senator and Secretary of State, who joined with Mr. Butler in a minority report in the Phelps case in 1854, which report was adopted by the Senate, defined the constitutional provisions under consideration in these words:

You find that in reference to the full term of a Senator the provision is that he shall hold his office for six years and be chosen by the Legislature. The executive has no authority there. And you find further that if the Legislature is not in session at the time a vacancy occurs by resignation or otherwise, though it may not even be known to them, yet no authority in such a case is confided to the executive to appoint.

You find, in other words, that within the intent of the Constitution no authority over the subject is meant to be intrusted to the executive whenever the primary power—the Legislature—is in existence as an organized body. I am aware that at one time it was decided that even in reference to the full term the executive of a State might make an appointment until the Legislature met; *but that construction was subsequently overruled by the Senate in the case of Mr. Lanman in the year 1825, and ever since the practice has been uniformly in accordance with the decision in that case.*

Proceeding further, Senator Bayard said:

In reference to the *full term* it can not be doubted that *no authority whatever is confided to the executive.* The negative of power in any other event than when the vacancy occurs in recess shows that it was not the intent of the Constitution that the executive was merely to provide for casualties happening when the legislative power, which is the primary power, was not in existence and of course could not act.

Senator Carpenter of Wisconsin, likewise a most distinguished constitutional lawyer and Senator, in the discussion of the Bell case—I quote from the CONGRESSIONAL RECORD of April 3, 1879—said:

Mr. CARPENTER. Will the Senator allow me to ask him a question?

Mr. HOAR. Certainly.

Mr. CARPENTER. I do it for information. I want to vote with the Senator if I can on this question. The difficulty in my mind is that I think the emphatic word in the constitutional provision is "happen." Take the case of Wisconsin. Our Legislature assembles on the first Monday of January. It has to elect to fill up the vacancy that is to occur in March. The Legislature generally sits until about the last of April.

Suppose they begin on the day fixed by the act of Congress to ballot for Senator; they make no choice; they ballot up to and past the 4th of March without making an election. A vacancy then occurs; by the Constitution the term expires and the Legislature sits still with that vacancy running on, balloting for thirty days and unable to make a choice, and finally adjourns without making a choice. Could the governor then appoint a Senator upon the ground that that was a vacancy happening in the recess of the Legislature?

Mr. HOAR. I think not.

It is due, however, to state that I understand the distinguished Senator from Massachusetts [Mr. HOAR], soon after making the answer just quoted and having had time to reflect, came to a different conclusion, and as he very frankly stated in the Senate on yesterday.

Other distinguished Senators held to the same view in the discussion that took place in the Bell case in 1879. Among these, in addition to Carpenter of Wisconsin were Saulsbury of Delaware, who submitted the report of the committee, Beck of Kentucky, Eaton of Connecticut, Garland of Arkansas, subsequently Attorney-General; Conkling of New York, Davis of Illinois, formerly associate justice of the Supreme Court of the United States; Kernan of New York, Lamar of Mississippi, subsequently associate justice of the Supreme Court; Maxey of Texas, MORGAN of Alabama, and many others not now here; and last but not by any means the least among the number in knowledge of constitutional construction and all that tends to constitute statesmanship in the highest and best sense of that term, James G. Blaine, of Maine.

But it must be borne in mind furthermore that in the discussions not only of the Lanman case, but in every other discussion that has ever taken place in this body—and there is nothing in the decision of the New Hampshire cases of Bell and Blair to the contrary—that where a vacancy has occurred which has been filled or not filled by the executive by a temporary appointment, and a session of the Legislature has then intervened and no Senator has been chosen by such Legislature, that then the constitutional prerogative of the executive of a State to temporarily appoint a Senator to such vacancy is forever gone.

In other words, conceding that a vacancy has happened which the executive clearly has the constitutional power to fill by temporary appointment, then, whether he exercises this power or not before the convening of the Legislature, by the very fact that the Legislature has convened, he is forever deprived thereafter of filling that vacancy, whether the Legislature choose a Senator to fill it or not. And it must not be forgotten that the fact that the Legislature of the State of New Hampshire had had no opportunity to choose a Senator to the place to which Bell was appointed was commented upon and urged by several Senators in the debate in that case as a reason why the appointment of the governor should be sustained, and there can be but little doubt that the report of the majority of the committee in the Bell case was overthrown in this Senate by the votes of enough Senators to create the majority that was given in that case who based their conclusions and votes upon that sole ground that the Legislature of the State had had no opportunity to choose a Senator.

Therefore, for this reason, which must be apparent to all familiar with the history of that case and of the Blair case, the result of the vote in the Senate in those two cases should not for one moment be regarded as a precedent to control the action of any Senator on the three cases now pending before the Senate. I speak of the three cases from Montana, Wyoming, and Washington as now being before the Senate, although but one of them, of course, is now under consideration, that of Mr. Mantle of Montana. All these three cases are unlike the Bell case in this, that in every one of them the Legislatures of these three States respectively not only had an opportunity to choose a Senator, but actually engaged for days and weeks and months, I may say, in an effort to accomplish that purpose.

These three cases of temporary appointments by the governors of the three States of Montana, Wyoming, and Washington are, so far as the constitutional questions are involved, in my judgment precisely similar, and, as it seems to me, no Senator who can see his way clear to vote for the admission of one of these appointees can with any degree of consistency or propriety whatever withhold his vote from either one of the other two. In so far as the two States of Montana and Wyoming are concerned the facts are identical. In each of those cases the Legislature convened, attempted to elect, and adjourned before the expiration of the terms of the Senators respectfully whose successors they had striven to elect, and in each of these cases the appointment by the governor was after the expiration of the term.

The only difference between these two cases and that of the case of Washington—the appointment of Senator Allen—is that in the latter the session of the Legislature whose business it was to elect Senator Allen's successor continued in session for, I believe, five or six days after the expiration of Senator Allen's term. But on the theory advanced by the report of the majority of the Committee on Privileges and Elections, supported and sustained so ably by the distinguished Senators from Massachusetts and Alabama, if there were a vacancy in the one case, or in the two cases of Montana and Wyoming, which the executive of those States respectfully could constitutionally fill, then it is equally clear that such a vacancy occurred on the adjournment of the Legislature of the State of Washington. In my view of the Constitution there was no such vacancy in any one of the three cases.

WHAT ARE SOME OF THE DISASTROUS CONSEQUENCES CERTAIN TO FOLLOW THE ADOPTION OF THE REPORT OF THE COMMITTEE?

But what are some of the disastrous consequences, Mr. President, which must necessarily flow from the construction sought to be placed on the Constitution by the report of the committee? One result is to unreasonably augment and extend the prerogatives of the executives of the States over those of the Legislatures; to subordinate the constitutional functions of the States respectively, speaking through their Legislatures, to those of the executives. The power conferred upon the executive of a State by the Constitution in respect of the appointment of Senators is a limited and carefully circumscribed power—a grant carefully prescribed, definitely defined, and fitly circumscribed by the express terms of the great charter—a power which by its very creation recognizes to the fullest extent the primary, paramount, and exclusive authority of the Legislature to not only *choose* Senators in the first instance *for the full terms*, but also to *fill all vacancies* which may happen *in such terms.*

It is a power which in its most extensive sense must be limited solely to temporary appointments to such vacancies as may happen during the recess of the Legislature, by resignation or otherwise; and not only so, but which must expire at furthest when the Legislature at its next meeting shall have had an opportunity to elect. It is a power which is absolutely exhausted, not only in reference to its exercise in the first instance, but also in reference to the duration of the title of the appointee whenever a Legislature shall have met and adjourned subsequent to the happening of such vacancy whether such Legislature chooses a Senator or not.

Nay, more. Although a vacancy may happen, such as contemplated by the Constitution, and which the executive has the undoubted right to fill temporarily by appointment as prescribed in the Constitution, but which right he fails to exercise until the Legislature meets, even then this constitutional power conferred upon the executive is exhausted; this prerogative as to that vacancy is forever gone, and such vacancy can never thereafter be

constitutionally filled by a temporary appointment on the part of the executive, even though such Legislature may fail to choose a Senator.

The recognition of the doctrine contended for by the distinguished Senators from Massachusetts and Alabama and others is to establish a precedent pregnant with consequences of the most disastrous nature. It will place a premium on treason to party organization and party discipline; it will encourage, support, and defend factious minorities in Legislatures, whether composed of one party or the other, in filibustering efforts to defeat the will of the majority. It will tend to prevent a fair expression of the will of the majority of Legislatures in the matter of choosing United States Senators. It will operate and tend to the subversion and destruction of that great constitutional function prescribed by the Constitution which makes the Legislatures of the States, and not the executives thereof, the primary and exclusive tribunals for the choosing of United States Senators not only for fixed terms of six, four, and two years, as the case may be, but also for filling vacancies that may occur in such terms.

But not only so. It will prescribe a rule which will result in placing before the choice of a majority of a particular party which may be in the majority in a Legislature and the party and personal friends and adherents of such choice, too strong a temptation to stand firm and prevent an election by the Legislature, when it becomes demonstrated that he himself can not be elected. To explain fully my meaning: Suppose at the expiration of my term here I desire a reëlection. On returning to my State I find that not only my party, but the people of my State are unfavorable to my reëlection, but I find I have enough friends in the Legislature who, if they will but stand firm and refuse to act with the majority of their party, can prevent an election.

I also find that the governor of the State is not only of my own political party, but is also my personal and political friend. In this situation, the majority being against me, I have no chance whatever of an election by the Legislature whose constitutional duty it is to elect. In this situation I say to my friends in that Legislature: "Stand firm, bolt the caucus of your party, refuse to be governed by the will of the majority, and prevent an election." I say to them: "I know you can not elect me, but you can prevent an election; and if you do so, the governor will appoint me." And what is the result? A mere handful, an unscrupulous faction, a small minority, a few individual members of that Legislature by standing out against the will of the majority, in face of the Constitution and the law which make it their duty to elect a Senator, defeat the will of the majority; the Legislature adjourns without an election, and the governor appoints me Senator. And thus it is the will of the majority is frustrated. I become the Senator of a State while neither my own party nor any other party has any indorsement for me, and the intent and purpose, not only of the Constitution but of the laws, are set at naught.

But let us suppose another case, which proves conclusively the disastrous consequences that may flow, and undoubtedly will flow from time to time from the precedent sought to be established here by the distinguished Senator from Massachusetts. Suppose, at the expiration of my term, on my return to Oregon, seeking a reëlection, I find I am the choice of two-thirds of my party—my party being in the majority in the Legislature—but a small fraction of my party is opposed to me, and without that faction I can not hope to secure a majority of the Legislature.

Suppose at the same time the governor is my friend, both politically and personally, and I am assured that in the event of no election by the Legislature I will be appointed, then, Mr. President, I respectfully submit the doctrine for which my friend, the distinguished Senator from Massachusetts, contends is to place before me and my friends a temptation which I or no other man ought to be called upon to resist.

Suppose another case: A Legislature is very nearly equally divided as between the two great political parties; the party in the minority may have the governor. If the doctrine sought to be enforced here should obtain, as a matter of course the minority in that Legislature will resort to every expedient to prevent a Senator from being chosen by the Legislature, in the hope and belief and knowledge that in such event the governor will appoint, and thus, while a temporary political advantage may be obtained, the very principles upon which the provisions of the Constitution are based will be subverted.

I submit, Mr. President, in conclusion, that a construction of the provisions of the Constitution which leads to such results should not be tolerated, unless, indeed, such construction is compelled by the plain letter of the charter. That this is so will not be contended here. It is true that the doctrine of *ab convenienti* is not to be invoked where there is no room for construction, where the language is clear and plain and susceptible of but one construction. But here it is evident that this is not so; otherwise these differences in committee and in this Senate would not exist.

Here there are and have been differences of opinion as to the proper construction of the provisions of the Constitution under consideration, and hence it is not only proper in giving construction to these provisions that we should well consider not only the intention of the framers of that instrument as we may be able to gather it from the words and the context, but the consequences which will naturally, eventually, and inevitably flow from this or that construction should be taken into account to the end that we may be better able to determine the true and proper construction as understood and intended by its framers.

What more convincing evidence is desired? What more conclusive proofs are needed to demonstrate the truth of the fearfully demoralizing tendencies, the alarmingly destructive consequences, the rapid tendency toward imminent peril to the very best interests of our political fabric which must inevitably result from the recognition of such a construction of the Constitution as is here demanded, than are furnished us by the results of the recent Senatorial elections in the three States of Montana, Wyoming, and Washington?

Now, Mr. President, having done what I conceive to be my duty, not only as a member of the Committee on Privileges and Elections of this body, but of this Senate, I submit this case, so far as I am concerned. All my personal inclinations would have led me to a different conclusion than that to which I have come.

One of these appointees, Senator Allen, is from my neighbor State. He has already rendered faithful service in the Senate under election by the Legislature of his State. I have been associated with him in the public service on the same committee; our relations have been, and are, and, I trust, always may continue to be, of the most friendly nature. He has made a record during his term here of faithful and able service of which his State and the country have reason to be proud.

And as to the appointee from Montana, Mr. Mantle, while my acquaintance with him has been very brief, I have known him long by reputation, and I have heard naught but words of commendation and praise for him from all sources as an unassuming, intelligent, frank, open-hearted, straightforward, first-class man, and I confess I deeply regret I can not see my way clear to vote for the admission of both Senator Allen and Mr. Mantle.

As to the other appointee, Mr. Beckwith from Wyoming, I never had the pleasure of meeting him until within the last few days, and while I understand his politics are not of the very best, he has impressed me with being a good old-fashioned gentleman of the old school, whose word is, by those who know him best, considered to be as good as his bond, while his bond is worth its millions, and that he is in all respects worthy of a seat in this body, and therefore for these reasons I sincerely regret I am unable to see my way clear to vote for the admission of Mr. Beckwith as appointee from Wyoming.

But, Mr. President, I am done, and I do not fail to realize that notwithstanding the opinions held by the minority of the committee, of which I am an humble member, the die in all probability is already cast, and a majority of this Senate will probably vote to admit to seats in this body the three appointees of the States respectively of Montana, Wyoming, and Washington. But let me, Mr. President, remind you and this Senate when you do this you vote to overturn the deliberate precedent established by this Senate, after full consideration, over sixty-eight years ago; you vote to reject the interpretation placed on the Constitution of the United States by such great constitutional lawyers and statesmen as Webster and Clay, as Butler and Cabot, as Ellsworth and Frelinghuysen, as Monroe and King, as Cass and Calhoun, as Douglas and Seward, as Underwood and Mason, as Badger and Bayard, as Carpenter and Conkling, as Davis and Lamar, as Garland and Eaton, as Kernan, MORGAN, and James G. Blaine of Maine.

You establish a rule by virtue of which the great fundamental principle of the Constitution, which vests in the Legislatures of States the exclusive power of choosing Senators, will be subverted. You will establish a precedent which inside of ten years will, in my judgment, result in witnessing one-third of this great body seated here by virtue of no other title than that conferred by temporary appointments of the executives of States; you will establish a precedent which will tend to demoralization in State Legislatures, which will transfer the jurisdiction as to the election of United States Senators from the Legislatures of the States respectively, where the Constitution has vested it, to the governors of States, and you will inflict a fatal stab at the great structure of republican government under which we live, and encourage, protect, and defend antagonisms to the best interests of the States respectively, and to the greatest and best of all the republics that has ever existed since the world began.

Mr. GRAY. Mr. President, I do not presume at this late

hour, after the long, interesting, able, and exhaustive speech of the Senator from Oregon, that there is anyone who wishes to proceed with the argument in this case to-day. But I was requested by my colleague on the committee, the Senator from Indiana [Mr. TURPIE], who was called away from the Chamber a few moments ago, to say, sir, through you to the Senate, that he did intend to take the floor upon the conclusion of the argument of the Senator from Oregon, so that if the Senate did not conclude to proceed further to-day with this debate he might have the floor upon its reconvening upon the next day when this matter came before the Senate. If I may ask the privilege of securing the floor for him, I do so now.

The VICE-PRESIDENT. Without objection, the Chair will recognize the Senator from Indiana [Mr. TURPIE] as being entitled to the floor on the pending resolution when its consideration shall be resumed.

INDIAN DEPREDATION CLAIMS.

Mr. KYLE. I ask leave out of order to report from the Committee on Indian Depredations, in behalf of the chairman of the committee [Mr. LINDSAY], the resolution which I send to the desk. I ask that the resolution may be read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The resolution will be received and read in the absence of objection.

The Secretary read as follows:

Resolved, That the Committee on Indian Depredations be, and hereby is, directed to make inquiry concerning all Indian depredation claims which at any time have been or may be presented in the Court of Claims under the act of March 3, 1891, especially those in which unpaid judgments have been hitherto rendered, or may be rendered prior to the conclusion of the inquiry; and also into the manner in which such claims have been defended in behalf of the Indians and the United States; and generally into the workings of said act of March 3, 1891; and concerning all other Indian depredation claims not covered by said act, and to make such recommendations relative to any or all of said claims and for additional legislation as said committee may deem expedient; said committee, either as a full committee or through subcommittees, being hereby empowered to sit during the recess of the Senate to send for persons and papers, and to employ a stenographer and expert, the expenses of the inquiry to be paid from the contingent fund of the Senate.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

ADJOURNMENT TO MONDAY.

Mr. HARRIS. I move that when the Senate adjourn to-day it be to meet on Monday next.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty-five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 10 minutes p. m.) the Senate adjourned until Monday, April 3, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate March 30, 1893.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

Thomas F. Bayard, of Delaware, ambassador extraordinary and plenipotentiary to Great Britain, vice Robert T. Lincoln, resigned.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

James D. Porter, of Tennessee, to be envoy extraordinary and minister plenipotentiary of the United States to Chile, vice Patrick Egan, resigned.

James A. McKenzie, of Kentucky, envoy extraordinary and minister plenipotentiary to Peru, vice John Hicks, recalled.

Lewis Baker, of Minnesota, envoy extraordinary and minister plenipotentiary to Nicaragua, Costa Rica, and Salvador, vice Richard C. Shannon, recalled.

Pierce M. B. Young, of Georgia, envoy extraordinary and minister plenipotentiary to Guatemala and Honduras, vice Romualdo Pacheco, recalled.

Edwin Dun, of Ohio, now secretary of legation at Japan, envoy extraordinary and minister plenipotentiary to Japan, vice Frank L. Coombs, resigned.

SECOND SECRETARY OF LEGATION.

Newton B. Eustis, of Louisiana, to be second secretary of the legation of the United States at Paris, vice Augustus Jay, recalled

CONSULS.

L. M. Shaffer, of West Virginia, consul to Stratford, Ontario, vice Woolman J. Holloway, recalled.

Harrison R. Williams, of Missouri, consul to Vera Cruz, vice William W. Apperson, recalled.

M. P. Pendleton, of Maine, consul to Pictou, vice Alonzo Spencer, deceased.

Theodore M. Stephan, of Illinois, consul to Annaberg, vice Daniel B. Hubbard, recalled.

William T. Townes, of Virginia, consul to Rio de Janeiro, vice Oliver H. Dockery, recalled.

Claude Meeker, of Ohio, consul to Bradford, vice John A. Tibbits, recalled.

COLLECTORS OF CUSTOMS.

Walter Goddard, of Connecticut, to be collector of customs for the district of Fairfield, in the State of Connecticut, to succeed George B. Edmonds, resigned.

Henry J. Hathaway, of Maine, to be collector of customs for the district of Aroostook, in the State of Maine, to succeed Albert A. Burleigh, whose term of office has expired by limitation.

ASSISTANT SECRETARY OF THE INTERIOR.

John M. Reynolds, of Bedford, Pa., to be Assistant Secretary of the Interior, vice Cyrus Bussey, resigned.

SOLICITOR-GENERAL.

Lawrence Maxwell, jr., of Ohio, to be Solicitor-General, vice Charles H. Aldrich, resigned.

ASSISTANT ATTORNEY-GENERAL.

John I. Hall, of Georgia, to be Assistant Attorney-General, vice George H. Shields, resigned.

CONFIRMATIONS.

Executive nomination confirmed by the Senate March 28, 1893.

POSTMASTER.

William H. McCabe, to be postmaster at Coshocton, in the county of Coshocton and State of Ohio.

Executive nominations confirmed by the Senate March 30, 1893.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

Thomas F. Bayard, of Delaware, to be ambassador extraordinary and plenipotentiary of the United States to Great Britain.

UNITED STATES MARSHALS.

Thomas J. Allison, of North Carolina, to be marshal of the United States for the western district of North Carolina.

Frank Leverett, of Georgia, to be marshal of the United States for the southern district of Georgia.

UNITED STATES ATTORNEYS.

George J. Denis, of California, to be attorney of the United States for the southern district of California.

Joseph S. James, of Georgia, to be attorney of the United States for the northern district of Georgia.

William T. Gary, of Georgia, to be attorney of the United States for the southern district of Georgia.

MONDAY, *April 3, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Thursday last was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

PETITIONS AND MEMORIALS.

Mr. HOAR. Mr. President, I rise to a question of the highest privilege. I desire to present the petition of Mr. Ady, praying to be admitted to a seat in the Senate.

The VICE-PRESIDENT. The petition will be read.

The SECRETARY. The petition of Joseph W. Ady for admission to a seat as a Senator from the State of Kansas.

The VICE-PRESIDENT. What action does the Senator from Massachusetts desire?

Mr. HOAR. Let the petition be read in full.

Mr. GORMAN. What is the petition? Let it be read again.

Mr. HOAR. Let it be read in full and referred to the Committee on Privileges and Elections.

The VICE-PRESIDENT. The petition will be read.

The Secretary read the petition, as follows:

To the Senate of the United States:

I hereby claim that Hon. JOHN MARTIN was never duly elected Senator from Kansas, and that I was so duly elected for the term beginning March 4, 1893, and desire to be admitted to a seat in the Senate accordingly.

JOSEPH W. ADY.

Mr. HOAR. I move that the petition be referred to the Committee on Privileges and Elections.

The motion was agreed to.

Mr. HOAR. I ask unanimous consent to present at this time a paper in the nature of a petition to the Senate, although in form it is addressed to me as a letter. It refers to a legisative matter, but it asks a special investigation to be conducted by the Committee on Agriculture and Forestry of the Senate in the vacation. It relates to the very important matter of public roads. The writer, Mr. Albert A. Pope, a gentleman who has devoted much attention to the subject, presents some facts showing the great loss to our international and interstate commerce by the condition of the roads of this country. I ask that the paper may be printed as a document and referred to the Committee on Agriculture and Forestry.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Massachusetts? The Chair hears none, and it is so ordered.

Mr. STEWART. I present a memorial of the Legislature of Nevada, recommending a settlement of the Pacific Railroad indebtedness. As it is the memorial of a State Legislature, I ask that it be read and referred to the Committee on Pacific Railroads.

The memorial was read and referred to the Committee on Pacific Railroads, as follows:

Senate joint resolution relative to the indebtedness of the Central Pacific Railroad Company to the United States of America.

Whereas, by act of Congress duly passed and approved, the Government of the United States loaned to the Central Pacific Railroad Company certain bonds to aid said company in the construction of its railroad; and

Whereas the payment of the principal amount of said bonds and of the interest thereon is secured by a second mortgage upon the Central Pacific Railroad; and

Whereas, in the event said company should be unable to pay said indebtedness when due, foreclosure proceedings may be instituted against said company, which may result in the vesting in the Goverument of the title to said railroad and of the unsold portion of the land grant of said company; and

Whereas said properties, should they pass into the ownership of the Government, would be exempt from State and local taxation; and

Whereas for many years said company has been a heavy taxpayer, and has paid into the State and local treasuries a very large portion of the money necessary to support the State, county, and other local governments; and

Whereas the withdrawal of said property from its present ownership and the vesting of the title thereof in the Government would deprive the State and local goverunments of the right to tax the same, and would thereby seriously embarrass said State and local governments and would threaten the political existence thereof; and

Whereas certain bills are now pending before Congress relative to the adjustment of said indebtedness: Therefore be it

Resolved by the senate (the assembly concurring), That our Senators and Representative in Congress be, and they are hereby, urgently requested to do all in their power to promote and secure the passage of an act of Congress providing for the adjustment or refunding of said indebtedness, to the end that said company shall be enabled to pay said indebtedness: *Provided*, Said support does not interfere or in anywise hinder or delay their labors from the free and unlimited coinage of silver.

Resolved further, That his excellency the governor forward engrossed copies thereof to each of our Senators and Representative in Congress.

Attest: A true copy.

[SEAL.]

C. H. GREY,
Secretary of State.

DEPOSIT OF SPEECHES IN SENATE LIBRARY.

Mr. TURPIE. Mr. President, I rise to speak to the resolution reported by the Committee on Privileges and Elections.

Mr. HOAR. Will the Senator from Indiana allow me to present two resolutions before he proceeds?

Mr. TURPIE. On what subject?

Mr. HOAR. I wish to present two resolutions, one in regard to depositing some documents with the Senate Librarian, a very unimportant matter, but for the convenience of the Senate, and another resolution, on which I wish to address the Senate at a later day in the session, which I should like to have printed and laid on the table.

Mr. TURPIE. I have no objection.

Mr. HOAR. I ask that the resolution I send to the desk be read and referred to the Committee on Printing.

The resolution was read, as follows:

Resolved, That the Public Printer be directed to deposit in the Senate Library 10 copies each of all speeches made in either House of Congress which shall hereafter be by him printed in pamphlet form; the same to be bound, under the direction of the Senate Committee on Printing, and preserved in said library for the use of the Senate.

Mr. VOORHEES. Where does the resolution go?

The VICE-PRESIDENT. To the Committee on Printing.

Mr. VOORHEES. I think it ought to go to the Committee on the Library. Very likely we should have to enlarge the present accommodations of the library if the resolution should pass.

Mr. HOAR. If the Senator will pardon me one moment, I suppose there are probably printed by this body a hundred different speeches in the course of a Congress, that is, Senators make them and they are printed in pamphlet form. When you wish to refer to them afterwards you have to hunt through the clumsy large volumes of the RECORD. The resolution merely provides that when the Public Printer prints by the direction of any Senator in pamphlet form his speech he shall send a few copies to the Senate Library to be bound under the direction of the Committee on Public Printing, so that we can have them in that form. It will not cost $3 a year.

Mr. VOORHEES. I was under a misapprehension. I thought it was in contemplation to place them in the Library of Congress. They are to be placed in the Library of the Senate?

Mr. HOAR. In the Senate Library.

Mr. VOORHEES. Then the resolution should go to the Committee on Printing.

Mr. HOAR. That was my idea. It will not cost $3 a year and will be a great convenience to the Senate.

Mr. VANCE. I beg to suggest to the Senator from Massachusetts that the resolution should make some provision for having the speeches when bound indexed according to subjects, as well as the names and dates of delivery, so that they may constitute a volume of easy reference hereafter. If they are to be merely bound at large without an index showing the dates when they were delivered and the subjects upon which they were delivered, it will impose upon the searcher after knowledge the melancholy duty of wading through all the speeches to get what he wants, and as *peine forte et dure* has been abolished, I hope this will not be required.

Mr. HOAR. The Committee on Printing, I think, will be likely to adopt the suggestion of the Senator from North Carolina when they come to consider the resolution.

The VICE-PRESIDENT. The resolution will be referred to the Committee on Printing.

ELECTION OF SENATORS BY DIRECT VOTE OF THE PEOPLE.

Mr. HOAR submitted the following resolution, which was read:

Resolved, That it is inexpedient that the resolution sent to the Senate by the House of Representatives during the last Congress, providing for an amendment of the Constitution securing the election of Senators by the people of the several States, be adopted.

Such a method of election would essentially change the character of the Senate as conceived by the convention that framed the Constitution and the people who adopted it.

It would transfer practically the selection of the members of this body from the Legislatures, who are intrusted withall legislative powers of the States, to bodies having no other responsibilities, whose election can not be regulated by law, whose members act by proxy, whose tenure of office is for a single day, whose votes and proceedings are not recorded, who act under no personal responsibility, whose mistakes, ordinarily, can only be corrected by the choice of Senators who do not represent the opinions concerning public measures and policies of the people who choose them.

It requires the substitution of pluralities for majorities in the election.

It will transfer the seat of political power in great States, now distributed evenly over their territory, to the great cities and masses of population.

It will create new temptations to fraud, corruption, and other illegal practices, and in close cases will give rise to numerous election contests, which must tend seriously to weaken the confidence of the people in the Senate.

It will absolve the larger States from the constitutional obligation which secures the equal representation of all the States in the Senate by providing that no State shall be deprived of that equality without its consent.

It implies, what the whole current of our history shows to be untrue, that the Senate has during the past century failed to meet the just expectations of the people, and that the State Legislatures have proved themselves unfit to be the depositaries of the power of electing Senators.

The reasons which require this change, if acted upon and carried to their logical result, will lead to the election by the direct popular vote and by popular majorities, of the President and of the judiciary, and will compel the placing of these elections under complete national control.

It will result in the overthrow of the whole scheme of the Senate, and in the end, of the whole scheme of the national Constitution as designed and established by the framers of the Constitution and the people who adopted it.

Mr. HOAR. I give notice that at some time after to-morrow (if such a time shall come when it will not be inconvenient to the Senate) I desire to address the Senate in support of the resolution.

The VICE-PRESIDENT. Meanwhile the resolution will lie on the table and be printed.

HARBOR IMPROVEMENTS ON PACIFIC COAST.

Mr. RANSOM submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Commerce be, and they are hereby, authorized and directed to sit, by subcommittee not exceeding five in number, to be appointed by the chairman of said committee, during the recess of Congress, and to visit and examine the Pacific coast between Points Duma and Capistrano, with a view to determining the best location for the construction of a deep-water harbor. Said subcommittee is hereby also authorized to visit and examine such other works of river and harbor improvement on the Pacific coast, existing or proposed, as in their judgment the interests of commerce shall demand, and shall have power to subpœna witnesses, to administer oaths and take testimony, to employ a stenographer, and to appoint a sergeant-at-arms from the messengers of the Senate; and that the actual necessary expenses of the said subcommittee, properly incurred, shall be paid out of the contingent fund of the Senate in the usual manner.

SENATOR FROM MONTANA.

Mr. TURPIE. I ask to have the pending resolution again read.

The VICE-PRESIDENT. The resolution will be again read.

The Secretary read the resolution reported from the Committee on Privileges and Elections, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. The question is on agreeing to the resolution, upon which the Senator from Indiana [Mr. TURPIE] is entitled to the floor.

Mr. TURPIE. Mr. President, we have no legislation on the subject of the appointing power by the governor of members of this body. The precedents in regard to Senatorial action we think are largely upon our side. They are claimed, however, by the advocates of the minority report to be about equally divided. It would be perhaps as fair a way as any to treat this as a case of first instance, the same as if no decision had ever been made upon it, and to remit the present court, the members of this body sitting in judgment, to the text of the Constitution itself, to the letter of the passage relating to the appointing power, the spirit of the context in which it is found, and the tenor and purpose of the whole instrument.

We have the highest legal and political authority for the maxim that the Union of the States in contemplation of law is perpetual—that of Abraham Lincoln, of Illinois. The law of that Union, its rule of action and operation, must be deemed to be of the same character, and the instrumentalities by which the law is executed, the great constitutional functions, the fundamental offices and officers of the Government must alike be deemed by the same necessity to be of perpetual existence and uninterrupted continuity.

This principle of continuing stability and permanent continuity of governmental forces is very plainly taught, inculcated, and even enforced by the various sections of the Constitution relating to the succession of political authority, provisions relating to the certainty of such succession, to the facility of such succession, to the certitude and the celerity of the succession of political authority, and also the practice of substitution and replacement in the various constitutional functions of the Government.

It is said the king never dies. Neither does the President. The man may disappear: the office and the officer are not subject to death. The Presidential term once filled by election continues through the whole quadrennial period. There is no special election or second election within the term called the Presidency. In case of the death or disability of the chief officer of state, a person is chosen at the same time he was himself elected to succeed to the duty and office of the President, and in case of the death or disability of this substitute or this *locum tenens* of the President, a person is designated by law to succeed him; and so on in a series of successions the Presidential office is perpetuated without change, not subject even to electoral change during the four years for which the choice was first made.

This is not, sir, a succession of blood. It is not a succession of birth. It is not a succession of heredity. It is a succession fixed by law. Many have been the wars of succession. The most bloody, the most devastating wars in the history of the world have been those with respect to the succession of political authority. An instance of it occurred when for many years the wars between the White and Red Roses involved all England in widespread ruin, twice with respect to the Spanish succession, and once with respect to the Austrian succession; almost every continental power in Europe was involved in war concerning the same.

We in the United States can never have such wars as long as the law of the country is obeyed and regarded, because the perpetual unbroken succession of political authority is provided for as a matter of law; even the second officer of the Government, to which all of us owe allegiance, and the term is not subject to interruption; it is subject to no loss or disparagement. If the Vice-President should be absent, such is the term used in the Constitution, by death or by any other casualty, this body is authorized to select a successor, a President *pro tempore*, an officer named in the Constitution, designated by the organic law, a permanent part of the system of the Senate, of the official staff of the Senate.

This officer is named and designated in the line of succession, even to the second officer of the Government, and allow me to say that he is chosen with reference to the succession of political authority in the executive department of the Government. These are measures of repose, of unshaken security, of peace, of quiet worthy of a great people engaged in all the vocations and arts of civilization, without a thought that they can ever be disturbed or molested by any question of the interruption of the constitutional functions of the Government.

The continuity of the legislative powers and department of the Government is a thing as necessary as that of the executive. This Government as well as all others depends upon revenue, and the revenue both in its supply and disbursement is wholly dependent upon the action of the legislative department.

But the legislative department of the Government is constituted in a manner very different from the executive, and especially in the number of its membership. The Constitution does not attempt to designate successors in the legislative department of the Government. What the Constitution does do without doubt is to frame a mode of succession, the means of succession, not to name or designate successors. That is certainly done with respect to both departments of the National Legislature. There has been no instant of time since the organization of the first Congress when there has not been under all circumstances, under every exigency and emergency, the means provided for the succession of legislative authority and the mode and manner of that succession prescribed by the organic law, even to the units of membership in both the Houses of Congress.

It is said in the Constitution "that the House of Representatives shall be composed of members chosen every second year," and when vacancies occur the executive of the State is to issue writs of election for the purpose of filling such vacancies. The term "vacancies" here is without qualification or limitation. It comprises vacancies arising from every conceivable cause, just as the statute of a State regarding administration disposes of the goods and chattels, the property of the deceased, under every circumstance of intestacy, and discovers the heir by the rules of descent enacted in such cases.

In the membership of the House of Representatives there is no substitution, there is no replacement. There is no person who is designated to succeed. It is not said, for example, that the person receiving the next highest number of votes shall succeed the member elected in case of a vacancy, or that the vacancy shall be filled by the remaining members of the delegation. No such expedient is resorted to. In this respect the membership of the House of Representatives is the highest and most dignified in the National Legislature or in the whole system of Government. It is the only office where no alternate is provided and which can not be filled by substitution.

The consequence is that the means of succession do remain undisturbed. The mode of succession is provided in the Constitution perpetually. The Constitution provides that a writ of election shall be issued by the governor to fill the vacancy, and that is the only means of succession. It is the most expensive means, it is the most deliberate, it is the most prolonged, and the most dilatory method of succession in respect to any of the offices named in the Constitution.

A vacancy may occur in that House by the casualty of death, by resignation, by the failure to elect by the people, a tie vote by the people, by the refusal to accept by a person who has been elected, or it may occur by the death of the person elected after his election and before qualification. In that case the vacancy does not occur in the term, for the term has never been occupied. Filling a vacancy proper can only mean the filling of a place which has formerly had an occupant, the completing of a term which has formerly had a tenant. The new term of a member of the House dying before his qualification is therefore not a vacancy in the term; but the words used in the Constitution are "vacancies in the representation." Although this is not a vacancy in the term, it is a vacancy in the representation; it is a vacancy in the delegation; the delegation from that State is one short in the House of Representatives and an election is ordered to fill this vacancy—a vacancy in strict propriety and in the strictest use of our language called, and properly called, such, because it is a vacancy in the representation, a vacancy in the delegation, a vacancy in the succession, thus commanded by constitutional ordinance to be filled and to be supplied.

Now, sir, I think it has always been a favorite theory in discussions upon constitutional power and in the practice of this Government to regard the two Houses of Congress as coördinate and coequal, as having equal power and equal authority in the public affairs of the Government. So far as they related to the legislative system, they have always been taken and deemed to be of equal moment.

As to a vacancy in the House of Representatives, where but one means of filling a vacancy is provided, if with respect to this vacancy in representation in that House there can be no interregnum, there can be no interruption, there can be no hiatus, for the filling of which the means of succession is not provided by the Constitution at any moment, at any hour, at any day when the vacancy occurs; then in this body, where there are two means provided of political succession, of the succession of political power, one by appointment and one by election, with what reason can it be claimed that in this body, where a double alternative is provided for the succession, there should here be a hiatus,

a chasm impassable, not to be supplied, not to be filled, and of indefinite recurrence?

In the two articles of the Constitution referring to the composition of these Houses it is said that the House of Representatives shall be composed of members chosen every two years by the people of the several States, and that the Senate of the United States shall be composed of members chosen by the Legislatures of the States, two Senators from each State. Nevertheless, it is afterwards provided in the clause relating to representation in the House, as in the clause relating to representation in the Senate, that in case vacancies occur, in the one instance the governor shall issue a writ for a special election, and in the other instance, where vacancies occur during a legislative recess, the governor shall appoint.

Now, is there any disparagement of a member elected to the House of Representatives under a special election in the fact that his office is not provided for in the first clause of the Constitution relating to that subject? That clause says members of the House shall be elected every two years. There is no House which has met since the organization of the Government, since the first, that did not have members elected in it at different intervals. Is their title to be questioned or to be disparaged because it is not described or provided for in the first clause of the instrument?

Again, in the first clause of the third section relating to the composition of this body it is said that Senators shall be chosen by the Legislatures of the several States for the term of six years, two Senators for each State; but it is afterwards provided also that during a recess of the Legislature vacancies may be filled by appointment.

We always have appointees in this body. Even before we admit the postulants now asking for admission, whose right to a seat here is questioned, we have now appointees in this body by the governors of States during legislative recesses, who will vote upon this question and who will aid and assist us in determining the question as to whether these additional seats shall be filled or whether they shall remain empty. Has it ever been considered to be any disparagement of the title of an appointee by a governor that his appointment was provided for in a subsequent clause of the Constitution relating to the composition of this body rather than in the first clause regarding it? What is there more of control in the first clause than in the second or the third?

I speak now with reference to the commanding power, the paramount authority, the supreme dominion of this highest law of the land, when I say that the last clause in the section respecting the composition of the Senate and respecting the composition of the House is as binding as the first; each and all are of equal authority. The members of the House who are not chosen every two years, and the members of the Senate who are not chosen by the Legislatures at all, but are appointed by the governors of States, are equally entitled to their seats, are guaranteed in their title thereto, and are vested with these official duties and functions by a part of the paramount law, as binding in its obligation as the very first sentence or clause in that instrument.

I wish to call attention very briefly to the section in the Constitution which relates to the composition of this body, and contains the provision in reference to the appointing power. It is found in the second clause of the third section of that instrument:

> Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year; of the second class, at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies—

Using the noun agreeing with the verb "vacated" used in the prior part of the sentence, for this clause is a single sentence—

> and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments.

What is the meaning of the term "vacancies" in that passage? I speak advisedly when I say "passage." Senators have called it a clause; it is not a clause. Senators have called it a section; it is not a section. Senators have called it a sentence; it is not even a sentence; it is a very small part of a sentence, cut off simply by a semicolon from that which precedes it in the context.

What, then, can "vacancies" refer to? It can only refer to the verb "vacated" preceding it. It can only refer to vacancies in the classes, and not to vacancies in the term. At the beginning of a new term no vacancy in the term can be predicated, because the term has had no preoccupant, no former tenant; but a vacancy in the class at the commencement of a new term, at the middle, at the end of it, at any time when the place is vacant, a vacancy in the class exists, and it is with respect to such vacancy that the framers of the Constitution used this language.

Take for example the cases in argument now. Here is Mr. Mantle, a Senator of the third class, appointed at the commencement of a new term, a term which could have no vacancy in it, and yet there is a vacancy in his class; there is a place in that class which has been preoccupied and is now empty. The occupant was Mr. Sanders, formerly a Senator in this body. Therefore it is strictly philosophical to say as to the clause in which this passage is found, with respect to the classification of Senators, that a vacancy exists in the class and it may be filled by appointment. Take for another instance the case of Mr. Beckwith. His predecessor was Mr. Warren, a Senator of the second class, now in the third class; and in the second class, in the present condition of affairs, there is a vacancy, and that vacancy occurred during the legislative recess. Although it may not be called a void in the term, no man can deny that it is a void place in the class, and, therefore, constitutional authority is given to the executive of the State to fill it.

The same question might be asked with respect to the representation in this body of the State of Florida. Was there a vacancy in the representation of the State of Florida at the commencement of this session of the Senate? It was the commencement of a new term and the expiry of an old one. There was a vacancy in the class. The Senator now sitting belongs to that class. His term expired on the 3d of March last, the seat was empty afterwards, and would be now if it had not been for the gubernatorial appointment.

There was in every sense, at the expiration of his former term, a vacancy in the class to which the Senator belonged, a vacancy in the classification of Senators, a vacancy spoken of, particularly described, and provided for in the clause of the section where this appointing power is found. Not only had this place in the class been filled by the Senator from Florida as his own predecessor, but this place in that class had been filled by Senators from Florida ever since the admission of the State. There had been a line of predecessors, a line of preoccupancy, a half century of tenure of the term before; and, therefore, this vacancy as well as the others are clearly defined to be places now empty, but formerly filled.

It may be asked, however, did this vacancy, referring to the Florida case, happen? We think that interrogatory is too short. It is said it could not have happened, because it occurred by reason of the expiry of a term upon a certain fixed date designated by law. That would be the case if the framers of the Constitution had used the expression "if vacancies happen" without any sequence. That inquiry is, however, too short. This is the inquiry which ought to be made under the passage of the Constitution which we are now treating of: Did the vacancy in Florida happen during the recess of the Legislature of that State?

I admit that where a thing is foreordained—fixed by law to occur—"happen" may not be strictly used with respect to it; but where the thing is most certain, where the date is fixed by law and by enactment, if it be coupled and connected with a date uncertain and a time unknown, then the proposition may be regarded and must be regarded as a contingency, and then the word "happen" is used with all propriety. The only question is: Did the vacancy happen during the recess of the Legislature?

It is said the framers of the Constitution could not have intended to use the word "happen" with reference to the expiry of the term, because—and it is true—the framers of the Constitution themselves had fixed the date of the expiry of full terms down to the latest syllable of recorded time. They did so fix it; it is immovable. But what did the framers of the Constitution know about the recess of the Legislature of Florida? That is a limb of the proposition just as clear as the other; it is connected with the other. "If vacancies"—not "when vacancies happen," and stop there—but "if vacancies happen * * * during the recess of the Legislature of any State;" and although the framers of the Constitution did fix the date of the expiry of the Senatorial term beyond change and peradventure, they did not fix and they could not know when there would be a recess in the Florida Legislature.

The Constitution was written in 1787 and approved in 1789. Florida was not then a part of the territory of the United States. Its people were outside, out of the pale of liberty; they were aliens and strangers to our Israel. The Legislature of Florida had not even been dreamed of. How was it possible, then, for the framers of the Constitution to have fixed a time or to have known the time when the Legislature of Florida would be in session or in recess? How was it possible that these framers could have used a word more precise, more classic, and better fitted to the taste of the veriest purist than the word "happen" to indicate two things so coupled together, the expiry of a term certain and the recess of a Legislature, entirely uncertain?

I admit, for the sake of the argument, that there might be a sort of judicial knowledge chargeable upon the members of the Constitutional Convention with respect to the date when the

Legislatures of the old thirteen States were in session and when recesses of those Legislatures would occur. There might have been; but, sir, that would not have justified the convention in so concluding. All the older States have changed the times of the meeting of their Legislatures and even the composition of the Legislatures. In my State, which may be reckoned now among the old ones, within my time the date of the meeting of the Legislature has been changed twice. So that now that period of the year which was formerly recess occurs in the session, and the period of the year that was formerly in the session occurs in recess.

Take, then, the framers of the Constitution writing and speaking and considering in 1787, looking down the lapse of centuries, with respect to the organization of the Legislatures of the old States and the new States to be admitted, the time when they would assemble, and the time when they would be in recess; is there any other possible conclusion than that this limb and branch of the proposition, the recess of the Legislature, was a matter wholly contingent and entirely doubtful, and was therefore designated as a happening, a thing that might occur or might not occur, and was used properly in the language of the Constitution, saying "if vacancies happen during the recess of the Legislature of any State"?

I speak of the connection between a fixed date and an uncertain one. Take now, for example, a person speaking and writing in 1840 of the 4th of July in 1861. He could not have said with propriety, "if the 4th of July happens in 1861," but he could have said with the utmost propriety "if the 4th of July happens during the recess of Congress in 1861." The "recess of Congress" is a very doubtful term, and it makes the whole proposition one of contingency.

Lindley Murray himself would not object to the use of such an expression. If he were here in this case he would, of course, be admitted to the floor, as this is a grammatical discussion; but, sir, he could not object to the precise use of such language, "if the 4th of July"—the national anniversary, fixed beyond change, fixed for perpetuity—"if the 4th of July happens in 1861 during the recess of Congress"—I do not know whether it did or not, but it might have occurred or it might not have occurred. That establishes the contingency which justifies the use of the word "happen" by the framers of the Constitution. It shows not only that they were statesmen surpassing all others in excellence, but they were grammarians not excelled even in the details of the use of the language.

This brings me, sir, to the very common principle of exegesis which has not been noticed in the argument of Senators who have preceded me. I am sorry it is not a principle recognized by any legal authority, and you will not find it in the published reports of any of the courts; but it is a principle of interpretation very dear to common sense, very near to the plain people of the United States who adopted this Constitution, who ratified this Constitution, and who have lived and died under it for three generations. That principle is the point of view, or, in other words, the standpoint of the writer or speaker. That must be taken into consideration in determining the meaning of the passage.

Now, sir, it is remarkable that in the Constitution of the United States there are in several passages glimpses of the point of view, the standpoint of the writers or the framers. It happens—and I hope the use of the word is not objectionable here—it happens that with respect to the composition of the House and Senate the point of view of the framers is disclosed. Nearly all the imperative commands in the Constitution are in the future—shall do so and so, shall be elected, shall be appointed, shall make an appointment.

The whole instrument itself was at that time theoretical; it had no practical operation; it existed wholly *in posse;* its execution remained altogether *in futuro*, and it is very plain from the point of view that the framers of that instrument did then in their minds conceive that a Senate had been composed, that a House had been organized, that the Union destined to prevail against all enemies should exist in perpetuity by the fundamental forces of this organic law. They saw the whole thing before them. It is disclosed in the very use of this phrase.

It would have been perfectly proper to have said in the case of the House of Representatives, "the House of Representatives shall be composed of members chosen every second year," and to have said also "when vacancies shall happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies." It is not so said. The word used is "happen"—the present tense, the mood most simple, the first mood. The framers have brought before their eyes the whole organization of the National Legislature. They treated themselves and deemed themselves to be living under its benignant sway. They therefore speak in the present; they therefore write *in presenti*, "when vacancies happen," and the same phase occurs in the provision in relation to Senators in that passage of the Constitution.

The only difference is this: In the parallel clause relating to representation in the House the phrase is, "when vacancies happen." In the passage relating to representation in the Senate the phrase is, "if vacancies happen." The tense is the same, the tenor and purport is the same. It is the point of view, it is the standpoint from which these parties looked upon the legislative operations of the Government.

Mr. MITCHELL of Oregon. Would it disturb the Senator if I should ask him a question?

Mr. TURPIE. With all due respect to the honorable and learned Senator from the State of Oregon, I decline to yield and do not desire to be interrupted.

In the view of the framers of the Constitution, then having present before them the different functions of the Government and the legislative department in actual operation, they had nothing which enabled them to say anything with respect to a juncture so uncertain as the recess or session of a Legislature or as to what period of the year it might occur, or that it might be coexistent with a vacancy happening in the Senate.

It has been said here in argument that when a State declines to send a member to this body, that is, when the Legislature of a State fails to elect, there is no further duty upon the executive. What are the functions of a member of this body and what parties are interested in the discharge of such functions? I think the first and most important party in interest is the people, the nation of the United States; the second is the State which sends the Senator, and the third is the Senate itself. If the State then does decline to send a Senator here, it does not foreclose and bar the interests of the other two parties in the representation. It can not have that effect.

Allow me to remark, Mr. President, that the Constitution of the United States is a law of the people of the United States; it is legislation by the people; it is an enactment much more solemn than any which passes these two Houses and is approved by the President; it is a legislative statute of the sovereign, requiring no man's approval or confirmation; and the people of the United States in this primary, elementary law of their own enactment have vested the power to appoint during a legislative recess in the governor. In whose behoof and for whose benefit? Not certainly alone for the benefit of the State having the right to send, but in our behoof as Senators and in their own behoof as citizens of the United States. The whole mass of the citizenhood of this country is authorized to be represented in the Senatorial classes, and is interested in the full complement of such representation at every hour, at every moment of the public service.

It is said that the governor may decline to appoint. Most certainly he may. It is said the Legislature may decline or refuse or neglect to elect. Most certainly it may, and most certainly it has in each of these three cases now under consideration. It is said also that there is no power in the Constitution of the United States to compel the governor to appoint, to compel the Legislature to elect, to compel the person chosen to accept. It is therefore argued that a succession of political authority under this section of the Constitution was not intended or contemplated by its framers, because the Constitution is lacking in these compulsory means; and a passage is quoted here from Mr. Webster, in which he declares that the Constitution of the United States is binding upon individuals; it is obligatory upon the conscience of the citizen. Most certainly it is, but it is not binding upon the action, the highest action, either of the citizen or of the public officer of the Government. His words will not bear any such construction or misconstruction.

Where the Constitution binds action it is always that of some subordinate, some inferior, some merely administrative functionary or officer of the Government. It might as well be said a President-elect of the United States may decline to take the office. Is there anything in the Constitution of the United States to compel him to take it and to enter upon the discharge of his duties? In the case of the incapacity of the President, the Vice-President of the United States may decline to become his successor. Is there anything in the Constitution compelling him to accept that succession or compelling any of the officers in the line of succession to accept it?

The highest functions of government are not subject to compulsion. They were not intended to be. They are only obligatory upon the conscience and honor of the public officer; they have no sanction, and no penalty is attached, except that which attaches to the breach of conscience and to the violation of honor.

Take a higher function than any I have named. I speak with all reverence and with due consideration. The right of a freeman to vote is a higher function than any of those provided for either in the State or Federal constitutions. There is nothing in any of these instruments which can compel a citizen to vote.

The very highest function in a free government is entirely voluntary; there is no compulsion about it. Freedom of the ballot necessarily implies the freedom of the voter, and that freedom implies the privilege to vote or to abstain. In my judgment the great political revolutions, those which have even occurred most recently, are to be much more largely attributed to abstention than they are to a change of political opinion or to a change in the fellowship of partisan alliance.

It can not be said that the commandment of the Constitution with respect to the classification of the Senate and the perpetuity of the succession in those classes is not intended and contemplated by the organic law because there is no compulsion upon the governor or the Legislature to supply vacancies. It might as well be said that the Presidential succession of the United States is not intended and is not provided for because there is no agency in the Constitution which can compel the acceptance of the duties of that high office. I suppose no one would contend for such a construction.

For my part, I believe that the perpetuity of Senatorial succession in the classes of this body is as firmly fixed and as assuredly secured by the provision of the Constitution in reference to the elections and appointments of our members here as the Presidential succession is fixed and secured. I know of no fact, I know of no occurrence, I know of no era to be ascertained, to be established, to be firmly fixed by any human instrumentality, which exceeds in certainty the Presidential succession in the United States. It is a succession beyond peradventure, beyond interruption, beyond change, beyond the power of death, beyond any casualty to break it, except by the abdication and abandonment of the Government by the people who have so long supported and so bravely defended its life and continuance.

I turn now for a moment to that passage of the Constitution relating to the succession in the Presidency:

> In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly, until the disability be removed, or a President shall be elected.

If there is anything certain in human affairs it is the succession of authority in the Presidency of the United States; but it is not more so than the Senatorial succession in the classes of this body.

There is a very singular consideration urged in favor of the interpretation of the minority of the committee. They say the failure of the Legislature to elect in these three cases is an indication of subsequent and repeated failures. To hear the Senators make the argument and state it, it would seem as if the Legislatures of the different States had about concluded to finally abandon their right to elect Senators of the United States; had about concluded to abdicate their powers and duties in that regard; that this body hereafter must be filled solely and only by appointees of governors. They speak in graveyard tones of the existence of third parties in the country, of the continued popular unrest, of the impossibility of making numbers unanimous, and of the disagreement existing among even majorities as throwing obstacles unforeseen, unknown, unconjectured by the framers of this Constitution in the way of the construction placed upon this passage by the majority of the committee.

Why, sir, I do not believe there was ever a body of statesmen in any civilized country in the world who were so perfectly familiar with the present political conditions as the framers of the Constitution were with the same conditions, only in a more aggravated form, during the whole of the Revolutionary war and the political struggles which preceded it. There are three parties in the country, and they sometimes find their way into the State Legislatures.

During the whole twenty years prior to the commencement of the Revolutionary war there were four parties in the British Parliament well defined, well marked by dividing lines, more distinct than those of nationa. subdivisions among the people—the party of Pitt, the party of North, the party of Rockingham, the party of Shelburne. When the ministry was forced upon the Crown, which finally recognized American independence, it was not by a victory of the Whigs over the Tories; that did not happen till much later; but it was by the combination of two sections of adverse parties, who placed a Cabinet in power which concluded the treaty of Paris and recognized the free and independent existence of the United States as a nation.

There is no subtlety of political design, there is no form of political finesse, there is no shape of caucus or of conference or of primary craft or cunning which was not exhausted in the political struggles pending in the earlier years of George III prior to the declaration of war against the Colonies.

I know, sir, it is sometimes said that there is nothing new under the sun. I do not accede to that proposition. I think there is; there is much that is new, entirely unknown before, which has come to this age, and I believe much more will come to it; but if it be said there is nothing new in political chicanery, there is nothing new in political strategy, there is nothing novel in political combinations, I agree to it. If there is anything trite by repetition, if there is anything grown stale by custom, if there is anything that has grown moldy by usage, it is the different fraudulent combinations and the different varieties of political intrigue which characterized the era of the framers of this Constitution. These were old things even at that time; they are older now.

I took occasion some years ago to refer to election incidents in Montana, which most of us on this side thought to be unjust and to savor of corruption; but I never dreamed that they were novel. They did not have that charm. Returning boards existed in Scotland and Wales during the whole of this era; the members were certified by returning boards, the election was settled by returning boards. They flourished with a growth as luxuriant and as infamous as that which has characterized their existence and service in the United States, and were much more frequent. The framers of this instrument need not have crossed the Atlantic, for there was the same arena of political scheming, intrigue, fraud, and craft intervening in every Colonial Legislature of the thirteen different Colonies during the period spoken of.

I recollect very well reading of a time when the proceedings of the House of Burgesses at Williamsburg; the proceedings of the General Court and Assemblymen at Boston, Mass.; the proceedings of the House of Delegates at Albany, N. Y., before the Union and before the war were noticed with as intense anxiety as the proceedings of either branch of Congress are noticed now, not only by the inhabitants of the Colonies, but by the parties and citizens of the mother country. They were interested as much as our fathers were, and towards the close of that great parliamentary struggle, happening in the thirteen different political centers in thirteen different Colonies, when every device had been exhausted by the party of the Crown, when they had offered pensions on the civil list and annuities on the privy purse, stars, garters, even peerages, to disrupt a single American Legislature on the question of the stamp act—it was at such a period as this that the framers of the Constitution acquired their political education, and it is of men so educated that it is here asserted that, although they might have the wisdom of the serpent, they had also the harmlessness of the dove.

I believe they had the wisdom of the serpent, and they had the innocence and the purity of the dove in all the work and way of liberty, but they knew what evil was. They felt the hot, heavy breath of legislative corruption. They had withstood all its blandishments and all its approaches. There were three parties in every Colonial Legislature, well defined, spoken of in all the histories of that era. One party was the patriot party, looking forward to the separation of the States from the English Crown. Another party was one which sympathized with the former, but were not willing to take the irrevocable step. Another party, frequently in the majority also, was the party of the Crown, insisting upon the right of the Imperial Parliament to tax the Colonies, and their duty to impose excises.

To say that the framers of this Constitution were not familiar with such an instance as this, a nominal majority divided and avoiding control or election which they might have secured, the artificial division of all the members on the floor compelling the presiding officer, the person in your place, to cast the tie vote, and to discover at last whether he was with the Crown or with the patriots—to suppose that they were unfamiliar with the tactics of the trained minority which might propose dilatory motions and actions to prevent an election or the passage of a law until the adjournment of the colonial assembly, when the office might be filled by the governor or by the appointment of the Crown—to suppose any of these things is to suppose an impossibility.

Who were the makers of this instrument? Gen. Washington was the president of the Convention. Dr. Franklin was the oldest member of it. Dr. Franklin had spent most of his life in London, the scene of these political intrigues. He was better acquainted with European politics and with American politics than any other member of the body. I will not say any more for him now except one thing. Dr. Franklin was a member-elect of the Convention when Gen. Washington went to Philadelphia to attend its session, and Gen. Washington, that master of etiquette, that sovereign of dignity and decorum, called first upon Dr. Franklin.

That certifies to me the wisdom, the intelligence, the purity, and the patriotism, and even the political knowledge in detail which characterized these great coactors and contemporaries. When, therefore, I hear a Senator assigning as a reason against a certain construction that there were some considerations inci-

dent to it which had not been weighed in the balance by the framers of this instrument, I immediately come to the conclusion that he has overestimated the wisdom and intelligence of the present age and that he has certainly underestimated and underrated the experience and information of the fathers and founders of this Government.

Gentlemen say there is no evidence of such a construction in the debates. The debates are perhaps sufficiently voluminous. The convention sat several months. This Constitution covers four pages in a book of octavo size; it covers about eight pages in a book of ordinary size. Did it take months and months to write it? Did it take months to compose it? How were these months of the session spent? They were spent in considering every clause, every word of the instrument from the beginning to the close.

There are a class of persons well known who speak too often in legislative bodies. I do not know that they are held in higher estimation than those who speak more seldom, but what I wish to say is that there are many valuable members of this body and of every other public body who do not participate in the debates at all, and their considerations are well thought out, deeply founded; although effective upon their fellow-members, they are not found in the debates.

Take the distinguished philosopher and statesman of whom I have spoken, a man who attended the sittings of the Convention every day; who lived in Philadelphia, whose house was open; where the committees met, where conferences were held of the friends of a certain section, of the friends of a certain clause, of parties interested in a certain passage as this is, the appointing power of the governor. Take such a man as that. He made but one speech in the many months' session of this convention. It may be read in ten minutes, and it was made just prior to the adjournment *sine die*. He was a man most industrious, most diligent, a man most constant in his labors and in his attendance, and I do not think it is impossible that a conjuncture here spoken of, the existence of third parties and the necessary sequence of such an existence, could have escaped his observation or the observation of his contemporaries when they had political and personal experience every year of their public life of just such vicissitudes and conjunctures as these are at present.

This construction of the minority makes an indefeasible, an irreparable gap. It creates a crevasse not to be repaired, not to be filled in the political current of governmental authority. That is the effect of it, and it is based partly upon the use of the word "happen" in the phase "if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State," the governor shall make appointments. It is said with respect to this word, and I read now from the report of the minority—

> An event that is provided for by law to take place at stated periods known to all men is not correctly spoken of by people of ordinary education as "happening," because there is no element of uncertainty in it.
>
> * * * * * * *
>
> We do not say, for instance, that any natural event, which all men know and look for, did "happen" to come at the time on which it was expected; we do not say that the sun "happens" to rise on a certain day; we do not say that water "happens" to flow down a descent by the force of gravity. That is a known law of nature. We do not say that Christmas "happens" to come on the 25th of December; by the universal consent of Christendom that event comes on that day without peradventure. We do not say that a note "happens" to fall due on the day which is specified in the instrument, though it no doubt is often said that it "happened" to fall due when the maker did not have the money to pay it.
>
> We do not say that Congress happened to meet on the first Monday in December: that is law.

I have no criticism to make on this exposition of the meaning of the term "happen," but I have an observation to make upon its relevancy to this argument. The whole of this exposition is founded upon a fallacy very manifest. That fallacy is that the vacancy is created by a single cause, the expiry of the term. A vacancy can never occur after adjournment by an expiry of the term alone. What if the Legislature had elected, would not the term have expired? Would there have then been any vacancy?

The vacancy is not due to the single cause of expiry of the term. It is due to the two causes, the expiry of the term and the failure of the Legislature to elect. The one cause is certain; it is fixed by law beyond contingency. It can not be spoken of as happening. But the other cause is entirely doubtful, the failure of the Legislature to elect. It may occur or it may not occur. When an event depends on two causes, one of which is fixed and certain and the other is uncertain and contingent, the event itself is a contingency. The one uncertain cause makes the event itself uncertain.

Now, is there any event more uncertain than the action of a Legislature circumstanced as these Legislatures were with respect to a Senatorial election, where the majority is very close, or where it is divided, or where the balance of power is in the hands of a third party? I passed through such a crisis myself, weeks and weeks of balloting depending upon a single vote belonging to a third section or independent party represented in the Legislature, and finally terminated by that vote alone. There is not a more uncertain thing in the world or in the transactions of the world than what will be the legislative action in such a juncture. If there be, it is the proverbial verdict of the petit jury. That is said sometimes to be the most doubtful thing.

But I believe that dubiety is just as intense in the case of such legislative action as it is in the case of a mistrial; and I ask any one here, skilled or unskilled in the use of language, if a gentleman speaking of a case where the jury had disagreed should say a mistrial happened, whether that would be solecism, whether there is anything incorrect in it or ungrammatical; and in speaking of legislative nonaction, if that gentleman should remark there happened to be a failure to elect, who could lay anything like a solecism to his charge? What incorrectness is there in the use of that language? How is it said, then, that the makers of the Constitution were not fully justified in using the word "happen" when they spoke of a vacancy occurring from the two causes, the expiry of the term and the failure of the Legislature to elect?

Sir, if there be any happening in this world of haps which is more uncertain than another, it is what shall be the event of a trial by a petit jury or what shall be the action of a legislative body under such circumstances. I do not believe, since the first man broke silence with the first speech, that any thought or thing has ever been so appropriately designated, denominated, and pointed out as a vacancy caused by a failure to elect in this instance is by the framers of the Constitution when they say that if it happen.

The original draft of the instrument did not contain the words "by resignation or otherwise." Having done away with the obstacle in the use of the word "happen," the opponents of this construction take refuge in the phrase "by resignation or otherwise." They claim that it is a limitation upon the power of the governor, and that the vacancy which happens is one which is occasioned by resignation, or, as they claim it, "otherwise," meaning by similar modes to resignation, something like resignation. We of the majority say that "otherwise" includes every other casualty by which a vacancy could occur, every other casualty no matter what it may be. "Otherwise" means "other ways." Gentlemen may examine Johnson, the contemporary authority with the Constitution of the United States, the nearest contemporary, the first of English lexicographers, not the last nor the least in learning. He defines the term "otherwise" to mean "other ways, in another manner, in a different mode or manner, not in a similar way, not in the same way, not in a way like the way first named." And the real question in this debate is not how a vacancy occurred, but whether it exists.

But I do not quote Johnson alone, and I should be willing to say that the original interpretation was somewhat doubtful if it was not for the practice of the Senate of the United States. I am not talking about precedents. I am speaking of the practice of this body, the practice acquiesced in, conceded, taken *pro confesso*, acknowledged, admitted, unquestioned ever since the organization of the first Senate.

Vacancies may occur in this body by death. Death came very early to us, and vacancies came to us by means of death as early as the second Congress. Death is a very common cause of vacancy.

Now, what has been the practice? The practice has been constant and unbroken where a vacancy occurs by death; it has been always filled by temporary appointment by the governor during the recess of the Legislature. There have been many such appointments, and there have been very numerous decisions and judgments of the Senate that the vacancy occurring by death is legitimately filled by a gubernatorial appointment.

How does death resemble resignation? How is death like resignation? What similitude is there between resignation and death? Resignation, of course, implies the voluntary action of the Senator. It implies an act closely related to his will or volition. Is death a voluntary act? Has it any kinship with voluntary action? A Senator might commit suicide, but the best authorities have said no sane man was ever a voluntary agent in his own destruction. Death is the most involuntary of all acts. It is the most dissimilar to that of resignation. I have always understood death to be a struggle against the will and against the wish to live; the death bed is a scene of contest between the forces of disease upon the one hand and the forces of vitality upon the other, in which the patient finally yields by force, by superior duress; not of willingness, but by compulsion.

> For who, to dumb forgetfulness a prey,
> This pleasing, anxious being e'er resign'd?

The poet has spoken the sentiment of humanity with respect to the character of death. Who has ever tendered a resignation

of his life except that Divine Being whose majestic self-sacrifice has filled the world with wonder and worship?

I have no doubt, sir, insanity would create a vacancy here. I think there is not an instance of it in the history of the Senate, but I have no doubt that insanity after office found must create here a vacancy. After a Senator has suffered the inquest of *non compos*, and is declared judicially to be void of disposing mind and memory, he could not certainly fill the functions of a lawmaker. We ourselves would be obliged to take notice of such procedure, and the chief executive of the State would be bound to fill the vacancy.

Is insanity a voluntary act? Does it resemble resignation? I have always understood that derangement of the reason once extant and once in being was a result of an intense struggle prolonged for nights of torture, for days of gloom, until the malady finally dethroned the sovereign reason and ruin followed. Next to death it is the most involuntary of acts or of conditions, and yet it might create a vacancy.

Expulsion may be another cause of vacancy. We have had in the history of the Senate two instances of expulsion, and in both of these instances, as soon as the decree of expulsion was entered, the governor, it being in the recess of the Legislature, appointed a citizen to fill the vacancy. One of these expulsions related to my own State, Indiana. Within three days after the order of expulsion was entered the appointee of the governor, it being in legislative recess, came here and was qualified and took his seat, acted as a Senator, voted as a Senator, was recognized as a Senator until the day that the Legislature elected his successor. In the other instance the same procedure was followed.

Is expulsion within the category of "or otherwise"? We claim that it is. It does not resemble resignation. The failure to elect by the Legislature may be the cause of a vacancy. I will not ask whether that resembles resignation. I do not believe two acts could be differenced by a more extended disparity than resignation and a failure to elect by the Legislature, but I will say a failure to elect by the Legislature and a vacancy occasioned thereby resemble resignation, and a vacancy occasioned by resignation just as fully and as completely as a vacancy occasioned by death or by insanity or by expulsion resembles resignation.

We claim that all these four causes—death, insanity, expulsion, the failure of a Legislature to elect—are causes of vacancy included in the phrase "or otherwise." Two of them are conceded by a century of action of the Senate of the United States itself to be in that category—death and expulsion; and these two are most dissimilar and the most completely and remotely separated from resignation of any causes that could happen occasioning the vacancy.

We think, therefore, the words "or otherwise" do include and were intended to include every cause of vacancy except resignation. Then why should resignation have been mentioned at all? A Senator has already spoken of the history of that term. There was a question then entertained very seriously in the Colonies and by the statesmen of the Colonies whether a person elected by the people or by their representatives to an office could divest himself of that election, could excuse himself in anyway by his voluntary act from the performance of the duty, and there was a very large minority of opinion in the courts and assemblies of the colonial period against the authority and right to resign.

In England to this day a member of Parliament can not resign. Once elected, he can not resign. A member of Parliament may take an appointment from the Crown, and if he receives such appointment his seat is vacated. The member of Parliament who desires to retire asks of the premier the appointment of warden of the Chiltern Hundreds. It is never refused. It is an office without duties; it is an office without salary or emoluments. Having accepted the Chiltern Hundreds, and having waited until the writ for the election of a successor has been properly signed and attested, he resigns the office and finds himself at once out of Parliament, out of public life, in that post of honor the private station. It is only through this narrow door that he can divest himself of that sovereignty which the suffrages of his fellow-citizens have imposed upon him.

In the case of Senator Allen, however, it is said, granting that the use of the word happen is more than justified by the rules of the language at the period of the formation of the Constitution and at this present hour, granting also that "vacancies" refers to vacancies in the classes, to real vacancies, places which had former occupants, it is said in the case of Senator Allen that the vacancy did not commence in the recess of the Legislature. The Constitution says nothing about the commencement of the vacancy. It says nothing about the beginning of vacancies. The language is, "if vacancies happen, by resignation or otherwise, during the recess of the Legislature of any State."

Now, sir, I think it is very clear that with respect to the use of this word it may be continuous. I was reading the work of a very accomplished authoress a few days ago, a lady who visited the Cape of Good Hope, and who published an account of her travels on the way to India and to the farther orient. This lady said she arrived at the Cape at the commencement of the rainy season and that it rained without ceasing. "It happened to rain every day of our sojourn at Capetown, and we were unable therefore to go out and view the city." Is that ungrammatical? I have a very distinguished Senator as my ordinary seat mate on the right, the Senator from Mississippi [Mr. WALTHALL], whose absence has been missed so much by all those who have the pleasure of his acquaintance. If I were to speak now of his absence in this body and to say that he happened not to be present, or that he happened to be absent during the whole of the last week in March, or during the second, third, fourth, fifth, sixth, and seventh days of such a week, or during each day in the last week of that month, would there be anything improper in the use of such language? And instead of supposing he were present, detained as he is by indisposition, if I would speak abstractly only of the absence as the Constitution speaks of the vacancy, might not I say that this absence of the learned and honorable Senator from Mississippi had happened during the whole of the first week of March, and during each day of the second week, and during every day of the third week, and had happened during Monday, Tuesday, Wednesday, Thursday, and Friday of the last week of March, 1893?

It is not the continuance of the condition which justifies the use of the word "happen," but its contingency. If such condition must end on a day certain, then it can not be said to happen no matter how long it may last; but if its duration and ending are uncertain, then it may be said to happen every day of its existence no matter how long it may continue.

Now, sir, I believe that this vacancy occurring at the expiry of a term, during the session of a Legislature, not supplied by them, happened every day of the session, because it might either have been or not have been every successive day, and happened every day of the recess following the session succeeding the adjournment. It happened every day of that recess, because it might have been filled or might not have been filled by appointment by the governor.

The election or nonelection by the Legislature is a contingency which happens each day of the session, and the vacancy so caused might happen each day of the recess succeeding the adjournment. It is proper to say that the vacancy in the class of the Senator from Washington, Mr. Allen, the vacancy in the class, the place filled in that class by himself as his predecessor, the vacancy in the place heretofore preoccupied which is now empty, has happened and did happen every day up to the date of the gubernatorial appointment from that State.

Mr. President, the different clauses, sections, and passages of the Constitution ought to be construed with reference to the main tenor and purpose, and especially with reference to the objects mentioned or aimed at in the particular passage in argument. The subject-matter of this section of the Constitution is the composition of the Senate, and it plainly shows two methods of composition, one by appointment and one by election. The subject-matter of this clause in that section is the classification of Senators and the perpetuity of that classification, and it plainly shows that vacancies in the classes are to be filled during legislative recesses by executive appointments. Our construction, even if it should be doubted upon any ground, ought to be favored, because the other is adverse to the purpose of this section, of this clause, and to the whole tenor of the instrument.

There is no mere construction by implication which will justify us in concluding that any vacancy could not be filled by the governor occurring during recesses. We ought to be unwilling to come to the conclusion that any such vacancy could happen from any cause which could not be supplied by a gubernatorial appointment unless the power is expressly excluded by the terms of the Constitution. For instance, this would be an exclusion: "When the Legislature has been in session and adjourned without choice the governor shall not in the subsequent recess appoint a Senator." What if that had been offered during the Convention which framed the Constitution of the United States? What if it had been read in the presence of the presiding officer, Washington, and in the presence of that great statesman, Franklin, as I have read it here to-day?

I think there would have been many members of the Convention who would have sprung to their feet and said, "Why, gentlemen, it is impossible for us to adopt such a proposition as that. That does not look to an occasional interruption during the use or attempted use of the means of succession. That proposition denies the means of the succession and destroys its perpetuity. It deprives the Government of a means of its enduring existence. If we are to pass any such thing, if we are to submit any such proposition to the people of the United States, let us do it in a separate clause, let us do it in a separate section; let us not, at

least, put it after a semicolon in another passage. If there is to be a final incurable hiatus in governmental affairs, let it be plainly directed, commanded, promulgated in the organic law. It ought not be left to mere construction, or to the broken lights of misconstruction." There is no such passage in the Constitution, and without the utmost distortion of language no such passage can be implied from the terms used in that instrument.

This section treats of the composition of the Senate. This pretended construction demands the decomposition of the Senate, by declaring not only that a vacancy had occurred, but that it shall continue, and that there is no power to fill or supply it. This construction, the construction of the minority, is the construction of dissolution, of decadence, of decomposition, of death, and if a sufficient number of States were implicated and there was an abstention suggested by this construction of gubernatorial appointment, it might lead to the dissolution of this body and the termination of its functions.

Under this construction of the minority we go forth into a void desert, a land unsown, a country sterile, barren of results or returns. We undertake to define and declare an interregnum, an interruption in the legislative department of the Government, by contemplation of law perpetual in its existence and in its operation, and this vacancy is incapable of being supplied, and it is of indefinite frequency of occurrence. The consequence is that in the very origin this Government has deliberately created a default and framed a defect in its fundamental law which is without remedy.

Although vacancies do occur of necessity, such as the lapse of time in electing a member of the House of Representatives or the lapse of time occurring in appointment by the governor, yet such delays are incurred in the actual use and operation of the means of succession, of the mode of perpetuity. Under this construction it is claimed that in certain cases there can be no means of succession and there can be no method of perpetuity. We have reached a point in the Government at last where we can govern no longer.

Our construction, the construction of the majority, on the other hand, is affirmative. We claim the right to do where doing is demanded. We claim the right of the governor to act where action is exceedingly necessary and must have been contemplated from the beginning. The construction of the majority in this case is beneficial. It is in accord with the underlying instinct and purpose, the aim and destiny, of this constitutional Republic, the continuity and perpetuity of the national life.

I have sometimes thought, sir, that these procreant elements and forces of the organic law, these procreative agencies in our system, have in themselves a savor of immortality, of self-engendering perpetuity, and that if in some ill-starred time of storm or disaster any part of this magnificent fabric of civil liberty should go down, these principles would yet survive; they would never be wholly submerged. As has been written by another upon a similar theme, these would yet appear clearly, distinctly visible in every circumstance or calamity, like that cluster of stars fabled, shining, to float upon the waves of the Ionian Sea to mark the spot where the enchanting lyre of Sappho sank ages ago beneath its waters.

Mr. VEST. Mr. President, I desire to discuss this question briefly, but there is some executive business pending. However, I can go on now if the Senate chooses.

Mr. ALLISON. Let us have an executive session.

Mr. VEST. I move an executive session, and I will take the floor on this question when it comes up again.

The PRESIDING OFFICER (Mr. JONES of Arkansas in the chair). The Senator from Missouri is recognized as entitled to the floor on the pending question when its consideration is resumed. He moves that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 1 hour and 5 minutes spent in executive session the doors were reopened, and (at 3 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, April 4, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 3, 1893.

ASSISTANT TREASURER OF THE UNITED STATES.

James F. Meline, of the District of Columbia, to be Assistant Treasurer of the United States, to succeed James W. Whelpley, resigned.

ASSISTANT SECRETARIES OF THE TREASURY.

William Edmond Curtis, of New York, to be Assistant Secretary of the Treasury, to succeed Genio M. Lambertson, resigned.

Charles S. Hamlin, of Massachusetts, to be Assistant Secretary of the Treasury, to succeed John H. Gear, resigned.

COMPTROLLER OF THE CURRENCY.

James H. Eckels, of Illinois, to be Comptroller of the Currency, to succeed A. Barton Hepburn, resigned.

AUDITORS OF THE TREASURY.

T. Stobo Farrow, of South Carolina, to be Second Auditor of the Treasury, to succeed Joab N. Patterson, resigned.

John B. Brawley, of Pennsylvania, to be Auditor of the Treasury for the Post-Office Department, to succeed Thomas B. Coulter, resigned.

DEPUTY FIFTH AUDITOR OF THE TREASURY.

James J. Willie, of Florida, to be Deputy Fifth Auditor of the Treasury, to succeed J. Lee Tucker, resigned.

COLLECTORS OF CUSTOMS.

Henry W. Egnor, of New Jersey, to be collector of customs for the district of Newark, in the State of New Jersey, to succeed Eli H. Reynolds, whose term of office has expired by limitation.

Dudley O. Watson, of Michigan, to be collector of customs for the district of Michigan, in the State of Michigan, to succeed George W. McBride, whose term of office has expired by limitation.

SUPERINTENDENT OF CHARITIES.

John Tracy, of New York, to be superintendent of charities for the District of Columbia, vice Amos G. Warner, resigned.

POSTMASTERS.

Isidore Zacharias, to be postmaster at Bainbridge, in the county of Decatur and State of Georgia, in the place of Levi H. Peacock, removed.

Francis A. Glass, to be postmaster at Cresco, in the county of Howard and State of Iowa, in the place of William B. Webster, whose commission expired March 29, 1893.

Stephen Oliver, to be postmaster at Griggsville, in the county of Pike and State of Illinois, in the place of Edward S. Hoyt, whose commission expired March 23, 1893.

Miss Rebecca Snape, to be postmaster at Petersburg, in the county of Menard and State of Illinois, in the place of William R. Parks, whose commission expired March 23, 1893.

Orris T. Dickerson, to be postmaster at Spencer, in the county of Owen and State of Indiana, in the place of John W. Anderson, resigned.

Albert A. May, to be postmaster at Cannelton, in the county of Perry and State of Indiana, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1893.

Frank Mapes, to be postmaster at Kansas City, in the county of Wyandotte and State of Kansas, in the place of Osceola K. Serviss, whose commission expired March 29, 1893.

Horace C. Ashton, to be postmaster at Flemingsburg, in the county of Fleming and State of Kentucky, in the place of Horace C. Ashton, whose commission expired February 28, 1893.

Elliott N. Benson, to be postmaster at Bar Harbor, in the county of Hancock and State of Maine, in the place of John Summisby, whose commission expired March 29, 1893.

Amasa Howe, to be postmaster at Presque Isle, in the county of Aroostook and State of Maine, in the place of Arthur C. Perry, whose commission expired March 13, 1893.

Henry W. Hough, to be postmaster at Kirkwood, in the county of St. Louis and State of Missouri, in the place of William W. Alter, resigned.

George W. Evans, to be postmaster at Ocean Grove, in the county of Monmouth and State of New Jersey, in the place of Aaron E. Ballard, resigned.

J. Elwood Harvey, to be postmaster at Little Silver, in the county of Monmouth and State of New Jersey, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Charles F. Newton, to be postmaster at Woodbridge, in the county of Middlesex and State of New Jersey, in the place of John M. Sutton, whose commission expired March 23, 1893.

Patrick Sheridan, to be postmaster at Elizabeth, in the county of Union and State of New Jersey, in the place of Samuel S. Moore, whose commission expired April 1, 1893.

I. Mount Smith, to be postmaster at Hightstown, in the county of Mercer and State of New Jersey, in the place of Thomas M. Scroggy, who is incapacitated by reason of mental infirmity, and therefore removed.

Charles Bull, to be postmaster at White Oaks, in the county of Lincoln and Territory of New Mexico, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Clarence W. Boshamer, to be postmaster at Statesville, in the county of Iredell and State of North Carolina, in the place of Andrew D. Cowles, whose commission expired March 30, 1893.

William Dalrymple, to be postmaster at Nelsonville, in the

county of Athens and State of Ohio, in the place of John F. Welch, whose commission expired March 23, 1893.

Charles E. Peoples, to be postmaster at Pomeroy, in the county of Meigs and State of Ohio, in the place of Walter W. Merrick, whose commission expired April 1, 1893.

Daniel Wyss, to be postmaster at New Philadelphia, in the county of Tuscarawas and State of Ohio, in the place of Daniel Korns, whose commission expired March 23, 1893.

W. O. Prentiss, to be postmaster at Beaufort, in the county of Beaufort and State of South Carolina, in the place of Marion F. Campbell, removed.

John W. Clark, to be postmaster at Ripley, in the county of Lauderdale and State of Tennessee, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

D. W. Nash, to be postmaster at Cuero, in the county of Dewitt and State of Texas, in the place of John C. Woodworth, whose commission expired June 25, 1892; William Drawe, who was appointed by the President and subsequently nominated and confirmed by the Senate December 20, 1892, having declined the appointment.

Helen I. Campbell, to be postmaster at Saxtons River, in the county of Windham and State of Vermont, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1893.

E. Hess Reinhart, to be postmaster at Shepherdstown, in the county of Jefferson and State of West Virginia, in the place of James D. Fayman, resigned.

John Dawe, to be postmaster at Edgerton, in the county of Rock and State of Wisconsin, in the place of Simon L. Lord, deceased.

John Finch, to be postmaster at Stevens Point, in the county of Portage and State of Wisconsin, in the place of Edward McGlachlin, whose commission expired March 21, 1893.

William A. Hume, to be postmaster at Chilton, in the county of Calumet and State of Wisconsin, in the place of George D. Breed, whose commission expired March 26, 1893.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 29, 1893.

POSTMASTERS.

James E. Brown, to be postmaster at Newnan, in the county of Coweta and State of Georgia.

Henry I. Tuggle, to be postmaster at Martinsville, in the county of Henry and State of Virginia.

J. E. Horsman, to be postmaster at Rice Lake, in the county of Barron and State of Wisconsin.

Thomas F. Solon, to be postmaster at West Superior, in the county of Douglas and State of Wisconsin.

Lewis Green, to be postmaster at Logan, in the county of Hocking and State of Ohio.

James F. Johnson, to be postmaster at Pendleton, in the county of Umatilla and State of Oregon.

Charles D. Denit, to be postmaster at Salem, in the county of Roanoke and State of Virginia.

Rollin M. Clark, to be postmaster at Keokuk, in the county of Lee and State of Iowa.

Francis M. Mumford, to be postmaster at Bayou Sara, in the parish of West Feliciana and State of Louisiana.

Thomas H. Craig, to be postmaster at Athens, in the county of Athens and State of Ohio.

William M. Dunbar, to be postmaster at Augusta, in the county of Richmond and State of Georgia.

Samuel Harris, to be postmaster at Franklin, in the county of Johnson and State of Indiana.

Henry C. Ulen, to be postmaster at Lebanon, in the county of Boone and State of Indiana.

TUESDAY, *April 4, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The Secretary read the resolution, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

Mr. COCKRELL. Yesterday evening my colleague [Mr. VEST] took the floor on the pending resolution.

The VICE-PRESIDENT. The Chair so understands.

Mr. COCKRELL. As it is very early, he is not here. I move that the Senate take a recess for ten minutes.

Mr. HARRIS. I will state to the Senator from Missouri that his colleague was in committee a few moments ago, and I think he will undoubtedly be in the Senate very soon.

Mr. HOAR. There is no quorum present.

Mr. SHERMAN. The Secretary had better call the roll.

Mr. HOAR. A recess need not then be taken.

Mr. COCKRELL. Very well.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Dolph,	Jones, Ark.	Ransom,
Allison,	Dubois,	Jones, Nev.	Sherman,
Bate,	Faulkner,	Manderson,	Smith,
Berry,	Gallinger,	Martin,	Stewart,
Caffery,	George,	Mills,	Stockbridge,
Call,	Gibson,	Mitchell, Oregon	Vance,
Chandler,	Gorman,	Mitchell, Wis.	Vest,
Cockrell,	Hansbrough,	Morrill,	Voorhees,
Colquitt,	Harris,	Murphy,	Washburn.
Cullom,	Hill,	Pasco,	
Daniel,	Hoar,	Peffer,	
Davis,	Irby,	Power,	

The VICE-PRESIDENT. Forty-five Senators having answered to their names, a quorum is present. The Senator from Missouri [Mr. VEST] is entitled to the floor on the pending resolution, and will proceed.

Mr. VEST. Mr. President, I shall claim the attention of the Senate but a very short time. It was my fortune to have been present when this question was debated in 1879, when some of the most eminent lawyers in the United States were members of the Senate. With the great weight of authority upon the other side of this case I should distrust my own conclusions, but for the fact that such lawyers as David Davis, Roscoe Conkling, Matt Carpenter, A. H. Garland, Bailey of Tennessee, and Kernan of New York advocated the same opinion which I express here now.

Great stress is put by the Senator from Massachusetts [Mr. HOAR] and the Senator from Alabama [Mr. PUGH] in this, as has been done in preceding debates, upon the fact that this question is *res adjudicata* in the Senate, and the doctrine of *stare decisis* is now invoked as absolutely conclusive. If that were so, as a matter of course it would be the end of the controversy; but I deny it. I deny that the doctrine of *stare decisis* applies to the proceedings or decisions of the Senate except when under the Constitution it sits as a high court of impeachment, when by constitutional provision each Senator is required to take a special oath or affirmation to act judicially, and when in the case of the impeachment of the President of the United States the Chief Justice presides over the court.

The Senator from Massachusetts conceded it was not a court in the debate of 1885, when he said that the Senate sat here in a quasi-judicial capacity. That gives away the entire doctrine of *stare decisis*. Whenever the Senate exercises its discretion in legislative session it acts quasi judicially, just as a board of commissioners, or the head of a bureau, or an agent of the Government acts in a quasi-judicial manner when he exercises his discretion as to any official matter brought before him.

It would be very remarkable if the doctrine of *stare decisis* applied to the legislative proceedings of the Senate, a body one-third of which is elected every two years, a body whose constituent parts are sent here by changes of popular opinion, by passion and prejudice and all the influences of popular government; and it would be much more remarkable if this doctrine could be invoked here in view of the fact that the doctrine of *stare decisis* is based upon great public policy, in order to conserve and preserve private titles, rights which are based upon judicial decisions, because the great Latin maxim *interest republicæ ut sit finis litium* as a matter of course applies to proceedings of judicial tribunals, in order that the rights of property may not be disturbed by vacillating opinion. This doctrine does not apply to the proceedings of the Senate of the United States when determining the qualifications of its members, although the Constitution uses the words "each House shall be the judge of the elections, returns and qualifications of its own members."

In the Kellogg case this contention was made, and seven Democratic Senators voted with our friends upon the opposite side of the Chamber, some of them, I know personally, against their judgment, because they believed that the doctrine of *stare decisis* applied and that the Kellogg case had been adjudicated prior to the time we considered it. But the very large majority of Democratic Senators denied that the doctrine applied, and the proceedings of the Senate since 1801 show conclusively that this doctrine has never been thought by the best lawyers to apply to a question such as is now pending in this body.

Mr. President, it is an acknowledged fact that the Senate of the United States has decided this question in both ways. The first case was decided in 1793. It came up from Delaware, and was decided in favor of the position which I assume here to-day. It is referred to most aptly in the very able argument of the late Attorney-General of the United States, Mr. Garland, which is found in the CONGRESSIONAL RECORD, giving the debate of 1879. It was the case of Kensey Johns of Delaware. The facts were as follows:

George Read, esq., having resigned his seat in the Senate on the 18th of September, 1793, the executive, on the 19th of March, 1794, appointed and commissioned the said Kensey Johns to represent the State in the Senate till the next meeting of the State Legislature.

On the 24th of March, 1794, Mr. Johns appeared in the Senate and produced his credentials of appointment.

Whereupon it was moved that they be referred to the consideration of the Committee of Elections before the said Kensey Johns should be permitted to qualify.

I refer Senators to the subsequent report of the case, to show that the debate finally culminated in a resolution of the Senate, in which 20 Senators voted that Mr. Johns, who was appointed to an original term, as the applicant in the case now before the Senate was appointed, by the governor of the State, was not entitled to his seat, 20 Senators voting in the affirmative—that is, that he had no right to a seat—and 7 in the negative.

Mr. HOAR. Was he not appointed before the vacancy occurred?

Mr. VEST. The Senator from Massachusetts asks me if he was not appointed before the vacancy occurred. He was appointed under circumstances exactly similar to those that surround the present case. The Legislature endeavored to elect. They failed to elect, and the governor of the State then undertook to fill an original term, an unbroken term, by appointment. The committee (and I have the record here before me) made their report, and the Senate affirmed it upon the distinct ground that the governor had no such right.

Resolved, That Kensey Johns, appointed by the governor of the State of Delaware as a Senator of the United States for said State, is not entitled to a seat in the Senate of the United States, a session of the Legislature of said State having intervened between the resignation of the said George Read and the appointment of the said Kensey Johns.

Now, if the contention be correct that all vacancies, no matter when they occur, in the Senate of the United States must be filled out, what difference does it make when the vacancy occurs? I understand the contention of the Senator from Indiana [Mr. TURPIE] to be that the monarchical doctrine applies to Senatorial succession. The king is dead, long live the king; in other words, that the subtile element of royalty passes out of the dead body of the monarch into his lineal successor, although it be an—

Infant,
Mewling and puking in the nurse's arms.

Mr. President, our fathers undertook to overthrow that doctrine when they established a representative government in which the vitalizing element was representation by the people, in which the House of Representatives should be constituted of members elected directly by the people, and in which the constituency of the Senate should be the Legislatures elected by the people and representing the States.

If the contention be correct that there can be no vacancy in the Senate, why did the Senate of the United States in the first case that came up, immediately after the adoption of the Constitution of 1789, by a vote of 20 to 7, declare that, the Legislature having met and failed to elect, the governor had no right to fill an original term? This was the opinion of our distinguished friend from Massachusetts in the debate of 1879 and afterwards in the debate of 1885. If Senators will take the trouble to go back to the RECORD of 1885 they will find that I then called the attention of the Senate to the fact that, the Legislature of New Hampshire having met and failed to elect after the vacancy occurred, it must be admitted on both sides of the Senate and by all Senators that the power of appointment to a full term on the part of the governor could not exist.

My position as a matter of law was fully acceded to. The RECORD shows that the two Senators from New Hampshire immediately took the floor, and contradicted my position as to the facts, but not as to the law. The Senator from Massachusetts [Mr. HOAR] now rises and says he has changed his opinion. He has a right to do it. As a matter of course he has a right to do it, but from 1879 to 1885 that stood the unbroken and unquestioned law of the Senate, and from 1885 until the other day when the Senator from Massachusetts took back that opinion it was considered by all lawyers to be settled that if the Legislature had met and tried to elect to the vacancy and failed, the governor could not fill a full term by appointment.

Even if we concede for the sake of argument that the doctrine of *stare decisis* applies, which it does not, what is the historical résumé of this question?

The first case, that of Kensey Johns, was decided upon our side of the question by a vote of 20 to 7 when the Constitution was fresh; when the men who made it were still actors in public life; when the great intellect of Madison, the father of the Constitution, was still accessible to state what he meant and what his colleague meant in this clause of the Constitution; and yet by a vote of nearly three to one the Senate in that Congress decided that the governor had no right to fill an original term by appointment.

The next case came up in 1801, the Tracy case, and I have diligently sought without avail to find the debate in regard to that case. It was passed over *sub silentio* except as to the vote. The Senate then voted that the governor did have the right to fill an original term by appointment.

Nine cases besides the Tracy case were decided between 1801 and 1825, every one of them without debate. So far as I have been able to find by diligent search not one word was said in discussion until we come to 1825, to the Lanman case, when the Senate took up this question and debated it for three days. The result of that debate was that the Senate deliberately determined that the governor did not have the right to fill an original term by appointment.

In other words, the Senate of the United States declared the doctrine, about which I have not the slightest doubt, and the more I examine it the more confirmed I am in the opinion, that the men who made the Constitution intended that the Legislature alone should fill a full term and commence it. After they had filled it, after they had elected, then a broken term caused by death, resignation, or otherwise could be filled by appointment, until when? Until the Legislature should again meet. In other words, the great original and primary power of electing a Senator is vested in our immediate constituency, the Legislatures of the respective States.

Mark the Constitution in its autonomy throughout. The House of Representatives is elected by the people. If a vacancy occurs, it is made the duty of the governor to issue a writ of election—not to appoint, but to issue a writ of election, in order that the primary and fundamental right of filling up the House of Representatives shall still remain with the electors, the people at large. When we come to the Senate of the United States—mark the language, which seems to me abs lutely conclusive—the Constitution says the Legislatures shall choose Senators to serve six years. Does it use the language, "The Legislature shall choose or the governor shall appoint?" Does it say that Senators shall be chosen or appointed for six years? Is it possible that the men who made the Constitution and weighed every letter, not to say every syllable and word, should have intended that the power to appoint was included within the word "chosen?" And when the power of appointment is given, mark the language: When vacancies shall occur, after the Legislature has elected, "by resignation, or otherwise"——

Mr. HUNTON. "If vacancies happen."

Mr. VEST. "If vacancies happen by resignation, or otherwise." I am willing to give them the full benefit of the meaning of the word "happen" as occurring. When a vacancy shall happen, or occur either, and I care not which—after the Legislature has elected, when there is a broken term, then the governor may appoint "until the next meeting of the Legislature," still preserving, as in the case of the House of Representatives, the great fundamental and original idea of the creation of Senators by their immediate constituencies, the Legislatures representing the people.

What tyro in the history of the Constitution does not know that the Senate of the United States was created in order to represent the States, and, which may almost seem to be a contradiction in terms, also to represent the people. The Senate represents the people acting through the sovereignty of the States. The House of Representatives represents the people without the intermediation of the State, but directly by popular election.

From 1825, in the Lanman case, up to 1879, more than fifty years, the doctrine for which I contend to-day was never questioned. I was amazed to hear the Senator from Indiana [Mr. TURPIE] yesterday declare that there were one hundred cases which were precedents as to this issue in which appointments had been made to full terms by governors of States. I deny it. I deny it absolutely. I know the Senator will find one hundred cases, possibly more, in which after the death or resignation of a Senator after the Legislature has commenced a full term by election the governor has appointed; but I challenge him to find that number of cases where the governor has ever made the appointment until the Legislature has first acted.

Now, let me put a plain question to my friend from Indiana, and I am sorry to say he is not present. I put it without dividing words or hair splitting. How can a man resign unless he has been elected? How can a man refuse to accept unless he has been elected? The language of the Constitution is "by resignation, or otherwise." Can he resign a place which has not been given to him?

But, says the Senator from Indiana, "otherwise" means "other ways," therefore when you say "by resignation or other ways," it covers every conceivable vacancy. If that be so, why did not the framers of the Constitution say "in case of vacancies the governor shall appoint?" Does any man believe that Madison and his confreres overlooked this manifest inaccuracy of language, that they used surplusage in an instrument every syllable of which was weighed, when they knew they were legislating for millions upon millions of people for hundreds of years to come? Yet the Senator from Indiana would have us believe that, instead of saying the governor may appoint or shall appoint, the framers of the Constitution used words utterly superfluous, and said "when vacancies shall happen by resignation or other ways." Mr. President, it is simply incredible.

Now, let me give an illustration which makes this doctrine come home peculiarly to myself and to every citizen of my State. It has been said here of the advocates of the opposite construction of the Constitution that the Lanman case was decided upon the ground that the governor could not appoint until a vacancy occurred, and that it was not decided upon the doctrine for which we are contending here to-day. Mr. Benton, in his Thirty Years' View, and he was then a member of the Senate, gives an account of the debate in the Lanman case. Says Mr. Benton:

Mr. Lanman had served a regular term as Senator from Connecticut. His term of service expired on the 3d of March of this year, and the General Assembly of the State having failed to make an election of Senator in his place, he received a temporary appointment from the governor. On presenting himself to take the oath of office on the 4th day of March, being the first day of the special Senatorial session convoked by the retiring President (Mr. Monroe) according to usage for the inauguration of his successor, his appointment was objected to as not having been made in a case in which a governor of a State could fill a vacancy by making a temporary appointment. Mr. Tazewell was the principal speaker against the validity of the appointment, arguing against it both on the words of the Constitution and the reason for the provision. The words of the Constitution are: "If vacancies happen [in the Senate] by resignation or otherwise during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature." "Happen" was held by Mr. Tazewell to be the governing word in this provision, and it always implied a contingency and an unexpected one.

Whatever may have been the opinion of contemporaries, or whatever may be the opinion of the world now in regard to Mr. Benton's political opinions, one thing has been conceded to him by his worst enemy—a more accurate, painstaking, impartial historian of political events has never lived in this country. Mr. Benton was a member of the Senate at that time. He remembered that debate. He took notes of it, and he said emphatically that Mr. Tazewell made the principal speech, and the point he made was upon the word "happen," and that a governor did not have the right to fill an original term by appointment.

But, Mr. President, what emphasizes and accentuates this beyond all controversy is the fact that subsequently the State of Missouri was unable to elect two Senators to this body. The Democratic party divided on the Texas question into the Benton and anti-Benton factions; the Whig party, being numerically equal to either, made a triangular contest, which for two years prevented the election of a Senator, and Missouri had but one Senator in this body.

Mr. GEORGE. For the two years?

Mr. VEST. For the two years. We were unable to elect. Mr. Benton was one of the candidates. During those two years, when party spirit ran so high that families were divided, brother against brother and father against son—and the scars of the contest yet remain politically in our State—the governor was an anti-Benton man, bitterly opposed to Mr. Benton, and yet he never dreamed, nor did such lawyers as Geyer, Napton, and Scott ever dream, that the governor had the right to fill that original term. Everything was resorted to in order to achieve success in that terrible contest, and yet neither party ever thought the right existed in the governor of Missouri to send another Senator to this body.

In eight other cases during the fifty-four years from 1825 to 1879 States were represented in this body by but one Senator, because the Legislature had not elected, and nobody dreamed until 1879 that the doctrine in the Lanman case was to be disturbed and the contention made which is made here to-day in this body.

I know that the Senator from Massachusetts [Mr. HOAR] has invoked an article in the National Intelligencer, published about the time of the Lanman decision, and quoted from a book giving a synopsis of the proceedings of the Senate by a compiler. I quote upon the other side, as better authority, not only Mr. Benton, who was an actor, whose words were part of the *res gesta* at the time, but I quote from Niles' Register, contemporaneous authority. Niles' Register says:

The following members also, reëlected for six years from this day, took the oath of office, namely: Mr. Lloyd of Maryland, Mr. Macon of North Carolina, Mr. Gaillard of South Carolina, Mr. J. S. Johnston of Louisiana, and Mr. Barton of Missouri.

Some conversation took place on the case of Mr. Lanman, reappointed by the governor in the recess of the Legislature, the question being—

Not as stated by the article in the Intelligencer, but—

the question being whether a failure by the Legislature to make a choice of a Senator constitutes the contingency in which a governor may appoint a Senator, the language of the Constitution being "if vacancies happen, by resignation or otherwise," etc.

And that was decided against the power of the governor to fill an original term.

Now, Mr. President, I call the attention of the Senate—and it has been done repeatedly—to the only three clauses in the Constitution where the word "happen" occurs. The first is in Article II, section 2. The Constitution says:

The President shall have power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session.

Mark that language: "The President shall have power to fill up all vacancies." Is there any doubt upon that clause that the President has the right to fill a vacancy happening for any reason, by death, resignation, expatriation, or any other cause whatever? Is there any limitation upon it?

Now, go to the next clause, where the word "happen" is used. Article I, section 2, provides:

When vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies.

Is there any doubt that the governor has the right to issue writs of election when a vacancy occurs in the representation of the House of Representatives from any cause whatever?

Take the clause over which this controversy has arisen and mark the difference. Article I, section 3, provides:

And if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

I want any Senator here to tell me if the Constitution meant as to Senatorial vacancies what it obviously means as to the appointment of executive officers by the President, and as to the issuing of writs of election to fill vacancies in the House, why are not the same words used, and why did the framers of the Constitution interpolate or add the words "by resignation, or otherwise"?

The contention to-day of the Senator from Massachusetts [Mr. HOAR] and of the Senator from Indiana [Mr. TURPIE] is that these clauses mean the same thing as to vacancies. The Senator from Alabama [Mr. PUGH] told us that there was not a shadow or scintilla of doubt about this question, and he was amazed that any of us should think differently. He thought differently in 1885, when he voted with us for the construction of the Constitution we now advocate.

Mr. PUGH. If the Senator will allow me, I will state that at that time I followed my friend from Missouri off into the mazes of metaphysics and decimal fractions, and we both got lost. I returned and studied the question for myself, and found out that two and two made four, and I have stuck to it ever since. [Laughter.]

Mr. VEST. Well, Mr. President, the Senator has added to the list of miraculous conversions, one of which we had when St. Paul was journeying from Jerusalem to Damascus; but I am afraid that the authority which changed the mind of St. Paul did not operate on the Senator from Alabama. [Laughter.] The Senator says he got lost. It has taken him from 1885 to 1893 to find that he was lost.

Mr. PUGH. I never had a chance to show that I had changed.

Mr. VEST. The Senator then was younger and fresher and had not been here so long, had not got into these mazes and intricacies of metaphysical discussion in which he now seems to be an adept. Then he had no doubt in determining this question on the side of the constitutional construction that makes our primary and original constituency send each of us here in the first place.

Mr. President, any man who takes the construction contended for here by the Senator from Alabama would have no difficulty in believing without trouble in the construction that was put originally upon the general-welfare clause of the Constitution, that Congress could do anything. In order to come to the construction which they now contend for, we must be satisfied that Mr. Madison and his colleagues were guilty of gross neglect by putting the unnecessary words in the Constitution "by resignation or otherwise." If they meant that the Senate should be continuously full, if they meant that the subtile essence of Senatorial representation should pass *eo instanti* from the outgoing to the incoming Senator without an interregnum, why did they not say, "In case of any vacancy the governor shall appoint until the Legislature can assemble"? Why did they put in these superfluous words "by resignation or otherwise?"

It is unnecessary for me to go back and read what has been read here again and again as to the debates held in the Constitutional Convention upon this clause. Mr. Madison, it seems to me, disposed of the whole question when he gave his reasons for

putting in the additional words "by resignation or otherwise." It seems to me, if Senators will weigh his language, that every difficulty is removed, and the question of the Senator from Indiana as to why these words were put here is absolutely answered. It will be noticed that the committee on detail in their report used the language "when vacancies shall happen," and it was so reported to the Convention. Then came this debate:

Mr. Wilson objected to vacancies in the Senate being supplied by the executives of the States.

Mark that language. He objected to any governor appointing under any state of case whatever. Said Mr. Wilson:

It was unnecessary, as the Legislature will meet so frequently.

He was a stickler for the idea that no power but the Legislature could send a Senator here. He did not believe that the governor ought to be permitted to appoint even for a broken term, and he so stated.

Mr. Randolph thought it necessary, in order to prevent inconvenient chasms in the Senate.

* * * * * * *

Mr. WILLIAMSON. Senators may resign or not accept.

Mark that language. We have had learned dissertations here to show that this idea came from the precedents in the British House of Commons, where it was held that a member of Parliament could not resign, but was bound to accept, and therefore Mr. Williamson said:

Senators may resign or not accept.

How was it possible for a Senator to resign until he had been elected?

Mr. GEORGE. Until he had something to resign.

Mr. VEST. How, as the Senator from Mississippi says, could a man resign until he had something to resign? How could he not accept unless he had been elected? How can any Senator doubt for one instant that this clause was based upon the idea that the Legislature had acted?

Then the objection was raised that the governor should not have the right to appoint under any state of case, and the additional argument was made that a Senator might not accept if elected by the Legislature. Now, mark the balance of it:

Senators may resign or not accept. This provision is therefore absolutely necessary.

The provision was retained, but immediately after, on the page following of the record of the debate, Mr. Madison took the floor. On what question? On the question whether, after the Legislature had elected, a Senator could resign or not accept. That is as absolutely the fact as anything could be demonstrated to be in logic or in mathematics. Mr. Madison took the floor on that question, and what did he say?

In order to prevent doubts—

Not as to who should elect, not as to how a Senator should come here, but—

In order to prevent doubts whether resignation could be made by Senators or whether they could refuse to accept, moved to strike out the words after "vacancies" and insert the words "happening by refusals to accept, resignations, or otherwise, may be supplied by the Legislature of the State in the representation of which such vacancies shall happen or by the executive thereof until the next meeting of the Legislature."

Simply and solely to remove the doubt as to the power to resign. He could not resign until elected; he could not refuse to accept until the office was tendered to him by a vote of the Legislature. Then when the English doctrine was invoked, that he could not resign and could not refuse to accept, Mr. Madison simply undertook to meet that, and nothing more.

Mr. HOAR. May I inquire of the Senator at that point whether he concedes that, if the Legislature having met and elected and the person so designated refused to accept or died, then the governor may appoint?

Mr. VEST. No, sir. I say absolutely, if I understand the Senator's question, there is no such thing known to the Constitution, in my judgment, as the power of a governor to appoint for a term which has not been commenced by the Legislature. That is my whole contention.

Mr. HOAR. If the Senator will pardon me, as I do not wish to interfere with his argument further than to understand him, I understood the Senator to claim that these words which provide for the filling of vacancies were inserted by Mr. Madison to cover the case not of their never having been an election by the Legislature, but of a person having been elected by the Legislature and refusing to accept. Of course, it would also include a person dying without taking his seat. Then does it not follow, if the Senator is right, that at the beginning of a term, as well as at any other time in the term, if a vacancy occur in consequence of the death or refusal to accept by the person chosen, the executive may appoint?

Mr. VEST. If the Legislature has acted and is not then in session?

Mr. HOAR. Yes, if the Legislature has acted. Therefore, if that be true—and I do not see how the Senator can think otherwise upon the statement which he has just made—we have got as far as this, that the executive may fill a vacancy occurring at the beginning of a term.

Mr. VEST. Not at all; I deny it absolutely, because the Senator leaves out the absolutely necessary premise that the Legislature has acted. That is the difference between him and myself.

Mr. HOAR. I include that. I take the case at the beginning of the term of Mr. Mantle or the Senator from Florida [Mr. PASCO] or anybody else as to whose seat a question arises here. The Legislature are in session, they choose, they adjourn, and the man chosen, never taking his seat, refuses to accept or dies.

Mr. VEST. Very good.

Mr. HOAR. Now, I understand the Senator's argument to be that Mr. Madison put those words in the Constitution expressly to provide for the case of a vacancy happening at the beginning of a term. Then, if the Senator will pardon me, I want to see whether those who think with him are not driven to the admission that a vacancy which may be filled by the executive under this constitutional provision does include cases at the beginning of a term as well as at the end?

Mr. VEST. No.

Mr. HOAR. So that we have got the refinement, if we are right in thinking it a refinement, to cover a very small space indeed.

Mr. GRAY. Mr. President, I would ask the Senator from Massachusetts, with the permission of the Senator from Missouri, if he does not think that it is quite as legitimate, from the proceedings which have been cited by the Senator from Missouri in the Convention, that whereas Mr. Madison thought it necessary in the case of an election on the adjournment of the Legislature and the refusal of the party elected to accept that the executive might appoint, to draw the inference that without such an amendment the dower did not exist under the phraseology as adopted?

Mr. HOAR. I make the answer which has been made twenty times in the debate, which has been made by the Senator from Alabama [Mr. PUGH], by the Senator from Indiana [Mr. TURPIE], and made by myself, and that is, that phraseology was put in simply to remove the doubt as to whether the English doctrine prevailed. Under the English doctrine, as has been already said, a man can not resign a seat in the House of Commons. The only way he can get out of the House of Commons under the English constitution is to accept an incompatible office. He accepts the stewardship of the Chiltern Hundreds, a little office which has no salary, no importance, and exists for the sole purpose of this indirection. Mr. Madison wanted to remove that, and so he moved to insert in terms the words "by resignation or otherwise." If he had left all those words out, the constitutional meaning of this clause, so far as it applies to the right of the governor to appoint, would have been, in my judgment, exactly the same that it is now. They were put in not in the least to enlarge, diminish, interpret, or construe the provision providing for the appointment by the executive, but only to make it clear that under the American system a man has a right to refuse an office.

Mr. GRAY. I should like to ask of the Senator from Massachusetts, if the Senator from Missouri will indulge me again, if he thinks the existence of the phrase "by resignation or otherwise" makes it clear, or even intimates in any degree that the reason for inserting that phrase was to make it clear, that a resignation could be made by a Senator who was elected?

Mr. HOAR. The debates show it, as I understand.

Mr. GRAY. How can you incorporate the reason given in the debates into the text of the Constitution? I ask if there is anything in the text of the Constitution to even intimate that that was the reason or could be the reason for using that phrase?

Mr. HOAR. I understand that in all cases where the words of a constitution or statute may mean one way or another, the courts, legislative bodies, and commentators resort to the contemporaneous declarations of the parties.

Mr. VEST. Mr. President, it may be my obtuseness, but I am utterly unable to discover how the Senator from Massachusetts finds any argument even if I concede to the full extent the proposition he has just put to me. Suppose I concede if the Legislature elects a man and he refuses to accept, that then the governor can appoint, does it help the Senator in this case?

Mr. HOAR. Certainly. My proposition is that if the Senator is brought to admit, as I think he is by his own statement, that the governor may appoint when the vacancy happens at the end of the term, that the governor may appoint when the vacancy happens in a very large class of cases, supposed to be at that time at the beginning of the term, then the argument is that the language as to what is left of the little dispute that remains being doubtful, the Senator can not conceive, and no ingenuity can conceive, a reason why the framers of the Constitution should have intended to give this power to the governor in this large class of cases, and denied it to him in the very small class which was left. That is the argument.

Mr. VEST. I am still unable to see the force of the statement of the Senator from Massachusetts. My contention here is that the original, primary power to start a full term in the Senate is with the Legislature, and that the governor can only appoint as to a broken term. That is my contention.

Now, if the Legislature have elected a man and he refuses to accept, they have commenced a term; they have done all they can do; they have complied with the meaning of the Constitution; they have preserved the great fundamental doctrine that the Legislatures of the States are our primary constituencies. That is my meaning. I do not care if it is but for one minute after the Legislature has performed its duty, the term has commenced, and then, if the Senator refuses to accept, the governor may appoint until another Legislature comes in and our primary constituency again undertakes to comply with the Constitution.

Mr. VANCE. After the Legislature adjourns the governor may appoint.

Mr. VEST. As a matter of course, after the Legislature has adjourned; but in the Phelps case, which I have before me, the minority report expresses our opinion so clearly and so much better than I can express it that I will ask my friend from Delaware to read it.

Mr. GRAY read as follows:

The Senate of the United States is composed of organized constituencies, the State Legislatures. To them belong the power primarily of electing their Senators when they are in session at the happening of the vacancy and at their first meeting when it happens in their recess, and on them devolves the exclusive jurisdiction of filling such vacancies. Their right and authority to fill or supply vacancies which have been temporarily filled by executive appointment are as absolute and exclusive as was their power in an original election. When their power is brought into existence it must supersede all others, with this qualification, and that according to precedent, that they have a session to make the choice. In our view it does not depend on the actual exertion of the power to elect, but on its existence. A Senator under an executive appointment may or may not represent the political views of his State; he may be the mere personal favorite of the governor. The Senate, as far as practicable, should be made to represent its constitutional constituency, and in this respect should preserve the republican feature of our Union.

Mr. VEST. That is the contention we make. If the Legislature has started the term and done all that the Constitution imposes upon it as a duty, then, if for any cause in the recess of the Legislature a vacancy happens, the governor may appoint, but not otherwise.

Mr. President, to reënforce what I have said as to the opinions of Senators on this question, I refer to a debate that was had here while Mr. Blaine was in the Senate, and in which Mr. Wadleigh participated. Mr. Thurman asked a question. We had pretty fair lawyers in the Senate then. Mr. Thurman was a fair lawyer.

Mr. GEORGE. I do not think he was a decimal-fraction man or a hair-splitter.

Mr. VEST. He was considered a very fair lawyer, and is yet, I believe. Mr. Thurman asked:

Is there any probability of Congress being in session during those three months?

Referring to the Wadleigh case—

Mr. WADLEIGH. I do not know about that.
Mr. WHYTE of Maryland—

Another fair lawyer—

I ask the Senator from New Hampshire why the governor of New Hampshire can not appoint for the vacancy until the Legislature meets in June?
Mr. BLAINE. He can not do that if the previous term has fully expired.

That is the very point here.

Mr. WHYTE. Suppose this Legislature has power to elect and does not elect; is not that a vacancy?
Mr. BLAINE. Then the power of the governor does not come in.
Mr. WHYTE. It does apparently.
Mr. BLAINE. Not at all.
Mr. DAWES—

The then colleague of my friend from Massachusetts—

Mr. DAWES. Every precedent of the Senate is against that.

Against the power of the governor to appoint for the full term.

Mr. BLAINE. The Senator from Maryland is too good a lawyer to make that assertion.
Mr. WADLEIGH. Having examined the precedents, I am inclined to think the governor can not appoint.
Mr. BLAINE. Of course the governor can not appoint. Nothing is better settled than that. The honorable Senator from Ohio [Mr. Thurman] will give his assent to that, if the term has fully expired.

There was not a Senator here present then, among all these distinguished lawyers, who held any other opinion. More than that, Mr. Wadleigh, whose own seat was in contest, made an argument which is a conclusive answer in regard to this question. I will ask my friend from Delaware to read it, as I am suffering from a cold.

Mr. GRAY read as follows:

Mr. Wadleigh, from New Hampshire, in discussing this very question, admitted that the Lanman case was decisive of the whole matter. Says Mr. Waldleigh:

"The Senator from Ohio—

Referring to Mr. Thurman—

"The Senator from Ohio would have us believe that there is some doubt as to whether this Legislature or the next is entitled to elect. That is a matter which greatly concerns the people of New Hampshire. It is desirable that that question should be settled at once, so that they may not put themselves in a position from which they can not be extricated without great embarrassment. Accordingly a bill was presented to this body by the Senator from Wisconsin [Mr. Cameron] and referred to the Committee on Privileges and Elections, which reported unanimously that this Legislature can not elect the Senator; that the next Legislature must elect. That shows to us clearly that unless this bill passes there must be a vacancy in this Senate from the State of New Hampshire for three months in the next Congress."

Mr. VEST. There is the case of a Senator whose right to a seat was then being discussed, and he did not pretend that the governor could appoint for a full term, and I say here that for more than fifty years no Senator amongst all the distinguished lawyers who came to this body ever made any such contention, never. For more than fifty years it was never thought of that the governor of a State could do this thing; never until 1879.

Now, in the majority report it is said the supreme court of Indiana decided this question. It did no such thing. The clause in the constitution of the State of Indiana is utterly dissimilar from the clause in the Constitution of the United States which is now under debate. Here is the decision in Indiana:

It is objected—

Says the judge who delivered the opinion—

It is objected that the judge who presided was not properly the judge of that circuit, because appointed by the governor instead of being elected by the people. The objection is not well taken. The act creating the circuit was declared in force from its passage, as a case of emergency.

If there was a vacancy, it existed independent of that declaration. If there was no vacancy, that body could not create one by a declaratory enactment. The vacancy flowed as a natural consequence of their doing what they had a right to do—to create a new circuit. There is no technical nor peculiar meaning to the word "vacant" as used in the constitution. It means empty, unoccupied; as applied to an office without an incumbent. There is no basis for the distinction urged that it applies only to offices vacated by death, resignation, or otherwise. An existing office without an incumbent is vacant, whether it be a new or an old one. * * * The emergency which created the office would imply that the vacancy in the office of judge in the new circuit should be filled immediately.

Now, how does the governor fill it?

The eighteenth section, article 5, provides that the governor shall, by appointment, fill a vacancy in the office of judge of any court.

In other words, there is no sort of limitation, but he has the absolute, unqualified, unquestionable right to fill any vacancy under any and all circumstances. Did the framers of the Federal Constitution mean that when they put in the clause that if a vacancy happen in a Senatorial seat "during the recess of the Legislature, by resignation or otherwise"—not "if it shall happen," not "if it shall occur," but "by resignation or otherwise?" Those words are not found in the constitution of Indiana. If the contention of the Senator from Massachusetts and those who agree with him be correct, we convict James Madison and the framers of the Constitution of gross negligence, of not knowing the meaning of words, and of putting surplusage into one of the most important clauses as to the representation of the States.

Mr. President, if this case be not already decided, it seems to me of the utmost importance that it should be settled now. I have never belonged to that school of constructionists who thought that the highest argument in regard to the construction of the Constitution came from necessity. I have never believed that the Federal Constitution should be construed like a bill of indictment; but I do believe that the men who made it intended every word and letter of it to mean something, and I hope that I shall never as a public man come to the conclusion that it can be my duty to do anything else as to any question than what the plain language and spirit of the Constitution mean.

I conclude what little I have to say in reaffirmation of my former opinion with this question: Why is it, if the framers of the Constitution intended to give the power to the governor of a State to fill a full term, that the clause we are now considering has in it words which are not found in the other clauses which give to the President the power to make an executive appointment during the recess of the Senate or the power to the governor of a State to issue a writ of election in the event of a vacancy in the House of Representatives? Are the words "by resignation or otherwise" superfluous? If the Senator from Indiana [Mr. TURPIE] is correct when he says that "otherwise" means "other ways," and "to fill a vacancy happening by resignation or other ways" means to fill it in any contingency, why did not the Constitution say, as in the other clauses, that in the event of a vacancy it may be filled during the recess of the Legislature by the governor?

Mr. CHANDLER rose.

Mr. VANCE. Does the Senator from New Hampshire wish to take the floor on the pending question?

Mr. CHANDLER. I desire to say a few words on the pending resolution. I yield, however, to the Senator from North Carolina, if he desires to go on at this time.

Mr. VANCE. I simply rose to move to go into executive session, if no other Senator wishes to speak now; but of course if the Senator from New Hampshire is ready to go on I shall not make the motion.

Mr. CHANDLER. I will yield for a motion to proceed to the consideration of executive business.

Mr. VANCE. I move that the Senate go into executive session.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty minutes spent in executive session the doors were reopened, and (at 1 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, April 5, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 4, 1893.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

Eben Alexander, of North Carolina, to be envoy extraordinary and minister plenipotentiary and consul-general of the United States to Greece, Roumania, and Servia, vice Truxton Beal, resigned.

James O. Broadhead, of Missouri, to be envoy extraordinary and minister plenipotentiary of the United States to Switzerland, vice Person C. Cheney, resigned.

Bartlett Tripp, of South Dakota, to be envoy extraordinary and minister plenipotentiary of the United States to Austria-Hungary, vice Frederick D. Grant, resigned.

CONSULS.

David N. Burke, of New York, to be consul of the United States at Pernambuco, vice Edwin Stevens, recalled.

Asa D. Dickinson, of New York, to be consul of the United States at Nottingham.

James M. Dobbs, of Georgia, to be consul of the United States at Valparaiso, vice Corvis M. Barre, recalled.

Q. O. Eckford, of Mississippi, to be consul of the United States at Kingston, Jamaica, vice Louis A. Dent, recalled.

Benjamin Lenthier, of Massachusetts, to be consul of the United States at Sherbrooke, vice James A. Wood, recalled.

Henry F. Merritt, of Illinois, to be consul of the United States at Barmen, vice Rounsevelle Wildman, recalled.

James E. Neal, of Ohio, to be consul of the United States at Liverpool, vice Thomas H. Sherman, recalled.

Edgar Whidden, of Maine, to be consul of the United States at St. Stephen, New Brunswick, vice Albert E. Neill, recalled.

APPRAISER OF MERCHANDISE.

Charles E. Ingersoll, of Pennsylvania, to be appraiser of merchandise in the district of Philadelphia, in the State of Pennsylvania, to succeed J. Granville Leach, resigned.

INDIAN INSPECTOR.

Paul F. Faison, of Raleigh, N. C., to be an Indian inspector, vice William W. Junkin, term expired.

CONFIRMATIONS.

Executive nominations confirmed by the Senate March 30, 1893.

APPOINTMENT IN THE MARINE HOSPITAL SERVICE.

Seaton Norman, of Indiana, to be an assistant surgeon in the Marine Hospital Service of the United States.

CONSULS-GENERAL.

Samuel E. Morss, of Indiana, to be consul-general of the United States at Paris.

George C. Gillard, of Mississippi, to be consul-general of the United States at Guayaquil.

CONSULS.

George F. Parker, of New York, to be consul of the United States at Birmingham.

Allan B. Morse, of Michigan, to be consul of the United States at Glasgow.

C. W. Chancellor, of Maryland, to be consul of the United States at Havre.

POSTMASTERS.

Oliver Wells, to be postmaster at Marshfield, in the county of Webster and State of Missouri.

Henry Heimiller, to be postmaster at Versailles, in the county of Woodford and State of Kentucky.

John H. Swartwout, to be postmaster at Stamford, in the county of Fairfield and State of Connecticut.

William P. Powell, to be postmaster at Hope, in the county of Hempstead and State of Arkansas.

W. B. Woody, to be postmaster at Rockdale, in the county of Milam and State of Texas.

John P. Kerr, to be postmaster at Asheville, in the county of Buncombe and State of North Carolina.

Crawford B. Andrews, to be postmaster at Prescott, in the county of Nevada and State of Arkansas.

WEDNESDAY, *April 5, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR], from the Committee on Privileges and Elections. The resolution will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. The Senator from New Hampshire [Mr. CHANDLER] is entitled to the floor on the pending resolution.

Mr. HOAR. I suggest that there is no quorum of the Senate present.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and, after a little delay, the following Senators answered to their names:

Allison,	Davis,	Hunton,	Pasco,
Berry,	Dubois,	Jones, Ark.	Peffer,
Butler,	Frye,	Lindsay,	Platt,
Caffery,	Gallinger,	McMillan,	Power,
Call,	George,	Manderson,	Sherman,
Carey,	Gordon,	Martin,	Shoup,
Chandler,	Gorman,	Mills,	Smith,
Cockrell,	Hansbrough,	Mitchell, Wis.	Stewart,
Coke,	Harris,	Morrill,	Stockbridge,
Colquitt,	Hill,	Murphy,	Vance,
Cullom,	Hoar,	Palmer,	Vest.

The VICE-PRESIDENT. Forty-four Senators have answered to their names. A quorum is present; and the Senator from New Hampshire will proceed.

Mr. CHANDLER. Mr. President, having in former years been in doubt about the question presented by the pending resolution, with a tendency toward the opinion that the governor of a State could not appoint a Senator when a Legislature had possessed an opportunity of making an appointment and had failed to do so, and having, through the pressure of circumstances in the pending cases, reached a conclusion in favor of the right of the governor to appoint which leads me to vote for the resolution now before the Senate, I take occasion to state my views on the subject.

My doubts on this subject and my bias against the right of the governor to appoint have grown from my familiarity with the New Hampshire case of 1854, that of Jared W. Williams, who sat in the Senate during the summer of 1854 by appointment from the governor, but the Legislature of New Hampshire having adjourned during that summer and Mr. Williams then having left his seat, it does not appear that it was thought the governor could make another appointment, and therefore a vacancy remained in this class of Senators during the winter of 1854–1855.

The historic circumstances connected with the Williams case impressed the subject upon my mind. Mr. Williams had been appointed in the place of Charles G. Atherton, who had died November 15, 1853. Mr. Atherton had been elected in the place of John P. Hale, who had been chosen in 1846 and had become the first distinctive antislavery Senator to appear in this Chamber. All Senators when he entered the Senate were classed either as Whigs or Democrats. Mr. Hale, in the winter of 1845, being a Democratic Representative in Congress, had written his famous Texas letter, and for this had been taken off the ticket which was then before the people of New Hampshire for reëlection. A new Democratic State convention was called. General Franklin Pierce went personally to that convention and forced a new nomination in the place of Mr. Hale. There was a bolt, and three times during the spring, summer, and autumn of 1845 an election of the regular Democratic candidate was defeated, Mr. Hale running as an independent candidate. It was this first great Free-soil victory in New Hampshire that called from Mr. Whittier his poetical apostrophe to our State:

> God bless New Hampshire! From her granite peaks
> Once more the voice of Stark and Langdon speaks.
> The long-bound vassal of the exulting South
> For very shame her self-forged chain has broken—
> Torn the black seal of slavery from her mouth,
> And in the clear tones of her old time spoken!
>
> * * * * * * *
>
> Courage, then, Northern hearts! Be firm, be true;
> What one brave State hath done, can ye not also do?

Under the influence of such sentiments, in 1846 there was an overwhelming Democratic defeat in New Hampshire. The Free-soilers and the Whigs combined and the Democracy were overthrown. Mr. Whittier greeted that triumph of freedom in an equally joyous but a jocose song, different from that which he had given to the victory of the previous year. Our poet of the Merrimac Valley, in verses entitled "A Letter," first published in the Boston Chronotype in March, 1846, purporting to have

been written by the chairman of the Central Clique at Concord, N. H., to Hon. Moses Norris, jr., then Senator at Washington, thus announces the result of the March election:

'Tis over, Moses! All is lost!
I hear the bells a-ringing.
* * * * * * *
We're routed, Moses, horse and foot,
If there be truth in figures.

The verses were never acknowledged by Mr. Whittier until his recent and last revision of his poems, where they are now to be found.

So Mr. Hale was elected the first antislavery Senator in June, 1846, and took his seat in December, 1847, for his term of six years. But New Hampshire relapsed from this spasm of Free-soil sentiment. It was recaptured by the Democracy in 1847, and Gen. Pierce, as a reward for his military services in the Mexican war and because of his fidelity to the cause of the national Democracy, was made President in 1852. Thereupon, as a President-elect, he undertook, as other Presidents have done before and since, not always with success, to control the election of a Senator in his own State to fill a term which was to commence with his own Presidential term.

There were obstacles in the way of the Presidential wishes. John S. Wells was the idol of the New Hampshire Democracy. He was the people's choice, but the choice of the President-elect was Charles G. Atherton, a man of great ability and an accomplished orator, but a politician who had achieved notoriety as an opponent in the Senate at a previous time of the right of petition and had thereby acquired the sobriquet by which he was always thereafter known in New Hampshire as Charles Gag Atherton. President Pierce succeeded in electing Mr. Atherton to the Senate, and on the 4th of March, 1853, Mr. Hale finished his six years' term and Mr. Atherton entered upon a new six-year term at the same time that President Pierce was inaugurated.

Mr. President, the whirligig of time brings strange revenges. Within a few short months Mr. Atherton had died. Mr. Jared W. Williams had been appointed in his place and served during the spring and summer of 1854. Senator Norris died in January, 1855, and Mr. John S. Wells was appointed by the governor in his place, taking his seat January 16, 1855; but the Legislature of New Hampshire, in the summer of 1854, having failed to elect Senators to the existing vacancy and to the approaching vacancy, and Mr. Norris being sick when Congress met on the first Monday of December, 1854, New Hampshire was then without any Senators in this Chamber. One of the places continued vacant until the 4th of March. The other was filled after January 16 by Mr. Wells, under appointment from the governor, in the place of Mr. Norris. Mr. Wells held his seat until March 4, 1855, and then New Hampshire was without any Senators until in the summer of 1855 John P. Hale and James Bell were elected to fill the two vacant places, Mr. Hale returning to his old place to oppose the Administration of Franklin Pierce; and from that time down to this hour New Hampshire has always been represented by two antislavery, anti-Democratic, and radical Republican Senators.

Now, Mr. President, being familiar with all this political history and knowing of these vacant seats in the Senatorial representation from New Hampshire, remembering well that Mr. Williams, who had been appointed by the governor to fill out the unexpired term of Mr. Atherton, after sitting here during the spring and summer of 1854, had been upon due debate ejected from the Chamber, and that the governor of New Hampshire had not undertaken to make a second or further appointment, I had been impressed with the idea that under the Constitution there could not be an appointment to fill a vacancy in a Senatorial seat where the Legislature had been given an opportunity to fill it and had not succeeded in filling it.

I remained under the incubus of this precedent until the case of Senator Charles H. Bell, from New Hampshire. He was admitted in March, 1879, notwithstanding it was contended by Senators that there had been a New Hampshire Legislature which might have filled the place; but he was admitted because there was a doubt as to whether the Legislature which it was thought should have filled it had the right to do so. Because the question was doubtful, Mr. Bell was admitted to a seat under a gubernatorial appointment at the beginning of a Senatorial term.

This was in 1879. Subsequently, in March, 1885, under similar circumstances, Senator Henry W. Blair was admitted to a seat at the beginning of a term under a gubernatorial appointment and retained his place under that authority until June, when he was reëlected by the Legislature.

Again, in March, 1889, between my first service of two years and my present term, a gubernatorial appointment was made which was recognized by the Senate from March to June, 1889, being the beginning of a term of six years, by the seating of that distinguished lawyer and soldier of New Hampshire, Gen. Gilman Marston.

But during all this period, even with these New Hampshire cases before me, I continued to doubt whether the true construction of the Constitution would fairly allow the filling of a vacancy by gubernatorial appointment at the beginning of a term, and I was so impressed with the fear that these successive gubernatorial appointments could not continue forever that I took an active part in promoting a change in the constitution of New Hampshire by which the Legislature chosen in November was required to meet in January, as was the case with most other States. That change has been made, and this question can never arise again in New Hampshire. The case of an appointment by the governor to fill a three months' vacancy at the beginning of a term until a Legislature elected before and meeting after the vacancy shall elect a Senator, similar to the case which is now before us in the Senate of Senator PASCO, from Florida, will never be presented again from the State of New Hampshire.

Thus impressed historically, and later brought in contact, as a member of the Senate and of the Committee on Privileges and Elections, with the question which is now before us, I have necessarily been led to inquire carefully what is the just and true construction of the Constitution. I find that the issue is simply between a technical and narrow construction of the Constitution and a broad and a liberal construction of the Constitution, and Senators will vote upon this question one way or the other as they are in favor of a technical and narrow construction or a broad and liberal construction of that instrument.

Unquestionably, Mr. President, early in the history of the Government there were precedents in favor of a contracted and an illiberal construction of the clause which gives the governor the right to appoint Senators. This disposition to construe the Constitution in the contracted and illiberal sense led to four limitations upon the language giving the gubernatorial power.

The first limitation was that a governor could not appoint to fill a vacancy happening at the beginning of a Senatorial term. The word "happen" was construed to mean a vacancy happening in a term after that very term had once been filled. That was the old contention, and that is the contention now of the Senators who are against the passage of this resolution; and that was undoubtedly the view which prevailed to some extent and in some cases, not universally, but as a frequent view of the language of the Constitution.

Secondly, the opinion prevailed that there could be no appointment by a governor in anticipation of a vacancy; the governor of a State undertaking to exercise the power of appointment must wait until the vacancy actually happened, and no matter how certain the vacancy might be, no matter how sure the governor might be that a vacancy would exist on a particular day, with no possibility of filling it by means of the Legislature, nevertheless he could not make the appointment, but must wait until the vacancy actually happened, and then make the appointment at the seat of government of his State and let the place remain vacant until the appointee could reach Washington.

Thirdly, there was asserted the important limitation now under discussion upon the power of the executive, to the effect that it could not be exerted where the Legislature of a State had had an opportunity to fill the vacancy and had failed from any cause to do it.

The fourth limitation was one which necessarily resulted from the third: that after a governor had once made an appointment, his appointee could only hold his office until the next meeting of the Legislature, and if the Legislature failed to elect, the governor could not make a second appointment.

These are, I believe, all the limitations which have been put upon the power of gubernatorial appointment at any time during the hundred years of our governmental history. But they have never prevailed as admitted and undisputed restrictions. They have always been contested, debated, and redebated, and have never become established constitutional or parliamentary law. On the contrary, by advancing toward a broad and liberal construction of the Constitution we have gone on step by step to enlarge the scope of gubernatorial appointments and to allow such appointments to be made where the advocates of the old doctrine would not agree to tolerate them.

In the first place, we have allowed many appointments by governors at the beginning of Senatorial terms; Senators are familiar with the cases. Beginning with the case of Cocke, of Tennessee, in 1797, and coming down to the case of PASCO, in March, 1893, there have been thirteen cases where the governor has appointed a Senator to take his seat at the beginning of a Senatorial term, and in each case the Senator has been admitted to his seat. By these precedents we have utterly destroyed the old notion that a vacancy can not possibly happen in a term unless that very term has once been filled.

Secondly, the Senate has come to allow an appointment to be

made by a governor in anticipation of a vacancy. The incubus which prevented a governor from making an appointment until a vacancy actually happened, however sure he might be that it would take place, was not finally removed until the Fifty-second Congress, in 1891, when, in the case of Senator Chilton, of Texas, it was deliberately determined by a unanimous report from the Committee on Privileges and Elections, adopted by the Senate, that the old notion should be exploded and that a governor, if he knew that a vacancy was to take place and that no Legislature could fill it, might make his appointment before the vacancy took place, and that the Senator might come here and hold his seat under such appointment.

Thirdly, the Senate has made this further advance, in the three New Hampshire cases and in the case of Senator PASCO, now sitting under a gubernatorial appointment, that it has consented to seat in this body a Senator appointed by a governor where there is a doubt as to whether a Legislature meeting next previously to the vacancy should have chosen or should not have chosen the Senator. The fact that although a Legislature may have met which was entitled to fill a Senatorial vacancy and failed to fill it, yet there was a doubt about the right of that Legislature to fill it, which has been accepted as a justification of a gubernatorial appointment.

So we have made these three gains over the old prohibitory notions, and we are now confronted with the question whether, fourthly, a governor may not appoint, although a Legislature which had the undoubted right to fill a vacancy has met and failed to fill it; and, fifthly, whether or not, as the result of an affirmative decision upon this point, a governor may not continue to appoint as often as a Legislature shall make the attempt but shall not succeed in choosing a Senator and placing him within the Senate Chamber.

Mr. President, having carefully considered the question whether or not this new advance should be made through a liberal construction of the clause in the Constitution giving the governors the right to make appointments, I have no hesitation, now that I am confronted with the question, in reaching the conclusion that the gubernatorial power of appointment does exist in these two remaining cases, and that Senators appointed by governors under such circumstances are entitled to admission to their seats in the Senate.

This conclusion is based upon the plain and evident natural meaning of the language of the Constitution, which says:

> And if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

It will be impossible to make the minds of common-sense men, the minds of plain people, reach the conclusion that this language means anything else than the declaration that when a Legislature has not filled a vacancy in the Senate and the vacancy exists and there is no Senator there, the governor of the State may fill the vacancy. It will be impossible to make any intelligent citizen of America understand how an office can have nobody in it and yet not be vacant. Senators may forever argue this question; they may refine upon it with all the subtlety of legal logic, and they never will be able to make one single human being in this country, not a technical lawyer, understand how it can be conceivable that when an office is vacant and when a governor of a State is authorized to fill a vacancy which may occur in the office when the Legislature is not in session, the governor can not fill the office thus actually empty and which the Legislature has not filled.

Mr. President, it being impossible to justify a construction of the Constitution adverse to the passage of the resolution before the Senate except by the most narrow and rigid and technical construction of the language used, I ask Senators what there is in the circumstances of this case and of other similar cases to justify such narrow and contracted construction of the Constitution? It seems to me that this case is preëminently one which does not justify such a narrow construction.

This is not a penal provision. Lawyers and common-sense citizens who are not lawyers can understand the doctrine by which, when we are undertaking to enforce a penal statute, it is construed strictly. It must be plain and unmistakable in its penalties, and if a person who is to be subjected to a penalty or who is to be convicted of a crime can escape from the penalty or the conviction by a close and narrow and technical construction of the statute, that is right, because it is better—such is the maxim of the law—that ninety-nine guilty persons should escape rather than that one innocent person should be convicted. But does any Senator stand here to say that this is a penal provision, that there is anything in this clause in the Constitution which governs this whole subject of the election of Senators by the Legislature and the filling of Senatorial vacancies by the governors that is in the nature of a penal statute? There is no such implication to be deduced either from the language of the clause or from anything to be found anywhere else within the limits of the Constitution.

On the other hand, so far from this being a penal clause of the Constitution to be construed strictly, it is clearly and unmistakably a beneficial provision to be construed liberally, in order to effect the purpose which is sought to be accomplished. The purpose is to keep the Senate full. The Senate is to consist of two Senators from each State chosen by the Legislature thereof, with the provision that if a vacancy happens when the Legislature is not in session, the governor may make an appointment, his appointee to hold the place until the Legislature has made an election.

Mr. President, is not that a beneficial statute? Is not that a beneficial clause? Is not that a clause carefully framed for a wise and a beneficent and laudable purpose? It seems to me so; and I can not comprehend how any argument can be made in any other direction. I have tried to think why there was this disposition in former times to construe this provision strictly and thereby to prolong vacancies in the Senate. I have been inclined to think that perhaps the earlier Senators were not so anxious as we are to have the Senate full; it is possible that they were influenced by the feeling that the fewer there were of them in the Senate Chamber, the more power would appertain to those who were here, and that it was best for them that whenever a vacancy could be created in the Senate it should be so created and should be perpetuated as long as possible, so that the Senators who remained in the Senate might have more power.

Whether this be so or not, such is not the feeling of the present day. The idea of the present day is that the States are entitled to eighty-eight Senators, and that eighty-eight Senators shall be here. It is the idea not only that each State shall be here with its two Senators for the benefit of the State, but that each State shall be here with its two Senators for the benefit of the whole United States, and therefore it is that we have gone on gradually outgrowing the old, the narrow, and the technical construction of the Constitution which prevailed in some minds and in some cases, until now it is an admitted and avowed object of every Senator here to keep this Senate full if it can possibly and fairly be kept full. Here is the clause in the Constitution which enables it to be kept full by adopting a common-sense, plain, and, as I conceive, unmistakable interpretation; which says that whenever there is not a Senator here from any State elected by the Legislature, there shall be a Senator here appointed by the governor, if the governor of the State will do his duty, whether the Legislature is able to do its duty or not.

Mr. President, is there any justification for this narrow and limited and destructive construction of this clause in the Constitution to be deduced from the assumed fact that there is any constitutional inferiority of a governor to a Legislature? The opposing argument, it seems to me, has proceeded somewhat upon the idea that a Legislature was superior to a governor, that a Legislature was an exalted body, that a Legislature had a peculiar strength and a special sanctity in the opinion of the framers of the Constitution of the United States as against the governor of the State. I repudiate any such distinction, and say that it is not derivable from the Constitution in any of its parts. The Legislature is the Legislature of a sovereign State, if Senators choose to speak of sovereign States; the governor is the governor of a sovereign State, and he stands within the sphere of his prescribed duties as the equal of the Legislature of the State.

Can any Senator maintain that a narrow and illiberal construction should be given to this clause in the Constitution because a Legislature any more represents the people of the State than the governor represents the people of a State? Senators might magnify the position of a Legislature in the choice of Senators if in order to fill a vacancy it had been provided that if a Legislature failed to appoint a Senator a Senator should be drawn by lot as jurors are drawn. I could conceive then that Senators might argue that this inferior method of creating Senators should not be favored, and that we should strike down such a method of filling vacancies whenever we could reach it by fair constitutional construction; but I do not see how Senators can undertake to elevate the Legislature of a State, which is told to elect Senators when it can, above the governor of a State, who is the equal representative of the people and is told to create a Senator whenever the Legislature fails to create one.

Mr. President, look at the Constitution in this light. When it was constructed by the fathers there was supposed to be in existence at the the seat of government of every State a Legislature and a governor. The United States Senators were to be the representatives of the States; the popular branch of Congress was the House of Representatives, while the two Senators, each small State having two Senators as well as each large State, were supposed to represent the State. At the seat of government of every

State there was assumed to be a Legislature and a governor, with this qualification, that the Legislature would not remain in session all the year round, while the governor, the commander-in-chief, the highest executive officer, the greatest public functionary, invested not only with executive power, but with a large share, by reason of his veto power, of the legislative power of the State, he would be at the State capital all the year round. What then did the founders who made the Constitution say? Simply this: That the Legislature shall elect the Senators when they can; and when a vacancy exists and the Legislature is there it shall fill the vacancy; and when a vacancy exists and the Legislature is not there, then the governor shall appoint and keep the office full.

Mr. PEFFER. Mr. President——

The VICE-PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Kansas?

Mr. CHANDLER. In one moment.

It is true that the power of the Legislature to elect is primary and the power of the governor to appoint is secondary; but it does not follow that because the power of the Legislature is primary it is superior to the secondary power of the governor whenever the occasion arises under the Constitution when it becomes the duty of the governor to fill a vacancy in the Senate of the United States.

I now yield to the Senator from Kansas.

Mr. PEFFER. Mr. President, the Senator from New Hampshire is speaking of the primary authority of the Legislature to choose Senators. I wish to ask a question at that point in order that the thought may be in a fitting place. My question is, in case the first Legislatures of the several States which were convened after the adoption of the Federal Constitution had failed to choose two Senators, which they were required and expected to choose by the provisions of the Constitution, whether the governor would have been authorized to appoint two Senators to fill those alleged vacancies?

Then, when the Senator answers that question, if he answers it in the affirmative, I should like to ask him the further question, so as to get the whole question in issue at once, whether, in case two vacancies should now happen, and if the Legislature which meets after the happening of those vacancies should neglect from any cause to fill the vacancy, the governor would then have the authority to make two appointments, one of them being for a new term and the other to fill a continuing term?

Mr. CHANDLER. If the Senator had listened to me attentively he would have noticed that I had already answered his last question in the affirmative. I do believe, and I do not shrink from the conclusion, that under a proper construction of this clause giving governors of States the power to make appointments—a construction to carry out the beneficent object of the clause, made liberal for that purpose—if the governor makes an appointment and the Legislature meets and does not fill the office, a vacancy again happens, because when the Senate meets the office is certainly empty. Therefore I answer that question in the affirmative.

The Senator from Kansas asks me to go back a hundred years and tell him what right I think the governors of the States would have had to start this Government when it originated, in case the Legislatures of the thirteen States had refused to send Senators. The Constitution evidently contemplated that the Legislatures would send Senators, that they should be classified, and that if after they were classified vacancies happened, and the Legislatures did not fill the vacancies, the governors should fill them. I can not undertake to say to the Senator whether, if I had been here a hundred years ago, elected by a Legislature, and the attempt had been made to fill all the other seats in the Senate by gubernatorial appointments, I should have been in favor of starting the Government in that way.

But, Mr. President, I am surprised that the Senator should wish to go back a hundred years. He is the apostle of new ideas; he comes here full of new constructions of the Constitution and in favor of exerting the powers of the National Government to an extent that never yet has been dreamed of, and yet we find him, with all these new and liberal, and it is to be supposed popular and beneficial, ideas concerning the construction of the Constitution, going back, I am afraid, to a very narrow and contracted and illiberal construction of the Constitution on the point now under discussion. I am sorry to see such a manifestation on the part of my friend the Senator from Kansas.

Mr. President, I do not intend to detain the Senate except for one more suggestion, and that is this: I am very much surprised to find the Senator from Oregon [Mr. MITCHELL] and, I may add, the Senator from Illinois [Mr. PALMER], who I see is preparing to speak against this resolution, taking ground here and now in the discussion of this question in favor of exalting the power of State Legislatures. The Senator from Oregon is a Senator of great erudition, industry, and persistency, and the Senator from Illinois is a lawyer of profound ability and extreme ingenuity in argument.

The Senate in the last Congress heard from both those Senators against the election of Senators by State Legislatures, and both those Senators have undertaken to satisfy their associates and the larger audience, which they always address when they speak, that if there is any one thing which is bad in the Constitution of the country it is the method of electing Senators by State Legislatures. We have heard described the vicious character of elections by State Legislatures; we have been told of the dangers of corruption which result from the elections by State Legislatures; we have been told of the danger that millionaires, purchasing Legislatures, will force their way into this body; and the Senator from Oregon and the Senator from Illinois wish to tear out the Constitution the whole plan of electing United States Senators by State Legislatures, and to substitute for it the election of Senators by popular vote in each State.

Mr. President, with this record those Senators now, for their present purposes, are seeking to magnify and to clothe with dignity and honor and sanctity the power of State Legislatures; they insist that when the Constitution was framed the makers of it were determined that the one particular method of electing Senators, the election by Legislatures, and no other method when it was possible to be avoided, should be resorted to in order to place Senators on this floor. It seems but yesterday since they were decrying the State Legislatures; to-day they are praising the State Legislatures, and are advocating the right, and so far as possible the exclusive right, of the State Legislatures to elect Senators, even to the extent of tolerating vacancies in the Senate.

Mr. President, what are they also condemning in the present argument? They are condemning and denouncing the power of the governor of a State to appoint a United States Senator. How is the governor of a State put into his office? By direct election by the people of the State, the very method which the Senator from Oregon and the Senator from Illinois say is the only safe and true and honest method of electing Senators; and this governor, thus elected directly by the votes of the people, in case of necessity exercises the power of appointing a Senator. Is he not the equal of the Legislature in dignity and power when the Constitution directs him to act?

I can follow those Senators in neither of the constructions which they put upon the Constitution and in neither of their projects. I believe that the present method of electing Senators by the State Legislatures is wise and judicious as framed by the makers of the Constitution. I am not in favor of tearing it up by the roots and substituting for it the election of United States Senators by the people. On the other hand, however, when a Legislature fails to elect and the seat is vacant, and the governor of the State, elected by the people of the State, a distinguished citizen of the State, chosen by direct vote of his people, undertakes to keep the Senate full with its 88 members, then I believe that the construction of the Constitution which allows him thus to keep the Senate full is a construction to be favored.

I believe it is a construction to be commended and built up, and not a construction to be decried and destroyed by the application of rules which ought only to govern in the construction of a highly penal statute. Therefore I shall vote not to narrow this clause in the Constitution which gives the governor power to appoint Senators. I am not willing to belittle the governors of States, and to reduce them either in popular estimation or in constitutional estimation, but I am in favor of the free exercise of the rights which the Constitution has conferred, in the first place, upon the Legislature, and in the second place upon the governor, who is quite as completely as the Legislature the creation of the popular will of the State whose people are entitled to be represented at all times by two Senators in the Congress of the United States.

Mr. PALMER. Mr. President, the most impressive part of Washington's Farewell Address, read so perfectly from your place on the 22d of February, was the warning of Washington against the danger of attempting to alter the Constitution by construction. He reminded his countrymen that the Constitution could be amended and thus altered; but he warned them against constructive alteration. Nothing impressed me more than those solemn words of the great Father of his Country. I am impressed with that in view of what has been said by the Senator from New Hampshire [Mr. CHANDLER].

As I understand the Senator, he admits that for many years after the formation of the Constitution the construction for which I contend was the received construction; but the Senator has discovered that the Constitution may be changed by construction. The fathers adopted what he calls a narrow and illiberal construction of that instrument. He, their wiser son, has found another method better than that. The Senator's discovery reminds me of that of which I once heard of a Calvinistic preacher,

who said to his congregation: "My brethren, there is a man going up and down through the country teaching that all men will be saved. Thank God, we teach better things." [Laughter.]

That is an illustration of the methods of the Senator. This illiberality characterized the authors of the Constitution and their contemporaries; but this liberality distinguishes the Senator from New Hampshire and those who think with him. I prefer myself to be treated as illiberal with those who won the independence of his country and who framed the admirable system of government under which the United States has extended from sea to sea and from the Lakes to the Gulf rather than the new light vouched us by the distinguished Senator from New Hampshire.

The Senator again refers to the fact that the Senator from Oregon [Mr. MITCHELL] and myself desire to alter the Constitution in order to give the election of Senators to the people. Mr. President, I do. I desire to alter the Constitution by formal provision, to change it deliberately and solemnly, because I believe an election of Senators by the people would be altogether preferable to either of the modes favored by the Senator; but I seek to do it by formal constitutional means; I seek to call the attention of the country to the great importance of this change; I have sought the aid of Congress to initiate the reform which I favor, and I have supposed and still suppose the time will come when the dangers of these new lights in political philosophy will compel some such thing to be done, not only in that particular respect, but possibly in some others.

No inconsistency can be predicated or charged against us, because while the Constitution exists as it is we favor adhering to it rigidly. It will be found that the most dangerous class of politicians are those who believe and teach that the framework of the Government, the Constitution, is to be modified not by formal action in some of the methods prescribed by the Constitution, but it is to be altered by new constructions to meet changed conditions, real or imaginary. I ask the Senate to stand by the Constitution as it is. I have no right to be liberal in construing the instrument which I have sworn to support. I have sworn to support the Constitution as it is. Neither my judgment nor my conscience will allow me to follow the Senator from New Hampshire in the new path which he has marked out for the Senate to pursue.

I am exceedingly anxious to confine what I have to say to the very question before the Senate. It is an important question. The Senator from New Hampshire indicates a purpose to give to this instrument a new construction. I have said already that he admits that the construction of the Constitution first recognized, and afterwards adhered to by those who were very near the period of its adoption, was that which I maintain to-day. I desire very much that the construction of the fathers shall be maintained until the people in some of the modes prescribed by the Constitution shall alter it. We shall then understand what the alterations are and we shall obey them, because it will be our duty to do so. In pursuance of that disposition to be accurate, I shall endeavor to state in a correct and accurate form the real question before the Senate.

Mr. President, the question presented by the resolution reported by a majority of the Committee on Privileges and Elections is one of very great importance, as it involves a construction of those provisions of the Constitution which relate to the organization of this body. The report of the committee asserts that under the facts to be hereafter stated the governors of the States of Montana, Wyoming, and Washington had the constitutional power to appoint Senators to represent those States in this body.

The facts in the case of Mr. Lee Mantle, which is the case immediately before the Senate, and of Mr. Beckwith, both of whom are asserted by the committee to have a right to seats in this body, are identical. The Legislatures of the States of Montana and Wyoming convened in January, 1893, in pursuance of the constitutions of those States. The members of the Legislatures of both States balloted for Senators, as required by the act of Congress of July 25, 1866, and on the 3d of March, 1893, adjourned without having made a choice. The terms of Mr. Sanders, the late Senator from Montana, and of Mr. Warren, late Senator from Wyoming, expired on the 3d day of March, 1893, so that it may be said with perfect accuracy that the sessions of the Legislatures of those States and the terms of Senators Sanders and Warren expired at the same moment.

The case of Mr. Allen, who claims the right to be seated as a Senator from the State of Washington, differs from the cases of Mr. Mantle and Mr. Beckwith in this respect only, that the term of Mr. Allen, who was the late Senator from Washington, expired on the 3d day of March, 1893, and the Legislature of that State, which was in session some time before the 3d day of March, and had balloted for a Senator to fill the term which commenced on the 4th day of March, 1893, continued to ballot in actual session until the 4th day of March, when it adjourned without having made a choice.

The Legislatures of each of the States of Montana and Wyoming were in actual session for one or more months before the expiration of the terms of Mr. Sanders and Mr. Warren, and the Legislature of Washington was in session for a month or more before and for several days after the expiration of the term of Mr. Allen. It was the duty of the Legislatures of those States to elect Senators for the term commencing on the 4th day of March, 1893; it was in their power to do so; yet they failed to make such elections. After the adjournment of the Legislatures of those States the governor of the State of Montana appointed Mr. Mantle, the governor of Wyoming appointed Mr. Beckwith, and the governor of Washington appointed Mr. Allen, to be Senators.

The majority of the committee treat the cases of the claimants from Montana, Wyoming, and Washington as alike in principle, and assert the right of all to be seated.

The rights of these gentlemen to seats depend upon the authority of the governors of their respective States to appoint them Senators, and the authority of the governors to appoint them, if it exists at all, is derived alone from the Constitution. The provisions of the Constitution which relate to the organization and to the election of members of the Senate are so brief that they may be conveniently quoted. Section 3 of Article I provides that—

> The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.
>
> Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

The material, relevant portions of the Constitution may be condensed into this form: "The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof for six years, * * * and if vacancies happen by resignation or otherwise, during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies."

The Constitution determines that Senators shall be chosen by the Legislatures of the States for a term of six years. The power of electing Senators is conferred upon the Legislature, and to meet the possibility that vacancies might happen from resignation or like causes, the power is conferred upon the governor to fill vacancies thus occurring.

It is not easy to mistake the general purpose of the framers of the Constitution. It was contemplated by the framers of the Constitution that vacancies might occur from any of the causes that could be anticipated, and it was also understood that the Legislatures of the States would not be in continual session, and there was a necessity for providing for the filling of vacancies.

Upon observing the Constitution closely and carefully it will be found that the original proposition which came from a committee of that body was that the governors of States should fill vacancies absolutely, without limitation. It was by subsequent amendment determined to limit the power of the governors of States to make appointment of Senators to be exercised on particular specified contingencies—that is, the governors should have power to fill vacancies caused by resignation or from any similar cause which might happen at a time when the Legislature was not in session.

A careful provision was made, however, that the appointment should continue until the meeting of the Legislature. So the power of the governor to appoint was considered as purely exceptional, not as original. It was not supposed in the original scheme that the power was conferred upon the governor to appoint a Senator originally. The theory was that the vacancy must be accidental, and death or resignation are given as some of the illustrations of the cases in which the power of governors could be employed. The whole theory of the Constitution was, and is, that the power of election was with the Legislature, and the contingent power of filling vacancies was vested in the governor, a power to be vested only upon the happening of certain contingencies, and a power which exhausted itself when the true electoral body met in actual session.

The Constitution determines that Senators shall be chosen by the Legislatures of the States for a term of six years; the power of electing Senators is conferred upon the Legislatures in the most absolute and exclusive terms, but it was foreseen by the authors of the Constitution that vacancies might occur or hap-

pen during the recess of the Legislature of a State at a time when the Legislature, not being in session, would be incapable of filling the vacancy.

To meet that contingency the executive of a State was empowered to make temporary appointments until the next meeting of the Legislature, which is required by the terms of the Constitution to then fill such vacancies.

The Committee on Privileges and Elections agree that under the Constitution the power and the duty of the Legislatures of the States is primary, and that of the governors of the States to make temporary appointments to fill vacancies in the Senate is contingent.

The majority of the committee contend that the coexistence of but two facts is essential to the existence of the power of the governors to make such temporary appointments. The first of these facts is that there shall exist a vacancy in the representation of any State in the Senate; and, secondly, that at a time when such vacancy exists the Legislature of such State is not in session. At any time upon a concurrence of these two circumstances the power of a governor to appoint a Senator is complete. While the contention of the minority is that in order to the existence of the power of a governor of a State to make temporary appointments of Senators the vacancy to be filled must happen by the resignation of a Senator or otherwise during the recess of the Legislature of such State, and that the power in question can not exist in the governor of a State to fill a vacancy occasioned by the expiration of a constitutional term. The majority of the committee profess to have discovered that the leading object of the provision of the Constitution is to keep the Senate at all times full. It is asked in the report:

> What is the great and leading purpose which the provision now under consideration was designed to accomplish? It is that the Senate of the United States be full, always full; each State was to be represented there by two Senators.

In order to secure this "great and leading purpose" the committee inferentially assert this purpose is to be appealed to to supply all omissions, to reconcile all inconsistencies, to give a meaning to all ambiguities, and even in clear cases to compel a construction opposed sometimes to a clear meaning of particular words and phrases.

The committee, in quoting this extreme rule, sometimes applicable to the construction of contracts between parties, seem to have forgotten the injunction of Judge Marshall, which they quote, "Never forget that it is a constitution we are construing," and seem, furthermore, to have disregarded the maxim that "the best rule by which to arrive at the meaning and intention of a law is to abide by the words which the lawmaker has used," and that other rule that "words in a statute and a portion of a constitution are never to be construed as unmeaning and surplusage, if a construction can legitimately be found which will give force to and preserve all the words in the act." The end interpretation aims at is to find out the intent of the statute or the constitution, as the case may be; to clear up the meaning of the words if they are obscure; to ascertain their sense if they are ambiguous, and to determine their design where the words express it imperfectly. It is not permitted to interpret what has no need of interpretation.

When an instrument is conceived in clear and precise terms; when the sense is manifest and leads to nothing absurd, there can be no reason to refuse the sense which the words naturally present; to go elsewhere in search of conjectures in order to restrain or extend the words of an instrument is to elude it.

The meaning of the provisions of the Constitution under consideration can be determined without resorting to the violent means of interpretation quoted with approbation by the committee. The Constitution as a complete instrument was the production of deputies representing sovereign but united States. Its purpose was to provide a common government for the United States. In execution of that purpose it created a Senate to consist of two Senators from each State, to be elected by the Legislatures of the States for a term of six years, and in contemplation of possible vacancies it provided:

> And if vacancies happen during the recess of the Legislature of any State, the executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

In the early days of the Union the words quoted were not supposed to be ambiguous in their meaning.

The case of Kensey Johns, which was before the Senate in 1794, and of James Lanman in 1825, were decided without apparent difficulty, and now the words in question may be readily interpreted by the employment and application of well-established rules of construction. The admitted object of the language is to provide a means for filling vacancies which may happen to exist in the representation of any State in the Senate. To satisfy the terms of the Constitution upon which the power of the governor to appoint a Senator to fill a vacancy, it is necessary first that a vacancy shall happen.

It is admitted that the word "happen" has a very wide signification. It is clear, however, that while other words may sometimes be employed instead of the word "happen," and examples will occur to every Senator, the word "happen" in its strict sense will hardly supply the meaning of the words that are sometimes substituted for it. The word "happen" exactly expresses the construction which was given in all the cases up to 1825. No other word could have been employed that would have satisfied the construction first given to the Constitution by the Senate. The minority report of the committee discusses the meaning of that term as far as it is necessary to do so.

It may be conceded, too, that the word "occur" is often used as an equivalent for "happen," and that therefore no conclusive inference as to the intention of the framers of the Constitution can be drawn from the use of the word "happen" alone. The exact intention of a deliberative body in the use of a word of doubtful meaning, when other means fail, can often be determined by contrasting it with another word or words for which it was substituted in the course of the composition of a statute or a constitution and by the association of the word in question with words which precede or follow it. We have the debates in the convention which framed the Constitution, and it is admissible to resort to those debates as a means of ascertaining the intention of the framers of the Constitution in the use of particular words. It appears that a committee of the convention known as the committee on detail recommended a clause to be made a part of the Constitution.

I have not the exact words before me. The recommendation was a broad one, that the power of filling vacancies—I quote freely—shall belong to the executives of the States until the next meeting of the Legislatures. It is true, as has been said already, that an attempt was made to strike out those words from the plan. It is also certain that the words suggested by the committee were not satisfactory to the Convention. It is easy to be seen that if the original words reported by the committee of detail had become a part of the Constitution controversies like this could not have happened. "Vacancies shall be filled by the executives of the States until the next meeting of the Legislatures."

I repeat, I quote freely. The necessity for retaining in the Constitution power to fill vacancies was recognized to the extent that the Convention refused to strike out those words when that distinct proposition was made. But the clause was not satisfactory to the Convention, and the words now found in the Constitution were inserted to give exact expression to the intention of the Convention. The exact words selected were "if vacancies happen by resignation, or otherwise."

The Senator from Indiana [Mr. TURPIE] attaches much importance to the meaning of the word "otherwise." The Senator's proposition is that the Convention was unwilling to accept as a part of the Constitution the clause which provided that vacancies in all cases shall be filled by the governor until the next meeting of the Legislature, but his proposition is that the word "otherwise" gives to the clause reported greater significance than it had before; that is, all vacancies may be filled by the governors of the States. Now the modification was, "if vacancies happen by resignation, or otherwise."

The Senator from Indiana argues that the word "otherwise" restores to the original proposition the broad comprehension intended by the authors of the report, and that the clause is now to be read, "if vacancies happen by resignation or exist from any other cause the governor may fill that vacancy until the next meeting of the Legislature;" that is, that the limitation which was intended by the insertion of the word "resignation" was enlarged and made as broad as before by the use of the word "otherwise." So according to the theory of the Senator from Indiana, and, as I understand it, of the Senator from New Hampshire [Mr. CHANDLER], the governor may fill all vacancies until the next meeting of the Legislature; that the word "resignation" is without meaning, as "otherwise" comprehends all that was meant in the proposition contained in the original report.

The Senator from Massachusetts ingeniously suggests that the purpose for which the word "resignation" was inserted in the clause was not to limit the executive power of appointment, but it was to confer upon an incumbent the power of resignation. He tells us that it was the rule in England, that no member of the House of Commons could resign or vacate his seat otherwise than by the acceptance of an employment under the Crown, and the familiar practice of the House of Commons of a retiring member accepting the stewardship of Chiltern Hundreds is cited to illustrate and enforce the proposition the Senator advances. But it will be remembered by those who have taken the pains to examine the debates that there is no allusion in any of the de-

bates to that fact. It is nowhere claimed in the Convention that that case was before the minds of the framers of the Constitution.

It is suggested by a Senator on my right [Mr. PEFFER] that resignations were familiar in the Continental Congress, and the American doctrine of the right of the incumbent to resign his place was not questioned. The suggestion, therefore, of the Senator from Massachusetts has the merit of ingenuity, but it has no foundation in any fact or expression which occurred in the course of the debates in the Constitutional Convention.

For what purpose, then, was the word introduced? Its natural effect is to limit the generality of the words reported by the committee of detail. That report provided, in substance, that the executives of States should fill all vacancies until the next meeting of the Legislature. That was not satisfactory to the Convention. It was not satisfied that the governors of States should have the power to fill all vacancies that might occur, and words of limitation were thought to be necessary, and were introduced into the clause. The words of limitation are, "if vacancies happen by resignation, or otherwise."

As a matter of fair construction, the word "resignation" can only refer to the vacation of an office by one who had a right to continue to occupy it. The word was introduced into the Constitution for a purpose. I maintain it was introduced as a word of limitation, and the Senator maintains that the purpose intended was only to give the Senator incumbent the right to vacate his seat. I maintain that the words are a limitation on the power of the governor to appoint Senators. The other proposition is that the words only mean Senators may resign their seats and thus create a vacancy, and the executive of the State may fill all vacancies which may happen or exist during a recess of the Legislature.

Is it not much more reasonable to conclude that the amendments proposed to the original draft had a more definite purpose? The Legislatures of the States are the electors of Senators. I think I may fairly assert it was undoubtedly the expectation as well as the purpose of the framers of the Constitution that the Legislatures would in all cases elect Senators.

What ground could there be for a doubt on that subject? The power was conferred upon States to elect Senators for the sake of the States. It was the right as well as the privilege, the duty as well as to the advantage, of the States to be represented in the United States Senate. Could it have been anticipated by the framers of the Constitution that the States would fail to exercise the privilege of being represented in the Senate of the United States? The right of States to representation in the Senate was deemed so precious that it was provided elsewhere in the Constitution that no State should be deprived of its representation in the Senate without its consent.

I quote these provisions of the Constitution freely. It was deemed an essential, valuable, precious right of representation. It never could have been thought possible that the States of the Union would waive so valuable a right as that of being represented in the national Senate. The right to representation in connection with taxation was the cause of the Revolution. Can it be supposed that the Convention which formed the Constitution anticipated the possibility that the States would voluntarily waive this most valuable right? The idea that it was intended to provide for the contingency of a Legislature disregarding its plain duty to its people in electing a Senator could not possibly occur to the framers of the Constitution.

The Senator from Indiana says, and truly, too, I think, that our fathers were familiar with factions and with political strifes, as we are. But they never contemplated that the factions of a State would consent to waive the valuable right of representation in the national Senate. I shall not trouble the Senate by discussing that which the Senator from Oregon [Mr. MITCHELL] presented so clearly and well. It can not be presumed that the Convention imagined, if I may use that term in such a connection, that the Legislatures of States to whom the election of Senators was confided would ever fail to discharge that duty. It can not be affirmed with proper respect to them that they anticipated such a condition of things; that they did not anticipate such a condition is inferable from the fact that if they had they would have inserted an express provision in the Constitution to meet it.

It would have been easy to have provided that "when vacancies shall occur by a failure to elect or happen by resignation or otherwise,"

I take it, therefore, that this was not in contemplation or it would have been provided for.

Now I return to the original proposition, "If vacancies happen by resignation." If it had been anticipated that a vacancy could exist by failure to elect, the natural order of that statement would have been that the failure to elect would have been provided for and it would have preceded the word "resignation," as incumbency must precede resignation. The term "resignation," as I maintain, was introduced as a word of limitation. It was proposed that governors should fill all vacancies. The amendment was that the governors might fill some vacancies, and an attempt is made to describe the vacancies which may be filled by a governor. "Resignation" is chosen as the descriptive word indicating the general cause of the vacancy.

The Senator from Indiana, with that ingenuity which characterizes him, and to the exhibitions of which I always listen with much interest, intimates that the word "otherwise" covers all vacancies, all cases, all other ways. I ask him if it was intended that the governors should fill all vacancies, why were the words reported from the committee of detail rejected? Why were any other words used? If, as is maintained, the governor may fill all vacancies until the next meeting of the Legislature, why were words of limitation used? If that was the intention of the framers of the Constitution, why were other words employed?

The ingenious suggestion of the Senator from Massachusetts [Mr. HOAR], which I have already noticed, is that the purpose of the use of the word "resignation" was simply to recognize the right of a Senator to resign. If it was used for that purpose only, then it has the merit, I say, of extreme ingenuity, but has no support whatever in the debates in the Convention, and seems to be unwarranted by anything under any custom or rule which prevailed in this country at any time.

Upon a careful inquiry as to the meaning of the word "otherwise" its significance is not always clear. In the report of the committee this subject is discussed with clearness and ample learning. I will not ask the Senate to listen to me while I continue a discussion which seems to me to have been there exhausted. Evidently from the fact that that is the word chosen after "resignation" it contemplates causes resembling resignation, according to very well understood rules of interpretation. "Otherwise," if interpreted as the Senators on the other side interpret it, rendered an amendment to the report of the committee of detail entirely unnecessary. As I said before, it simply restored the original words reported by the committee, and with a sort of grant of power to an incumbent to resign. That would seem to be the whole effect of the proposition according to the arguments on the other side.

The term "otherwise" admits of very free interpretation. It may mean "in any other way." It may mean, in connection with the word "resignation," "or any like case." The Senator from Indiana wastes some time, I think, in combating that view when he asserts that a vacancy occasioned by resignation and one caused by death or expulsion are altogether unlike. They are unlike in their causes, but they are alike in their results and in their incidents.

In order to find the meaning of the term "resignation," we must find that one has been in possession of an office or thing and that he has yielded it up so that that place which was full is now vacant. In the case of expulsion the office was full, but made vacant; and in the case of resignation the vacancy happened by the voluntary act of the incumbent. In the one of expulsion it happened by the act of the body which had the right of expulsion. Other illustrations might be found. While these vacancies originating from different causes may be unlike in the cause they are alike in the results. An office is full. An office happens to be vacated. Resignation is given as one of the examples of an office once full, but which has become vacant.

Illustrations might be multiplied showing that while the Senator from Indiana is largely our creditor for ingenuity, he seems to have failed to perceive that the vacancy is the thing to be considered; and that is the result of any one of a number of different causes which produce the result, "otherwise" being the term which comprehends all similar cases.

Mr. GRAY. Classified with reference to that result.

Mr. PALMER. As is suggested by the Senator on my left, classified with reference to that result, the result being a vacancy in an office once filled.

I attach much consequence to the alterations in these phrases employed in the progress of the debates in the Convention. The first idea was that the Constitution should confer upon governors of States power to fill all vacancies however they might happen, or from whatever cause they might result, and that would satisfy the Senator from New Hampshire, who has presented us an argument this morning to support the equal dignity of the governor of a State with the Legislature of that State. I may reply to the Senator by saying that I am not called upon to determine the relative dignity of the executive and legislative departments of States.

The inquiry is, What was the intention of the framers of the Constitution? In order to ascertain that intention we must resort first to the words. We are at liberty to look to the process by which the ultimate result was reached; we are permitted to

consult contemporary history, and we are at liberty to resort to contemporaneous practice.

Permit me to show a rule I think the Senator from Massachusetts will recognize as one of universal acceptance, that in the construction of a law, and necessarily of a constitution, it can not be presumed that the Legislature or the Constitutional Convention employed any words without meaning. In construction a meaning must be found for every word unless it is clear that no construction can be found which would not be absurd. It is a modification of the rule that the intention must govern in the construction of constitutions and statutes.

Now, why were these words introduced? What was intended? I perceive that if the Senator from Massachusetts is correct in his theory the word "resignation" is a useless word, serving as the mere resting point of the word "otherwise." "If a vacancy shall happen," I render freely, "the governor shall make temporary appointment until the next meeting of the Legislature." If that had been the clause of the Constitution the word "happen" might be accepted in the broad meaning claimed for it by the Senator from Massachusetts, it being the same as "occur," or even the word "exist"—if vacancies exist, the governor may fill that vacancy until the next meeting of the Legislature.

What is the case of the Senator from Washington, Mr. Allen? In that case the vacancy occurred while the Legislature was in session, and in order to get rid of that difficulty the Senator must get rid of the words "during the recess of the Legislature." The ingenious Senator from New Hampshire would not have the least difficulty in holding that modern learning and skill are quite equal to the task of even getting rid of the phrase "if the vacancy shall happen in the recess of the Legislature the governor may make a temporary appointment." In this case the vacancy happened while the Legislature was in session, and the Legislature continued in session for nearly a week, from the 3d until I believe the 9th day of March, 1893. There the vacancy did not happen during the recess of the Legislature. Undoubtedly under the rules of free and liberal interpretation some method will be found to show authority for the governor to reappoint Mr. Allen as his own successor.

Going back again, I have said, and I repeat, that in the progress of these investigations we are to conclude that every word had some meaning, not necessarily an exact meaning according to the best authorities, but it must be implied in some sense, perhaps the better sense, as the term is understood by the people. I understand no rule is better settled than that, unless phrases are technical, we are to look to the language of the country in order to interpret written or printed instruments, whether constitutions or contracts. It is also to be supposed that while we are giving the interpretation to words we can reject none. "If vacancies happen."

I invite the special attention of the Senator from Massachusetts, if he shall take part in the debate, to the proposition advanced by the Senator from Oregon. No case can be found in the Constitution of the United States or in the constitution of a State where a duty has been imposed upon a branch of the Government that it has been assumed as possible that the department to which the duty is intrusted would disregard that duty. It may be said, and on that point I wish to dwell a moment, that the Convention doubtless anticipated——

Mr. HOAR. If the Senator will pardon me, that was not the question which the Senator from North Carolina [Mr. VANCE] put to the Senator from Oregon or which the Senator from Oregon answered. He asked him if there was any case where a provision was made that if the functionary to whom a duty was committed failed to perform it the duty should be given to another to perform, and the Senator from Oregon said there was no such instance. It was not a refusal but a failure to perform a duty.

Mr. PALMER. I beg pardon of the Senator; how does that differ from my statement of the proposition?

Mr. HOAR. The Senator said the statement of the Senator from Oregon was that there was no place where provision was made, in the case of a refusal by one functionary to perform a duty, for putting the duty upon another. The question which the Senator from North Carolina put was in regard to a failure to perform a duty, not a refusal. I will state fully the question put by the Senator from North Carolina, if I am not imposing on the good nature of the Senator from Illinois.

Mr. PALMER. Not at all.

Mr. HOAR. There are two provisions of the Constitution which provide for such a case. One is the case of the inability to elect, where, as we on our side say, this numerous body can not agree on one man conscientiously. It is the inability, not the refusal to elect. In the case of the inability of the President of the United States to perform his duty it is put on the Vice-President. The other case is precisely like it in principle. Where the two Houses of Congress fail to agree on the time of an adjournment or on the length of an adjournment, the President of the United States is authorized to interfere and settle the question.

Mr. VANCE. If the Senator from Illinois will permit me, I do not think that presents the same case by any means. My question, as I remember it, was, is there any case in the Constitution where a duty is imposed upon one official, and a failure to perform it renders it the duty of some other official to perform it?

Mr. HOAR. Exactly.

Mr. VANCE. There is no duty imposed by the Constitution upon the Houses of Congress to adjourn.

Mr. HOAR. I think there is.

Mr. VANCE. That is an act of their own free will. They can adjourn, but they are not required to adjourn; and when their term constitutionally expires they do not need to adjourn; they go out by law.

Mr. HOAR. No; that is not the point. It is the question of adjourning to a particular time; and that involves not merely the departing when they have got through, but coming back again to do their legislative duty at a particular time, which is a very serious and grave constitutional obligation.

If the House of Representatives were in session at this moment, and the highest interests of the country required a session in September or October, and we could not agree with the other House on the time of meeting, the duty of fixing that time is imposed upon the Executive. It is a duty quite as plain and of quite as much importance as the election of a single Senator, and a duty which we might be unable to perform for the same reason that a State Legislature might be unable to elect a Senator; that is, that we could not conscientiously agree, there being two bodies who have to agree. So there are two cases in the Constitution. One is a case of failure from inability. If the President of the United States is unable to perform his duties by insanity, by illness, or for any other reason which makes an inability, another functionary comes in. If we can not agree from inability on a time when we shall have a session next fall, the two Houses being in session, the President comes in and cuts the knot.

Mr. PALMER. I appreciate the force of that answer, but the framers of the Constitution evidently foresaw those possibilities and provided for them.

Mr. HOAR. As the Senator is summing up, perhaps, in order not to interrupt him again, he will let me make one other suggestion, which will take but a moment.

Mr. PALMER. Certainly.

Mr. HOAR. If I understood the Senator just now, he said the suggestion that the phrase "by resignation, or otherwise" was put into the Constitution in order to remove the doubt growing out of the English practice, whether a Senator could lawfully resign his office, was due to my ingenuity, as he was kind enough to say, not uncivilly at all, and that it found no warrant in the debates. Did I understand the Senator correctly?

Mr. PALMER. Certainly, I said that.

Mr. HOAR. Now, will he allow me to read to him Mr. Madison's own statement on the subject, and see whether I understood him?

Mr. PALMER. Certainly; with great pleasure.

Mr. HOAR. This is Mr. Madison's own report:

> Mr. Madison, in order to prevent doubts whether resignations could be made by Senators, or whether they could refuse to accept, moved to strike out the words after "vacancies" and insert the words "happening by refusals to accept, resignations, or otherwise, may be supplied by the Legislature of the State in the representation of which such vacancies shall happen, or by the executive thereof, until the next meeting of the Legislature."

Mr. PALMER. I remember that.

Mr. HOAR. I do not understand the Senator, then, in saying that he finds no warrant in the debates for my statement.

Mr. PALMER. I spoke of the fact that the Senator had referred to the English example, and that there was nothing in the debates that referred to the practices in England. That was the remark I made. I am quite familiar with Mr. Madison's suggestion. Mr. Madison suggested the original amendment proposed by him, "by failure to accept," etc. That makes the proposition, I admit, plausible, and the words were retained, but there is nothing in the debates that would justify the proposition that they were not words of limitation also.

Getting back to the line I was pursuing, however, in rather a desultory way, I want to remark, and somewhat in continuation, that the terms employed in this instrument evidently contemplate, on even Mr. Madison's suggestion, that these words would authorize resignation. They were at the same time words of limitation upon the power of the governor. They were to operate by way of limitation and also to operate by words as examples, and in connection with the word "happen," which, as I have

said before, perfectly represents the idea of possibility or accident, and does not perfectly represent an occurrence which comes by course of nature or by operation of law—one that may be foreseen. It is therefore much safer as a matter of construction to accept a word which has a distinct signification without being ingenious to find that the same word may have other meanings.

The example was resignation, and the word "happen" was also introduced. The word "happen" does not exist in the original draft of the committee of detail. The word "happen" was imported into the amendment, as well as the word "resignation." The whole clause is coupled with this word of contingency, which perfectly satisfies our view of the case and only possibly satisfies the purpose of the Senators on the other side.

Now, Mr. President, being about to conclude what I have to say on this subject, I beg to state that this is one of the most solemn occasions which has occurred in the Senate since I have had the honor of being a member of the body. We are discussing questions that go to its very organization, and it is proposed to extend the Constitution so as to remove the choice of Senators still further from the primary source of all political power, the people. By way of compromise perhaps it was suggested in the Convention by some persons that the power of appointing Senators might be conferred upon the executives of the States. On the other hand, the claim was made that the power of electing Senators should be brought as near the people as possible. The compromise was found in vesting the choice of Senators in the Legislatures of the States, and the qualifications of electors of the Legislatures were left undefined in order that the power might be as near the people as possible.

Instead, therefore, of characterizing the construction for which gentlemen on the other side contend as being beneficial, it is the reverse. It is subversive. It is intimated in the report of the committee that it was proposed to give this power to the governors alone. That is true, but the prevailing sentiment was to place the power as near to the people as was possible. This proposition will confer ultimately on the governors of the States the power to appoint Senators much more extensively than is claimed now, because you observe how it has gone on step by step. In 1794, in the case of Johns, according to the admission of the Senator from New Hampshire, it was agreed that the power of the governor to appoint could not be exercised in cases like these.

In the cases from New Hampshire another step was taken in the direction of increasing the mere uncontrolled power of the governor. That was another step in the direction of giving the power to the governors to appoint Senators. If this line of construction is pursued, when gentlemen reject clauses in the Constitution in order to attain liberal results, the time is not distant when the powers of the Legislatures to elect will be very largely abridged, and the day is not distant when there will be combinations in the States to defeat the choice of Senators by the Legislatures so as to insure appointments by the governors. The process is an easy one.

We have the remarkable example of three States now with Senators appointed by governors knocking at these doors. The Legislatures have been in session. Every man of them was under the obligation of a solemn oath to obey the requirement to elect a Senator as the representative of his State and its people. They failed to do so. From what consideration? Senators say they could not elect. I in turn say that it was their duty to elect, and that their inability was a fictitious inability, imaginary, pretended; that it was not real. The spirit of faction may have taken control of some or all of them, but there is reason to believe, and it is a possible conclusion, that certain interests preferred that the governors should make appointments.

The gentlemen who are here, so far as I know, are blameless, free from fault. They have my personal respect; but there lies the danger, and step by step we depart from the pathway of the fathers. We become wise in our own conceit. The Senator from New Hampshire conceives the doctrine of liberal interpretation which would change the Government, and step by step our institutions are subverted by this spirit of change. No man can foresee the result.

The safe course is to restrict the power of governors to the exact limits of the Constitution. If the Legislatures fail to elect Senators, let them be responsible to those who elected them. You afford to faithless legislators a means of escape by this substitutionary method of appointing Senators.

Gentlemen talk about representation in this body as if it was a matter of such transcendent consequence that anybody might appoint, or as if the origin of the appointment is a matter of comparatively small consequence. The object is, we are told, that the Senate shall be full, always full. It is not so, Mr. President. The object is that the Senate shall be filled with the representatives of the States, representatives selected by the agencies to which the election has been confided by the Constitution, by the representatives of the people, and every step that removes from the Legislature a sense of its responsibility is a step towards the subversion of free institutions.

If the people of Montana, or of Washington, or of Wyoming are without representation in this body, whose fault is it? Have not their Legislatures had ample power to elect? In a session that lasted for months they have been struggling, they tell us, over an election for Senator, and have been unable to elect. What was the ground of that inability? Did they will to discharge their duty? Were they there to meet their obligations to their constituents? No; they were obeying the voice of faction, which would sacrifice sometimes free institutions for the sake of mere temporary advantages. They have failed to discharge their duty.

What is the remedy? Gentlemen suggest that the governor of a State shall relieve them of all responsibility by appointing a Senator for them. Sir, the governors of those States (and I speak again respectfully of those gentlemen) have appointed as Senators gentlemen whom the Legislatures would not elect. They did not elect them. They had the opportunity to elect them and they would not do it. The effect of this is to relieve these recreant members of the Legislature from their responsibility to the people. If the States of Washington, Montana, and Wyoming were to remain without representation who would be responsible for it? Whom would the people hold responsible? They would visit the proper punishment upon the faithless men who disregarded their duty.

But the Senate proposes to kindly relieve them of all trouble. The men whose duty it was to choose a Senator go back to their constituents and say, "The governor has done that which we ought to have done, and the Senate of the United States has held that where the Legislature of a State refuse to elect, the governor shall appoint"—I ask pardon, these Legislatures have not used the word "refuse;" but let me put a case. Suppose the Legislature had before ending its session passed this resolution:

Resolved, That we will not elect a Senator to the Senate of the United States.

What would the Senator from Massachusetts say then? To be logical he would say, "Let the governor appoint a Senator," forgetful that the Convention would not intrust the Legislature with the discretion to refer appointments for the Senate to whom they pleased. The Senator has the book before him. They would not intrust the Legislature with that power, yet the Senator maintains a doctrine here that would enable the Legislature to abandon its duty and delegate the power of election to a governor who might not represent the people.

Mr. HOAR. Would it disturb the Senator if instead of his saying what I would answer to that question he would permit me to say it?

Mr. PALMER. Clearly it would afford me pleasure to hear the Senator.

Mr. HOAR. I wish to preface what I desire to state by saying that I differ with the Senator in his history when he says he thinks it did not enter into the contemplation of the framers of the Constitution or the men of that generation that any State Legislature might refuse to exercise this prerogative. I think, on the contrary, it was a Constitution which was adopted with great doubt and put in operation with great apprehension on the part of the people of that generation; and unless a great many persons are in error leading statesmen of that day contemplated the attempt to have the State Legislatures abandon the Constitution and refuse their representation here. That serious question of doubt continued down to the time of Mr. Webster's famous debate with Mr. Calhoun, where Mr. Webster considers elaborately and at length the securities we have in our Government against the refusal of State Legislatures to elect Senators and goes on to make the argument which has been referred to more than once in this debate.

Therefore, I hold that if after the famous Hartford convention the Legislature of Connecticut, or Massachusetts, or New Hampshire, or Rhode Island had refused to send Senators here, intending to abandon the support of the Government in the war of 1812, and there had been a loyal, upright, patriotic governor in the State, it would have been within his power and it would have been his duty to make an appointment, and the Constitution would have furnished the necessity for its own protection for such a proceeding. That is a mere contingency. A great many men well informed will deny that there was any serious contemplation of such a thing then, but I am afraid, though I do not think the Hartford convention contemplated it, that Mr. Timothy Pickering did.

Now, suppose in 1861 my honorable friend had been governor of some Southern State whose Legislature had been possessed by the frenzy of that time. I think if the Legislature had refused to elect Senators he would have exercised his power of appointment.

Mr. PALMER. I think so.

Mr. HOAR. He would have had a right to do it, and the Senator thinks so, too.

Mr. PALMER. I think so, because revolutions have their own laws, if there can be said to be any law where there is no law. I incline to think that if I had been the governor of a State I should have looked to the safety of the Republic.

Mr. HOAR. That is what the framers of the Constitution did.

Mr. PALMER. But I should not have appealed to the Constitution for it. I should have appealed to that higher law, which guards the public, as I should have raised an army to resist rebellion.

No argument, I think, can be drawn from the illustration given by the Senator. He does, however, say in terms that if the Legislature refuses to elect a Senator—I beg the Senator's pardon, I wish to state it correctly—I understand the Senator to say that if the Legislature should have assembled and distinctly refused to elect a Senator, that would be a vacancy happening within the meaning of the Constitution.

I state the proposition with some hesitation. I admire the boldness of the Senator from Massachusetts. If that be so, then it is within the power of the Legislature of a State to abdicate its function as an electoral body and bestow it by the very act of abdication upon the governor, who would succeed to it if abdicated. That would be a happening within the meaning of the Constitution as interpreted by the Senator.

Can that be the true interpretation of the Constitution? Is it possible that an electoral body charged with a duty by the Constitution can create a power in a governor by simply refusing to discharge the duty imposed upon them by the Constitution? Can they thus subvert the Government by transferring one of its most important functions to an officer whose power is contingent, an officer whose power was conferred, as I maintain, to meet a contingency, a happening? Yet the Senator from Massachusetts tells me that that happening may be the deliberate refusal of the electoral body to discharge its duty, that that is a happening within the meaning of the Constitution, and thus the Government may be subverted.

It may be a continual happening from term to term. I believe the Senator the other day did admit that if the Legislature should meet and refuse to elect, the appointment of the governor made in the recess would be suspended during the session of the Legislature or would cease, and the governor would be required to renew the appointment, and so on from time to time and for all time. That seems to be the dangerous result of the view entertained by the Senator from Massachusetts.

Mr. President, how much safer it is to stand by the doctrine of the fathers, the doctrine applied in the case of Johns and of Lanman. How much safer it is to throw upon the State Legislatures the responsibility of choosing a Senator and leaving the members of the State Legislatures to be responsible to their constituents. Let the people speak in the choice of their representatives. Ours is a voluntary government, and the people ought to have the power to control it. One thing is very clear; it is as clear as a mathematical problem, that the governor will never appoint a person to be a Senator whom the Legislature would have elected. In the case supposed some portion of the Legislature may have voted for that person, but they would not choose him. If they be regarded as the true exponents of the popular will, a Senator is here as the representative of the governor, not of the Legislature.

I am done, when I say that I respect the power of the executives of the States and I claim for them all the powers which belong to their office. I had the honor of being the governor of a State once, and I surely magnified my office. I never allowed its honors to be trailed in the dust. I employed its powers in season and out of season, whenever its dignity was invaded or its laws violated; but I also believe that the safety of the people of this country depends upon a rigid adherence to the Constitution as it is.

In the great struggle which commenced in 1861 and ended in 1865 the effort of patriots was not to establish a new government; it was to maintain the dignity and authority of the Constitution as it is, as it was, as it came from the hands of the fathers. I believe it my duty now to stand by the ancient ways and to resist these innovations, because I can not foresee where they will end. When we depart, we take a final departure; we break loose from our moorings under the influence of the liberal doctrines of the Senator from New Hampshire, doctrines which have no other merit than their liberality. They are liberal with sacred things. It is a liberality without the sanction of law, conscience, or right; it is a liberality which disregards the interests of the free people of this country; it disregards popular liberty as defined and guaranteed and defended by the written Constitution and fair and honest interpretation.

Mr. President, I trust this question will be settled definitely on this vote. It is a great occasion. We are making a government by enlarging its powers. The power of construing constitutions is in fact the power to make them. We are to-day exercising a part of that power, and I warn the Senate that this innovation, this liberal interpretation, at some time will return to plague the inventors.

Mr. PEFFER. Mr. President, I desire to be heard a short time upon the matter pending, but I prefer not to proceed at this time. I do not suppose the discussion will continue to-day, and I therefore ask that I may have the floor when the Senate meets again in the morning.

Mr. GORMAN. I ask the Senator from Kansas to give way for a moment to permit me to offer a resolution which is necessary to the business of the Senate. The Senator will, of course, be entitled to the floor when the question again comes up.

Mr. PEFFER. I yield to the Senator.

COMMITTEE ON PRINTING.

Mr. GORMAN. I offer the resolution which I send to the desk, and ask for its present consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Committee on Printing be, and is hereby, authorized to sit during the coming recess for the performance of any and all duties devolving upon it.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. CULLOM. I suppose the passage of the resolution will incur no additional expense?

Mr. GORMAN. None whatever. This is the ordinary and necessary resolution. Under the law the Committee on Printing is required to discharge certain duties during the recess.

Mr. CULLOM. I so understood. If the resolution did incur additional expense it would have to go to the Committee on Contingent Expenses.

Mr. GORMAN. It does not involve a dollar of additional expense.

The resolution was considered by unanimous consent, and agreed to.

"BLACK HILLS" TIMBER DEPREDATIONS.

Mr. KYLE submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Interior be directed to furnish for the Senate copies of all reports and correspondence relating to the unlawful cutting of timber on public mineral lands in the district known as the "Black Hills," South Dakota.

REPORT ON COST OF MANUFACTURED PRODUCTS.

Mr. VANCE. If no Senator is prepared to proceed with the discussion of the resolution which has been under consideration, I shall move to proceed to the consideration of executive business.

Mr. WHITE of Louisiana. Will the Senator yield to me to make some reports?

Mr. VANCE. Certainly.

Mr. WHITE of Louisiana. I am instructed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution reported by the Committee on Finance on the 22d of March, to report it favorably.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Commissioner of Labor is hereby directed to make a report to the Senate at the opening of the Fifty-third Congress comprehending the facts already collected by him, or to be obtained from other sources, of the total cost, including all the elements thereof, and also actual labor cost of producing various iron and steel products, such as bar iron, steel rails, and other articles of iron and steel, and also the leading articles of textile industry, and of such other articles for which the cost of production has been or may be approximately obtained, and in his report to state the facts in parallel columns for this and other countries from which they have been or may be obtained; and that the Committee on Finance, or any subcommittee thereof, is hereby authorized to make such further investigation in respect to the same matters as it shall deem important, and with power to summon and examine witnesses, to send for persons and papers, and to administer oaths; and the expenses of such investigations, when made by said Finance Committee, shall be paid out of the contingent fund of the Senate.

Mr. HOAR. By whom was that resolution originally introduced?

Mr. WHITE of Louisiana. It was introduced by the Senator from New Jersey [Mr. MCPHERSON], referred to the Committee on Finance, reported by that committee, and then referred to the Committee on Contingent Expenses.

Mr. HOAR. I wish the Senator from Louisiana would let the resolution lie over.

Mr. WHITE of Louisiana. I have not asked any action upon it at this time. I have simply made the report.

Mr. HOAR. I wish the resolution to go over until the Senator from New Jersey [Mr. MCPHERSON], who originally offered it, shall be present.

The other day the Senator from New Jersey made some state

said before, perfectly represents the idea of possibility or accident, and does not perfectly represent an occurrence which comes by course of nature or by operation of law—one that may be foreseen. It is therefore much safer as a matter of construction to accept a word which has a distinct signification without being ingenious to find that the same word may have other meanings.

The example was resignation, and the word "happen" was also introduced. The word "happen" does not exist in the original draft of the committee of detail. The word "happen" was imported into the amendment, as well as the word "resignation." The whole clause is coupled with this word of contingency, which perfectly satisfies our view of the case and only possibly satisfies the purpose of the Senators on the other side.

Now, Mr. President, being about to conclude what I have to say on this subject, I beg to state that this is one of the most solemn occasions which has occurred in the Senate since I have had the honor of being a member of the body. We are discussing questions that go to its very organization, and it is proposed to extend the Constitution so as to remove the choice of Senators still further from the primary source of all political power, the people. By way of compromise perhaps it was suggested in the Convention by some persons that the power of appointing Senators might be conferred upon the executives of the States. On the other hand, the claim was made that the power of electing Senators should be brought as near the people as possible. The compromise was found in vesting the choice of Senators in the Legislatures of the States, and the qualifications of electors of the Legislatures were left undefined in order that the power might be as near the people as possible.

Instead, therefore, of characterizing the construction for which gentlemen on the other side contend as being beneficial, it is the reverse. It is subversive. It is intimated in the report of the committee that it was proposed to give this power to the governors alone. That is true, but the prevailing sentiment was to place the power as near to the people as was possible. This proposition will confer ultimately on the governors of the States the power to appoint Senators much more extensively than is claimed now, because you observe how it has gone on step by step. In 1794, in the case of Johns, according to the admission of the Senator from New Hampshire, it was agreed that the power of the governor to appoint could not be exercised in cases like these.

In the cases from New Hampshire another step was taken in the direction of increasing the mere uncontrolled power of the governor. That was another step in the direction of giving the power to the governors to appoint Senators. If this line of construction is pursued, when gentlemen reject clauses in the Constitution in order to attain liberal results, the time is not distant when the powers of the Legislatures to elect will be very largely abridged, and the day is not distant when there will be combinations in the States to defeat the choice of Senators by the Legislatures so as to insure appointments by the governors. The process is an easy one.

We have the remarkable example of three States now with Senators appointed by governors knocking at these doors. The Legislatures have been in session. Every man of them was under the obligation of a solemn oath to obey the requirement to elect a Senator as the representative of his State and its people. They failed to do so. From what consideration? Senators say they could not elect. I in turn say that it was their duty to elect, and that their inability was a fictitious inability, imaginary, pretended; that it was not real. The spirit of faction may have taken control of some or all of them, but there is reason to believe, and it is a possible conclusion, that certain interests preferred that the governors should make appointments.

The gentlemen who are here, so far as I know, are blameless, free from fault. They have my personal respect; but there lies the danger, and step by step we depart from the pathway of the fathers. We become wise in our own conceit. The Senator from New Hampshire conceives the doctrine of liberal interpretation which would change the Government, and step by step our institutions are subverted by this spirit of change. No man can foresee the result.

The safe course is to restrict the power of governors to the exact limits of the Constitution. If the Legislatures fail to elect Senators, let them be responsible to those who elected them. You afford to faithless legislators a means of escape by this substitutionary method of appointing Senators.

Gentlemen talk about representation in this body as if it was a matter of such transcendent consequence that anybody might appoint, or as if the origin of the appointment is a matter of comparatively small consequence. The object is, we are told, that the Senate shall be full, always full. It is not so, Mr. President. The object is that the Senate shall be filled with the representatives of the States, representatives selected by the agencies to which the election has been confided by the Constitution, by the representatives of the people, and every step that removes from the Legislature a sense of its responsibility is a step towards the subversion of free institutions.

If the people of Montana, or of Washington, or of Wyoming are without representation in this body, whose fault is it? Have not their Legislatures had ample power to elect? In a session that lasted for months they have been struggling, they tell us, over an election for Senator, and have been unable to elect. What was the ground of that inability? Did they will to discharge their duty? Were they there to meet their obligations to their constituents? No; they were obeying the voice of faction, which would sacrifice sometimes free institutions for the sake of mere temporary advantages. They have failed to discharge their duty.

What is the remedy? Gentlemen suggest that the governor of a State shall relieve them of all responsibility by appointing a Senator for them. Sir, the governors of those States (and I speak again respectfully of those gentlemen) have appointed as Senators gentlemen whom the Legislatures would not elect. They did not elect them. They had the opportunity to elect them and they would not do it. The effect of this is to relieve these recreant members of the Legislature from their responsibility to the people. If the States of Washington, Montana, and Wyoming were to remain without representation who would be responsible for it? Whom would the people hold responsible? They would visit the proper punishment upon the faithless men who disregarded their duty.

But the Senate proposes to kindly relieve them of all trouble. The men whose duty it was to choose a Senator go back to their constituents and say, "The governor has done that which we ought to have done, and the Senate of the United States has held that where the Legislature of a State refuse to elect, the governor shall appoint"—I ask pardon, these Legislatures have not used the word "refuse;" but let me put a case. Suppose the Legislature had before ending its session passed this resolution:

Resolved, That we will not elect a Senator to the Senate of the United States.

What would the Senator from Massachusetts say then? To be logical he would say, "Let the governor appoint a Senator," forgetful that the Convention would not intrust the Legislature with the discretion to refer appointments for the Senate to whom they pleased. The Senator has the book before him. They would not intrust the Legislature with that power, yet the Senator maintains a doctrine here that would enable the Legislature to abandon its duty and delegate the power of election to a governor who might not represent the people.

Mr. HOAR. Would it disturb the Senator if instead of his saying what I would answer to that question he would permit me to say it?

Mr. PALMER. Clearly it would afford me pleasure to hear the Senator.

Mr. HOAR. I wish to preface what I desire to state by saying that I differ with the Senator in his history when he says he thinks it did not enter into the contemplation of the framers of the Constitution or the men of that generation that any State Legislature might refuse to exercise this prerogative. I think, on the contrary, it was a Constitution which was adopted with great doubt and put in operation with great apprehension on the part of the people of that generation; and unless a great many persons are in error leading statesmen of that day contemplated the attempt to have the State Legislatures abandon the Constitution and refuse their representation here. That serious question of doubt continued down to the time of Mr. Webster's famous debate with Mr. Calhoun, where Mr. Webster considers elaborately and at length the securities we have in our Government against the refusal of State Legislatures to elect Senators and goes on to make the argument which has been referred to more than once in this debate.

Therefore, I hold that if after the famous Hartford convention the Legislature of Connecticut, or Massachusetts, or New Hampshire, or Rhode Island had refused to send Senators here, intending to abandon the support of the Government in the war of 1812, and there had been a loyal, upright, patriotic governor in the State, it would have been within his power and it would have been his duty to make an appointment, and the Constitution would have furnished the necessity for its own protection for such a proceeding. That is a mere contingency. A great many men well informed will deny that there was any serious contemplation of such a thing then, but I am afraid, though I do not think the Hartford convention contemplated it, that Mr. Timothy Pickering did.

Now, suppose in 1861 my honorable friend had been governor of some Southern State whose Legislature had been possessed by the frenzy of that time. I think if the Legislature had refused to elect Senators he would have exercised his power of appointment.

Mr. PALMER. I think so.

Mr. HOAR. He would have had a right to do it, and the Senator thinks so, too.

Mr. PALMER. I think so, because revolutions have their own laws, if there can be said to be any law where there is no law. I incline to think that if I had been the governor of a State I should have looked to the safety of the Republic.

Mr. HOAR. That is what the framers of the Constitution did.

Mr. PALMER. But I should not have appealed to the Constitution for it. I should have appealed to that higher law, which guards the public, as I should have raised an army to resist rebellion.

No argument, I think, can be drawn from the illustration given by the Senator. He does, however, say in terms that if the Legislature refuses to elect a Senator—I beg the Senator's pardon, I wish to state it correctly—I understand the Senator to say that if the Legislature should have assembled and distinctly refused to elect a Senator, that would be a vacancy happening within the meaning of the Constitution.

I state the proposition with some hesitation. I admire the boldness of the Senator from Massachusetts. If that be so, then it is within the power of the Legislature of a State to abdicate its function as an electoral body and bestow it by the very act of abdication upon the governor, who would succeed to it if abdicated. That would be a happening within the meaning of the Constitution as interpreted by the Senator.

Can that be the true interpretation of the Constitution? Is it possible that an electoral body charged with a duty by the Constitution can create a power in a governor by simply refusing to discharge the duty imposed upon them by the Constitution? Can they thus subvert the Government by transferring one of its most important functions to an officer whose power is contingent, an officer whose power was conferred, as I maintain, to meet a contingency, a happening? Yet the Senator from Massachusetts tells me that that happening may be the deliberate refusal of the electoral body to discharge its duty, that that is a happening within the meaning of the Constitution, and thus the Government may be subverted.

It may be a continual happening from term to term. I believe the Senator the other day did admit that if the Legislature should meet and refuse to elect, the appointment of the governor made in the recess would be suspended during the session of the Legislature or would cease, and the governor would be required to renew the appointment, and so on from time to time and for all time. That seems to be the dangerous result of the view entertained by the Senator from Massachusetts.

Mr. President, how much safer it is to stand by the doctrine of the fathers, the doctrine applied in the case of Johns and of Lanman. How much safer it is to throw upon the State Legislatures the responsibility of choosing a Senator and leaving the members of the State Legislatures to be responsible to their constituents. Let the people speak in the choice of their representatives. Ours is a voluntary government, and the people ought to have the power to control it. One thing is very clear; it is as clear as a mathematical problem, that the governor will never appoint a person to be a Senator whom the Legislature would have elected. In the case supposed some portion of the Legislature may have voted for that person, but they would not choose him. If they be regarded as the true exponents of the popular will, a Senator is here as the representative of the governor, not of the Legislature.

I am done, when I say that I respect the power of the executives of the States and I claim for them all the powers which belong to their office. I had the honor of being the governor of a State once, and I surely magnified my office. I never allowed its honors to be trailed in the dust. I employed its powers in season and out of season, whenever its dignity was invaded or its laws violated; but I also believe that the safety of the people of this country depends upon a rigid adherence to the Constitution as it is.

In the great struggle which commenced in 1861 and ended in 1865 the effort of patriots was not to establish a new government; it was to maintain the dignity and authority of the Constitution as it is, as it was, as it came from the hands of the fathers. I believe it my duty now to stand by the ancient ways and to resist these innovations, because I can not foresee where they will end. When we depart, we take a final departure; we break loose from our moorings under the influence of the liberal doctrines of the Senator from New Hampshire, doctrines which have no other merit than their liberality. They are liberal with sacred things. It is a liberality without the sanction of law, conscience, or right; it is a liberality which disregards the interests of the free people of this country; it disregards popular liberty as defined and guaranteed and defended by the written Constitution and fair and honest interpretation.

Mr. President, I trust this question will be settled definitely on this vote. It is a great occasion. We are making a government by enlarging its powers. The power of construing constitutions is in fact the power to make them. We are to-day exercising a part of that power, and I warn the Senate that this innovation, this liberal interpretation, at some time will return to plague the inventors.

Mr. PEFFER. Mr. President, I desire to be heard a short time upon the matter pending, but I prefer not to proceed at this time. I do not suppose the discussion will continue to-day, and I therefore ask that I may have the floor when the Senate meets again in the morning.

Mr. GORMAN. I ask the Senator from Kansas to give way for a moment to permit me to offer a resolution which is necessary to the business of the Senate. The Senator will, of course, be entitled to the floor when the question again comes up.

Mr. PEFFER. I yield to the Senator.

COMMITTEE ON PRINTING.

Mr. GORMAN. I offer the resolution which I send to the desk, and ask for its present consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Committee on Printing be, and is hereby, authorized to sit during the coming recess for the performance of any and all duties devolving upon it.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. CULLOM. I suppose the passage of the resolution will incur no additional expense?

Mr. GORMAN. None whatever. This is the ordinary and necessary resolution. Under the law the Committee on Printing is required to discharge certain duties during the recess.

Mr. CULLOM. I so understood. If the resolution did incur additional expense it would have to go to the Committee on Contingent Expenses.

Mr. GORMAN. It does not involve a dollar of additional expense.

The resolution was considered by unanimous consent, and agreed to.

"BLACK HILLS" TIMBER DEPREDATIONS.

Mr. KYLE submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Interior be directed to furnish for the Senate copies of all reports and correspondence relating to the unlawful cutting of timber on public mineral lands in the district known as the "Black Hills," South Dakota.

REPORT ON COST OF MANUFACTURED PRODUCTS.

Mr. VANCE. If no Senator is prepared to proceed with the discussion of the resolution which has been under consideration, I shall move to proceed to the consideration of executive business.

Mr. WHITE of Louisiana. Will the Senator yield to me to make some reports?

Mr. VANCE. Certainly.

Mr. WHITE of Louisiana. I am instructed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution reported by the Committee on Finance on the 22d of March, to report it favorably.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Commissioner of Labor is hereby directed to make a report to the Senate at the opening of the Fifty-third Congress comprehending the facts already collected by him, or to be obtained from other sources, of the total cost, including all the elements thereof, and also actual labor cost of producing various iron and steel products, such as bar iron, steel rails, and other articles of iron and steel, and also the leading articles of textile industry, and of such other articles for which the cost of production has been or may be approximately obtained, and in his report to state the facts in parallel columns for this and other countries from which they have been or may be obtained; and that the Committee on Finance, or any subcommittee thereof, is hereby authorized to make such further investigation in respect to the same matters as it shall deem important, and with power to summon and examine witnesses, to send for persons and papers, and to administer oaths; and the expenses of such investigations, when made by said Finance Committee, shall be paid out of the contingent fund of the Senate.

Mr. HOAR. By whom was that resolution originally introduced?

Mr. WHITE of Louisiana. It was introduced by the Senator from New Jersey [Mr. MCPHERSON], referred to the Committee on Finance, reported by that committee, and then referred to the Committee on Contingent Expenses.

Mr. HOAR. I wish the Senator from Louisiana would let the resolution lie over.

Mr. WHITE of Louisiana. I have not asked any action upon it at this time. I have simply made the report.

Mr. HOAR. I wish the resolution to go over until the Senator from New Jersey [Mr. MCPHERSON], who originally offered it, shall be present.

The other day the Senator from New Jersey made some state

ments in regard to a defect in the report of the Commissioner of Labor as to something he had tried to find there and had not found. I have had no conversation with the Senator upon that subject, but I have been informed—whether true or not I do not know—that that Senator has discovered that the report of the Commissioner of Labor contains in the main what he desired and expected to find there, that his attention had been called to it, and that he intended when the resolution came back to make some statement on that subject to the Senate as a matter of justice to the Commissioner of Labor.

As I said, I am not authorized to speak for the Senator from New Jersey, but I should like to have the resolution stand until he comes in, if he shall come in the course of a few days.

Mr. WHITE of Louisiana. I have not asked any action upon the resolution.

The VICE-PRESIDENT. The resolution will go over.

INQUIRY BY COMMITTEE ON IMMIGRATION.

Mr. WHITE of Louisiana. I am also directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by the Senator from New Hampshire [Mr. CHANDLER] on the 27th of March, to report a substitute therefor.

The VICE-PRESIDENT. The proposed substitute will be read.

The Secretary read as follows:

Resolved, That the Committee on Immigration be authorized and directed to make inquiry into the condition and character of the alien immigrants coming to the United States for the purpose of supplying labor for the coal, iron, and other mines of the country; and further to inquire whether the laws against the admission of laborers under contract are effectually enforced, and whether the immigration laws are economically administered, without an excessive force of officers, clerks, inspectors, special agents, and other employés; and also generally to inquire into the workings of the new immigration law of March 3, 1893, and prior immigration laws, and concerning any suspected evasions and violations thereof; for the purpose of which inquiry the committee may act as a full committee or through subcommittees duly appointed by its chairman, and may take testimony during the recess of the Senate at such places as may be most convenient, and send for persons and papers, and employ a stenographer, the expenses of the inquiry to be paid from the contingent fund of the Senate: *Provided*, That no extra expense be incurred for a clerk to said committee, any clerical work required by the committee or subcommittee to be performed by the regular clerk of the committee without extra allowance or compensation.

Mr. CHANDLER. I ask action upon that resolution, if the chairman of the committee has no objection.

Mr. PLATT. Is that an original resolution or a substitute?

The VICE-PRESIDENT. That which has just been read is a substitute.

Mr. CHANDLER. The substitute is the same as the original with a clause added. I see that the chairman of the committee is here, and I ask immediate action on the resolution.

The resolution was considered by unanimous consent, and agreed to.

INDIAN DEPREDATION CLAIMS.

Mr. WHITE of Louisiana. I am also directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by the Senator from South Dakota [Mr. KYLE] on the 30th of March, to report a substitute therefor.

The VICE-PRESIDENT. The proposed substitute will be read.

The Secretary read as follows:

Resolved, That the Committee on Indian Depredations be, and hereby is, directed to make inquiry concerning all Indian depredation claims which at any time have been or may be presented in the Court of Claims under the act of March 3, 1891, especially those in which unpaid judgments have been hitherto rendered, or may be rendered prior to the conclusion of the inquiry; and also into the manner in which such claims have been defended in behalf of the Indians and the United States; and generally into the workings of said act of March 3, 1891; and concerning all other Indian depredation claims not covered by said act, and to make such recommendations relative to any or all of said claims and for additional legislation as said committee may deem expedient; said committee, either as a full committee or through subcommittees, being hereby empowered to sit during the recess of the Senate, to send for persons and papers, and to employ a stenographer and expert, the expenses of the inquiry to be paid from the contingent fund of the Senate: *Provided*, That no extra expense be incurred for a clerk to said committee, any clerical work required by the committee or subcommittee to be performed by the regular clerk of the committee without extra allowance or compensation.

The resolution was considered by unanimous consent, and agreed to.

HARBOR IMPROVEMENTS ON PACIFIC COAST.

Mr. WHITE of Louisiana. I also report from the Committee to Audit and Control the Contingent Expenses of the Senate a substitute for the resolution submitted by the Senator from North Carolina [Mr. RANSOM] on the 3d instant.

The VICE-PRESIDENT. The proposed substitute will be read.

The Secretary read as follows:

Resolved, That the Committee on Commerce be, and they are hereby, authorized and directed to sit, by subcommittee not exceeding five in number, to be appointed by the chairman of said committee, during the recess of Congress, and to visit and examine the Pacific coast between Points Duma and Capistrano, with a view to determining the best location for the construction of a deep-water harbor. Said subcommittee is hereby also authorized to visit and examine such other works of river and harbor improvement on the Pacific coast, existing or proposed, as in their judgment the interests of commerce shall demand, and shall have power to subpœna witnesses, to administer oaths, and take testimony, to employ a stenographer, and to appoint a sergeant-at-arms from the messengers of the Senate; and that the actual necessary expenses of the said subcommittee, properly incurred, shall be paid out of the contingent fund of the Senate in the usual manner: *Provided*, That no compensation be paid for a clerk to said subcommittee, the chairman being authorized, if necessary, to detail the regular clerk of said committee to attend the said subcommittee, the clerk so assigned to receive no extra allowance or compensation.

Mr. SHERMAN. I think that resolution had better lie over.

Mr. FRYE. Will the Senator hear me one moment?

Mr. SHERMAN. Certainly, I will hear the Senator.

Mr. FRYE. For the last eight or ten years there has been a very strong pressure brought upon the Committee on Commerce to provide a deep-water harbor between the two points which are named in the resolution, between San Francisco and San Diego, there being no deep-water harbor in the whole district within the neighborhood of a thousand miles. A commission of Army engineers was appointed at the request of the committee, which made some investigation and submitted a report. There were two points, one Santa Monica and the other San Pedro. The railroad lines were all at San Pedro, with a large investment of money. Santa Monica was a point nearer to Los Angeles, and to some seemed the better point.

An examination of the report of the engineers shows that, while they determined in favor of San Pedro, it was not decisive action on their part. The matter came again before the committee. In the mean time I had been over on the Pacific coast myself, and had investigated, with all the care I could, these two points, and had come to the conclusion that Santa Monica was very much the better place for a deep-water harbor than San Pedro.

The result was, when the matter came before the committee, the committee was again divided, and nothing was done. We finally had a commission of five engineers appointed to make the examination. They made the examination, and they united in a report in favor of San Pedro, but still, on reading the report, it is not, in my judgment, decisive.

The construction of this deep-water harbor will cost the United States three million dollars. It is of the utmost importance that it shall be located at the right place, that no mistake shall be made. I felt that it was my duty to the United States to urge upon the Committee on Commerce that a committee should go over there and investigate that matter with care. My judgment is that the testimony of all the employés of the Coast Survey should be taken on this question; that the testimony of ship-owners and ship-sailors should be taken. I believe that if the committee does investigate, it will report unanimously that Santa Monica is the point at which this deep-water harbor should be located.

Only three weeks ago there was a tremendous storm on the Pacific coast and every vessel was compelled to leave San Pedro, and yet, though it was the prevailing storm from the southwest, at Santa Monica there was not the slightest disturbance whatever.

There is another thing. I said the railroads all centered at San Pedro and owned property there. The Southern Pacific Railroad Company had an enormous investment at San Pedro of about a million dollars. Within the last two years the Southern Pacific Railroad Company has deliberately deserted its investment at San Pedro, has gone up to Santa Monica, and has spent several hundred thousand dollars in building a wharf there. There are practical men who have examined into this matter and determined to sacrifice several hundred thousand dollars at San Pedro, who have gone and located their harbor up at Santa Monica. I think it is the duty of the United States to investigate this matter with care before an appropriation of $3,000,000 is made for a deep-water harbor on the Pacific coast.

Another thing, the Committee on Commerce reported and the Senate passed a bill looking to the building of a canal from Lake Washington to Puget Sound, which will cost another $3,000,000. My judgment was then and is now that the necessities of commerce will not require a dollar of that expenditure. I wish a subcommittee of the Committee on Commerce to investigate that matter and be able to report to the full committee at the next session of Congress whether or not an expenditure of two or three million dollars for the building of a canal from Lake Washington down to Puget Sound is in the interest of commerce.

I think this committee will save the United States two or three million dollars, and I think it will also prevent the United States from making a mistake in the investment of $4,000,000 more.

Mr. SHERMAN. Mr. President, it so happens that I have been at both these places, and there have been pointed out to me the advantages and disadvantages of both. It seems to me that it is a question of engineering rather than a question of Con-

gressional investigation. While it may be a pleasant journey for a committee of this body to visit these important points—for they are both important—I believe the opinion of engineers taken from the Army and the Navy—there are skilled men in both branches of the service—would be much more reliable for the action of Congress than an examination conducted by five or six Senators. Still, I have no objection to letting the resolution go over until to-morrow so that Senators may look at it.

I suppose it is understood that the engineers have agreed that San Pedro is the better point. It is a projecting point in the Pacific Ocean. My own observations would perhaps lead me to think that Santa Monica was a better point, although I have never been inside the bay of Santa Monica, but I passed by it two or three times.

I think the resolution had better go over. If we see proper to have a committee of Senators appointed, let there also be attached to it engineer officers to look over the ground at the same time, and to give information and advice, so that we may have the benefit of their experience in the investigation by a Congressional committee, as this is a mere engineering project.

Mr. FRYE. Mr. President, the Committee on Commerce has been considering this subject for quite a number of years and has given a great deal of care and study to the question, because it is admitted by them that a deep-water harbor must be had between San Francisco and San Diego. It must be had between these two points. Has the Senator from Ohio read the reports of the Army engineers?

Mr. SHERMAN. I have not. I have not given the subject any particular investigation beyond what I heard at the time at these places. I was taken by the citizens of the city——

Mr. FRYE. Of Los Angeles?

Mr. SHERMAN. No. I mean up in Puget Sound. I then visited that point, and also visited the one at Los Angeles.

San Pedro is a point jutting out about 25 miles, if I remember, from Los Angeles. Santa Monica, however, is a bay which runs in 13 or 14 miles. In that respect Santa Monica is clearly the better place, because it is protected by a projecting point. But at the same time this is purely a question of engineering, and if a Congressional committee is sent there, there ought to be sent with it, by the Secretary of War and the Secretary of the Navy, skilled officers to examine the ground and give the committee the benefit of what information they can get. So far as I know the reports of the engineers have been in favor of San Pedro all along. As the Senator himself said, the last report made by five Army engineers was in favor of San Pedro.

I think, therefore, if there is to be a commission appointed, it ought to be well organized and composed of all branches of the service, including members of the Committee on Commerce and Army and Navy engineers. Then we may secure information upon which we can rely and can act.

Mr. FRYE. Mr. President, we have all the information now that the Army engineers can give us. If the Senator will take the pains to read the two reports which have been made by them, he will find that on almost every question there is a balance in their minds, that they leave the question in uncertainty, although their ultimate conclusion is in favor of San Pedro.

Again, the Senator misunderstands what I ask. I am not asking for a committee to go out there and locate. I am asking a committee to take the testimony, which Army engineers never will take.

I want the testimony of the Coast Survey men, who know every inch of that coast from San Francisco to San Diego. They never have had an opportunity to testify in relation to this question. I want their testimony taken as to the advantage of the one place over the other. I want to know the reasons why the Southern Pacific Railroad Company sacrificed a million dollars in one place and expended a million dollars in another. I want to know from the engineer of the Southern Pacific Railroad Company what his reasons were for ordering that change. I understand he says that the bottom of the ocean at San Pedro is made of shale and that it is utterly impossible to have an anchorage ground there. If that be true, the Army engineers did not study the ocean bottom there at all. They only took a general view of it. The same improvement precisely is to be made at each place—a breakwater. They made no investigation of that.

I understand that the thing now, after these reports, is left in doubt; it is in my mind. I looked at both of them with a great deal of care, and I made up my mind in favor of Santa Monica. I wish these people to go out and take all the testimony that can be taken there and nowhere else. The Army engineers are right here, and we can call them before us any day when the testimony comes in, and the committee would do it.

I wish to say, so far as I am concerned, that I am excluded from being a member of the committee. My mind is fully and very definitely made up as to which is the better point, and unless the committee can find testimony which indicates very strongly that San Pedro is the better point, I shall still adhere, notwithstanding the Army engineers, to Santa Monica. I am not going with the committee myself, but I have seen the necessity and importance of this work. If the Senator from Ohio had been on the Committee on Commerce, and if he had seen and known the action of the Committee on Commerce in certain directions and the danger of the action of the United States Senate in certain other directions, he, in the interest of the United States, would favor a committee going out there, and not only examining into this question, but examining as to the other question at Lake Washington.

The Senate passed that once as a proposition to appropriate $250,000 or $300,000 for commencing the canal at Lake Washington. The committee reported it. The committee have not been on the ground. I want the five members of the committee—that was my resolution offered here, and I so limited it, for I did not want the United States to be put to any larger expense—to be selected here, to go out and investigate this question, and then report to us as a committee the testimony which they take and their conclusions from it. I assure the Senator from Ohio that it would be a saving to the United States infinitely greater than the cost of the expedition.

Mr. SHERMAN. Let the resolution go over until to-morrow.

The VICE-PRESIDENT. Objection being interposed, the resolution will go over under the rule.

REPORTS OF CITIZENS' NATIONAL BANK OF WASHINGTON.

Mr. CHANDLER. I offer a resolution, which may go over if any Senator objects to it, but, if not, I shall ask for its present consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Secretary of the Treasury be, and he is hereby, directed to transmit to the Senate copies of all reports of the Citizens' National Bank of Washington, D. C., from 1875 to 1882, inclusive, and of any reports that may have been made by the bank examiners as to the condition of the said bank during that period.

Mr. GORMAN. Let the resolution go over.

The VICE-PRESIDENT. Being objected to, the resolution goes over under the rule.

COMMITTEE ON CIVIL SERVICE AND RETRENCHMENT.

Mr. CALL submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Civil Service and Retrenchment be, and is hereby, directed to sit during the recess of Congress, either as an entire committee or as a subcommittee, to examine and investigate the civil service of the United States, and report by bill or otherwise the legislation proper for its reformation or change, and shall have power to send for and examine persons and papers, to employ a stenographer, and to have its expenses paid from the contingent fund of the Senate.

COMMITTEE MEMBERSHIP.

Mr. CALL. I desire to bring before the Senate a resolution which I offered some time since, proposing to enlarge the leading committees of the Senate. Inasmuch as the pending question of privilege has precedence all the time, I should be very glad either now or to-morrow to have unanimous consent of the Senate to consider that resolution, so that I may make some observations upon it. I suggest to Senators that to-morrow, by unanimous consent, I may be permitted to call up the resolution and to submit my observations upon it.

Mr. HAWLEY. I did not hear the remarks of the Senator. Does he refer to the resolution which has just been read?

Mr. CALL. I do not. I refer to a resolution proposing to enlarge the leading committees of the Senate.

Mr. GORMAN. If the Senator requests unanimous consent to take up the resolution and have a vote upon it, I shall object; but if the Senator desires to call up the resolution to submit remarks upon it, as a matter of course there will be no objection.

Mr. CALL. I shall ask the leave in the morning, then, to submit some observations upon the resolution, and I shall endeavor to obtain a vote upon it as soon as it can be had.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Florida?

Mr. HOAR. What is the request?

Mr. CALL. The request, I will say to the Senator from Massachusetts, is, that as a privileged question is before the Senate, which has precedence, I may have unanimous consent to submit some observations upon the subject of the resolution to enlarge the leading committees of the Senate to-morrow at the opening of the Senate.

The VICE-PRESIDENT. The Chair hears no objection to the request of the Senator from Florida.

Mr. VANCE. I now renew my motion that the Senate proceed to the consideration of executive business.

Mr. HOAR. Will the Senator withdraw the motion for one moment?

Mr. VANCE. I withdraw it.

Mr. HOAR. I had myself given notice that I desired to address the Senate on the resolution in relation to the election of Senators by the people, and had proposed to do so this morning. I did not call up the resolution this morning, because I found it was the desire of Senators who were prepared to speak on the pending question to proceed, and I deferred to them. I then proposed to call up the resolution to-morrow morning in pursuance of the notice I gave the other day, but I find the Senator from Kansas [Mr. PEFFER] preferred, as was very proper, to address the Senate at the opening of the Senate to-morrow morning. So I gave way and postponed my application out of deference to him. I should like at some time convenient to the Senate to discuss that question.

Mr. CALL. I shall be very glad to give way to the Senator from Massachusetts to-morrow if he desires to proceed. I presume the Senator from Kansas [Mr. PEFFER] will have no objection to delaying his discussion of the pending question for a short time.

EXECUTIVE SESSION.

Mr. VANCE. Once more, and for the last time, I make an effort to renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 3 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Thursday, April 6, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 5, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

James S. Ewing, of Illinois, to be envoy extraordinary and minister plenipotentiary of the United States to Belgium, vice Edwin H. Terrell, resigned.

CONSULS-GENERAL.

Thomas T. Crittenden, of Missouri, to be consul-general of the United States at the City of Mexico, vice Richard Guenther, resigned.

William T. Townes, of Virginia, to be consul-general of the United States at Rio de Janeiro, vice Oliver H. Dockery, recalled.

SURVEYOR OF CUSTOMS.

William M. Maize, of Ohio, to be surveyor of customs for the port of Columbus, in the State of Ohio, to succeed Frank E. Hayden, whose term of office has expired by limitation.

TERRITORIAL GOVERNORS.

Louis C. Hughes, of Tucson, Ariz., to be governor of Arizona, vice Nathan O. Murphy, removed.

William T. Thornton, of Santa Fe, N. Mex., to be governor of New Mexico, vice L. Bradford Prince, term expired.

WITHDRAWAL.

Executive nomination withdrawn from the Senate April 5, 1893.

William T. Townes, to be consul to Rio de Janeiro.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 5, 1893.

SOLICITOR OF THE TREASURY.

Felix A. Reeve, of Tennessee, to be Solicitor of the Treasury.

DISTRICT JUDGE.

William H. Seaman, of Wisconsin, to be United States district judge for the eastern district of Wisconsin.

PROMOTIONS IN THE NAVY.

Medical Inspector John H. Clark, to be a medical director.

Surgeon James M. Flint, to be a medical inspector.

Passed Assistant Surgeon Nelson H. Drake, to be a surgeon.

Ensign Joseph H. Rohrbacher, to be a lieutenant (junior grade).

UNITED STATES MARSHAL.

James Blackburn, of Kentucky, to be marshal of the United States for the district of Kentucky.

REGISTER OF THE LAND OFFICE.

Robert E. Wilson, of Jackson, Miss., to be register of the land office at Jackson, Miss.

UNITED STATES ATTORNEY.

Ezra W. Miller, of South Dakota, to be attorney of the United States for the district of South Dakota.

COLLECTOR OF CUSTOMS.

William P. Thompson, of Maine, to be collector of customs for the district of Belfast, in the State of Maine.

POSTMASTERS.

Mrs. Amelia H. Bates, to be postmaster at Sonoma, in the county of Sonoma and State of California.

Frank D. Hoy, to be postmaster at Point Pleasant, in the county of Mason and State of West Virginia.

Executive nomination confirmed by the Senate April 5, 1893.

SUPERINTENDENT OF IMMIGRATION.

Herman Stump, of Maryland, to be Superintendent of Immigration.

THURSDAY, *April 6, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

OFFICERS OF THE SENATE.

Mr. GORMAN. Mr. President, before we proceed with any other business I desire to call up the resolutions I introduced some time since in relation to the election of officers of the Senate. I call up the resolutions printed as Miscellaneous Document No. 22, and I offer a substitute for the second resolution.

The VICE-PRESIDENT. The resolutions will be read.

The Secretary read the resolutions submitted by Mr. GORMAN March 28, 1893, as follows:

Resolved, That the Senate do now proceed to the election of its Secretary, Sergeant-at-Arms and Doorkeeper, and Chaplain.

Resolved, That the officers to be elected as aforesaid shall, unless said offices become vacant in the meanwhile by death, resignation, or otherwise, only enter upon the discharge of their duties on the 30th day of June next, being the end of the present fiscal year, and the present incumbents of said offices as aforesaid shall continue to be the incumbents thereof and exercise the duties of their respective offices until the end of the present fiscal year, as aforesaid, when the officers to be elected as hereinabove provided shall, as hereinabove stated, enter upon the discharge of their duties.

Mr. GORMAN. I submit as a substitute for the second resolution, being in a different form, what I send to the desk.

The VICE-PRESIDENT. The Senator from Maryland submits a substitute, which will be read.

The Secretary read as follows:

Resolved, That the Senate do now proceed to the election of its Secretary, Sergeant-at-Arms and Doorkeeper, and Chaplain.

Resolved, That the officers to be elected as aforesaid shall, unless said offices become vacant in the meanwhile by death, resignation, or otherwise, only enter upon the discharge of their duties on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session, and the present incumbents of said offices as aforesaid shall continue to be the incumbents thereof and exercise the duties of their respective offices until the said first day of the meeting of the Fifty-third Congress, as aforesaid, when the officers to be elected as hereinabove provided shall, as hereinabove stated, enter upon the discharge of their duties.

Mr. HOAR. I should like to inquire of the Senator from Maryland what he means by the term "by death, resignation, or otherwise." Does he presume that one of these officers may decline to accept?

Mr. PALMER. In answer to the Senator from Massachusetts, I will state that I think logically the Senator from Maryland should fill the vacancy. [Laughter.]

Mr. RANSOM. The Committee on Privileges and Elections should be able to answer the question of the Senator from Massachusetts.

Mr. GORMAN. It applies to the existing officers, who have been already elected.

Mr. CHANDLER. I rise to a question of order.

Mr. HOAR. I suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Massachusetts suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Davis,	Kyle,	Power,
Bate,	Dolph,	Lindsay,	Ransom,
Berry,	Faulkner,	McPherson,	Roach,
Caffery,	Gallinger,	Martin,	Sherman,
Call,	Gorman,	Mills,	Smith,
Cameron,	Harris,	Mitchell, Wis.	Stockbridge,
Carey,	Higgins,	Morrill,	Turpie,
Chandler,	Hill,	Murphy,	Vance,
Cockrell,	Hoar,	Palmer,	Vest,
Coke,	Hunton,	Pasco,	Washburn,
Colquitt,	Jones, Ark.	Peffer,	White, La.
Cullom,	Jones, Nev.	Platt,	

The VICE-PRESIDENT. Forty-seven Senators have answered to their names. A quorum is present.

Mr. CULLOM. And the question is on the resolutions.

The VICE-PRESIDENT. The Chair did not hear the remark of the Senator from Illinois.

Mr. CULLOM. I simply suggested that the vote will now be taken on the resolutions submitted by the Senator from Maryland.

Mr. GORMAN. I ask that the Secretary may read the resolutions again. I have amended the second resolution by striking out the words to which the Senator from Massachusetts called attention.

The VICE-PRESIDENT. The resolutions will be read as modified.

The Secretary read the resolutions as modified, as follows:

Resolved, That the Senate do now proceed to the election of its Secretary, Sergeant-at-Arms and Doorkeeper, and Chaplain.

Resolved, That the officers to be elected, as aforesaid, shall, unless said offices become vacant in the meanwhile, only enter upon the discharge of their duties on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session; and the present incumbents of said offices, as aforesaid, shall continue to be the incumbents thereof and exercise the duties of their respective offices until the said first day of the meeting of the Fifty-third Congress, as aforesaid, when the officers to be elected as hereinabove provided shall, as hereinabove stated, enter upon the discharge of their duties.

Mr. SHERMAN. I am in favor of the disposition of the matter suggested in the resolutions, and I believe the Senate will be in favor of it. I think it is much better and much more dignified and proper in every way that the Senate should proceed in an orderly manner without haste in the change of its officers. The change would naturally come at the regular meeting of Congress; but I suggest to the Senator from Maryland, as the resolutions have been introduced without any knowledge on this side of the Chamber, whether they had not better be postponed until Monday, when the order can be executed, and on Monday the election of these officers can take place. There are many Republican Senators who do not happen to be present this morning. I ask, therefore, that the resolutions may go over until Monday, not that I expect any resistance to their adoption, but I think it would be fair that the Senate should know when the election is to take place.

Mr. GORMAN. Mr. President, I confess my amazement at the statement of the Senator from Ohio that there was no knowledge on the other side of the Chamber as to the introduction of the resolutions.

Mr. SHERMAN. The resolutions have been introduced today. I did not know myself that they would be introduced.

Mr. GORMAN. Of course if the Senator desires the resolutions to go over until to-morrow there is no objection to that course, but it is the universal conviction of the Senate that the majority should control in this matter. There has always been a radical difference of opinion on the subject; at least the minority, no matter of what party in the body, has always heretofore contended against a change of officers except at the beginning of a Congress, whether it be in July, September, or December. While there has been a very great desire to move along in an orderly way and not have an unseemly squabble here, the modification of the resolutions I had a right to believe would meet with the universal approval of the Senate without regard to party. I confess I am amazed that the Senator from Ohio should state that his colleagues on the other side were not aware of the intention to so modify the resolutions.

Mr. SHERMAN. I wish to say that while this matter has been the subject of conversation between Senators, I was not notified or advised that the resolutions were to be introduced to-day. I have no special desire on the subject, but the Senator from Nebraska [Mr. MANDERSON], who was for a long time Presiding Officer of the Senate and is more familiar with this matter, is not here, and I suggest whether on the whole it would not be better to defer action on the resolutions. I presume the Senator from Nebraska has been fully advised.

Mr. GORMAN. I will take pleasure in waiting until the Senator from Nebraska returns to the Chamber; but he is as well informed of the action proposed as I am.

Mr. SHERMAN. If the Senator is satisfied, I have no objection to the informal action being taken to-day, but I suggest to him whether in the absence of many Senators it would not be better to let the resolutions go over until Monday. However, it is a matter of absolute indifference to me. I shall vote for the resolutions.

Mr. GORMAN. I will say to the Senator from Ohio that there can not be any question about the Senator from Nebraska understanding this matter. I will agree to postpone action until later in the day, but I state to the Senator frankly that we are exceedingly anxious (at least I am: I speak for myself, but I think I voice the sentiments of every other Senator) to get through with the business of the present session. Quite a number of Senators want to go away. I have postponed this matter at the suggestion of gentlemen on the other side of the Chamber that they might have time. I have postponed it one week.

Mr. CHANDLER. If I may interrupt the Senator, I think that the only hesitation on this side of the Chamber grows out of the absence of the Senator from Nebraska [Mr. MANDERSON]. I ask the Senator whether the understanding between him and the Senator from Nebraska is perfect.

Mr. GORMAN. I have no objection to withholding action on the resolutions for the present. The Senator from Nebraska will be here during the day or to-morrow. I will agree to let the resolutions go over, and he can speak for himself.

Mr. HOAR. I think if the Senator will let the resolution go over until to-morrow, or say until 3 o'clock this afternoon, there may be some Senators on this side of the Chamber who would like to record their votes at the election, who did not suppose, as I did not know myself, that the matter was coming up at this time, though I supposed something of the sort would come up at some time from what I had heard. If the Senator will let it stand perhaps the Senate will be full this afternoon.

Mr. GORMAN. I will let the matter stand until to-morrow and call it up then.

Mr. WASHBURN. Say until 2 o'clock to-day. The Senator from Nebraska will be here very soon.

Mr. GORMAN. Very well; I will let the matter stand until 2 o'clock.

The VICE-PRESIDENT. Without objection that will be the order of the Senate.

ADMISSION OF TERRITORIES.

Mr. CAREY, from the Committee on Territories, reported the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Territories, or any subcommittee thereof appointed for the purpose, are hereby authorized during the recess of Congress to visit the Territories of New Mexico, Arizona, Utah, and Oklahoma for the purpose of obtaining information with regard to the resources, population, and condition of said Territories, and as to the propriety of the admission of the same as States, and that the expenses of said committee be paid out of the contingent fund of the Senate.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR], from the Committee on Privileges and Elections. It will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

Mr. PEFFER. Mr. President, it was not my intention originally to take part in this discussion, and it was only yesterday that, having listened to the remarkable speech of my excellent neighbor from New Hampshire [Mr. CHANDLER], and to the comments upon it during the course of its delivery, I felt it incumbent upon me to ask the indulgence of the Senate while very briefly, and lamely perhaps, I shall, to a large extent extemporaneously, express my views upon the pending question.

It is charged that those of us who are opposed to the resolution take a narrow view of the subject involved, and that we are disposed to construe the Constitution narrowly, while those who favor the resolution take a liberal and an enlarged view of the subject before us, and that they favor a liberal construction of the Constitution.

Mr. President, a narrow construction in this case is a correct construction. There are two classes of objects to be attained by the active operation of the provisions of the Constitution. In one of those classes the subjects are general in their nature, as for example the subject of taxation, which implies necessarily the exercise of general powers because it is a general subject, and it leaves the selection of methods and the application of powers to the discretion of Congress.

So, too, in the matter of commerce, the people in adopting the Federal Constitution provided that Congress shall have power to regulate commerce with foreign nations and among the several States. This is a general purpose, not to regulate commerce in Massachusetts, or in Virginia, or Georgia, or Kansas, but in the whole country—necessarily a general object, and as necessarily implying the exercise of general powers involving the discretion of Congress. So, too, in the matter of coinage. Congress is invested with the power of coining money and regulating its value. That is another general object, a general purpose, and the Congress is necessarily vested with discretionary powers in providing for the execution of this grant of power.

But, Mr. President, when we come to the other class of objects—special objects, such as that which is brought to our attention by the pending resolution, then we find that the Congress is authorized to exercise only limited or special powers, and the particular officers or tribunals charged with the execution of these special powers have no discretion whatever.

In reference to the pending matter the Constitution uses the words "may" and "shall." The governor "may" make temporary appointments. The Legislature "shall" fill a vacancy.

I understand very well the construction given to the word "may" by the Senator from Wisconsin [Mr. VILAS] and other Senators upon the floor, that it is often construed "shall." That, however, happens only when there is some person or party, some third person, as the law books use it, interested who may by right call upon an officer or tribunal to exercise certain functions which the law says may be exercised when his rights are involved. Then these functions must be exercised if he asks that it shall be done.

Mr. President, I lay down this general proposition, that all agents must operate within the scope of their authority. That is a principle or proposition so well established in the law and in the jurisprudence of the country that it need not be elaborated. Its statement is sufficient, for the proposition is within itself self-evident. Agency can not exist without a principal. This is equally self-evident. Following these we have the other proposition—the agent has no authority whatever except what he derives from his principal. This rule applies to all public officers. It applies to every department of the Government, for it is so expressly stated in the Constitution:

All legislative powers herein granted shall be vested in a Congress.

The word "legislative" had a well-defined meaning at the time, broad and comprehensive; but whatever was involved in the words "legislative powers," such as were granted by the people should be vested in a Congress.

So, too, the words "executive" and "judicial" had well-defined meanings at the time, and the Convention which framed the instrument which we are now discussing in this Chamber used the words "executive power" and "judicial power," providing that "the executive power shall be vested in a President of the United States," and that "the judicial power of the United States shall be vested in one Supreme Court," and in such inferior tribunals as might be established from time to time, etc. Here are several grants of power from the principal, the people, to their agents, the Congress, the President, the Supreme Court, and the inferior tribunals.

Without going further into that subject let me call the attention of the Senate briefly to the effect of permitting officers of the law to set up their own judgment instead of the law. It would necessarily result in anarchy, endless confusion, the destruction of the Republic, indeed the destruction of all government. We had examples of this kind in my own State after we had adopted an amendment to our constitution, providing that there should be no intoxicating liquors manufactured or sold within the State except for certain purposes. After we had passed an act of the Legislature to enforce that provision it required some three to four years to teach the sheriffs and the jurors and judges that the will of the people as expressed by the law of the Legislature was the law of the State, and not the individual opinions of officials.

And, too, the agent must always be governed by the terms of the grant in which his authority is couched. If those terms be in writing, the writing is the evidence which must be used; if not in writing, then the next best evidence. In this case the Constitution of the United States is the charter containing the grant of authority to every department and to every officer and agent of the Federal Government.

In order that the language of the contract, if it may be so called, may be used in connection with the statement, I read from paragraph 2 of Article VI of the Constitution:

This Constitution, and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, anything in the constitution or laws of any State to the contrary notwithstanding.

Then in another clause, after enumerating the various powers conferred upon Congress, it is expressly stipulated that all other powers necessary to carry out the foregoing powers are hereby vested likewise in the Congress. I quote the language substantially.

I understand very well the nature of implied powers and their extent. Implied powers are to be exercised only in the carrying out of express grants of authority. That is the rule universally established by the courts, and ought to be always acted upon in practice. There is no room for doubt about the construction of these special powers, whether as to those expressly granted or as to those which are implied.

In addition to that, the tenth amendment of the Constitution, which, with the other nine preceding it, had been proposed by the First Congress of the United States, which met under the Constitution in 1789, and had been adopted by the Legislatures of the several States within a few months thereafter, provided that all powers not herein granted are reserved either to the States or to the people.

It seems to me that as to all powers which are granted by the Constitution, except only those of a general character to carry out a general object, must be strictly construed, and that the officer must follow the law as it is written.

In supplying the machinery to carry on the new Government the Constitution provides that—

The House of Representatives shall be composed of members chosen every second year by the people of the several States.

It also provides that—

The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

It further provides that judges, ambassadors, and other public ministers and consuls, and certain other officers referred to, are to be appointed by the joint action of the President and the Senate.

The powers of these separate departments are clearly and specifically pointed out by the language of the Constitution, so plainly, it seems to me, that except only in cases of the supremest emergency, where great peril is facing the people, where action must be prompt and decisive—something, I hope, which may never again occur in this country—there can be no question about the proper construction of the Constitution.

I believe, Mr. President, that there are times when the Constitution itself may be cast aside and the laws of the country may be cast aside; when there is nothing written either upon the earth, the heavens above the earth, or the waters beneath the earth, that may properly govern the conduct of men; that there is something in the heart and in the soul and in the make-up of men that at times they are privileged to strike without asking anybody's consent. But fortunately we are not brought face to face with such a condition or such a proposition at this time.

As to the representation of the people of the several States in the Senate, the manner in which it was brought about, and the language in which the power and the privilege are couched, show, as well as the nature of the conditions and surrounding circumstances under which the work was done, that it is a reservation of a right, a reservation upon the part of the States that they may be, indeed that they shall be, represented in the Senate of the United States.

The theory that this requires a constant presence in the Senate of two Senators from each State can not be true, for the reason that the fact that the provision was entered and finally adopted in the Constitution turned upon the question as to whether a State should have one vote by its two Senators, or whether those two gentlemen should act as individuals representing their particular States. So the Constitution provides that the Senate "shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote."

It was announced in the Federal Convention by a delegate from Delaware, if my memory serves me, that unless the small States should be entitled in the new Senate to be established to representation equal with the larger States there could be no Constitution, that the old Confederation then existing would be abolished, and that the smaller States would lean upon the arm of some foreign power which would have more honor than their immediate associates. Upon this very question the Convention became excited in its deliberations, and many heated words were passed from mouth to mouth by the sages of that body.

The point I wish to present in this particular portion of my argument is that as to the representation of the States in this body it is the State and not the nation that is advantaged; it is the State's business and for the State's benefit, and not the business of the nation and for the nation's benefit. So when we come to the matter of choosing Senators to represent the several States it is the business of the State to take care of it, and not the business of the Senate of the United States.

From the language of the Constitution it is evident, and especially so when we consider it in connection with the surrounding circumstances and contemporaneous history, that the State is primarily interested, and therefore the State Legislature is the body which must primarily choose the Senators, for it must be remembered that the Convention which framed the Constitution was made up of delegates from the several States, every one of which at that time, and very properly so, regarded itself as a sovereign and independent political body. They did not call themselves nations; they called themselves States. But, nevertheless, they had surrendered none of their sovereign powers, which it was conceded that they enjoyed and were of right entitled to enjoy by the treaty with George III. As finally agreed upon the language is a compromise, and it is as clear as it is forcible.

Now we come to the matter of appointment. I do not think the question here necessarily involves a construction of the words "vacancy" and "happening," but simply requires that we

shall follow the plain words of the contract out of which this agency arises. Yesterday, while the Senator from New Hampshire [Mr. CHANDLER] was addressing the Senate, I asked him a question which appears in this morning's RECORD, and the Senator very kindly and courteously, as he always does, answered it. I will ask the Secretary to read the question and answer.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Mr. PEFFER. Mr. President, the Senator from New Hampshire is speaking of the primary authority of the Legislature to choose Senators. I wish to ask a question at that point in order that the thought may be in a fitting place. My question is, in case the first Legislatures of the several States which were convened after the adoption of the Federal Constitution had failed to choose two Senators, which they were required and expected to choose by the provisions of the Constitution, whether the governor would have been authorized to appoint two Senators to fill those alleged vacancies?

Then, when the Senator answers that question, if he answers it in the affirmative, I should like to ask him the further question, so as to get the whole question in issue at once, whether, in case two vacancies should now happen, and if the Legislature which meets after the happening of those vacancies should neglect from any cause to fill the vacancy, the governor would then have the authority to make two appointments, one of them being for a new term and the other to fill a continuing term?

Mr. CHANDLER. If the Senator had listened to me attentively he would have noticed that I had already answered his last question in the affirmative. I do believe, and I do not shrink from the conclusion, that under a proper construction of this clause giving governors of States the power to make appointments—a construction to carry out the beneficent object of the clause, made liberal for that purpose—if the governor makes an appointment and the Legislature meets and does not fill the office, a vacancy again happens, because when the Senate meets the office is certainly empty. Therefore I answer that question in the affirmative.

The Senator from Kansas asks me to go back a hundred years and tell him what right I think the governors of the States would have had to start this Government when it originated, in case the Legislatures of the thirteen States had refused to send Senators. The Constitution evidently contemplated that the Legislatures would send Senators, that they should be classified, and that if after they were classified vacancies happened, and the Legislatures did not fill the vacancies, the governors should fill them. I can not undertake to say to the Senator whether, if I had been here a hundred years ago, elected by a Legislature, and the attempt had been made to fill all the other seats in the Senate by gubernatorial appointments, I should have been in favor of starting the Government in that way.

But, Mr. President, I am surprised that the Senator should wish to go back a hundred years. He is the apostle of new ideas; he comes here full of new constructions of the Constitution and in favor of exerting the powers of the National Government to an extent that never yet has been dreamed of, and yet we find him, with all these new and liberal, and it is to be supposed popular and beneficial, ideas concerning the construction of the Constitution, going back, I am afraid, to a very narrow and contracted and illiberal construction of the Constitution on the point now under discussion. I am sorry to see such a manifestation on the part of my friend the Senator from Kansas.

Mr. PEFFER. Mr. President, I do not desire to carry the Senator from New Hampshire back a hundred years, nor do I desire to carry the country back a hundred years, nor am I urging before this body, so far as I am aware, any new ideas. If what I have said at any time should appear to the Senator or to the Senate in that coloring, my reply is that I am trying not to make a narrow and strained construction of the Constitution in order to fit ideas, but I am simply trying to convince Senators and my fellow-men generally that the Constitution of the United States as to all these alleged new ideas, as they are called, in reference to transportation, money, etc., is abundantly large, abundantly full, abundantly adequate, when fairly and properly construed, to include all those things which I ask.

But, referring to the century idea of my amiable friend, I ask the Senator to take the Constitution just as it stands. Let me read it, and then we shall see whether it is necessary to go back a hundred years or not. This is the language of the instrument, and I ask the attention of the Senator from New Hampshire not so particularly to the language of the Constitution as to the thought which may follow it. The Constitution reads:

Immediately after they [the Senators] shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year.

I do not ask the Senator from New Hampshire to go back and consider the means which were devised in order to set the new Government in motion, but I call his attention to what the actual fact was, and then I ask him this question: whether or not, in his opinion, if the Legislatures, which were specially charged with the election of the first Senators under the Constitution, had failed or refused to so elect their Senatorial representatives, the governor would have been authorized to appoint Senators, and the Senator from New Hampshire evades the question in the language which has been read.

Mr. President, it is not necessary, in order to elucidate the idea involved in my question, that we go back one year. We may go ahead one year, when I hope we shall have at least four new States knocking at the doors of Congress for admission. I will take one of those cases, for example, say the Indian Territory, when it is organized into statehood and the Legislature of the new State, whatever the name may be, should fail or neglect from any cause, I care not what, to elect Senators to represent them in this body, will the Senator from New Hampshire assume to say that in that case the governor of the new State would be authorized to appoint two Senators, and have them assigned to the separate classes when they should come up here? I do not believe the Senator will hold to such a doctrine.

Mr. PLATT. Will the Senator permit me there?

Mr. PEFFER. Yes, sir.

Mr. PLATT. It would be utterly impossible in that case to comply with the provision of the Constitution, which requires that Senators should be classified. The governor would appoint two Senators to hold until the next session of the Legislature, which would be only two years off, and in drawing for seats neither of the appointed Senators could draw a term of more than two years.

Mr. HOAR. I should like, if the Senator from Kansas will pardon me, to observe, in answer to my friend from Connecticut, that to whatever classes they belonged they would draw for themselves and their successors. It might as well, it seems to me, with great deference to my friend, be said that when the Senators who first come in draw for two or four years that drawing does not affect the classification of their successors. When once made as to the individual it applies to him and his successors for all time.

Mr. PLATT. And yet the fact that the new Senators are to draw for terms, which may be six years, I think is conclusive that they are not to be appointments of a temporary character, only holding their office until the next session of the Legislature.

Mr. PEFFER. So, Mr. President, in either view of the case the situation is to that extent complicated, and is an additional reason why the governor would not, in my opinion, even consider whether he had any authority to appoint these two new Senators. From any point of view it can not be doubted that the governor has no authority in any such case.

In reference to the light in which the analytical mind and the clear perception of my distinguished friend from Indiana [Mr. TURPIE] viewed this question a few days ago, I differ with the Senator, with all due respect to his legal acumen, which I most cheerfully grant and concede, for I have been acquainted with the Senator many, many years. I do not believe that the word "vacancy" has any reference to the classification of Senators, except possibly in an incidental way, for it relates only to a vacancy happening in the term for which a Senator is chosen, not appointed, no matter to what class he belongs.

Take this book which I hold in my hand and you will see, through the labor of our Secretary, the classification of the Senators from the beginning of the First Congress down to the end of the Fifty-second Congress, and you will find a regular line of classification. During the period of time elapsing between the meeting of the First Congress and, so far as I am informed, to about the year 1825, there was no suggestion such as the Senator from Indiana makes connecting this classification and the vacancy. First:

The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

In connection with that:

Immediately after they shall be assembled in consequence of the first election—

Here is something that is mandatory upon the Senate by way of getting the classification started, so as to make the Senate of the United States a continuing body from year to year and from session to session, so that it shall never be out of existence; there shall always be two-thirds, or about two-thirds, of the members of the Senate actually in office. After they have assembled the first thing that they do shall be to classify themselves; and the classification was made, as every Senator who is familiar with the record remembers distinctly.

Now, "if vacancies happen." Suppose that we use this word "vacancy" in the connection that the Senator from Indiana uses it, how does it change the situation? What difference can it make in any substantial respect as to whether we use it as to the classification or whether we use it as to the term? But it seems to me that the more forcible, the more natural and logical way of construing the sentence is that if vacancies shall happen in the six-year term for which the Senator shall have been chosen, in that case if the vacancies happen during the recess of the Legislature the governor may make temporary appointments, to continue until the next meeting of the Legislature, when that body "shall then fill such vacancies."

That, in connection with the thought presented a moment ago as to the failure to choose new Senators, to my mind makes it perfectly clear that it is necessary that the governor shall not be clothed with power to appoint except only in cases of vacancies in terms which happen during the recess of the Legislature, because otherwise there could be no sense in the language of the

Constitution. If the construction put upon it by Senators upon the other side of this question be the correct one, then the governor of a new State, in case the Legislature shall have failed or refused to choose Senators, is authorized to appoint, and there is no need of the Legislature interfering in the matter at all.

All that would be necessary to do in order to perpetuate the appointing power of the governor would be for a few men, where they might chance to hold the balance of power in one party or another party or in the commingling of all parties, to have an agreement with the governor that "in case I prevent a choice by the Legislature you will appoint Mr. Smith or Mr. Brown Senator." That can be done by a revolving process which has come to be so well understood in modern politics that it would be a very easy thing to do. We now have three cases upon our hands which would illustrate the point were it not for the fact that we do not charge anything of that kind; it would not be very respectful to do so, and I do not pretend to do it. I only say that, in order to continue the appointing power of the governor in such a case, one man need but to have the power to prevent an election at his fingers' ends.

It is better, Mr. President, and it is always safe to be right, and it is always safe and it is always better for an officer to follow the law, to follow the charter which conveys to him all the authority he has.

Then, as to a vacancy happening "by resignation, or otherwise," I want to make one single observation in reference to that matter. I do not see the Senator from Massachusetts [Mr. HOAR] in his seat. That learned and able Senator suggested that the use of the word "resignation" in the Constitution, the word that we are construing in this discussion, may possibly have been intended to grant authority to Senators to resign their seats, as if it had been the custom in this country in the days prior to the Federal Convention to prevent public officers from resigning.

Not only was such a practice not common, but the reverse was true. A large number of members of the Continental Congress resigned their seats in that body. I asked our most excellent Secretary how many of the members of the first Senate, and the second Senate, and the third Senate had resigned their seats, and he has given me a list of the Senators who resigned during the terms of the First, Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, and Ninth Congresses.

I find in the First Congress one Senator resigned; in the Second Congress three; in the Third Congress two; in the Fourth Congress ten; in the Fifth Congress nine; in the Sixth Congress six; in the Seventh Congress seven; in the Eighth Congress seven, and in the Ninth Congress four; but I have been unable to find anywhere any reference to a possible prohibition derived from custom which would prevent Senators from resigning their seats in this body, nor in any of the contested-election cases in the Senate which occurred during the years following, at any rate for the period of thirty or forty years, so far as I am aware, can any trace of even such a suggestion be found.

Mr. President, there is no personal feeling in this matter. So far as I am personally concerned, until two of the gentlemen claiming seats came to this city within the last thirty days or thereabouts, I had no acquaintance with them. All that I know of them is to their credit. As to the gentleman coming from the State of Washington, who claims to be a Senator in this body, Mr. Allen, I have been personally acquainted with him about two years. I have served with him on one of the important committees of the Senate, the Committee on Claims, and have met him many, many times. I have for him the warmest affection. I know of no member of the body whom I esteem more highly than I do the former Senator from Washington.

I should be pleased on account of my personal feeling in that respect to vote "yea" upon this resolution; but, Mr. President, it is always safe to be right. Neither in public nor in private life, when we are charged with responsible duties as agents, should we ever depart from the strict letter of the contract constituting our agency. No matter who shall go down, no matter who shall go up, it is the duty of a Senator to discharge his obligation under this contract, which he has solemnly sworn to support. Before God I do not believe that a governor of a State has any authority outside of the letter of the written contract. He may appoint when a vacancy occurs in a term during the recess of the Legislature; then, and then only, Mr. President.

There are certain broad and basic principles of the Constitution which authorize us at times to widen, to enlarge, the scope, if you please, of powers, and I read an enumeration of them:

> We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare.

These separate clauses are so many grants of authority to the Congress of the United States in the interest, not of the people of one State, nor of two States, nor of a dozen States, but the whole great Union, grown from thirteen States at that time to forty-four at this time, a territory nearly 3,000 miles long and half as many miles wide, populated by sixty-odd millions of active, earnest, industrious people.

As to these matters there are, because there can be, no State lines. "General welfare" means the welfare of all the people; the "justice" that is to be established is justice for the whole country; the "domestic tranquillity" is that which relates to the condition of all the people, and the "common defense" means the common defense of the great Republic. It is in such cases, and only such, that we are permitted to exercise discretionary powers as to what ought to be done under the particular circumstances.

As to the matter of the choosing of officers we ought always to get as nearly as possible to the people, and as members upon this floor know very well, I am in favor of the people choosing their Senators by a direct vote; but until that time comes let us follow the law.

Mr. PLATT. Mr. President, when the Senator from Kansas was suggesting that the position taken by the majority of the committee was so broad that it would involve the right of a governor to appoint Senators even on the admission of a new State if the Legislature failed to elect, I suggested that if such an appointment was made the Senators could not be classified in accordance with the Constitution. The Senator from Massachusetts took issue with me, and said that the Senators could draw for the term of themselves and their successors. I do not so read the Constitution. I did not have the Constitution in my hand at the time, and I wish to refer to it now.

This classification goes on, though it was first established when the first Senate was chosen, and so, for the purpose of determining whether the Senators who might be appointed by the governors at the time when the Senate was first established would draw for themselves and their successors, I wish to refer to the Constitution upon this subject. Suppose that one State had refused by a direct vote of its Legislature, which had the right to elect the first Senators, to send Senators here. Suppose that New York, or some State which accepted and ratified the Constitution with great difficulty, had so far changed its mind when the Legislature came together for the purpose of electing Senators as to declare by resolution that it would not be represented in the Senate, and suppose that the governor thereafter appointed two Senators to hold seats in the Senate until the next meeting of the Legislature of that State. The Senator from Massachusetts says they would have come here and been classified, so that they would have taken their terms not only for themselves, but for their successors. Let us see what the Constitution says on that subject:

> Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year.

Here would be two Senators in the case supposed appointed to hold until the next meeting of the Legislature of that State, and the Constitution, if they should be classified at all, would provide that if one of them happened to draw the six-year term the seat of that Senator should be vacated at the end of six years.

Mr. HOAR. The seats of Senators of that class.

Mr. PLATT. The seats of Senators of that class should be vacated. If he became a Senator of the third class his seat would be vacated, according to the Constitution, at the end of six years, and there is no escape from it.

Mr. President, this discussion would not be important, perhaps, if it were not that it illustrates to my mind the absurdity of the position that wherever or however a vacancy occurs the governor may fill it, because when a State is a member of the Union, when it is admitted to the Union, it has a right to representation here by our Constitution. It has a right by its own constitution to representation here. There is the office, and if a Senator is not elected according to the majority report the office is vacant, a vacancy has happened, and therefore the governor may fill it.

I submit, Mr. President, that no man can read the Constitution, the classification of Senators, the provision that the seats of Senators of the first, second, and third classes shall be vacated at the end of two years, four years, and six years, respectively, and for a moment believe that the Constitution ever intended that in case the Legislature in the first instance, when the State was first admitted, failed to elect, the governor might make the appointment until the next meeting of the Legislature.

REPORT ON COST OF MANUFACTURED PRODUCTS.

Mr. MCPHERSON. I ask that the pending matter be laid aside informally for a few moments in order that I may call up a resolution for consideration. I presume the discussion will be somewhat prolonged upon this subject.

Mr. HOAR. I was very desirous of going on at this time. What is the resolution to which the Senator refers?

Mr. McPHERSON. It is the resolution printed as Miscellaneous Document No. 12, the one that the Senator from Massachusetts asked to have laid over yesterday in my absence. It will take but a moment's time, I think, to dispose of it.

Mr. HOAR. Very well.

The PRESIDING OFFICER (Mr. JONES of Arkansas in the chair). The Senator from New Jersey asks unanimous consent that the pending resolution be laid aside informally for the purpose of taking up a resolution which will be read.

The Secretary read the resolution reported yesterday from the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That the Commissioner of Labor is hereby directed to make a report to the Senate at the opening of the Fifty-third Congress comprehending the facts already collected by him, or to be obtained from other sources, of the total cost, including all the elements thereof, and also actual labor cost, of producing various iron and steel products, such as bar iron, steel rails, and other articles of iron and steel, and also the leading articles of textile industry, and of such other articles for which the cost of production has been or may be approximately obtained, and in his report to state the facts in parallel columns for this and other countries from which they have been or may be obtained; and that the Committee on Finance, or any subcommittee thereof, is hereby authorized to make such further investigation in respect to the same matters as it shall deem important, and with power to summon and examine witnesses, to send for persons and papers, and to administer oaths; and the expenses of such investigations, when made by said Finance Committee, shall be paid out of the contingent fund of the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Jersey? The Chair hears none, and the resolution is before the Senate.

Mr. McPHERSON. In consideration of what was said by the Senator from Massachusetts when this subject was last before the Senate, it is due, I think, that I should make a single remark with respect to the questions raised by the Senator.

It will be remembered that there has been considerable controversy in the Senate touching the value of the reports made by the Commissioner of Labor and a general expression of opinion by many Senators that they were unable to understand them. I confess that on prior occasions I have myself somewhat criticised the Commissioner of Labor, but since the present session began I have spent considerable time with Chief Wright in that office, taking up the reports as made by the Commissioner of Labor, which are very voluminous, and I have undertaken to ascertain if I could the true solution of certain matters which had troubled me very much in the investigation. I find upon a careful investigation, with the Commissioner of Labor himself as an expert to guide me, that these works are scientifically correct. Yet at the same time it is very difficult for a layman, one who is not conversant with the scientific mode of treating the question, to ascertain exactly what the reports actually show, or to utilize them for present and immediate use.

Therefore, I went to the Commissioner of Labor and asked him if he would prepare a resolution that would enable him to put in parallel columns such information as he already had and such as he might be able to obtain between now and the meeting of Congress, so as to show the comparative cost of certain important articles in this country, notably iron and steel, the textile fabrics, etc. This resolution was prepared by the Commissioner of Labor and myself. It has been slightly amended by the Committee on Finance, which does not injure it or benefit it; and we have added a clause authorizing the Committee on Finance, if in the opinion of the committee it shall be necessary to make further investigation, to go on with the work.

Now, owing to the criticisms I have myself made heretofore upon the Commissioner of Labor, I want to say that I think this is a very valuable work, and if any Senator who desires information can have an expert at his elbow, he will find in the report all that he needs. But as it can be compiled by the Commissioner himself, and there can be placed upon a single sheet of paper almost all the information we want, about which there will be no controversy in the future, we think it infinitely wiser and better to do it, inasmuch as the cost will be very little. Therefore, I ask for the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

ELECTION OF SENATORS BY DIRECT VOTE OF THE PEOPLE.

Mr. HOAR. I ask that the pending matter may be informally laid aside and the Senate proceed to the consideration of the resolution introduced by me the other day in regard to the election of Senators by the people. I will state that if the Senate will give its consent to proceed with this matter I shall expect to yield the floor whenever the Senator from Maryland [Mr. GORMAN] desires to call up his resolutions for electing officers of the Senate.

The PRESIDING OFFICER. The Senator from Massachusetts asks unanimous consent that the pending order be laid aside for the purpose of calling up a resolution, which will be read.

The SECRETARY. A resolution by Mr. HOAR relative to the election of United States Senators by the people and against House joint resolution of the Fifty-second Congress providing for the same.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts? The Chair hears none, and the resolution is before the Senate.

Mr. HOAR. I ask that the resolution be read.

The PRESIDING OFFICER. The resolution will be read.

The Secretary read the resolution submitted by Mr. HOAR on the 3d instant, as follows:

Resolved, That it is inexpedient that the resolution sent to the Senate by the House of Representatives during the last Congress, providing for an amendment of the Constitution securing the election of Senators by the people of the several States, be adopted.

Such a method of election would essentially change the character of the Senate as conceived by the Convention that framed the Constitution and the people who adopted it.

It would transfer practically the selection of the members of this body from the Legislatures who are intrusted with all legislative powers of the States to bodies having no other responsibilities, whose election can not be regulated by law, whose members act by proxy, whose tenure of office is for a single day, whose votes and proceedings are not recorded, who act under no personal responsibility, whose mistakes, ordinarily, can only be corrected by the choice of Senators who do not represent the opinions concerning public measures and policies of the people who choose them.

It requires the substitution of pluralities for majorities in the election.

It will transfer the seat of political power in great States, now distributed evenly over their territory, to the great cities and masses of population.

It will create new temptations to fraud, corruption, and other illegal practices, and in close cases will give rise to numerous election contests which must tend seriously to weaken the confidence of the people in the Senate.

It will absolve the larger States from the constitutional obligation which secures the equal representation of all the States in the Senate by providing that no State shall be deprived of that equality without its consent.

It implies what the whole current of our history shows to be untrue, that the Senate has during the past century failed to meet the just expectations of the people, and that the State Legislatures have proved themselves unfit to be the depositaries of the power of electing Senators.

The reasons which require this change, if acted upon and carried to their logical result, will lead to the election by the direct popular vote, and by popular majorities, of the President and of the judiciary, and will compel the placing of these elections under complete national control.

It will result in the overthrow of the whole scheme of the Senate and, in the end, of the whole scheme of the national Constitution as designed and established by the framers of the Constitution and the people who adopted it.

[Mr. HOAR addressed the Senate, but not having concluded, his speech appears entire in the proceedings of April 7, 1893.]

Mr. GORMAN said (at 2 o'clock p. m.): Will it interfere with the Senator from Massachusetts now to call up the resolutions providing for the election of officers of the Senate, or would he prefer to have them withheld until a later period in the day?

Mr. HOAR. It is perfectly agreeable to me at any time the Senator pleases.

OFFICERS OF THE SENATE.

Mr. GORMAN. According to the agreement of the Senate by unanimous consent this morning, I trust that the resolutions for the election of officers of the Senate will be taken up.

The VICE-PRESIDENT. The resolutions submitted this morning by the Senator from Maryland [Mr. GORMAN] as modified will be read.

The Secretary read the resolutions as modified, as follows:

Resolved, That the Senate do now proceed to the election of its Secretary, Sergeant-at-Arms and Doorkeeper, and Chaplain.

Resolved, That the officers to be elected as aforesaid shall, unless said offices become vacant in the meanwhile, only enter upon the discharge of their duties on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session, and the present incumbents of said offices as aforesaid shall continue to be the incumbents thereof and exercise the duties of their respective offices until the said first day of the meeting of the Fifty-third Congress as aforesaid, when the officers to be elected as hereinabove provided shall, as hereinabove stated, enter upon the discharge of their duties.

Mr. MANDERSON. Mr. President, I regret exceedingly that duty elsewhere prevented me from being in the Senate during the early hours of to-day's session when the resolutions looking to a change in the officers of the Senate were presented in modified form by the Senator from Maryland and their consideration asked. The resolutions as modified are entirely satisfactory to me, and are also satisfactory, I understand, to my colleagues on this side of the aisle, composing now the minority of the Senate of the United States. The action proposed is in line, as to its results at least, with the traditions and the precedents of the Senate.

I desire simply to say that I think we can repudiate on both sides of the Chamber the suggestion that what little of contention there has been over this matter has been actuated by desire simply to retain or to obtain the patronage of the Senate and to hold men in place merely that they may receive the emoluments of office.

It has been suggested frequently of late, not only upon this floor but in the public press, that the precedents of the Senate

are that at no extraordinary session of the Senate has its official force, its clerical machinery, been changed, but that in all times past, sometimes after conflict more or less extended, the Sergeant-at-Arms and the Secretary of the Senate and the Chaplain, and in former times when the office was elective the Chief Clerk, have been changed only by the action of the Senate at an extraordinary or regular session of both Houses of Congress. Not that the claim has ever been made, not that the claim can now be successfully made, that it is not the right of the Senate to change its officers in whole or in part at any time, but this has been considered the fairer and the better method.

If we were to go back to the earlier days of the Senate we would find a condition of affairs existing and a course of action in this behalf that I think every fair-minded Senator will regret has ever been departed from. The time was when a political change of the Senate did not cause a change in its executive officers. Looking a moment since at the record of the past in this regard, I find that so far as the Secretaries of the Senate are concerned, that important office, so essential to the good conduct and the well-being of this body, was filled by but eight officials prior to the election nearly ten years ago of the present incumbent of the Secretaryship. The first four Secretaries filling the place, Mr. Otis, of Massachusetts; Mr. Cutts, of New Hampshire; Mr. Lowrie, of Pennsylvania, and Mr. Dickins, of North Carolina, occupied the station for seventy-two years of the one hundred and four years of the existence of this body; and I regret to say that probably the first departure from this most excellent civil-service method, when reform or change under that name was not needed, was by the party of which I am a humble member.

Mr. SHERMAN. Mr. Dickins was unable to perform the duties.

Mr. MANDERSON. It is true that Mr. Dickins, as is suggested, was unable physically in 1861 to perform the duties of the office, and Mr. John W. Forney succeeded him by the election of the Senate, but other officers were then changed.

But a new order of things has come, and we on this side of the Chamber recognize it fully and bow to the inevitable. We acknowledge not only the right but to a certain extent we recognize the political duty of the majority of this body to place in the position of Secretary of the Senate, Sergeant-at-Arms, and perhaps even of the gentleman who invokes the Divine blessing here in the morning, those who are in political accord with the majority of the Chamber.

During the last two years especially it has become a part of my special duty, I may suggest, to look as to the conduct of affairs by the officers of this body, and particularly at the desk of the Senate. I do not believe that it would be possible under any change that may or will come to obtain the services of a more diligent, competent, and effective force than that which has conducted the affairs of the United States Senate during the last eight or ten years; and I say this without designing to reflect in the least upon any who have preceded the present efficient Secretary of the Senate, Gen. McCook. I am glad to pay this tribute to him, not only because of a lifelong friendship and comradeship that has taught me a most earnest and hearty affection for him, but because, further, it is to his great credit that better than anything which can be said of him is the admitted fact that he has so faithfully and so acceptably performed the duties of his high place.

The Sergeant-at-Arms of this body is a citizen of the State I have the honor in part to represent, an efficient, able, industrious, alert, and trustworthy official. Not less can be said of his force of officials and not less can be said of the officers and employés of the Secretary of the Senate than what I have said of those who stand at the head of these respective offices.

The gentleman who has every morning been so prompt in attendance and whose well-worded prayers have been heard unfortunately by too few of this body, has commanded our respect. There is nothing in him in the nature of the sensational. He is a true, unobtrusive, and faithful servant of the living God and an example to all with whom he comes in contact.

Now, the resolutions have been so modified that those who are to be elected by the majority side of this Chamber will take their places the first day of any extraordinary or regular session of the Fifty-third Congress. This as to commencement of term is in accord with the precedents and follows the traditions of the Senate.

This contest has been made that these traditions and these precedents might be recognized and followed, for it is an unsafe thing in this body to depart very materially from the old ways, which are usually the best ways. These traditions and precedents lie at the very foundation of the courtesy which exists in this body, which courtesy enables it to do its work satisfactorily to itself and satisfactorily, as I believe, to the great mass of the American people.

I rise to suggest that so far as this side of the Chamber is concerned, I do not think that any one here will desire that the roll shall be called upon the resolutions; not that we acquiesce in the desire for change, but because a call of the roll might disclose a condition as to attendance that might not be acceptable to those of us who are present and certainly would not be to those who are absent.

Mr. GORMAN. Mr. President, it is true as stated by the Senator from Nebraska [Mr. MANDERSON] that the uniform action of this body has been not to change its officials except at a regular session or a called session of Congress. That has been rather the custom. More than one attempt has been made to change the offices at an executive session of the Senate and it has uniformly been resisted by the minority, no matter of which party the minority may have been.

Now that the political complexion of the Senate has changed we have thought it necessary and proper, as the rule has been well established by both parties, that the principal officers of this body should be in accord with the majority. I thought, and quite a number of our friends on this side of the Chamber believed, as there had been no fixed time heretofore except the custom to which I have referred, that probably it would have been better in the interest of the service to have had the change occur at the beginning of the fiscal year, and hence the resolutions that I first offered fixed that date. But there is a universal desire on the part of every Senator so far as I know, no matter what his politics may be, that in this body above all others there shall not be an unseemly struggle, which would create an impression that it was carried on merely for the purpose of getting possession of the few small offices connected with the Senate.

Personally, sir, I have had for many years great regret that the original rule of permanency which obtained in this body was ever interfered with. There is no other member of the Senate who can appreciate that rule as I have done. I have seen its operation and I have known how just and how right that rule was. I have seen the time, and participated in the transaction, when a subordinate officer of this body could not be removed by the Secretary or the Sergeant-at-Arms without charges being made and an opportunity given to him for self-vindication before the Vice-President. I regret that that rule was abandoned, but now for more than thirty years another has been established.

So when we come into power on this side of the Chamber we naturally follow the rule now established, which probably never will be changed again, that the majority shall control the officers who are to serve the body. We therefore offer the resolutions, and not as a reflection upon the conduct of any of the officials of this body. On the contrary, I take great pleasure in saying that I do not believe, certainly not in the last forty years when I have had an opportunity to witness the transaction of affairs here, have the affairs of the Senate ever been better conducted than by the present Secretary and Sergeant-at-Arms of this body, and when the Senate parts from them it is only because under the rule which has been fixed, as I said, for thirty years or more, we believe it is necessary to have the persons filling these high offices in accord with the majority of the body.

Mr. HARRIS. Mr. President, the passage of the resolutions contemplates the retiracy of the elective officers of this body at a future day, in view of which fact I desire to say, as one who has not been unobservant of the manner in which these several officers have performed their duties, what I think every Senator can say, that they and each of them have been always polite, always prompt, always accurate and efficient in the performance of their respective duties.

It is for no fault of theirs that we seek this change, for I do not think there is any single bad thing that can be said of any one of them except one, and that is bad politics. That at least is the consideration that controls my action in the premises, and when they shall retire from their respective places each of them will carry with him my profound and most kindly regard.

This much I have deemed it due to myself as well as to the retiring officers to say upon this occasion.

Mr. PALMER. Mr. President, although perhaps in point of age almost the senior of any member of the Senate and one of the youngest in point of service, I hope it may not be improper for me to make a very few remarks.

I desire to extend my thanks, first, to the Senators on both sides of the Chamber who have agreed upon the resolutions for relieving me from a position of most painful embarrassment. I have been taught since becoming a member of this body that there are certain Senatorial traditions in respect to the change of the officers of the body, and I had, after mature consideration, learned to respect them. I am also a party man and attached to the political organization with which I act. But the proposition to make an immediate change was met by a most earnest respect (perhaps the word "love" is too strong to express the feeling one

man bears to another) for the Secretary of this body. If the proposition had been made to change the Secretary of the Senate violently, I am not now prepared to say what course I should have been compelled to pursue.

Much more mature in point of age than the Secretary of the Senate, he served under my command during the war. He won my confidence as a gentleman and a soldier. His name was one that of itself commanded respect in the Army of the United States. The name McCook was significant of gallantry and patriotism. I repeat that he served under my immediate command. I knew him and saw him on battlefields. I learned to respect him. He still commands my respect.

I regret that political changes make a succession necessary; but, even though the resolutions have been assented to by all parties, I could not permit their passage without bearing this testimony to my esteem for the Secretary of the Senate, who will soon give place to another.

Mr. VOORHEES. Mr. President, I might well let the matter rest where it has been placed by the Senators who have preceded me, but I have so many strong personal attachments to the subordinate officers of this body that I do not feel like permitting this occasion to pass without a few words.

We all strive for victory in the hour of battle. We push on, and when the victory is obtained we rejoice in it; but sometimes after the battle is over and the victory won there are circumstances which are sorrowful in their nature. I, so far as I am concerned, encounter one of those circumstances now in parting from the able, courteous, kind, and efficient corps of officers of this body. In making preparation to part from them I take no pleasure. On the contrary, so far as my relations with them are concerned, my feeling is one of regret.

I wish to say this much, for certainly I have been the recipient so constantly for years past of the kindness and assistance and attention of the officers of this body, that I would be derelict to my heart and to my duty and to my feeling if I said less than this.

I appreciate, Mr. President, as we all do, that these changes have to come. The excellent officers of the Senate who hear me now know that this is one of the incidents of political warfare, not the pleasantest by any manner of means, but nevertheless a necessary incident. I trust that in the future many circumstances may come to them pleasant in their nature and that their lives will be crowned with entire success.

Mr. President, I felt not willing to let this event pass into history without saying these few words.

Mr. BLACKBURN. As no vote is to be taken and no record is to be made except the utterances of individual Senators upon this occasion, I wish to detain the Senate for a moment to bear my testimony too to the efficiency, to the courtesy, and the value that have marked the services rendered by the officers for whose retirement we are now providing.

As to the Chaplain, who during my term of service in the Senate has officiated here, I am sure that every Senator cherishes that full measure of respect and esteem that his bearing has fairly entitled him to. I do not know him so closely as I do the other elective officers of this body. The Sergeant-at-Arms, now to retire under the provisions of the resolutions, and myself were members of the other House of Congress together. I know him there. I have seen him fairly tested. I know that he answers the fullest measure that criticism could apply in the discharge of every duty which devolved upon him, whether as a lawmaker of the Government or as an executive officer of this body.

With the Secretary of the Senate it is with me different. I served with him, too, in the other House of Congress. I did not serve with him, at least not upon the same side with him, as did the distinguished Senator from Illinois [Mr. PALMER] during the days of war; but if I fought upon the other side it only tended to enhance and to emphasize the sense of appreciation and affection that I cherish for that splendid specimen of the soldier of the late war. I do not mean to trust myself to speak of the sense of regret with which I contemplate his retirement from this Chamber. I never knew a knightlier, truer, purer, nobler, manlier man. A better officer I am sure this Chamber never had, and whilst I know full well that his successor will prove to be an eminently worthy one, I am not permitted to indulge the hope that we shall ever have a better Secretary than we are parting with now. If it were possible to test the sense of this Chamber, I very much doubt whether, taking counsel of their personal feelings, he would find more friends upon that side than he would upon this side.

But, Mr. President, the same causes that remove these gentlemen operated to bring them into their present positions. These causes are beyond our control; and whilst regret may be expressed that the machinery of this body must respond to the change of political power that pervades the country, still it is in the line of logic, at least the logic of politics.

I only wish to say that in taking our leave of these officials I believe that I am warranted in assuring them that they will carry with them, whether into private life or into further distinguished public service, the best wishes of every member of this body. I am sure that they will always have mine.

The VICE-PRESIDENT. The question is on agreeing to the resolutions proposed by the Senator from Maryland, as modified.

The resolutions as modified were agreed to.

Mr. GORMAN. I submit a resolution as a substitute for resolution numbered 23, modified so as to conform to the resolutions just passed.

The VICE-PRESIDENT. The resolution, as modified, will be read.

The Secretary read as follows:

Resolved, That William R. Cox, of North Carolina, be, and he is hereby, elected Secretary of the Senate, his term of office to begin on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session, until which time the present incumbent shall continue to be Secretary of the Senate, unless the office of Secretary becomes vacant before the said first day of the meeting of the Fifty-third Congress, in which event the said William R. Cox shall be at once Secretary of the Senate and enter upon the discharge of his duties as Secretary.

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

Mr. GORMAN. I submit the resolution I send to the desk, it being a modification of the resolution previously offered by me.

The VICE-PRESIDENT. The resolution as modified will be read.

The Secretary read as follows:

Resolved, That Richard J. Bright, of Indiana, be, and is hereby, elected Sergeant-at-Arms and Doorkeeper of the Senate, his term of office to begin on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session, until which time the present incumbent shall continue to be Sergeant-at-Arms and Doorkeeper, unless the office of Sergeant-at-Arms and Doorkeeper becomes vacant before the said first day of the meeting of the Fifty-third Congress, in which event the said Richard J. Bright shall be at once Sergeant-at-Arms and Doorkeeper of the Senate and enter upon the discharge of his duties in said office.

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

Mr. GORMAN. I offer the modified resolution I send to the desk.

The VICE-PRESIDENT. The resolution as modified will be read.

The Secretary read as follows:

Resolved, That William H. Milburn, doctor of divinity, of Illinois, be, and he is hereby, elected Chaplain of the Senate, his term of office to begin on the first day of the meeting of the Fifty-third Congress, whether in extraordinary or regular session, until which time the present incumbent shall continue to be Chaplain of the Senate, unless the office of chaplain becomes vacant before the said first day of the meeting of the Fifty-third Congress, in which event the said William H. Milburn, doctor of divinity, shall be at once Chaplain of the Senate and enter upon the discharge of his duties as Chaplain.

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

Mr. HOAR. Mr. President——

Mr. GORMAN. I ask the Senator from Massachusetts whether he prefers to go on this afternoon or to continue to-morrow morning?

Mr. HOAR. I do not know whether the Senator from Maryland desires an executive session or not. I do not wish to interfere with that.

Mr. GORMAN. We would like to have a short executive session some time during the day, but of course will consult the convenience of the Senator from Massachusetts.

Mr. HOAR. If the Senator desires an executive session this afternoon I suppose it would be more convenient to the Senate to have it now.

Mr. CHANDLER. I hope the Senator from Massachusetts will yield, and go on to-morrow morning.

Mr. HOAR. All right.

COMMITTEE MEMBERSHIP.

Mr. CALL. I give notice that at the conclusion of the speech of the Senator from Massachusetts [Mr. HOAR] to-morrow I shall call up the resolution fixing the membership of certain committees, upon which I wish to submit some remarks.

EXECUTIVE SESSION.

Mr. GORMAN. With the permission of the Senator from Massachusetts, and with the understanding that he is to have the floor the first thing in the morning, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were reopened, and (at 2 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Friday, April 7, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 6, 1893.

COMMISSIONER OF PENSIONS.

William Lochren, of Minneapolis, Minn., to be Commissioner of Pensions, vice Green B. Raum, resigned.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Hannis Taylor, of Alabama, to be envoy extraordinary and minister plenipotentiary of the United States to Spain, vice A. Louden Snowden, resigned.

ASSISTANT SURGEON IN THE NAVY.

Charles Edward Riggs, a resident of Iowa, to be an assistant surgeon in the United States Navy, to fill a vacancy in that grade.

POSTMASTERS.

Robert A. Baird, to be postmaster at Morrillton, in the county of Conway and State of Arkansas, in the place of William W. Stout, removed.

Frank L. Bills, to be postmaster at Urbana, in the county of Champaign and State of Illinois, in the place of Walter W. Lindley, resigned.

Thomas B. Powell, to be postmaster at Vienna, in the county of Johnson and State of Illinois, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Clarence M. Hawkins, to be postmaster at Marion, in the county of Grant and State of Indiana, in the place of Jasper A. Garnett, removed.

Royal E. Purcell, to be postmaster at Vincennes, in the county of Knox and State of Indiana, in the place of Allen Tindolph, removed.

Amos West, to be postmaster at Mayfield, in the county of Graves and State of Kentucky, in the place of Orlando B. Happy, whose commission expired March 30, 1893.

Lela Henley, to be postmaster at Cloverport, in the county of Breckinridge and State of Kentucky, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

William R. Bowles, to be postmaster at Greenfield, in the county of Dade and State of Missouri, the appointment of a postmaster for the said office having, by law, become vested in the President on and after January 1, 1893.

Alexander Wright, to be postmaster at Neihart, in the county of Meagher and State of Montana, the appointment of a postmaster for the said office having, by law, become vested in the President on and after October 1, 1892.

John Q. Pike, to be postmaster at Epping, in the county of Rockingham and State of New Hampshire, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Connie P. Priestly, to be postmaster at Huntingdon, in the county of Carroll and State of Tennessee, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

James T. McCutchen, to be postmaster at Jackson, in the county of Madison and State of Tennessee, in the place of William M. Moss, removed.

William B. Pearson, to be postmaster at Nacogdoches, in the county of Nacogdoches and State of Texas, in the place of Henry H. Sawyer, resigned.

John T. Hart, to be postmaster at Orange, in the county of Orange and State of Texas, in the place of George F. Poole, removed; Joshua B. Bisland, who was nominated by the President, and confirmed by the Senate January 4, 1893, having declined the office.

Exum B. Britt, to be postmaster at Suffolk, in the county of Nansemond and State of Virginia, in the place of George L. Borum, whose commission expired March 26, 1893.

Irwin Tucker, to be postmaster at Newport News, in the county of Warwick and State of Virginia, in the place of Thomas H. Gordon, resigned.

Howson H. Wallace, to be postmaster at Fredericksburg, in the county of Spottsylvania and State of Virginia, in the place of Oregon D. Foster, removed.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 4, 1893.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

Pierce M. B. Young, of Georgia, envoy extraordinary and minister plenipotentiary to Guatemala and Honduras.

Lewis Baker, of Minnesota, envoy extraordinary and minister plenipotentiary to Nicaragua, Costa Rica, and Salvador.

Edwin Dun, of Ohio, now secretary of legation at Japan, to be envoy extraordinary and minister plenipotentiary to Japan.

James A. McKenzie, of Kentucky, to be envoy extraordinary and minister plenipotentiary to Peru.

James D. Porter, of Tennessee, to be envoy extraordinary and minister plenipotentiary of the United States to Chile.

CONSULS.

Claude Meeker, of Ohio, consul to Bradford.
Theodore M. Stephan, of Illinois, consul to Annaberg.
M. P. Pendleton, of Maine, consul to Pictou.
Harrison R. Williams, of Missouri, consul to Vera Cruz.
L. M. Shaffer, of West Virginia, consul to Stratford, Ontario.

SECOND SECRETARY OF LEGATION.

Newton B. Eustis, of Louisiana, to be second secretary of the legation of the United States at Paris.

COLLECTORS OF CUSTOMS.

Henry J. Hathaway, of Maine, to be collector of customs for the district of Aroostook, in the State of Maine.

Walter Goddard, of Connecticut, to be collector of customs for the district of Fairfield, in the State of Connecticut.

FRIDAY, *April 7, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections. It will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. Pending the consideration of the resolution the Chair will lay before the Senate a letter from the Secretary of the Treasury.

EXECUTION OF RECENT IMMIGRATION ACT.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the Senate of March 28, 1893, copies of the following-described blank forms, correspondence, etc., being the affidavit of the master or commanding officer or first or second officer and affidavit of surgeon, questions to be answered by the immigrant before booking, list or manifest of alien immigrants for the Commissioner of Immigration, together with the correspondence concerning such orders, regulations, and forms between the Department and Government officials; which was read.

Mr. CHANDLER. I move that the communication and accompanying papers be printed and referred to the Committee on Immigration.

The motion was agreed to.

Mr. CHANDLER subsequently said: This morning a communication was received from the Secretary of the Treasury transmitting rules and regulations concerning immigration. I find that some correspondence which I myself had with the Secretary was omitted, and I ask that it may be printed as an appendix to the document transmitted by the head of the Department.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire? The Chair hears none, and it will be so ordered.

CALL OF THE ROLL.

Mr. CHANDLER. I suggest that there is no quorum present in the Chamber, and ask that the roll be called.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Berry,	George,	Manderson,	Ransom,
Blackburn,	Gibson,	Martin,	Roach.
Brice,	Gordon,	Mills,	Sherman,
Butler,	Gorman,	Mitchell, Wis.	Smith.
Caffery,	Gray,	Morrill,	Stockbridge.
Call,	Hansbrough,	Murphy,	Turpie,
Carey.	Harris,	Palmer,	Vance,
Chandler,	Hawley,	Pasco,	Vest.
Cockrell,	Hoar,	Peffer,	Voorhees,
Coke.	Jones, Ark.	Platt	Washburn,
Cullom,	Kyle.	Power,	White, La.
Faulkner,	Lindsay,	Pugh,	

The VICE-PRESIDENT. Forty-seven Senators have responded to their names. A quorum is present. The Chair recognizes the Senator from Massachusetts [Mr. HOAR] as entitled to the floor on the resolution submitted by him relating to the election of Senators by a direct vote of the people.

RESTRAINT OF LIBERTY OF RAILROAD EMPLOYÉS.

Mr. VOORHEES. Will the Senator from Massachusetts allow me to introduce a resolution for reference to a committee? It is in the nature of morning business.

Mr. HOAR. Certainly.

Mr. VOORHEES. I ask that the resolution be read.

The resolution was read, as follows:

Whereas the tenth section of the act of Congress approved February 4, 1887, known as the interstate-commerce act, contains the following enactment:

"That any common carrier subject to the provisions of this act, or, whenever such common carrier is a corporation, any director or officer thereof, or any receiver, trustee, lessee, agent, or person acting for or employed by such corporation, who, alone or with any other corporation, company, person, or party, shall willfully do or cause to be done, or shall willingly suffer or permit to be done, any act, matter, or thing in this act prohibited or declared to be unlawful, or who shall aid or abet therein, or shall willfully omit or fail to do any act, matter, or thing in this act required to be done, or shall cause or willingly suffer or permit any act, matter, or thing so directed or required by this act to be done not to be so done, or shall aid or abet any such omission or failure, or shall be guilty of any infraction of this act, or shall aid or abet therein, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof in any district court of the United States within the jurisdiction of which such offense was committed, be subject to a fine of not to exceed $5,000 for each offense."

And whereas it is alleged that said section of the law as it now stands has been construed by the judges of the circuit and district courts of the United States in recent decisions at Toledo, Ohio, to mean that "the duties of an employé of a public corporation are such that he can not always choose his own time for quitting that service," but that in attempting to leave the employment of such corporation of his own free will and to escape from its control and consequent servitude, such employé is guilty of a misdemeanor and liable to severe penalties: Therefore

Resolved, That the Interstate Commerce Committee of the Senate be, and is hereby, instructed to inquire into the question here presented, and to report to this body what action may be necessary, either by the repeal of said tenth section of the existing law, or by the enactment of additional legislation for the better protection of the laboring people of the United States in their natural and inalienable rights, and for their greater security from the encroachments of corporation power.

Mr. VOORHEES. I ask that the resolution be printed and referred to the Committee on Interstate Commerce.

Mr. CULLOM. I will state to the Senator from Indiana that that committee has already one resolution before it. It does not cover this particular feature of the act, however. I was going to suggest the reference of the resolution to that committee, to enable it to consider both together, so as to include all the questions that are involved in this resolution and the one previously offered.

Mr. VOORHEES. I have no objection, so that the resolution is properly considered.

The VICE-PRESIDENT. The resolution will be printed and referred as requested.

PRINTING OF CIVIL SERVICE COMMISSION REPORT.

Mr. COCKRELL submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the United States Civil Service Commission is hereby directed to report to the Senate the cause of delay in furnishing the Public Printer with the copy for the completion of the publication of their last annual report.

HARBOR IMPROVEMENTS ON PACIFIC COAST.

Mr. RANSOM. If it will not interfere with the Senator from Massachusetts, I should like to call up the resolution reported by the Senator from Louisiana [Mr. WHITE] day before yesterday, from the Committee on Contingent Expenses, in reference to a subcommitee of the Committee on Commerce being sent to the Pacific coast.

The VICE-PRESIDENT. Is there objection to the request of the Senator from North Carolina?

Mr. HOAR. I suppose the Senator does not anticipate any debate upon the resolution.

Mr. CULLOM. It will not take any time.

Mr. RANSOM. I hope it will not.

Mr. HOAR. With that understanding, I have no objection.

The VICE-PRESIDENT. The substitute resolution reported by the committee will be read.

The resolution reported on the 5th instant by Mr. WHITE of Louisiana, from the Committee to Audit and Control the Contingent Expenses of the Senate, was read, as follows:

Resolved, That the Committee on Commerce be, and they are hereby, authorized and directed to sit, by subcommittee not exceeding five in number, to be appointed by the chairman of said committee, during the recess of Congress, and to visit and examine the Pacific coast between Points Duma and Capistrano, with a view to determining the best location for the construction of a deep-water harbor. Said subcommittee is hereby also authorized to visit and examine such other works of river and harbor improvement on the Pacific coast, existing or proposed, as in their judgment the interests of commerce shall demand, and shall have power to subpœna witnesses, to administer oaths and take testimony, to employ a stenographer, and to appoint a sergeant-at-arms from the messengers of the Senate; and that the actual necessary expenses of the said subcommittee, properly incurred, shall be paid out of the contingent fund of the Senate in the usual manner: *Provided*, That no compensation be paid for a clerk to said subcommittee, the chairman being authorized, if necessary, to detail the regular clerk of said committee to attend the said subcommittee, the clerk so assigned to receive no extra allowance or compensation.

Mr. SHERMAN. I intended to offer an amendment to the resolution, requiring a detail of officers of the Army and Navy to accompany the committee, but I find my friend from North Carolina thinks, and perhaps other Senators as well, that that would be a departure from the dignified position of the Senate, and that nobody ought to assist the Senate in a matter of this kind, and on the whole he objects to the amendment. I will therefore withhold my offer of amendment, and let the resolution pass if the Senate is so inclined, although I am not very much in favor of traveling commissions of the Senate. For the last twenty years I have declined to serve on them. I have not served on one for twenty-odd years. I think large expense is incurred, and generally not very fruitful results come from them.

The VICE-PRESIDENT. The question is on agreeing to the substitute resolution reported by the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution was agreed to.

ELECTION OF SENATORS BY DIRECT VOTE OF THE PEOPLE.

The VICE-PRESIDENT. Pending the consideration of the resolution reported from the Committee on Privileges and Elections, the Chair, in pursuance of the agreement yesterday, lays before the Senate the resolution submitted by the Senator from Massachusetts [Mr. HOAR], which will be stated.

The SECRETARY. A resolution by Mr. HOAR, relative to the election of United States Senators by the people and against House joint resolution of the Fifty-second Congress providing for the same.

Mr. HOAR. Mr. President, I ask that the pending resolution be read.

The resolution, submitted by Mr. HOAR on the 3d instant, was read, as follows:

Resolved, That it is inexpedient that the resolution sent to the Senate by the House of Representatives during the last Congress, providing for an amendment of the Constitution securing the election of Senators by the people of the several States, be adopted.

Such a method of election would essentially change the character of the Senate as conceived by the Convention that framed the Constitution and the people who adopted it.

It would transfer practically the selection of the members of this body from the Legislatures, who are intrusted with all legislative powers of the States, to bodies having no other responsibilities, whose election can not be regulated by law, whose members act by proxy, whose tenure of office is for a single day, whose votes and proceedings are not recorded, who act under no personal responsibility, whose mistakes, ordinarily, can only be corrected by the choice of Senators who do not represent the opinions concerning public measures and policies of the people who choose them.

It requires the substitution of pluralities for majorities in the election.

It will transfer the seat of political power in great States, now distributed evenly over their territory, to the great cities and masses of population.

It will create new temptations to fraud, corruption, and other illegal practices, and in close cases will give rise to numerous election contests which must tend seriously to weaken the confidence of the people in the Senate.

It will absolve the larger States from the constitutional obligation which secures the equal representation of all the States in the Senate by providing that no State shall be deprived of that equality without its consent.

It implies what the whole current of our history shows to be untrue, that the Senate has during the past century failed to meet the just expectations of the people, and that the State Legislatures have proved themselves unfit to be the depositaries of the power of electing Senators.

The reasons which require this change, if acted upon and carried to their logical result, will lead to the election by the direct popular vote, and by popular majorities, of the President and of the judiciary, and will compel the placing of these elections under complete national control.

It will result in the overthrow of the whole scheme of the Senate and, in the end, of the whole scheme of the national Constitution as designed and established by the framers of the Constitution and the people who adopted it.

Mr. HOAR resumed and concluded the speech begun by him yesterday, which is, entire, as follows:

Mr. HOAR. Mr. President, I suppose that no thoughtful person will deem a discussion of this topic out of time or premature. Four important States have sent to us resolutions of their Legislatures favoring such a change in the Constitution. Three Senators have advocated it in elaborate speeches. The House of Representatives, without a debate, has passed resolutions for submitting the change to the States. The careless and thoughtless dealing with this subject is shown by the proposal to take from Congress all power over the manner of electing Senators—a step which would go far in my judgment to change this country from a nation into a league or confederacy.

I am not sure whether it is the good fortune or the ill fortune of our American political system that our controversies so often relate to matters which are vital, not only to the well being, but to the very existence of the Republic. The English take their constitution for granted. They can change anything in their state by a simple act of legislation. But it has been very rarely in their history that great constitutional changes have been brought about by the action of legislative bodies. They have never been brought about by the direct action of the people.

The abandonment of the influence of the sovereign in legislation, the abandonment of the veto power, the diminished authority of the House of Lords, the transfer of executive power from the immediate servants of the Crown to the ministers, who depend for their official existence upon the majority of the House

of Commons—all these things have come to pass so silently that it is difficult to discover when any of them took place. Although our constitutions, State and national, are all in writing, there are constant attempts to make changes of the most radical and vital character, and to bring them about suddenly and without deliberation or discussion by popular action.

If the Senate as at present constituted is to be defended, it is to be defended here. If the great reasons which moved our fathers to establish this Chamber, which they hoped would last in unbroken succession until time shall be no more, to give its members a tenure of office more enduring than that of any other department of the Government save the judiciary alone, to remove it from the operation of the fleeting passions of the hour, to lay its foundation below the frost, and to remove the appointment of the men who are to compose it, as far as may be, from the temporary excitements which so often move the people to their own harm, are understood anywhere, those reasons must be understood by the men who fill these seats. If this great part of the structure of our body politic is to be maintained, it must be maintained by the confidence of the American people in the character of their Senators and by the strength of argument which those Senators must themselves at least help to furnish.

This is clearly, Mr. President, a question of centuries, and not of years. In determining it we must appeal to our experience of a hundred years, and not merely to that of yesterday or the day before. A present impatience is not only no good reason for making a change, but its existence seems to me an especial reason for postponing it. If we listen only to present complaints, we must make radical changes also in the manner of electing the President, in the constitution of the State Legislature, in our judiciary, in the House of Representatives, in the management of our great corporations, of our railroads, our schools, our universities, the church, the law, and the private habits of the people. Complaint, impatience, uneasiness attend upon everything which depends upon human instrumentality for its administration. They are the sign of vigorous health, and if soberly and thoughtfully dealt with, are the conditions of all life and growth.

We must judge the Senate, as I have said, by the experience of a century, and not by a few recent failures. Whatever there may be of existing evil may be corrected by the intelligence and good sense of the people, as other evils quite as great have been corrected in the past.

When I came into the national service in 1869, all avenues to this and the other Chamber and to every Executive Department were swarming with a powerful and corrupt lobby. That lobby has disappeared before an aroused and vigorous public sentiment. Who hears now of great measures of legislation promoted or affected in Congress by corrupt instrumentalities?

When I came into public life in 1869, the Senate claimed almost entire control of the Executive function of appointment to office. Every Senator, with hardly an exception, seemed to fancy that the national officers in his State were to be a band of political henchmen devoted to his personal fortunes. What was called "the courtesy of the Senate" was depended upon to enable a Senator to dictate to the executive all appointments and removals in his territory. That doctrine has disappeared as completely as the locusts that infested Egypt in the time of the Pharaohs.

When I entered public life in 1869, Tweed was the dominant power in New York City. He dictated alike all civic expenditures and the appointment and the judgment of the courts of the city. It became my duty, in representing the House of Representatives on the impeachment of a public officer before the Senate, to utter the following language of warning, the timeliness and necessity of which I think few men will now question:

> My own public life has been a very brief and insignificant one, extending little beyond the duration of a single term of Senatorial office. But in that brief period I have seen five judges of a high court of the United States driven from office by threats of impeachment for corruption or maladministration. I have heard the taunt, from friendliest lips, that when the United States presented herself in the East to take part with the civilized world in generous competition in the arts of life, the only product in her institutions in which she surpassed all others beyond question was her corruption.
>
> I have seen in the State in the Union foremost in power and wealth four judges of her courts impeached for corruption, and the political administration of her chief city become a disgrace and a byword throughout the world. I have seen the chairman of the Committee on Military Affairs in the House, now a distinguished member of this court, rise in his place and demand the expulsion of four of his associates for making sale of their official privilege of selecting the youths to be educated at our great military school. When the greatest railroad in the world, binding together the continent and uniting the two seas which wash our shores, was finished, I have seen our national triumph and exultation turned to bitterness and shame by the unanimous reports of three committees of Congress—two of the House and one here—that every step of that mighty enterprise had been taken in fraud.
>
> I have heard in highest places the shameless doctrine avowed by men grown old in public office that the true way by which power should be gained in the Republic is to bribe the people with the offices created for their service, and the true end for which it should be used when gained is the promotion of selfish ambition and the gratification of personal revenge. I have heard that suspicion haunts the footsteps of the trusted companions of the President.
>
> These things have passed into history. The Hallam or the Tacitus or the Sismondi or the Macaulay who writes the annals of our time will record them with his inexorable pen.

Will any man deny the truth of any of these charges? Will any man find occasion to repeat them to-day? These great evils, one and all, have been corrected by the American people with the abundant resources which, under their existing constitutions, were at their command. Other evils, as grave, but not graver, demand our attention to-day. These evils will in their turn disappear when brought into the daylight before the intelligence and the justice of the American people.

The sufferings of the people have been mostly from their apprehensions, never from any actual misgovernment. Even our civil war itself came through the apprehension of the people of one section of the country of which those who waged it against the Government, now think it was an unmixed good. Our political history seems to be almost made up of popular movements which are the result of the fears of the people—of evils apprehended from legislation which in fact are never experienced.

The history of the United States for a hundred years has been the history of marvelous prosperity and growth, which reads, even in the pages of soberest historians, like an Oriental tale. Yet our political journals have been constantly filled with prediction of disaster and ruin. If anybody need confirmation of this statement let him read the political platforms of the party conventions of the minority. It is marvelous to see how safe, conservative, and beneficent has been our national legislation in spite of all the violence and all the extreme utterances of the journals and the platforms. This quality in our legislation is derived largely, though not wholly, from the character of the Senate under the existing method of choosing its members.

The dangers of the country are the dangers to the elective franchise—violence, fraudulent voting, fraudulent counting, intimidation, corruption, gerrymandering, the unseating of legislators with unquestioned title to their seats for the accomplishment of political objects by unscrupulous men, the use of weapons intended to protect our institutions, to subvert them. These things—not mistakes in finance, or an erroneous fiscal policy, or unwise laws of succession, or even rash and violent projects of social extremists—are the things that menace the permanence of our institutions to-day.

Every generation since the dawning of civilization seems to have been gifted with its own peculiar capacity. The generation of Homer has left nothing behind but a great epic poem, which for thirty centuries remains without a rival. Italian art had its brief and brilliant day of glory, which departed and has never returned. The time of Elizabeth was the time of dramatic poetry which has been alike the wonder and the despair of all succeeding ages. The generation which accomplished the American Revolution had a genius for framing constitutions which no generation before or since has been able to equal or to approach. The features of the State constitutions framed in that day have been retained with little changes in substance, and have been copied since by every new State.

The men of that day had many great advantages for this work. They had conducted a great revolution. To prepare for it, they had been engaged for a century in discussing the principles on which self-government is founded and by which constitutional liberty is secured. They were men of English stock, trained in the principles of English liberty. There was no admixture in their body politic of men who had been born under despotic governments, and who associated the idea of government inseparably with the idea of tyranny. At their fathers' firesides the great debate of constitutional liberty had been conducted from the earliest recollection of the oldest men then living. They had the other advantage, that in framing their constitutions they were free from all party bias and from the temptation to consult party advantage, or to appeal to the party prejudices of the people.

I do not of course claim that the people can not now amend, or that they can not now improve, our Constitution. That Constitution itself would be a failure if the experience of a hundred years under its operation found the people unfitted to improve it. The lives of our fathers would have been of little worth, if, under the Constitution they framed, there had not grown up and flourished a people who were also fit to deal with the great and fundamental constitutional principles of the state. The men who entered upon the untried field of providing by written enactment what were the boundaries and limits of constitutional power and constitutional authority in the state have left children who, after a hundred years of trial, need not fear to approach and to deal with the same great problems. But they must bring to them the same wisdom and courage and virtue. They must dare to tell the people plain truths. They must possess the wisdom of deliberate action, and rise to the austere virtue of self-restraint.

Mr. President, wherever there can be found an expression of admiration for the American Constitution in the works of any great writer or thinker at home or abroad, it will be found that the admiration is based upon that part of its mechanism which secures the deliberate and indirect action of the popular will in-

stead of its immediate, rapid, inconsiderate, and direct action. The parts of it which are everywhere the most praised and by which its framers sought especially to commend it to the confidence of the people were the constitution of the Senate and the constitution of the Supreme Court.

The great function of the Supreme Court is not merely or chiefly to afford a learned, able, and impartial tribunal for the determination of controversies between private parties upon the principles of ordinary municipal law; but it is the function of keeping the national and State Legislatures alike within the appointed limits of their authority. In other words, it is a restraint upon the people's will when expressed in the form of legislation by the people's representatives, whether that will undertake an encroachment upon the individual and natural rights of the citizens or upon the domain of other appointed constitutional authorities. "It is, indeed," said Daniel Webster, "a great achievement; it is the master work of the world, to establish governments entirely popular on lasting foundations."

I do not propose to take any time in commending the excellencies of the Constitution of the United States. I do not think it worth while to cite to ears to which they are familiar the praise of foreign statesmen or philosophers, of Gladstone, or of De Tocqueville, or of Bryce. These compliments are trifling and insignificant in comparison with the great fact that the American people are satisfied with it, and that they would reject with swift and unanimous indignation any proposition which they thought would change it in its essence.

I think it can be established to their satisfaction that the proposed change in the method of electing Senators is in itself a change in principle and essence of the most vital character, and that its logic will lead to other changes equally vital and essential. And for that reason I have no apprehension of the success of this scheme when deliberately considered and discussed.

I am not afraid to say to the American people that it is dangerous to trust any great power of government to their direct or inconsiderate control. I am not afraid to tell them, not only that their sober second thought is better than their hasty action, but that a government which is exposed to the hasty action of a people is the worst and not the best government on earth. No matter how excellent may be the individual, the direct, immediate, hasty action of any mass of individuals on earth is the pathway to ruin and not to safety. It is as true to-day as it was when James Madison, the great advocate of the rights of the people in his time, one of the foremost among the framers of our Constitution, first said it, "That, although every Athenian citizen might be a Socrates, every Athenian assembly would still be a mob."

Our fathers were profound students of history. They found that no republic, although there had been many examples of other republics, ever lasted long without a senate. The term senate implied to their minds, as to ours, a body of men of mature age and of a tenure of office which was removed from all temptation of being affected by temporary currents of public sentiment. The word senate is a misnomer when applied to any legislative body of whom these things are not true.

My friend from Oregon said the other day that the framers of the Constitution distrusted the people. He said that one of them who declared in the Convention that legislation ought to be removed as far as possible from the immediate action of the people would be remanded to private life nowadays with a promptness that would be almost grotesque. Why, Mr. President, that Senator represents a State—one of the new States of the Union—that has incorporated the doctrine of that utterance into every department and arrangement of her constitution more completely, I think, than any other State in the American Union. The Senator overlooks what the author of the utterance with which he finds fault had so profoundly studied—the difference between the immediate action of the people upon legislation and administration and the expression of the sober and deliberate will of the people through instrumentalities whose own sobriety and deliberation are thoroughly secured.

Does my friend really think that the authors of the opening sentences of the Declaration of Independence, who rested their cause on those sublime and eternal truths in their great controversy with the mother country, who placed those truths at the very foundation of their new Government, who pledged their lives and fortunes and sacred honor to maintain them, distrusted the people? They trusted the people when they made those great declarations of natural right. They trusted the people when they declared the equal right of every human being without exception of race or color or nationality or rank or fortune. But they trusted them also with as profound and implicit a trust when they submitted to them constitutions, both State and national, filled with restraints which alike secure minorities and individuals against injustice and oppression from majorities, and secure the whole people against their own hasty and inconsiderate action.

No, Mr. President, it is not because the framers of our Constitution distrusted the people; it is because they trusted the people that they confidently asked their adoption of a Constitution which compelled them to deliberation, to sober thought, to delegated power, to action through selected agencies and instrumentalities, to thinking twice before acting once. It was not Madison or Hamilton, it was the people of the United States who ordained and established the Constitution.

I have no respect for the notion that the people of the United States need to be flattered or cajoled, or that they are impatient of the necessary restraints of constitutional liberty. Truth, frankness, and courage are the avenues to their confidence. There is but one way to discover what will be popular in this country, and that is to discover what is right. There is but one road to the enjoyment of the confidence of the people, and that is to counsel them to wise, honest, and safe policies. The public man who appeals to temporary opinion or who flatters temporary passion will find his hold upon power as temporary and short-lived as are the instrumentalities by which he seeks to obtain it.

It has been said in this discussion that the Constitution needed amendment at once. This is true; but all amendments were in the direction of placing checks on the power of the people and declaring that there were certain things the people should not be permitted to do. The great statesmen who framed the Constitution placed in it certain checks and safeguards against the popular will. The greater people to whom they submitted it perfected it by inserting other safeguards still.

I stated just now that the term senate implied to the apprehension of every studious man certain essential conditions; but the Senate of the United States, as established by our Constitution, implied something more than this.

First, our fathers wished to secure a dual legislative assembly. With the exception of Dr. Franklin and his associates in the Pennsylvania delegation, who are understood to have cast a formal vote out of deference to him, it was thought best to provide a dual representative assembly. Every act of the Legislature was to be twice considered and have the approbation of two different, separate houses.

Second, these two houses were to have a different constituency. So every proposed law must run the gauntlet of two diverse interests and be judged from at least two points of view. Every State in the construction of its Legislature has maintained these two principles. The American people, I suppose, are now agreed upon them with substantial unanimity.

Third, the Senate is expected to represent the equality of the States. This is the one principle which would never have been yielded by a majority of the States when the Constitution was made, and which has been made eternal as far as possible by the provision that it shall not be changed without the consent of every State.

Fourth, the Senate was to represent deliberation in the expression of the popular will by the length of the term of office of Senators and by its removal from the direct popular vote in the method of choice. It is this point at which the Senate is now attacked.

The constitution of the Senate secures the application of all these principles in the four great constitutional functions of the National Government—in legislation, in the making of treaties, in the appointment of the great executive officers, and in impeachment. The last of these powers has happily not often been resorted to in our history, but was regarded by the framers of the Constitution as essential for the security of the whole. As James Monroe well said:

> The right of impeachment and of trial by the Legislature is the mainspring of the great machine of government. It is the pivot on which it turns. If preserved in full vigor and exercised with perfect integrity, every branch will perform its duty.

Each of these the Senate shares with other departments of the Government, and to each of them it contributes the great and conservative principle which our fathers thought essential to secure to all generations and amid all popular temptations and excitements the Government they framed against the evils by which all former republics had perished.

The Constitution also carefully provides in the case of the Senate, as in the case of the House, that the manner of the election shall be prescribed by the authority of the nation for whom the persons selected are to legislate.

It will be seen, I think, very clearly that the change proposed destroys the essential character of the Senate in each of these particulars.

It substitutes a direct election by the people for an election by the Legislature.

For a selection by public officers to whom the great public

duty of State legislation is intrusted, there is to be a selection and nomination by conventions composed of persons without other responsibility. This, in most cases, will be the mode in which the majority, practically, will make its choice.

For a selection by men who are themselves selected under strict legal provisions, there is to be, therefore, practically a selection by men who are not chosen in pursuance of any law.

Instead of selection by men under oath of office, there must be a choice by men upon whom no oath is imposed.

For a selection by men of whose action there is a record, the choice is practically to be made by men of whom no record exists.

For a choice by men acting under personal responsibility, the selection will be made by men who may act by proxy.

For a choice by a permanent body, there must be a choice by a body lasting but a day.

For a choice in a manner prescribed by national authority, there must be a choice in a manner prescribed in no authority whatever.

For a choice by a body acting by majorities, there must be substituted, in the end, a choice by a plurality.

For a choice by a body representing all localities in a State where different local interests are fairly represented, there must be a choice by sheer force of numbers, where the popular masses in great cities will have an undue and disproportionate weight.

Instead of representing different constituencies to secure the different interests in legislation, the Senate and the House are to represent constituencies of the same kind, differing only in size.

From the change in the manner of election will surely and inevitably, in my judgment, follow the destruction of the equality of the States in the Senate. It is true the Constitution now provides that no State shall be deprived of its equal vote in the Senate without its consent. But this provision relates to a Senate to be constituted and selected in the old constitutional manner, and will never be long tolerated, in my judgment, by the large States under the proposed arrangement.

The State Legislatures are the depositories of the sovereignty of the States. They are, in theory, and I believe in general in fact, composed of the picked and chosen men of the communities from which they come. The men who make up the State Legislatures are chosen by their neighbors. They are chosen by men who know them, or can know them. There have been exceptions, but in general they have been honest, wise, faithful, and just. The pages of the statute books of the forty-four Commonwealths are in general without a stain. They can be read by the patriot without a blush. I am not afraid to compare them with the two hundred and fifty Parliaments through which, for eight hundred years, the freedom of England—

> Has broadened slowly down,
> From precedent to precedent.

There have been many things we might well wish were otherwise. In the chambers where all men are equally represented, what is worse as well as what is best of humanity will sometimes find its representative. The ambition, the love of power, the party spirit, the private greed, the popular passion, injustice, and tyranny will occasionally appear there as elsewhere. In what spot in human history are they not found? But I am willing to take the legislation of any American State which is a quarter of a century old and compare it with the legislation of any government possessing a legislature in any period of its history. Why, in the British House of Commons Disraeli said that long after the close of the American war, and within the memory of men who heard him, a member of the Government stood below the gangway at the final adjournment of the Parliament and gave a £500 note to every member who had supported the administration.

You and I can well remember when bribery was a common and necessary method of getting a seat in the English House of Commons. But English constitutional liberty and English constitutional government have not proved a failure.

Do you propose to strip the State Legislatures of any other function of their sovereignty? Can you not trust the men who make all the laws upon which the safety of property, the marriage relation, the security of the home, the administration of the schools, taxation, freedom of religion, the punishment of crime, and everything else which enters into the comfort and honor of private life are depending with the choice of Senators because my honorable friend from Illinois thinks that, in the experience of the people of that excellent State, the selection of Senators under existing conditions has been unsatisfactory?

What is the alternative, and what must be the alternative? What is the alternative proposed? What must be the necessary and only alternative that can be proposed for the exercise of this great function of local sovereignty? The State Legislature is a failure, we are told; and is not fit to be trusted any longer. Who are to nominate our Senators? To whom is the practical selection to be intrusted? Whatever may be the theory, the voting population of the State of New York, or of the ten millions who within the lifetime of some of us will dwell within the borders of that imperial Commonwealth, are not expected to gather together and put in nomination a Senator by direct action. No one hall will quite hold them, even were it as flexible and expansive as the court room when naturalization is going on.

The practical choice of the Senator must be made by nominating conventions. Are not these bodies quite as likely to be susceptible to mistakes or to corrupt manipulation as a State Legislature? They gather together at midday, chosen by no constituency whose action, or even the freedom or purity of whose choice, can be regulated by law. The men who gather are to perform but a single function, to which there is attached ordinarily little responsibility. They can not be instructed by their constituents. Their functions may be exercised by proxy. They are not amenable in their individual action to a sound public opinion.

There is no record of the individual vote, or any means of correcting a mistake or fraud. They gather in the morning, and disperse when the mists of evening rise. And it is to these bodies that the choice of the men who are to compose what we are fond of calling the most august body on earth is practically and in the ordinary course of things to be committed. It is these bodies who are fitter to be trusted than the Legislatures to whom all the dearest interests of the people of the States are committed.

Cicero, in his oration for Lucius Flaccus, attributes the decay of Roman and the destruction of the Grecian liberty to the substitution of the turbulent popular assembly for the deliberative chamber in wielding the political power of the State. He has left his terrible picture of the popular assemblies of his time as a pregnant lesson for all mankind.

It may be said that governors and State officers and Representatives in Congress are selected in this way now. That is true. But have all nominations of governors and Representatives in Congress been on the whole more satisfactory to the people than the selection of Senators for one hundred years? I think that when any one of us wishes to arouse the State pride of the people he represents by enumerating the great men who have adorned their history, we find that the names of the men who have sat in these seats arise to our lips quite as naturally as the names of the governors or the Representatives in Congress, however illustrious.

When my colleague here or my colleagues in the other House wish to stir the hearts of a Massachusetts audience they are quite as likely to speak of Webster, and of John Quincy Adams, of Charles Sumner, of Rufus Choate, or George Cabot, and of Edward Everett and John Davis as of any one in our list of governors, excellent as that list has been. Is there any other State of which the same is not true? And nearly every one of the great men who have been elected to the House by the choice of the people has also sat in the Senate. The people who by any constitutional method of choice will in any generation send to this Chamber an ignoble or unworthy Senator will, I will venture to say, be found to have at the same time no better timber in their executive chair or in the House of Representatives.

It is a little difficult for a member of this body, without some violation of good taste or self-assertion, to state what we all think of the character which the Senate has maintained from the beginning of the Government and of its title to the confidence of the people. But I am not afraid or ashamed to invite a comparison of the men who have sat in these seats and represented my own Commonwealth, down to the date when the present Senators took their places, with any line of dukes, barons, or princes, or emperors, or popes who have successively filled the seats of any legislature or the executive chair of any commonwealth, whether these persons held their titles by virtue of noble descent or royal favor or of the favor of the people themselves.

I do not believe the people of Massachusetts—and the same challenge may be given with confidence in behalf of any other American State that has a history—will accept this invitation to change the method of choosing the Senators, which depends, as I have said, not only upon the claim that the Legislatures are unfit to be trusted with this duty, which is one among the chiefest functions of sovereignty, but that the Senate of the United States has, upon the whole, been a failure.

I do not believe the people of Massachusetts are quite ready to discredit their own General Court with its two hundred and sixty years of legislative history, and give their confidence instead to a political convention which gathers in the morning and disperses when the mists of evening arise, whose members are without an oath of office, without a record, without legal restraint upon their election, who have no accountability to their representatives, or to anybody, without even the requirement that they shall be citizens.

And I do not believe that they are quite prepared to say that,

on the whole, they are ashamed of the Senators who, by the free choice of their Legislatures, have for a hundred years represented them in this great national council.

It is a poor cheap flattery of the people, this notion that suffrage is to be deified and that the results of suffrage are to be degraded; that the people have all wisdom and all honesty, but that their trusted agents are to be bought or cajoled. Will it not be the same people who choose the Senators and who choose the Legislatures? Is there any evil influence which will operate upon the Legislature which will not operate with like effect upon the convention?

But it is said that the choice of a nominating convention is but the first step. Any mistake it may make will be corrected by the people. But, Mr. President, except in most extreme cases, the correction must be worse than the evil which is to be cured.

At what cost are the people to vote down the nomination made by the convention of the party which is in the majority because of their disapproval of a man who is its candidate for the Senate? Of course the plurality system will be applied to this as to every popular election. The people, then, must manifest their disapproval of an unworthy candidate regularly nominated only by transferring their support to the candidate of another party. It is not likely that any man who would get the nomination of his party convention will be so unpopular that substantially the whole membership of his party will refuse to support him. What will happen will be the choice of the candidate of another party.

Now, what does this mean? It means that the people of a State are to give their support to doctrines, measures, policies, political principles of which they disapprove solely because of their opinion as to the individual character of the man who represents them. We have a party in Massachusetts who think a protective tariff a monopoly, extortionate, robbery, and plunder of the many for the benefit of the few. They think it operates grievous and intolerable injustice in its application to the individual citizen, and that its effect upon the national welfare is immoral, evil, disastrous.

And yet if any of them happen to think that a man nominated by their party to represent these opinions is not a good man, they are to send to Washington a man who supports all of these things simply because of their opinions as to an individual character. They must prefer a man who makes his country the instrument of robbers, monopolists, plunderers, and evil managers of finances, who is amiable and honest in private, over a dishonest and unamiable man who will put an end to all this iniquity.

In other words, the correction of the mistake made by the political convention is only to be made at the cost of destroying the character of the country because of the character of the candidate. The amiable man who has no objection to dishonest and fraudulent elections is to be preferred to the unamiable man who wants honesty and fairness in elections. I have no doubt but that in extreme cases a man may be nominated by mistake, by deception, by public indifference, as a candidate of my party, whose personal character is such that it would be my duty to refuse him my support, whatever happened. But those cases will, I believe, be extremely rare, and if the disease to be remedied be wholly evil, the remedy itself is almost as bad.

Mr. President, the experience of our first century has, it seems to me, most amply vindicated the constitutional purpose which resulted in the Senate. It is not expedient to have two Houses both directly dependent on the popular will. I would not speak with disrespect of the House of Representatives. Every American who knows the history of his country must feel a just pride in that great assembly, which has been and will hereafter be the direct representative of the people's will. The names of its great leaders—of Clay, of John Quincy Adams, and of Thaddeus Stevens—rise to the lips when we would stir in the hearts of any American assembly the emotion of national pride or the love of constitutional liberty.

If there be anything in its conduct which at any time impresses the thoughtful observer unpleasantly, I think he will admit that, on the whole, it bears comparison with the French Assembly, or the great representative body of Germany, or even with the British House of Commons. But the constitution of that House has compelled it to resort to many devices and to submit to many inconveniences. We should all be sorry if we were compelled to submit to them in the Senate. The freedom of debate in the House of Representatives is gone. What I sometimes think is even of more importance, the freedom of amendment is gone also.

Both these great essentials to wise and honest legislation exist only to a very limited extent, and then at the pleasure of the majority. It is here only that the freedom of debate is secure.

From all this has grown up the most pernicious of unconstitutional practices, that of filibustering, which was introduced originally to prevent hasty or arbitrary action by the majority, but is now used to prevent or overthrow the rule of the majority altogether. So that the course of legislation in that House today is this: A few great measures, to which the party in the majority is agreed, are carried through by special rules adapted for the purpose, the minority being deprived of all rights of reasonable debate or reasonable amendment.

All other measures, however important, however salutary, however much desired by the majority of the House and a majority of the people, are at the mercy of a small and resolute minority. In the last House the antioption bill, which I regarded as an evil and pestilential measure, and the bankruptcy bill, which I regarded as a wise and salutary measure, met the same fate in spite of the desire of a clear and large majority of that body for their passage. This condition of things is unrepublican and undemocratic, and if continued long must result in the overthrow of republican government itself.

Another evil of like character and of equal magnitude has grown up from the necessities, or the fancied necessities, in the transaction of business in the House of Representatives.

The question whether an important measure shall be submitted to the House for consideration has to be determined, not by individual members, not by chosen committees, not by the majority of the House itself, nor even by its unanimous consent in many instances, but by the will of the presiding officer alone. He determines, at his sole volition, what members shall be recognized and what measures the House shall be asked to consider.

It is notorious that many measures of vast importance, many measures of relief demanded by justice and by the national good faith, abide session after session and Congress after Congress, having received the support of this body, and which would have received the unanimous consent of the other if they could be taken up, which never can be heard in that House because of the refusal of its presiding officer to submit them.

Now, Mr. President, habits like this in the conduct of legislation do not grow up and keep their place without some grave public reason, or at least some grave public necessity. It may be that a body which represents, as does that House, a temporary and sometimes fleeting popular purpose requires such restraints and chains and fetters as these for the public safety. I think we may well pause before we give to this body a character which will require such obstacles to be placed in the path of its free action. The time may come—some of us thought that it was near at hand—when it may be necessary to introduce even here a rule for a limited and carefully guarded clôture in debate.

Every member of this body would regard that as a most painful necessity. If that time ever comes, it will be because rules established for the protection of freedom of action in the Senate have been abused to prevent and subvert it. But I hope and believe the time will never come when any question will be taken in this Senate in regard to which every Senator shall not have an opportunity to express fully and freely his opinion in debate, and in regard to which he shall not have the fullest opportunity to offer amendments as seems to him desirable.

I suppose there have been a few instances of corruption of State Legislatures in the election of Senators. In a few cases such attempts have been exposed and failed in the Legislatures themselves. In a few cases they have been detected here. In very few, indeed, they have probably been successful. I thought the Senate touched its low-water mark when a few years ago it refused to investigate one of them. It is a great mistake to suppose that nominating conventions will be much more easily dealt with, or that popular elections have been or will hereafter be any more exempt from such influences. Have popular elections in ancient republics, or in England, or here, been freer from corruption than elections through delegated and chosen assemblies? Mr. President, there will never, for any length of time, be venal Legislatures without a corrupt people behind them.

Besides, there are, unhappily, other modes of destroying the freedom of elections, to which popular elections are exposed, from which legislative assemblies are free. The great prize of the office of Senator is, if this amendment be adopted, to be added to the temptations which, unless many a report in the other House be without foundation, have induced in very many instances in our history false counts, fraudulent naturalization, personation of voters, fraudulent residences, forged returns, intimidation, and mob violence. These attend elections in great cities and in States where race differences still add their bitterness to the struggle for political power.

There have been, it is estimated, more than three hundred and twenty contested-election cases in the House of Representatives. They have been the scandal and reproach of our political history. Excepting a very few creditable examples, they have been decided for partisan considerations, as like cases were decided in the British House of Commons until jurisdiction was transferred to the judges.

I suppose it is not intended to take from the Senate the power to judge of the election of its own members. Until now the contested-election cases in the Senate have in general depended upon constitutional or legal questions, or upon facts easily ascertained and established. But if this change be made, the Senate, in every close election, must undertake investigations which will range over an entire State. A contest in New York, or Pennsylvania, or Illinois, or Ohio may put in issue the legality of every vote cast in a State of three million, or five million, or perhaps within a generation, of ten million people. There will never be a close election without a contest here. Unless human nature shall change, the result of these contests will depend on partisan considerations, and will shake public confidence in the Senate to its very foundation.

Let no man deceive himself into the belief that if this change be made the Senate of the United States will long endure. Another legislative system will take the place of that which our fathers devised for us, and which for a hundred years has been the admiration of mankind. The method of election is indispensable to secure the peculiar quality of the body to be elected. The change will lead to an attempted overthrow of the equality of the Senate.

The States never consented to perpetual equality in a senate made up in any other way or on any other principle of selection. They never agreed that there should be forever between New York and Maine an equality in a legislative chamber, which is only a house of representatives made up of differently constituted districts. In twenty years the State of New York will have ten millions of people, with a vote for every five persons. Do you think they will long endure to submit to equality in legislation, in the making of treaties, in the appointment of great executive officers, in the power to punish and remove great offenders, in the making of war, and in the making of peace, with the 8,000 voters of dwindling Nevada, when the two States are simply two representative districts, whose only difference is that one is two hundred and fifty times as large as the other?

New York submits to this loyally to-day. She has pledged her eternal allegiance to the Constitution. She can not change it without the consent of every other State. It is so nominated in the bond, and is the price she pays for being the Empire State of an imperial nation. She can not escape it without a revolution. But open to her this door. Tell her that the Senate, as Hamilton and Jay conceived it, is gone. Tell her that it is no longer to be made up of chosen men, selected by chosen men, to be removed one degree from public impulse and passion, and representing the deliberate, sober, and instructed will of the people. She will tell you that her constitutional obligation has gone also, and that the equality of the States in the Senate may henceforth be abolished or modified like other provisions of the instrument. "I never promised," she will tell you, "to submit to it forever, under your new arrangement." "*Non in hæc fœdera veni*," or, as my great predecessor on this floor used to translate it: "I made no such bargain, and I stand no such nonsense."

Various methods of electing Senators were proposed and thoroughly discussed in the Convention, but the vote for the present method was at last unanimous. I think the suggestion of another method of choice is of quite recent origin and is more the outcome of circumstances that are not only recent, but will be temporary. Chancellor Kent, volume 1, page 225, says:

> The election of the Senate by the State Legislatures is also a recognition of their separate and independent existence, and renders them absolutely essential to the operation of the National Government.

The Federalist, number 62, written by Hamilton, says:

> It is equally unnecessary to dilate on the appointment of Senators by the State Legislatures. Among the various modes which might have been devised for constituting this branch of the Government, that which has been proposed by the convention is probably the most congenial with the public opinion. It is recommended by the double advantage of favoring a select appointment, and of giving to the State government such an agency in the formation of the Federal Government as must secure the authority of the former, and may form a convenient link between the two systems.

Hamilton adds in the same number of the Federalist:

> In this spirit it may be remarked that the equal vote allowed to each State is at once a constitutional recognition of the portion of sovereignty remaining in the individual States and an instrument for preserving that residuary sovereignty. So far the equality ought to be no less acceptable to the large than to the small States, since they are not less solicitous to guard by every possible expedient against an improper consolidation of the States into one simple republic.

The Convention which framed the Constitution, after some consideration, unanimously rejected the plan of choosing Senators by the people, and unanimously adopted the present system. Judge Story (Constitution, section 704) mentions as one of the reasons that this "would increase public confidence by securing the National Government from any encroachments on the powers of the States."

This idea deserves to be dwelt upon. The State Legislatures are the bodies of men most interested of all others to preserve State jurisdiction—more than the governors, who may be expected to aspire to national employments. It is well that the members of one branch of the Legislature should look to them for their reëlection, and it is a great security for the rights of the States. The State Legislatures will be made up of men whose duty will be the administration of the State authority of their several State interests and the framing of laws for the government of the State which they represent. The popular conventions, gathered for the political purpose of nominating Senators, may be quite otherwise composed or guided. Here, in the State Legislature, is to be found the great security against the encroachment upon the rights of the States.

How many instances there have been in our history in which an immediate popular vote would have led to disastrous consequences, but the sober second thought of the people has led to the path of safety. Mr. Madison said in the Constitutional Convention (see Madison Papers, volume 2, page 847):

> If the opinions of the people were to be our guide, it would be difficult to say what course we ought to take. No member of the Convention could say what the opinions of his constituents were at this time, much less could he say what they would think if possessed of the information and lights possessed by the members here; and still less what would be their way of thinking six or twelve months hence.

Suppose that if, instead of action through a convention, the adoption of the Constitution itself had been submitted to a direct popular vote, it would have been rejected by a majority of the States, certainly by the States of Connecticut, Massachusetts, New York, and Virginia, the four great States without whose coöperation the establishment of national government would have been impossible. How many times great waves of delusion have swept over the land, whose force was broken by the sober discussions of deliberate assemblies. The great anti-Masonic movement of 1835, the Know-Nothing movement of 1854 and the years that followed, are but two out of many examples.

Neither Charles Sumner nor Salmon P. Chase could have been elected by a popular vote when they were first chosen. Mr. Sumner certainly would have gone down before the Know-Nothing movement, which he so bravely breasted, if the question of his reëlection had been submitted to a popular vote in Massachusetts in 1855. It is quite doubtful if Mr. Webster himself would have been chosen by a direct vote of the people of Massachusetts at any time after 1850.

It is the purpose and the effect of this constitutional amendment to overthrow State autonomy in two particulars, in regard to which the State is to be bound and fettered for all time unless two-thirds of the two Houses of Congress and three-fourths of the States shall hereafter consent to retrace their steps.

First, the States, in many instances, distribute their political power evenly. The people are represented in the State Legislatures by their neighbors and associates, by men whom they know and whom they respect and who represent the local feeling.

This proposed amendment requires the voice of the State to be uttered by masses of its citizens, and removes political power to the great masses who are collected in our cities. Chicago is to cast the vote of Illinois, Baltimore of Maryland, New York City of the State of New York, and Cincinnati of Ohio. The farmer class, which now have their just weight, will be outweighed by the dwellers in the great towns where the two extremes meet—great wealth and great poverty—and combine to take possession of the affairs of the Government.

Second, plurality must take the place of the majority. The opportunity for third parties to have a just and reasonable weight will be destroyed.

Besides, there will be larger opportunities for fraud and crime in elections. These will be easy to commit and hard to be inquired into.

Mr. President, a people has always a distinct individual character. A city, a State, a nation, is very human. It has its hopes, its fears, its passions, its tastes, its prejudices, its resentment, its affection, its hasty impulse, its sober judgment, its deliberate will. We attribute to it the moral qualities of patience, endurance, and self-sacrifice. These qualities are made up of the prevailing temper of the men and women who possess them, but they are of a higher standard than is attained by any individuals except the best.

The Spartan or the Swiss or the American quality is as well known and as individual and distinct as that of the great heroes of history. It is this trait that causes the affection which we feel for our country. We love it with an individual love. We cherish it with a supreme affection. Men die for it as they would die for wife or parent or children. It is therefore no dishonor to the American people that we demand that in the conduct of their great affairs they shall do what every wise man and every good man and every brave man is expected to do in the conduct of his own.

It is no affront to the American people to require that they shall be asked to secure that deliberation, that caution, that

putting aside of hasty impulse and passion in their important affairs that every wise man practices in his own. This Republic is no mushroom growth. It is an oak which adds ring to ring through many a summer's heat and winter's cold. Its glorious gains come slowly that they may come surely. The deliberate will of the people is, however, sure and certain of accomplishment. Whatever the American people have thoughtfully, wisely, and patiently considered and designed and resolved upon, that result is sure to be accomplished. And our present constitutional forms and mechanisms have always proved abundantly sufficient for its accomplishment. And it is hardly too much to say that the great beginnings of popular movements for liberty have been in the Senate.

Mr. President, it is not true that the Senate, in the sober judgment of the American people, has failed to meet the just expectations of the generation who framed and adopted the Constitution. It has responded quite as speedily and quite as directly to the sober conclusion of the popular judgment and to the settled desires of the popular heart as has the other House or as has any State Legislature.

It has originated far more than its proportion of the great measures in our legislative history, for the benefit of the people, which are found in our statute books.

It has resisted what is evil, but it has also initiated and accomplished what is good. This was never more true than in recent years. It is not too much to say—and I assert it without fear of successful contradiction—that—

If any private citizen want justice;

If any executive officer want to improve administration;

If any man desire new and wholesome laws;

If any man want the public mind awakened by discussion—he seeks and he finds what he desires in the Senate. Why, even the friends of this amendment to the Constitution come here for its first serious discussion.

It is said the recent elections of Senators in States lately admitted have been attended with some occurrences that tend to bring the present method of choosing them into disrepute. There has been no investigation into this matter. No man here can say how much truth there may be in these reports, in the charges or suspicions which appear in the columns of the newspapers. The fact that those elections have resulted in a way some of us do not like is of little importance.

The only questions are whether whatever evil may have attended them is likely to be permanent, and whether the same evils would not have existed if the choice had been by popular election, and have not existed to an equal degree in the choice of governors and Representatives in Congress. When we consider the circumstances of these new communities it is astonishing and gratifying that they have done so well. It seems to me that the inauguration of their governments was creditable to them. Their population is spread over large spaces of territory.

The people of the different parts of the new States are unknown to each other, and the representative or senator in the State Legislature is frequently little known to his constituents. Mingled with the honest and enterprising men who have chosen their residences in the honorable ambition to achieve fortune for themselves, to perform every duty of good citizenship, to build on sure foundations States of the best kind, are adventurers, criminals, men from all parts of this continent, and from Europe and Asia, some of whom have left their country for their country's good. They are not worse than other communities in this respect, but they have less opportunity to know each other. They will compare most favorably with the dense populations of some Eastern cities. But the people of this class are there.

These communities are called upon to take upon themselves the great function of government under circumstances which would have rendered success impossible to our ancestors at Plymouth, or Boston, or New Haven, or Philadelphia; suppose that, added to the chosen and venerable men who founded the old thirteen States, there had come across the sea adventurers from all Europe; suppose that on the first organization of their legislative bodies had depended the political ascendency of one or the other of the contending factions who were struggling for the political control of all Europe; suppose that every passion and ambition and jealousy and evil desire which entered into such a controversy had followed them to their new domains and had blazed even more fiercely among them; suppose men of large wealth were ready to corrupt them to the service of their own personal ambitions; suppose members or emissaries of the national committees of great parties had seated themselves with their money bags at their gates—is it likely that the Puritans at Plymouth, or the Cavaliers of Jamestown, or the Quakers of Philadelphia would have succeeded any better in founding their States than our countrymen and brethren in the far West? But all these things will pass by. The people will come to know each other. They will understand their permanent interests. Combinations of dishonest men will be powerless before the honesty and intelligence of the people. Property will increase. Every honest and industrious man will get his share, and the interests of property will have their due and just influence. The people will choose legislators whom they are willing to trust with their local concerns, and so fit to be trusted to select the men who are to wield their share of national power.

I do not think the American States that have come into the Union within the last twenty-five years have any reason to shrink from a comparison with any others in respect to the honesty, the capacity, the industry, the fidelity, or the wisdom of the men who have represented them in the national councils. While I have differed with them, or with most of them, upon some very important questions, I believe that if we had had a Senate and a House composed wholly of the representatives of these new States our national legislation would have gone on well, and would have been, in general, acceptable to the people of the whole country.

The argument of the able Senator from Illinois, which I have read with much care, is summed up in three propositions:

First. That the people of Illinois believe that under existing conditions the election of Senators by their State Legislatures has failed of satisfactory results.

Second. The framers of the Constitution did not properly estimate the intelligence and capacity of the then people of the several States. Most of the members of the Convention were themselves still under the influence of inherited aristocratic ideas, and were without experience of the successful workings of popular institutions.

Third. The Legislature of Illinois, before 1847, was omnipotent and abused its great powers. The Constitution of 1847 deprived the Legislature of its electoral powers and conferred the election of governor and judges upon the people. The names of the illustrious men who have since composed the supreme court of Illinois, elected by the people, have justified the highest hopes of those who favored the innovation.

I have stated these propositions in the Senator's own language. They contain his entire argument. Let us look at them. "The election of Senators in Illinois under existing conditions," says the Senator, "has failed of satisfactory results." He invites us to a contrast with the results attained by popular elections since 1847, under which governors and illustrious judges have been chosen by the people.

The Senators of Illinois in 1847 were Stephen A. Douglas and Sidney Breese. Does the Senator doubt that Stephen A. Douglas would have been chosen by the people of Illinois, if the question had been submitted to them, on every occasion when he was chosen by the Legislature?

Mr. PALMER. Will the Senator allow me to answer that question?

Mr. HOAR. Certainly.

Mr. PALMER. Judge Douglas would undoubtedly have been chosen by the people at any time except at his last election, when the popular vote was against him.

Mr. HOAR. I do not so understand it. Was not Sidney Breese, successively justice and chief justice, one of the most illustrious of the illustrious men whom the Senator says the people of Illinois elected to the bench? They were succeeded by James Shields, the gallant soldier of Irish birth, who represented three States in this body, and by William A. Richardson. Will it be claimed that either of these eminent men would not have been chosen if the people could have chosen them? Next came Lyman Trumbull and Richard Yates. Trumbull was elected by the people to the supreme bench in 1848 and Yates was governor. Then came Richard Oglesby, three times chosen governor, and John A. Logan, the most illustrious volunteer soldier of the war and the favorite candidate of Illinois for the Presidency. I do not think we have quite yet reached the "failure under existing conditions."

Next we have David Davis, three times chosen judge by the people, who came at last to the Senate from the bench of the Supreme Court of the United States, where Abraham Lincoln had placed him. Can the Senator from Illinois place his finger upon one of this illustrious line, who did grace and honor to the Senate, who was not among the foremost citizens of his noble State or who would not have been chosen if the choice had been by the people? Then comes CULLOM, the friend and pupil of Abraham Lincoln, twice governor by the choice of his fellow-citizens, as he has been twice Senator by the choice of the Legislature. Has the Senator yet reached the period for his argument that the legislative selection of Senators is on a lower level than the choice of the people for governor or for judge?

There remains to be considered the case of the Senator himself. I might otherwise feel a delicacy in discussing it. But the facts strongly support my argument, and, as stated in his ample autobiography, are so highly creditable to him, that I must be

pardoned for alluding to them. After a career of brilliant civil and military service, and after having been tried for four years in the office of governor, he was nominated for governor again in 1888. The ungrateful people of Illinois defeated him by a majority of 38,000 on a direct popular vote.

Mr. PALMER. I ask pardon. Will the Senator please state again the majority?

Mr. HOAR. Thirty-eight thousand in 1888.

Mr. PALMER. My colleague [Mr. CULLOM] will furnish different figures.

Mr. HOAR. I have taken the figures very carefully, taking the votes of all other parties.

Mr. CULLOM. As my colleague [Mr. PALMER] has referred to me, I will state that so far as the two prominent candidates were concerned, my colleague and his opponent, Governor Fifer, my colleague was defeated for governor by about 12,500 votes, if I remember correctly.

Mr. HOAR. At any rate, it is enough. The people of Illinois defeated him by 12,500, without counting the third party or the fourth party vote; and then he was elected Senator by the Legislature. The people of Illinois elected a Legislature whose majority was originally opposed to him. But on conference and comparison of views he was finally selected.

Now, if the Senator from Illinois means to affirm that this, the latest result of choosing Senators in Illinois by the Legislature, is unsatisfactory to the people, we who know the value of his service must be permitted respectfully to dissent.

The Senator from Oregon [Mr. MITCHELL] has brought to the discussson of this interesting question the great industry and the great ability which always characterize his contributions to our debates. I have carefully read his argument of April 22, 1890. I think he summed up in that all the chief reasons for this change. He begins with a history of the proceedings of the Convention which framed the Constitution, so far as they deal with this subject. As I have already observed, he imputes to that Convention and to its members a distrust of the people. I differ from him in that opinion, as I do from the Senator from Illinois [Mr. PALMER], who utters the same opinion.

I think the members of the Convention exhibited a sublimer trust in the people than any other body of men who have been gathered together in human history. They were, some of them, the same men who signed the Declaration of Independence in 1776. They were inspired by the same faith that inspired the Congress which, as its final act, ordained that great security of freedom—the Ordinance of 1787. They were laying the deep foundations of what was hoped would be an eternal structure. Every stone, every beam, every rafter, was laid in confidence of the wisdom and the justice of the people and their eternal capacity for self-government. Trust in the people was with them an article of profoundest religious faith. They derived the great doctrine of human equality, which they placed in the forefront of the Declaration, which made us a nation, from the word of the Creator of mankind himself, as they read and interpreted it.

But, as I have already said, their confidence in the people was like the confidence we feel in a wise, just, and righteous man, capable of self-government and understanding and self-restraint, who in the great actions of life exercises for himself deliberation, reflection, and self-control. It was the immediate action of the people which they deprecated. It was final and absolute self-control and self-government which they ordained and secured.

The Senator from Oregon said that the Constitution these men ordained has required amendment. He is amazed that the amendments were not understood and incorporated in the Constitution by the men who originally framed it. But the Senator has failed to see that every one of these amendments, from the first to the fifteenth, is an amendment in the direction of putting new control upon the immediate and direct action of majorities. Every one of them secures the rights of the people by a restraint upon their power. Every one, with a single exception in the change of the method of electing the President—adopted after the election of Mr. Jefferson—both the original twelve and the three that have been adopted in our time, are simply declarations of those things which, for the welfare of the whole people, no majority under our Constitution shall be permitted to do.

The Senator goes on to announce, as the foundation of his argument, the principle that no system can be properly termed free or popular which deprives the individual voter of his right to cast his vote directly for the man of his choice for any office, whether it be a State officer, member of the national House of Representatives, United States Senator, or President. And the logic of his position compels him to avow this doctrine. So that, if the people go with him, this amendment must be followed by others, under which the United States judiciary and the President and the Vice-President are to be chosen by the action of a direct popular majority. This may be sound policy; but when it is established, the Constitution of the United States is gone.

The Senator further adds that in his judgment lodging this power in the State Legislatures tends to the election to the Legislature of a man solely because of his opinions as to election of a Senator, and the "question as to his qualifications for the business of the general Legislature, or the views he entertains with reference to the great material interests of the State—internal improvements, assessments, taxes, revenue, corporations, appropriations, trusts, municipal affairs, salaries and fees of officers, civil and criminal code, apportionment, and other like important subjects—are wholly lost sight of."

I can only oppose to this opinion of my honorable friend my own opinion that this is a very important consideration in favor of the present system. I think that it is best to commit this great function of choosing the members of this body to the deliberate and careful judgment of men who are trusted with every other legislative function of sovereignty, and not to adopt a method which in practice will commit it to men whom the people trust with nothing else.

Mr. President, if you take from the men who now represent the sovereignty of the State in all its domestic relations the right to choose the men who are to exercise its share of national legislation, you will diminish their weight and character. You will get for the discharge of both duties men less fitted to be trusted with either.

The Senator from Oregon says that he finds, as a chief reason for promoting the change—that he finds everywhere discontent and unrest. If he means that he finds everywhere discontent with the present method of choosing Senators, or with the existing Constitution of the United States, or even among thoughtful men with the Senate itself, I must express my dissent from his opinion. On the contrary, I believe that any intelligent assemblage of American people will unite as readily and enthusiastically in praise of their national Constitution as at any time since it went into operation. I believe, if called upon to declare what it is in the Constitution they especially value, they would now, as ever, state that among the chief titles to their regard are the Senate and the national judiciary.

If the Senator mean that there is a general feeling of dissatisfaction with existing conditions, that our social life is disturbed, that the classes in society are getting into conflict with each other, that the people are in that frame of mind which precedes a great revolution—while I think he exaggerates very much the state of feeling, so far as he is right I think he urges an especial reason for not changing the Constitution to-day. Certainly such a change should be made soberly, quietly, deliberately, and by men who can look through the history of a century, and not look merely at the fleeting and passing evils.

I have read also with great attention the argument upon this subject by the accomplished and thoughtful Senator from Indiana [Mr. TURPIE]. He thinks that neither of the three departments of the National Government is now controlled by the people. If he means that the choice of neither is directly controlled by the people, I would remind him that not only one of our two legislative branches is the direct popular choice according to numbers, but that action of the electoral colleges is, in fact, a direct expression of the popular will. So that the House of Representatives, which shares equally with the Senate in power of affirmative legislation, and the President, with his executive and treaty-making powers and his veto upon all legislative action, are the result of direct popular choice.

If he mean that, when our three departments of Government are chosen, their action should be the result, not of the individual conscience and judgment of the legislature, of the executive, or of the judge, but should respond to the present and instant pulsation of the popular heart, I answer that I think he is wrong in desiring a government so constructed or administered.

If the Senator's doctrine be sound, it seems to me it should be applied everywhere; that the people should, as far as possible, deliberate for the legislature, execute for the officer, and decide for the judge. If, as I believe, that be the worst and not the best theory of government on earth, the doctrine should be applied nowhere.

Mr. President, the Senator from New Hampshire [Mr. CHANDLER] well said that this is the first change ever seriously proposed in the framework of our National Government. All the other amendments have been restraints upon the people's will to secure the people's rights. The amendment in the time of Mr. Jefferson only required the designation by the electoral college of the offices to be held by the persons for whom their votes were cast; a change shown to be necessary by the experience in the famous contest between Jefferson and Burr.

Never before has there been proposed, so far as I know, a change which is to affect the great balance of political power which our fathers adjusted with so much care. I quite agree with

the Senator from Oregon that the principle of this change will lead to the choice of the President, the choice of the Senators, and in the end to the choice of the judges by the mere brutal force of numbers. I do not agree with him in thinking such a change is desired by the American people. When it shall be accomplished, the American Constitution is gone.

Mr. President, I have no respect for the habit which has long since grown up of undervaluing the character of American legislative assemblies. Since our Government went into action it has been the habit of thoughtless persons or of persons who in their own lives have had no experience in public responsibilities—the habit has even crept into grave histories—to decry and disparage the Continental Congress. The men who made up that illustrious body began their services with the great state papers which commanded the admiration of Chatham, who declared that although he had read Thucydides and was familiar with the work of the master minds of the past, in his judgment they equaled anything in antiquity.

These papers—the address to the King, the address to the British people, and the address to the people of Ireland—were followed by the Declaration of Independence. It was the same Continental Congress whose wisdom selected Washington for the command of our armies and Franklin and John Adams for our diplomatic agents abroad. It was the same Continental Congress which stood faithfully by Washington during the seven years of the Revolutionary war, which ended its labors with the great Ordinance of 1787, and whose members composed in large part the body which framed the Constitution itself.

Of the thirty-nine men who signed the Constitution, eighteen signed the Declaration. Ellsworth, who signed the Declaration, was absent when the Constitution was completed. Gerry, who signed the Declaration, refused to sign the Constitution. The failure, if there were any failures in the conduct of the Revolutionary war, was the failure of the people of the American States, who were too jealous to part with their own power or to establish and trust the necessary agencies for their own protection and safety.

The Legislature of my own State has had two hundred and sixty years of illustrious history. During my life, while the Legislature has been in session it has been the target for the sneers of critics and of the press. But every session has ended its own term of laborious service, completing a record in which always is to be found some new and valuable legislation for humanity, for labor, for education, for administration of justice, which is alike beneficial to their own constituencies and an example to the people of other Commonwealths.

I am neither afraid nor ashamed to compare the statute book in which is found the essence of the history of Massachusetts for nearly three centuries with any other body of laws which may be produced by any other Commonwealth or by any nation. I believe the men who have done this work have performed also to the satisfaction of the people the important work of selecting their representatives in the national Senate.

Why, it is said the Senate has not responded to the popular will. When has it failed to respond to the popular will when the popular will itself had become settled? The gentlemen who make this complaint are impatient. They must remember that the Senate has to act for the interests of a people of 65,000,000 and for a nation whose life is to be measured, not by years or by generations, but by centuries. Sessions of Congress, terms of Presidential office, generations of men, count but as minutes, are but as the pulsation of an artery in this mighty national life. But whenever the American people has made up its mind, when its judgment is formed, when its will is determined, that will is sure to be carried into effect. Whether through Senates or over Senates, through courts or over courts, through Presidents or over Presidents, through constitutions or over constitutions, the irresistible current will make its way.

Mr. President, I have no patience with the spasms of dismay which seem now and then to affect some worthy philosophers, and the effects of which are occasionally seen in the Senate Chamber. One day there is a fear that a few speculators in cotton or corn will diminish the price to the seller and raise it to the buyer; and so we are asked to overthrow and sweep away all of the rights of the States by a single legislative act, and a majority of this body and the other House lose their heads and are taken off their feet. They think all our existing constitutional resources are powerless before a few speculators. So, because a few millionaires clink their money bags about our State legislative halls, it is proposed to overthow the Constitution of our fathers and build up a pure democracy in its place.

The American people have dealt with dangers that were serious before. They have put down rebellion, they have abolished slavery, they have thrown off the yoke of foreign tyranny by strictly constitutional processes, and with the weapons in their hands that have served them so well in the past, they have no occasion for apprehension of these new dangers.

Contempsi Catilinea gladios, non pertimescum tuos.

The people of the United States are proud of their history. It is a touching and noble story. The American youth knows something of the annals of other lands. His childhood has delighted in the half-fabulous legends by which they explain their origin. He is especially acquainted with the history of the older republics and of countries where constitutional liberty has in other years found its home. He can tell you something about Solon and Lycurgus, about Romulus and the she wolf, of Numa in his cavern, of Tell and Winkelried, of Alfred and Edward, of Agincourt and Cressy, and the Barons who wrung Magna Charta from King John.

But he better loves the story, with which no romance or fable mingles, upon which history pours its full and blazing torchlight, of the men who founded these States of ours in Christian liberty and law. He likes better to hear of the Pilgrim of Plymouth, of the austere Puritan of Salem and New Haven, of the liberty-loving enthusiast of Rhode Island, of the Quaker of Pennsylvania, of the Catholic of Baltimore, of the adventurous Cavalier of Jamestown. He knows the quality of the woodsmen who, in the later generations, struck their axes into the forests of this continent; of the sailors who followed their prey from the Arctic to the Antarctic Sea. He knows how his country has spread from a little space by the side of the Eastern sea, till in her westward march the gates of the East become visible again, and she has added to her dominion until, as my late colleague said, "before the sun sets upon Alaska he has risen upon Maine." He knows by heart the military achievements of the Revolution and the great sea fights of the war of 1812. He knows what his country has done in science and literature. He knows what her inventive genius has added to the world's wealth and how it has lifted the burden beneath which the back of humanity has so long been bowed and bent.

But he knows, also, something of that which makes these great achievements permanent and secure. He knows something of the great foundations upon which the structure of our Constitution is reared. He knows something of the temperate restraints of American liberty. The figures of great judges and of great Senators command his admiration and stir his enthusiasm and excite his sober approbation quite as much as any achievement by sea or any military glory upon land. The profound sagacity of Ellsworth, whose great fame in the beginning of the Government reached the people even from within the closed doors of the Senate Chamber; the unequaled wisdom of Marshall, without whose luminous exposition the mechanism of the Constitution must have failed; the robust sense of Taney; the ripe learning and lofty patriotism of Bradley—these will be as familiar to his instructed intelligence as the name of any great captain or admiral. He comes of a race of political shipwrights, and he knows by heart below and aloft the whole structure of our ship of state. He knows to the fullest depths of its meaning what the flag stands for. He knows how to bend the sails and step the masts. He likes only too well the sound of the guns. But he has found out that it is not the colors, or the armament, or even the sail that makes the ship stanch and the voyage prosperous and secure. It is the tough resistance of the mast, the strength of the timbers, the fashion of the keel, the strength below the water line, the chain and the anchor, to which the ship of state, with her precious freight, owes her safety.

He knows what master laid her keel;
What workmen wrought her ribs of steel;
Who made each mast, and sail, and rope;
What anvils rang, what hammers beat,
In what a forge and what a heat
Were shaped the anchors of her hope!
He fears no sudden sound or shock,
'Tis of the wave, not of the rock;
'Tis but the flapping of the sail,
And not a rent made by the gale!

I said in the beginning that this is a question of centuries and not of years. It is to the credit of the men who framed the Constitution that they so understood it. If they had taken counsel of their own recent experience, they never would have ventured to appeal to the people of their own generation to establish the permanent securities of the Constitution, and would never have ventured to trust them with the powers which the Constitution creates.

The six years which followed the peace of 1783 present but a sorry story. It is a tale of feeble government, of disaster, of discontent, of broken faith, of depreciated currency, of stay laws, of suffering debtors, of cheated creditors, of lawlessness, of Shays's rebellion, and of popular commotions North and South. Some of our best friends abroad thought it was all over with us, and that the best thing we could do was to ask George III to take us back into favor. But out of it came the Ordinance of 1787, the Constitution of the United States, the design of the

Supreme Court, the conception of the Senate, the great debate upon the adoption of the Constitution, and the adoption of the Constitution by the unanimous action of thirteen States.

We have had one great civil war. But yet it is our glory, as it is the glory of the country from which our ancestors came, that we determine the differences which cause revolutions elsewhere by debate and not by arms. We reason them out, and do not fight them out. This Chamber has been the most conspicuous arena of these conflicts. Here the champions have encountered and measured their strength. There have been chieftains in the Senate Chamber whose names and memory the American people cherish with pride and gratitude, as they cherish the names and memory of the men who marshaled the forces at Saratoga, or Yorktown, or New Orleans, or Appomattox.

The great conquests which gave the Union and Constitution their empire over the reason and affection of our countrymen have been achieved here. Here Webster hurled the weighty projectiles of his irresistible argument. Here the voice of Clay taught his countrymen North and South the great lesson of reconciliation. Here Calhoun was borne in his dying hours, his great heart overcoming the weakness and infirmities of his sinking body, sitting, as his colleague said, like "a wounded eagle, with his eyes turned to the heavens to which he had soared, but into which his wings could never carry him again." Here the blood of Sumner was shed—the baptismal water of our newer liberty. Here Seward summoned his countrymen to that irrepressible conflict from whose issue the vanquished gained even more than the victors. Victories in arms are common to all ages and to all nations. We do not excel, and it may be we do not equal, other people in these things. But the greatest victories of constitutional liberty since the world began are those whose battle ground has been the American Senate and whose champions have been the Senators who for a hundred years, while they have resisted the popular passions of the hour, have led, represented, guided, obeyed, and made effective the deliberate will of a free people.

INCREASE OF COMMITTEE MEMBERSHIP.

Mr. CALL. I ask unanimous consent that the pending resolution of privilege may be laid aside, that I may call up a resolution previously offered by me for the purpose of submitting some remarks thereon.

Mr. SHERMAN. Would the Senator from Florida prefer to speak now, or to have an executive session and speak to-morrow?

Mr. CALL. I am content, if it be the desire of the Senate, to speak to-morrow morning.

Mr. MILLS. Then let us have an executive session.

EXECUTIVE SESSION.

Mr. SHERMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty-five minutes spent in executive session the doors were reopened, and (at 2 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Saturday, April 8, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 7, 1893.

GOVERNOR OF UTAH.

Caleb W. West, of Salt Lake City, Utah, to be governor of Utah, vice Arthur L. Thomas, to be removed.

FIRST DEPUTY COMMISSIONER OF PENSIONS.

Dominic I. Murphy, of Washington, to be First Deputy Commissioner of Pensions, vice Andrew Davidson, resigned.

COLLECTOR OF INTERNAL REVENUE.

Ambrose W. Lyman, of Montana, to be collector of internal revenue for the district of Montana, to succeed James H. Mills, resigned.

COLLECTOR OF CUSTOMS.

David G. Browne, of Montana, to be collector of customs for the district of Montana and Idaho, in the State of Montana, to succeed Jeremiah Sullivan, whose term of office has expired by limitation.

SECOND ASSISTANT ENGINEER, REVENUE CUTTER SERVICE.

Levin T. Jones, of Maryland, to be a second assistant engineer in the Revenue-Cutter Service, to succeed James I. Brereton, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 5, 1893.

ASSISTANT TREASURER OF THE UNITED STATES.

James F. Meline, of the District of Columbia, to be Assistant Treasurer of the United States.

SECOND AUDITOR OF THE TREASURY.

T. Stobo Farrow, of South Carolina, to be Second Auditor of the Treasury.

DEPUTY FIFTH AUDITOR OF THE TREASURY.

James J. Willie, of Florida, to be Deputy Fifth Auditor of the Treasury.

POSTMASTERS.

Charles E. Peoples, to be pastmaster at Pomeroy, in the county of Meigs and State of Ohio.

William Dalrymple, to be postmaster at Nelsonville, in the county of Athens and State of Ohio.

Charles Bull, to be postmaster at White Oaks, in the county of Lincoln and Territory of New Mexico.

I. Mount Smith, to be postmaster at Hightstown, in the county of Mercer and State of New Jersey.

Helen I. Campbell, to be postmaster at Saxtons River, in the county of Windham and State of Vermont.

D. W. Nash, to be postmaster at Cuero, in the county of Dewitt and State of Texas.

Daniel Wyss, to be postmaster at New Philadelphia, in the county of Tuscarawas and State of Ohio.

William A. Hume, to be postmaster at Chilton, in the county of Calumet and State of Wisconsin.

Jacob Finch, to be postmaster at Stevens Point, in the county of Portage and State of Wisconsin.

John Dawe, to be postmater at Edgerton, in the county of Rock and State of Wisconsin.

Henry W. Hough, to be postmaster at Kirkwood, in the county of St. Louis and State of Missouri.

Amasa Howe, to be postmaster at Presque Isle, in the county of Aroostook and State of Maine.

Elliott N. Benson, to be postmaster at Bar Harbor, in the county of Hancock and State of Maine.

Charles F. Newton, to be postmaster at Woodbridge, in the county of Middlesex and State of New Jersey.

J. Elwood Harvey, to be postmaster at Little Silver, in the county of Monmouth and State of New Jersey.

George W. Evans, to be postmaster at Ocean Grove, in the county of Monmouth and State of New Jersey.

Miss Rebecca Snape, to be postmaster at Petersburg, in the county of Menard and State of Illinois.

Stephen Oliver, to be postmaster at Griggsville, in the county of Pike and State of Illinois.

Francis A. Glass, to be postmaster at Cresco, in the county of Howard and State of Iowa.

Frank Mapes, to be postmaster at Kansas City, in the county of Wyandotte and State of Kansas.

Albert A. May, to be postmaster at Cannelton, in the county of Perry and State of Indiana.

Orris T. Dickerson, to be postmaster at Spencer, in the county of Owen and State of Indiana.

SATURDAY, *April 8, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

INCREASE OF COMMITTEE MEMBERSHIP.

Mr. CALL. I ask unanimous consent to lay aside the pending resolution in order that the Senate may proceed to the consideration of the resolution on the table introduced by me, for the purpose of submitting some observations upon it.

The VICE-PRESIDENT. The resolution of the Senator from Florida will be read.

Mr. CALL. I have modified the resolution as originally introduced by me.

The resolution submitted by Mr. CALL March 20, 1893, was read, as modified, as follows:

Resolved, That the Committees on Finance, Naval Affairs, Military Affairs, Judiciary, Foreign Relations, Appropriations, Commerce, and Interstate Commerce shall each consist of fifteen members.

The VICE-PRESIDENT. The Senator from Florida asks unanimous consent that the resolution reported from the Committee on Privileges and Elections be laid aside for the consideration of the resolution which has just been read. Is there objection? The Chair hears no objection.

Mr. FAULKNER. I ask the Senator from Florida to give way for a few minutes that I may make a motion that the Senate proceed to the consideration of executive business.

Mr. CALL. Very well; and if agreeable to the Senate I can postpone my remarks until Monday.

Mr. MARTIN. Before the question is put on the motion for an executive session, will the Senator from West Virginia permit me to engage the attention of the Chair for a moment?

Mr. FAULKNER. Certainly.

WITHDRAWAL OF PAPERS.

Mr. MARTIN. On the 21st of February, 1890, the late Senator Plumb introduced in this body a bill, No. 2797, to place the name of Lucy A. Dewey on the pension rolls. The bill was read and referred to the Committee on Pensions. No action was ever taken further than that. Mrs. Dewey has now placed her matter before the Commissioner of Pensions, and she desires to have the papers withdrawn. I ask for the adoption of the proper order withdrawing the papers.

The VICE-PRESIDENT. The order will be read.

The order was read, as follows:

Ordered That Lucy A. Dewey have leave to withdraw from the files of the Senate her pension papers presented with Senate bill 2797 February 21, 1890.

The VICE-PRESIDENT. The Chair hears no objection, and the order will be agreed to.

Mr. SHERMAN. Subject to the rule.

The VICE-PRESIDENT. Subject to the rule.

EXECUTIVE SESSION.

Mr. FAULKNER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirty minutes spent in executive session the doors were reopened, and (at 12 o'clock and 40 minutes p.m.) the Senate adjourned until Monday, April 10, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 8, 1893.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

James B. Eustis, of Louisiana, to be ambassador extraordinary and plenipotentiary to France.

COLLECTOR OF CUSTOMS.

Henry W. Egner, of New Jersey, to be collector of customs for the district of Newark, in the State of New Jersey, to succeed Eli H. Reynolds, whose term of office has expired by limitation. The nomination of Henry W. Egnor for the same office, delivered to the Senate on the 3d instant, withdrawn, to correct the name of the nominee.

SPECIAL FISCAL AGENTS, LONDON, ENGLAND.

August Belmont, Walther Luttgen, and Oliver H. P. Belmont, trading under the name, style, and form of August Belmont & Co., at London, England, to be special fiscal agents of the Navy Department at that place, vice Seligman Brothers.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 6, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Bartlett Tripp, of South Dakota, to be envoy extraordinary and minister plenipotentiary of the United States to Austria-Hungary.

CONSUL.

Asa D. Dickinson, of New York, to be consul of the United States at Nottingham.

CONSUL-GENERAL.

Thomas T. Crittenden, of Missouri, to be consul-general of the United States at the City of Mexico.

SUPERINTENDENT OF CHARITIES.

John Tracy, of New York, to be superintendent of charities for the District of Columbia.

SOLICITOR-GENERAL.

Lawrence Maxwell, jr., of Ohio, to be Solicitor-General.

ASSISTANT ATTORNEY-GENERAL.

John I. Hall, of Georgia, to be Assistant Attorney-General.

ASSISTANT SECRETARIES OF THE TREASURY.

Charles S. Hamlin, of Massachusetts, to be Assistant Secretary of the Treasury.

William Edmond Curtis, of New York, to be Assistant Secretary of the Treasury.

ASSISTANT SECRETARY OF THE INTERIOR.

John M. Reynolds, of Bedford, Pa., to be Assistant Secretary of the Interior.

AUDITOR OF THE TREASURY.

John B. Brawley, of Pennsylvania, to be Auditor of the Treasury for the Post-Office Department.

MARSHAL.

James J. McAlester, of the Indian Territory, to be marshal of the United States court for the Indian Territory.

COLLECTOR OF CUSTOMS.

Dudley O. Watson, of Michigan, to be collector of customs for the district of Michigan, in the State of Michigan.

Executive nominations confirmed by the Senate April 8, 1893.

AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY.

James B. Eustis, of Louisiana, to be ambassador extraordinary and plenipotentiary of the United States to France.

COLLECTOR OF INTERNAL REVENUE.

John J. Carter, of Louisiana, to be collector of internal revenue for the district of Louisiana.

MONDAY, *April 10, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of the proceedings of Saturday last was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections; which will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

Mr. PEFFER. I desire to present a petition.

The VICE-PRESIDENT. The petition will be received, there being no objection.

PETITIONS AND MEMORIALS.

Mr. PEFFER. I present a petition from the National Citizens' Industrial Alliance of New York City. After several paragraphs of preamble the petition is couched in the following resolution:

Be it resolved, That we petition the President of the United States, the Attorney-General, and the Senate and House of Representatives to relieve the people from the oppressions and exactions of this great and powerful monopoly—

The Bell telephone patent monopoly—

who propose, in defiance of all laws and justice, the voice of the press, and the desires and will of the people, to continue to rule and rob our citizens who use the telephone by a fraudulent use of this illegally reissued patent and by dilatory litigation in our courts of justice.

I ask that the petition be referred to the Committee on Interstate Commerce.

The VICE-PRESIDENT. Is there objection to the reference suggested by the Senator from Kansas? The Chair hears none, and the petition will be so referred.

Mr. COCKRELL. I move that the Senate take a recess for twenty minutes.

Mr. HOAR. I ask the Senator from Missouri to allow me to introduce some morning business.

Mr. COCKRELL. Certainly.

Mr. HOAR. I present for reference to the Committee on Privileges and Elections the petition of Joseph W. Ady.

The VICE-PRESIDENT. The petition will be stated.

The SECRETARY. The petition of Joseph W. Ady, of Kansas, praying for an investigation of the election of United States Senator from the State of Kansas to fill the vacancy caused by the death of the late Senator Preston B. Plumb.

The VICE-PRESIDENT. The petition will be referred to the Committee on Privileges and Elections.

Mr. HOAR. I desire that the petition and accompanying documents may be printed for the use of the Senate.

The VICE-PRESIDENT. It will be so ordered in the absence of objection.

CHARGES AGAINST SENATOR ROACH.

Mr. HOAR submitted the following resolution; which was read:

Resolved, That the Committee on Privileges and Elections be directed to examine the allegations recently made in the public press charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with certain criminal offenses committed while cashier or officer of a bank in the city of Washington, and to ascertain the facts and circumstances so far as to enable the com-

mittee to determine and report what are the duty and power of the Senate in regard thereto; and for that purpose the committee shall have authority to send for persons and papers, to employ a stenographer, to sit during the recess of the Senate, and to act through a subcommittee; and its expenses shall be paid from the contingent fund of the Senate.

Mr. HOAR. This resolution is proposed as a substitute for one introduced by me the other day, and has been agreed upon after a conference between several Senators on both sides of the Chamber as the proper form. I will let it lie over, however, one day in order that it may be seen by Senators.

Mr. HARRIS. Let it be printed, Mr. President.

The VICE-PRESIDENT. The resolution will lie over and be printed.

INTERSTATE-COMMERCE INVESTIGATION.

Mr. BUTLER. I am instructed by the Committee on Interstate Commerce to report a substitute for the resolution of the Senator from Delaware [Mr. HIGGINS] and the Senator from Indiana [Mr. VOORHEES], and I ask that it be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The substitute will be read.

The Secretary read as follows:

Resolved, That the Committee on Interstate Commerce be, and is hereby, authorized to inquire whether or not the methods prevailing in the transportation of freight and passengers over the great railroa l lines of the country and the conditions and necessities of travelers and shippers and of the transportation companies justify or require a repeal or modification of section 5 of the interstate-commerce act of February 4, 1887, which prohibits pooling under any circumstances; and that said committee be further authorized to inquire whether the system of closing and sealing cars engaged in transporting merchandise from one of the States of the Union into another State through foreign territory, or from such territory into any State, or from such territory through the United States into foreign territory, or any system of bonding merchandise so transported, needs to be modified or further regulated by law, and whether all railroads engaged in such traffic should either be required to conform to all the provisions of the said interstate-commerce act or be prohibited from continuing such transportation business; and whether any modifications should be made of the existing provisions of law concerning the relations between common carriers and their employés; the said committee being hereby empowered to sit during the recess of the Senate, to act by subcommittees if deemed necessary, to take testimony at convenient points, to send for witnesses, books, and papers, and employ a stenographer, and to have its expenses paid from the contingent fund of the Senate; and it is expressly provided that no additional expense whatever shall be allowed for clerical hire under the terms of this resolution.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. PLATT. Where does the resolution come from? Is it reported by a committee?

Mr. BUTLER. It is reported by the Committee on Interstate Commerce.

Mr. PLATT. And is a report made upon the resolutions submitted by the Senator from Indiana [Mr. VOORHEES] and the Senator from Delaware [Mr. HIGGINS]?

Mr. BUTLER. It is. It is a substitute for those resolutions.

Mr. PEFFER. Mr. President, before the resolution reported by the Senator from South Carolina passes from the consideration of the Senate, I wish to impress upon the minds of the members of the Committee on Interstate Commerce the importance of the resolution submitted by the Senator from Indiana [Mr. VOORHEES]. Last winter, late in the season (I am not so certain now, as I have not the RECORD before me, but that it was in the summer), I had the honor to offer a resolution somewhat upon the same subject, and it was side-tracked, if I may use that expression, by referring it to a committee which I did not believe at the time and do not now believe, has any jurisdiction of the matter, and as I believed then and believe now, for the purpose of keeping it away from consideration by this body.

I now hope that the Committee on Interstate Commerce will take hold of this subject without gloves and treat it as it ought to be treated, beginning with the proposition that the workingman is equal with the man of capital; that the employé of a railway company has just as many rights and just as sacred ones as those of the employer; and that it will go further than that, and adopt as a basis the doctrine laid down by Judge Ricks in his recent decision. That decision is criticised a good deal by some members of labor organizations throughout the country, but I think that as they come to understand it better, as they come to see the breadth of its scope and to view it in all its fullness of meaning, they will see that it is the first broad-gauged declaration of principle concerning the relations between employers and employés engaged in interstate commerce that has yet been judicially proclaimed; that is to say, that the employé of a railway company is just as much a common carrier as the president or the managing directors or as any other officer of the corporation or as the corporation itself, and that therefore they will follow out that line of thought from the standpoint of Judge Ricks unto its legitimate conclusion. We shall then possibly have legislation which will make all persons concerned in the carrying trade common carriers, responsible in the same way to the people and entitled in the same way to compensation.

We now permit the common carriers—I mean the railway companies recognized as common carriers—to collect their fares from passengers in advance. We now give them a lien upon all the property that is intrusted to them for carriage for their compensation. The decision of Judge Ricks, followed out by the committee, as I hope it will be, will lead to the final adjustment of all differences beween employers and their employés in the carrying business, for then the law will determine the right of the workman to reasonable compensation, and the Government will secure it to him as it secures compensation to his employer, and that is all that the employés ask.

CHARGES AGAINST SENATOR POWER.

Mr. CHANDLER. I submit a resolution and ask that it may be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution was read, as follows:

Resolved, That the Committee on Privileges and Elections be, and hereby is, directed to examine the statements derogatory to the Senator from Montana, Mr. POWER, contained in the Washington Post of Wednesday, March 29, 1893, and to ascertain the facts and circumstances so far as to enable the committee to determine and report what are the duty and power of the Senate in regard thereto; and said committee is hereby empowered to sit during the recess of the Senate, to send for persons and papers, to employ a stenographer, to act through a subcommittee, and to have its expenses paid from the contingent fund of the Senate

Mr. GORMAN. Let the resolution go over and be printed.

The VICE-PRESIDENT. Being objected to, the resolution will go over and be printed.

Mr. CHANDLER. It will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate?

Mr. COCKRELL. No reference, Mr. President.

Mr. GORMAN. Let it lie on the table for the time being.

Mr. CHANDLER. Was objection made?

The VICE-PRESIDENT. Objection was made. The resolution will go over and be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. FAULKNER, it was

Ordered, That John J. Farnsworth have leave to withdraw his papers from the files of the Senate subject to the rules.

NOTIFICATION TO THE PRESIDENT.

Mr. HARRIS submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That a committee consisting of two Senators be appointed by the Chair to wait upon the President of the United States and inform him that unless he may have some further communication to make the Senate is ready to adjourn without day.

Mr. HOAR subsequently said: I enter a motion to reconsider the vote by which the Senate ordered the appointment of a committee to wait upon the President with reference to final adjournment.

The VICE-PRESIDENT. The motion to reconsider will be entered.

INVESTIGATION BY THE COMMITTEE ON INDIAN AFFAIRS.

Mr. JONES of Arkansas. I submit a resolution, which I ask to have referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The resolution was read, as follows:

Resolved, That the Committee on Indian Affairs be instructed, either by full committee or such subcommittee or committees as may be appointed by the chairman thereof with the full power of such committee, to continue, during the recess of Congress, the investigations authorized by the resolutions of May 13, 1890, and February 27, 1891, with the authority and in the manner and to the extent provided in said resolutions, and in the pursuance of such investigations to visit the several Indian reservations, Indian schools supported in whole or in part by the Government, and the five nations in the Indian Territory, or any reservation where, in the opinion of said committee, it may be necessary to extend their investigations.

2. That said committee or subcommittee shall have power to send for persons and papers, to administer oaths, and to examine witnesses under oath touching the matters which they are hereby empowered to investigate, and may hold their sessions during the recess of the Senate at such place or places as they may determine; and the necessary and proper expense incurred in the execution of this order shall be paid out of the contingent fund of the Senate upon vouchers approved by the chairman of said committee.

Mr. SHERMAN. I think that these——

Mr. HOAR. How does the resolution come up?

Mr. SHERMAN. It was just introduced.

Mr. HOAR. I want to have the resolution go over.

Mr. SHERMAN. All right; but I want to say a word about it first. The practice of the Senate to organize committees of inquiry has been growing apace and in a rapid way. It does seem to me that a committee of the Senate which for two years has been charged with the duty of inquiring into the condition of Indian affairs and visiting the Indian reservations should have

terminated its inquiry and there should be now no occasion to renew it.

I wish to call the attention of Senators on both sides of the Chamber to the fact that year in and year out the number of such committees of investigation has increased, and there is a popular sentiment abroad, cultivated by our friends in the gallery above, that these are mere junketing committees, intended to make pleasure excursions in different parts of our country—to look into the sea to find the deep soundings for a harbor, to examine Indian schools and roam over the plains of the West, and for various purposes of that kind.

It does seem to me that there ought to be an end to the practice. I objected to such a resolution the other day, and it is rather unpleasant for me to do it. These resolutions continue the committees in force during the recess and it is very expensive. One committee during the last recess, as I ascertained from the Secretary of the Senate, cost from $8,000 to $10,000. There is a constant deficiency in the fund to pay the expenses of these committees, and deficiencies are asked for at nearly every session of Congress.

Now, as our Democratic friends have come into power, and as I have made this complaint before when the Republicans had the control of the Senate and sometimes without effect, I do hope that they will take into serious consideration the question whether it is wise, except under some strong pressing reason, to continue committees of investigation during the coming recess of the Senate. Twenty or thirty years ago it was very rare indeed. One of the memorable committees that did perform a work of great value to this country was the Committee on Transportation Routes to the Seaboard, of which Mr. Windom was chairman. They did perform a laborious duty and obtained a great amount of information which was published by Congress, and that inquiry led to many important results of great benefit to the people of the United States. It led especially to the improvement of the mouth of the Mississippi and to many other internal improvements, and the report has been a constant book of reference both in Congress and by citizens. It is a very valuable document. But with rare exceptions these committees generally result in nothing except expenditure.

I can in this case see no reason whatever for continuing the Committee on Indian Affairs in active duty during the recess. For two years they have been investigating the identical affairs that they are now called upon by the resolution to investigate. Whether they have made any report I do not know; whether they have incurred any expenditures I do not know; but it seems to me the time has come when the Senate ought to hesitate in authorizing such investigations, and should insist upon it that none shall be authorized to draw upon the funds of the Treasury from money appropriated for this purpose unless there is a public demand for it and some public usefulness to come out of it. Without that, the popular opinion will still condemn them as mere pleasure parties, organized at the expense of the Government of the United States.

Mr. HOAR. Let the resolution go over.

Mr. JONES of Arkansas rose.

Mr. HOAR. After the Senator from Arkansas has been heard, of course.

Mr. JONES of Arkansas. Mr. President, a resolution similar to the one now proposed has been adopted by each Congress for a number of Congresses past. There are many questions developing all the time in the line indicated by the resolution in the management of Indian affairs. In the years past, whatever complaints may have been made about the misuse of funds intrusted to committees, I undertake to say there has been no complaint of anything of that kind done by the Committee on Indian Affairs. There are many questions originating in the various reservations at different times that require personal attention. I believe that every dollar of money which has been spent by the Committee on Indian Affairs in investigating the conditions which prevail in each one of the reservations has been wisely spent and has tended to good government. I believe that every dollar of money spent in that way has been judiciously spent, and has resulted in the advancement of the public service.

I do not know that there will be any occasion to investigate any particular question during the coming summer, but if such a question should arise, it seems to me that the discretion ought to be vested somewhere with somebody to cause an investigation. There are some matters that I know the leading members of the Committee on Indian Affairs have desired to look into for years past. For instance, there is pending a proposition to remove the Southern Utes from a particular location in Colorado into Utah. There was a commission appointed and sent out there, which went all over the ground and examined the question and made a report.

On the other side, there have been complaints made that the agreement between the Indians and this commission ought not to be carried out. It is a simple impossibility for members of the committee to determine whether it would be wise to remove the Utes from the country they now occupy to the country to which it is proposed to carry them. If a subcommittee of the Committee on Indian Affairs make a personal inspection of the conditions which prevail there, and, understanding the country to which they are to be sent, make a report to the committee and to the Senate, I am sure it would result in positive and definite action on the part of the Senate which can not in all human probability come about in any other way. There are conflicting interests. There are men who have personal interests in getting those Indians moved, who are anxious to get possession of their present reservation, as well as men who are undertaking to dispose of territory in Utah. Each one will make his statement, and it is a difficult matter for a committee to determine what is right without a personal inspection of the facts of the case.

I mention this as an illustration of the difficulties we have to deal with. I assert that to-day there is scarcely a member of the Committee on Indian Affairs who has a positive opinion as to whether the Utes ought or ought not to be removed from their present reservation. A personal examination of the circumstances of the case would do good and would result in benefit to the Indians and to the public service.

I believe that there has been no complaint, as I said in the beginning, of any exercise of the discretion which has been heretofore, for years past, invested in the Committee on Indian Affairs, and I do not believe there will be any complaint in the future. However, if the Senate proposes to follow the suggestions of the Senator from Ohio, and, without regard to the circumstances, without regard to the peculiar conditions or the facts in a given case, shall cut off all proposed investigations, I for one will not complain, and will simply try to do my duty to the best of my ability with the lights before me as they are.

I have introduced this resolution and asked that it might go to the Committee to Audit and Control the Contingent Expenses of the Senate. I hope there will be no objection to that reference. If that committee after looking into the facts think that it is wise to pass the resolution and report it back, then it can be discussed, and if the Senate concurs in their recommendation let the authority for the investigation be given. If not, then let the resolution be voted down. I think the resolution ought to be allowed to go to the committee for consideration.

Mr. PLATT. Mr. President, there was great force in what the Senator from Ohio [Mr. SHERMAN] has said with reference to committees of investigation and the public understanding of what those committees are organized to do. Perhaps the duty of investigation has been pushed too far and perhaps there has been in times past some foundation for the belief of the public that these are junketing committees; but it seems to me that this resolution is not the proper one on which to raise the objection.

We have been passing numerous resolutions at this session authorizing investigations to be had by committees during the recess, and I venture to say with reference to a good many matters which are not as important as the matters which will come under the jurisdiction and cognizance of the committee now proposed.

When the Senator from Ohio comes to think about it he will see that what is called our Indian policy is exciting very great interest throughout the country. I venture to say that there are no more complicated problems arising either before the Committee on Finance or the Committee on Interstate Commerce than arise before the Indian Committee, and none which more require investigation outside of the Senate Chamber than those which come before the Indian Committee. I have felt that perhaps I ought to say this.

I agree with the chairman of the Committee on Indian Affairs [Mr. JONES of Arkansas] that this power has never been abused when it has been given to that committee. There are many matters arising in relation to the treatment of our Indians about which it is utterly impossible to determine what Congress should do except by a personal investigation of the committee upon the reservation. I have myself during all the time I have been on the Committee on Indian Affairs not been able to go upon a journey to the Indian reservations; but I know that such journeys have in many instances been productive of very great good.

I wish that all Senators could in some way be put in possession of more facts than they have in relation to our Indian affairs and the treatment of Indians upon reservations. It is a great question; it is one which engages the interest certainly of all the philanthropists in the country; one which is passed over by Senators, relying almost entirely upon the Committee on Indian Affairs, and I might say in the past upon the chairman of the Committee on Indian Affairs, to direct what the Senate ought to do in respect to such matters. I feel that all these

matters have been in a sense neglected by Senators. We have been treating our Indians without sufficient knowledge as to their rights, as to what is necessary to bring them up to a state of civilization and make them citizens, and self-supporting citizens. When Senators have no opportunity personally to inform themselves on this subject, it seems to me they ought not to object when the Committee on Indian Affairs says it desires to better inform itself by personal observation upon the reservations and personal inquiry as to the questions which will come before it.

Mr. CALL. Mr. President, it seems to me that there may be a false economy in regard to the proceedings of this body in examinations by its committees, and that we lose sight somewhat of the dignity and power of the Senate, and of the confidence and expectations of the people in it.

What reasonable objections can be urged to the Senate's making use of all the instrumentalities which the Constitution provides for the ascertainment of the necessary facts for legislation? What agency is so well to be trusted as the Senators who are charged with the duty of making laws regulating the operations of the Government? Shall they be confined to secondary agencies? Shall it be said that the men who are the executive officers in the various bureaus of the Government are better to be trusted than the Senators, chosen by the States and vested with the highest powers of legislation, to ascertain the facts upon any important subject?

Is it not too much to say that the eighty-eight men who are charged with one branch of the legislative administration of the Government, having supervision of 65,000,000 people and all their interests, and the great questions which are vital to the life and the happiness and the prosperity of the nation, shall be deprived of the privilege of personal investigation because of the little expense it may cause the people?

Mr. President, I regard this function of investigation by committees chosen by the Senate as one of the most important and valuable in all the measures and proceedings which are at our command. Shall it be attacked upon the ground that it is sometimes abused by this body? If abused by the committee and by the members of it, why will it not be more abused by those whom you trust with the administrative bureaus of the Government? I think that there is no considerable number of members of this body who could not be trusted with the duty of examination and inquiry in making themselves and the body familiar with the facts relating to any subject, to the condition of labor, to the poverty or the wealth of the people—to the general content or discontent, and all the subjects which are vital to a sound public opinion and the enactment of wise policies. In my fourteen years of service in this body I have not heard any well-grounded complaint or any facts which justify the complaint of the abuse of this power by committees.

The Committee on Finance sits here nearly during the whole year, and wisely, too, because in the ordinary session of the Senate there is not an opportunity to gather all the facts necessary for its proper and wise and deliberate action. Too much time can not be bestowed upon this question. So upon the great appropriations for the improvement of the rivers and harbors of the country. Who is it that is more competent than the Committee on Commerce to ascertain whether or not the money has been wisely expended and whether the expenditure is necessary in this or that place? Shall we be confined to the report of the engineers? Eminent as they may be and wise as they may be, they are fallible, and the supervision over them is committed to this body and to the other House of Congress.

So in regard to the impeachment of officers. This body is intrusted with the sole power of determining upon the efficiency, the responsibility, the integrity, and the virtue with which the administrative officers of this Government perform their duties. Why should they not be advised through members of this body in regard to these facts?

Then, again, is it to be assumed that a lower order of intelligence and integrity is to be found in the members of this body than in the administrative department of the Government?

Upon all these points, Mr. President, as this country grows in magnitude and power, as great questions involving the happiness of every family are growing up and attacking the very foundations of the Government, I think it is eminently wise that these committees should be intrusted with the power of examining into the facts, taking testimony themselves, and coming in contact with the witnesses.

Is it more expensive for a committee of this body to go to a distant part of the country than to bring here five or six or ten or dozens of witnesses for the purpose of their examination? Upon the very score of economy, if this body is to examine into the facts upon which legislation shall be predicated, it is less costly and more economical to send out these committees than it is to send for witnesses from distances and bring them here.

I differ in opinion with the eminent Senator from Ohio [Mr. SHERMAN]. I believe that it is wise to give this power to the committees, and that the money expended is wisely and beneficially expended to the public service.

The VICE-PRESIDENT. Objection being made, the resolution will go over.

Mr. BUTLER. Mr. President, I merely wish to make a remark before the resolution goes over.

The VICE-PRESIDENT. The Chair will hear the Senator from South Carolina.

Mr. BUTLER. Mr. President, I suppose I come in for a share of the rebuke of the Senator from Ohio [Mr. SHERMAN] in his observations on the general subject of what he chooses to call junketing committees. I reported a resolution this morning from the Committee on Interstate Commerce by the instruction of that committee, and I wish to say to the Senator and to the Senate that I have no desire whatever to enter upon the labors which will be necessary if that resolution shall be passed by the Senate. If I do enter upon that investigation, it will be at a very great personal sacrifice.

Questions have arisen within the last few days which it seems to me are of the very greatest and most vital importance to the laboring classes of this country, and in fact to all classes, questions which should be investigated by a proper committee of this body before intelligent legislation can be enacted. I merely desire to say that much in regard to the resolution which I reported.

I wish to concur with the Senator from Florida [Mr. CALL] in what he has just said. I have never known one of these committees appointed by the Senate which has not introduced valuable information for the guidance of this body. The only object of investigating committees, as I understand, is to procure information upon which the Senate can wisely and judiciously legislate. To that extent these committees are legitimate; beyond that they are not legitimate.

I have been on two or three of them, one of which I think my friend the Senator from Connecticut [Mr. HAWLEY], who is just going out of the Chamber, will bear me out in saying was of very great value to both branches of Congress. I refer to what was known as the ordnance committee, which was established for the purpose of inquiring into the condition of this country in regard to the production of material for the rehabilitation of the Navy. I think nobody will question that the information procured by that select committee was invaluable to both branches of Congress.

I was on another of these committees, of which the Senator from Massachusetts [Mr. HOAR] was the chairman, the select committee to inquire into relations with Canada. I think I may safely say, and I think that Senator will bear me out in saying, that the information procured by that select committee was of very great value to Congress and to the country. I believe I have been on two other select committees.

Mr. HOAR. If the Senator appeals to me, I should like to be permitted to say that I have tried to study that subject as thoroughly as I could, and have collected everything I could lay my hands on which has been published here or in Canada or in England in regard to our relations with Canada, and I do not believe there is in any single place anywhere in existence so complete and so valuable a mass of information on that subject as will be found in the two volumes reported by that committee.

Mr. BUTLER. I think that may be said to be generally true in regard to all committees of investigation. I desire to repeat that I have never known one of these committees which has not resulted in good to this body.

In common parlance they are called junketing committees. Why, Mr. President, there is not a Senator who gets a dollar of additional compensation for that service. He very often, almost invariably, goes on such committees at great personal sacrifice to himself, and the information so procured is of service to the country and to the legislative department of the Government.

For one, I have no desire whatever to make the investigation which is confronting us upon the Interstate Commerce Committee. It is a complicated and difficult question, which will require very great and patient labor. I have no ambition whatever in that direction. I have asked that the committee be allowed to sit during the recess. The Senate can refuse to do it or not, as it pleases; but I am not willing that the Senator from Ohio shall charge that the recess committees are always junketing committees.

My friend from Connecticut knows that the committee to which I refer, and of which he was the chairman, labored continuously in order to procure the necessary evidence upon which we could frame proper legislation.

I do remember that there was a time in the history of this country when I did not hear the Senator from Ohio protest, as he has done to-day, against these junketing committees, when committees were sent all over the South at an enormous expense,

not with a view, as some of us thought, of aiding legislation, but in the interest of a political party, and hundreds of thousands of dollars were taken out of the Treasury of the United States to pay the expenses of the committees and of the witnesses. I heard not one word from the Senator from Ohio at that time protesting against what he now chooses to call junketing committees.

The questions which are arising in this country every day as it develops in its resources, in its population, and in the relations all these questions bear to legislation can only be settled by the result of the investigations of committees of this body. I therefore desire to repeat, that I do not believe there has been a single instance where committees have been appointed by either branch of Congress where good has not resulted. As was suggested by my friend from Delaware [Mr. HIGGINS], when he went to the Indian Territory on the select committee of which I was a member, but could not attend, he had his ideas enlarged. The information which he procured by personal contact with the objects to be investigated has been of inestimable value to him and through him to the Senate of the United States.

Mr. President, that Senator did not realize one dollar of additional compensation for that trouble. Is it asking too much of the Government of the United States to pay his expenses and my expenses when we are performing such extra duty—not duty that is desirable by any means, but duty which is to be performed in the interest of intelligent legislation, and only in that interest? Therefore I think the manner in which the Senator from Ohio has characterized these committees is a little harsh, and not sustained by the facts and the results of these investigations.

Mr. HIGGINS. Mr. President, I think the criticism of the Senator from Ohio is ill founded, and largely for a reason which is not going to grow less, and that is the very extent and magnitude of the country and the difficulty growing from that consideration of the legislative bodies getting directly at the facts.

Under our dual system of government the large mass of legislation is left to the States; matters that pertain to the localities peculiarly are left to the States. The members of the State Legislatures are in close contact with their people and with the locality that may be concerned in any legislation, if it concerns any peculiar locality or interest.

But here we sit at the capital of this great Republic of almost unexampled size and magnitude, dealing with interests that we can not understand, unless we come in close personal contact with them, either the whole body or through appropriate committees. It is because, acting, as we do, under government by committees, that these various and several respective resolutions have been referred to their appropriate committees, who, charged with the duty of initiating legislation in that behalf, have reported them back for action. When such committee has in its judgment determined that such inquiry is not only proper but necessary, I think it is a complete answer to the criticism, if you choose to call it so, of the Senator from Ohio, that these duties are laid out for public performance merely because of the travel that they will entail.

Mr. HAWLEY. The Senator from South Carolina [Mr. BUTLER] referred in flattering terms to the service of the committee upon which he, the Senator from Alabama [Mr. MORGAN], and others of us served six or seven years ago. That is the only vacation committee that I ever served upon.

I have always been very proud of the work of the committee. The whole committee became interested in it. We were to inquire into the facilities for the construction of gun steel and armor steel in this country, the power of the different manufacturing establishments to make armor and to make heavy guns, how ships should be built, whether by private parties or by the Government alone, and as to foundries and assembling shops, etc. We devoted a large part of two summer vacations to that work, visiting the great steel concerns, the ship and navy yards, and also the leading establishments in England. My impression is the whole thing did not cost $2,500, I think about $2,000, if I recollect aright.

Mr. BUTLER. I think the Senator ought to state, if he will pardon me for interrupting him, that it would have been almost impossible for the committees of this body to procure such evidence otherwise than by the method we adopted.

Mr. HAWLEY. It could only have been acquired in that way. We called on the most distinguished shipbuilders and steel-workers in this country.

Mr. BUTLER. And on naval officers.

Mr. HAWLEY. Yes, and on naval officers, as the report shows for itself. We called on such men as the late Mr. Roach, as shipbuilders, and Hotchkiss, the gun man; also on the Whitworths, the Browns, the Cammells, and other people in England. From our examinations we were enabled to make recommendations as to the future policy of the Government on these questions, comprised in a single page of our report, and on the line marked out by that committee the work of regenerating coast defenses, the Navy, etc., has been done ever since. The work of that committee shows for itself.

This committee may or may not be appointed precisely as any other committee of investigation may or may not be appointed. It is a question of the necessity and desirability of the information, etc. It is not a question of the character of Senators. I do not think any Senator pockets any money in the matter. He gets his railroad fare and his hotel bills paid, but for the extra time and labor he devotes to this service he gets no return.

Mr. CULLOM. Mr. President, I did not expect that the question of the appointment of a subcommittee of the Committee on Interstate Commerce would come up this morning, but there seems to be a disposition to discuss the whole subject of vacation committees, and therefore I think I ought to say a word in reference to the proposition of the Senator from South Carolina [Mr. BUTLER], the chairman of the Interstate Commerce Committee.

Before doing that I desire to say that in my ten years' service in the Senate I believe I have not been on any select committee or committee to sit during the vacation, except the committee of which I had the honor of being chairman, which was first a select committee and afterwards a standing committee, as it is now.

When I first came into the Senate the subject of the regulation of interstate commerce was becoming prominent before the country. The subject was before the Senate. It was demonstrated I think very clearly that none of us at that time were very familiar with the question, and I remember distinctly that I was urged, having introduced a bill and taken an active part in the question, to ask the Senate to appoint a select committee for the purpose of making an investigation during the then coming vacation which was soon to take place. On the request of Senators I introduced a resolution for that purpose, which was passed. A select committee of five was appointed, and we put in a good deal of time during the following summer in making the investigation directed to be made.

I wish to say so far as that committee is concerned that neither the Senator from Ohio [Mr. SHERMAN] nor anyone else can afford to charge it with having been a junketing committee. I have done a good deal of hard work in my time, but I wish to say to him and to the Senate that I never did a harder summer's work in my life than I did during that summer in making the investigations and in assisting in preparing the report which is before the country.

While I am ready to give all praise to the report made by the committee of which the late Senator Windom was chairman, I must be allowed to say that if the Senator will read the report made by the select committee to which I referred, he will find that it contains a vast amount of important information on that subject. The scope of the work of that committee was more confined than that of the committee of which the late Senator Windom was chairman; but that was the foundation of the legislation which afterwards resulted in the regulation of commerce among the several States.

Subsequent to that time, the same committee was instructed by the Senate to make another investigation, which it did, and did faithfully and as well as it could, and with as little expense as possible. That investigation had relation to the commerce of the American railroads and the railroads of Canada. Our committee was confined somewhat strictly to that investigation. The Senate will find a volume containing the report and the testimony upon that subject, which I think they will find to be almost exhaustive. The resolution reported by the chairman of the Committee on Interstate Commerce this morning not only takes in that subject, but goes beyond it, in reaching out to investigate the question which pertains more to trade between the United States and Canada, including the bonding question, etc.

Mr. President, those two committees are the only ones I have been on which were authorized to sit during vacation, and I am very certain there was not a penny of expense incurred by that committee on either occasion which was not necessary. I think the Senate will find that the investigations made by that committee were valuable to the Senate and to the country.

I do not myself take any stock in the usual expression which is made by Senators and newspapers and other people outside, that these committees are for the purpose of junketing over the country. I have myself had no such experience, and I am unwilling to believe that other Senators belonging to any of the other committees have any such disposition.

The Senate the other day authorized a subcommittee of the Committee on Commerce to go to the Pacific coast to make certain investigations. I am perfectly certain that the investigations made by that committee, as they will be made, will result in valuable information and in determining upon the necessary

legislation which ought to be enacted with reference to deep harbors and other improvements upon the Pacific coast.

How are we going to find out what we ought to do as Senators? Are we simply to sit here and take the report of a committee made in the city of Washington as to the expenditure of from three to five million dollars at any particular point on the Pacific coast? It is true, the Senators may say that we have engineering boards for that purpose. So we have in a sense, and yet there are questions which sometimes come up, as in the present instance, where the Senate committee is unprepared to determine in its own mind exactly what is for the best interests of the country in the location of a deep harbor south of San Francisco.

I confess I do not know myself. I have read the reports, and I have tried to come to a correct conclusion, but other men have met me with antagonistic views to my own. While I thought it certain, in the first instance, that my views were correct, I am not prepared to say now that my views are correct as to whether a deep harbor should be made at one place or another which has been designated by these various reports.

Therefore, so far as I am concerned, while I do not think I shall go upon the committee, I do want a committee to go to the Pacific coast for the purpose of resorting to every proper means of securing the necessary and correct information, so that when we make an appropriation of one, two, three, or five million dollars for a deep harbor somewhere there, as we shall have to do in the end, we shall be certain that we have got the right place and are serving the great interests of the commerce of this country.

Mr. BUTLER. May I ask the Senator if he does not think it a matter of very great consequence to the Senate, and in fact to both branches of Congress, and that the questions involved in the resolution reported from the Interstate Commerce Committee this morning are very important?

Mr. CULLOM. I will answer the question.

Mr. BUTLER. And that we can not possibly be informed about the matter except by some such investigation as that contemplated by the resolution?

Mr. CULLOM. In the line of the suggestion of the chairman of the committee, let me say that the Committee on Interstate Commerce has favored the legislation which has been enacted upon that subject, and we have been working to the end, as we supposed all the time, of controlling the railroad corporations in the country in the interest of the great body of the people and in the development of the commerce of the nation. While we have been doing that, as a matter of fact I might as well say frankly we had no idea that we were adopting legislation reaching to the individual employé of the railroad as an employé of the railroad, but we were undertaking to compel the common carriers of the country to deal fairly by the people, to desist from unjust discrimination, to desist from extortion, and to compel one common carrier to treat another fairly in the continuation of the transportation of freight and passengers from one portion of the country to another. That provision of law is the third section set out in the act, which requires of the corporations that this shall be done.

We have had recently two or three decisions of courts which affect the great body of the laboring people connected with railroads, numbering some seven hundred and eighty-five thousand men. The question now is, nobody having thought about affecting the masses of the people employed by the railroads when the law was enacted, whether that act goes further than it ought to do under the Constitution in the regulation of interstate commerce. That is one of the questions which are proposed to be investigated by the Interstate Commerce Committee in pursuance of the resolution reported by the Senator from South Carolina, the chairman of the committee.

Then, again, there are other important questions which are set out in the resolutions, one of which is the question of pooling.

Mr. BUTLER. The question raised by President Harrison in his message.

Mr. CULLOM. Certainly, the question was raised by the message of President Harrison a few weeks before he retired from office, affecting the rights of the people of the United States engaged in trade in competition with the people of Canada.

The Committee on Interstate Commerce thought that it was their duty to take up those questions, not for the purpose of visiting any place, not for the purpose of traveling over the country, although it may be necessary to go to one or two places, but for the purpose of going to the bottom of all these questions and determine, if it can, what Congress ought to do with reference to them and be able to report to the next session of Congress upon the subject by ascertaining not only the facts, but to report such legislation as they may deem wise to be enacted, if any, in order to do exactly the right thing in the interest of commerce and the great body of the people.

That is the only purpose of the committee. While that committee, if the Senate should authorize it to do so, may desire to go to one or two places in the country away from the capital, yet there is no purpose of traveling about the country *ad libitum*, but simply to make an investigation of this question, so that when the committee is called upon at the next session of Congress they may be prepared to say what they think about it after having investigated the subject.

While I do not believe in committees simply getting leave of the Senate to travel about the country, yet I do believe there is no foundation for the impression which the country may have that committees of the Senate get this authority for the purpose of junketing. We are simply doing our duty as legislators when we ask the Senate to authorize a committee to investigate a particular question which we are charged as committees to investigate.

I believe that the Interstate Commerce Committee ought to be authorized to do this work. I believe also that there has never been a dollar spent, as the chairman of the Committee on Indian Affairs [Mr. JONES of Arkansas] and the Senator from Connecticut [Mr. PLATT] have said, in the investigation of Indian questions which ought not to have been spent. There are, as everybody knows in the Senate, difficult questions arising in connection with the regulation of Indian affairs in this country which have to be looked into. Who is going to do it if the committee charged with the subject is not authorized to do it? How are they going to do it unless the Senate gives them power to do it by special sessions of their committee during the vacations of Congress? They can not do it when the Senate is in session. None of these committees can do such work during sessions. We are doing the country a service when we submit ourselves, as we have, to do these things without a dollar of extra compensation and impose upon ourselves extraordinary labor during the hot weather of the summer.

Mr. GORMAN. Mr. President, I do not regret at all that the Senator from Ohio has called attention to the resolutions which are pending before the Senate to authorize committees to sit during the recess to investigate various subjects. It is possible, indeed I think it is probable, that in the past the Senate has gone too far in that direction, and that we should be careful in the passage of such resolutions and limit them to subjects which are of great importance. I agree with the Senator from Ohio in that.

Heretofore when many of the committees of the Senate were not authorized to employ clerks during the recess we all understood the reason for some of the resolutions which were then offered. It is true that there are quite a number of resolutions already pending in the body to authorize committees to sit during the recess. If they should all be agreed to, as has been the custom heretofore, there would not be a sufficient amount of money in the contingent fund to pay the expenses of them, $25,000 being the amount appropriated for that purpose.

I agree with the Senator from Ohio that we must be careful to limit these investigations within reasonable bounds; but, Mr. President, there are certain great questions which, if they are to be considered intelligently and disposed of with proper economy, can only be dealt with by means of these investigations.

We have one committee, the Committee on Indian Depredations, which has Indian depredation claims to the amount of over $300,000 now pending, which will be provided for in all probability in the appropriations to be made next year, and there are also three or four or five million dollars depending upon the result of the investigations by that committee. The Senate has never had the opportunity through any committee to give these claims proper consideration. The accounts are complicated, and hundreds of thousands, if not a million, of dollars may be saved, and probably will be saved, by that investigation.

So with the resolution passed a few days ago in regard to the Committee on Commerce. There are great questions involved, which can not be properly examined in the busy hours of the session. I have been a member of the Committee on Commerce, and have given those particular questions all the time that was possible in view of other labors. I agree with the Senator from Illinois [Mr. CULLOM] that it is simply an impossibility to come to a proper conclusion in those matters on the different reports we have received from the Engineer Department.

Mr. President, the resolution which is now pending before this body is more far-reaching and of greater importance to the people of this country than any one question that is now pending before us. Questions of currency and taxation are not of greater importance when compared with the questions involved in the proposed investigation.

Mr. CULLOM. Perhaps the Senator had better designate the resolution to which he refers.

Mr. GORMAN. I mean the resolution presented by the Committee on Interstate Commerce through the distinguished Senator from South Carolina [Mr. BUTLER]. The question should be inquired into at this time and not be postponed. The privileges granted to the Canadian railroads for transporting goods in bond through our territory and its effect on the American railroads affects great interests. It is pressing upon us and it ought to be inquired into more fully than it has been heretofore. Its effect upon millions and hundred millions of invested capital in our railroads depends very largely upon the conclusions we may reach upon the question.

The other question is in reference to our own railroads, whether it is possible to make provision by law which will enable them to protect themselves in the matter of their freights and freight charges without doing injustice to communities and to individuals. We are only upon the threshold of that investigation. The temper of the people of the country has not been such as to warrant legislation of the character insisted upon by those who are engaged in transportation and who go so far as to say that their future prosperity depends upon their securing the relief which they seek.

Then the other matter—and I speak about this with great freedom—the recent decisions of courts of the United States, that under the act of Congress regulating interstate commerce, the act prohibiting combinations and pools, they have the right to determine not only what a man shall do but what he shall not do when he is an employé of a railroad company. It is the first great step in this country of the judicial branch of the Government to absolutely take possession of the railroads and of the men who are the employés of corporations.

If the law warrants the decision, and possibly it does, then the law ought to be modified or repealed. I do not believe that the people of this country will ever submit by any branch of the Government, whether the judicial or the legislative, to such restrictions as have been placed upon them by these recent decisions. The late chairman of the Committee on Interstate Commerce [Mr. CULLOM], since the committee was created in this body, and every member of it—and I have been a member from the organization of the committee—had not the slightest conception that by that act, or the bill introduced by the distinguished Senator from Ohio and afterwards reported from the Judiciary Committee, it was intended to give such power to the Federal judiciary.

Mr. HOAR. Will the Senator specify a little more fully (and what he says is very interesting) the point he has specially in mind?

Mr. GORMAN. I mean to say that the recent decision of the courts, that employés of railroad corporations could by order of the courts be restrained from quitting the service of the corporation; that they can not resign their position as engineers, or other employés of the company; that not only are combinations to obstruct interstate commerce a misdemeanor, but that a single man, quitting work on his notion, is a violator of the act, is a most extraordinary decision. If the act of Congress warrants it, then we must meet that question at the very beginning of the next Congress. It ought to be inquired into carefully by men who have but one motive, that of protecting the great interstate commerce, but that in doing so shall amend the law so that the liberty of the employés shall not be unduly restrained. The judges of the United States should not be armed with such power as to make them czars.

In a question of this sort, Mr. President, a matter of a few dollars for the investigation, when so much depends upon it, ought not to stand in this body a moment. I have never been a member of a roaming committee since I have had the honor of a seat on this floor. I did join my distinguished friend from Illinois [Mr. CULLOM] upon the Committee on Interstate Commerce for a few days. I am unalterably opposed to junketing committees; but I submit to the Senate that the line is perfectly well defined between a junketing committee and one that is looking after great interests, where not only millions of dollars are involved but where the rights of the people are also involved.

Mr. CULLOM. I will inquire of the Senator from Maryland whether he saw any indication that there was a disposition to junket on the part of the committee of which he was a member?

Mr. GORMAN. Mr. President, none whatever; and there will not be upon this, I submit, with all due deference to the views of the Senator from Ohio, who properly wants to economize in our expenditures in this body, in which I will join him heartily. He, as the leader of the opposition, active as he is necessarily from his position now in criticising the expenditures, will find that I will go as far as he in protecting the Treasury. I only regret that that activity has not heretofore been displayed. But now that we have on this side of the Chamber the responsibility as well as the power, I trust our friends here will not flinch from an investigation, though it shall cost a few thousand dollars, where the liberties of our fellow-citizens are at stake as they are in this case.

Mr. PLATT. Mr. President, I hardly think this is the time to enter into any extended discussion of the decisions which have been recently rendered in the courts relating to the rights of employés and corporations engaged in interstate commerce to discontinue their relations as employés, especially when it is admitted and urged here upon the floor of the Senate that this is a question to be specially investigated by a committee. In view of a single word which dropped from the lips of the Senator from Maryland [Mr. GORMAN], possibly thoughtlessly, I desire to say that I have not yet seen in those decisions anything which looks like a usurpation of power by the courts, or which in anyway looks like degrading the workingmen of this country to the condition of serfs.

I believe that people who are employed have no more right to engage in discriminations in commerce than people who employ them. I do not believe that there is anything either in the interstate-commerce law or in the antitrust law which is not an affirmance of well-considered and long-established common law; and while I have not the text of the decisions which have been rendered, I believe it will be found when they have been carefully examined that they have only gone to the extent which has been common law for hundreds of years.

Mr. HOAR. Mr. President, I have not read the decisions to which the Senator from Maryland [Mr. GORMAN] refers; but the trust act is, in my opinion, the law as applied to its local commerce of every State in the Union except the State of Louisiana. I believe that is the only State where the common law does not prevail. At any rate, it is the law. The trust act simply extends to the United States commerce the principles which every State which adopted the common law has as a part of its common law in reference to its local concerns. So I am quite sure that no such doctrine as that which the Senator from Maryland apprehends will be warranted by the law known as the Sherman law.

The Senator from Maryland spoke of that act as one introduced by the Senator from Ohio [Mr. SHERMAN]. It is true that he introduced a bill which in an entirely new shape, without any sort of adoption of anything in his old bill, was reported to the Senate from the Judiciary Committee, and passed by the Senate with almost absolute unanimity, having been very zealously supported on both sides of the Chamber. It is impossible, I conceive, that any such doctrine as the Senator apprehends can be found in the bosom of that enactment.

It is a mere extension of the common law in regard to combination in restraint of trade to the United States commerce. The interstate-commere law is a different enactment. That is a new piece of machinery. I have no doubt that the interstate commerce law as passed contains a good deal which some day will return to plague the inventors; indeed it has plagued the inventors a good deal since it has passed.

Mr. VEST. Mr. President, I think it is unfortunate that this matter should have come up here for discussion, because it is necessarily in the nature of an *ex parte* criticism. Every lawyer knows how exceedingly unsafe it is to take the newspaper accounts of the decision of a court in regard to a matter of as much importance as that which has been commented on by the Senator from Maryland. I was startled this morning in picking up a Washington City paper to find that a great revolution had taken place, so far as the judiciary could accomplish it, as to the common-law doctrine in regard to contracts in restraint of commerce. I read very carefully what purported to be the substance of a decision of a district judge—Judge Speer, of Georgia. The article was headed "A great triumph for the Brotherhood of Locomotive Engineers," and makes the impression upon the public that this district judge had decided that the regulations of the locomotive engineers of the United States would be recognized by the Federal judiciary hereafter.

In reading the decision, which is in this morning's paper, it will be found that the text does not bear out the head at all. Judge Speer simply affirmed what every lawyer knows to be the elementary doctrine of the common law in regard to contracts in interstate commerce. He simply affirmed what the bill reported by the Judiciary Committee in regard to trusts affirmed and what the spirit if not the letter of the interstate-commerce law affirmed. He has made no decision which varies from that doctrine as I understand the report in this morning's paper. He does decide that any contract or regulation which is a restraint of commerce is absolutely void, and he proceeds to say that any engineer has a right to give up his employment.

That is the inherent right of every American citizen; but when the locomotive engineers, or any other association, or any corporation undertake to make a rule and enforce it in restraint of commerce that rule and regulation is absolutely void, and the courts will so hold. Does any lawyer see anything startling or

revolutionary in that? It has been the doctrine of the English law, and we adopted it in this country in all the States except Louisiana, where they have had the Code Napoleon for two hundred years.

If any such doctrine as the Senator from Maryland has announced has been decided by any court, I have not seen it. I undertake to say now in advance, as a lawyer, that if any such doctrine as he asserts has been declared by the judiciary of the United States it would be reversed by the Supreme Court without one dissenting opinion against it. Why, it would be a monstrous doctrine. The Congress of the United States never intimated that that could be the law, much less did it enact such a statute.

I had something to do with making what is called the antitrust law that came from the Judiciary Committee. The difficulty we encountered was not in regard to the common-law doctrine. There never was any difference between lawyers as to that, that any contract, any regulation made in restraint of commerce, the legitimate, ordinary, natural commerce of the country, was void. Where people went together and made a combination to put up prices it was a restraint of commerce and impeded commerce among the States, and there was no trouble about that. The difficulty we encountered was in drawing the line between the jurisdiction of the General Government and of the States. The clamor was raised that we should go into the States and regulate commerce between citizens of the States.

The antitrust law, with which, with great deference, the Senator from Ohio had nothing to do except to vote upon it as any other member of this body—the law that was reported from the Judiciary Committee applies strictly, of course, and only to commerce among the States. There was the trouble we had in regard to the enactment of that measure. That law simply declares what is an elementary doctrine, that any contract or regulation of any sort in restraint of commerce, no matter how it is made or by whom made, is absolutely void, and that is the whole of it.

Mr. BUTLER. May I ask the Senator what he would think of a proposition, which I shall state, and which seems to be one of the questions raised in the decision in Toledo, Ohio? I have not read the decision of the court, and therefore it may be premature to discuss it, but I understand that the decision was that the court had the right to enjoin the employés of a corporation engaged in interstate commerce from combining in such way as to obstruct that commerce; for instance, that it was a violation of the interstate-commerce law that they should unite in what they call a strike, and should boycott one set of cars from a certain railroad company and order the employés not to handle the freight from that company in order to transfer it to another.

I understand that the decision of the court is that that combination is unlawful and that the court could enjoin it. That seems to me to have gone very much further than any decision of any court heretofore, if I am correct about it. I have not seen the decision. That, I understand, was the subject of the inquiry proposed by the resolution of the Senator from Indiana [Mr. VOORHEES].

Mr. VEST. My remarks were directed especially to the article in this morning's paper with the startling headlines to which I have referred.

Mr. BRICE. Allow me to ask, in reference to the article this morning, does the Senator from Missouri understand that the decision did in terms declare the right of the court to enjoin an employé from leaving the service of the company?

Mr. VEST. No; I understood the decision to be simply the exercise of the ordinary jurisdiction of a district judge of the United States over property which was in the hands of a receiver.

Mr. BRICE. Did it not include in that the power to order the servant of the company to continue in the discharge of his duties?

Mr. VEST. No, I think not.

Mr. BRICE. So long as the court thought he ought to be so enjoined?

Mr. VEST. No, sir.

Mr. BRICE. I call the Senator's attention to the last clause of the decision.

Mr. VEST. Is that the decision in Georgia?

Mr. BRICE. In Georgia. The court say:

While any engineer may at any time exercise his right as an individual to leave the service of the receiver, he may not do so in such manner as to injure the property of the company.

Mr. VEST. I understand that doctrine to be applied to property then in the hands of a receiver and under the absolute control of the court. If the judge meant by that that he could not quit his employment whenever he pleased, as a matter of course it is not the law. I read the opinion over, and came to the conclusion that Judge Speer simply meant to say that they could not injure, by any act of theirs in the way of intimidating other employés, the property which was under the control of the court in the hands of its receiver, because it is very well known to lawyers that the Federal courts exercise the fullest jurisdiction in regard to property that is in the hands of one of its agents, and every receiver is an agent of the court. As a matter of course I assume that no district judge who is worthy of his position would declare that any employé did not have a right to quit his employment when he pleased. It would be absurd to hold that he could not do so.

Mr. HOAR. Will the Senator pardon me a moment?

Mr. VEST. Certainly.

Mr. HOAR. I have looked at the last sentence which the Senator from Ohio [Mr. BRICE] read, and it is interpreted by the preceding sentence. Perhaps the Senator from Missouri will allow me to read the last few sentences.

Mr. VEST. Certainly.

Mr. HOAR. The court say:

This declaration—

After speaking of a declaration by the representatives of the Brotherhood—

is authoritative, and the court will act upon it. It is binding upon the engineers of the Brotherhood, who are officers of the receiver, and who were represented by the committee and their assistant chief engineer, Mr. Youngson, all of whom were in the presence of the court when it was made. It is accepted as made in good faith and a condition of the contract which the court will direct the receiver to make. While, therefore, any engineer may at any time exercise his right as an individual to leave the service of the receiver, he may not do so in such manner as to injure the property of the company.

I understand that to be the affirmance by the court of the doctrine that when a receiver is appointed and when officers subordinate to the receiver come into the court and take upon themselves the execution of the order of the court through the receiver as his officers and subordinates, as they are allowed by the court to do, they can not withdraw from that employment at a time and in a manner which will injure the property of the court.

Take the case of the receiver himself, for instance. Suppose the Senator from Ohio [Mr. BRICE] were appointed receiver of a large railroad company. He accepts the office, and having accepted the office in open court and undertaken it, and having got an entire knowledge of all the transactions and the daily running of the trains, with freight contracts depending upon his action, suppose he should suddenly say, "I think I will throw this all up and start for Europe."

The court say, "I will not allow you to do that. You have undertaken to do a duty as an officer of this court." Everybody will agree that that is a reasonable exercise of the power of the court. In the two closing sentences here the judge applies that doctrine to officers under the receiver who had themselves in the presence of the court undertaken the duty. What else there is in his opinion I do not know.

Mr. VEST. I do not think the Senator from Massachusetts, or myself or any other lawyer would undertake to give an opinion in regard to what the court did mean without reading the entire opinion in an official form and without knowing the facts upon which it was rendered. It is enough for me to say that the headlines of the article in this morning's paper are not sustained by the text. It is headed: "Labor claims a victory. Railroad receivers required to recognize the Brotherhood." It is very obvious from the debate which has taken place that Senators are divided in opinion as to whether it is a victory of either party or not. From my reading of the opinion I think that the intention of the judge was simply to declare the elementary principles of the common law as to contracts, regulations, and rules in restraint of commerce, and that is the whole of it; but I will not undertake to criticise the opinion until I have seen it officially.

Mr. VOORHEES. Mr. President, a few mornings ago my attention was called to the subject under discussion by publications that have not been alluded to as yet in this debate. These publications purported to be verbatim reports of two judicial decisions, one by Judge Taft, of the circuit court of the United States, and the other by Judge Ricks, of the district court of the United States for the northern district of Ohio, rendered at Toledo. Those decisions prompted the resolution which I then introduced and which is now partially at least under discussion. In that resolution I set out the tenth section of the act of Congress approved February 4, 1887, known as the "interstate-commerce act." Sir, I am satisfied that section goes further than anyone supposed it did at the time of the passage of the act, unless perchance some person or persons interested in having a sweeping and oppressive enactment that would practically chain a railroad employé to his car, to his locomotive, at the behest of the corporation, dictated the provision and had it put in.

Mr. President, instead of discussing Judge Speer's decision, which is noticed in this morning's paper, I shall briefly discuss the decisions that have been made in Ohio, as I understand. I read the decision of Judge Speer this morning, and it is subject

to the comments made by the Senator from Missouri [Mr. VEST]. The headlines are much stronger than the body of the decision. The proclamation at the head is much more pronounced than the text. The text does not sustain the announcement which precedes it, but it does not follow that the decision should therefore be criticised. I think the main fault is in the law itself, increased and aggravated in some instances by the willingness and eagerness with which Federal courts construe laws in favor of corporate power and against labor in this country.

The greatest and most dangerous question to-day before us is the encroachments of corporation power, colossal consolidated wealth against those that are helpless in its presence, powerless, and who have to obey its mandates to get bread and to live.

Sir, let us see what it is that is under consideration. Having set out the tenth section, let us see for a moment what it contains. Without going into detail, I say here as a lawyer it provides that if an employé of a public corporation, either alone or in company with others, leaves the employment of such corporation at a time of his own choosing, he is liable to be prosecuted, convicted, and fined heavily for a misdemeanor.

If a solitary individual, not engaged with numbers or conspiring with others or moving in a strike, but for himself alone, sees fit to leave the employment of his corporation master he can be held under this law and prosecuted. Having stated in general the scope of this section, this terrible section for the enslavement of laboring people, the resolution which I had the honor to introduce proceeds to say:

And whereas it is alleged that said section of the law as it now stands has been construed by the judges of the circuit and district courts of the United States in recent decisions at Toledo, Ohio, to mean that—

Then I quote the language that was set out in the decisions, and reported some days ago, in the newspapers it is true, but I take it for granted there was no motive to misstate a single word of the decisions, and that they are substantially correct as I have quoted them here—

the duties of an employé—

This is the language of the decision. That—

the duties of an employé of a public corporation are such that he can not always choose his own time for quitting that service, but that in attempting to leave the employment of such corporation of his own free will and to escape from its control and consequent servitude such employé is guilty of a misdemeanor and liable to severe penalties.

To be prosecuted for a misdemeanor and fined heavily!

Now, Mr. President, whatever else may be said, that is a law, as interpreted by the courts, which chains a laborer to his engine and his car as completely as the galley slave was ever chained to his oar. It prohibits his departure from his work. It says that, once enlisted, he has become bound as a private soldier in the Army; that if he leaves his post he is to be punished as a deserter.

Mr. President, when such an issue as this is presented we have reached a point in this country where it becomes us to pause and retrace our steps. I heartily concur in the remarks and respond to the tone of the Senator from Maryland, who so strongly stated the grasping powers of the Federal judiciary of this country a few moments ago; but before denouncing the Federal judiciary for its encroachments on the laboring classes let us clear our own skirts.

Let us see that no law remains long on our statute books, put there however it may have been, which punishes an individual laborer for leaving the employment of a corporation or of any other employer. Whoever heard of such a law before? One individual employs another individual, and the individual employed can leave when he pleases. Has a corporation become such a master that it can say to those under its employment that they shall remain there indefinitely? An employé can not always choose his time, the decisions say. Can he choose it at all? If his own choice does not govern, he must of course ask permission of a master whom Congress and the courts have established over him. To hold a man's person for the specific performance of personal service is the direct reënactment of involuntary servitude in this country.

An action for damages is the only remedy ever known in a free country for the violation of a labor contract. The claim now for the first time in this country put forth that the laborer can be bound by law to continue in service after he has made up his mind to quit is the principle on which peonage, serfdom, slavery are founded wherever they exist on the face of the globe. No graver question than this has ever appeared here. It touches the very foundations of free government, and involves the liberty and happiness of meritorious millions upon whose labors the prosperity of this country depends and whose protection should be the first care of the American Congress. These sentiments are not new with me. They are as old as the years of my political life, and will only cease to control my action when all action is ended so far as I am concerned.

Sir, such were the considerations which induced me to introduce this resolution, instructing the Committee on Interstate Commerce to inquire "what action may be necessary, either by the repeal of said tenth section or by the enactment of additional legislation for the better protection of the laboring people of the United States in their natural and inalienable rights and for their greater security from the encroachments of corporation power."

I know very well what may be said on the corporation side of this discussion. I will answer in advance. Nobody pretends that an engineer can fling himself from his engine and abandon it en route and in motion, thus endangering life. Such an act would be a criminal attempt to wreck a train, and has always been punishable by the laws of every State in the Union and of the whole civilized world.

That is not, however, what is meant or contemplated by this law. This law as construed by the courts says the employé can not alone or in company with others, though in an orderly way and in the exercise of what we have heretofore thought to be natural and inalienable rights, sever his connection with a corporation. It is decided that he has enlisted to stay, and he is to be punished as a deserter if he leaves his post or attempts to cast off the badge of his servitude.

Mr. President, I have not much to say in regard to the judiciary itself. When bad laws are enacted, by mistake or otherwise, some judges are glad to mitigate their evils; evince no pleasure in their enforcement; point out with a gentle hand the errors they contain, and make the injury they inflict as light as possible. On the other hand, there are judicial minds that grasp at power, love it for its own sake, enforce it ruthlessly, and ignore the protection and safety of the people. The old distinctions here at once arise between a strong federal government and a government resting upon the consent of the people. Jefferson, the great apostle of popular liberty, foreseeing such dangers as are now upon us, proclaimed in his day that the Federal judiciary were the sappers and miners of constitutional liberty. So they are, such of them as with a greedy thirst for power delight to enforce laws of the kind we are now considering.

I think, Mr. President, that the Committee on Interstate Commerce could not be better employed than in making inquiry into this dangerous question where friction comes between corporation power and the humble though strong and patient multitude of laborers of this land. We are going in the pathway of nations who have gone before us. Old history is being reënacted day by day. The grasp of wealth, the consolidation of capital, coming here from year to year and obtaining legislation, putting manacles as it were upon the labor of the land, is nothing new. It has happened before in other lands and ages, and with its growth personal liberty and the institutions of free government have perished by the wayside. If this Government is to be overtaken by calamity, if there is to be revolution, change in its substance and form, it will come upon this vital point more quickly than on any other within the scope of my mental vision.

Mr. PLATT. Mr. President, I have been convinced for months and years that nobody did the laboring man of the country any greater injury than those who attempted by appeals to his passion to inflame him, to incite him to unlawful acts. The laboring man of the country desires to submit to the laws of the country, and I think he asks no advocate of his right to disobey the laws of the country. The laboring man, I apprehend, does not want to enter into any unlawful combinations any more than he desires corporations to enter into unlawful combinations.

The real, true laboring man of this country desires to engage in no organization or association or to be guilty of no act which will destroy property, which will restrain trade, which will disastrously affect the operations of trade, and no greater injury can be done to him and his cause than intemperate appeals to him to defend any fancied right which he may have to engage in associations and organizations which are calculated to do public injury.

Now, as I said before, I do not propose at this time to discuss some decisions which have been rendered, which Senators say they have not read, and which I apprehend we have none of us examined so that we are thoroughly informed as to the point of those decisions. I simply want here and now to say that before the matter is thoroughly within our cognizance, before we understand exactly what has been decided, it is not wise to attack the judiciary of the United States; it is not wise to charge it with desiring to usurp power; it is not wise to intimate that judges are czars; it is not wise to talk about the disposition of the judiciary to reduce laborers to the condition of slaves and chain them to their oars.

That is not wise legislation. It is not wise discussion in the halls of legislation. We as legislators should have no passion about matters of this sort. Above all we should not seek for political advantage to be derived from occasions like this. The laboring man of this country will learn who his friends are. He

will not be deceived. He will not be deceived by frantic appeals to his passions, whether they take place on the floor of the Senate, or in the newspapers, or elsewhere. He has no desire to go beyond the limits of the law, and he has confidence, I believe, in the courts that he will be protected in all his legal rights.

I desire just to put in another remonstrance here. I do not believe, and I do not think the laboring man believes, that when engaged in the employment of common carriers he can choose his own time to leave that employment. The Senator from Indiana himself, seeing the length and breadth of the doctrine which he affirmed here—that it was the right of any man employed to leave his employment whenever he chose—puts in a disclaimer. He can talk in one breath about a man being chained to his car and he is forced in the next breath to say that he may not leave that car under all circumstances.

Common carriers are quasi public officers. They are engaged in the performance of a public duty, the transportation of passengers and property. Everybody who engages in their employment becomes a quasi public officer engaged in and responsible for the transportation of passengers and property, and neither the public carrier, be he corporation or individual nor the person employed by the public carrier, can quit his occupation in a way to damage passengers or property, in my judgment. That has been the law of all civilized nations for years and hundreds of years.

Can an engineer in a steamboat plying up and down the Potomac River in a storm choose that time to leave the employment of the common carrier that is transporting passengers and property along the river? Can he abandon his boat? Can he suffer it to go to ruin? Can he endanger the lives of the passengers and put the property in peril? Certainly he can not, any more than his employer can. Can a stage-driver, midway between the points of his route, in a dark night and a blizzard, say, "I choose this moment as the time when I will quit the service of my employer," and abandon his stage and the passengers to the fury of the storm? Can a person engaged by a railroad corporation abandon his occupation in a way to injure the property which is in the course of transportation? I apprehend not. I apprehend that no laboring man, that no employé, whether he belongs to an organization of labor or not, will set up that right.

Therefore it is not true—it is not true as a matter of law—that the employé can always quit the service of the common carrier. Just when and how he may quit that service I do not undertake to say. Under what circumstances he must, for the protection of the property which he is engaged in carrying, remain in the service, or at what point of time he may without injury to that company leave the service, is not the question here. That may well be left with the courts.

If the court has made any mistake in this decision, and I do not know enough about it to determine in my own mind whether it has or not, the Supreme Court of the United States will set it right. But what is to be gained by this intemperate talk about courts and judges and the judiciary and about chaining laborers to the car and making them galley slaves? The laboring man of this country, as I have already remarked, does not desire to do injury either to persons or property. He will, in my judgment, if he knows it, engage in no illegal combination, and if he does engage in illegal combinations he should be as much open to the decisions of the court as capital when it engages in illegal combinations. There is no distinction between capital and labor in this matter. Illegal combinations are what courts will aim at and what law should aim at and what lawmakers should aim at. Capital will not be shielded when it engages in illegal combinations, nor will labor or laborers be shielded if they engage in illegal combinations.

Do not let us lose our heads, Mr. President, for the sake of political advantage. Let us hold to principles. Combinations in restraint of trade, whether by capital or whether by laborers, are illegal, and combinations in restraint of trade which the United States Government has a right to protect, whether by capital or by laborers, should be dealt with with the same justice and the same vigor.

I again say that I do not discuss these cases, because I am not fully advised as to their scope and their meaning; but I do desire here to say that nothing is to be gained by rushing in such hot haste to defend laboring men from what after all may not have been any injustice to them.

Mr. BUTLER. Mr. President, I am not going now to enter into the discussion which seems to have been opened by the Senator from Connecticut [Mr. PLATT] and the Senator from Indiana [Mr. VOORHEES]. I will be pardoned if I say that in my judgment that discussion is a little premature. But this matter will not, I trust, be without value to us now and hereafter.

I was very profoundly impressed with the speech made by the Senator from Massachusetts [Mr. HOAR] when we were discussing what is known as the antioption bill, and when the other day he was discussing the election of United States Senators by the people. I will not say before we condemn, but before we proceed to criticise, anybody else, I submit that it is our duty to put our own house in order.

I know how difficult it is to resist appeals from a large body of my fellow-countrymen upon any given subject. I know how hard it is to say to them or to myself, you may conclude that that particular legislation is for your interest, but the Constitution of your country stands in the way, and I can not vote for it.

The agitation on this very proposition, begun several years ago, has been increasing in volume, in importance, I may say in intelligence. First, the demand was made upon Congress under what is known as the commerce clause of the Constitution to pass the interstate-commerce act and control the corporations of the country engaged in that business. We have heard from my distinguished friend the Senator from Illinois [Mr. CULLOM], usually so accurate, so conservative, so patriotic, the statement that he never dreamed for an instant that there was anything in that act which justified the decision of the courts in Ohio of which we have just heard.

It only shows, Mr. President, that with the exercise of all the sagacity and all the patriotism of which we are capable we sometimes tamper with and at least treat inconsiderately the grave and solemn provisions of the Constitution of the United States. It was done, sir, when we were discussing what was known as the antioption bill. It has been done again and again in this body and in the other House, yielding, as I have suggested, to what appears at least to be the demand of a large number of our fellow-countrymen whose voices are entitled to our consideration. As I stated, it is our duty to clear our own skirts before we inveigh against other coördinate branches of the Government. If there is in the tenth section of this act, which I hold in my hand, authority for the court to have made the decision which is said to have been made, the responsibility is upon ourselves and not upon the court.

If we have dealt lightly with the Constitution in our anxiety to control the commerce of this country, the fault and responsibility are with us and with nobody else. I will venture the assertion that it was not in the mind of a single Senator upon this floor, however able a lawyer he might be, that the authority for that decision could have been found in this provision of law.

Mr. HOAR. May I ask the Senator from South Carolina what he understands the substance of the decision to be when he makes that statement?

Mr. BUTLER. I have not read the decision.

Mr. HOAR. Will the Senator pardon me for one moment?

Mr. CULLOM. Let me read it.

Mr. BUTLER. I have only discussed it as I have heard it from Senators.

The VICE-PRESIDENT. Does the Senator from South Carolina yield to the Senator from Massachusetts?

Mr. BUTLER. Certainly.

Mr. HOAR. Perhaps I am all wrong, because I have only hastily seen the decision in the papers; but I understand that the Congress of the United States enacted that no railroad corporation in this country should give a preference to any one railroad in handling its freight over any other; that it should deal with all equally and fairly without preference. That seems to be pretty sensible legislation.

If the Senator from South Carolina and myself present ourselves to a common carrier to take a parcel, he going first and I next, the common carrier can not lay his parcel aside and take mine first because he likes me better, if any such unreasonable carrier could be found, which is not very likely. That is the provision of our law. Certain employés of a railroad say, "We do not like a certain other railroad for some reason or other, and we will continue in the service of the common carrier." Of course all railroad corporations act only by their agencies and instrumentalities. The court comes in and says to this railroad company, "You and your servants and agents shall carry out that law and treat all other railroads with entire equality." Whereupon the engineers, or the workmen, whatever they are, continuing in the service of that road and not leaving it, say "We will not do it. Here is a railroad in South Carolina we do not like, and that railroad's freight shall not be moved when it comes to the road we are working on." The judge says that the injunction of a court of equity applies, when its mandate is to obey the law, not only to the corporation, but to all its servants, and you who undertake to continue in the service of that road shall not disobey the law.

I will venture to say, if I may be pardoned one other word, that if the court had said that thing to the president of the road or to the superintendent, or to any of the officials not denominated laborers, there would have been one universal chorus of approbation from the American people if the court had led him by the heels if he had disobeyed. I understand Judge Taft and

Judge Ricks have said that thing alike to all the servants and employés: "As long as you are servants and employés of that road you have got to obey this law, made in the interest of the United States and made also by the earnest request," as the honorable Senator from South Carolina has so eloquently said, "of the very men and class of men you belong to." That is the whole of it.

Mr. BUTLER. I am not expressing any opinion about the wisdom or unwisdom, the justice or injustice, of this decision, because I have not read it. Possibly the decision may be entirely proper; I make no criticism about it; but what I was saying is that if that decision goes to the extent represented and as was not contemplated in the act I hold in my hand, it was inadvertence or a want of consideration on our part. It may be entirely proper, but I have been told that the decision goes entirely beyond that, and prevents the employés from leaving the service of the corporation. How far we intended that to be done is a question. I have not condemned the decision. It seems to me, after reading this tenth section, that the court was right, because it is not restricted to corporations and to common carriers, but extends to persons as well, and all persons combining for the purpose of interfering with the freedom of interstate commerce. Whether that evil can be reached by injunction or in what form is one of the questions I understand we are to inquire into.

But, Mr. President, what I was trying to impress upon the Senate was that if no such decision was contemplated under this provision of the interstate-commerce act, it shows conclusively Congress was not careful in the enactment. I have no criticism to make upon anybody for that, for, as I said, I am perfectly aware how difficult it is, with all the precautions and all the conservatism, to avoid the occurrence of such things in the future.

If I were called upon to express an opinion as to what I conceive to be the greatest danger to the perpetuity of the Government as it was originally organized, I would say it was to be expected from the usurpations of Congress itself. It is the encroachment of the legislative department of the Government which threatens the safety of this country and the liberties of the people.

Congress is called upon from session to session to stretch out its arms and take within its scope not only the jurisdiction justified by the Constitution itself, but jurisdiction upon all conceivable subjects which had much better be left to the States and the people of the States. I doubted at the time, and I must say I see no reason to have that doubt removed, whether it was wise to pass this act. I am not surprised that results have flown from it which have startled Senators upon this floor. It is in my judgment an abuse of the commerce clause of the Constitution. Such an exercise of power was never contemplated by those who made that instrument. As oppressive as corporate power may be and may have been in this country, it is in the long run safer to leave their conduct to the laws of competition between themselves.

We are always in danger when we do not confine ourselves to the strict letter of the Constitution in our legislation, when we do not confine ourselves to a jurisdiction which is unquestioned and unquestionable. Whenever we transcend that we are in danger of just what has occurred under the tenth section of this act. As I desire to get the tenth section into the RECORD, I ask the Secretary to read it.

The VICE-PRESIDENT. The tenth section of the act of February 4, 1887, will be read.

The Secretary read as follows:

SEC. 10. That any common carrier subject to the provisions of this act, or, whenever such common carrier is a corporation, any director or officer thereof, or any receiver, trustee, lessee, agent, or person acting for or employed by such corporation, who, alone or with any other corporation, company, person, or party, shall willfully do or cause to be done, or shall willingly suffer or permit to be done, any act, matter, or thing in this act prohibited or declared to be unlawful, or who shall aid or abet therein, or shall willfully omit or fail to do any act, matter, or thing in this act required to be done, or shall cause or willingly suffer or permit any act, matter, or thing so directed or required by this act to be done not to be so done, or shall aid or abet any such omission or failure, or shall be guilty of any infraction of this act, or shall aid or abet therein, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof in any district court of the United States within the jurisdiction of which such offense was committed, be subject to a fine of not to exceed $5,000 for each offense.

Mr. CULLOM. Mr. President, this whole discussion has been somewhat of a surprise to me, and I am inclined to think to everybody else, even to those of us who have taken part in it. But as there has been a good deal said about the decisions, since I had the honor to make a few remarks in the Senate a while ago I have received what purports to be the decision of Judge Ricks in the case at Toledo. As it is very brief, I think I will take the liberty of reading it to the Senate. Judge Ricks's decision is as follows:

This suit was instituted by the Toledo, Ann Arbor and North Michigan Railway Company to compel the Lake Shore and Michigan Southern Railroad, the Pennsylvania Company, and other defendants to receive from it and deliver to it freight and cars destined from one State to another, commonly known as interstate freight.

That was the case as it appeared in the United States courts.

The bill was drawn to enforce the third section of the interstate-commerce act, which provides:

The chairman of the committee has been commenting upon the tenth section of the act, which is the penalty section, but the suit is brought under the third section of the interstate-commerce act, and it reads as follows:

That it shall be unlawful for any common carrier subject to the provisions of this act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

That seems to read pretty well and is the common law of the country.

The common carriers subject to the provisions of that act are defined by the statute to be "any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water, when both are used under a common control, management, or arrangement, for a continuous carriage or shipment from one State or Territory of the United States or the District of Columbia to any other State or Territory of the United States."

The subject-matter of this litigation is therefore the construction and enforcement of an act of Congress, and the court acquires jurisdiction because of the Federal question involved. That such question is involved I think too plain for serious controversy. It is sufficient to constitute a case for cognizance by a Federal court if it involves but a single ingredient or question dependent on the Constitution or a law or a treaty of the United States, although it may at the same time involve any other questions that depend on the general principles of law. Chief Justice Marshall, in Osborn *vs.* United States Bank, 9 Wheaton, 738, considered——

Mr. DAVIS. Ogden?

Mr. CULLOM. Ogden is, I believe, the real report, but it says here "Wheaton"—

this point, and came to the following conclusion: "We think, then, that when a question to which the judicial power of the Union is extended by the Constitution forms an ingredient of the original case, it is in the power of Congress to give circuit courts jurisdiction of that cause, although other questions of fact or law may be involved in it."

Remedies of a similar nature might undoubtedly be invoked under the statutes and the common law, but the act in question affords the broadest, most effective relief, and the jurisdiction is therefore safely grounded upon that law.

Upon the filing of this bill on the 11th day of March, and upon application of the complainant to me at chambers, in Cleveland, a mandatory injunction was allowed, directed to the defendants, their agents, officers, servants, and employés, and it was therein ordered that the said defendants, Albert G. Blair, Jacob S. Morris, the Pennsylvania Company, the Wheeling and Lake Erie Railway Company, the Lake Shore and Michigan Southern Railway Company, the Michigan Central Railroad Company, the Cincinnati, Hamilton and Dayton Railroad Company, the Columbus, Hocking Valley and Toledo Railway Company, the Toledo and Ohio Central Railway Company, the Cincinnati, Jackson and Mackinaw Railway Company, and each of them and their officers, agents, servants, and employés be, and they are hereby, enjoined and restrained from refusing to offer and extend to the said Toledo, Ann Arbor and North Michigan Railroad Company the same equal facilities for interchange of traffic on interstate business between said railway companies as are enjoyed by other railway companies, and from refusing to receive from the said Toledo, Ann Arbor and North Michigan Railway Company cars billed from points in one State to points in another State which may be offered to said defendant companies the complainant, and from refusing to deliver in like manner to said complainant cars which may be billed over said complainant's line, from points in one State to points in other States, which may be offered to said defendant companies by the complainant, and from refusing to deliver in like manner to said complainant cars which may be billed over complainant's line from points in one State to points in other States.

"Ordered that a writ of injunction be issued out of and under the seal of this court as prayed for in the bill of complaint, to remain in force until the further orders of court herein."

The application for this order was made to me at chambers, in Cleveland, late on Saturday night, March 11. The situation set out in the bill disclosed an emergency in which prompt action was necessary. I had granted a similar mandatory order in 1891 on a bill for an injunction filed in this court by the Wheeling and Lake Erie Railroads, and it was enforced with beneficent results as against its engineers, firemen, and trainmen, who had refused to handle interstate-commerce freight loaded on cars consigned to various ports on Lakes Superior and Michigan. The bill in this case clearly entitled the complainant to relief as against the defendant railroads, who were threatening to refuse to receive or deliver interstate freight.

The section of the interstate-commerce law above quoted made it mandatory upon connecting railroads to receive and deliver passengers and freight and to afford equal facilities for the interchange of traffic. Corporations can act only through their officers, agents, and servants, so that the mandatory provisions of the law which apply to the corporation apply with equal force to its officers and employés. The authority of the court to issue such an order has been questioned, but it rests on well-established principles. In Beadl *vs.* Perry, L. R., 3 Eq. 465, a mandatory injunction was granted on motion by Sir John Stewart, V. C.

Judge Ricks also read Judge Taft's decision in the Ann Arbor injunction case, in which the temporary injunction against Chief Arthur, of the Engineers' Brotherhood, is allowed.

Mr. BUTLER. Will the Senator allow me to state that the tenth section to which I referred is an amendment of the original act?

Mr. CULLOM. That is true, but the whole law as it is now was before the judges, and the decision was really made under the third section, which requires fair treatment by one railroad of all the rest.

Mr. BUTLER. Is not that the section which prevents pooling?

Mr. CULLOM. No; it is not. The third section is not the pooling section.

Mr. BUTLER. The fifth section, I should say.

Mr. CULLOM. The fifth section is the antipooling section.

Mr. BUTLER. That is an amendment to the original text of the law.

Mr. CULLOM. Yes. The section to which the Senator referred and had inserted in the RECORD is the penal section of the statute.

Mr. BUTLER. Exactly.

Mr. CULLOM. But the decision of the court is under the third section, which, I think, is the law of England and of almost every other country where any legislation exists on this general subject.

As the chairman of the committee has taken occasion to make some remarks concerning the propriety of this interstate-commerce legislation, I simply desire to say that the people of the United States have been divided into three classes: One class requiring the Government to own the railroads; another class requiring that Congress should put in force the commercial clause of the Constitution for the regulation of interstate commerce; and the third class, the railroads themselves, not wanting anything done at all.

That is about the statement of the division of sentiment upon this question. The laboring classes themselves, together with the great body of the people of this country, long before any legislation was completed in the Congress of the United States under the provisions of the Constitution, were demanding that something should be done. The Senator intimates that we have made haste about interstate legislation——

Mr. BUTLER. Oh no, Mr. President; I did not criticise the Senator adversely at all.

Mr. CULLOM. I do not understand that the Senator criticised me at all.

Mr. BUTLER. No; I said I thought perhaps we had proceeded inconsiderately.

Mr. CULLOM. I understand that was the remark of the Senator; but the fact is that the Congress of the United States had this subject under consideration for ten years before anything was ever accomplished. A further fact is that for nearly one hundred years after the Constitution was adopted containing that commercial clause, giving Congress directly the control of the regulation of interstate commerce, nothing whatever had been passed except two little acts of Congress, one allowing the consolidation of railroads, and the other providing for the unloading of cattle and watering them somewhere between Illinois and the far West and New York. It seemed to the people of the United States that the time had come when that provision of the Constitution should be vitalized and that Congress should assert its power in the regulation of commerce over these great common carriers of the country.

So far as the Interstate Commerce Committee of the Senate is concerned, as the Senator from South Carolina, now the chairman of that committee, intimates, we approached this subject with great conservatism. We thought we were as careful as possible; we allowed the matter to run along session after session before we came to a conclusion, and when we did arrive at a conclusion we thought we had secured the passage of an act which would result not only in the protection of the great body of the people of this country in their individual rights, but in every other way; that we had put in force an act of Congress which would, to some extent at least, control and regulate these great corporations, which I regard as a very dangerous element in this country, unless they are regulated by the Government of the United States. Such vast wealth in control of a few men becomes a danger not under control of government. To-day there are about $10,000,000,000 worth of property in these railroad corporations. Perhaps one-eighth of all the wealth of the United States to-day is in the railroad companies of the United States, and the railroad corporations are substantially as one. They necessarily almost and naturally drift together, and practically they are controlled by a half-dozen men in this country.

I thought and the people thought and Congress thought that the time had come when some restraint and regulation should be enacted by Congress for the purpose of preventing these corporations from imposition or oppression upon the people in whatever way they might see proper to undertake to enforce it.

I have never had any disposition to impose unnecessary restraints upon the railroad companies. I am certain that my efforts as one Senator, feeble as they have been, have been in the line, as I thought, of protecting the great masses of the people of this country from imposition, extortion, unjust discrimination, or oppression in any way, including the great laboring class of nearly a million people operating these railroads.

I do not see anything in the decision of Judge Ricks which at this moment I desire to criticise. I do not recognize the right of the Government to say under all circumstances that a man must work and that he shall not stop. I recognize and believe in the freedom of the people of this country. I can very well conceive, however, of cases where a man employed as an engineer or in any other capacity in operating a railroad ought not to be at liberty to lay down his oar and desert the ship, if I may use that illustration; but I believe in the freedom of the great masses of the people who are operating the railroads of the country to quit when they please, as a general proposition, and there is not anything in that decision, so far as I can see in reading it, which interferes with that individual right of any man.

Mr. President, I do not care to discuss this subject longer, but I think it has been demonstrated by the discussion here to-day that the subject needs to be investigated by the Committee on Interstate Commerce or some other committee, so that when the next session convenes we may know what the law is, what the decisions are, and what the rights are as between the corporations and the men who are operating them as subordinates, as well as what are the rights of the people at large.

Mr. CALL. Mr. President, I wish to say a word upon the pending question. I think the Senator from Illinois [Mr. CULLOM] is quite right. The question is one of importance. The committee ought to sit during the recess of Congress and ought to investigate the subject.

The question involved is whether or not the right of a court to punish for contempt is unlimited, whether it supersedes the constitutional provisions which guarantee to a citizen the security of his personal freedom from arrest except under process of law and in the manner provided in the Constitution of the United States.

It is an unheard-of proposition that a judge shall turn the act of a citizen in declining to perform a duty, solvable in damages, a violation of a contract, into a criminal act, and deprive him of the right of trial by jury, of indictment, of confronting his witnesses, and of defending himself. How far is this power to punish for contempt in the breast of a single judge, restrained by no guarantees, no reservations of personal right, to extend?

The interstate-commerce law provides that certain offenses shall be penal, makes them criminal, and certain otherwise simple violations of contract obligations assumed upon the civil side of the court, and there to be determined, it makes under certain circumstances penal; but does that divest the citizen of his right to trial in the manner provided by the Constitution of the United States? That is the grave question; and that is the point where the civil liberties and the rights of the citizen are involved. The Constitution says:

> The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

It further directs that no person shall be deprived of his liberty without due process of law. Is the process of contempt due process of law, except in the most restricted cases, where there is an open defiance of the jurisdictional power, a rightful exercise of power by the court? Certainly not. If it be true that the power of the court to issue an injunction upon a laborer requiring him to perform a duty which he has contracted to perform can be punished as a contempt of court by his incarceration, then there is no limit to the judicial power.

I do not agree with the Senator from South Carolina [Mr. BUTLER] that there have been usurpations of the legislative power. The supreme sovereign legislature of this country is the people, and Congress is the people's representative, it obeys the voice of the people, and, in my judgment, it is a necessary part of this Constitution for the protection of the people.

This great consolidation of capital which teaches us that property has superior rights to human life and to mankind and to the personal liberties of men ought not to have a place in our system of government or in the deliberations of this body. This power of contempt, arbitrary and unlimited, should be restrained by law, and this tribunal here is the place where should be considered what shall be the restraints and the limitations placed upon it. If it be necessary for the common carriers of this country to have enlisted men bound to military service, let the law be so framed and so considered, but let it be done with a full knowledge on the part of the man that he sacrifices his civil rights and his personal rights for advantages which may be given to him.

Mr. CHANDLER. Mr. President, this discussion seems to have taken a wide range. If I understand it, the question before the Senate is the resolution of the Senator from Arkansas [Mr. JONES] authorizing the Committee on Indian Affairs to make investigations during the vacation, which resolution it is proposed to refer to the Committee to Audit and Control the Contingent Expenses of the Senate. I ask to be corrected if I am wrong.

The PRESIDING OFFICER (Mr. PLATT in the chair). The Chair would state that when that resolution was introduced the Senator from Massschusetts [Mr. HOAR] made an objection that

it should lie over until to-morrow, but, some Senators desiring to be heard on it, the Senator from Massachusetts withdrew his objection for that purpose. That is the way the matter now stands.

Mr. CHANDLER. That is the resolution now pending. With reference to that resolution, I hope, when it comes before the Committee to Audit and Control the Contingent Expenses of the Senate, that it may be adopted. The Committee on Indian Affairs having deemed it important to the transaction of its business that authority to sit during the vacation should be given, I am in favor of giving it to them. I am willing to trust to the committee not to abuse the discretion intrusted to them by the Senate, as I think nearly every committee of this body is worthy of being similarly trusted by the Senate.

Mr. President, the larger portion of the debate appears to have been upon a resolution reported this morning from the Committee on Interstate Commerce, which was a resolution originally introduced by the Senator from Delaware [Mr. HIGGINS]. It proposed to authorize an investigation during the recess of the Senate by the Committee on Interstate Commerce, in the first place, of the expediency of modifying that portion of the interstate-commerce law which prohibits pooling under any circumstances, and also to investigate the subject of sealing and closing cars and of bonding merchandise along our Northern borders. That resolution being before the Committee on Interstate Commerce, a resolution was introduced in the Senate by the Senator from Indiana [Mr. VOORHEES], in which he proposed that the committee should be authorized to inquire into the expediency of further legislation concerning the interstate-commerce law in its relation to the employés of railroads and other common carriers in view of recent judicial decisions.

The Committee on Interstate Commerce have reported back the resolution introduced by the Senator from Delaware substantially as he offered it. The committee have also added to that resolution a clause proposing an investigation substantially as requested by the Senator from Indiana. The clause is divested of some of the rhetoric which naturally and perhaps befittingly accompanied the resolution coming from the Senator from Indiana, and I ask the attention of the Senator from Indiana a moment, if he will kindly give it to me.

I stated that the Committee on Interstate Commerce had introduced into the resolution of the Senator from Delaware a clause covering the objects and purposes sought to be accomplished by the Senator from Indiana in the resolution which he had introduced. I desire the Senator from Indiana to examine that clause before the resolution comes up for action, in order to determine whether it satisfactorily embraces the scope of the inquiry which he wishes to have conducted by the committee.

Mr. VOORHEES. Does the Senator allude to the resolution reported from the committee this morning?

Mr. CHANDLER. Yes; to be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. VOORHEES. I have examined it, and I think it does cover the ground embraced in the resolution I offered. It gives a latitude to the action of the committee that will go into the matter which I desire to have investigated.

Mr. CHANDLER. It is perhaps due to the Senator that I should repeat the remark that I made when he was not in his seat, and that is, that the committee took the liberty of divesting his resolution of some of that exuberant rhetoric with which the Senator is accustomed to clothe his ideas when they are presented to the Senate; but it is not the intention of the committee, I beg to say to the Senator, to limit in the slightest degree the scope of the investigation which he proposed. If the language reported is not sufficient, I hope he will take occasion to-morrow, when the resolution comes up, to have it made explicit.

Mr. VOORHEES. When a man once makes a statement on this floor which is rather foolish he need not take occasion to repeat it to me the second time because I did not hear it the first. I do not know of any exuberance in this cold and matter-of-fact resolution, unless it is in the tenth section of the law which I have set out or in the luxuriant fancy of the Senator from New Hampshire.

I will now trust him to go on and make further remarks, as I have to retire from the Senate for a little while, and if I do happen to come in, I trust he will not take occasion to repeat them to me, as he has in this instance.

Mr. CHANDLER. If the Senator will allow me, before he retires, to explain what he calls my foolishness, the reason for my repetition was that I did not wish him to say that I had said while he was out of the Senate Chamber what I would not have said when he was in the Chamber.

Mr. VOORHEES. I never take exception to anything the Senator says.

Mr. CHANDLER. I almost always agree with the Senator in his humane and rhetorical expressions, but it was certainly difficult to incorporate them into the body of a resolution of investigation, and therefore he will excuse their omission.

Mr. President, I hope when it comes back from the Committee to Audit and Control the Contingent Expenses of the Senate, if the Senator from Louisiana [Mr. WHITE], who is the chairman of that committee, should report it back and be of opinion that the state of the contingent fund will allow of such an investigation, that the resolution will be adopted without any dissent by the Senate.

I believe the questions which are proposed for investigation are those of great importance to the public interest. I believe the question whether the prohibitions of pooling contained in the present law should be abolished and railroad competition prohibited by an act of Congress should receive careful investigation. I believe the questions connected with border transportation over our own roads and over the Canadian roads should receive further investigation; and I certainly believe that the subject which has been introduced by the resolution of the Senator from Indiana should be most carefully considered by the Senate and next winter by both Houses of Congress.

I do not know that the question is in a situation to be largely discussed at this time. It is perhaps unjust to the judiciary. If the decisions of the judges are to be made the subject of animadversion in the Senate, it is perhaps just to them that the discussion be postponed until a more careful examination can be made than has already been made of those decisions.

The question whether the employés of a railroad company, the employés of a common carrier, can be ordered to continue their work and not to strike upon the theory that a strike is a conspiracy against interstate transportation, and therefore the courts of the country can order the workmen not to strike, not to cease their work, is a question of infinite moment to the laboring men of this country, and it is perhaps of equal importance in a different sense to the corporations of the country.

I must confess, without being able to join in the language of the Senator from Maryland [Mr. GORMAN], who imputes to the judiciary in the cases which have already been decided those powers which are possessed alone by an autocratic ruler like the Czar of Russia—which I think was the expression of the Senator—that I am not prepared myself to see indorsed by the people of this country the proposition that by process of mandatory injunction men can be compelled to work for a corporation when they wish to quit work.

I think the great trouble that is threatened by these recent decisions is the one that has been stated so admirably by the Senator from Florida. It is the magnifying of judicial power, so that by injunctions the persons who are enjoined are not merely commanded not to do certain acts, but they are required upon pain of contempt of court to affirmatively perform certain acts which they conceive it is their privilege and their right as citizens to refrain from performing.

Mr. President, this is a recent power of courts of justice. It is a jurisdiction that has grown up in recent years. I very much question whether it is a power that ought to be extended by the construction of judges and of courts. The power of mandatory injunction is a very dangerous power for courts to use. It is a power which, under olden conditions and in former times, was rarely if ever exercised. The power of courts of equity was to prevent irreparable mischief by commanding the persons to whom the writs were sent negatively to abstain from doing that which would perpetrate a wrong.

But, Mr. President, under this modern system the courts undertake not merely to enjoin against wrongs, but they undertake to command the right to be done under the pains and penalties of being adjudged in contempt of court and without trial by jury to be imprisoned according to the pleasure of the court. I conceive that that is a very serious power, and is one which, if the courts of the United States are undertaking to exercise it, should be carefully inquired into and considered by the Senate of the United States and by both Houses of Congress with reference to a determination of the question whether by statute some limitation shall not be put upon the equity powers of the United States courts.

Mr. President, I have deemed it advisable to say this much because this question has come up for discussion. I wish to utter a further thought, and that is one of regret that the Senator from South Carolina [Mr. BUTLER], the chairman of the Committee on Interstate Commerce, has seen fit upon this occasion to discredit somewhat, as I think, the interstate-commerce law. The merits of that law have been well stated by the Senator from Illinois [Mr. CULLOM], the late chairman of the committee. He has undertaken to show to the Senate that the enactment of that law was deemed an important protection to the people of this country in view of the consolidation of the railroad companies of the country, by which, as he says, nearly

$10,000,000,000 of corporate capital has been practically aggregated in one mass for the purpose of doing the transportation business of the country and of protecting the capital so employed.

I repeat, now that the Senator from South Carolina is in his seat, I regret that he as chairman of the Interstate Commerce Committee should have taken occasion to discredit this great statute as one which he believes ought not to have been passed.

Mr. BUTLER. The Senator from New Hampshire is entirely mistaken. My remarks were based entirely upon what fell from the Senator from Illinois. He said that he himself was surprised that that provision was in the act. That was the ground of my criticism.

Mr. CHANDLER. It is in regard to a certain clause in the act, do I understand the Senator?

Mr. BUTLER. He said he was astonished and surprised.

Mr. CHANDLER. Which clause does the Senator refer to, the antipooling clause?

Mr. BUTLER. The clause under which the decision was made. So I understood the Senator from Illinois.

Mr. CHANDLER. The clause under which the decision was made makes the doing of certain acts under the law, or the omission to do certain acts under the law, a penal offense; but it nowhere contains the jurisdiction, I understand, by process of equity and by orders of injunction to do what the courts are now undertaking to do. If I am wrong about that, the Senator from South Carolina will correct me.

Mr. BUTLER. I really am not able to inform the Senator. He has read the act as much as I have. I was expressing no opinion whatever about what the act did contain, except that we ought to be very careful in making laws to be sure that the thing shall not be accomplished which appears to have been accomplished in the estimation of the Senator from Illinois under this very act, and which he says was not contemplated by it.

Mr. CHANDLER. This section certainly does not contain a clause investing the courts of the United States, specifically or generally, with any such jurisdiction as the courts are now assuming.

Mr. BUTLER. I am not prepared to express an opinion on that point.

Mr. CHANDLER. Certainly the Senator knows that the question what the jurisdiction of the United States courts shall be is a question wholly within the powers of Congress.

Mr. BUTLER. It is statutory entirely.

Mr. CHANDLER. I certainly understood the Senator from South Carolina, when I came in the Senate a little while ago, to be speaking of the whole interstate-commerce act and to be saying that he did not think and never had thought the interstate-commerce act was a wise statute.

Mr. BUTLER. I will state what I did not state a while ago, that I voted against the act when it was passed. That would rather indicate what my opinion was about it.

Mr. CHANDLER. I am not undertaking, of course, to call the Senator to any account for his action then or for his action now. The Senator might have thought the act ought not to have been passed, and he might think to-day that it was an unwise act, but certainly the Senator from South Carolina, as it is upon the statute books, will be in favor of having the act enforced.

I merely wish myself to say that I regard this statute as one of the most important and beneficent statutes that was ever enacted by the Congress of the United States. I do not believe that the people of this country would ever have tolerated the consolidation of its great railroads into a few trunk lines of enormous capital, gradually taking possession of all the feeders and branch lines until making, as I understand there are to-day, eight great trunk lines between Chicago and the seaboard, with, upon an average, $1,000,000,000 of capital in one way or another involved in each one of the great trunk lines, and the whole of them, so far as the question of competition is concerned, so far as the question of pooling is concerned, engaged in a united effort to defeat the operation of this great and beneficent statute—I do not believe that the people of this country would ever have tolerated this extraordinary and these complete consolidations of the great railroads of the country if there had not been placed upon the statute book of the United States a law in which the American people declared that the people of the country should be protected from extortionate rates and from discrimination and from all manner of inequalities that could be devised by the railroad companies, and that the people of the country should be protected from all this by the paramount power of the Congress of the United States.

Mr. BUTLER. Will the Senator from New Hampshire allow me a moment?

Mr. CHANDLER. Certainly.

Mr. BUTLER. The Senator says it is a wise and beneficent act, and I am not going to take any issue with him about that; but if it should turn out that there is authority in the very wise law of which he speaks to deprive the laboring classes of this country of their liberties, would the Senator still insist that it was wise to allow it to remain so? I agree with him that if Congress has the constitutional power to control these large transportation companies it is the duty of Congress to do so.

I would state generally, if he will permit me one word more, that in my view the more Congress keeps its hands off the business interests of the country the better it will be for the country, the people, and the business interests themselves. That I state as a general proposition. Under the commerce clause of the Constitution it might be the duty of Congress to regulate the matter, but if it should turn out, as I said, that the act itself deprives the laboring classes of their liberties and prevents their leaving their employment when they choose, would the Senator be in favor of sustaining that?

Mr. CHANDLER. I answer the Senator frankly, no; and if the Senator had been in his seat a few moments ago he would have heard me express great fear as to the extraordinary power of mandatory injunction which the courts of the United States have lately assumed. I say it is a dangerous power.

But I call the attention of the Senate to the fact that there is not any such power expressly given by the language in this statute. Acts are forbidden and acts are commanded in the statute, but the courts of the United States are not told that they may issue such orders as the Senator and I both understand have recently been issued.

Mr. BUTLER. But, Mr. President——

Mr. CHANDLER. Therefore, if the Senator will wait one moment, when I will yield to him, I say the complaint that is to be made of these decisions, if it is to be made at all, and I do not see how we can tell whether it is to be made at all until we have made the inquiry which the committee proposes—I say the complaint is a complaint of the courts and their jurisdiction, and is not and can not be made a complaint against anything that is to be found within the four corners of the interstate commerce statute itself.

Mr. BUTLER. Then the position in which the Senator finds himself is that he is undertaking to decide a judicial question, and, as he knows, the Senate of the United States is not an appellate court. There is a very well-recognized power to cure those defects, if there are such defects. I can not undertake to say in this summary way whether that authority is in the act or not; but I will assume that if it is not, and any subordinate court has attempted to exercise a power which is not contained in the law itself, that error will be corrected by the Supreme Court of the United States. That I must assume until the contrary appears. Therefore I think the discussion as to whether that provision is in the act or not is entirely aside from the real issue.

Mr. CHANDLER. I believe the Senator from South Carolina and I now agree perfectly.

Mr. BUTLER. I am glad to know that the Senator thinks this is not an appellate tribunal and that the Supreme Court can correct the evil of which he himself complains.

Mr. CHANDLER. That may be, Mr. President, if the jurisdiction is not now given by any existing statute; but if the jurisdiction has been extended to mandatory injunctions to secure the working of railroad trains and Congress does not believe that the equity jurisdiction exists, it is certainly competent for Congress to repeal any law that gives such jurisdiction.

I for one, Mr. President, only sought in this connection in my remarks to dissent from the statement of the Senator from South Carolina to the effect, as I thought, that he considered the interstate-commerce act to be to-day an unwise law upon the statute books. I do not so consider it. I think that this discussion, as I stated in the beginning, is somewhat premature upon a resolution which is not before the Senate, and which is only to come up to-morrow, or whenever the Committee to Audit and Control the Contingent Expenses of the Senate shall have reported the resolution which was submitted from the Committee on Interstate Commerce this morning by the Senator from South Carolina.

The Senator from Maryland undertook to animadvert with considerable severity upon the Senator from Ohio [Mr. SHERMAN], as if the Senator from Ohio had objected to the resolution reported by the Senator from South Carolina from the Committee on Interstate Commerce; whereas the Senator from Ohio merely raised the question upon the resolution authorizing the Committee on Indian Affairs to make an investigation. He did, it is true, suggest that extravagant expenditures should not be authorized, but I understand he made no allusion whatever to the resolution which is now under discussion, but which is not before the Senate, and confined himself strictly to the resolution which is now before the Senate.

Mr. BUTLER. I did not so understand the Senator from Ohio. I thought he was general in his condemnation of the practice of

the Senate in authorizing committees to investigate questions during the recess.

Mr. CHANDLER. I think up to the time when the Senator from Maryland criticised the Senator from Ohio there had not been a word said about this interstate-commerce investigation. The Senator from Ohio will remember better than I.

Mr. PALMER. Mr. President, I entertain some views in regard to the recent decisions in question that have not yet been expressed by any member of the Senate, and I hope when the subject is again before the Senate that I shall have an opportunity of expressing them. I understand that there is now a disposition on the part of some Senators to proceed to the consideration of executive business, and I will at present yield the floor, with the hope that I shall have an opportunity of stating my opinions when the subject is again called up.

Mr. SHERMAN. I rose to suggest that the discussion had better be postponed.

Mr. BUTLER. I move that the Senate proceed to the consideration of executive business.

Mr. HOAR. I call for a division on that motion.

Mr. CALL. Will the Senator from South Carolina withdraw the motion for a moment?

Mr. BUTLER. Certainly.

INCREASE OF COMMITTEE MEMBERSHIP.

Mr. CALL. I ask unanimous consent that to-morrow morning, after the reading of the Journal, I may be allowed to call up the resolution which lies on the table in reference to the enlargement of certain committees of the Senate, for the purpose of submitting some observations upon it.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Florida?

Mr. HARRIS. I ask the Senator from Florida to change his request, so that if there is any morning business in the form of resolutions which are not going to consume time in debate, the discussion of the resolution he has introduced may come up after the regular morning business.

Mr. CALL. I agree to that.

INVESTIGATION BY COMMITTEE ON AGRICULTURE AND FORESTRY.

Mr. GEORGE. By the kindness of the Senator from South Carolina, I desire to introduce a resolution, and as it is unusual, it is necessary for me to make a little explanation, which I hope the Senate will indulge me in making.

The resolution provides that the Secretary of the Senate shall set apart for the Committee on Agriculture and Forestry out of the contingent fund $5,000 to be used in an investigation directed by the Senate into the condition of agriculture in this country, the prices of cotton, wheat, etc. That resolution was first passed in the last Congress in April, 1892. I applied to the Secretary of the Senate then for some funds with which to conduct a part of the investigation, I being the chairman of a subcommittee. I found that nearly the whole fund had been preoccupied by other resolutions which had been passed by the Senate, and the sum of only $1,000 remained to be used by the Committee on Agriculture and Forestry in this great investigation. The result of it was that there was just the beginning of the investigation made. An expert was employed and the investigation started.

I will here state that the sum of only $15 of that $1,000 was used in paying the expenses of any member of the subcommittee. One member of the subcommittee visited the city of New York twice on that business. He had also private business at the same time, and he divided the expenses and charged the fund with $15.

Apprehending a similar trouble this year, I introduced a resolution at the last session continuing the investigation authorized by the prior resolution of the Senate, and I thought I would be in time. The Committee on Agriculture and Forestry have held a meeting and apportioned the work between two subcommittees, one subcommittee to have charge of the cotton investigation, the other subcommittee to have charge of all the other agricultural productions of the country.

I made application to have set apart to the committee, as I understood had been formerly the practice, the sum of $5,000 to pay the expenses of the two subcommittees, the experts, etc. I am informed to-day by the Secretary of the Senate that so many resolutions have been passed authorizing expenditures from the contingent fund that the small sum which I have asked for the benefit of the two subcommittees will probably not be available; at least I can not get an assignment of that sum, so that the committee is in doubt as to what course to pursue. The Secretary very kindly stated to me that he would be glad if by some authority of the appropriate Senate committee or some action of the body the assignment should be made and he should be released from the responsibility.

Under these circumstances I have thought it my duty, as the investigations which have been commenced are of a most interesting character to the farmers of the United States, to relieve the Secretary of the Senate from the difficulty about an assignment, and I have prepared a resolution, which, as I write a very bad hand, I will read in the hearing of the Senate for fear the clerks may not be able to read it:

Resolved, That the Secretary of the Senate be, and he is hereby, instructed to set apart for the investigation of the condition of agriculture in the United States, etc., as directed by the resolution of the Senate to be made by the Committee on Agriculture and Forestry, the sum of $5,000, one thousand of which to be paid out of the contingent fund available for the present fiscal year and the remainder out of the contingent fund for the next fiscal year.

I make the explanation, and ask that the resolution be printed. Under the rule it lies over, I believe, until to-morrow, and then I shall call it up for action.

The VICE-PRESIDENT. It will be so ordered.

PHOTOGRAPHIC COPIES OF SENATE ARCHIVES.

Mr. BLACKBURN. I ask at this time unanimous consent to make a report from the Committee on Rules of a resolution which was referred to that committee. I report the resolution back favorably with an amendment, and ask unanimous consent to have it considered now, as it will provoke no debate and is a matter of some importance.

Mr. HOAR. Let it be first read for information.

The VICE-PRESIDENT. The resolution will be read, together with the amendment reported by the Committee on Rules.

The Secretary read the resolution, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, directed to allow, under his supervision and subject to his directions, the representative of the Department of Justice on the board of management of the World's Columbian Exposition to have photographic copies made of certain ancient executive communications on file in the archives of the United States Senate for exhibition at the World's Columbian Exposition, as follows: The nominations by the President of the Chief Justices and the Associate Justices of the Supreme Court of the United States, embraced in Nos. 1, 2, 3, 6, 7, 14, 16, 27, 28, 31, 35, 37, 40; also nominations of Ellsworth and Fuller, and Jefferson's address to the Senate on taking the oath of office.

The amendment reported by the Committee on Rules was to add to the resolution:

Provided, That the copies above referred to are to be used solely for the purposes of exhibition at the Columbian Exposition, and upon its conclusion are to be delivered to the Secretary of the Senate: *And provided further*, That the negatives from which the copies are printed shall also be delivered to the Secretary of the Senate.

Mr. BLACKBURN. I desire to say that the amendment recommended by the Committee on Rules is intended to prevent the sale and distribution generally over the country of copies of the archives which are named in the resolution. The amendment of the committee proposes to put the work completely under the control and in the hands of the Secretary of the Senate. It adds further that, as soon as these copies are made, the negatives shall be left in the custody of the Secretary, and that those copies, when made, shall be used for no purpose except for exhibition at the Columbian World's Exposition, and when that shall have been concluded they shall be returned to the Secretary of the Senate. They are all in one book, and the Secretary of the Senate assures the committee that there is no danger of any defacement or injury resulting.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none. The question is on the adoption of the amendment reported by the committee.

The amendment was agreed to.

The resolution as amended was agreed to.

EXECUTIVE BUSINESS.

Mr. GORMAN. I renew the motion that the Senate proceed to the consideration of executive business.

Mr. HOAR. On that I demand a division.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maryland that the Senate proceed to the consideration of executive business, on which the Senator from Massachusetts demands a division.

The Senate proceeded to divide; and the ayes were 17.

Mr. GORMAN. Let us have the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DAVIS (when his name was called). I am paired with the Senator from Indiana [Mr. TURPIE].

Mr. GEORGE (when his name was called). I am paired with the Senator from Oregon [Mr. DOLPH]. If he were present I should vote "yea."

Mr. MITCHELL of Oregon (when his name was called). I am paired with the Senator from Wisconsin [Mr. VILAS] on all political questions.

Mr. GEORGE. I suggest to the Senator from Oregon that as I am paired with his colleague [Mr. DOLPH] we might both vote by a transfer of pairs. Will that do?

Mr. MITCHELL of Oregon. I have no objection to that course. I vote "nay."

Mr. GEORGE. I vote "yea."

Mr. WASHBURN (when his name was called). I am paired with the Senator from West Virginia [Mr. CAMDEN].

The roll call was concluded.

Mr. CHANDLER. I desire to announce my pair on this question with the junior Senator from Georgia [Mr. GORDON]. If he were present I should vote "nay."

Mr. POWER. I will announce my pair with the Senator from Louisiana [Mr. WHITE].

Mr. CALL (after having voted in the affirmative). I am paired with the Senator from Massachusetts [Mr. LODGE]. I did not understand the pair to relate to the question of going into executive session or an adjournment; but I will transfer my pair on this occasion to the Senator from Nebraska [Mr. ALLEN] and let my vote stand.

Mr. BUTLER (after having voted in the affirmative). I think I ought to state that I have a general pair with the Senator from Pennsylvania [Mr. CAMERON], but I understand it does not apply to a motion to proceed to the consideration of executive business, and therefore I will let my vote stand.

Mr. HOAR. May I be permitted to say that if this be not a question on which the two parties divide on party lines I do not know what is.

Mr. HARRIS. I did not hear the remark of the Senator from Massachusetts.

Mr. HOAR. I will repeat it. I said that if this were not a question on which the two parties divided on party lines I did not know what was.

Mr. MILLS (after having voted in the affirmative). Then I withdraw my vote. I am paired with the Senator from New Hampshire [Mr. GALLINGER].

Mr. BUTLER. I think that I am conferring a favor upon the Senator from Pennsylvania by voting, because if the vote should develop the want of a quorum it would probably necessitate sending for him. However, if that is the understanding on the other side I do not want to violate any obligation, and I withdraw my vote.

Mr. STOCKBRIDGE. I desire to state that my colleague [Mr. MCMILLAN] is away on important business, and is paired with the Senator from North Carolina [Mr. RANSOM].

The result was announced—yeas 24, nays 10; as follows:

YEAS—24.

Bate,	Faulkner,	Hill,	Palmer,
Blackburn,	George,	Hunton,	Pasco,
Brice,	Gibson,	Kyle,	Peffer,
Caffery,	Gorman,	McPherson,	Pugh,
Call,	Gray,	Martin,	Vance,
Coke,	Harris,	Murphy,	Vest.

NAYS—10.

Cullom,	Higgins,	Morrill,	Stockbridge.
Hansbrough,	Hoar,	Platt,	
Hawley,	Mitchell, Oregon	Sherman,	

NOT VOTING—50.

Aldrich,	Dixon,	Manderson,	Stewart,
Allen,	Dolph,	Mills,	Teller,
Allison,	Dubois,	Mitchell, Wis.	Turpie,
Berry,	Frye,	Morgan,	Vilas,
Butler,	Gallinger,	Pettigrew,	Voorhees,
Camden,	Gordon,	Power,	Walthall,
Cameron,	Hale,	Proctor,	Washburn,
Carey,	Irby,	Ransom,	White, Cal.
Chandler,	Jones, Ark.	Roach,	White, La.
Cockrell,	Jones, Nev.	Shoup,	Wilson,
Colquitt,	Lindsay,	Smith,	Wolcott.
Daniel,	Lodge,	Squire,	
Davis,	McMillan,	Stanford,	

The VICE-PRESIDENT. No quorum having voted, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bate,	Faulkner,	Hunton,	Platt,
Blackburn,	George,	Kyle,	Power,
Brice,	Gibson,	McPherson,	Pugh,
Butler,	Gorman,	Martin,	Sherman,
Caffery,	Gray,	Mills,	Stockbridge,
Call,	Hansbrough,	Mitchell, Oregon	Vance,
Chandler,	Harris,	Morrill,	Vest,
Cockrell,	Hawley,	Murphy,	Washburn.
Coke,	Higgins,	Palmer,	
Cullom,	Hill,	Pasco,	
Davis,	Hoar,	Peffer,	

Mr. GEORGE. I desire to state that my colleague [Mr. WALTHALL] is absent from the city owing to illness, and that he is absent in accordance with the advice of his physician.

The VICE-PRESIDENT. Forty-one Senators have responded to their names. No quorum is present.

Mr. GORMAN. There is unquestionably a quorum in the city, but it would probably be difficult to get it here this afternoon. I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 35 minutes p. m.) the Senate adjourned until tomorrow, Tuesday, April 11, 1893, at 12 o'clock m.

TUESDAY, *April 11, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections. The resolution will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

EXECUTIVE SESSION.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. CALL. Unless there is some very special reason for an executive session, I obtained unanimous consent yesterday to address the Senate this morning on the resolution I introduced proposing the enlargement of certain committees, and I should like to proceed.

Mr. GORMAN. I think it important to have a short executive session.

Mr. CALL. Then I will yield.

The VICE-PRESIDENT. The Chair will state that unanimous consent was given yesterday for the Senator from Florida to proceed this morning.

Mr. GORMAN. I understand, but the Senator from Florida yields for an executive session.

Mr. CALL. I will yield and postpone my remarks.

Mr. HOAR. Does that require unanimous consent?

The VICE-PRESIDENT. The question is on the motion of the Senator from Maryland, that the Senate proceed to the consideration of executive business.

Mr. HOAR. I hope the Senator from Florida will proceed with his remarks according to the unanimous understanding of the Senate. It was the agreement that this time should be devoted to his remarks, and I do not think he should waive his right.

The VICE-PRESIDENT. The Senator from Florida has yielded to the Senator from Maryland.

Mr. COCKRELL. The Senator from Florida has certainly a right to yield the floor to the Senator from Maryland.

Mr. HOAR. Certainly he has that right.

Mr. COCKRELL. He has done that.

Mr. HOAR. But it destroys the unanimous consent which had been previously given to proceed with his remarks this morning.

Mr. CALL. I do not desire to interfere with the orderly progress of business if there are any executive matters of importance to be considered.

Mr. CHANDLER. Upon the motion to proceed to the consideration of executive business I ask for the yeas and nays.

Mr. COCKRELL. We join in the request on this side.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CALL (when his name was called). I am paired with the Senator from Massachusetts [Mr. LODGE]. I understand the pair to permit a vote where a quorum is needed; but I have transferred my pair to the Senator from Nebraska [Mr. ALLEN], and vote "yea."

Mr. MITCHELL of Oregon (when his name was called). I am paired with the senior Senator from Wisconsin [Mr. VILAS].

Mr. SQUIRE (when his name was called). I am paired with the Senator from Virginia [Mr. DANIEL].

The roll call was concluded.

Mr. HUNTON. I desire to announce that my colleague [Mr. DANIEL], who has been absent from the city for a few days, is paired with the Senator from Washington [Mr. SQUIRE]. If my colleague were here he would vote "yea." I desire also to state that my friend the Senator from Georgia [Mr. COLQUITT] is paired with the Senator from Iowa [Mr. WILSON] with the understanding that he may vote to make a quorum. I ask the Secretary to call his name.

Mr. COLQUITT. I vote "yea."

Mr. MILLS (after having voted in the affirmative). I ask if the Senator from New Hampshire [Mr. GALLINGER] has voted?

The VICE-PRESIDENT. He has not voted, the Chair understands.

Mr. MILLS. Then I withdraw my vote. I am paired with that Senator.

The VICE-PRESIDENT. The Senator from Texas withdraws his vote.

Mr. DUBOIS (after having voted in the negative). I inquire if the junior Senator from New Jersey [Mr. SMITH] has voted?

The VICE-PRESIDENT. He has not voted, the Chair is informed.

Mr. DUBOIS. Then I withdraw my vote.

The VICE-PRESIDENT. The Senator from Idaho withdraws his vote.

Mr. BERRY (after having voted in the affirmative). I have been paired with the Senator from Colorado [Mr. TELLER] generally, but I transfer that pair to the Senator from New Jersey [Mr. SMITH], and will let my vote stand. The Senator from Idaho [Mr. DUBOIS] can cast his vote also, as the Senator from New Jersey [Mr. SMITH] and the Senator from Colorado [Mr. TELLER] will stand paired.

Mr. DUBOIS. I vote "nay."

The result was announced—yeas 39, nays 16; as follows:

YEAS—39.

Bate,	Colquitt,	Irby,	Peffer,
Berry,	Faulkner,	Jones, Ark.	Pugh,
Blackburn,	George,	Kyle,	Roach,
Brice,	Gibson,	Lindsay,	Stewart,
Butler,	Gordon,	McPherson,	Turpie,
Caffery,	Gorman,	Martin,	Vance,
Call,	Gray,	Mitchell, Wis.	Vest,
Camden,	Harris,	Murphy,	Voorhees,
Cockrell,	Hill,	Palmer,	White, La.
Coke,	Hunton,	Pasco,	

NAYS—16.

Cameron,	Dolph,	Hoar,	Proctor,
Carey,	Dubois,	Manderson,	Sherman,
Chandler,	Hansbrough,	Morrill,	Stockbridge,
Cullom,	Hawley,	Power,	Washburn.

NOT VOTING—29.

Aldrich,	Hale,	Pettigrew,	Vilas,
Allen,	Higgins,	Platt,	Walthall,
Allison,	Jones, Nev.	Ransom,	White, Cal.
Daniel,	Lodge,	Shoup,	Wilson,
Davis,	McMillan,	Smith,	Wolcott.
Dixon,	Mills,	Squire,	
Frye,	Mitchell, Oregon	Stanford,	
Gallinger,	Morgan,	Teller,	

So the motion was agreed to; and the Senate proceeded to the consideration of executive business. After three hours spent in executive session the doors were reopened.

INCREASE OF COMMITTEE MEMBERSHIP.

Mr. CALL asked and obtained leave, by unanimous consent, to address the Senate at the conclusion of the routine business to-morrow upon the resolution submitted by him March 20, 1893, providing for the enlargement of the membership of certain committees of the Senate.

Mr. FAULKNER. I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 15 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, April 12, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 11, 1893.

THIRD ASSISTANT SECRETARY OF STATE.

Edward H. Strobel, of New York, to be Third Assistant Secretary of State, vice William M. Grinnell, resigned.

TREASURER OF THE UNITED STATES.

Daniel N. Morgan, of Connecticut, to be Treasurer of the United States, to succeed Enos H. Nebeker, resigned.

ASSISTANT TREASURER OF THE UNITED STATES.

Conrad N. Jordan, of New York, to be assistant treasurer of the United States at New York City, in the State of New York, to succeed Ellis H. Roberts, resigned.

UNITED STATES DISTRICT JUDGE.

Charles B. Bellinger, of Oregon, to be United States district judge for the district of Oregon, vice Matthew P. Deady, deceased.

UNITED STATES ATTORNEY.

Henry V. Johnson, of Colorado, to be attorney of the United States for the district of Colorado, vice John D. Fleming, whose term expired March 23, 1893.

JUDGE OF PROBATE.

William K. Reid, of Utah Territory, to be judge of probate in the county of Sanpete, in the Territory of Utah, vice Jacob Johnson, resigned.

COMMISSIONER OF INDIAN AFFAIRS.

Daniel M. Browning, of Benton, Ill., to be Commissioner of Indian Affairs, vice Thomas J. Morgan, resigned.

ASSISTANT COMMISSIONER OF INDIAN AFFAIRS.

Frank C. Armstrong, of Washington, D. C., to be Assistant Commissioner of Indian Affairs, vice Robert V. Belt, resigned.

THIRD LIEUTENANT, REVENUE-CUTTER SERVICE.

Henry L. Peckham, of Rhode Island, to be a third lieutenant in the Revenue-Cutter Service, to succeed John B. Hull, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 7, 1893.

GOVERNOR OF NEW MEXICO.

William T. Thornton, of Santa Fe, N. Mex., to be governor of New Mexico.

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARY.

James O. Broadhead, of Missouri, to be envoy extraordinary and minister plenipotentiary of the United States to Switzerland.

Eben Alexander, of North Carolina, to be envoy extraordinary and minister plenipotentiary and consul-general of the United States to Greece, Roumania, and Servia.

CONSULS.

Edgar Whidden, of Maine, to be consul of the United States at St. Stephen, New Brunswick.

James E. Neal, of Ohio, to be consul of the United States at Liverpool.

Q. O. Eckford, of Mississippi, to be consul of the United States at Kingston, Jamaica.

James M. Dobbs, of Georgia, to be consul of the United States at Valparaiso.

David N. Burke, of New York, to be consul of the United States at Pernambuco.

CONSUL-GENERAL.

William T. Townes, of Virginia, to be consul-general of the United States at Rio de Janeiro.

APPRAISER OF MERCHANDISE.

Charles E. Ingersoll, of Pennsylvania, to be appraiser of merchandise in the district of Philadelphia, in the State of Pennsylvania.

SURVEYOR OF CUSTOMS.

William M. Maize, of Ohio, to be surveyor of customs for the port of Columbus, in the State of Ohio.

WEDNESDAY, *April 12, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The Secretary read the resolution, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

INCREASE OF COMMITTEE MEMBERSHIP.

The VICE-PRESIDENT. Pending the consideration of the resolution of the Committee on Privileges and Elections, the Chair, in pursuance of the agreement made yesterday, lays before the Senate the resolution of the Senator from Florida [Mr. CALL], upon which he is entitled to the floor. The resolution will be read.

The Secretary read the resolution submitted by Mr CALL March 20, 1893, as follows:

Resolved, That the Committees on Finance, Naval Affairs, Military Affairs, Judiciary, Foreign Relations, Appropriations, Commerce, and Interstate Commerce shall each consist of fifteen members.

Mr. CALL. Mr. President, the Senator from Massachusetts [Mr. HOAR], in a speech of singular beauty of style and forcible argument in support of his conclusions, laid before the country a few days since a statement of the important place which the Senate holds in our fabric of Government. He recounted the illustrious men who have been members of this body whose memory still lingers here.

It is not necessary that I should preface what I have to say with an exhibition to the country of the reasons for the creation of this body; but it is important that we should have some regard to its peculiar structure and its characteristics. The Constitution of the United States contains the following provisions:

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

* * * * * * *

Each House shall be the judge of the elections, returns and qualifications of its own members.

* * * * * * *

Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

* * * * * * *

Congress shall have power to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

These provisions constitute the great charter of free government. They are the defense of the people's rights, and upon them depend all the powers of the supreme and sovereign Legislature of the nation.

The chief characteristic of these provisions is the independence of the two Houses of Congress in the exercise of their legislative powers. That depends upon the provision that each House may determine the rules of its proceedings. The concurrence of the will of these two bodies, their independent will, in forms of proceeding established by themselves, constitutes the law-making power of this Government.

In the Senate of the United States the equality of States is the essential distinction and the foundation of its powers and functions. Without that equality of States the structure of this Government is essentially changed. It is the one provision that protects the smaller portions of the country in their separate organizations from the absolute control of a sectional majority. It is the one provision that enables the people of this country to assert over all the departments of the Government the guaranties of the Constitution in respect to their personal rights.

Every sentiment of devotion to free government, every feeling of just pride in the prerogatives and privileges of the Senate, every pride of patriotism in its history and in our country demands a loyal observance of this the essential feature of the Constitution—the preservation of the equality of the States in the Senate.

The question arises, How shall it be done? This is an all-important question. Is it to be done by conferring powers and privileges on the Senators from some States over those from others? Is it to be done by allowing connection with the important business of this body in a greater degree to the Senators of some States than those of others? Is it to be done by gratifying the personal pride, the desire for superior consideration, of Senators from some States over those of others, because of their more intimate connection with the great transactions of sovereign legislative power over a great people? Is this equality to be preserved by allowing the advantages of adventitious fortune, of accumulated wealth, of social position, of corporate power, to have greater influence in this body in the person of Senators from some States than those from others?

How shall this be prevented, Mr. President? If by negligence, or chance, or the infirmities of human nature this order of motives shall be allowed to have place in this body, if instead of a careful observance of the equality of the States in our rules of proceeding, personal ambition, pride, social distinction, the influence of wealth, the representation of power shall differentiate the Senators here in their connection with the public business, then this scheme of government so far as the Senate is concerned is a failure, and the people of the United States, instead of a friend and a protector, will have an enemy, and a dangerous enemy to popular liberty.

If, instead of preserving the equality of the States, our rules of proceeding be such as to admit of the existence and influence of such motives, then we shall have destroyed the equality of the States of the Union.

The methods by which the sovereign legislative powers of this body shall be exercised are vital to the continuance of the confidence of the people in it, as a body of men who rise superior to these motives, men worthy of the confidence and respect of the people, as a tribunal not only powerful but august in its character, essential to the preservation of free government.

Each House may determine the rules of its proceedings.

What are the rules of proceeding? The great rule of proceeding by which the Senate can effectuate its functions is the constitution of its committees. It is the selection of Senators to whom shall be committed all proposed exercise of legislative power for examination and recommendation. The final exercise of the sovereign legislative power is oftentimes and to a large extent performed by the committee to which its proposed legislation is referred.

The importance, then, of the constitution of our committees will be readily recognized. They may be made so as to exclude some States from a proper share in the exercise of the powers of this body. They may be so constituted as to exclude some States from an equal participation in the benefits of legislation. The history of all legislative bodies has been a history of encroachment and usurpations of power, not by the legislative body, but by privileged classes, making use of the opportunities to create influences within the legislative body which would control by faction and by sections and smaller portions of it the exercise of its great power.

The committees, in the history of every legislative body, and particularly in the history of the country which is our prototype of free government, the Parliament of England, have been at different times made, as they may be made now, the mere toys to gratify personal ambition, superior fortune to promote inequality between States, men, constituencies, communities, and to give advantages to a few in the control of the powers of government over the whole constituent body. They may be made use of to degrade the Representatives and Senators of some States and to exalt those of others.

The Senate of the United States at this time is the most important of all deliberative bodies exercising legislative power in the world. Upon it more than upon any other tribunal depends the opportunity of a free discussion, an impartial and just consideration, of the great questions which are threatening to disturb the social order, which are creating discontent widespread and profound amongst the people of every country because of conditions of poverty, the result, as they believe, of public policies which need to be reformed and changed. It should be the arena of free thought. Its committees should be constituted with a view to immediate access of the waves of public opinion from the mass of the people, and that opinion should receive careful consideration.

The new problems which come from the great leaders of thought, looking to the improvement of the condition of the masses of the people, to greater happiness, to greater comfort, to a more equal enjoyment of the blessings and privileges of life and changed economic conditions, should have full and fair and just consideration in this body. It may be so constituted in its committees that the power of privilege, and class, and accumulated wealth, and of the great corporations may suppress from consideration the free and fair examination of these great economic questions.

We can not, therefore, overestimate, neither in respect to our constitutional duty, nor to what should be our just pride, the preservation of the cardinal and essential distinctions and reasons for the creation of this body and its functions, nor, in respect to the danger arising from a mistake in regard to public economies and public policies, the importance of so arranging the rules of proceeding that its committees may be so constituted as to represent all shades of thought, all States, and be in communication with the people of the country fully, freely, and entirely.

Mr. President, the discoveries of modern chemistry in our times have produced explosive forces more destructive in their effects than any hitherto known in the history of the world; but there is no force more explosive, inflammable, more powerful or destructive than a universal and general discontent of the people, produced by conditions of poverty and want, when impregnated with the belief or with the knowledge, which modern economic science has created in large portions of the country, that the factors which produce these conditions of poverty in the masses of the people are factors of increasing force, which, unless eliminated, or modified, or restrained in some form by wise public policies, will result in the decadence of civilization, the darkness of ignorance, and the recurrence of the days of barbarism and force. No more explosive and dangerous power exists than that of a general discontent accompanied by a conviction that it is the result of policies which may be altered, and which are producing greater want and misery.

We in this place of privilege and power are but blind leaders of the blind if we shall not seek to find some means of convincing public opinion that we can discover policies and make laws which will establish improved conditions of the masses and cause these evils to disappear under the benignant administration of our Government. In the exercise of legislative power we should not seek to suppress, to ignore these great moving tides of public opinion, these resistless forces, which in the beginning of this century, growing out of widespread discontent, produced revolutionary forces, which increased until they rent into fragments the economic institutions and traditions of a thousand years and have not yet spent their force in the moving tides of public opinion throughout the world.

In the agitation which prevails in our country amongst the mass of the people, a profound conviction, which seems difficult to find consideration in this Chamber, is moving them with the idea that there may be a far more widespread condition of happiness and of economic welfare than now exists. If in the midst of this great agitation and discontent this body is to preserve its hold upon these waves of feeling, if it is to guide and direct free thought into the haven of true conclusions and wise statesmanship, we must address ourselves to so modeling the rules of pro-

ceeding that neither the graces of oratory, the advantages of adventitious fortune, the hope of social station and position, nor even the superior force of mind, shall find a place in the rules of proceeding of this body to the exclusion of the rights of Senators and the perfect equality of the States. Upon that foundation alone rests the opportunity through the humblest of the members here of making known the wishes and opinions of the great masters of government, the people—the free thought of the American people upon all economic questions and all proposed legislation.

I know that there are many persons who laugh at the idea that there is any danger or that the people are dissatisfied to any great extent because of great differences of fortune, or that there is any possibility that its influence may find access to and control this place of legislative power. But the late President of the United States, Mr. Garfield, called attention to the fact that the great corporate power of this country had already taken in its train some of the sovereign States of the country, and held in its grasp their judiciary, their legislative powers, their executive powers, their representation in the other House and in the Senate. Whether his apprehensions were exaggerated or not, it is safe to say that the progress of affairs since that declaration was made has not diminished the force of his statement.

There is a State in which more than half the soil of the State has been appropriated to foreign landlordism by fraudulent certifications of public land without the consent of her people or the authority of law, in which the soil is in the dominion of foreigners and strangers, and the people whose birthright it is to control that State are but tenants upon the soil which was paid for by their own hard labor in acquisition from foreign countries; a State richly endowed with nature's bounties, where life with her generous people may pass without poverty or suffering, where corporations created for public purposes are habitually used to deprive her people of all political power.

Without any kind of reflection upon anybody, and admitting that those distinguished Senators who now and in past years have made the assignments for these committees on both sides of this Chamber have acted with the desire to promote equality between Senators, the rule of assignment of members of the Senate to perform duties in which they must themselves sit in judgment upon their own States, upon their own merits, and upon their own opportunities, is of necessity one which must produce either injustice to themselves or inequality to others.

I regard this question of the constitution of the committees of this body tantamount to its continuance as a function of government of the United States. As a practical question the States ought to be perfectly equal in all the opportunities, privileges, prerogatives, and powers of this body. The Senators who are sent here from a State—sovereign in respect of its complete independence in those things which are committed to her guardianship alone—should be recognized, to whatever party they belong, to have the right to the same access to important opportunities of legislation in the committees charged with the permanent and important business of this body. That is the idea of the Constitution and the idea of patriotic duty here. The idea is the preservation of the equality of the States in all the rights, prerogatives, privileges, and powers of this body. That idea can not be accomplished unless Senators have an equal share and an equal representation in the committees which are charged with the important duties of this body.

Let us see now how the question stands. The committees which have any important and permanent connection with the legislative business of the country, the continuing important business of the country, are the Committees on Finance, Commerce, Appropriations, Foreign Relations, Judiciary, Military Affairs, and Naval Affairs. The Interstate Commerce Committee may perhaps be ranked also with them, because of the growing importance of its connection with the great systems of transportation which exist in this country, and with the great corporations which seek to assume the control of the legislative power and the executive power of the States and of this tribunal; but for the purposes of this classification I have arranged them, leaving out of the first class the Interstate Commerce Committee and putting it in the second class.

The second class of committees, charged with less important or not so permanent relations to the business interests of the country, are the Committees on Interstate Commerce, District of Columbia, Indian Affairs, Printing, Privileges and Elections, Post-Offices and Post-Roads, Public Lands, Pacific Railroad, Public Buildings and Grounds, Rules, Territories. These committees differ greatly. Printing, District of Columbia, Public Buildings and Grounds, Post-Offices and Post-Roads, and Pacific Railroads rank almost with the great committees in their connection with large appropriations and numerous appointments; Rules and Privileges and Elections with important prerogatives and privileges.

There is also a class of committees which I denominate the third class, because their duties are almost entirely nominal.

I have here a table showing the committees as now constituted in respect to the equality of the States, which I will print as an appendix.

The Senators who are each on two or more of these great committees are: ALLISON, two; BLACKBURN, two; BUTLER, three; CAMERON, two; COCKRELL, two; COKE, two; CULLOM, two; DAVIS, two; DOLPH, two; FRYE, two; GORMAN, two; HALE, two; HARRIS, two; JONES of Nevada, two; LINDSAY, two; MCPHERSON, two; MORGAN, two; SHERMAN, two; TELLER, two; VEST, two; WILSON, two—21.

Senators who have only one of the great committees are ALDRICH, BERRY, BRICE, CALL, CHANDLER, DANIEL, DIXON, GEORGE, GIBSON, GRAY, HILL, HOAR, JONES of Arkansas, MANDERSON, MITCHELL of Wisconsin, MORRILL, MURPHY, PALMER, PLATT, QUAY, RANSOM, STANFORD, STOCKBRIDGE, TURPIE, VANCE, VILAS, VOORHEES, WALTHALL, WHITE of Louisiana—29.

Senators who are on none of the seven great committees are ALLEN, BERRY, CAFFERY, CAREY, CHANDLER, COLQUITT, DIXON, DUBOIS, FAULKNER, GALLINGER, HANSBROUGH, HIGGINS, HUNTON, IRBY, KYLE, LODGE, MCMILLAN, MARTIN, MILLS, PASCO, PEFFER, PETTIGREW, POWER, PROCTOR, ROACH, SHOUP, SMITH, SQUIRE, STEWART, WOLCOTT—30.

Twenty-one Senators on two or more of the seven great committees, twenty-nine on one, and thirty Senators on none of the seven great legislative committees.

States represented on two or more great committees: Iowa, three; Kentucky, three (with Interstate Commerce, four); Ohio, three; South Carolina, three (with Interstate Commerce, four); Pennsylvania, three; Missouri, four; Illinois, three; Minnesota, three; Oregon, three; Maine, four; Tennessee, three; New Jersey, two; Alabama, two; North Carolina, two; Nevada, two—15.

States represented on only one great committee: Rhode Island, Arkansas, Louisiana, Virginia, Mississippi, Delaware, Kansas, Florida, Massachusetts, Nebraska, Vermont, West Virginia—twelve States with one representative on the seven great committees.

States which have no representative on any of the seven great committees: Wyoming, New Hampshire, Georgia, Idaho, North Dakota, South Dakota, Montana, Washington—eight States.

In the committees next in importance, such as Post-Offices and Post-Roads, Interstate Commerce, District of Columbia, Printing, Rules, and Pacific Railroads, there are the same differences.

It is evident that if a State has no representative in any of the first-rate committees she is denied her equal rights; if she has less representation on the first and on the second rate committees she is also denied her equal rights and opportunities.

If seniority is applied in favor of Senators of one State and not applied to others the States are deprived of their equality of right and power.

The inequalities between States here shown is great, but the inequality between Senators is greater. Seniority is applied in some cases and disregarded in others. The principle of merit as it appeared to the judgment of the persons making the assignment is applied to the displacement of seniority, yet it remains true that in making these awards of the prizes of distinction and the places of prestige and favor they have destroyed the equal power and right of the States and have taken away from the Senate its peculiar distinction and its essential function. They have opened the avenues and broadened the portals and made easy the access to the Senate of the influences of superior wealth, social station, and the power that comes from privilege. They have removed the Senate further from the people and nearer to aristocratic influences.

Not only is this true, but they have added a committee of three persons to whom all expense in the performance of public duty is referred. These three Senators have it in their power to favor some Senators and injure others, to favor some States and injure others, to promote some investigations and suppress others.

The impartiality and ability of the Senators making the assignment in both parties shows the viciousness of the system and proves the necessity for the adoption of a new method. The system of designating members of the committees who are themselves interested in the assignments, and who are charged with the duty of assigning places to themselves, is in its very nature impossible of proper results.

The Senators making these assignments must either disregard themselves and deprive the country of their services on the important committees, or assign themselves to such committees, and be forced to the indelicacy of sitting in judgment on their own merits, displacing the rule of seniority of service in others for that of merit in themselves and deciding the case in their own favor, and place themselves on two or even three of the important committees of the body, while the Senators from other States

equal in theory and right are excluded from all participation in the important business, and the States which they represent are practically deprived of representation in this body.

Senators on committees may or may not in their action treat the States which they represent or the bills which concern them with greater liberality or more consideration than they give to the States and Senators which have no representation on the important committees of the Senate, and in this respect there may or may not be advantage to the State or a Senator to be a member of them; but it is impossible for the Senators on the committee to be so accurately advised of the interests of other States and of the opinions of Senators not on the committees as they are of their own States and of the facts within their own knowledge.

The remedy for all this is—

First. Enlarge the committees, so that every State shall have representation on one of the great committees of the Senate.

Second. Limit the State to a membership of each Senator on one of these great committees; distribute the excess to Senators according to seniority of service, so that Senators being on the great committees shall be senior Senators.

Third. Assign Senators to committees by drawing lots, with right to exchange memberships. Let chairmanships be assigned by rule to seniority of service. Let there be a rule of the Senate that, by vote of the Senate, Senators having special fitness for particular duty may be added to any committee. Let Senators alternate in different Congresses on different committees by a fixed rule of alternation from one committee to another.

These rules are plain and easy of understanding and application. Their adoption will secure equality of power and privilege, impartiality and fairness in the distribution of committee work, avoid the indelicacy of personal exaltation and the humiliation of exclusion from the great duties of the Senate, prevent discriminations, jealousies, and unfriendly feelings.

This rule of the arbitrary assignment according to the discretion, will, and judgment of a committee of the different States to their share of privilege and power here has broadened the road, opened the access, and made the path easy for the control of this body by the great accumulated power and wealth of corporations over the elections and will of the people. The sole protection against it is by the Senate, permanent in its character, holding its term for six years, giving full recognition to the principle of the equality of the States in the persons of the Senators sent here, and making our rules of proceeding such, that the waves of public thought and feeling upon the new questions and problems of the day come here to be respectfully considered and to find just and fair consideration as elements of thought, to have place in legislative action—rules of proceeding which shall recognize that privilege and power have no place with the sovereign free thought of the American people, and that those who come here to represent it must feel that they are accredited by the voice of the people in the forms and methods of the Constitution.

We are here with this power in ourselves to determine our rules of proceeding, with this duty of investigation of all conditions, of all questions, that free thought may have access here, not fortune, not privilege, not social distinction, but a genuine will to promote the happiness and welfare of the American people and advance the comfort of the millions of human beings who have heretofore been the subjects of power, of oppression, of want.

I am one of those who believe that there have been discoveries in modern thought, who believe that there is a better day coming, a day of greater content and greater happiness and greater abundance in every home throughout the country, and that it is within the possibility of enlightened and wise statesmanship and generous patriotism and a true sympathy to bring about these results.

So I think that the rules of proceeding in this body should not be in anywise influenced, as they will be, unless there be other methods adopted, by the opportunities of adventitious fortune, by the privileges of position, by our desire to acquire social position and be heralded to the country as being connected with the great transactions of supreme and sovereign legislative power over the people of this country. Such was not the intention of the makers of this Constitution.

What, then, shall we do? Shall we enlarge these committees so that every State shall have representation upon some one of them? Is it too much to say that eight men upon this side of the Chamber and seven upon the other are too many to consider the levy of a thousand million dollars upon the labor interests of this country every two years? Is that too large a body to consider whether or not the new ideas of taxation, of reform, of finance, are worthy of thought, of trial, of experience, of judgment? It seems to me that we should not assume that four or five of us carry with us the wisdom of the past and also of future generations. Is it too much to say that the Committee on Appropriations should consist of fifteen men; that eight Democrats and seven Republicans are not too many to consider the disbursement and the appropriation of five or six hundred million dollars a year?

The smaller the committees the greater the opportunity of mistake, of ignorance, of fanciful mental conclusions, of corruption of the great power of the corporations. Certainly a committee may be made too large; but is it too much to say that the Senators sent by every State, no matter how poor, how humble, how far inferior, shall be recognized upon all the great committees? Is it too much to say also that, if you apply the rule of seniority, it shall be applied to all, not be applied to some and dispensed with as to others? Might not that rule be applied also to the chairmanships of committees? I think it is time for us to reconsider the methods by which the assignments of the committees of this body have been made.

Mr. President, this is the day when social power, when accumulated wealth, when corporate power find a lodgment everywhere, even in the most august and sacred tribunals of power. It influences Legislatures; it has more or less to do with the election of Members of Congress and of Senators. If it be permitted to control this body and its action, the people of this country will soon do away with the Senate; but, what is a greater evil than that, this body will have failed to perform its part in our scheme of government, it will have failed to advance the civilization of the day, it will have failed to assist in obtaining a wise solution of the great problems which are agitating the public mind, which are taking hold of the religious thought of the country.

If we fail in our duty, the great assemblies, the religious organizations, which are already manifesting their interest in these great problems, will not fail to do theirs. We see the supreme Pontiff of the Catholic Church, from his high tribunal of power, with calm and sagacious mind interesting himself in the great problems which lie at the bottom of social and domestic happiness and political independence. We see the ministers of the great Protestant church, the Baptists, the Methodists, the Episcopalians, men of thought, themselves becoming a tribunal and a senate for the consideration of these great questions. Religious enthusiasm like that of the Crusades, more powerful than all other sentiments and powers, is taking hold of these ideas.

Let the Senate of the United States then found its committees and its rules of proceeding upon the only rock upon which its prerogatives and powers can be safely and fairly and equally exercised, the only rock which will prevent the control of its deliberations by wealth and power and privilege—the equality of the States and the representatives of the States in the rules of proceeding of this body.

That is my contention. So long as some States have representation on three or four of the great committees of this body and others have none, so long as some States, as exhibited by the table which I have here, have only one representative upon the leading committees of this body and others have more, so long as that inequality exists there is a reason for it, a reason either of negligence or bad methods, or a reason in the want of consideration of the great principle which constitutes the essential foundation of this body and for the exercise of its functions.

All considerations concur that there is danger in this country. The concentration of power is not in the Government, but outside of the Government. The concentration of the taxing power is in railway corporations, trusts, syndicates, and monopolies. The levy of taxes upon the poor of the country is becoming almost as great and oppressive as it was in France preceding the days of the French Revolution, when the corvée—the tax upon salt, to maintain the luxury and ostentation and pride of the privileged classes, produced the terrible explosion which sent forth a force which, although it dealt in blood and ruin throughout the whole civilized world, emancipated the human mind from the bondage of ancient traditions and started it upon an inquiry for public policies and institutions for the benefit of mankind and not of the few. So with us. We must look into the economic and social conditions which exist in this country; and we must do it when a State sends her representatives here who may be of no political party, recognizing her sovereign right to do so, and their sovereign right to an equal participation in all the privileges and functions of this body.

Upon the subject of the danger to this country from the corporate power in elections, I desire that there shall be an investigation by this body. I assert the proposition that there is a deliberate effort on the part of some of the great corporations of this country to acquire the ownership of the soil of particular States, and to control all the powers of legislation with money, with free transportation; and that purpose is sometimes accomplished, and will be accomplished still more, unless a profound feeling of devotion to American liberty shall stir the masses of the American people and find a place of power here, in which their rights and their privileges can be defended.

I will ask permission, Mr. President, without addressing the Senate further, to print as part of my remarks some observations which I have made upon these subjects addressed to the people of my own State, and also the tables, which I have not read, showing the formation of the committees of this body, and the inequalities between States and the Senators of States which have characterized the proceedings of the Senate for many years past.

Formerly, when this body was smaller, when the questions which agitated the country were divided upon sectional lines, and when there was no great pressure of opinion upon it except upon a few sectional questions, these differences were not noted, these inequalities did not exist; but as the number of this body has increased and the States have grown to forty-four in number, soon to be increased still more, as the expenditures of the Government have increased and its tax levies increased, as the great corporations of the country have acquired and exercise a taxing power three times greater than that of the Federal Government, and as they control an army of voters of 1,200,000 men, this body is called upon to perform its august function of interposing between them and the people, to the end that the people may be protected in their liberties, their properties, their comfort, and their hopes of future enjoyment.

The Senate has a still more august duty imposed upon it, the duty of hearing from the Senators of States the conditions which demand the exercise of its powers to initiate such public policies for their consideration and approval as will not only protect them from the bondage of power, whether it be like that of the old republic in the form of her successful generals and their legions of veteran soldiers or in the form of corporate power and oppressive public economies, producing general poverty, suffering, and want, but also secure to them conditions of comfort and contentment.

The contest between the power of the unorganized people and the organized power of monopoly and corporate combination is not unlike that of old Rome, with her victorious consuls and their legions. It is a contest for the powers of government over a great and rich country. In it liberty and freedom may go down again and the bondage of mankind to poverty, want, and misery be fixed for centuries, or, on the other hand, the dawn of a new, brighter, and happier day may be heralded.

The people may congratulate themselves that they have now in President Cleveland a man of broad and cultivated mind, of firmness and experience, of earnest sympathy with all prudent and wise policies for their greater happiness, and that they may confidently rely on his wisdom, sagacity, and firmness, and on the able and patriotic men of his Cabinet, in the great contest which now impends over the country and over civilization.

APPENDIX.

The State of Alabama has one Senator of sixteen years' experience and one of twelve years. The former (Mr. MORGAN) is chairman of the Committee on Foreign Relations and a member of the Committees on Indian Affairs and Pacific Railroads. The other (Mr. PUGH) is chairman of the Committee on the Judiciary and member of the Committees on Privileges and Elections, Relations with Canada, and Additional Accommodations for Library. Chairmen of two of the leading committees, and members of four of second-rate importance and two of third-rate importance.

Arkansas: One Senator of eight years (Mr. JONES) on the Committee on Finance, a first-rate committee, and on Indian Affairs (chairman), a second-rate committee. One Senator (Mr. BERRY) on Public Lands, Claims, and Patents. Arkansas has Mining, Indian Affairs, and Public Lands.

California: Mr. WHITE (Democrat), first term, is a member of the Committee on Commerce and the Committee on Territories; one first-rate and one second-rate committee. Mr. STANFORD (Republican) is a member of the Committee on Naval Affairs, Commerce, Public Buildings and Grounds, and Territories, one first-class, one second-rate, and one third-rate committee. California has Committees on Naval Affairs, Territories, Public Buildings and Grounds, and Commerce.

Colorado: Mr. TELLER, eighteen years in the Senate, except two years as Secretary of the Interior, is a member of the Committees on Appropriations and Judiciary, two first-rate committees. Mr. WOLCOTT, four years in the Senate, is on Interstate Commerce, District of Columbia, Library, Pacific Railroads, and Post-Offices and Post-Roads. Colorado has Appropriations, Judiciary, Interstate Commerce, District of Columbia, Pacific Railroads, and Post-Offices and Post-Roads—two first-class committee, two second-class committees, and two third-class committees. Colorado has representation in two first-class committees, three second-rate committees, and two third-rate committees.

Connecticut: Mr. PLATT, fourteen years in the Senate, is on the Judiciary, Territories, and Indian Affairs—one first-class committee and two second-class committees, and six others, nominal and special. Mr. HAWLEY, twelve years a Senator, is on Military Affairs and others, special and nominal. Connecticut has representation on two first-rate committees and on two third-rate committees.

Delaware: Mr. GRAY (Democrat), six years in the Senate, is on Foreign Relations, Privileges and Elections, and Patents. Mr. HIGGINS, four years a Senator, is on Interstate Commerce, Privileges and Elections, and Relations with Canada. Delaware has representation in one first-rate committee, two second-rate committees, and two third-rate committees. Delaware has Foreign Relations, Privileges and Elections, and Interstate Commerce.

Florida: Mr. CALL, fourteen years a Senator, is on Appropriations, Territories, and Mines and Mining, one first-rate, one second-rate, and one third-rate. Mr. PASCO is on Claims, Public Buildings and Grounds, and Public Lands, two second-rate committees and one third-rate committee. Florida has representation in one first-class committee, four second-class committees, and one third-class committee—Appropriations, Territories, Claims, Public Buildings and Grounds, and Public Lands.

Georgia: One Senator of nine years is on Post-Offices and Post-Roads, one first-class committee, and one third-class committee (Select). Mr. GORDON (old term, nine years; new term, three years) is on Public Buildings and Grounds, his only committee of importance, no first-class committee, and one second-class committee. Georgia has one first-class committee and two second-class committees—Post-Offices and Post-Roads and Public Buildings.

Idaho: Mr. SHOUP, three years in the Senate, is on no first-class committee and two second-class committees—Territories and Pensions. Mr. DUBOIS, two years in the Senate, is on Public Lands, one second-class committee, and Immigration, one third-class committee.

Illinois: Mr. CULLOM (Republican), ten years in the Senate, is on Appropriations, Commerce, and Interstate Commerce—two first-class committees and one second-class committee. Mr. PALMER, two years in the Senate, is on Military Affairs, Pensions, and Privileges and Elections—one first-class committee, one second-class committee, and one third-class committee. Illinois has representation on three first-class committees, three second-class committees, and one third-class committee, as follows: Appropriations, Commerce, Interstate Commerce, Military Affairs, Privileges and Elections, and Pensions.

Indiana: Mr. VOORHEES, sixteen years in the Senate, is on Finance (chairman), Immigration, and the Library. Mr. TURPIE, six years in the Senate, is on Foreign Relations and Privileges and Elections—one first-class committee and one second-class committee. Indiana has two first-class committees, Finance and Foreign Relations; one second-class committee, Privileges and Elections, and one third-class committee. Indiana has Finance, Immigration, Foreign Relations, Privileges and Elections, and the Library.

Iowa: Mr. ALLISON, twenty years in the Senate, is on Finance and Appropriations—two first-class committees, and is on one third-class committee. Mr. WILSON, ten years in the Senate, is on Judiciary, Interstate Commerce, Post-Offices and Post-Roads, and Patents—two first-class committees, one second-class committee, and one third-class committee. Iowa has Finance, Appropriations, Judiciary, Interstate Commerce, Post-Offices and Post-Roads, and Patents.

Kansas: Mr. PEFFER, two years in the Senate, is on Claims, Census, and Mississippi River—no first-class committee, three second-class committees, and one third-class committee. Mr. MARTIN, first year, is on Geological Survey, Public Lands, and District of Columbia—one second-class committee and two third-class committees. Kansas has Claims, Census, Mississippi River, and Public Lands. Kansas has no first-class committees, but has representation on six second-class committees.

Kentucky: Mr. BLACKBURN, eight years in the Senate, is on Rules, Appropriations, Naval Affairs, and Territories—two first-class committees and two second-class committees. Mr. LINDSAY, first year, is on Interstate Commerce and Judiciary—one first-class committee and one second-class committee. Kentucky has Appropriations, Naval Affairs, Judiciary, Interstate Commerce, Rules, and Territories—three first-class committees and three second-class committees.

Louisiana: Mr. WHITE, two years in the Senate, is on the Committee to Audit and Control Contingent Expense of the Senate, Commerce, Epidemic Diseases, Interstate Commerce and Pacific Railroads—two first-class committees, four second-class committees, and one third-class committee. Mr. CAFFERY is on Claims and Pensions—two second-rate committees. Louisiana has one first-class committee, four second-class committees, and one third-class committee

Maine: Mr. HALE, twelve years in the Senate, is on Appropriations, Naval Affairs, Census Expenses, Commerce, Epidemic Diseases, Interstate Commerce, Pacific Railroads, Claims, and Pensions—two first-class committees and two third-class committees. Mr. FRYE, twelve years in the Senate, is on Commerce and Foreign Relations—two first-class committees. Maine has Appropriations, Naval Affairs, Foreign Relations, and Commerce—four first-class committees.

Maryland: Mr. GORMAN, thirteen years in the Senate, is on Printing, Appropriations, Commerce, Interstate Commerce, Rules, and Pensions; six of the most important committees—three first and three second-class committees. Mr. GIBSON, one year in the Senate, is on District of Columbia, Naval Affairs, and Fisheries—one first-class committee and two second-class committees. Maryland has Printing, Appropriations, Commerce, Interstate Commerce, Rules, Pensions, District of Columbia, Naval Affairs, and Fisheries, nine committees—three first-class and six of the most important second-class committees.

Massachusetts: Mr. HOAR, fifteen years in the Senate, is on Judiciary and Privileges and Elections—one first-class committee and one second-class committee. Mr. LODGE, first year in the Senate, is on one third-class committee. Massachusetts has one first-class committee, one second-class committee, and one third-class committee—Judiciary, Privileges and Elections, and Immigration.

Michigan: Mr. STOCKBRIDGE, six years in the Senate, is on Naval Affairs, Indian Affairs, Fisheries, and Epidemic Diseases—one first-class committee, one second-class committee, and two third-class committees. Mr. MCMILLAN, three years in the Senate, is on District of Columbia, Post-Offices and Post-Roads, and Pacific Railroads—no first-class committee, two second-class committees, and one third-class committee. Michigan has Naval Affairs, Indian Affairs, Fisheries, Epidemic Diseases, District of Columbia, Post-Offices and Post-Roads, and Pacific Railroads—one first-class committee, three second-class committees, and two third-class committees.

Minnesota: Mr. DAVIS, six years in the Senate, is on Foreign Relations, Military Affairs, Claims, Pacific Railroads, and Territories—two first-class committees, two second-class committees, and one third-class committee. Mr. WASHBURN is on Commerce and Post-Offices and Post-Roads. Minnesota has Military Affairs, Claims, Pacific Railroads, Foreign Relations, Territories, Commerce, Post-Offices and Post-Roads, and Agriculture.

Mississippi: Mr. GEORGE, twelve years in the Senate, is on Judiciary, Agriculture, and Education—one first-class committee and two third-class committees. Mr. WALTHALL, eight years in the Senate, is on Military Affairs, Public Lands, and Improvement of the Mississippi River—one first-class committee, one second-class committee, and one third-class committee. Mississippi has Judiciary, Agriculture, Military Affairs, Public Lands, and Mississippi River Improvement.

Missouri: Mr. COCKRELL, eighteen years in the Senate, is on Appropriations and Military Affairs—two first-class committees. Mr. VEST, fourteen years in the Senate, is on Public Buildings and Grounds, Commerce, and Fisheries—two first-class committees and one second-class committee. Missouri has Appropriations, Military Affairs, Commerce, Finance, and Public Buildings and Grounds, four first-class committees and one second-class committee.

Montana: Mr. POWER, three years in the Senate, is on Improvement of Mississippi River, Fisheries, Mines, and Public Lands—no first-class committee, one second-class committee, and two third-class committees.

Nebraska: Mr. MANDERSON, ten years in the Senate, is on Indian Affairs, Military Affairs, Printing, and Rules—one first-class committee and three second-class committees. Mr. ALLEN, first year, is on Claims, Indian Affairs, and Public Lands—no first-class committee and three second-class committees. Nebraska has Indian Affairs, Military Affairs, Printing, Rules, Claims, and Public Lands, six committees—one in first class and five in second class.

Nevada: Mr. JONES, twenty years in the Senate, is on Commerce, Finance, Audit and Control Contingent Expenses, Epidemic Diseases, and Mining—two first-class committees, one second-class committee, and two third-class committees. Mr. STEWART, six years in the Senate, leader from term, is on Mines and Mining, Immigration, Claims, and Naval Affairs. Nevada has Commerce, Finance, Contingent Expenses, Epidemic Diseases, Mines and Mining, Immigration, and Claims.

New Hampshire: Mr. CHANDLER, seven years in the Senate, is on Immigration, Indian Depredations, Interstate Commerce, and Privileges and Elections—no first-class committee, two second-class committees, and one third-class committee. Mr. GALLINGER, two years in the Senate, is on District of Columbia, Epidemic Diseases, Pensions, Manufactures, Transportation Routes, and Examine Civil Service—no first-class committee, one second-class committee, and one third-class committee. New Hampshire has Immigration, Interstate Commerce, Privileges and Elections, District of Columbia, Epidemic Diseases, Pensions, Manufactures, Transportation Routes, and Examine Civil Service.

New Jersey: Mr. MCPHERSON, sixteen years in the Senate, is on Naval Affairs, Finance, Immigration, Potomac River Front (Select), and Woman Suffrage (Select)—two first-class committees. Mr. SMITH, first year in the Senate, is on Organization Executive Departments, Coast Defenses, District of Columbia, Indian Affairs, and Manufactures—all second-class committees. New Jersey has Naval Affairs, Finance, Immigration, Potomac River Front, Woman Suffrage, Organization Executive Departments, Coast Defenses, District of Columbia, Indian Affairs, and Manufactures.

New York: Mr. HILL, first year in the Senate, is on Immigration, Judiciary, Territories, Post-Offices and Post-Roads, Fisheries, and Organization, etc., of Executive Departments. Mr. MURPHY, first year, is on Claims, Commerce, Education and Labor, and Pacific Railroads. New York has Immigration, Fisheries, Judiciary, Executive Departments, Post-Offices and Post-Roads, Territories, Canada, Claims, Commerce, Education, and Pacific Railroads.

North Carolina: Mr. RANSOM, twenty-one years in the Senate, is on Commerce, Agriculture, Printing, Private Land Claims, Transportation Routes, Potomac River, and Geological Survey—one first-class committee, one second-class committee, and two third class committees; the others nominal. Mr. VANCE is on Privileges and Elections and Finance. North Carolina has Commerce, Finance, Privileges and Elections, and Printing—two first-class committees, two second-class committees, and one third-class committee.

North Dakota: Mr. HANSBROUGH, two years in the Senate, is on Agriculture, Census, District of Columbia, Irrigation, Pensions, and Territories—no first-class committee and five second-class committees. Mr. ROACH, first year in the Senate, is on Agriculture, Indian Affairs, Immigration, Five Civilized Tribes. North Dakota has Agriculture, Census, District of Columbia, Immigration, Pensions, Territories, Indian Affairs, and Indian Tribes.

Ohio: Mr. SHERMAN, thirty-two years in the Senate (with an interval), is on Finance, Foreign Relations, Potomac River, Quadro-Centennial, and United States University—two first-class, the others nominal. Mr. BRICE, two years in the Senate, is on Pacific Railroads, Appropriations, Interstate Commerce, Irrigation, Pensions, Public Buildings and Grounds, and District of Columbia—one first-class committee, three second-class committees, and one third-class committee. Ohio has Foreign Relations, Finance, Appropriations, Interstate Commerce, Irrigation, Pensions, Pacific Railroads, Public Buildings and Grounds, and District of Columbia—three first-class committees and five second class committees.

Oregon: Mr. DOLPH, ten years in the Senate, is on Commerce, Foreign Relations, Public Lands, Relations with Canada, and Coast Defenses—two first-class committees, one second-class committee, and one third-class committee. Mr. MITCHELL, eight years in the Senate, is on Judiciary, Claims, Post-Offices and Post-Roads, Privileges and Elections, Transportation Routes, and Claims against Nicaragua (Select)—one first-class committee and three second-class committees. Oregon has Commerce, Foreign Relations, Public Lands, Relations with Canada, Coast Defenses, University, Judiciary, Claims, Post-Offices and Post-Roads, and Privileges and Elections—three first-class committees, four second-class committees, and three third-class committees.

Pennsylvania: Mr. CAMERON, sixteen years in the Senate, is on Military Affairs and Naval Affairs—two first-class committees. Mr. QUAY, six years in the Senate, is on Commerce, Epidemic Diseases, and Public Buildings and Grounds. Pennsylvania has Military Affairs, Naval Affairs, Commerce, Epidemic Diseases, and Public Buildings and Grounds—three first-class committees, two second-class committees.

Rhode Island: Mr. ALDRICH, twelve years in the Senate, is on Finance, Rules, Corporations, District of Columbia, Revolutionary Claims, and Transportation Routes—one first-class committee, one second-class, the others nominal. Mr. DIXON, four years in the Senate, is on Census, Patents, Post-Offices and Post-Roads, Private Land Claims, and Additional Accommodations for the Library—one second-class committee, one third-class committee, the others nominal. Rhode Island has Finance, Rules, and Post-Offices and Post-Roads, others nominal.

South Carolina: Mr. BUTLER, sixteen years in the Senate, is on Interstate Commerce, Foreign Relations, Naval Affairs, Additional Accommodations for the Library, and Five Civilized Tribes—three first-class committees and three nominal committees. Mr. IRBY, two years in the Senate, is on Post-Offices and

Post-Roads, Transportation Routes, Civil Service and Retrenchment, Coast Defenses, Epidemic Diseases—no first-class committee, one second-class committee, the others nominal. South Carolina has Interstate Commerce, Foreign Relations, Naval Affairs, Library, Five Civilized Tribes, Post-Offices and Post-Roads, Civil Service and Retrenchment, and Coast Defenses—three first-class committees, one second-class committee, the others nominal.

South Dakota: Mr. PETTIGREW, four years in the Senate, is on Improvement of Mississippi River, Indian Affairs, Indian Depredations, Public Lands, Railroads, and Quadro-Centennial—two second-class committees, the others nominal or of third-class importance. Mr. KYLE, two years in the Senate, is on Education and Labor, Indian Depredations, Immigration, Patents, to Investigate Forest Reservations (Select), and University (Select)—no first-class committee, no second-class committee, three third-class committees. South Dakota has Indian Affairs, Mississippi River, Indian Depredations, Public Lands, Railroads, Patents, Irrigation, and Education.

Tennessee: Mr. HARRIS, sixteen years in the Senate, is on District of Columbia, Epidemic Diseases, Finance, Immigration, Rules, and Corporations. Mr. BATES, six years in the Senate, is on Improvement of Mississippi River, Agriculture, Military Affairs, Mines and Mining, and Territories. Tennessee has District of Columbia, Epidemic Diseases, Finance, Immigration, Rules, Corporations, Improvement of Mississippi River, Agriculture, Military Affairs, Mines and Mining, and Territories—two first-class committees, four second-class committees, the others third-class and nominal.

Texas: Mr. COKE, sixteen years in the Senate, is on Commerce, Judiciary, Fisheries, Revolutionary Claims, and Meat Products—two first-class committees, one third-class committee, the others nominal. Mr. MILLS, one year in the Senate, is on Library, Coast Defenses, Mines and Mining, Patents, and Post-Offices and Post-Roads. Texas has Commerce, Judiciary, Fisheries, Revolutionary Claims, Meat Products, Library, Coast Defenses, Mines and Mining, Patents, and Post-Offices and Post-Roads.

Vermont: Mr. MORRILL, twenty-six years in the Senate, is on Additional Accommodations for Library, Civil Service and Retrenchment, Finance, and Public Buildings and Grounds—one first-class committee and one second-class committee. Mr. PROCTOR, two years in the Senate, is on Agriculture, District of Columbia, Executive Departments, Immigration, University, and Potomac River. Vermont has Finance, Public Buildings and Grounds, District of Columbia, Immigration, and Agriculture—one first-class committee, two second-class committees, and two third-class committees.

Virginia: Mr. DANIEL, six years in the Senate, is on Claims, Foreign Relations, and Public Buildings and Grounds—one first-class committee, one second-class committee, the others nominal. Mr. HUNTON is on District of Columbia (second class), Education (third class), Post-Offices and Post-Roads (second class), Relations with Canada (third class), and Potomac River (nominal). Virginia has Foreign Relations, Claims, Public Buildings and Grounds, District of Columbia, Post-Offices and Post-Roads, and Relations with Canada—one first-class committee, three second-class committees, and four third-class committees.

Washington: Mr. SQUIRE, first term, is on Coast Defenses, Fisheries, Immigration, Public Buildings and Grounds, and Transportation Routes.

West Virginia: Mr. CAMDEN is on Interstate Commerce, Naval Affairs, Audit and Control Contingent Expenses, Pensions, and Railroads. Mr. FAULKNER is on Territories, District of Columbia, Immigration, Indian Depredations, and Pacific Railroads.

Wisconsin: Mr. VILAS, three years in the Senate, is on Quadro-Centennial (Select), Examine Branches of Civil Service, Judiciary, Pensions, Post-Offices and Post-Roads, and Public Lands—one first-class committee. Mr. MITCHELL, first year in the Senate, is on National Banks (Select), Enrolled Bills, Fisheries, Military Affairs, and Relations with Canada—one first-class committee. Wisconsin has Quadro-Centennial, Civil Service, Judiciary, Pensions, Post-Offices and Post-Roads, Public Lands, National Banks, Enrolled Bills, Fisheries, Military Affairs, and Relations with Canada.

Wyoming: Mr. CAREY, three years in the Senate, is on Education and Labor, Indian Depredations, Irrigation, Pacific Railroads, Public Lands, Territories, and to Investigate Geological Survey (Select). Wyoming has three second-class committees.

INVESTIGATION BY COMMITTEE ON INDIAN AFFAIRS.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported from the Committee on Privileges and Elections by the Senator from Massachusetts [Mr. HOAR], which will be read:

The Secretary read as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

Mr. JONES of Arkansas. I wish to ask if the resolution which was presented by me two or three days ago in reference to an investigation by the Committee on Indian Affairs, with a motion that it be referred to the Committee on Contingent Expenses, would not be in order before the resolution which has been read is laid before the Senate for consideration? I should like to have the resolution submitted by me referred, if there be no objection.

The VICE-PRESIDENT. That can be done by unanimous consent, as the Chair understands.

Mr. HOAR. Is that the resolution to which I interposed an objection?

Mr. JONES of Arkansas. It is.

Mr. HOAR. I do not interpose any objection now.

Mr. SHERMAN. That is, to the resolution going to a committee?

Mr. HOAR. Yes.

Mr. JONES of Arkansas. I want the resolution to go to the Committee on Contingent Expenses. I desire it to take the regular course.

Mr. HOAR. I will withdraw my objection, if that is the objection which stands in the way of the reference of the resolution.

The VICE-PRESIDENT. The objection is withdrawn.

Mr. JONES of Arkansas. It seems to me a majority of the Senate would have the right to refer the resolution.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate in the absence of objection.

KANSAS SENATORIAL INVESTIGATION.

Mr. FAULKNER. I move that the Senate proceed to the consideration of executive business.

Mr. VANCE. I ask the Senator to withdraw that motion for a moment, so that I can make a report.

Mr. FAULKNER. I withdraw the motion temporarily for that purpose.

Mr. VANCE. I am directed by the Committee on Privileges and Elections to report a resolution, and to ask for its immediate consideration.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Committee on Privileges and Elections, or any subcommittee thereof, be authorized to investigate the right of Mr. Joseph W. Ady, who claims a seat in this body as Senator from Kansas; and, if in their judgment it be necessary, to employ a stenographer, send for persons and papers, to administer oaths, and to sit during the recess of the Senate.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none.

Mr. PLATT. The resolution must go to the Committee on Contingent Expenses, under the rule.

The VICE-PRESIDENT. The Chair did not understand the suggestion of the Senator from North Carolina in regard to the resolution.

Mr. VANCE. I asked that the resolution be immediately considered.

Mr. GORMAN. I suggest to the Senator from North Carolina that under the rule the resolution must go to the Committee to Audit and Control the Contingent Expenses of the Senate, as it provides for the employment of a stenographer.

Mr. HOAR. That rule can be waived by unanimous consent.

Mr. GORMAN. I suppose it can be waived by unanimous consent. There is no objection to the resolution, so far as I know.

Mr. HOAR. The Senator from North Carolina asked unanimous consent for its consideration.

Mr. CHANDLER. I suggest to the Senator from North Carolina that a provision for paying the expenses of the proposed investigation is not added to the resolution. Such a provision can, however, be added in the committee if the resolution is referred.

Mr. VEST. Let the resolution go to the Committee on Contingent Expenses. That is the ordinary course.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, if there be no objection. The Chair hears none, and it is so ordered.

EXECUTIVE SESSION.

Mr. FAULKNER. I now renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After two hours spent in executive session the doors were reopened, and (at 3 o'clock p. m.) the Senate adjourned until to-morrow, Thursday, April 13, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 12, 1893.

SURVEYOR OF CUSTOMS.

Andrew Fyfe, of Michigan, to be surveyor of customs for the port of Grand Rapids, in the State of Michigan, to succeed Rezin A. Maynard, resigned.

PROMOTION IN THE REVENUE-CUTTER SERVICE.

Third Lieut. Godfrey L. Carden, to be second lieutenant in the Revenue-Cutter Service, to succeed A. Y. Lowe, resigned.

PROMOTIONS IN THE ARMY.

Cavalry arm.

Maj. John M. Bacon, Seventh Cavalry, to be lieutenant-colonel, April 7, 1893, vice McLellan, First Cavalry, retired from active service.

Capt. Edward M. Hayes, Fifth Cavalry, to be major, April 7, 1893, vice Bacon, Seventh Cavalry, promoted.

First Lieut. Homer W. Wheeler, Fifth Cavalry, to be captain, April 7, 1893, vice Hayes, Fifth Cavalry, promoted.

Second Lieut. Malvern-Hill Barnum, Third Cavalry, to be first lieutenant, April 7, 1893, vice Wheeler, Fifth Cavalry, promoted.

POSTMASTERS.

Frederick G. Aildis, to be postmaster at Torrington, in the county of Lichfield and State of Connecticut, in the place of James W. Hague, whose commission expired March 21, 1893.

Manellans Ellis, to be postmaster at Laurel, in the county of Sussex and State of Delaware, in the place of George E. Smith, removed.

Joseph C. Thompson, to be postmaster at Quincy, in the county of Adams and State of Illinois, in the place of Chester A. Wilcox, whose commission expired March 29, 1893.

Isaac Holton, to be postmaster at Plainfield, in the county of Hendricks and State of Indiana, in the place of William Stanley, removed.

Frank S. Thomas, to be postmaster at Topeka, in the county of Shawnee and State of Kansas, in the place of James L. King, whose commission expired March 26, 1893.

George Warren, to be postmaster at Hickman, in the county of Fulton and State of Kentucky, in the place of James T. Stephens, resigned.

Albert J. Almoney, to be postmaster at Rockville, in the county of Montgomery and State of Maryland, in the place of Thomas Dawson, whose commission expired April 1, 1893.

Joseph F. Upleger, to be postmaster at Mount Clemens, in the county of Macomb and State of Michigan, in the place of William Jenney, whose commission expired March 30, 1893.

Conway C. Flowerce, to be postmaster at Vicksburg, in the county of Warren and State of Mississippi, in the place of William Groome, whose commission expired February 28, 1891; James Hill and Michael J. Mulvihill, who were nominated, respectively, by the President to the Senate, not having been confirmed.

John E. Leavett, to be postmaster at Portsmouth, in the county of Rockingham and State of New Hampshire, in the place of William O. Sides, removed.

Charles W. Clare, to be postmaster at Watertown, in the county of Jefferson and State of New York, in the place of Edward M. Gates, resigned.

John Crowley, to be postmaster at Plattsburg, in the county of Clinton and State of New York, in the place of Abram W. Lansing, whose commission expired March 29, 1893.

Allen H. Fay, to be postmaster at Malone, in the county of Franklin and State of New York, in the place of Lensie L. Sayles, whose commission expired March 13, 1893.

George B. Gibson, to be postmaster at New Castle, in the county of Lawrence and State of Pennsylvania, in the place of James M. Clark, whose commission expired March 26, 1893.

John M. Seigfreid, to be postmaster at Warren, in the county of Warren and State of Pennsylvania, in the place of Willis A. Mitchell, resigned.

Robert A. Poole, to be postmaster at Cleburne, in the county of Johnson and State of Texas, in the place of William H. Deal, resigned.

Richard H. Adams, to be postmaster at Radford, in the county of Montgomery and State of Virginia, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893, and in place of Richard H. Lytle, resigned.

Robert G. Wright, to be postmaster at Waynesboro, in the county of Augusta and State of Virginia, in the place of Thompson S. Brown, removed.

Jackson Silbaugh, to be postmaster at Viroqua, in the county of Vernon and State of Wisconsin, in the place of Henry A. Chase, deceased.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 8, 1893.

GOVERNOR OF ARIZONA.

Louis C. Hughes, of Tucson, Arizona, to be governor of Arizona.

ENVOYS EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

James S. Ewing, of Illinois, to be envoy extraordinary and minister plenipotentiary of the United States to Belgium.

Hannis Taylor, of Alabama, to be envoy extraordinary and minister plenipotentiary of the United States to Spain.

COMMISSIONER OF PENSIONS.

William Lochren, of Minneapolis, Minn., to be Commissioner of Pensions.

INDIAN INSPECTOR.

Paul F. Faison, of Raleigh, N. C., to be an Indian inspector.

ASSISTANT COMMISSIONER OF PATENTS.

Samuel T. Fisher, of Canton, Mass., to be Assistant Commissioner of Patents.

COLLECTOR OF CUSTOMS.

Henry W. Egner, of New Jersey, to be collector of customs for the district of Newark, in the State of New Jersey.

POSTMASTERS.

Clarence W. Boshamer, to be postmaster at Statesville, in the county of Iredell and State of North Carolina.

Isidore Zacharias, to be postmaster at Bainbridge, in the county of Decatur and State of Georgia.

Horace C. Ashton, to be postmaster at Flemingsburg, in the county of Fleming and State of Kentucky.

Robert A. Baird, to be postmaster at Morrillton, in the county of Conway and State of Arkansas.

E. Hess Reinhart, to be postmaster at Shepherdstown, in the county of Jefferson and State of West Virginia.

W. O. Prentiss, to be postmaster at Beaufort, in the county of Beaufort and State of South Carolina.

Clarence M. Hawkins, to be postmaster at Marion, in the county of Grant and State of Indiana.

Thomas B. Powell, to be postmaster at Vienna, in the county of Johnson and State of Illinois.

Frank L. Bills, to be postmaster at Urbana, in the county of Champaign and State of Illinois.

William R. Bowles, to be postmaster at Greenfield, in the county of Dade and State of Missouri.

Amos West, to be postmaster at Mayfield, in the county of Graves and State of Kentucky.

Royal E. Purcell, to be postmaster at Vincennes, in the county of Knox and State of Indiana.

Connie P. Priestly, to be postmaster at Huntingdon, in the county of Carroll and State of Tennessee.

John Q. Pike, to be postmaster at Epping, in the county of Rockingham and State of New Hampshire.

Alexander Wright, to be postmaster at Neihart, in the county of Meagher and State of Montana.

Howson H. Wallace, to be postmaster at Fredericksburg, in the county of Spottsylvania and State of Virginia.

John T. Hart, to be postmaster at Orange, in the county of Orange and State of Texas.

James T. McCutchen, to be postmaster at Jackson, in the county of Madison and State of Tennessee.

THURSDAY, *April 13, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The VICE-PRESIDENT. The Journal of yesterday's proceedings will be read.

Mr. PLATT. I think it is more orderly that we should transact business with a quorum. I do not believe there is a quorum present.

Mr. COCKRELL. Let the roll be called.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bate,	Dolph,	Jones, Nev.	Pugh,
Berry,	Dubois,	Kyle,	Roach,
Butler,	Faulkner,	Lodge,	Sherman,
Caffery,	George,	Martin,	Smith,
Call,	Gibson,	Mitchell, Oregon	Squire,
Cameron,	Gorman,	Mitchell, Wis.	Stockbridge,
Carey,	Hansbrough,	Morrill,	Turpie,
Chandler,	Harris,	Murphy,	Vance,
Cockrell,	Higgins,	Pasco,	Vest,
Coke,	Hill,	Peffer,	Voorhees,
Cullom,	Hoar,	Platt,	Washburn,
Davis,	Jones, Ark.	Proctor,	White, La.

The VICE-PRESIDENT. Forty-eight Senators having responded to their names, a quorum is present. The Journal of yesterday's proceedings will be read.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

ST. JOHN RIVER BRIDGE.

The VICE-PRESIDENT. Pending the consideration of the resolution of the Committee on Privileges and Elections, the Chair lays before the Senate a communication from the governor of the State of Maine, transmitting a memorial adopted by the Sixty-sixth Legislature of Maine, calling for united action on the part of this Government and that of the Dominion of Canada in building a bridge across the river St. John opposite the village of Fort Kent, in the county of Aroostook, in that State, for the purposes therein indicated. The memorial will be referred to the Committee on Commerce.

Mr. HARRIS. If it be the memorial of a State Legislature, it ought to appear in the RECORD. I ask that it be printed in the RECORD.

The memorial was ordered to be printed in the RECORD, as follows:

STATE OF MAINE.

Memorial to Congress.

Whereas by the Ashburton treaty, concluded August 9, 1842, the St. John River became the boundary line between the United States and the Dominion of Canada; and

Whereas a very large area of territory in the northwestern part of the State of Maine, embracing more than one hundred townships, and amounting to more than 2,000,000 acres of land, of which a very large proportion is fertile and suitable and well adapted for agricultural purposes, and since the treaty, has been and now is in process of development, thereby largely increasing its population and adding to the wealth of the State and nation; and

Whereas this belt of territory, as large as a majority of our counties, by reason of its geographical location, has no other available outlet for the purposes of trade and commerce except the river St. John or its banks; and

Whereas said river St. John, owing to the peculiar conformation of the vast area of land in which it has its source, fed by the great rivers the Allegash, Big and Little Black, the St. Francis and Fish rivers, is subject to high and dangerous freshets, continuing for long periods; also at other periods of the year is filled with anchor ice or frozen slush, therefore closing the great highway during said periods, thus shutting up and closing all intercourse between the inhabitants of said territory and the other parts of the State and the world, whereby the inhabitants suffer great loss in their business, and the settlement and development of this rich agricultural domain is seriously retarded; and

Whereas the Temiscouata Railway has been extended up the left bank of the St. John River to St. Clair station, directly opposite Fort Kent, and upon the said bank of the river to St. Francis River and the Canadian Pacific Railway running to Edmundston, within 20 miles of which said road makes connection at said point, thereby giving railway facilities through by Bangor, or by the river De Loup, Quebec, and Portland; and further it is the intention of the Dominion of Canada to construct this railway up the valley of the St. John and St. Francis rivers, which, when completed, will give greater facilities and a much shorter route to Portland; and

Whereas all that is necessary to be done to accomplish this great object is to build a railroad and carriage bridge at Fort Kent over and across said St. John River; and

Whereas the Fish River, flowing from the Great Lakes, Long, Cross, Square, Eagle, and Portage lakes, and some five other smaller lakes, making one of the best, if not the very best, water powers in the State of Maine, draining as it does a vast area of valuable timber and fertile agricultural land, which wants but railway facilities to set in motion a vast amount of machinery and manufacture millions of lumber every year and build up the towns of the county of Aroostook, thereby largely adding to the wealth of the State, and bring the people seeking for good health in one of the most beautiful spots of earth for a summer residence, thereby restoring their diseased and weak lungs and giving pleasure and delight to life: Therefore,

Be it resolved by the senate and house of representatives in Legislature assembled, That our Senators in Congress are instructed, and our Representatives requested, to use their best endeavors and influence to secure an appropriation of $50,000 in aid of building a bridge for railroad and carriage and foot travel; said bridge to be constructed with granite abutments and piers, or with heavy iron tubes, and filled with hand-laid concrete; the structure to be of iron or steel: *Provided*, The Dominion government of Canada, or any railroad corporation in said Dominion, shall furnish a like sum.

Resolved, That the governor transmit to the Senate of the United States and to the House of Representatives at Washington, and to our Senators and Representatives in Congress, and to the Dominion government at Ottawa, also the parliament, senate, and house of representatives at Ottawa, certified copies of the foregoing memorial, preamble, and resolutions.

IN HOUSE OF REPRESENTATIVES, *February 27, 1893.*

Adopted.
Sent up for concurrence.

W. S. COTTON, *Clerk.*

IN SENATE, *February 28, 1893.*

Adopted in concurrence and filed with the governor.

KENDALL M. DUNBAR, *Secretary.*

KANSAS SENATORIAL INVESTIGATION.

Mr. SHERMAN. I rise to a privileged question. I present a memorial of 77 members of the Kansas Legislature, relating to the election of a United States Senator from Kansas to fill the vacancy caused by the death of Senator Preston B. Plumb. The memorial is signed by the number of members and senators I have stated. It sets out in full detail all the steps which led to the election by the Legislature of a Senator from the State of Kansas last, the various steps to organize the two houses, and especially the house of representatives.

The memorialists proceed then to recite in full the organization of the house of representatives of the Kansas Legislature on the 10th of January, 1893, and the election of speaker. They then charge that "58 persons holding certificates of election and 10 persons above named who were not elected and held no certificates of election have since pretended to act as a house of representatives until the present time." The memorial states in full the well-known facts in respect to the organization. It sets out the illegality of the proceedings in the election by the Legislature, or the attempted election, of the gentleman who now holds a seat as a member of this body, and the subsequent election of J. W. Ady in a legal and formal manner. The memorialists demand that the Senate of the United States make a full and complete investigation of the situation in the State Legislature.

I ask that the memorial be printed as a document and referred to the Committee on Privileges and Elections.

Mr. FAULKNER. I ask the Senator from Ohio whether it is a memorial from a Legislature in its legislative capacity?

Mr. SHERMAN. It is a memorial of 77 members of the Kansas Legislature, signed by each one.

Mr. FAULKNER. Then I suppose it would not be proper to print it in the RECORD?

Mr. HARRIS. Of course not.

Mr. COCKRELL. The Senator from Ohio asks that it be printed as a document.

Mr. SHERMAN. I do not ask to have it printed in the RECORD. I ask that it be printed as a document for the information of the Committee on Privileges and Elections and the Senate.

The VICE-PRESIDENT. Without objection, the memorial will be referred to the Committee on Privileges and Elections and be printed as a document.

ORDER OF BUSINESS.

Mr. VEST. I move that the Senate proceed to the consideration of executive business.

Mr. HOAR. I hope the Senator from Missouri will withhold the motion for a few moments. There is probably some legislative business to be transacted. I think the Committee on Contingent Expenses is ready to report on a resolution referred to it.

The VICE-PRESIDENT. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. VEST. I have no objection to the report being made.

ADMISSION OF TERRITORIES.

Mr. WHITE of Louisiana. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution submitted by the Senator from Wyoming [Mr. CAREY] on the 6th instant, to report it with an amendment.

The VICE-PRESIDENT. The resolution will be read.

The resolution was read, as follows:

Resolved, That the Committee on Territories, or any subcommittee thereof appointed for the purpose, are hereby authorized during the recess of Congress to visit the Territories of New Mexico, Arizona, Utah, and Oklahoma, for the purpose of obtaining information with regard to the resources, population, and condition of said Territories and as to the propriety of the admission of the same as States, and that the expenses of said committee be paid out of the contingent fund of the Senate.

The VICE-PRESIDENT. The amendment of the committee will be read.

The SECRETARY. Add to the resolution the following proviso:

Provided, That no expense be incurred for clerical service, any clerical service required by the said committee or any subcommittee thereof to be performed by the regular clerical force of the committee without extra compensation.

Mr. HARRIS. Let the resolution and the amendment be printed and lie over until to-morrow.

The VICE-PRESIDENT. It will be so ordered.

KANSAS SENATORIAL INVESTIGATION.

Mr. WHITE of Louisiana. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate, to whom was referred the resolution reported by the Senator from North Carolina [Mr. VANCE] from the Committee on Privileges and Elections on the 12th instant, to report it with an amendment.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Committee on Privileges and Elections, or any subcommittee thereof, be authorized to investigate the right of Mr. Joseph W. Ady, who claims a seat in this body as Senator from Kansas; and, if in their judg-

ment it be necessary, to employ a stenographer, send for persons and papers, to administer oaths, and to sit during the recess of the Senate.

The VICE-PRESIDENT. The amendment of the committee will be stated.

The SECRETARY. Add after the word "Senate," at the end of the resolution:

The expense thereof to be paid from the contingent fund of the Senate.

Mr. HARRIS. Let that lie over until to-morrow and be printed.

The VICE-PRESIDENT. The resolution will lie over and be printed.

Mr. HOAR. I should like to inquire of the Senator from Tennessee if it be his purpose to object or prevent the adoption of the resolution by the Senate?

Mr. HARRIS. It is my purpose to look at it and see exactly what it is, and to-morrow will come in twenty-four hours.

Mr. HOAR. I did not know but the Senator might be willing to disclose his whole purpose now, if he has any further purpose than that.

Mr. HARRIS. My purpose is one of inquiry at present. I do do not know what my purpose will be after I have looked at the resolution.

Mr. HOAR. I suspect the Senator has looked at it a good many times before.

EXECUTIVE SESSION.

Mr. VEST. I renew my motion.

The VICE-PRESIDENT. The question is on the motion of the Senator from Missouri, that the Senate proceed to the consideration of executive business.

Mr. HOAR. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. MITCHELL of Oregon (when his name was called). I am paired with the senior Senator from Wisconsin [Mr. VILAS]. If he were here I should vote "nay."

The roll call was concluded.

Mr. PLATT. I desire to announce that the Senator from Nebraska [Mr. MANDERSON] is detained from the Senate to-day by illness. He is paired with the Senator from Kentucky [Mr. BLACKBURN].

Mr. STOCKBRIDGE. I desire to announce that my colleague [Mr. MCMILLAN] is absent from the city and is paired with the Senator from North Carolina [Mr. VANCE].

Mr. WASHBURN (after having voted in the negative). I am paired with the Senator from West Virginia [Mr. CAMDEN]. I notice that he is not present, and I therefore withdraw my vote.

Mr. HOAR. The list of names read by the Secretary shows some ten or twelve more than a quorum, and yet several Senators have voted, undoubtedly inadvertently, who are supposed on our side to be paired with absent Republican members.

The same thing happened day before yesterday. I suppose that the reservation of a right to vote to make a quorum does not authorize the Senator reserving it to vote when there are ten or twelve more than a quorum voting. Day before yesterday there was an apparent majority on the other side of 23 upon a party vote.

Mr. COCKRELL. Is debate in order?

Mr. HOAR. I think it is a question of the highest privilege.

Mr. VANCE (after having voted in the affirmative). I wish to state that I voted inadvertently. I have a general pair with the Senator from Michigan [Mr. MCMILLAN], who is absent. I understood it was announced the other day that he was paired with some other Senator, and I did not think to announce the pair this morning.

Mr. MILLS (after having voted in the affirmative). I am paired with the Senator from New Hampshire [Mr. GALLINGER], and will withdraw my vote.

Mr. DUBOIS. I desire to announce the pair of my colleague [Mr. SHOUP] with the Senator from California [Mr. WHITE].

Mr. VANCE. I understand that my vote will be withdrawn.

The VICE-PRESIDENT. The vote of the Senator from North Carolina is withdrawn.

Mr. WHITE of Louisiana (after having voted in the affirmative). I have a pair with the Senator from Montana [Mr. POWER]. My understanding of the pair is that it gives me a perfect right to vote on this motion. I take it that I am the judge of that. However, to prevent all possibility of misapprehension, I transfer my pair to the Senator from Nebraska [Mr. ALLEN], so as to enable me to vote.

Mr. CALL. I have transferred my pair to the Senator from Nebraska [Mr. ALLEN].

Mr. PASCO. But the junior Senator from Massachusetts [Mr. LODGE] has come in and voted.

Mr. CALL. I am informed that the Senator from Massachusetts [Mr. LODGE] has voted, and therefore the pair of the Senator from Louisiana can be transferred to the Senator from Nebraska.

Mr. BERRY (after having voted in the affirmative). I have a general pair with the Senator from Colorado [Mr. TELLER], but I have the liberty to vote to make a quorum or at any other time I choose to vote, the matter resting entirely between the Senator from Colorado and myself. If, however, a question is raised about it, as my vote is not necessary to make a quorum, I will withdraw it.

The result was announced—yeas 33, nays 19; as follows:

YEAS—33.

Bate,	Gibson,	Kyle,	Roach,
Butler,	Gordon,	McPherson,	Smith,
Caffery,	Gorman,	Martin,	Turpie,
Call,	Gray,	Mitchell, Wis.	Vest,
Cockrell,	Harris,	Murphy,	Voorhees,
Coke,	Hill,	Palmer,	White, La.
Daniel,	Hunton,	Pasco,	
Faulkner,	Irby,	Peffer,	
George,	Jones, Ark.	Pugh,	

NAYS—19.

Cameron,	Dolph,	Hoar,	Proctor,
Carey,	Dubois,	Jones, Nev.	Sherman,
Chandler,	Hansbrough,	Lodge,	Squire,
Culiom,	Hawley,	Morrill,	Stockbridge.
Davis,	Higgins,	Platt,	

NOT VOTING—32.

Aldrich,	Dixon,	Mitchell, Oregon	Teller,
Allen,	Frye,	Morgan,	Vance,
Allison,	Gallinger,	Pettigrew,	Vilas,
Berry,	Hale,	Power,	Walthall,
Blackburn,	Lindsay,	Ransom,	Washburn,
Brice,	McMillan,	Shoup,	White, Cal.
Camden,	Manderson,	Stanford,	Wilson,
Colquitt,	Mills,	Stewart,	Wolcott.

So the motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty minutes spent in executive session the doors were reopened.

CHARGES AGAINST SENATOR ROACH.

Mr. GORMAN. I move that the Senate adjourn.

Mr. CHANDLER. I ask the Senator to withdraw the motion in order to enable me to make a request of the Senate.

The VICE-PRESIDENT. Does the Senator from Maryland yield?

Mr. GORMAN. Yes, sir; for that purpose.

Mr. CHANDLER. Mr. President, there is before the Senate a resolution in relation to the Senator from North Dakota [Mr. ROACH], which has been offered by the Senator from Massachusetts [Mr. HOAR], and has not yet been referred to the Committee to Audit and Control the Contingent Expenses of the Senate. I desire to make some remarks upon that resolution, and I ask unanimous consent of the Senate to proceed at this time. I have understood that there is a substitute to be offered for the resolution. I am willing to proceed either before or after that substitute shall be offered, if it is to be offered. My request is that I may be allowed now to address the Senate in favor of the resolution of the Senator from Massachusetts.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire?

Mr. GORMAN. I trust it may suit the convenience of the Senator to postpone his remarks until to-morrow.

Mr. CHANDLER. I will speak at the pleasure of the Senate. If it is not the pleasure of the Senate that I shall proceed now, I ask that to-morrow morning, after the routine business, I may have leave to address the Senate on that resolution.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire? The Chair hears none.

Mr. GORMAN. I renew my motion that the Senate adjourn.

The motion was agreed to; and (at 12 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Friday, April 14, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 13, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Alex. W. Terrell, of Texas, to be envoy extraordinary and minister plenipotentiary of the United States to Turkey, vice David P. Thompson, resigned.

ASSOCIATE JUSTICE SUPREME COURT ARIZONA.

John J. Hawkins, of Arizona Territory, to be associate justice of the supreme court of the Territory of Arizona, vice Edmund W. Wells, resigned.

DISTRICT ATTORNEYS.

Francis R. Lassiter, of Virginia, to be attorney of the United States for the eastern district of Virginia, vice Thomas R. Borland, resigned.

John H. M. Wigman, of Wisconsin, to be attorney of the United States for the eastern district of Wisconsin, vice Elihu Colman, to be removed.

James F. Read, of Arkansas, to be attorney of the United States for the western district of Arkansas, vice William H. H. Clayton, to be removed.

UNITED STATES MARSHAL.

George J. Crump, of Arkansas, to be marshal of the United States for the western district of Arkansas, vice Jacob Yoes, resigned.

COLLECTOR OF CUSTOMS.

Charles W. Larrabee, of Maine, to be collector of customs for the district of Bath, in the State of Maine, to succeed James W. Wakefield, whose term of office has expired by limitation.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 11, 1893.

GOVERNOR OF UTAH.

Caleb W. West, of Salt Lake City, Utah, to be governor of Utah.

FIRST DEPUTY COMMISSIONER OF PENSIONS.

Dominic I. Murphy, of Washington, D. C., to be First Deputy Commissioner of Pensions.

POSTMASTERS.

Exum B. Britt, to be postmaster at Suffolk, in the county of Nansemond and State of Virginia.

Irwin Tucker, to be postmaster at Newport News, in the county of Warwick and State of Virginia.

FRIDAY, *April 14, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

CHARGES AGAINST SENATOR ROACH.

Mr. ROACH Mr. President, I rise to a question of personal privilege.

My colleague, the senior Senator from North Dakota [Mr. HANSBROUGH], is reported to have said, referring to the charges alleged in the resolution of the Senator from Massachusetts, that I told him I desired to offer a resolution for investigation, or that I thought it was the best thing to do. I rise now to confirm that statement, and to say further that as far as that investigation is concerned I desire it, and am perfectly willing that it shall be proceeded with.

After the conversation referred to by my colleague, I yielded to the advice of friends in the Senate and did not act upon my own impulses in the matter. Hence I did not offer the resolution that I desired and intended to offer. New to this body and entirely unfamiliar with the customs and usages of the Senate, I naturally attached weight to the advice and opinion of those older in the service and versed in the practices and precedents of the Senate. I was given to understand that, however much I might desire or demand an investigation, it was not the practice of the Senate to take jurisdiction of alleged acts or conduct prior to the election of a Senator and having no connection with the legality thereof.

If this practice is to be now changed, I have no protest to make; on the contrary, I repeat I am willing and desirous that the investigation be made. I seek no shelter and shrink from no scrutiny into my public and private character.

I desire to say at this time that I am perfectly willing and desirous that this investigation shall be proceeded with. That has been my position from the beginning. I stand here now to say that much, and to repeat it.

With reference to my rising at this time, I will state that I have been blamed for not speaking. I have also been criticised because it is alleged that I did say something. In justice to my colleague and myself with reference to what has been said in the newspapers (because these things so far are proceeding upon newspaper allegations) I thought it my duty to say this much at this time.

Mr. CHANDLER. Mr. President, in view of the statement made by the Senator from North Dakota, I desire to call the attention of the Senate to the situation with reference to the resolution now pending before the Senate, upon which I obtained unanimous consent yesterday to speak. The resolution as originally introduced by the Senator from Massachusetts [Mr. HOAR] has been modified by him and provides for what might be called in some sort a qualified investigation. The resolution now before the Senate, and which the Senator from Massachusetts requested might be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, provides that the Committee on Privileges and Elections shall inquire into the facts connected with the case of the Senator from North Dakota so far as to determine what would be the right and the duty of the Senate in the premises, and to make report to the Senate.

This modified resolution was drawn by the Senator from Massachusetts, submitted to the Senator from North Carolina [Mr. VANCE], the chairman of the Committee on Privileges and Elections, and agreed to by him; and it was supposed upon this side that it would be agreed to by the Senate without debate and without objection upon either side of the Chamber.

In view of the statement now made by the Senator from North Dakota, I venture to ask the Senator from North Carolina if, after the resolution shall have gone to the Committee to Audit and Control the Contingent Expenses of the Senate, and shall have been reported back by that committee, there is any objection to its adoption without debate, so far as the Senator is advised as to the views of Senators upon the other side of the Chamber?

Mr. VANCE. Mr. President, I can only speak for myself of course. When the committee report the resolution back to the Senate I shall have no objection to its adoption.

Mr. CHANDLER. Then I ask that the resolution may be referred and that there may be unanimous consent that when the resolution is reported back by the Committee on Contingent Expenses, if it be so reported, it may be adopted without debate and without objection.

Mr. GEORGE. Mr. President, I have sent to the desk to get a copy of the resolution, but have been unable to get it. I understand, however, that the resolution proposes to examine into and investigate the conduct of the Senator from North Dakota [Mr. ROACH] prior to his election to the Senate, and not connected with that fact. I shall be obliged, sir, to refuse unanimous consent so far as I am concerned, without reference to what consequences may follow. I have had no interview, no communication, either directly or indirectly, with the Senator from North Dakota. I act upon my own responsibility and upon my conviction of my duty to the Senate and to the Constitution of my country.

I deny absolutely the power of this body under any circumstances to institute and conduct an investigation in relation to the conduct of a Senator, that conduct having transpired before his election to this body and that conduct being disconnected with that election. I deny absolutely that any consent on the part of a Senator whose conduct is proposed to be investigated will give this body jurisdiction.

Mr. CULLOM. Will the Senator from Mississippi allow me to interrupt him one moment?

The VICE-PRESIDENT. Does the Senator from Mississippi yield?

Mr. GEORGE. No, sir.

Mr. CULLOM. Then I have the right to inquire what is now before the Senate, under the rule.

Mr. GEORGE. I am before the Senate, for one.

Mr. CULLOM. Whether the Senator is in order is what I desire to know.

The VICE-PRESIDENT. What is the point of order the Senator from Illinois makes?

Mr. CULLOM. I make the inquiry of the Chair, what is now before the Senate?

Mr. GEORGE. The remarks of the Senator from Mississippi.

Mr. CULLOM. I understand the resolution for seating the Senator from Montana is the matter to be laid before the Senate. The Senator from North Dakota [Mr. ROACH] rose to a question of privilege. The resolution in reference to the Senator from Montana has not been laid before the Senate by the Chair.

The VICE-PRESIDENT. The Senator from New Hampshire [Mr. CHANDLER] has asked unanimous consent that the resolution submitted some days ago by the Senator from Massachusetts [Mr. HOAR] may be referred, and agreed to without debate when reported. The resolution will be read, in order that the Senate may understand the question before it.

Mr. CULLOM. That resolution was not laid before the Senate by the Chair.

Mr. GEORGE. Mr. President——

The VICE-PRESIDENT. The Senator from Mississippi will suspend until the resolution is read.

Mr. GEORGE. Very well.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution submitted by Mr. HOAR on the 10th instant, as follows:

Resolved, That the Committee on Privileges and Elections be directed to examine the allegations recently made in the public press, charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with certain criminal offenses, committed while cashier or officer of a bank in the city of Washington, and to ascertain the facts and circumstances so far as to enable the committee to determine and report what are the duty and power of the Senate in regard thereto; and for that purpose the committee shall have authority to send for persons and papers, to employ a stenographer, to sit during the recess of the Senate, and to act through a subcommittee, and its expenses shall be paid from the contingent fund of the Senate.

Mr. GEORGE. Am I in order now, Mr. President?

Mr. CHANDLER. If the Senator will allow me a moment, I asked for unanimous consent, and the Senator from Mississippi rose to state that he could not give unanimous consent. I certainly hope that he may, by the unanimous consent of the Senate, be allowed to state the reasons why he objects to unanimous consent.

The VICE-PRESIDENT. The Chair will state that this debate is proceeding by unanimous consent.

Mr. GEORGE. That includes my right to proceed, I hope.

The VICE-PRESIDENT. The Senator from Mississippi will proceed, unless there be objection.

Mr. CULLOM. I make no objection, Mr. President.

Mr. HOAR. Mr. President——

The VICE-PRESIDENT. The Chair does not understand that objection has been made to the Senator from Mississippi proceeding with his remarks.

Mr. HOAR. I make no objection, but, on the contrary, hope that the Senator from Mississippi will proceed. However, it is understood of course that that does not waive the right of the Senator from New Hampshire to proceed afterward under the unanimous consent given last night.

The VICE-PRESIDENT. The Chair so understands. The Senator from Mississippi will proceed.

Mr. GEORGE. When I was interrupted I was proceeding to state, in the first place, that the Senate has no jurisdiction to make the investigation, and, secondly, that no consent of the party to be investigated could give that jurisdiction. I understand the proposition is to investigate the conduct of a Senator transpiring before his election to the Senate and disconnected entirely from that election; that the conduct alleged has no relation to procuring his election to the Senate whereby the regularity of that election might be impeached.

I have not looked to the precedents upon the subject, but I take it that the only power this body has to inquire into the conduct of a member is under that clause of the Constitution which authorizes the Senate to punish a member for disorderly behavior or to expel him. It is not alleged that the Senator from North Dakota has been guilty of any disorderly conduct. Then, if we have a right to investigate at all it is under that other clause of the Constitution, the right to expel a member. It is not defined in the Constitution except incidentally for what cause a member may be expelled. I read the whole paragraph so that the Senate may take it in:

> Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

The resolution, if it does not look to one of these two things, is certainly without the jurisdiction of this body. If it be alleged that a member of this body has been guilty of disorderly conduct the Senate may investigate that question, ascertain the facts, and pronounce judgment upon the facts. Certainly that relates to disorderly conduct whilst a member of this body, for it says "punish its members for disorderly behavior." Disorderly behavior of whom? Disorderly behavior of the member, and when he is a member, amenable to the jurisdiction of this body.

Then, for what cause have we a right to inquire and have we a right to expel? Sir, I think it is a very extraordinary proposition, when we consider it in all its length and breadth, that the Senate may look into the antecedent conduct of a person who has subsequently been elected a member of this body for the purpose of expelling him. What does that mean, Mr. President? Stop and think. It means that the Senate, for any cause which the Senate may adjudge sufficient, may reverse the action of a sovereign State in relation to the election of a member to this body.

Stating it in a little different form, because I desire the Senate to understand distinctly what this proposition means, if we may for conduct or alleged conduct transpiring before the person becomes a member of this body expel him, do we not assume to dictate to a sovereign State in this Union whom it may elect as a Senator? In other words, whilst the Constitution of our country says that the State through its Legislature shall elect a Senator, if that Senator has the prescribed qualifications fixed in the Constitution, when he comes to take his seat here we may say, "We do not like the person whom the Legislature has sent here; he is *persona non grata;* we do not like the man, though possessing all the qualifications prescribed by the Constitution, whom a sovereign State has seen proper to select and accredit to this body."

Mr. President, have we the power to do that? Are we an appellate court authorized by the Constitution (and if we are not authorized by the Constitution we are not authorized at all) to sit in judgment upon the propriety of an act performed by a State Legislature in sending a Senator to this body? State the proposition as you may, conceal it by any sort of circumlocution or specious verbiage, and at last it comes to the simple, single proposition, the Legislature of the State may say that this man suits us; we may say that he does not suit us.

Mr. President, if the mere statement of that proposition is not enough to condemn it in the minds of thoughtful Senators, I hope I may be allowed to indulge a little in speculating for what cause we shall undertake to expel a member for acts done prior to his election. Where are the rules laid down which are to guide us in our judgment in this important particular? Do you find anywhere in the Constitution of the country that a Senator shall not have been guilty of this thing or that thing or the other thing as a necessary prerequisite to his title to a seat here? Not one word.

Then, sir, what are the rules by which we are to determine whether we shall expel a member or not for acts done prior to his election? They are absolutely unwritten in the Constitution; they are left to the discretion of this body; and that discretion, when translated into plain English constitutional language, means that the Senate of the United States have the right to expel a person from this body because they do not like what he may have done prior to his election to the Senate. If any Senator can say to me that that is not the correct statement of the proposition I should like to hear him. I deny, therefore, that we have any jurisdiction. I deny, therefore, that any consent on the part of the Senator can give jurisdiction.

But do Senators say, as I heard one suggest the other day, that we have a right to know with whom we are associated? Where do we get that right? What clause of the Constitution gives the power to a Senator from Mississippi or to a Senator from any other State to say, "I invoke the action of this body to enable me to determine whether I shall associate with the Senator from Arkansas or the Senator from any other State"? This body has no jurisdiction—I want that understood—to make an inquiry, except that inquiry be the foundation for some action of this body, not the action of A and B, or C and D, who may be members of this body, but the action of the body as a Senate.

As I have shown, we can not expel a Senator for misconduct prior to his election, and we are therefore without jurisdiction. For what purpose can we make the investigation? None. Then, according to the rule of law, if we be without jurisdiction to pronounce any effectual judgment, how can we make the investigation? It is a fundamental principle of law that you can not punish a witness for perjury before a court and in a cause over which that court has no jurisdiction. So, if the Senate should conclude to go into this sham and farce of an investigation, it will meet with these difficulties: First, that no man who is summoned by a committee as a witness will be bound to attend, the court having no jurisdiction; secondly, if he does attend, and gives false testimony, he can not be punished. So you make this investigation, if you make it at all, before a committee who can only examine witnesses who volunteer their presence and witnesses who testify without being under any legal—I am not talking about moral—obligation to tell the truth.

Mr. CHANDLER. Mr. President——

Mr. GORMAN. If the Senator from New Hampshire will permit me, I will say that if we have a quorum when this resolution comes up I shall offer a substitute for the resolution, which I should like to have read before the Senator proceeds.

The VICE-PRESIDENT. The proposed substitute will be read.

The Secretary read as follows:

> *Resolved*, That the Committee on Privileges and Elections be directed to inquire into and consider the question whether the Senate has authority or jurisdiction to investigate charges made against a Senator as to conduct or offenses occurring or committed prior to his election, not relating to his duty as Senator or affecting the integrity of his election.

Mr. CHANDLER. Mr. President——

Mr. HOAR. Will the Senator from New Hampshire kindly yield to me for a moment to make a suggestion in relation to the order of business, which I suppose will take but a moment?

Mr. CHANDLER. Certainly.

SENATOR FROM MONTANA.

Mr. HOAR. Mr. President, it will be remembered by the Senate that the report of the minority of the Committee on Privileges and Elections in regard to the claims to three seats in the Senate, depending upon the validity of the appointments by the governors of certain States, was submitted to me to present to the Senate. That was done by the unanimous request of the committee, and I made the report. I wish, therefore, to do my duty in regard to those cases. From what I can learn I suppose that the debate in regard to them is substantially over, and I desire to ask unanimous consent that there may be a vote taken upon those cases without further debate at 2 o'clock to-morrow.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Massachusetts?

Mr. HARRIS. There is.

Mr. VEST. I object.

Mr. FAULKNER. I desire to say, in connection with the request of the Senator from Massachusetts, that I know of several Senators who desire to be heard upon those resolutions before they are acted upon.

The VICE-PRESIDENT. There is objection to the request of the Senator from Massachusetts.

Mr. HOAR. If I may be pardoned, I will say that I thought it very likely that some Senator would desire to have further debate without taking the vote at the time I named; but I thought under the circumstances everybody would recognize the propriety of granting unanimous consent in order that it might be understood that the matter should be concluded.

Mr. FAULKNER. I will say to the Senator from Massachusetts that I know there is a desire to discuss the questions arising upon those resolutions.

Mr. HOAR. I wished to have that fact appear clearly by making this request.

The VICE-PRESIDENT. The Senator from New Hampshire is entitled to the floor.

Mr. CHANDLER. Mr. President——

Mr. HOAR. If the Senator will pardon me one moment more, I will inquire if the Senator from West Virginia [Mr. FAULKNER], or the Senator from Missouri [Mr. VEST], or the Senator from Tennessee [Mr. HARRIS] think that a time can be fixed at the present session by agreement for such a vote?

Mr. VEST (in his seat). We will confer about that.

Mr. HOAR. I should be very glad to have such a time fixed, if the Senate can agree to it.

DISBURSEMENTS BY RECESS COMMITTEES.

Mr. COCKRELL. I offer a resolution, which I ask to have referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. Does the Senator from New Hampshire yield for that purpose?

Mr. CHANDLER. I yield.

The VICE-PRESIDENT. The resolution will be reported.

The resolution was read, and referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to ascertain and fix the sums necessary to be disbursed by the various standing or special committees authorized to sit during the recess; that when the said sum or sums be so ascertained and fixed by the said committee, the expenses of the various committees, standing or select, authorized to sit during the recess, be absolutely limited to the amount so fixed by the said committee.

Resolved further, That the said Committee to Audit and Control the Contingent Expenses of the Senate, in ascertaining and fixing the said sums, be, and hereby is, directed to so fix the amounts as to keep the aggregate sum within the appropriation.

REPORT OF IMMIGRANT COMMISSIONER SCHULTEIS.

Mr. CHANDLER. I think I shall offer a resolution myself and then take a new start in my remarks, with the permission of Senators.

The VICE-PRESIDENT. The resolution of the Senator from New Hampshire will be read.

The resolution was read, and referred to the Committee on Printing, as follows:

Resolved, That the Public Printer be, and is hereby, directed to print for the use of the Senate, with a title page, 12,000 additional copies of the report of Immigrant Commissioner H. J. Schulteis, contained in Part I, House Executive Document No. 235, first session Fifty-first Congress, pages 263 to 323 inclusive.

KANSAS SENATORIAL INVESTIGATION.

Mr. CHANDLER. I take occasion now to yield to any further morning business which Senators may desire to offer.

Mr. HOAR. If that be the case, I should like to inquire if there is any further objection to the resolution reported from the Committee on Contingent Expenses in regard to the Kansas Senatorial investigation case?

Mr. HARRIS. There is not, so far as I am concerned.

Mr. HOAR. I ask that the resolution may be now disposed of.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution referred to by the Senator from Massachusetts, which will be read.

The Secretary read the resolution, as follows:

Resolved, That the Committee on Privileges and Elections, or any subcommittee thereof, be authorized to investigate the right of Mr. Joseph W. Ady, who claims a seat in this body as Senator from Kansas; and, if in their judgment it be necessary, to employ a stenographer, send for persons and papers, to administer oaths, and to sit during the recess of the Senate.

The resolution was reported from the Committee to Audit and Control the Contingent Expenses of the Senate with an amendment, to add:

The expense thereof to be paid from the contingent fund of the Senate.

The VICE-PRESIDENT. The question is on the amendment.

Mr. HOAR. I should like to be permitted to say that I think, and I believe that the Republican members of the Committee on Privileges and Elections agree with me in thinking, that it would be better and more in accordance with the precedents to have distinct authority given to the committee not only to investigate the claim of Mr. Ady, but also the title of Mr. MARTIN.

As the majority of the committee, however, have preferred this form of the resolution, it is quite obvious that no public advantage will be gained to anybody by entering upon a long debate at this time, when we are all anxious to finish the session as soon as possible. Therefore I do not raise any question about the resolution in its present shape. I intended originally to move an amendment, broadening a little the language and possibly the meaning of the resolution, but under the circumstances I shall not raise any question about it.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee to Audit and Control the Contingent Expenses of the Senate.

The amendment was agreed to.

The resolution as amended was agreed to.

ADMISSION OF TERRITORIES.

Mr. HARRIS. I objected to the resolution which was reported yesterday morning by the Committee on Contingent Expenses in respect to the Committee on Territories. I ask that that resolution be now laid before the Senate, and I shall withdraw all objection to it.

The VICE-PRESIDENT. Without objection, the Chair will lay before the Senate the resolution referred to by the Senator from Tennessee, which will be read.

The Secretary read the following resolution, submitted by Mr. CAREY April 6, 1893, which had been reported from the Committee to Audit and Control the Contingent Expenses of the Senate, with an amendment:

Resolved, That the Committee on Territories, or any subcommittee thereof appointed for the purpose, are hereby authorized during the recess of Congress to visit the Territories of New Mexico, Arizona, Utah, and Oklahoma, for the purpose of obtaining information with regard to the resources, population, and condition of said Territories, and as to the propriety of the admission of the same as States, and that the expenses of said committee be paid out of the contingent fund of the Senate.

The amendment reported by the Committee to Audit and Control the Contingent Expenses of the Senate was to add to the resolution:

Provided, That no expense be incurred for clerical service, any clerical service required by the said committee or any subcommittee thereof to be performed by the regular clerical force of the committee without extra compensation.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The resolution, as amended, was agreed to.

DISBURSEMENTS BY RECESS COMMITTEES.

Mr. WHITE of Louisiana. I ask leave to report from the Committee to Audit and Control the Contingent Expenses of the Senate the resolution submitted this morning by the Senator from Missouri [Mr. COCKRELL].

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to ascertain and fix the sums necessary to be disbursed by the various standing or special committees authorized to sit during the recess; that when the said sum or sums be so ascertained and fixed by the said committee, the expenses of the various committees, standing or select, authorized to sit during the recess, be absolutely limited to the amount so fixed by the said committee.

Resolved further, That the said Committee to Audit and Control the Contingent Expenses of the Senate, in ascertaining and fixing the said sums, be, and hereby is, directed to so fix the amounts as to keep the aggregate sum within the appropriation.

Mr. WHITE of Louisiana. I ask unanimous consent for the consideration of the resolution at this time.

Mr. CALL. I ask that that resolution go over.

The VICE-PRESIDENT. The Senator from Florida objects, and the resolution will go over and be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. CULLOM, it was

Ordered, That Goff A. Hall have leave to withdraw his papers from the files of the Senate.

Mr. GORMAN. As the Senator from New Hampshire has given way to quite a number of matters of public business, will it inconvenience him to have a short executive session before he proceeds with his remarks?

Mr. CHANDLER. I yield to the request of the Senator from Maryland.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. HIGGINS. I should like to present an order for adoption before that is done.

The VICE-PRESIDENT. Does the Senator from Maryland yield to the Senator from Delaware?

Mr. GORMAN. We shall likely come out of executive session in a short time.

Mr. HIGGINS. I hope the Senator from Maryland will allow me to offer an order for adoption.

Mr. GORMAN. I yield for that purpose.

On motion of Mr. HIGGINS, it was

Ordered, That William W. S. Davis have leave to withdraw his papers from the files of the Senate, subject to the rules.

On motion of Mr. COCKRELL, it was

Ordered, That the papers in connection with Senate bill No. 1194 of the Fifty-second Congress, for the relief of G. W. Harbaugh, be withdrawn from the files of the Senate, there having been no adverse report.

PROPOSED EXECUTIVE SESSION.

Mr. GORMAN. I now renew my motion that the Senate proceed to the consideration of executive business.

Mr. CULLOM. I hope the purpose of the Senator from Maryland is not to have the Senate hold an extended executive session.

Mr. GORMAN. I think a very short executive session will suffice.

Mr. CULLOM. As the Senator from New Hampshire [Mr. CHANDLER] has been waiting now for two days and expected to make his remarks this afternoon——

Mr. GORMAN. I have made the motion with his consent.

The VICE-PRESIDENT. The Chair understood that the Senator from New Hampshire had yielded to the Senator from Maryland to make that motion.

Mr. CULLOM. I simply want it understood that the Senator from New Hampshire will be entitled to proceed with his remarks very soon.

Mr. GORMAN. As a matter of course, he will. I renew my motion.

Mr. HARRIS. I desire to inquire if the Senator from New Hampshire, under the consent which was given yesterday, holds the floor at this time and *in futuro*? Will the Senator from New Hampshire tell me how long he claims the right to the floor under the consent which was given yesterday?

Mr. CHANDLER. I have hardly had the floor at all yet, and I think it is rather hard for the Senator from Tennessee to put that question to me. I had not taken the floor under the unanimous consent given me yesterday, but the Senator from North Dakota [Mr. ROACH] made a statement; then I asked unanimous consent; then the Senator from Mississippi [Mr. GEORGE] made a speech; and then I thought it was an opportune time for me to go on. I have yielded to morning business and all kinds of business, and I now yield to the motion of the Senator from Maryland [Mr. GORMAN]; but I do not care to tell the Senator from Tennessee how long I shall speak when I am kindly accorded the right to go on under the unanimous consent which was given me yesterday.

Mr. HARRIS. Mr. President, I am a little curious to know, and I have a right to know, how long the Senator is going to hold the right to the floor under the consent which was given yesterday?

Mr. CULLOM. Mr. President——

Mr. HARRIS. I will hear the Senator from Illinois later.

Mr. CULLOM. I should like to make a remark in connection with the inquiry of the Senator from Tennessee.

Mr. HARRIS. The Senator may make the remark when I get ready to hear him, and not till then.

Mr. CULLOM. Very well. Has the Senator the right to the floor?

Mr. HARRIS. I was recognized by the Chair, and I think that gives me the right to the floor.

Mr. CULLOM. Not for all day.

Mr. HARRIS. I shall probably not occupy it quite so long.

Mr. CULLOM (to Mr. CHANDLER). I would not yield at all under those circumstances.

Mr. CHANDLER. I yielded the floor——

Mr. HARRIS. But the Senator from New Hampshire took the floor this morning under the consent which was granted yesterday, and matters have drifted on. Now I do not quite understand that the consent given on yesterday for the Senator to address the Senate immediately after the reading of the Journal to-day shall extend without limit. I want to know how far it extends, and the Senator declines to answer.

Mr. CHANDLER. No, Mr. President, I do not.

Mr. HARRIS. He has been very kind in yielding to others, I grant; but there is a good deal of business before the Senate.

Mr. CHANDLER. I will answer the Senator's question, of course, if I can. I should like to understand exactly what the Senator wishes to know of me. I yielded to the recognized leader of the Senate on the other side, the Senator from Maryland [Mr. GORMAN].

Mr. HARRIS. What I wish to know is, how far the consent of yesterday goes. I regret that I did not object then. I am ready to object whenever the time comes that I can legitimately do so without violating a unanimous consent rule. That is my point.

Mr. CHANDLER. I yield to the Senator from Maryland, and leave the matter in his hands.

Mr. GORMAN. Of course the Senator from New Hampshire, by unanimous consent, is entitled to the floor, and if the motion I made for an executive session interrupts him, I shall withdraw the motion.

Mr. CULLOM (to Mr. CHANDLER). Go on and make your speech.

The VICE-PRESIDENT. The Senator from Maryland withdraws his motion, and the Senator from New Hampshire is entitled to the floor.

CHARGES AGAINST SENATOR ROACH.

Mr. CHANDLER. Mr. President, at the banquet given on the 27th of February last by the eighty-eight Senators to Vice-President Morton, the senior Senator from Missouri [Mr. COCKRELL] described the Senate as "the most important and distinguished legislative assembly on earth." Imbued, I trust, with the spirit of that utterance, I approach the unpleasant duty of advocating the resolution which is before the Senate and of stating my views of the law and the facts in the case of the Senator from North Dakota [Mr. ROACH].

I had hoped, Mr. President, to be spared the necessity of speaking, by an arrangement between Senators on both sides of the Chamber for the unanimous passage, without debate, of a resolution, carefully expressed, under which we might have such an investigation as the circumstances of the case seem to require, and discussion after that—investigation first, and discussion afterwards. Indeed such an arrangement was entered into after a conference between the Republican and Democratic members of the Committee on Privileges and Elections, and the result was the resolution which is now before the Senate, to the unanimous passage of which the Senator from Mississippi [Mr. GEORGE] has objected, and for which the Senator from Maryland [Mr. GORMAN] has offered a substitute.

Instead, therefore, of an amicable understanding as to the appropriate course of procedure in this case, which is one of some delicacy, it seems to have been decided by the leaders on the other side of the Chamber that the resolution of the Senator from Massachusetts [Mr. HOAR] shall not pass. The Senator from Mississippi alone of the Senators upon the other side of the Chamber objected to it, but later the Senator from Maryland offered a substitute for it. That substitute states the only ground upon which there can possibly be opposition to the resolution which was agreed upon, namely, that it is not within the constitutional power of the Senate the United States to inquire into the conduct of any Senator or into a crime committed by any Senator before he was elected to the Senate.

It is only possible to defeat the resolution for investigation which is now before us by laying down in the American Senate in this year 1893 the rule that no matter what crime may have been committed by a person occupying a seat in this Chamber, no matter under what circumstances of atrocity, it is not within the constitutional power of the Senate to even so much as appoint a committee to make an investigation into the facts and circumstances of that conduct and of that crime.

This proposition can not be sustained upon any correct view either of English parliamentary law or of the constitutional or parliamentary law of the United States. I have taken occasion during the present session to examine the authorities, both English and American, on this subject. I did this not with a view of presenting my conclusions to the Senate, but for my own guidance in determining my action as a Senator; but I have made a summary of the precedents, which has already been made public, and which I now read to the Senate:

I. In England members of the House of Commons have been expelled indiscriminately for acts done before as well as after their elections.

II. The principle has been to preserve the purity, honor, and high character of the legislative body; and the members have been expelled both before and after conviction of crime, and whether legal prosecutions have or have not been instituted.

III. In the United States there have been almost no actual expulsions from Congress except for disloyalty, and, apparently, not one for an offense committed before election.

IV. The advocates of expulsion have asserted the principle of the English cases—the necessity of preserving the character of the legislature—in language broad enough to cover offenses committed before as well as after election. The opponents of expulsions have usually argued against the right of expelling for acts done before the election.

V. The decided weight of American opinion is in favor of the right and duty to expel for offenses committed before election which, in the judgment of the legislature, renders the person an unfit member thereof.

VI. Numerous investigations have been made into the conduct of members before their election, and it is believed that in all cases where an investigation has been seriously demanded it has been ordered, and the decision to expel or not to expel has been made in full view of all the facts, except in one case, where the facts appeared upon the request for investigation and were not deserving of consideration.

This summary is sustained by the English and American cases. I read first from May's Parliamentary Practice, on page 62, where he states the grounds of expulsions:

Expulsion is generally reserved for offenses which render members unfit for a seat in Parliament, and which if not so punished would bring discredit upon Parliament itself. Members have been expelled as being in open rebellion; as having been guilty of forgery, of perjury, of frauds and breaches of trust; of misappropriation of public money; of conspiracy to defraud; of corruption in the administration of justice, or in public offices, or in the execution of their duties as members of the House; of conduct unbecoming the character of an officer and a gentleman; and of libels and various other offenses committed against the House itself.

In support of Mr. May's proposition are cited numerous cases from the Commons Journal which I have examined, and some of them I propose to submit to the Senate. As stated in my memorandum, the English cases of expulsion from the House of Commons are indiscriminately for offenses committed both before and after the election. These which I now first read were apparently committed while the offenders were members of Parliament.

In 9 Commons Journal, 24, November 22, 1667, it was—

Ordered, That John Asburnham, in receiving £500 from the French merchants, hath committed an offense to the dishonor of this House and contrary to his duty as a member thereof

And he was expelled.

In 11 Commons Journal, 274, on March 16, 1694, Sir John Trevor, late Speaker, was expelled for receiving 1,000 guineas from the city of London after passing the orphans' bill.

In 11 Commons Journal, 283, it appears that Mr. Hungerford, a member, having taken 20 guineas for his pains and services as chairman of the committee to whom the orphans' bill was committed, was expelled as guilty of a high crime and misdemeanor.

On January 21, 1720, as appears by 19 Commons Journal, 406, Jacob Sawbridge and Sir Theodore Janssen, each being described as "a member of this House and one of the directors of the South Sea Company," were expelled for being "guilty of a notorious breach of trust," the record stating as to each that he has "thereby occasioned very great loss to great numbers of His Majesty's subjects, and has highly prejudiced the public credit."

On page 412 of the same volume, 19 Commons Journal, Sir Robert Chaplin and Francis Eyles, esq., were expelled for the same reason.

In 20 Commons Journal, 702, May 16, 1726, is recorded the case of John Ward, esq. A record was exhibited from the court of King's Bench, and it appeared that Ward had been "convicted of the crime of forgery this present Easter term." He was expelled *nem. con.* The forgery was committed February 1, 1725. The forged writing appeared to be dated April 30, 1706.

In 69 Commons Journal, 433, July 5, 1814, is recorded the case of Sir Thomas Cochrane. He was expelled because he was declared to have been "convicted of a conspiracy with a wicked and fraudulent intention to thereby cheat and defraud His Majesty's subjects of divers large sums of money." The conviction was in 1814. The crime alleged was a conspiracy on February 19, 1814, to spread the false report that the French troops had been beaten and Napoleon killed, and this in order to make profitable a speculation in the public funds.

Now I come to cases where the expulsions seem to have been for offenses committed before the person expelled became a member of the House of Commons.

In 14 Commons Journal, 171, February 1, 1702, it appears that it was

Resolved, That Richard, Earl of Ranelagh, late paymaster of the forces, is guilty of a high crime and misdemeanor in misapplying several sums of the public money.

Resolved, That Richard, Earl of Ranelagh, for his said offenses be expelled this House.

This crime appears to have been committed between 1692 and 1699, and apparently before Earl Ranelagh became a member of the House of Commons. It was clearly while he was paymaster of Her Majesty's forces.

In John Quincy Adams's speech in Senator John Smith's case, recorded in the Annals of Congress, Tenth Congress, first session, volume 1, page 243, is stated the case of Thomas Ridge, who was expelled from the House of Commons.

In 17 Commons Journal, 30, January 14, 1711, is recorded the well-known case of the expulsion of Sir Robert Walpole. The charge was a corrupt contract sworn to by Robert Mann, and the record shows that the offense was committed in August, 1709. I am not able to determine whether Sir Robert Walpole was then a member of the House of Commons, a minister, or not. The resolution was:

That Robert Walpole, esq., a member of this House, in receiving the sum of 500 guineas and in taking a note for £500 more on account of two contracts for forage of Her Majesty's troops quartered in North Britain, made by him while secretary of war, pursuant to a power granted to him by the late lord treasurer, is guilty of a high breach of trust and notorious corruption.

The resolution was passed by yeas 205, nays 148; and he was committed to the Tower and expelled by a vote of 170 to 148.

In 51 Commons Journal, 661, May 2, 1796, it appears that Mr. John Fenton Cawthorne, who was then expelled, had been found guilty by court-martial of having acted fraudulently and in a scandalous and infamous manner unbecoming the character of an officer and a gentleman as colonel of the Westminster regiment in the Middlesex militia, in the embezzlement of soldiers' money and clothing and of like offenses as far back as 1793.

In 65 Commons Journal, 399, May 23, 1810, is recorded the case of Joseph Hunt, esq., who was expelled for having as treasurer of ordnance misapplied a large sum of the public money. On page 280 it is stated that he was a defaulter to the amount of £93,926. It also appears that he was first appointed treasurer of ordnance in 1803, and a second time in 1807, when he was not a member of the House of Commons.

In 21 Commons Journal, 871, March 30, 1732, it appears that Denis Bond, esq., and John Birch, esq., were expelled for breach of trust as commissioners for the sale of forfeited estates for the use of the public. These offenses were committed July 30, 1723, nearly nine years before the time of expulsion.

In 39 Commons Journal, 770, December 4, 1783, Christopher Atkinson, esq., was expelled because "convicted of the crime of perjury." The perjury was committed February 7, 1780, by swearing that William Bennett had libeled him in the General Advertiser and Morning Intelligencer of January 31, 1781, while he was corn factor, purchasing corn and supplying the commissioners for victualing the royal navy.

BENJAMIN WALSH'S CASE.

The last English case to which I wish to call special attention is that recorded in 67 Commons Journal, 176, proceedings of March 5, 1812. It was the case of Benjamin Walsh. The question before the House of Commons was this:

That Benjamin Walsh, esq., a member of this House, having been tried at the Old Bailey in January last for felony and convicted thereof, and having received a free pardon by reason of his offense not amounting to felony in the opinion of the judges, but gross fraud and notorious breach of trust having been proved against him on the said trial, is unworthy and unfit to continue a member of this House.

I find a statement of the principle upon which Mr. Walsh was expelled in Lord Colchester's Diary. Lord Colchester had been Mr. Speaker Charles Abbot, and in volume 2 of his Diary and Correspondence, page 373, is this entry:

House of Commons: Mr. Walsh was expelled after a long debate, by 101 to 16. The principle of the expulsion: The facts incontrovertibly proved (upon the trial at the Old Bailey) of his having plotted and practiced a gross and infamous breach of trust in a money transaction, to his own emolument; and the precedent (by which that principle had already been extended to transactions respecting not only public, but also private property in the case of individuals) argued and relied upon was that of the Charitable Corporation in 1732, when, for indirect and fraudulent practices, three members were expelled; and the legal conviction of any indictable offense in those practices was held to be so little necessary to precede the expulsion that they were expelled first and the legal prosecutions were ordered afterwards, as is commonly the practice of Parliament, where it first vindicates its own honor and then consigns the individual to legal prosecution, which may or may not be able to fix legal guilt and punishment on the delinquent.

The debate in the Walsh case is contained in Hansard's Parliamentary Debates, first series, volume 21. On page 934 is stated the record of the conviction. On page 939 is the free pardon granted him for the crime. Then follows the letter of Mr. Walsh, which was read in the House of Commons, which constituted a confession of his crime. I will ask that the Secretary may read it.

The PRESIDING OFFICER (Mr. JONES of Arkansas in the chair). The Secretary will read as requested.

The Secretary read as follows:

My commission business, which I expected would increase, has become a hopeless resource, as it would furnish but a very small portion of my expenditure, and every attempt that I have made to assist by other means has ended in failure and loss. I did look forward with hope to the connection I proposed to you, and if this late unfortunate event had not occurred I think it possible I might have struggled through, as I have no doubt it would have answered our utmost wishes; and I trust that you will persevere in it with the fullest success. But I saw that it was impossible for me to provide the means, and there was no chance of saving myself from ruin, and my dear wife and children from poverty, and my brothers and sisters from loss by me, which they could ill afford, but to pursue a step which, though it will bring disgrace on my name, yet will afford me the means of preventing these dreadful calamities.

You who know my principles may well conceive that to resolve on a direct dishonest act must have given me much pain; but when I pictured to myself my sweet children in want, I resolved to take the means for their support from one to whom the loss would be but imaginary, as his fortune and accumulations far exceeded his expenditure, and his mercenary disposition would have induced no one to regret his loss. I have not had the opportunity I looked for with this person (Mr. O.), but it has been afforded me by another, who, though in a great respect free from the latter imputation, yet has every advantage of the former. He has ever been a kind friend to me, and I fear the act will add ingratitude to the crime; but I had no other chance, and the die is now cast.

Oh! my God, pardon my heinous offense. Sir Thomas Plumer employed me to sell a large sum of stock to pay for an estate, and I have withheld a part of the proceeds. I might have taken all; but I thought it crime enough for my future life to answer for to take what I conceived would be sufficient to maintain my family in competence and pay those debts which hung the

heaviest on my mind. I have already remitted it abroad; and though my person is safe from arrest, yet I have resolved to follow it, as I can never live in this country without shame and dishonor. It has been a heart-breaking struggle to leave you all; and I know I shall cause you great affliction where I would bestow nothing but happiness.

Mr. CHANDLER. That was the offense. I now read some portions of the debate. Mr. Bankes made the motion for expulsion, and in the course of his remarks he said (page 1175):

He agreed with those who thought that judicial power should be assumed by the House of Commons as seldom as possible, nor was the present the first opportunity that had been afforded him of expressing the opinion how little suited were its functions for such a purpose. Much less would he wish that questions of individual property or of general character should be there discussed, since it ill-suited the dignity of the House that through it means should be afforded to private malevolence to scrutinize every deviation from the strictest rules of moral rectitude; but it was inherent in the House of Commons and was a part of the constitution of every aggregate body to preserve its character and reputation.

If the House was proud of the splendid talents of some of its members, if it felt gratified by the exertions of military prowess by others, or if it owned with satisfaction the dignity it derived from the not less important though less glaring virtues of integrity and rectitude in others, it was impossible for it not to suffer in an equal proportion if men whose characters were stained by vice and corruption were still permitted to retain seats in a body where their peculiar deformity was rendered the more conspicuous by the general excellence of the whole. Unless from time to time wholesome remedies were applied to purify it, it was impossible that this main limb of the Constitution could continue healthy and vigorous.

At a later stage of his address he says:

Cases of all kinds might here be discovered, but no general, positive, or precise rules appear to have been laid down; but the House exercised its discretion according to the facts of the particular case presented to its consideration.

Still further Mr. Bankes says:

The expulsion of Colonel Cawthorne, in 1796, was entirely a new case, and much doubt was entertained of the wisdom and prudence of the proceeding; but among all the precedents there were none of more frequent occurrence or which had been visited more uniformly by the just punishment of the House than cases of fraud and notorious breach of trust in pecuniary transactions for private and undue emolument. The cases of public were undoubtedly more frequent than those of private fraud, and it was extremely natural that it should be so, since transactions between man and man were seldom brought to light, and until within the last thirty years members of Parliament were concerned in the collection of the revenues, in the public expenditure, in the lotteries, and contracts of government.

The principle, however, applied equally to all cases of fraud and breach of trust, when coupled with a most material circumstance, the notoriety and publicity of the fact. Could it, in the present case, be made more notorious than by a trial at the Old Bailey? It was impossible for the House to profess ignorance of what was known to the whole country.

Mr. Bathurst, in debating the subject, made the following utterance:

The honorable and learned gentleman had stated that an arbitrary discretion should not be allowed to the House. If the honorable and learned gentleman meant that the proceedings of the House should not be suffered to be capricious and vindictive he fully agreed with him; but if he meant that the House should be bound by strict technical rules, he entirely dissented from that opinion, and had a very different idea of the constitution of Parliament. As to immoralities committed by members of Parliament, he did not see how they affected the present case. Such immoralities might exist without injury to the public official character of a man, but the conduct of Mr. Walsh was marked with peculiar turpitude; and breaches of trust were precisely of a nature to affect the characters of members of Parliament, as members.

Further he says:

When the honorable and learned gentleman wished the House not to let their feelings run away with them, he must himself, at the same time, have felt the great indecorum, the gross indecency of such a person sitting in that place. Under all these circumstances, seeing no probable danger from the adoption of the motion, but seeing great danger from the rejection of it, he felt it impossible for him not to give his sincere and ardent support to the motion.

Sir Francis Burdett said—

That he was very far from being a stickler for what were called the privileges of Parliament, but certainly if there was a privilege or a power in any body or assembly less disputable than another, he conceived it to be that of declaring any one of the individuals of which they were composed unfit and unworthy of associating amongst them; it was, at all events, a power which, when compared with the other extraordinary privileges assumed by Parliament, appeared to him to be, of all others, the least liable to abuse, because if any member was expelled from any motives of party zeal or personal persecution, a remedy would be open to him in an appeal to his constituents, who, if they thought differently of his conduct, could unquestionably restore him to his seat

Again, Sir Francis said:

But as to the right of that assembly to expel one of its own members, he thought there could be little doubt of the right of every body to try to purify itself. He understood that in 1809 the members of the stock exchange had expelled Mr. Walsh for what they termed to be gross and nefarious conduct; now, certainly, if the feelings of the gentlemen upon 'Change were so sore at the idea of associating with Mr. Walsh, he did not see why that House, even constituted as it then was, should not be allowed the privilege of removing from themselves, in a similar way, an annoyance of the same kind.

Later Sir Francis said:

If the honorable gentleman who had preceded him in the debate thought that House to be made of a collection of—he knew not how to name them—if there were any or many such persons in that House or in the country, that would be with him a tenfold reason why the evil should be stopped before it proceeded to such excess, unless they should go on the principle—

I call this utterance especially to the attention of the Senator from Maryland [Mr. GORMAN]—

unless they should go on the principle that where roguery was so general it was more prudent to pass it over. And this reminded him of that part of the dialogue between Lady Macduff and the child. Her son asks, "And must they all be hanged that swear and lie?" Lady Macduff replies in the affirmative. "Who must hang them?" demands the child. "Why, the honest men." Upon which the child observes, "Then the liars and swearers are fools, for there are liars and swearers enough to beat the honest, and hang up them."

Sir Francis, however, notwithstanding this argument, continued:

If the House had any power of expulsion they had a right to exercise it in getting rid of one who, in public esteem, was evidently and totally unworthy to remain in their society.

Mr. C. W. Wynn said:

The object of the present motion was not to punish Mr. Walsh, but to take a very important trust out of the hands of a person entirely unworthy to hold it.

Mr. C. Adams addressed the Commons and said he supported the motion—

upon the ground that it was a case of great atrocity, the person against whom the fraud was committed, being the friend and patron of the person who committed it. He hoped the House would not disgrace themselves by having amongst them so degraded a delinquent. There was no society, however insignificant, who did not exercise the power of expulsion in atrocious cases, and though he did not pretend to nicer feelings than others, he should feel most awkward on coming in contact with such a person.

The Attorney-General, toward the close of the debate, in support of the motion to expel, said:

What, then, was the ground upon which the House would proceed to expulsion in a case of that description? The only case that bore any resemblance to it was that which he had already mentioned; and if the House had proceeded on it, not as a misapplication of public money, but as an act of gross dishonesty, it was at least equaled by the act that had been committed by Mr. Walsh. Indeed he could not conceive any case more repugnant to all moral rules than Mr. Walsh's.

The former resembled the dishonesty of a trustee, but the latter was not merely a misapplication of money which had come into his hands, but a deliberate act of fraud; a cold looking round to see whom he could plunder; fixing first upon one, from whom he withdrew, only because he found it impossible to accomplish his purpose, and then turning to his benefactor for no other reason than because he wanted money himself, and thought Sir Thomas Plomer could do very well without it: a case of cooler and more deliberate villainy had never come under his inspection. If they were to act from any paltry fear of public clamor, instead of proceeding with confidence to do their duty, they would act in a manner unbecoming their situation; and, basely as he thought of Mr. Walsh, he would not vote against him if he entertained any doubt of the justice of the precedent which that vote would establish.

The Chancellor of the Exchequer followed, and said:

He could not think that because an act of Parliament did not make a moral crime a legal one, the House of Commons should be prevented from taking cognizance of it. There were many cases of breach of trust, as stated by his honorable and learned friend (Sir A. Pigott), but if there was a plain one brought forward, upon the mere statement of which no two men could differ in opinion, though it was no legal crime, he saw no danger from the precedent of expulsion.

Then the House divided, and the numbers for the expulsion of Mr. Walsh were 101; against it, 16; majority for expulsion, 85.

HUMPHREY MARSHALL'S CASE.

I now come to the American cases of expulsions. The first, widely known, and one that has often been quoted, is Humphrey Marshall's case, occurring March 22, 1796. It is to be found in the Annals of Congress, page 59, Fourth Congress, first session, and also in the Senate Journal, vol. 2, 1793-1799, page 226; also in Taft's Election Cases, page 68.

This case has been often quoted to prove that the American doctrine is that the Constitution gives no right to expel a member for an offense committed before his election. A memorial was presented to the Senate which states that Marshall had a suit in chancery in the court of appeals of Kentucky, and that it was manifest from the record that he had committed a gross fraud, that the court gave a decree against him, and that in the course of the investigation he was publicly charged with perjury.

All these facts appeared to the Senate, the fact that there was a lawsuit, that it was a bitter controversy, that the litigants on the other side charged fraud, and also that Mr. Marshall had committed perjury. Mr. Marshall solicited an investigation. The committee report that fact:

Mr. Marshall is solicitous that a full investigation of the subject should take place in the Senate.

And I am glad to say, Mr. President, that I think there has not been a case from 1797 down to this hour where an accused person has not solicited an investigation. This is true from 1796 down to this 14th day of April, 1893, when the Senator from North Dakota rises from his seat and instead of opposing an investigation asks that an inquiry may be made.

The committee were evidently of the opinion that the Marshall case was one, considering it on its merits, on which the Senate ought to take no action; but it must be admitted that they adopted at the close of their report this expression:

And they are also of opinion that, as the Constitution does not give jurisdiction to the Senate, the consent of the party can not give it, and that therefore the said memorial ought to be dismissed.

The conclusion of the committee is put largely upon the ground that, while there was a charge of fraud and of perjury, there had been no prosecution and conviction in the courts of

law, and that, therefore, the presumption was that Mr. Marshall was innocent.

Mr. PLATT. They put it entirely upon that ground.

Mr. CHANDLER. The conclusion seems to have been put entirely on that ground, but the committee were evidently of opinion that the very facts in the case were not such if true as to require any action; they all appeared on the record, and assuming them to be true there was no cause for any proceedings against Mr. Marshall by the Senate.

Now, Mr. President, that is the Humphrey Marshall case, which to some extent contains an argument in favor of the proposition that the Senate should not inquire into the acts of a Senator before he becomes a member of the Senate.

Mr. PLATT. Will the Senator from New Hampshire permit an interruption?

Mr. CHANDLER. Certainly.

Mr. PLATT. Is there anywhere in the record of that case a claim made, either in the report of the committee or in the debates upon the report, that the Senate did not have jurisdiction for the reason that the alleged offense was committed before Mr. Marshall was elected to the Senate?

Mr. CHANDLER. That claim is not made. The doctrine is stated that the Senate ought not to take any cognizance of the offense until the party be convicted. The Senator from Connecticut can examine the record and make such comment upon it as he sees fit.

Mr. PLATT. I have examined it.

WILLIAM BLOUNT'S CASE.

Mr. CHANDLER. The next case is that of the expulsion, July 8, 1797, of William Blount. The report is to be found in the Senate Journal, 1793–1799, volume 2, page 390; also in the Annals of Congress, Fifth Congress, volume 1, pages 34–44.

Appleton's Cyclopedia of American Biography states that Mr. Blount was expelled "for conspiring to deliver New Orleans to Great Britain, and to instigate the Creeks and Cherokees to assist the British in conquering the Spanish territory of Louisiana." He was declared guilty of a high misdemeanor entirely inconsistent with his high public trust and duty as a Senator.

The question in Mr. Blount's case might be generally stated as one of disloyalty. I have in my hand a biography of Mr. Blount, entitled "Some Account of the Life and Services of William Blount," lately published, and kindly sent me by Gen. Marcus J. Wright, who was a former brigadier-general in the Confederate army, and is now one of the agents of the War Department in connection with the publication of the war records.

Gen. Wright has fully reviewed the Blount case, and I think makes a very good defense for Mr. Blount. The people of Tennessee were anxious about the control of the Mississippi Valley and of New Orleans while it was in the hands of another nation, and they were justly apprehensive on the subject. Mr. Blount felt that the interest of the people of Tennessee required him to take certain action, which the Senate of the United States deemed to be treasonable and expelled him; but he was thereafter repeatedly honored by the citizens of his own State, and his public character seems to be completely vindicated by Gen. Wright.

Mr. DOLPH. Will the Senator allow me to ask him if the acts of Mr. Blount were committed before he became a United States Senator or afterwards?

Mr. PLATT. Afterwards.

Mr. CHANDLER. He came into the Senate December 6, 1796. The letter that he wrote to Carey, in which he outlined this plan for delivering New Orleans to Great Britain when it was Spanish territory and to stir up the Creeks and the Cherokees to assist the British in getting possession, was dated April 21, 1797, and Senator Blount came into the Senate December 6, 1796. So he wrote the letter the next spring.

Mr. VOORHEES. If it would assist the Senator from New Hampshire, as I have been looking into the Blount case, I will state that the alleged bad conduct was committed while he was a Senator. After his connection with the Senate he was sought to be impeached as a Federal officer. He was sought to be impeached for his conduct while a Senator. His plea was that he was not then, when placed on trial, nor had been while a Senator, an officer of the United States Government or subject to impeachment. He plead that he had never been an officer of the Federal Government so as to be subject to impeachment, and on that question, after elaborate argument, he was sustained by the Senate in 1797.

Mr. CHANDLER. After he had been expelled.

Mr. VOORHEES. After he had been expelled. But in the plea he states that he never was an officer of the Federal Government. When he committed the conduct complained of he was a Senator, but he denied that at that time, when he was a Senator, he was an officer of the Federal Government. He claimed that he was an officer of the State, amenable to its laws, but not amenable to impeachment here. It was that question which gave the case its true value.

Mr. CHANDLER. I stated the date when he became a Senator, December 6, 1796. He wrote the Carey letter April 21, 1797, which, after debate, was declared to be a treasonable act, and he was expelled. The House of Representatives had preferred articles of impeachment against him to the Senate, and there was a long discussion as to whether, notwithstanding he had been expelled, he could be impeached. It was decided that he could not be impeached. Of course, the Blount case was a subject of full discussion upon the impeachment of Secretary Belknap, and Senators who are curious upon the subject will find the right of impeachment after an official has gone out of office fully discussed in that case. It is to be borne in mind that there were two questions involved in Blount's case; first, whether any Federal officer could be impeached after retiring from office; and, secondly, whether a Senator of the United States was under any circumstances impeachable upon the motion of the House of Representatives before the Senate, to which he belonged and which had the power of expulsion.

Mr. PLATT. I always understood that it was settled in the Blount case that a Senator was not a civil officer of the United States liable to impeachment under the Constitution.

Mr. CHANDLER. That may be taken to be the outcome of the Blount case. I do not know that the case is of any great value in the present discussion.

JOHN SMITH'S CASE.

Next came the case in 1808 of Senator John Smith, who was charged with participation in Aaron Burr's conspiracy. This is to be found in the Annals of Congress, Tenth Congress, volume 1, page 57, and also in Taft's Election Cases, page 79. It is also alluded to by Mr. Sumner; in the debate in the case of Mr. Bright, to which I shall shortly call the attention of the Senate. In that case the offense charged had been committed while Mr. Smith was a Senator. The case is notable because of the report of Mr. John Quincy Adams, in which the doctrine as to the power of the Senate to expel a member is stated broadly and in language which makes the report pertinent to the present question. Under date of December, 1807, page 56 of the Annals of Congress, Tenth Congress, first session, volume 1, is to be found Mr. Adams's report. I ask the Secretary to read a portion.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

The power of expelling a member must, in its nature, be discretionary, and in its exercise always more summary than the tardy process of judicial tribunals.

The power of expelling a member for misconduct results, on the principles of common sense, from the interest of the nation, that the high trust of legislation should be invested in pure hands. When the trust is elective, it is not to be presumed that the constituent body will commit the deposit to the keeping of worthless characters. But when a man whom his fellow-citizens have honored with their confidence, on the pledge of a spotless reputation, has degraded himself by the commission of infamous crimes, which become suddenly and unexpectedly revealed to the world, defective indeed would be that institution which should be impotent to discard from its bosom the contagion of such a member; which should have no remedy of amputation to apply until the poison had reached the heart.

Mr. CHANDLER. I also ask the Secretary to read what appears in two other places.

The Secretary read, as follows:

Those two articles were in substance borrowed from similar regulations contained in that justly celebrated statute, which for so many ages has been distinguished by the name of the Great Charter of England. Yet, in that country, where they are recognized as the most solid foundations of the liberties of the nation, they have never been considered as interfering with the power of expelling a member, exercised at all times by the House of Commons; a power which there, however, rests only upon parliamentary usage, and has never been bestowed, as in the Constitution of the United States, by any act of supreme legislation. From a number of precedents which have been consulted, it is found that the exercise of this authority there has always been discretionary, and its process always far otherwise than compendious in the prosecutions before the judicial courts.

So far, indeed, have they been from supposing a conviction at law necessary to precede a vote of expulsion that, in one instance, a resolution to demand a prosecution appears immediately after the adoption of the resolution to expel. In numerous cases the member submits to examination, adduces evidence in his favor, and has evidence produced against him, with or without formal authentication; and the discretion of the House is not even restricted by the necessary concurrence of more than a bare majority of the votes.

The provision in our Constitution which forbids the expulsion of a member by an ordinary majority, and requires for this act of rigorous and painful duty the assent of two-thirds, your committee consider as a wise and sufficient guard against the possible abuse of this legislative discretion. In times of heat and violent party spirit, the rights of the minority might not always be duly respected, if a majority could expel their members under no other control than that of their own discretion. The operation of this rule is of great efficacy, both over the proceedings of the whole body and over the conduct of every individual member.

The times when the most violent struggles of contending parties occur—when the conflict of opposite passions is most prone to excess—are precisely the times when the numbers are most equally divided; when the majority amounts to the proportion to two-thirds, the security in its own strength is of itself a guard against extraordinary stretches of power; when the minority dwindles to the proportion of one-third, its consciousness of weakness

dissuades from any attempts to encroach upon the rights of the majority, which might provoke retaliation. But if expulsion were admissible only as a sequel to the issue of a legal prosecution, or upon the same principles and forms of testimony which are established in the criminal courts, your committee can see no possible reason why it should be rendered still more imbecile by the requisition of two-thirds to give it effect.

Mr. CHANDLER. There is much in this report of Mr. Adams that would be useful in this discussion, but I forbear from making any additional quotations.

Mr. Hillhouse, on page 270, in discussing the Smith case states the true doctrine in reference to expulsion in the following language:

That the constitutional authority of the Senate to expel a member is not the jurisdiction of a court instituted for the trial and punishment of crimes, but a political power, to be exercised only when necessary for preserving the purity of this branch of the Legislature, is evident from the consideration that it does not exempt a person from the liability to be tried and punished by the criminal tribunals of the country.

The vote to expel Smith was, in April, 1808—yeas 19, nays 10. He failed of expulsion through the lack of one more vote in its favor.

O. B. MATTESON'S CASE.

The next case to which I call the attention of the Senate is that of O. B. Matteson, in 1857. It is briefly stated in McCrary on Elections, page 394, section 522. Mr. Matteson, while a member of Congress, had written letters in which he expressed the opinion that it would be impossible to secure the passage of certain legislation unless money was spent for that purpose. McCrary says:

The question was again raised in the case of Matteson in the Thirty-fifth Congress. The charges against Mr. Matteson had been preferred in the previous Congress, and a committee of investigation had reported against him, recommending his expulsion. Pending these resolutions he had resigned, having, however, at the time of his resignation been reëlected. When he took his seat in the new Congress by virtue of such reëlection the charges were renewed. A majority of the committee reported adversely to the jurisdiction of the House. In the report, as well as in the debate, the want of jurisdiction was based upon various grounds, and among them upon the ground that the offense was committed prior to the election of the accused member. After a long debate the whole subject was laid upon the table, so that it can not be said that the question was authoritatively determined one way or the other.

MR. BRIGHT'S CASE.

The fullest American debate which I conceive to be strictly pertinent to the present case is that which took place on the expulsion of Mr. Bright, of Indiana. It is to be found reported in Taft's Election Cases, 217, and also in the Globe of the second session of the Thirty-seventh Congress. Mr. Bright had written a letter, dated March 1, 1861, while he was Senator, to Jefferson Davis, introducing Thomas B. Lincoln, of Texas, "to dispose of what he regards as a great improvement in firearms," and this was treated as an act of disloyalty. There was an explanatory letter of September 7, 1861. The Judiciary Committee reported favorably to Mr. Bright on the 13th day of January, 1862, page 287 of the Globe, but on February 5, 1862, after a full debate, he was expelled by a vote of 32 to 14.

I desire to call to the attention of the Senate and put upon record some extracts from that debate. Mr. Garrett Davis, of Kentucky, took a leading part in advocating the expulsion. On January 22, 1862, he says, page 434:

But what is the law? We are not sitting as a court trying the honorable Senator. There are some gentlemen, able men, very able men, too; men of enlarged patriotism, of eminent public and private virtue, that have pursued the profession of the law so long, either as practitioners, counsellors, and solicitors, or as judges, that their minds become too contracted for enlarged statesmanship and the great principles of policy and of moral justice upon which governments ought to be administered and upon which alone they can be wisely administered. They have dwarfed their minds to such an extent that they can not reason on the expansive principle and sentiment and consideration that ought to guide and to control the largest and the wisest statesmanship.

There is no law which defines any particular class of offenses that shall be sufficient to expel a Senator from his seat. The common law does not; there is no statute law that does. There are no laws of evidence establishing technically the rules of testimony that are to guide and control and govern this body in getting its lights and reaching its conclusions when a Senator is thus on trial.

The general rule and principle of law and of reason and common sense is, that whatever disqualifies a member of the Senate from the proper discharge of his duties, whatever it may be, is sufficient, and ought to be held sufficient, for his expulsion; and whatever evidence satisfies the mind reasonably, and according to moral certainty and truth of the existence of that cause, is sufficient evidence, without resort to the technical rules of testimony upon which to convict him. That is the law of this country; it is the law of England; it is the law of Parliament.

Mr. Davis then proceeds to read from Story on the Constitution, and from Mr. Rawle's work on the Constitution, where Mr. Rawle says:

It seems, therefore, to be settled by the Senate upon full deliberation, that expulsion may be for any misdemeanor which, though not punishable by any statute, is inconsistent with the trust and duty of a Senator.

After this quotation from Mr. Rawle, Mr. Davis proceeds:

There is the touchstone: any conduct, any opinions, any line of action as a Senator which is inconsistent with the duty of a Senator, is a sufficient cause for his expulsion, and ought to be by the rules of reason and of common sense.

Mr. Davis then reads from Story on the Constitution several paragraphs, one concluding as follows:

The power to expel a member is not in the British House of Commons confined to offenses committed by the party as a member, or during the session of Parliament; but it extends to all cases where the offense is such as, in the judgment of the House, unfits him for parliamentary duties.

Mr. Davis then says:

That is the standard; and a just and a reasonable and a common-sense standard it is. Whenever a member of this House forms opinions, and in his official character and acts carries out those opinions, positively or negatively, in such a manner as to render him an unfit and unsafe member of the Senate, he becomes a proper subject of removal from the body.

Mr. Davis, after reading further from the report of Mr. John Quincy Adams in the Smith case, makes a remark which I will ask the Secretary to read, on page 435.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

Mr. President, these authorities prove conclusively that we are bound now, in giving our judgment in this case, by no positive principle of law. There is and can be no controversy as to the proofs in the cause, and therefore I will make no remark on the law of testimony that would apply to the case if there was any such controversy.

The principle deduced from the authorities is this: There is no common law, no statutory law, there is no parliamentary law, that binds the Senate to any particular definition of crime or offense in acting in this or any other case of the kind. On the contrary, as these authorities establish, it is a matter coming within the discretion of the tribunal trying the Senator. They establish this general principle, but where the evidence makes out a case against him which, in the judgment of the triers, unfits him for his parliamentary duties, it is their duty to expel him.

Again, on page 541, Senator Davis, replying to Mr. Saulsbury, who had undertaken to answer Mr. Davis's argument, says:

The gentleman garbles Justice Story. He does not limit the cause of expulsion as the gentleman makes him limit it in his remarks. He says, in plain and distinct terms, that anything which renders a member of a deliberative body unfit to act as a member of that body, or that may be adjudged to be so by the body itself, is sufficient cause for his removal by expulsion. I do not quote his words, but that is the idea.

Mr. SAULSBURY. Mr. President, I took the extract from the printed speech of the Senator himself. If there is any garbling of it, it is in the speech.

Mr. DAVIS. Will the gentleman allow me a moment again?

Mr. SAULSBURY. I do not mean to misrepresent the Senator; I took it from the printed speech.

Mr. DAVIS. I did not quote and rely upon that authority as Judge Story has written it and as it has been printed. I do not know how I am reported in the papers; I have not revised or corrected any report of my sentiments or of my argument; but I say that I read the whole passage from Story's Commentaries upon the Constitution, and I relied upon the whole passage as it is printed. If the gentleman so states it, I agree to it; but the gentleman's argument only states a part of the premises upon which Judge Story predicates the right of the Senate to expel a member.

Mr. SAULSBURY. The point contained in the conclusion to which Judge Story comes, is that any misdemeanor which, in the judgment of the Senate, although it may not be punishable by a statute, renders a Senator unfit for his trust, may be a cause for expulsion; but the Senator does not lay down in precise language what I have quoted from his speech. The rule as laid down by him is, that any conduct, any opinion, any line of action which is inconsistent with the duty of a Senator, is ground for his expulsion. Such, at least, I understood his argument to be—I do not wish to misrepresent him.

Mr. DAVIS. I reassert that proposition now.

I ask the Secretary to read some further remarks of Mr. Davis, on page 543.

The Secretary read as follows:

Mr. President, that is only a portion of the ground that Story lays down, only a portion of the ground which I read from him, and only a portion of the ground on which I relied. You, sir, and the Senate will recollect distinctly that I assumed that in order to authorize the Senate to expel a member it was not necessary that that member should have committed any offense defined by law, either by common law or by statute law. You will recollect that I read at some considerable length from the authority of Mr. Adams's report in the case of Smith, and I also read at some considerable length from the report of the case of Blount, a member of the Senate from the State of Tennessee, who was expelled from this body; and I also read a collation of authorities from the British Houses of Parliament, as collated by Justice Story himself, that established this position: that it was a matter of justice and discretion, and rested wholly in the judgment and discretion of the body which was proceeding against one of its members for expulsion, whether the cause was sufficient or insufficient, and that all the authorities concurred in laying down the rule that where the principles and the conduct of the party proceeded against were such as to render it improper and unsafe that he should continue a member of the body, and his peers so considered the case as made out against him, they had the power, and it was their duty, to expel him. I do not quote the exact words, but state the substance.

Mr. HARRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Tennessee?

Mr. CHANDLER. Certainly.

Mr. HARRIS. I inquire of the Senator from New Hampshire if the authority he reads refers to a charge of offenses committed prior to election to the Senate or offenses committed by a Senator. The extract read says that Blount was expelled, when upon the contrary Blount was impeached. This body sitting as a high court of impeachment, held that Blount was not an officer of the United States, but an officer of the State of Tennessee.

Mr. CHANDLER. Senator Blount had been expelled from the Senate.

Mr. HARRIS. Before the impeachment?

Mr. CHANDLER. Yes, sir.

Mr. HARRIS. Expelled from the Senate before?

Mr. CHANDLER. Yes, Mr. President, and the House of Representatives undertook afterwards to impeach him.

Mr. HARRIS. That is a matter of history with which I am not familiar, if it be true. Mr. Blount was impeached as a Senator by the House of Representatives. He was tried here, and it was solemnly decided by this body that he was not an officer of the United States and not impeachable.

Mr. CHANDLER. Having been expelled.

Mr. HARRIS. No, no. I want the record produced which shows that he had been expelled. I have seen no such record, and I do not believe any such statement is true.

Mr. CHANDLER. The Senator from Tennessee is confused in two respects. In the first place, Senator Blount was expelled and the question was afterwards decided by the Senate whether he should be impeached notwithstanding his expulsion. Secondly, the debate from which I am reading, as the Senator would have noticed if he had paid close attention, is the debate on the expulsion of Jesse D. Bright.

Now, I will answer the question which I supposed the Senator asked me. Mr. Bright's offense was committed while he was a Senator. It was a question of the treasonable character of a letter which he had written as a Senator. But I am reading from the debate the doctrine as to the right of expulsion of Senators which was expounded by Mr. Garrett Davis, a Senator, in debating the Bright case.

Mr. HOAR. Will my honorable friend allow me to read three lines which are the head note of the Blount case in Taft's report?

Mr. CHANDLER. Certainly.

Mr. HOAR. It will answer the question of the Senator from Tennessee. I read the head note made by Mr. Taft, quite a careful person I think, in the Blount case. It is in Taft's Senate Election Cases, published as a document, page 74:

* Mr. Blount was expelled from the Senate on July 8, 1797, as "having been guilty of a high misdemeanor." An account of his impeachment, which was a proceeding distinct from the expulsion case here given, is found in the Annals of Congress, Fifth Congress, first and second sessions, vol. 1, 1797–1798, within pages 39 to 45, and Annals of Congress, second and third sessions, vol. 2, 1798–1799, pages 2245 to 2416. The decision in the impeachment trial was that "the court ought not to hold jurisdiction of the said impeachment, and that the said impeachment is dismissed," the grounds on which the decision rested not being given.

If I may add only one word, I studied the Blount case very carefully when I acted for the House of Representatives in the impeachment of Belknap; and I think any Senator who will study it will see that it is not accurate to say that the prevailing opinion when that impeachment case was dismissed was that a Senator of the United States is not an officer of the United States.

Mr. PLATT. A civil officer.

Mr. HOAR. A civil officer of the United States, of course. For many purposes I think it is settled he is; for instance, in regard to various statutes which prohibit civil officers from doing so and so, the statute which prohibits a Senator from holding any other office, and so on. But the decision was that he was not an impeachable officer, and what seemed to me the prevailing ground from what I could find was, that the Senate having the power of expulsion committed to it by a direct, affirmative, and explicit provision of the Constitution, it could not be supposed that it was intended to commit to the House of Representatives the right to come in here and put on trial a Senator of the United States by its process of impeachment, and compel us to try, with them as plaintiff, a question which was committed to our sole and absolute jurisdiction under the expulsion clause.

Mr. HARRIS. Still the question as to whether he was an impeachable officer of the United States was involved in the impeachment, if I understand the case.

Mr. HOAR. I think so, but he was expelled first, and then they undertook to impeach him.

Mr. HARRIS. Very well; and it was decided by the Senate that he was not an impeachable officer because he was not an officer of the United States.

Mr. HOAR. But if the Senator will pardon me——

Mr. HARRIS. However, what I wanted to emphasize and call to the attention of the Senator from New Hampshire is this: Of course all of us admit that a Senator is amenable and answerable to the Senate for his conduct while he is a member of this body, but whether we can trace him from his cradle to the time he reaches this body is a very different, a very much broader, and, I may say, a very much more absurd question to be suggested.

Mr. VOORHEES. If it will not interfere with the discussion——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Indiana?

Mr. CHANDLER. I am entirely willing to yield for an inquiry or an incidental point, but not for a long speech.

Mr. VOORHEES. No, no; no speech at all; but I want to settle this question. The Senator from Tennessee is right upon the question of doctrine and principle. As to the question of Mr. Blount's expulsion or his resignation it is a matter of no consequence. I read the plea that had been interposed through his counsel. Jared Ingersoll and A. J. Dallas appeared for him, and the plea, which set up the principle which governs this whole thing and makes it of value, is in these words:

That although true it is that he, the said William Blount, was a Senator of the United States, from the State of Tennessee at the several periods in the said articles of impeachment referred to; yet, that he, the said William, is not now a Senator, and is not, nor was at the several periods so as aforesaid referred to, an officer of the United States; nor is he, the said William, in and by the said articles, charged with having committed any crime or misdemeanor in the execution of any civil office held under the United States, or with any malconduct in civil office, or abuse of any public trust in the execution thereof.

Although he was charged with the offenses imputed to him while he was a Senator, the plea traverses the question of his being an officer of the Government at all, and on that plea, after elaborate, imposing, and instructive debate, the Senate decided, in 1799, that he was not an officer of the Federal Government. The contention was stated by Mr. Dallas for the defendant in the following words:

1. That only civil officers of the United States are impeachable; and that the offenses for which an impeachment lies must be committed in the execution of a public office.

2. That a Senator is not a civil officer, impeachable within the meaning of the Constitution; and that in the present instance no crime or misdemeanor is charged to have been committed by William Blount in the character of a Senator.

Mr. CHANDLER. Therefore the facts in the Blount case have not much bearing upon the right of the Senate to expel a Senator. The Senator was expelled by a vote of 25 to 1 for acts done while he was a Senator. Subsequently it was decided that he was not impeachable, whether on the ground that he had ceased to be a Senator, or on the ground that a Senator is not a civil officer of the United States and subject to impeachment, the decision does not accurately show. That I understand is the Blount case.

Mr. PLATT. He was expelled on the 8th day of July, and on the same day the House of Representatives inaugurated impeachment proceedings and brought the case again before the Senate for trial.

Mr. CHANDLER. I believe the Senator from Connecticut is right. On the very day on which the Senate expelled him by a vote of 25 to 1 the House of Representatives undertook to impeach him and to have him tried before the Senate for his alleged crime.

When the Senator from Tennessee interrupted me to bring the attention of the Senate to the case of Blount, I was reading from the speech of Senator Garrett Davis in the Bright case, and I had nearly finished my quotations from that Senator. There is, however, one more, and this is it, near the conclusion of his speech:

I say this is the law of Parliament; and as it is the law it ought to be enforced: Whenever a gentleman by his opinions, and those opinions are connected with his official conduct, shows that he is an improper person to be in the Senate of the United States, he ought to be expelled from it.

That extract I do not read for the purpose of implying that I go as far as Mr. Davis did, but I read it in order to show, as I have done by these repeated extracts, exactly how far Senator Garrett Davis, of Kentucky, was willing to go in the Bright case.

Next I read from the remarks in that debate of Senator Daniel Clark, from my own State (page 475):

Here, Mr. President, let me say that I do not agree with the opinion which seems to be entertained by some and which I have heard expressed, that the facts, in order to expel the Senator, must constitute the crime of treason. This point has been met and successfully refuted, both by the Senator from Massachusetts—

That was Mr. Sumner—

and the Senator from Kentucky.

That was Mr. Garrett Davis.

The Constitution gives to each House of Congress the largest discretion in the premises. It specifies no crime, no misdemeanor, no fault, no particular act for which a Senator may be expelled. It simply requires the vote of two-thirds—the same number, no more and no less—which it requires in each House to make an act which has been vetoed a law over the head of the President.

To expel a Senator is undoubtedly, as has been well said, a grave act. It involves not only the right and the reputation of the sitting member, but the interests and rights of the State whose representative he is. But the Constitution contemplates that it may become sometimes necessary, and wisely leaves the body to judge of the necessity which demands it, securing to the offender a vote of two to one before he can be expelled. For acts constituting a crime for which a Senator may be arraigned, tried, and convicted, he may be expelled. So, too, for a misdemeanor, for acts unworthy of and unbecoming a Senator, and disreputable and disgraceful to the body;

and so, too, for such acts as in times of great danger to the Government give evidence to his peers that he is a dangerous and unsafe man to be trusted with the responsibilities of his position, such as giving aid to rebellion or sympathizing actively with traitors.

Next, I read from the remarks of Senator Andrew Johnson, of Tennessee, and we will see what his views were at that time as to the power of expulsion under the Constitution (page 584):

Mr. President, I hold that under the Constitution of the United States we clearly have the power to expel a member, and that, too, without our assuming the character of a judicial body. It is not necessary to have articles of impeachment preferred by the other House; it is not necessary to organize ourselves into a court for the purpose of trial, but the principle is broad and clear, inherent in the very organization of the body itself, that we have the power and the right to expel any member from the Senate whenever we deem that the public interests are unsafe in his hands, and that he is unfit to be a member of the body.

Again Senator Johnson says:

Mr. President, suppose Aaron Burr had been a Senator, and after his acquittal he had come back here to take his seat in the Senate, what would have been done? According to the doctrine avowed in this debate, that we must sit as a court and subject the individual to all the rules and technicalities of criminal proceedings, could he have been expelled? And yet is there a Senator here who would have voted to allow Aaron Burr to take a seat in the Senate after his acquittal by a court and jury? No; there is not a Senator here who would have done it.

From Senator Browning I now read (page 623):

From a careful examination of the constitutional provision upon the subject of expulsion I am fully satisfied that it is not necessary, in the exercise of the power of expulsion by the Senate, that the Senator proceeded against should have been guilty of any offense for which he would be subject to indictment, trial, conviction, and punishment. Such seem to be the precedents also that the Senate has not been confined to so narrow a range in its action upon questions of this character. If, for instance, it were certain that there were in our midst a man of disloyal and treasonable sentiments to the Government, who had yet been guilty of no overt act of treason for which he could be proceeded against criminally, I think there can be no question that it would be a proper exercise of the power vested in the Senate of expulsion to expel him for that cause, although he would not be subject to animadversion by the criminal laws of the country.

Indeed, I believe the power of expulsion is the only power of protection the Senate possesses in regard to its members

Senator McDougall, of California, on page 655, stated quite clearly what his views were as to the character of the constitutional right of expulsion:

I do not understand that, sitting here as a Senate, we have to work by the terms and rules that govern justices of the peace, county judges, judges of the circuit court, or judges of the Supreme Court, or judges anywhere. We stand here to determine what is right for the Republic. I believe, and I say it here in the Senate, that we have—I will not say lost—almost lost the dignity that belongs to the Senate of a republican Government. It would be well for all of us if we could think that the Senate of the Republic of the United States was a great body where wise men undertook to sit in council. It is not appreciated or felt, but it would be a great thing for all of us if it were. I have thrown out here rather the expressions of my heart than the exact measure of my opinions.

Sir, I am astonished that the Senator, an able lawyer, one of the ablest lawyers that sits in this Hall, could engage in this discussion and put the question upon purely technical ground. I rose merely to say to him that this is not a question of treason or no treason. It is no question of law. We have not to ask whether the Senator from Indiana is guilty or not guilty. We have to judge him in our best judgment, and by that we try him; and we say "yea" or "nay" as we think, whether he be a true man or not to sit in the Federal councils to conduct the affairs of the nation.

B. F. WHITTEMORE'S CASE.

In 1870 the case of B. F. Whittemore came before the House of Representatives at the second session of the Forty-first Congress. Mr. Whittemore had been charged with selling his cadetships, and a report was made in favor of his expulsion February 21, 1870, page 1469 of the Globe. The report was made by the chairman, Gen. John A. Logan, and the committee state that they have—

come to the conclusion that in making appointments to the Military and Naval Academies from the district represented by him the said B. F. Whittemore has been influenced by improper pecuniary considerations. They therefore submit the accompanying resolution, and recommend its adoption.

The resolution was one of expulsion. On page 1544 it is recorded that on the 24th day of February, 1870, Mr. Whittemore resigned in order to avoid a vote upon the resolution of expulsion. The resignation being communicated to the Speaker, Mr. Whittemore, who undertook to speak, was not allowed to speak. Gen. Logan then offered a resolution as a question of privilege, declaring—

That B. F. Whittemore, late member from the First district of South Carolina, did make appointments to the Military Academy at West Point and the Naval Academy at Annapolis in violation of law, and that such appointments were influenced by pecuniary considerations, and that his conduct in the premises has been such as to show him unworthy of a seat in the House of Representatives, and is therefore condemned as conduct unworthy of a representative of the people.

Upon that resolution the yeas and nays were called, and there were 187 yeas and no votes in the negative. On page 4589 it appears that Mr. Whittemore's credentials were presented again at the same session, on the 18th day of June, 1870. The certificate of Gov. Scott was presented, showing that Mr. Whittemore had been reëlected to the House of Representatives.

Mr. PLATT. At a special election?

Mr. CHANDLER. At a special election held, I suppose, to fill the vacancy created by his resignation. Objection was made to his being sworn in, and Gen. Logan said:

It is merely a question whether this House, after having declared that this man was unworthy to hold a seat in the Forty-first Congress, will now repudiate its action, or whether it will stand by that which was justified by the moral sense of this House and of this country.

The case was considered again on the 21st of June, and Gen. Logan submitted a resolution reciting the proposition for expulsion which was pending when Mr. Whittemore resigned, and the resolution which the House had adopted after his expulsion, stating him to be unworthy of a seat in the House of Representatives, and the fact of his reëlection, and the presentation of his credentials, and resolving—

That the House of Representatives decline to allow said B. F. Whittemore to be sworn as a Representative in the Forty-first Congress, and direct that his credentials be returned to him.

The Secretary will kindly read extracts from Mr. Logan's speech, on pages 4670 and 4671.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

It is said that a constituency have the right to elect such a member as they may think proper. I say no. We can not say that he shall be of a certain politics, or of a certain religion, or anything of that kind; but, sir, we have the right to say that he shall not be a man of infamous character. He is not merely a representative of the constituents who elect him, but his vote in this House is a vote for the whole nation. It is a vote for the people of the whole country, and every district of the United States has the same interest in his vote that his own district has. Hence, if Congress shall not have the power or authority or shall not have the right to exclude a man of that kind, then the rights of the people of the whole country may be destroyed by a district sending a Representative who may be obtained to vote in a manner which may be destructive of the rights of the people. Are we to be told that Congress has no right to prevent anything of this kind because of the right of any constituency to send whomsoever they may please?

* * * * * * *

It is not that the people shall not be represented. Not at all. It is this: That the people of the country have no right to destroy their own liberties by filling Congress with men who, from their conduct, show themselves capable of the destruction of the Government.

* * * * * * * * *

Congress, being the representatives of the whole people, are entitled to say that the rights of the whole country shall not be destroyed by one or more districts throwing in here a man or a set of men capable of their destruction; and that, having knowledge of the facts, and the power to prevent the mischief by exercising the power of exclusion, they have a right to exercise that power, and thereby to protect the interest of the country, and to preserve instead of to destroy the right of representation.

* * * * * * * *

For crime, sir, we have a right to proscribe a man. That is the ground I put it on. That is the ground on which I put it at first and the ground on which I put it now. We have a right, I say, to protect the interests of the people of this country by excluding men from these Halls on the ground of crime. It is not a crime to be Democrat or a Republican, to be a Presbyterian or a Methodist, or a member of any other denomination; but, sir, it is a crime for a man to do what this man has done. And why? Because the laws of our country denominate it a crime. It is made a crime by law. Hence my theory is based on the law, and is this, that in pursuance of the law and in carrying out its principles we must protect the country by protecting ourselves against crime and against criminals in this body. That is the ground I took and the theory I stated.

Mr. CULLOM. Whose language is that?

Mr. CHANDLER. Gen. Logan's, in debating the question of allowing Mr. Whittemore to be sworn in on his new credentials. The resolution offered by Gen. Logan, which I have read, was adopted, and Mr. Whittemore was refused his seat.

THE CRÉDIT MOBILIER CASES.

The point which is now before the Senate was fully discussed in what is known as the Crédit Mobilier cases in 1873, although the precise question as to the right of the House to expel a member for an act done when not a member was not directly before the House of Representatives. I have in my hand House report No. 77, Forty-second Congress, third session, the report covering the Crédit Mobilier investigation, submitted by Mr. Poland, of Vermont, where the argument is stated with directness and force that the right exists to expel a member for any cause deemed sufficient by the legislative body. I will ask the Secretary to read from the Poland report, on pages 15 and 16.

The Secretary read as follows:

None of the commentators upon the Constitution or upon parliamentary law assign any such limitation as to the time of the commission of the offense, or the nature of it, which shall control and limit the power of the expulsion. On the contrary, they all assert that the power in its very nature is a discretionary one, to be exercised of course with grave circumspection at all times, and only for good cause. Story, Kent, and Sergeant all seem to accept and rely upon the exposition of Mr. Adams in the Smith case as sound. May, in his Parliamentary Practice, page 59, enumerates the causes for expulsion from Parliament, but he nowhere intimates that the offense must have been committed subsequent to the election.

When it is remembered that the framers of our Constitution were familiar with the parliamentary law of England, and must have had in mind the then recent contest over Wilkes's case, it is impossible to conclude that they meant to limit the discretion of the Houses as to the causes of expulsion. It is a received principle of construction that the Constitution is to be interpreted according to the known rules of law at the time of its adoption, and therefore when we find them dealing with a recognized subject of legislative authority, and while studiously qualifying and restricting the manner of its

exercise, assigning no limitations to the subject-matter itself, they must be assumed to have intended to leave that to be determined according to established principles as a high prerogative power to be exercised according to the sound discretion of the body.

It was not to be apprehended that two-thirds of the representatives of the people would ever exercise this power in any capricious or arbitrary manner, or trifle with or trample upon constitutional rights. At the same time it could not be foreseen what necessities for self-preservation or self-purification might arise in the legislative body. Therefore it was that they did not, and would not, undertake to limit or define the boundaries of those necessities.

* * * * * * *

The case of Matteson, in the House of Representatives, has also often been quoted as a precedent for this limitation of jurisdiction. In the proceedings and debates of the House upon that case it will be seen that this was one among many grounds taken in the debate; but as the whole subject was ended by being laid on the table it is quite impossible to say what was decided by the House. It appeared, however, in that case that the charge against Matteson had become public, and his letter upon which the whole charge rested had been published and circulated through his district during the canvass preceding his election. This fact, we judge, had a most important influence in determining the action of the House in his case.

Mr. CHANDLER. This report of Mr. Poland from the Crédit Mobilier Committee was answered, or an attempt was made to answer it, by another committee of the House of Representatives. The Committee on the Judiciary had been directed to examine "the testimony taken by the committee of this House of which Mr. Poland, of Vermont, is chairman," and "to inquire whether anything in such testimony warrants articles of impeachment of any officer of the United States not a member of this House, or makes it proper that further investigation should be ordered in his case."

The chairman of the Judiciary Committee at that time was Mr. Bingham, but the report was made by Gen. Benjamin F. Butler. Although the directions limited the inquiry to the question whether an officer of the United States not a member of the House could be impeached, the report of the committee, which was undoubtedly drawn up by Gen. Butler and was submitted by him, goes out of the way to argue against the propositions of the Poland report. I read the point of Gen. Butler's argument:

But your committee are constrained to believe that the power of expelling a member for some alleged crime, committed it may be years before his election, is not within the constitutional prerogative of the House.

Gen. Butler goes on through many pages with his argument that the power to expel can only be exercised for offenses committed while the person is a member of the body. It is wholly based upon the assumed danger that a two-thirds majority in a legislative body will sometimes unjustly exercise its power of expulsion upon the pretense of necessary purgation, that there will sometimes be a harsh and cruel and extreme exercise of that power.

THE PACIFIC MAIL SUBSIDY INQUIRY.

There is further argument from the House of Representatives concerning the power of expulsion, to be derived from the two reports in connection with the Pacific mail subsidy investigation. In the CONGRESSIONAL RECORD for the Forty-fourth Congress, first session, on pages 5370 and 5371, are two reports from the Committee on the Judiciary.

Mr. Lynde, from the Committee on the Judiciary, reported that—

The results of the evidence are that about $900,000 was disbursed upon the allegation that it was used in aid of the passage of the act now under investigation; that about $565,000 appears to have been paid to the exclusive use of persons having no official connection with such legislation; and that the disposition of the remaining $335,000 remains in doubt upon the evidence presented, but without any testimony showing that it was a reward paid to any person at that time a member of either House of Congress; and that the uncertainty attending the disposition of this latter sum is owing to the refusal of William S. King—

Who had been Postmaster of the House—

to testify the truth, and to the failure or refusal of John G. Schumaker—

Who had been a member of the House—

to present all the facts which the committee believe it was in his power to give.

The committee, therefore, recommend that all the testimony be sent to the District attorney of this District for prosecution, in order that the crime committed may be prosecuted.

The committee proceed to refer to the Humphrey Marshall case of 1797, and to repeat the opinion there stated, as follows:

Your committee are of opinion that the House of Representatives has no authority to take jurisdiction of violations of law or offenses committed against a previous Congress.

The present Senator from Maine [Mr. FRYE] was a member of that committee, and, it was understood, joined in the majority report. There was, however, submitted the views of the minority, signed by Scott Lord, William Lawrence, GEORGE F. HOAR, B. G. Caulfield, and also by George W. McCrary; and the minority of the committee argue the other way. They quote the power given by the Constitution to expel a member and say:

It will be seen that there are no words of limitation on the power to expel, which seems to have been left to the good sense and discretion of each House; in other words, does not the Constitution refer rather to the fitness of the member to hold the office, resting on considerations of public justice and policy, than to the time of his election? Yet the undersigned do not deny but that there are limitations on the power of this House arising from the circumstances of particular cases and the relations of this House to the constituency of an accused member; therefore, as will be seen, the undersigned need not go further in this case than to assert jurisdiction, because the offenses complained of were not known to the constituents of the members in question until after their election.

SENATOR GROVER'S CASE.

The attention of the Senate I now ask to cases where the Senate has made investigations into the conduct of Senators before they were elected. In Taft's Election Cases, pages 606, is the case of Senator Grover, of Oregon. Objections were made to his right to his seat on account of his action in connection with the previous Presidential election. In this case the accused Senator asked for and moved a resolution of investigation. The following is the resolution submitted by Mr. Grover:

Resolved, That the thirteen memorials heretofore presented to the Senate by Hon. J. H. MITCHELL, purporting to be signed by 339 citizens of the State of Oregon, reciting that it was currently reported and generally believed that the election of L. F. Grover as a Senator of the United States was procured by bribery, corruption, and other unlawful means in the Legislature of the State of Oregon, and that the said L. F. Grover did corruptly and fraudulently issue a certificate of election to one E. A. Cronin as a Presidential elector on December 6, 1876, and that the said L. F. Grover did bear false witness before the Senate Committee on Privileges and Elections, on or about January 6, 1877, be now referred to the Committee on Privileges and Elections, who shall thoroughly investigate and report upon the foregoing charges, with power to send for persons and papers.

The allegation was twofold, corruption in securing his election and corrupt and improper conduct as governor, before he was Senator, in connection with the Presidential election of 1876. At his own request jurisdiction was taken. An investigation was made, and a report was submitted which acquitted Mr. Grover of all wrong in either connection.

SENATOR CLAYTON'S CASE.

A similar investigation took place in the case of Senator Powell Clayton, which is to be found on page 386 of Taft's Election Cases. The committee were instructed to investigate the conduct of Mr. Clayton while he was governor in connection with the issue of certificates to members of the Arkansas Legislature. A full investigation was made of all transactions, and a majority of the committee reported that Senator Clayton was guilty of no wrong.

The investigation, it should be stated, was also extended to the methods by which Senator Clayton was alleged to have procured his election, and there was an attempt to connect his conduct as governor with his conduct in reference to his election as Senator.

SENATOR MATTHEWS'S CASE.

Senator Stanley Matthews was investigated on his own request. The case is to be found on page 615 of Taft's Election Cases. June 5, 1878, Mr. Matthews submitted the following resolution:

Resolved, That a select committee of seven Senators be appointed to inquire into and consider all things touching the matter stated and referred to by the Senator from Ohio [Mr. Matthews] and the events connected therewith, and particularly what connection, if any, that Senator had with any real or pretended frauds or other wrongs committed in the conduct and returns of the election in the State of Louisiana in 1876, and with any promises of protection or reward, if any, made by anyone to one James E. Anderson, or others, in consideration of, or connection with, any official conduct by said Anderson or others, in relation to said election or the returns thereof; and into all the circumstances of any recommendation by the said Senator of the said Anderson for appointment to office; and that said committee have power to send for persons and papers, to employ a clerk and stenographer, and have leave to sit during the recess.

All the transactions in connection with the Presidential election in Louisiana in 1876 took place before Mr. Matthews was elected Senator. He was elected in March, 1877, to take the place of the present senior Senator from Ohio [Mr. SHERMAN], who had entered the Cabinet of President Hayes. A report was made by the committee acquitting Mr. Matthews of all improper conduct.

SENATOR HENRY M. RICE'S CASE.

The case of Henry M. Rice, of Minnesota, is to be found in Taft's Election Cases, on page 193. On May 12, 1858, Mr. Rice was sworn in upon his credentials as the first Senator from Minnesota. Mr. Harlan, of Iowa, submitted the following resolution for consideration:

Whereas the settlers on Fort Crawford reservation, in the State of Iowa, allege that they have been defrauded by Mr. Henry M. Rice, as agent of Hon. John B. Floyd, Secretary of War, in the sale of their claims as settlers on said reservation—

Then reciting the particular case of fraud of which Mr. Rice, as agent of the Secretary of War, had been charged with being guilty, and concluding with a resolution that a committee be appointed to make an investigation. Two days later, Friday, May 14, Mr. Rice himself submitted the following resolution:

Resolved, That a select committee, to consist of five members, be appointed to investigate the charges preferred by certain citizens of Iowa, settlers upon the Fort Crawford reserve, as to the conduct of Henry M. Rice, special agent, appointed by the Secretary of War, to superintend the sale of that reserve; that said committee have power to send for persons and papers and to report by bill or otherwise.

The next day in a modified form the resolution was adopted by the Senate. This investigation was made into the conduct of Mr. Rice long before he was a Senator, and the committee found nothing in the developments which in their opinion tended to disqualify him for a seat in the Senate.

Mr. McCrary, in his work on elections, after discussing many of the cases which I have recited, reaches a conclusion as to the American law—having stated that in the Crédit Mobilier case the preamble of the resolutions was voted down by a vote of 98 yeas to 113 nays—as follows:

Thus the House decided to sustain the doctrine contended for by the special committee—

That was the doctrine stated by the Poland report—

and against the doctrine laid down in the above-mentioned report from the Committee on the Judiciary. It may, therefore, be said that the House has fairly decided the question, and has held that a member may be expelled or punished for offenses committed prior to his election, especially if those offenses were unknown to his constituents at the time of his election. It will of course occur to every one that this is a power which should be exercised with great circumspection and moderation, and with a due regard to the rights both of constituencies and of individual members of Congress.

Mr. President, I know I have taken too much of the time of the Senate in bringing the precedents in England and in this country to the notice of Senators. I believe upon all these precedents that it can not be fairly contended that it is a principle of American constitutional law that under no circumstances shall there be an investigation into the conduct of members committed before their election to Congress.

I come, therefore, to the question, what are the facts which require the passage of the resolution now before the Senate? It is not my purpose to spread those facts at length upon the record. I refrain from making as full a statement as I should have done if it had not been for the request of the Senator from North Dakota, made this morning, that there should be an investigation of his case. I should refrain from making any statement whatever as to the facts, in view of the Senator's request, were it not that we have been notified by Senators upon the other side of the Chamber that notwithstanding his request this case is not to be investigated.

Those Senators have the majority; they have reached that determination; such will be the vote, and there will be no inquiry; but, Mr. President, I do not believe that this Senate will ever put itself upon record as making a declaration of the constitutional principle that there is no power under any circumstances to investigate the conduct of a Senator before his election as a Senator.

The facts in relation to Mr. ROACH are to be found, in the first place, in the New York Recorder of March 14, 1893. The same facts are stated in the Philadelphia Press of March 15, 1893. The facts narrated in those two newspapers are taken from an interview in the Evening Star of August 15, 1879, with Mr. J. A. J. Creswell, then president of the Citizens' National Bank, of Washington, D. C. There is an interview in the Recorder with Mr. Jacob Tome, an owner of two-thirds of the stock in the bank, which corroborates the statements made in that paper.

There is also contained in the Recorder an interview with Mr. Thomas C. Pearsall, who succeeded Mr. ROACH as cashier of the Citizens' National Bank, and he confirms the narrative.

Moreover, the facts are to be found upon the records of the Government in the office of the Comptroller of the Currency, in the reports made by the Citizens' National Bank to that officer. Further, there have been published in the newspapers interviews with the Senator from North Dakota [Mr. ROACH]. There is an interview in the Recorder and also one in the New York Sun of March 21, 1893. In the Recorder interview the Senator from North Dakota first said he had nothing to say; later he said he remembered the Creswell interview in the Star, but had forgotten the details; that if he had had any controversy with the bank it had all been settled. Then the following questions and answers appear:

"It is stated that the larger part of the money taken was returned to the bank?"
"Yes, I believe it was."
"Has it all been returned?"
"I think so; but it was a long time ago, and I can not say positively."
"No indictment was ever brought?"
"No; there was never any attempt to prosecute."

The New York World of March 15, 1893, has a half-column interview with the Senator from North Dakota, where he says nothing pertinent to the issue presented by the resolution of the Senator from Massachusetts, except that he has not been a fugitive from justice, and that the printed story is "full of absurdities and extravagancies." There is no other denial.

The New York Sun is, I suppose, recognized as a Democratic paper, friendly to the Democratic party, to the majority upon this floor, and to the present Administration, and in an editorial in this Democratic paper, the Sun, of Tuesday, March 21, 1893, all the facts in reference to the Senator from North Dakota are reiterated, and the question whether or not he ought to hold his seat in the Senate is discussed.

Mr. President, there is this further fact, which I think ought to be stated in justice to the mover of the resolution, the Senator from Massachusetts [Mr. HOAR], and to the other Senators on this side of the Chamber, that the Senator from North Dakota received a suggestion from his colleague a long time ago that he should make a statement upon the subject, and he replied that it was his own judgment that he ought to do so, but that he was guided in refraining by the advice of Democratic Senators.

So it appears that we received no light upon this subject, as has usually been the case when charges have been made against a Senator or against a public official, by a statement from the person accused; the mouth of the person accused was stopped and he was prevented from making a statement to the Senate which, if made, might have rendered it wholly unnecessary to bring this subject to the attention of the Senate.

It remains to be considered whether, if the facts recited in the resolution, and which are of public notoriety, and which are recorded upon the books of the Comptroller of the Currency, are true, the character of the offense is not amply sufficient to compel an investigation.

Mr. WHITE of Louisiana. Will it interrupt the Senator if I ask a question?

Mr. CHANDLER. Certainly not.

Mr. WHITE of Louisiana. Will the Senator state to me what the books of the Comptroller of the Currency show—what is on those books?

Mr. CHANDLER. If the Senator desires the particulars, I can inform him.

Mr. WHITE of Louisiana. Do those books connect the name of the Senator from North Dakota with this transaction in any way?

Mr. CHANDLER. The books of the Comptroller of the Currency, as I understand, show that the repeated reports from the bank carried along for months and years a large defalcation of the "late cashier."

Mr. WHITE of Louisiana. I am much obliged to the Senator.

Mr. CHANDLER. Inasmuch as the Senator has asked me the particulars——

Mr. WHITE of Louisiana. My inquiry is satisfied by the Senator's answer.

Mr. CHANDLER. I will take occasion to read from the New York Sun, not the full statement which is there contained, because I do not wish, and have not wished, to anticipate the facts, but this portion of the Sun's statement:

In October, 1879, the report of the Comptroller of the Currency presented the sworn statement of the officers of the Citizens' National Bank containing this item: "Defalcation of late cashier, $18,483.54."

And now I repeat: Not only has the mouth of the Senator himself been closed, but we have had no denial by any human being of the substantial truth of those newspaper statements. They have been before the public now for many weeks, and they have been of such a character that even if the Senator from North Dakota had not chosen to qualify them or deny them, qualification or denial would have been uttered from some quarter; but from no quarter down to this hour has there been any denial of the substantial correctness of the charges made in the New York Sun and other newspapers.

I ask, again, are not these facts sufficient to require an investigation by the Senate if they are to be taken as true? Here is a grave breach of trust alleged; here is a large embezzlement alleged upon the part of an officer of a national bank.

Mr. President, I believe that if there is any one thing which is necessary to the prosperity of this country it is that breaches of trust should be inexorably punished; that persons who violate a public trust or who take the money which belongs to their wards or to beneficiaries of any kind, or to people of small means, who depend for their subsistence upon the fidelity of their trustees, should be punished to the extreme extent of the law.

This question concerns the widows and the orphans of the country. They put their money into the hands of trustees; they deposit it in the banks of the country; they invest it in the stock of the national banks, and there never has been a great defalcation, there never has been a serious violation of a great pecuniary trust, where there has not been wrought suffering and destitution and misery to those whose circumstances and conditions in life were such that they were specially entitled to be guarded and protected against defalcations and against all violations of trusts.

Mr. President, I believe that there is no man so unfit to act as a Senator upon this floor as one who has proved a defaulter in either a public or a private pecuniary trust.

As chairman of the Committee on Failed National Banks I had occasion to make an investigation during the last season into

the causes of the recent failures of banks. There was disclosed a most alarming condition of affairs in this country growing out of the want of fidelity to their trusts of national-bank officers.

In the report of the committee, which I hope may be read by Senators who have doubts whether this offense which is charged against the Senator from North Dakota is one which, if true, would unfit him to sit upon this floor, there are embodied some extracts from the report of the Comptroller of the Currency of December 5, 1892, from which I will read two or three items:

The doors of the California National Bank of San Diego, Cal., were not opened after close of business November 11, 1891. * * * When it became known, upon thorough examination, that the entire capital and surplus of the bank had been lost, and all efforts to resume had proven futile, the president of the bank, who had personally exerted himself in the interests of resumption of business, committed suicide.

* * * * * * *

The Cheyenne National Bank of Cheyenne, Wyo., closed its doors to business November 13, 1891, a run having been caused by the suspension of the California National Bank of San Diego, Cal. A few days later the cashier committed suicide. The president of the California National Bank of San Diego was likewise the president of the Cheyenne National Bank, and the character of management in both cases was almost identical. The personal presence of the president, his correct manner of life, and his energetic attention to business are said to have given him the entire confidence of the community and enabled him to consummate questionable transactions without suspicion. From the first, the funds of the bank were diverted to his use, etc.

* * * * * * * *

On July 5, 1892, the president of the Vincennes National Bank of Vincennes, Ind., committed suicide.

It appeared that this last bank had been depleted by its president; and so on, there is an interminable catalogue of similar crimes, after not all of which the officers guilty of those crimes committed suicide. Those who did went to their own place. Fearful must have been the workings of their consciences which compelled them to take themselves into another world rather than to meet the just punishment of their misdeeds in this world; and shall defaulting cashiers who become elected to the Senate remain here and not even be investigated? Do Senators propose seriously to ask the Committee on Privileges and Elections, of which the honorable Senator from North Carolina [Mr. VANCE] is chairman, to make a report here that under no circumstances can any crime committed by any member of the Senate before he became a member be investigated?

I have no fear that any such declaration will be made by this Senate, and I have no fear that any such report will be made by a committee upon which as members are the Senator from North Carolina [Mr. VANCE] and the Senator from Alabama [Mr. PUGH]. No, Mr. President, the amendment directing an inquiry into that constitutional question is to serve the purpose of putting off the investigation of this case until the session of the Senate next fall or next winter, in the hope that something may turn up which will relieve the Senator from North Dakota from the necessity of an authentic statement to the people of the country of exactly what the facts in his case are.

I believe that to be the object of the amendment. I do not believe that Senators seriously contemplate the notion that in this year of our Lord 1893 the doctrine will be affirmed by this Senate that, although a man will be expelled from the Senate if he commits murder or burglary or forgery or embezzlement the day after he is elected a Senator, yet that the sacred ægis of the Constitution protects him and keeps him in the Senate if he commits those acts the day before he is elected a Senator.

I do not believe that even my State's rights friend from Texas [Mr. MILLS], who I see honoring me with his attention, and the Senator from South Carolina [Mr. BUTLER], who have hitherto announced their belief in the doctrine that it is beyond the power of the Senate of the United States to inquire into the acts of Senators committed before they were members, will be willing, when they come to consider the subject, to affirm it as a proposition of constitutional law that there can be no investigation under any circumstances into the acts of a Senator committed before he was a Senator.

Mr. BUTLER. Will the Senator allow me to interrupt him?

Mr. CHANDLER. Certainly.

Mr. BUTLER. Will the Senator be good enough to state when and where I made that announcement?

Mr. CHANDLER. I will not state when and where the Senator made the announcement, but I will state that I have understood the Senator to hold to the doctrine that, as has been stated to-day by the Senator from Mississippi [Mr. GEORGE], it was not within the constitutional power of the Senate to investigate the acts of a member before he became a Senator.

Mr. BUTLER. I should be very glad if the Senator would state upon what he bases that announcement, and when and where I have stated any such thing.

Mr. CHANDLER. I am not certain that I said that the Senator had so stated. If I so stated——

Mr. BUTLER. The Senator certainly did.

Mr. CHANDLER. If I so stated, I will withdraw that remark, and will state that I have believed that to be the opinion of the Senator from South Carolina.

Mr. BUTLER. Then I understand the Senator to say that he withdraws the remark that I did make that statement.

Mr. CHANDLER. If I said that, I will withdraw it; but I do not think I said that. I think I said those were the views of the Senator from South Carolina. I will wait for any further statement the Senator desires to make.

Mr. BUTLER. I have no further statement, except I should be very glad to have the Senator confine himself to the occasion when I expressed myself in regard to this question. I think I shall then be able to show that he has not conformed to the rules of the Senate.

Mr. CHANDLER. I shall be very happy to have the Senator state what his views are on that question now.

Mr. BUTLER. I will state them at the proper time and in my own way, if the Senator will pardon me.

Mr. CHANDLER. I do not ask the Senator to do it, but I simply yield to him to make that statement if he desires to make it.

Mr. BUTLER. The Senator is very kind in yielding.

Mr. CHANDLER. The elevated character of the Senate forbids the announcement of any such fatal doctrine as this. A few short weeks ago the Vice-President, upon taking the chair as presiding officer of the Senate, uttered a high tribute to the Senators assembled before him. With his advent to the position came also a great political change, but I do not believe that the majority which now prevails here will be any less solicitous than the minority to maintain the reputation and character of the Senate.

We shall differ on questions of finance and tariff and on measures of public administration; not, I trust, on questions which are to determine the estimation in which the Senate is to be held by the wise and the good men of all countries. But to refuse even to investigate the facts alleged against the Senator from North Dakota will turn into a sarcasm and a mockery the eulogium of the Vice-President when he came to preside over the Senate and declared it to be "the most august deliberative assembly known to man."

Mr. VOORHEES. Mr. President, we have just listened to a three hours' speech delivered under very extraordinary circumstances. Usually an advocate, whether prosecuting or defending a man for his life or his honor, desires to wait until testimony has been taken and something has been proved. The Senator from New Hampshire [Mr. CHANDLER] prefers to appear as advocate, accuser, and witness; to bear testimony, construe the law, and sum up and dispose of his victim, all at the same time. It is indeed an extraordinary spectacle.

My object, however, in rising, Mr. President, is higher than that of mere criticism. It is well for us to understand the points of difference which prevail between the two sides of this Chamber upon this great question. When our fathers founded this Government widely different theories of construction contended for recognition. On the one hand were able men who believed that the Federal Government should swallow up, concentrate, condense, as it were, all the power incident to the Republic, while, on the other hand, those who actually framed the Government, who had the controlling voice in making the Constitution, believed the States made this Government, that the States preëxisted the Government of the Union, and by their concessions and their arrangements one with another the Federal Government arose in its power, its beauty, and its dignity.

The distinctions which then prevailed in regard to State and Federal power govern the question now under discussion. What are the official relations of Senators, whence do they derive their existence, and to whom are they responsible?

According to the position and argument of the Senator from New Hampshire, when Senators reach here from the States this body may resolve itself into an inquisitorial jury to try the moral, mental, and physical qualifications of the newcomers. Such is the conclusion imperatively enforced by his argument. On this side of the Chamber we hold a distinctly different theory of government; and it is because I desire the country to know where we stand on this question rather than for any other reason that I am prompted to say a few words in this debate.

Sir, Senators are officers of States. They are sent here by States and by States alone. It has been held now for nearly one hundred years that they are not civil officers of the Federal Government. That was decided in 1799 in the celebrated case of Senator Blount, which has been mentioned here this afternoon. It was held in that case that Mr. Blount was not triable in the Senate for an alleged offense committed even while a Senator, because of the constitutional fact that a Senator is not a civil officer of the Government of the United States. Whether he was properly expelled, or whether the question of constitu-

tional power was raised in his expulsion, it is not necessary to inquire; but I say here and now, that when the question was raised whether he was an officer of this Government or simply an officer of the State of Tennessee, the great body of which we are the constitutional continuation decided that there was no power here to try him for offenses committed either before he was a Senator or while he was a Senator or after he was a Senator.

At one period of the discussion this afternoon I interposed to read the plea for the defense on which the Blount case was decided. I will read it a little more at length now, in order to state fully and explicitly the position which we on this side occupy. We hold that the power of the Senate does not extend to a man's life and conduct before he becomes a member of this body. We hold that we can not make inquiry into the details of a Senator's career from the years of his maturity to his arrival here, nor can we organize the Senate into a trial court for the punishment of offenses committed before he was a Senator.

In the impeachment and trial of William Blount, a Senator of the United States from the State of Tennessee, for misdemeanor, commencing December 17, 1798, I find that he filed his defense in the Senate of the United States December 24, 1798. He appeared by Jared Ingersoll and Alexander J. Dallas as counsel. These gentlemen were justly regarded as the foremost members of the bar of the United States at that time. Mr. Dallas was Secretary of the Treasury under Madison and was the father of the then future Vice-President of that name. In the defense of Blount made by these great lawyers we find, among other pleas, the following:

That although true it is that he, the said William Blount, was a Senator of the United States from the State of Tennessee at the several periods in the said articles of impeachment referred to, yet, that he, the said William, is not now a Senator, and is not, nor was at the several periods, so as aforesaid referred to, an officer of the United States; nor is he, the said William, in and by the said articles, charged with having committed any crime or misdemeanor in the execution of any civil office held under the United States, or with any malconduct in civil office, or abuse of any public trust, in the execution thereof.

All that, Mr. President, notwithstanding the fact that the articles of impeachment alleged explicitly that his offense, whatever it may have been, was committed while he was holding the position of a Senator. He denied that such allegation gave this body any jurisdiction whatever over him. He went on to set up a still further reason why he could not be tried by this body.

It is as follows:

That the courts of common law, of a criminal jurisdiction, of the State wherein the offenses in the said articles recited are said to have been committed, as well as those of the United States, are competent to the cognizance, prosecution, and punishment of the said crimes and misdemeanors, if the same have been perpetrated, as is suggested and charged by the said articles, which, however, he utterly denies.

In other words, even though the charges are true, he denies that he is answerable here, but admits that he is answerable to the courts of criminal jurisdiction in his own State, or in any of the several States, where his offenses are alleged to have been committed, or in the courts of the United States, making the square distinction between a trial by the Senate and his responsibility to the courts of his country. An elaborate discussion, in which the first names of our Republic appear, ensued. The contention on the part of the defendant was formally stated by Dallas and enforced by the distinguished counsel to the end of the trial in the following terms:

1. That only civil officers of the United States are impeachable; and that the offenses for which an impeachment lies must be committed in the execution of a public office.

2. That a Senator is not a civil officer, impeachable within the meaning of the Constitution; and that, in the present instance, no crime or misdemeanor is charged to have been committed by William Blount in the character of a Senator.

After weeks of debate, involving these propositions and enriching the political thought of this country and of the world, the Senate of the United States came to a conclusion which has ever since stood, and which I submit in this connection. The judgment of the high court of impeachment was rendered as follows on the 11th of February, 1799:

On motion it was determined that—

The court is of opinion that the matter alleged in the plea of the defendant is sufficient in law to show that this court ought not to hold jurisdiction of the said impeachment, and that the said impeachment is dismissed.

MONDAY, *January 14.*

The court being opened, the parties attending, and silence being proclaimed, judgment was pronounced by the Vice-President as follows:

"Gentlemen managers of the House of Representatives and gentlemen, counsel for William Blount: The court, after having given the most mature and serious consideration to the question and to the full and able arguments urged on both sides, has come to the decision which I am now about to deliver.

"The court is of opinion that the matter alleged in the plea of the defendant is sufficient in law to show that this court ought not to hold jurisdiction of the said impeachment, and that the said impeachment is dismissed."

The Senator from New Hampshire suggested that it could not be told whether that finding was upon the point that Mr. Blount was no longer a Senator, or that he had not been a civil officer of the United States. On the contrary, the only point debated from the beginning to the end of this great discussion was what kind of official relation he bore to the United States Government when he was a Senator. The question of his not being a Senator at the time of his trial does not figure at all, or at least with no importance, in this discussion.

So, Mr. President, from that day in 1799 to the present day it has been conceded, it has been the consensus of nearly one hundred years of opinion in this country, in this body and elsewhere, that a Senator is not amenable to punishment for crime or impeachment as a civil officer.

Mr. President, let us take another step in looking at this question. Again, what is a Senator, and how comes he here? In the construction of this Government provision was made for a Congress of the United States composed of two great bodies. In making that provision the Federal Government could and might have gone further and laid down other and more extensive rules or conditions, but declared only three conditions on which a Senator was to be admitted from a State. What were they? You will find in section 3 of Article I these few and simple conditions imposed as to the qualifications of a Senator:

No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

Why did they not go on, if the Senator from New Hampshire is right, and say further that inquiry should be made whether he had ever been charged with a misdemeanor, and, if he had, that he should not be admitted? They had the subject in their minds and in their hands; they were prescribing conditions, and those conditions, though affirmative, are in the nature of a severe limitation, for in inserting them they excluded all others. Every lawyer knows the weight of an argument of this kind; every lawyer knows when Congress was dealing with that subject-matter and went no further it was a denial to this body of power to go beyond the limitation expressed. A compliance with the constitutioual conditions admits a Senator, and he is subject to but one other inquiry under the Constitution.

We hear a good deal sometimes about investigating a Senator's election to this body. It is provided that the Senate shall be the judge of the qualifications and elections of its own members. Yes, we may judge of his qualifications, to the extent limited by the Constitution. If, as in some very celebrated instances, a man should come here alleged to be under the prescribed age, or who had not been a citizen of this country nine years, or if not an inhabitant of the State, an investigation would be allowed, because these are required conditions by the Constitution.

There is still, however, another field of investigation. If charges are made that a man used fraud, was guilty of corruption, bribery, or other improper conduct before his Legislature in securing his election, the right to investigate arises, because, if such charges are true, he has not been elected at all according to law, but according to fraud.

I appeal to the older and better trained legal intellects on the other side of the Chamber to know where the additional power claimed by you for investigation is given by the Constitution. There is a difference between a power given and a power taken. I know you can trample upon all distinctions; I know you can trample upon the fundamental law. I do not say you desire to do it in this instance.

I wish to forbear in speech to-day. I ask learned men, however—I ask legal minds, where do you get one scintilla of power or a hair's breadth of right to investigate beyond these limitations? No one can take his stand on the written law and make good his claim. If I am right in my construction of the Constitution, then we reach another question. Can the States be trusted to send fit and proper men to this body? Are the States a safe depository of power for the choice of Senators to represent them in the Federal Congress, or must Senators already chosen supervise the characters and moral fitness of incoming members?

According to the Senator from New Hampshire, who constitutes himself a sort of inquisitor-general, there would be no limit to the investigation and trial of Senators; the disgusting process would never end. According to his theory, every State is subject to the imputation that its people are not to be trusted; that they must be subject to our supervising power; that if they should select a Senator professing opinions adverse to the majority we could organize an inquiry to see whether it was safe for him to be here; whether he was a moral person or whether he was agreeable for us to sit with.

Many of us can remember in the early history of the country when questions connected with religious faith were paramount to everything else. I have heard good men in the sincerity of their belief announce that the country would be destroyed if a certain denomination of religious thought should obtain supremacy in this country. Many Senators about me have heard the same.

Where, then, is the limit of inquiry, unless you take that invincible limit given by the Constitution? Will you, in the face of that sacred instrument, dare to say that you have the right to inquire whether a man sent here by a sovereign State has at some time or other been indicted for crime, even if he has paid the penalty of the offense in accordance with the laws of his State? If you can investigate in such a case as that, you can investigate anything and everything which may be distasteful to the Senator from New Hampshire or anyone else, however petty or contemptible the accusation may be.

Sir, such a doctrine is at war with the Government the fathers made, at war with the existence and the dignity of the States, and at war with the fundamental doctrines of self-government.

Senators may rise and say that, assuming the position which I do, bad men may come here, evil-minded persons from the States, stained with unlawful transactions, or even with the blood of murder, and what shall we do about it? Mr. President, assumptions of that kind can not be allowed; presumptions in civilized Christian countries run in favor of the virtue, the intelligence, and the capacity of the people, and in this Republic they run in favor of the States choosing reputable, upright, competent men of pure lives as their Senators. If the States are not to be trusted in their own individual capacity to discharge this high duty, it would be a failure of Government to remit it to the already elected representatives of other States. In other words, when a State has made its choice and sent a Senator here, is it to be assumed that the representatives of the other States shall meet in conclave and pass upon his fitness and inquire into his morals? The presumptions run the other way; the presumptions are that the State knows him and understands him; and the presumptions are also that the representatives of other States will be better engaged in minding their own business and letting the business of the other State alone.

Sir, take the individual case at bar, that seems such a sweet morsel under a few tongues—I am happy to say a very few—on the other side of the Chamber. Let us for a moment see what it really looks like. I use it more as an illustration than anything else.

The plea rendered by Blount, as I have already read, set out that he was amenable and answerable to the courts in his own State and in every other State where he had committed the offense charged, and in the United States courts. We will see that his plea fits exactly the case of the Senator from North Dakota.

We have listened to three hours' talk this afternoon. A full answer to it all is that the gentleman from North Dakota now occupies a seat on this floor by the selection of a State, whether young or old, or large or small, still a State as great in her rights and her dignity as the empire State of New York or the empire State of Texas, whose Senator sits before me, for she is the greatest empire of them all. As a matter of course, my statement carries his own absolute personal, individual equality in every right under the Constitution with every other Senator upon this floor.

What is there to be said of him? This much, at least. During all the years since his alleged trouble, I know not how many, fourteen or fifteen, he has been subject to the laws of the United States, subject to the laws of this District, subject to any laws that have been infracted, liable to be called for trial before any court having jurisdiction. He has not been in Canada, he has not been across the waters, he has staid under the American flag and fought it out like a man, and every manly heart now wishes him well. However it may be with others, it is certainly so with me. No indictment was ever found against him. He has been all the time subject to criminal charge, and yet no indictment found.

If the offense was committed in this District, here have met courts, here have met grand juries, but no indictment has ever been heard of. No warrant has been sworn out before any tribunal of any kind. No arrest has ever been made or attempted to be made. And now, still further to reduce this charge to contempt, it stands confessed as an absolute fact that the parties said to have been injured by Mr. ROACH have no word of complaint to make against him.

Sir, this is the case which has been seized upon to make an issue upon against this side of the Chamber. I speak of Mr. ROACH'S case personally as an illustration of the great legal principle underlying this discussion—a man subject to the prosecution of the courts in his own State, or in a distant State, subject to be called back here by requisition.

Thank God, he has stood his ground, and does now. He says you may investigate him as far as the Constitution allows. What more can he say? He will also answer any charges made against him anywhere in the courts. And this is supposed to be a case calling for the direst punishment that can be inflicted, by arraignment and impeachment here!

Mr. President, I return again to the point that the Constitution gives the required conditions for membership in this body. If the Constitution had said that if a man were arraigned in the newspapers for having committed a breach of trust or for having embezzled funds, that would be a very different thing. In order to still further emphasize the legal ground on which I stand, I wish to call attention to another point. My attention was called to it by the able and gifted lawyer from Mississippi [Mr. GEORGE] a few moments ago. The fourteenth amendment of the Constitution is pregnant with authority upon this great subject.

After the war was over new troubles arose. The irruption, if I may use the word, of unfit people into this body was threatened, as it was thought, and in some instances it took place, from the Southern States. However, this amendment was not aimed at the class I objected to; but I desire to show the Senate that the whole question of the constitutional limitation of conditions which makes Senators eligible was considered and revised by the leading members of the Republican party itself. Section 3 of the fourteenth article of amendment reads as follows:

> No person shall be a Senator or Representative in Congress or elector of President and Vice-President, or hold any office, civil or military, under the United States or under any State, who, having previously taken an oath as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

There is an initial condition against the admission of a Senator here. The subject of precaution against the admission of improper persons was once more, this side of the formation of the Government, under the consideration of learned and able men, and they prepared this clause, setting forth that no man who had betrayed his oath as an officer of the Federal Government before the war should be admitted to any office, civil or military, or should be elector of President and Vice-President, unless his disabilities were removed by a two-thirds vote of Congress.

There were three limitations already, one of age, one of citizenship, the other actual residence in a State. To those three conditions such men as Trumbull, perhaps the Senator from Ohio [Mr. SHERMAN] himself, and other leading and able men in public life at the period of reconstruction added this one.

Suppose they had gone on. They had the subject up in their minds. They could have gone on and made other limitations. They could have said if a man had been charged with crime by indictment he would not be eligible here. They could have said that a man who was convicted in his State court should not come here. They could have said all that and more. They did not do it; for they proceeded upon the presumption that the States might be trusted to elect their Senators, and that there was no danger of a debauched body of men here as long as the American States were worthy of existence.

But there is another feature in connection with the fourteenth article of amendment which emphasizes what I am saying beyond all power of contradiction. In a court of justice a presiding justice would stop a gentleman contending as I am and say, "I will hear from the other side;" it would want no more argument. Now, what says the second section of the fourteenth amendment?

> Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being 21 years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.

The word "crime" is used here, showing there was no oversight on this question. The question of what disability a crime should produce was considered. It operates only where in the State courts a man has been convicted of crime and disfranchised, as we have seen done. That is the meaning of that section.

I dwell upon these two sections to show that since 1799, that since the formation of the Constitution, within sight of the great troublous period of the war, when we were merging into a new life and needed new things done, as it was thought, for safety, this subject came before the mental view of the men who were guiding public affairs, and these provisions show that no such thing as the Senator from New Hampshire has been urging here to-day as a disqualification to a Senator was thought of for a single moment.

Ah, the Senator may say, shall such things as we talk of go unwhipped of justice? I have already anticipated the argument on that subject. The man is answerable under the Constitution

to the courts, but does it say he is answerable some place else? What an admirable supporter of government it seems to me the Senator from New Hampshire would have made during the reign of the Stuarts when things went by bills of attainder. What is this proceeding to-day but in the nature of a bill of attainder? What is this proceeding except an attempt to disgrace and punish as far as possible a man who has been subject to the laws of his country, and is subject to them now, unless those who have had the right to complain of him have waived it by the length of time which has elapsed? What else is this movement except to proceed against him by act of Congress? A man who never evaded the courts is now by Congressional proceeding to be assaulted.

Webster says in describing the office of attainder that it is a proceeding used to stain, to taint, to blemish, to sully a man's character and corrupt his blood, so that his children can not inherit. This proceeding here is exceedingly like the proceedings we are familiar with in English history. Strafford, Earl of Wentworth, was arraigned upon a bill saying that it was reported he had done evil things in Ireland and elsewhere.

It was alleged that he had advised the king to arbitrary and oppressive acts of government, and he had to answer in a cloud of mist and uncertainty; whereas the everlasting pillars of the law give a man the right to be presented by a jury of twelve, to be put upon his trial before a jury of twelve, to be confronted with witnesses against him, to appear by counsel, and to have a full and open hearing. This is simply an inquisitorial process outside of all constitutional limit, and as such I desire the country to know that on this side of the Chamber we will investigate within the limits given us, and not beyond them.

Mr. HOAR. I should like to ask the Senator from Indiana if he claims as a principle of constitutional law that there is nothing which took place before the election of a Senator to this body which would make him liable to expulsion?

Mr. VOORHEES. If you can find where the Constitution says that there was anything beyond the limitations which I have laid down I will be obliged to the Senator to show it to me.

Mr. HOAR. No, I was not arguing the question; I wanted to understand the Senator's proposition.

Mr. VOORHEES. I take my position squarely. A Senator of criminal character may be imposed upon a State possibly. I have never known, nor have you, such a case. We have had over a hundred years of history, and such an instance has not occurred. There are a class of men who are always supposing an evil thing will happen. Such a thing never has happened in this country as the Senator is now supposing. But if a State should have the misfortune to elect a man blackened with crime it is the misfortune of the State, and I find no power given to us, who have sworn to support the Constitution, to organize a tribunal of morals and try that man here for his offenses.

Mr. HOAR. Then, if I understand the Senator correctly, he says there can be no such instance.

Mr. VOORHEES. Yes, I have the misfortune to believe that the Constitution of my country is binding. I believe that every word it says expresses its meaning, and that it is binding on my conscience. See what any other rule would lead to. I have great respect for the Senator from Massachusetts, especially when he is in an amiable mood. I can join with him in supposing that an embarrassment might arise.

If the supposititious case that has not come in more than a hundred years should, however, come at last, it would be far less a difficulty, more tolerable, to good government than for us to claim the power to try the Senator from Massachusetts, or to try the Senator from Indiana now speaking, for alleged offenses long, long ago, or to try the Senator from New Hampshire for all that has been alleged against him.

I do not want to say an unkind thing to-day, but when we argue these questions we have to argue as lawyers, with freedom and pertinency. I know the Senator from New Hampshire will not complain of what I say, after occupying three hours in seeking to destroy the reputation of the Senator from North Dakota.

I have heard alleged of the Senator from New Hampshire various grave and ugly things which I have not credited. I have heard men say that while he was Secretary of the Navy he built three or four ships that made but one trip in their lives, and that was to the bottom of the sea. I have heard it alleged that the contractors who built them retired from their work rich, contented, and infamous, all at the same time. I have heard these things said. Does the Senator from New Hampshire believe that these matters should be taken up out of the newspapers, and before a word of testimony is taken, I or any other Senator should arise here and arraign him?

I have had occasion to reflect upon that side of the Chamber, not for what they have not done heretofore, but for what they are aiming to do now, so utterly inconsistent with their course heretofore. I complain not of that side of the Chamber for having sat still for the last six years, or perhaps double that time, with newspapers reeking with charges against their associates. I complain not of them, for if we had thought that the Constitution gave us the power to investigate charges of defalcation made by Senators before they were in the Senate or even afterwards where they are subject to the criminal laws of their country, we ourselves would have investigated them.

But the spectacle is presented to the country here of a great strong party remaining silent on the subject of the sins of their own people, and yet the moment a speck can be found upon anybody on this side of the Chamber they clamor as the Pharisees of old did when the Saviour suggested to them to take the beam out of their own eyes, so that they could see the mote in other people's eyes. That is what I complain of. I hold that in your silence on that side of the Chamber, your noninvestigation of the published charges about Senators of your own political faith, you are consistent with common honesty as well as with the Constitution. All that will be gained by this proceeding on your part will be the comment of honest and consistent people in regard to the difference it makes whose ox is gored in the transactions of life.

Mr. President, I do not wish to be provoked into acrimonious discussion on this subject, but I ask the country to take notice. The Democratic party is standing upon the rock of the Constitution. It is standing upon its limitations. They can not be ignored or trifled with. That side of the Chamber, guided by the uncertain, capricious whims of party interest, are seeking now to destroy where they sought to spare, cover up, and whitewash in their own ranks. The country will take notice of this. I have no fears of the result.

The Senator from New Hampshire asks us on this side of the Chamber whether we are willing, considering the honor and dignity of this great body, to let a question of this kind go uninvestigated. In answer to that I say that I take my Government as formed by the fathers. The Constitution says in so many words what entitles a man to a seat here. In compliance with that I see no power of investigation on a matter that was open to all the courts, free to every inquiry known to the law.

The Senator from New Hampshire emphasized very much as an exclamation, "not to be investigated!" What do I care for the long list of decisions of the British Parliament. The British Parliament is not the creature of a written constitution. It has no limitations or outlines. It is a growth and an aggregation of customs that have been built up. Sometimes they expelled members of Parliament and sometimes they beheaded them. What is that to me or to any other man on this side of the Chamber who reads a written constitution, takes an oath to obey it, and has some faith in his fellow-men?

This question gives rise to the old distinctions of political thought in this country. There is one class of people who have never believed in any other class but their own. There is one class of people who have never believed that good government could come except from themselves. There is one class of people in this country, and indeed throughout the world, who narrow their prayers simply to "bless me and my house, and no more."

I am thankful I do not belong to that class of people, Mr. President. It was the theory of that class that the States should all be swallowed up, and they would swallow them up yet if they could. The Senator from New Hampshire believes to-day that he is a better judge of a Senator here than the State of Indiana, or Ohio, or Missouri—certainly a great deal better judge than the people of Maryland, to say nothing of North Dakota or South Carolina. He holds the power, and believes in it, to investigate all. I, without any arrogance at all, put that doctrine at defiance. I have answered a long time to my own people. While I have committed faults I have no doubt, for no man is perfect, yet I have answered to my people. My responsibility is unto them and to the laws of my country, and not unto the Senator from New Hampshire or any other State.

That was the spirit which presided over the theory of our Government in the beginning. It was the spirit that begot sovereign power for independent States which, when they came together, gave up to the General Government the right to prescribe conditions as to the admission of Senators, which were laid down there—three in the original body of the instrument, one afterwards in the fourteenth amendment, but none for one moment looking to or embracing or tolerating the position of the Senator from New Hampshire.

Sir, I talk with reluctance, and I would not have talked to-day had it not been for my desire now, near the close of this extraordinary session of the Senate, that a proper conception should go out to the public mind of the real position of the Democratic party on this side of the Chamber; and in my feeble and humble way I have endeavored to state it. It is the doctrine on which our Government rests, and any other doctrine would turn this

body into the most miserable and contemptible conclave of inquisitorial processes that the world has ever had any knowledge of.

Where would it stop? I would leave the Senate with loathing and disgust rather than remain with a body where the Senators of each State claim the right to supervise the morals of the Senators of every other State, and to enter into judgment with States the equal of their own in regard to the kind of men they send here.

It may be the Senator from North Dakota has suffered misfortune. I stop not to go into that further than to say, and to repeat myself, that, obedient to the laws of his country, he has never sought to evade them, and to-day he returns to those who were thought to be injured without a single claim upon him. When a man has lived a life of that kind, commend me to him. I will take him with his faults; I will take him with his defalcations; I will take him with every step of error he has had the misfortune to commit, before I will take for my guide the philosophers of the other side of the Chamber, who sit as inquisitors on the act of every man's life except their own.

Mr. HANSBROUGH. Mr. President, no Senator upon this floor is more regretful than I am that it should have appeared necessary that these proceedings must be brought into this body. I myself have taken no part in bringing them here or in the discussion, and I would not now consume the time of the Senate if I did not feel a personal obligation so to do.

I have known my colleague [Mr. ROACH] for the past ten or eleven years. I knew him when he first came into the old Territory of Dakota. I knew him when he traversed the prairies of that Territory over the plains and the snows, through winter and summer, carrying the mails a distance of 100 miles from the city of Grand Forks to the old military post of Fort Totten, under a subcontract which he held at that time. Our relations have been personally agreeable and pleasant. I have had a very high regard for Mr. ROACH, and he is held in esteem by the people of our State.

I regard this as a very unfortunate occurrence—unfortunate on account of my colleague, and on account of the State that he and I have been sent here to represent, and on account of the people therein. North Dakota is one of the new States. It had a very difficult task to get into the Union and become a member of the sisterhood of States; and when we once got into the Union we supposed that all our woes and troubles were at an end. But it seems that we come here simply to witness the beginning of those trials and tribulations which are calculated to keep the people of that young State back and prevent their progress, because these proceedings here and the comments of the press upon them can be of no other avail than to injure the State of North Dakota and its people.

Mr. President, I am not disposed to criticise or find fault with the newspapers of the country. I myself have had the honor to be a member of the journalistic profession for the past twenty-five years. In that time I have no doubt said some very caustic things of men whom I supposed to be the enemies of the Commonwealth and of the public good, and there have been some very caustic things said concerning myself. But I am charitable enough to believe that no editor ever puts his pen to paper to say a derogatory thing of another unless he feels that he has good ground for doing so and that it is for the good of the country that he does so. I know that that at least has been the controlling influence throughout my journalistic career.

I find in a recent issue of the Daily Globe of the city of St. Paul, Minn., a very remarkable article under date of Washington, April 10. The editor and proprietor of the Globe is a Mr. Baker, now minister to Nicaragua and Salvador, I believe, recently confirmed by this body; and we have a right to expect Mr. Baker to be the kind of man who, when he asserts a thing or employs an agent to assert a thing—we must concede that he or his agent believes there is some ground for the truth of such assertion; and we have also a right to believe that they are fair enough to expect that their readers shall believe what they say. For this reason, the editor of the Globe occupying a distinguished position and being foremost among the editors of the country, the assertions of his paper are full of importance. I will read some extracts from the article I have referred to. It is under date, as I have said, of Washington, April 10:

A bomb will drop in the camp of the combination who are behind the persecution of Senator ROACH, of North Dakota. When old Senator HOAR, of Massachusetts, offered a new resolution in the ROACH matter to-day he did not know that within a few hours a man would arrive in Washington with enough evidence to completely overwhelm one of the Republican members with whom that saintly pair, HOAR and CHANDLER, do not hesitate to associate.

It is needless to state, Mr. President, that the Globe of St. Paul, Minn., is a Democratic paper.

Mr. HOAR. That is quite evident.

Mr. HANSBROUGH. The article continues:

This man arrived straight from North Dakota this afternoon. His name is Jud La Moure, of Pembina, and he brought with him a gripsack full of affidavits, letters, and other documents which he proposes to lay before the United States Senate.

I understand that Mr. La Moure was in this city recently, and for aught I know he may be here now.

Minister Baker's representative then proceeds to interview Mr. La Moure and to comment upon the interview as the interview progresses.

Senator Jud La Moure was one of the ten Republicans at Bismarck who voted for Senator ROACH, and he knows all about the contest as well as the fight two years earlier which resulted in the election of Senator HANSBROUGH.

Going back to the Senatorial contest of two years ago, Senator La Moure produced the inside history of that struggle in documentary form, and declared that in it are reasons for the immediate expulsion of Senator HANSBROUGH.

Mr. President, this is a very serious accusation to be found in the columns of a newspaper edited and controlled by a gentleman who seems to have occupied a position high enough to be selected by the present incumbent of the White House as a minister to an important foreign country. The article then proceeds:

The fact that La Moure would be here to-day was known in advance to Senator GORMAN, with whom the Pembina statesman spent several hours this evening, showing a mass of evidence concerning Senator H. C. HANSBROUGH.

All evening La Moure was in close conference with Senator GORMAN, the Democratic leader, and while neither cared to state the agreement reached, there is little doubt that to-morrow morning the case of Senator HANSBROUGH will be taken up by resolution and referred for investigation to a committee.

I also have here an article under date of April 10, from the Daily Tribune, of the city of Minneapolis, a newspaper published by a former member of this body and now minister to Portugal. At last accounts the editor of the Tribune was on his way to his post at Lisbon. This article purports to be an interview with Mr. La Moure. I will read a portion of it if the Senate will bear with me. The representative of the Tribune asked this question:

What are you here for?

To which Mr. La Moure replied:

Well, there seems to be a disposition on the part of the Republicans to push my friend Senator ROACH. He is being abused. What kind of a fellow is Senator GORMAN—biggest toad in the Democratic puddle?

The reporter answered "yes."

Well—

Said Mr. La Moure—

I am going to see Senator GORMAN to-night, and I am going to put him on. If they do not let my friend ROACH alone I will make it hot for some of the high and mighty Republicans holding office from North Dakota. For instance, Senator HANSBROUGH, and I will have very little difficulty in the process. I propose to lay these facts before GORMAN and tell him the evidence is all ready.

The representative of the Tribune, after he had succeeded in interviewing Mr. La Moure, was honest enough and fair enough to make this statement; which reveals the real object of La Moure's visit to this city.

Jud is looking after the interests of his father-in-law, Mr. Nelson, collector of the port of Neche.

I will state that there is no such port. It is the customs district of North and South Dakota, the port of Pembina.

It was part of Jud's deal that Nelson should be retained if Jud voted for a Democrat.

Mr. President, in view of these allegations and assertions and charges, if they may be called charges, in two reputable papers owned and edited by two ministers to foreign lands, and in which assertions and charges there is not an iota or one scintilla of truth, I think I am justified in calling upon the Senator from Maryland to state whether he is in possession of any documentary evidence, affidavits, letters, or otherwise bearing upon my election to this body. If he is, I believe I am also justified in asking of the Senator, in justice to himself as a Senator, in justice to myself, in justice to the Senate as a body, to proceed forthwith to lay those documents, affidavits, or whatever they may be before the Committee on Privileges and Elections of this body, and that the matter be inquired into thoroughly and fully as soon as possible.

Mr. GORMAN. Mr. President, the remarks just made by the Senator from North Dakota furnish a pointed illustration of the folly, the unwisdom of this body opening its doors for the reception of statements or proceeding to consider for a moment statements affecting the character and reputation of Senators. The Senator from North Dakota has not known me very long, but I had hoped that he and every other intelligent citizen of this country would have known enough of my public course to believe it impossible that I should be the receptacle or the dumping ground of the miserable slanders that are constantly uttered against public men.

Mr. HANSBROUGH. I did not suppose that, Mr. President.

Mr. GORMAN. If there is any one thing that I have avoided,

that I despise, it is to indulge in such matters, and I have but little respect for the judgment of any man who does it.

Of the matter to which the Senator refers, I knew nothing except through him, who casually asked me if such a man had approached me. That class of vipers do not come to me and get hearings.

Mr. HANSBROUGH. I am very glad to hear it.

Mr. GORMAN. I have never to my knowledge heard of the man who is named in that article. He has certainly never presented charges against the Senator from North Dakota to me. Like other Senators I read the newspapers, and I am bound to take note of what I see there; but such articles make no such impression on me as to warrant me in making use of them here or elsewhere.

So for to-day I hope we will dismiss this subject; and I move that the Senate proceed to the consideration of executive business.

Mr. HARRIS. If the Senator from Maryland will withdraw the motion for one moment, I will move that the resolution and the pending amendment be laid upon the table, and let us dispose of that question to-day.

Mr. GORMAN. I withdraw the motion.

Mr. HARRIS. I move that the resolution and amendment be laid upon the table.

Mr. PLATT. Mr. President, the motion is not debatable——

Mr. HARRIS. It is not.

Mr. PLATT. I should like, however, to ask the Senator from Tennessee to withhold it for one moment that I may make a single observation.

Mr. HARRIS. I do not know how to deny the Senator from Connecticut anything that he asks.

Mr. GORMAN. I hope the Senator from Tennessee will not press his motion at this time. For public reasons I must insist that we shall proceed to the consideration of executive business.

Mr. HARRIS. Then, if the Senator from Maryland will yield to me, I move to lay the resolution and amendment on the table, and under the suggestion, I can not grant the request of the Senator from Connecticut.

Mr. PLATT. On that question I ask for the yeas and nays.

The VICE-PRESIDENT. The question is on the motion of the Senator from Tennessee that the resolution and amendment be laid on the table. Upon this question the yeas and nays are demanded.

The yeas and nays were ordered.

Mr. DOLPH. I ask that the resolution and amendment be read so that we may know precisely on what we are to vote.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution submitted by Mr. HOAR on the 10th instant, as follows:

Resolved, That the Committee on Privileges and Elections be directed to examine the allegations recently made in the public press charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with certain criminal offenses committed while cashier or officer of a bank in the city of Washington, and to ascertain the facts and circumstances so far as to enable the committee to determine and report what are the duty and power of the Senate in regard thereto; and for that purpose the committee shall have authority to send for persons and papers, to employ a stenographer, to sit during the recess of the Senate, and to act through a subcommittee; and its expenses shall be paid from the contingent fund of the Senate.

The VICE-PRESIDENT. The amendment will be read.

The Secretary read the substitute, submitted this day by Mr. GORMAN, as follows:

Resolved, That the Committee on Privileges and Elections be directed to inquire into and consider the question whether the Senate has authority or jurisdiction to investigate charges made against a Senator as to conduct or offenses occurring or committed prior to his election, not relating to his duty as Senator or affecting the integrity of his election.

Mr. GRAY. Mr. President, I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Senator from Delaware will state his parliamentary inquiry.

Mr. GRAY. Does the amendment just read as a substitute refer also to and is it a substitute for the resolution of like import to the one just read referring to the investigation into certain newspaper charges against the Senator from Montana [Mr. POWER]?

Mr. SHERMAN. I should like to say one word to Senators. I think we had better adjourn until to-morrow.

Mr. HARRIS. If the Senator from Ohio will allow me, in view of the present conditions and the request of the Senator from Connecticut [Mr. PLATT], I withdraw my motion to lay on the table.

Mr. SHERMAN. That is right.

Mr. PLATT. Mr. President——

The VICE-PRESIDENT. The Senator from Tennessee withdraws his motion to lay on the table. The Chair recognizes the Senator from Connecticut [Mr. PLATT].

Mr. PLATT. I simply desire an opportunity to reply, not at any great length, to the position taken by the Senator from Indiana [Mr. VOORHEES]. That is all I desire.

Mr. HAWLEY. To reply to-morrow?

Mr. DOLPH. To-morrow.

Mr. PLATT. Yes.

Mr. GORMAN. I renew my motion.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. Pending the motion of the Senator from Maryland, the Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections. The resolution will be read.

The resolution was read, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

EXECUTIVE SESSION.

The VICE-PRESIDENT. The Senator from Maryland moves that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty minutes spent in executive session the doors were reopened, and (at 4 o'clock and 40 minutes p. m.) the Senate adjourned until to-morrow, Saturday, April 15, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate April 14, 1893.

COURT OF APPEALS OF THE DISTRICT OF COLUMBIA.

Richard H. Alvey, of Maryland, to be chief justice of the court of appeals of the District of Columbia, as provided by act approved February 9, 1893.

Martin F. Morris, of the District of Columbia, to be associate justice of the court of appeals of the District of Columbia, as provided by act approved February 9, 1893.

Seth Shepard, of Texas, to be associate justice of the court of appeals of the District of Columbia, as provided by act approved February 9, 1893.

SURVEYOR-GENERAL OF ARIZONA.

Levi H. Manning, of Tucson, Ariz., to be surveyor-general of Arizona, vice Royal A. Johnson, resigned.

RECORDER OF THE GENERAL LAND OFFICE.

Lucius Q. C. Lamar, of Oxford, Miss., to be recorder of the General Land Office, vice Dolphin P. Roberts, resigned.

PRINCIPAL CLERK PUBLIC LANDS, GENERAL LAND OFFICE.

Robert K. Gillespie, of Gallatin, Tenn., to be principal clerk of public lands in the General Land Office, vice Calvin G. Townsend, resigned.

RECEIVERS OF PUBLIC MONEYS.

William Anglim, of Crookston, Minn., to be receiver of public moneys at Crookston, Minn., vice Lars K. Aaker, resigned.

John Lafabre, of Rapid City, S. Dak., to be receiver of public moneys at Rapid City, S. Dak., vice George V. Ayres, resigned. Stiles E. Forsha, who was nominated February 2, 1893, failed of confirmation.

COLLECTOR OF CUSTOMS.

John C. Geraghty, of Minnesota, to be collector of customs for the district of Minnesota, in the State of Minnesota, to succeed Charles G. Edwards, whose term of office has expired by limitation.

SURVEYOR OF CUSTOMS.

Charles H. Miller, of Illinois, to be surveyor of customs for the port of Galena, in the State of Illinois, to succeed John Mahood, resigned.

ASSISTANT SURGEONS IN THE MARINE HOSPITAL SERVICE.

John W. Branham, of Virginia, to be an assistant surgeon in the Marine Hospital Service of the United States.

Emil Prochazka, of Wisconsin, to be an assistant surgeon in the Marine Hospital Service of the United States.

Ezra K. Sprague, of New York, to be an assistant surgeon in the Marine Hospital Service of the United States.

ASSISTANT SURGEON IN THE NAVY.

Edward Lyman Munson, a resident of Connecticut, to be an assistant surgeon in the Navy, to fill a vacancy in that grade.

CONFIRMATIONS.

Executive nominations confirmed by the Senate April 12, 1893.

COMPTROLLER OF CURRENCY.

James H. Eckels, of Illinois, to be Comptroller of the Currency.

COLLECTOR OF INTERNAL REVENUE.

Ambrose W. Lyman, of Montana, to be collector of internal revenue for the district of Montana.

SPECIAL FISCAL AGENTS.

August Belmont, Walther Luttgen, and Oliver H. P. Belmont, trading under the name, style, and form of August Belmont & Co., at London, England, to be special fiscal agents of the Navy Department at that place.

POSTMASTER.

Lela Henley, to be postmaster at Cloverport, in the county of Breckinridge and State of Kentucky.

Executive nominations confirmed by the Senate April 13, 1893.

COMMISSIONER OF INDIAN AFFAIRS.

Daniel M. Browning, of Benton, Ill., to be Commissioner of Indian Affairs.

ASSISTANT COMMISSIONER OF INDIAN AFFAIRS.

Frank C. Armstrong, of Washington, D. C., to be Assistant Commissioner of Indian Affairs.

SATURDAY, *April 15, 1893.*

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D.

The Journal of yesterday's proceedings was read and approved.

SENATOR FROM MONTANA.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution reported by the Senator from Massachusetts [Mr. HOAR] from the Committee on Privileges and Elections, which will be read.

The Secretary read as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. Pending the consideration of this resolution, the Chair recognizes the Senator from Connecticut [Mr. PLATT].

Mr. HARRIS. Will the Senator from Connecticut indulge me for a single moment?

Mr. PLATT. It is understood I have the floor?

The VICE-PRESIDENT. The Senator from Connecticut has the floor. Does he yield to the Senator from Tennessee?

Mr. PLATT. If it is understood that I have the floor I yield.

Mr. HARRIS. Of course. I appeal to the Senator to yield. I desire to ask the Senator from Massachusetts [Mr. HOAR] if he has any objection to disposing of his motion to reconsider the resolution raising a committee to wait on the President and inform him that the Senate is ready to adjourn when he has no further communication to make?

Mr. HOAR. I have no objection to having that matter dealt with at the discretion of the side of the Chamber to which the Senator from Tennessee belongs, and I suppose he represents the desire of his political associates here. Whenever they desire to take up the resolution I shall interpose no objection.

Mr. HARRIS. I should be glad to have it disposed of this morning and at this time.

The VICE-PRESIDENT. Is there objection?

Mr. CALL. I should like to have the question about committees of investigation during the recess dealt with before anything further is done in the matter. I feel that my State is very deeply interested in that question, and I should be glad to have at least some consideration of it before this body adjourns.

Mr. HOAR. Let the matter stand until the Senator from Connecticut concludes his remarks.

Mr. HARRIS. Very well. I have no objection to the Senator from Connecticut proceeding, but I give notice that I shall call the resolution up and ask for action upon it at an early hour today.

Mr. HOAR. As far as I am concerned I suppose there will be no objection to it.

WITHDRAWAL OF PAPERS.

On motion of Mr. MITCHELL of Oregon, it was

Ordered, That Austin Herr be permitted, subject to the rule, to withdraw his papers from the files of the Senate.

CHARGES AGAINST SENATOR ROACH.

Mr. PLATT. Mr. President, when the Senate adjourned last night I desired the floor in order that I might reply briefly to what seemed to me the extraordinary position taken by the Senator from Indiana [Mr. VOORHEES], who, as I understood, assumed to speak for the Democratic members of the Senate, and by the Senator from Mississippi [Mr. GEORGE], who, as I understood, assumed to speak for no one but himself. But the hour was late, and the Senate showed a disposition to adjourn or proceed to the consideration of executive business.

It is not pleasant under any circumstances to speak upon a proposition which involves the character, standing, and honesty of one of the members of this body; and yet when such a proposition is before the Senate I conceive that a Senator should not, from any motives of delicacy, shrink from the proper discussion of it. Unpleasant as it is, I desire to call the attention of the Senate to the precise case which we have before us. I do not think any suggestions that there may be other cases which the Senate ought to look into are pertinent to the discussion of this question.

The Senator from North Dakota presented himself here on the 4th day of March, at the opening of the session, without any previous suggestion made anywhere that there was anything whatever in his past life or conduct which in anyway militated against his being sworn in or being a proper member of this body. He came with the credentials from his State in proper form, and was therefore admitted and took the oath, and became a sitting Senator from the State of North Dakota.

On the 15th of March publications appeared in the newspapers charging, in specific terms, that in the year 1879 (and since I have been a member of the Senate) he was a bank officer in a bank in the District of Columbia; that as such bank officer he embezzled the funds of the bank to the specific amount stated of $64,000 and fled the city; that $25,000 of that sum was made up to the bank by his bondsmen; that another sum, I think about $16,000, was realized by the bank from some property which belonged to him, which was secured by attachment; and that the balance of the $64,000 had never been made up to the bank, and he had remained a fugitive from justice from that day to this.

This is the charge; and I submit in the outset, in reply to a suggestion made by the Senator from Indiana, that it is not a question of morals; it is a question of criminality. If it be true as charged, then the Senator from North Dakota became amenable to the criminal laws of the country, and if tried and convicted for the offense would have been liable to imprisonment in the penitentiary. This is not a question of morals; it is not a question of taste, or religion; it is not a question of choosing our associates and selecting the men whom we may like to associate with. It is a question whether, these charges having been made boldly and specifically and not denied either by the person against whom they are made or by anybody else, the Senate has any duty to perform. These charges, as I said, first appeared in the public press on the 15th day of March last. No notice was taken of them in the Senate until the 28th day of March.

Mr. PALMER. Will the Senator from Connecticut allow me to ask him a question?

The VICE-PRESIDENT. Does the Senator from Connecticut yield to the Senator from Illinois?

Mr. PALMER. To ask a single question.

Mr. PLATT. Certainly.

Mr. PALMER. I ask the Senator if the matters he speaks of have been distinctly charged by any responsible person in this body?

Mr. PLATT. I do not understand the Senator.

Mr. PALMER. I ask the Senator whether any responsible person has made the charges, to which he refers, in this body?

Mr. PLATT. Whether any Senator has risen here and made the charge?

Mr. PALMER. Yes; any responsible charge. Whether any charge is before the Senate for which anybody is responsible?

Mr. PLATT. It occurs to me that the resolution which was presented on the 28th day of March is an answer to that inquiry.

As I was saying, no notice was at first taken of these charges, which, by the way, are not confined now to one or two newspapers but have gone the length and breadth of this land till all the people of the country know what they are. But on the 28th day of March the Senator from Massachusetts [Mr. HOAR], who is a member of the Committee on Privileges and Elections, having waited a period of thirteen days, to see whether any action would be taken from the other side of the Senate, introduced the following resolution:

That the Committee on Privileges and Elections be directed to investigate the allegations recently extensively made in the public press charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with the offense of criminal embezzlement, to report the facts of the transactions referred to, and further to report what is the duty of the Senate in regard thereto.

I think that is a sufficient answer to the inquiry of the Senator from Illinois.

That resolution was laid on the table and ordered to be printed. It was not referred to the Committee on Privileges and Elections. No further action was taken in the Senate until the 10th of April, when the Senator from Massachusetts submitted another resolution, stating at the time, I believe, that as he understood it, it was a resolution which had been agreed to by the Committee on Priv-

ileges and Elections modifying somewhat the original resolution. I will read the important part of that resolution:

That the Committee on Privileges and Elections be directed to examine the allegations recently made in the public press charging WILLIAM N. ROACH, a Senator from the State of North Dakota, with certain criminal offenses committed while cashier or officer of a bank in the city of Washington, and to ascertain the facts and circumstances so far as to enable the committee to determine and report what are the duty and power of the Senate in regard thereto.

Modifying the original resolution, so that by the resolution then submitted the only duty of the committee would be to make sufficient inquiry to determine what was the power and duty of the Senate in relation to this matter.

These resolutions have been steadfastly resisted until yesterday, when the following resolution was submitted by the Senator from Maryland [Mr. GORMAN] as a substitute for resolutions heretofore presented by the Senator from Massachusetts and the Senator from New Hampshire [Mr. CHANDLER], the resolutions of the latter having reference to another matter:

Resolved, That the Committee on Privileges and Elections be directed to inquire into and consider the question whether the Senate has authority or jurisdiction to investigate charges made against a Senator as to conduct or offenses occurring or committed prior to his election, not relating to his duty as Senator or affecting the integrity of his election.

Near the close of the session on yesterday the Senator from Tennessee [Mr. HARRIS] moved to lay all these resolutions on the table, thus ending and disposing of the whole matter if the vote were successful.

Earlier in the day the Senator from North Dakota, for the first time, himself asked that the matter might be investigated, which request was immediately followed by a denial on the part of the Senator from Mississippi for himself of the right or power of the Senate to make any inquiry or investigation relating to the matter; and a little later by the Senator from Indiana, speaking, as he said, for the Democratic side of the Chamber, utterly denying the right of the Senate to investigate under any circumstances.

Now, Mr. President, this is a pretty important question, whether the Senate has the right, under any circumstances whatever, to inquire into the character or conduct of a sitting member as resulting from acts committed prior to his election to the Senate. If the Senate has the right and the power, I think it will be very hard for Senators on either side of this Chamber to say that it ought not to be exercised in this case. If the Senate has not the right or power, then all the talk to which we have listened, to the effect that the alleged offenses were committed long ago, that the person alleged to have committed them did not flee to Canada, has been under the American flag, "and stood it out like a man," and that his conduct ought not therefore to be inquired into, are not to the point at all. The question is whether the Senate has the right to do it—whether it has the power to do it. If it has, I conceive that its duty is plain.

It is said in denial of this right that the Constitution has prescribed the qualifications of Senators, and no matter whom the State may send here, so long as he possesses the qualifications which are prescribed in the Constitution, this body has no power to inquire further, has no power to exclude him, or if once seated has no power to expel him, no matter how great may have been his crime, no matter how vile or criminal may be his character, no matter how much his presence here may disgrace the United States Senate.

It is true that the Constitution has prescribed three positive conditions which a person must satisfy in order to be elected to this body. It has provided that a person to be eligible to the office of Senator must be an inhabitant of the State, must have been nine years a citizen of the United States, and must be of the age of thirty years. It has also provided negatively in the fourteenth amendment that he must not have been an officer of the United States and left it to go into the rebellion. I do not state that clause fully, but I state the substance of it.

If, then, the Senate is shut up to determine simply whether these qualifications exist in case of a person who comes here presenting the credentials of his State, the Senator from Indiana and the Senator from Mississippi are right, and a man who may have committed the most atrocious crime, which at the time of his election was unknown, must be admitted here and retained here although it comes out fully after his election. Nay, more——

Mr. GEORGE rose.

Mr. PLATT. A single word. If the Senator from Indiana is right, and we can not go beyond the specified constitutional limitations to inquire into the qualifications of a Senator, then a convicted criminal who has just served a term in the penitentiary may be accredited here by a State and we are powerless to reject him or to expel him.

Mr. GEORGE. With the permission of the Senator from Connecticut——

The VICE-PRESIDENT. Does the Senator from Connecticut yield to the Senator from Mississippi?

Mr. PLATT. Certainly.

Mr. GEORGE. I wish to ask the Senator a question with a view of ascertaining more definitely than I now understand what his position is on one point. I should like to know if it be the position of the Senator from Connecticut that, upon the presentation of the credentials of a person elected to the Senate, the Senate, under its power to inquire into the qualifications of Senators, may then make an inquiry and refuse him his seat for any cause other than his want of one of the three qualifications mentioned in the Constitution?

Mr. PLATT. The Senate has instituted such an inquiry, as I shall show, in several cases. I have no doubt that it has the right to do it.

Mr. GEORGE. The point is, does the Senator insist that that is the true meaning of the Constitution, and that such a person may be rejected from his seat in the Senate by a majority vote of this body, he possessing all three of the constitutional qualifications, simply because he does not possess some other qualification which the Senate thinks he ought to possess?

Mr. PLATT. I hold that if it had appeared when the Senator from North Dakota presented himself here that he was charged with criminal embezzlement, it would have been the duty of the Senate to have inquired into it before receiving him as a Senator into this body. At the same time I do not conceive that the inquiry made by the Senator from Mississippi is precisely pertinent to the question at issue.

I was saying that there are these three requisites mentioned in the Constitution of the United States as originally adopted, and the one requisite mentioned in the fourteenth amendment, which must be observed by the States in electing a man to the Senate. But the Constitution goes further than that, and it provides:

Each House shall be the judge of the elections, returns, and qualifications of its own members.

That is a power which is conferred, I believe, upon every legislative body in Christendom. It is essential to the correct and proper constitution of the body, and, to my mind, it qualifies the provisions of the Constitution that a man must be thirty years of age, must be an inhabitant of the State, must have been nine years a citizen of the United States, and must not have engaged in the rebellion under certain circumstances, by placing in the hands of the Senate the right to make other inquiry as to the qualifications of the Senator in order that the integrity of the body, its honor, and its purity shall not be intrenched upon.

Mr. President, I think no precedent can be found in the United States, in England, or in any other civilized country where the doctrine has been upheld that the Senate or the House was held down in judging of the qualification of its members to the rigid constitutional requisite for election as a Senator or a Member of the House of Representatives. On the contrary, although these precedents are in the nature of the case few, it has always been held that jurisdiction was given to the Senate or to the House to inquire into and investigate under such circumstances. It has been done at least six times by the Senate, and it has been done over and over again by the House. From the necessity of the case it must be that the Senate has a right to inquire beyond these three positive requirements which the Constitution provides and the negative requirement which the fourteenth amendment provides.

Mr. GRAY. Mr. President, may I ask the Senator a question?

The VICE-PRESIDENT. Does the Senator from Connecticut yield to the Senator from Delaware?

Mr. PLATT. I wish to be very courteous, but I am making an argument rather difficult to make with interruptions.

Mr. GRAY. All right.

Mr. PLATT. I will, however, yield to the Senator.

Mr. GRAY. No, go ahead. I will not disturb the Senator.

Mr. PLATT. Mr. President, if this be not so, then no matter how much an improper person may have concealed his crime, or, as I said a little while ago, no matter how enormous it may be, the Senate is bound to receive him if the State sends him here. The State may have no knowledge of his crime. It is to be presumed that a State will not send a Senator here if it has knowledge that he is charged with a criminal offense. It is to be presumed that the State of North Dakota would not have sent the sitting member here if the State of North Dakota had known what we now know. A State can not recall a Senator once elected, and if the Constitution gives us no power to go beyond the inquiry as to whether a Senator possesses the requisites which are mentioned in the Constitution, then there is no remedy, and an utterly unfit, disreputable, criminal, treasonable person may occupy a seat on the floor of the Senate and the Senate is powerless to prevent it.

I say that it can not be assumed, unless the letter of the Constitution is so plain as to make it beyond question, that it was ever intended so to tie the hands of a legislative body that it must submit to disgrace, to humiliation, to tolerate as one of its members a man who may have been guilty of the blackest crimes. Do Senators on the other side of the Chamber contend that we should be obliged to receive a physical leper in our midst if a State should elect and send him here?

Mr. GRAY. What would you do about it?

Mr. PLATT. I would expel him. I would refuse, in the first place, to receive him; and if he had been received without the knowledge of his disease, I would expel him.

In one case the Senate made inquiry into the condition of a Senator sent here by the State of Connecticut, John M. Niles. It was alleged that he was insane. The Senate took jurisdiction of that case, inquired into it, and decided that, while from illness his mind was somewhat impaired, he was not insane, and admitted him.

Are we obliged to receive here a raving maniac if a State chooses to send one here? If he has been a raving maniac and comes here in a semilucid interval, can we not inquire into the prior facts?

Each House shall be the judge of the * * * qualifications of its own members.

I apprehend that the trouble with the Senators upon the other side arises from this, that they have mistakenly supposed that that clause refers only to the constitutional requisites which a man must have in order to be elected a Senator. It does not say that; it does not say each House shall be the judge of whether a person possesses the constitutional requisites; that each House shall be the judge whether a person presenting himself as a Senator is eligible under the Constitution; but it says they shall judge of the qualifications of their own members.

Is there nothing which goes to the qualification of a member of this body except the question how old he is, where he was born, and in what State he lives? Is that the position which Senators take? Do Senators hold that the Constitution means that anybody and everybody 30 years old, nine years a citizen of the United States, and an inhabitant of the State, possesses all the qualifications which are required for a Senator, and that criminality and treason and other vileness do not constitute disqualification to a seat in this body?

Mr. President, I do not so read the Constitution. As the Senator from New Hampshire [Mr. CHANDLER] well showed yesterday, it has not been so interpreted by any legislative action either in the Senate or in the House of Representatives, or in Parliament. I do not know but that the doctrine has been stated before as baldly as in the present case yesterday by the Senator from Indiana [Mr. VOORHEES]. I think the Senator from Indiana is consistent with the report which was made by the Judiciary Committee, with Mr. Butler at its head, in the Crédit Mobilier cases, in which report he, as a member of the committee, concurred; but the House of Representatives did not sustain that report. The House of Representatives sustained the Poland report, which distinctly declared the right of the House to expel for acts committed before a person became a member of the House. So in the only instance where in any report this doctrine has been laid down either in the House or the Senate, it has been disagreed to, or else my reading of the precedents is faulty.

Can we expel for any offense committed prior to a Senator being admitted to a seat here? If we have the right to go beyond an investigation of the three formal requirements of the Constitution and the clause of the amendment which disqualifies a man who has taken part under certain circumstances in the rebellion; if, as I believe, not only on the plain reading of the Constitution, but on the very reason of things and of all the precedents, we have a right to make other inquiries as to the qualifications of the Senators who present themselves here, I imagine it follows as a matter of course that if a person is admitted here without knowledge of circumstances an inquiry into which would have prevented his reception here, we may expel.

The Senator from Mississippi [Mr. GEORGE] says that from the reading of the clause relating to expulsion it is evident that it means only that the Senate has the power to expel a member for acts committed by him in his official capacity or acts committed by him while in office. I do not so read it. I do not see anything in the language or in its connection with other portions of the clause which implies any such doctrine.

Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and,—

A comma before and after the word "and"—

with the concurrence of two-thirds, expel a member.

The clause has no limitation whatever. It rests, as has been said, purely upon the discretion of the Senate. There is nothing very alarming about that. Senators upon the other side say that the Constitution rests the right of a man to a seat here upon the presumption that the State will not elect a man who ought not to be elected. Is not the argument much stronger that the Constitution rests the power to expel by two-thirds upon the discretion of the Senate or the House, believing that the discretion will not be improperly exercised? It is a discretion given to the Senate and to the House, and to a legislative body, from the necessity of the case, and because no rule could be laid down by the Constitution governing the expulsion of members, because every case that arose would arise upon its own peculiar facts and circumstances.

The only way of purging the body, the only way of preserving its purity, the only way of having capable, proper legislators in the body, was to place in the discretion of such a body the power to purge itself. It has no limitation whatever except the discretion of the Senate. It may be, as the Federalist says in relation to the power of impeachment, "an awful discretion," but it was a discretion which was committed to the Senate in the matter of impeachment confessedly. That discretion having been committed to the Senate in cases of impeachment, there is no reason to argue that it was not intentionally committed to the Senate in cases of expulsion.

Mr. MITCHELL of Oregon. Will the Senator permit me to ask him a question?

Mr. PLATT. Yes.

Mr. MITCHELL of Oregon. I do not know that I agree entirely with what the Senator is saying, but I want to get the view of the Senator. I suppose the Senator from Connecticut understands that the words "disorderly behavior" in the clause to which he has adverted refers to disorderly behavior of a member while he is a Senator?

Mr. PLATT. Undoubtedly.

Mr. MITCHELL of Oregon. Then the Constitution says, "and, with the concurrence of two-thirds, expel a member." I understand the Senator to claim that there is no qualification there, but that the expulsion may be for anything for which, in the judgment of two-thirds of the Senate, a person sitting here as a member ought to be expelled, whether his disqualification, whatever it may be, occurred either before he became a Senator or afterwards?

Mr. PLATT. Certainly. If there is anything in the Senator's suggestion, it claims too much. If he would read the clause this way: "Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member for disorderly behavior," he would cut off all power of expulsion except for disorderly behavior, a position which no Senator will take.

Mr. MITCHELL of Oregon. If the Senator will allow me, what I wanted to know was the exact reason assigned by him for making the one general and the other special.

Mr. PLATT. The limitation to punishment is for disorderly behavior. If a Senator takes a bribe, if a Senator robs a bank, if a Senator commits murder, that is not disorderly behavior within the meaning of the Constitution, and the Senator will not for a moment contend that a member might not be expelled for those causes. The clause does not limit itself to disorderly behavior. Every expulsion which has taken place in the Senate is a contradiction of the doctrine that the power of expulsion is limited to cases of disorderly behavior.

Unless the Senator narrows the clause to that, which he will not do, there is no chance to narrow it at all. I repeat that this power of expulsion has been asserted over and over again to be without limitation, a power which was given to the legislative body, to the Senate, from the very necessity of the case, and because it was of the highest consequence to the nation that its legislative bodies should be kept pure, and that traitors and criminals and vile people should not be allowed to sit here, whether the acts which made them traitorous and criminal and vile preceded or succeeded their admission to the body. There can be no higher reason; and it is a reason so necessary and so high that it seems to me it is decisive of the question of power, especially in view of the fact that the power is given without qualification and without limitation, and has always been asserted to be without qualification and without limitation. It is well put in an extract from the report of Mr. Adams in the Smith case, referred to yesterday in these words:

The power of expelling a member for misconduct results on the principles of common sense from the interest of the Nation that the high trust of legislation should be vested in pure hands.

Then, supposing that a man blackened all over with treason and treasonable conduct, as was alleged in the case of Smith, is proceeded against for expulsion, he said:

Must the assembled rulers of the land listen with calmness and indifference session after session to the voice of notorious infamy until the sluggard step of municipal justice can overtake his enormities? Must they tamely see the lives and fortunes of millions, the safety of present and future ages, depending upon his vote recorded with theirs, merely because the abused benignity of general maxims may have remitted to him the forfeiture of his life?

To apply that reasoning to this case—I make no charge; I do not say whether these charges are true—but must we, if they be true, sit here and legislate against embezzlement when one of our members is an embezzler? Can he vote on a question of that sort? No, Mr. President. Mr. Adams goes on:

Such, in very supposable cases, would be the unavoidable consequences of a principle which should offer the crutches of judicial tribunals as an apology for crippling the Congressional power of expulsion. Far different, in the opinion of your committee, is the spirit of our Constitution. They believe that the very purpose for which this power was given was to preserve the Legislature from the first approaches of infection; that it was made discretionary because it could not exist under the procrastination of general rules; that its process must be summary, because it would be rendered nugatory by delay.

What have been the precedents of the Senate? The Senate has taken jurisdiction in at least six cases for acts of Senators committed before they became members of this body, jurisdiction to the extent of an inquiry, certainly; and that is all which is at issue here. It is not a question of whether under the facts and circumstances the Senator ought to be expelled which we are arguing now; it is not a question whether there is anything in the circumstances which makes it proper that we should exercise clemency, and makes it proper that we should forgive or forget; but it is a question whether the Senate has the right to inquire; and the Senate has done it six times. It did it first in the Humphrey Marshall case.

Before alluding to the Marshall case let me say, however, that I think I agree with the Senator from Indiana that in the impeachment case of Blount it was decided that a Senator was not an impeachable officer. I know the plea raised two questions, one whether a Senator was an impeachable officer, and the other whether, having been expelled from the Senate, he was then liable to impeachment; but, as I have read that case, I think all the arguments centered around the proposition that a Senator was not a civil officer of the Federal Government, and that only civil officers of the Federal Government were by the Constitution liable to impeachment.

But what has the impeachment case of Blount to do with this? It is perhaps true that in the expulsion case of Marshall it was argued that the cases of impeachment and expulsion rested upon the same principle; but the same Senate which expelled Blount refused to impeach him. Impeachment is one thing. Impeachment is to punish for high crimes and misdemeanors; expulsion is to preserve the purity and integrity of the body. Expulsion is not punishment; impeachment is punishment. So when the Senate expelled Mr. Blount from the Senate, the House, not content with expulsion, the same day when the vote was taken in the Senate inaugurated proceedings of impeachment, the object being to punish him and to disqualify him from holding in the future any office of trust and profit.

What was the Humphrey Marshall case? He was a Senator from March 4, 1795, to March 4, 1801.

In February, 1796, the Vice-President laid before the Senate a letter from the governor of Kentucky and a memorial from the Representatives of said State, which memorial stated that in February, 1795—

Which was a month before his election—

a pamphlet was published by George Muter and Benjamin Sebastian (two judges of the court of appeals), in which they said that Humphrey Marshall had had a suit in chancery in said court of appeals, in which, it appearing manifest from the records and documents that he had committed a gross fraud, the court had given a decree against him; and that in the course of an investigation he had been publicly charged with perjury.

That was the charge against Humphrey Marshall, that a month prior to the time when he was elected by the "sovereign State" of Kentucky, which, in the estimation of the Senator from Indiana, speaking for the other side of the Senate, had the unquestioned right to say that they would send him here although he had been guilty of perjury. A month before his election as Senator he had been charged in Kentucky with perjury. Did the Senate say, "We have no right to inquire"? Not at all. Mr. Marshall promptly requested an inquiry. It was referred to a committee; the committee investigated it, reported, and held that there was nothing in the case to justify the expulsion of Humphrey Marshall. The Senate unhesitatingly exercised the power to inquire into the case. In other words, it took jurisdiction.

It is unfortunate, perhaps, that the debates of that day are not fully reported; but there is nothing either in the report of the committee or in the Annals of Congress to show that any living Senator suggested that the Senate could not inquire into the conduct of a Senator previous to his election. The case seems to have been put upon the ground that the Senate had no right to inquire into the criminal practices of its members under any circumstances. That was to be left to the courts. If that was the decision of the case, it was overruled very shortly after in the Blount case, but it was a case——

Mr. GEORGE. Will the Senator allow me to ask him one question right there, not for an interruption at all?

The PRESIDING OFFICER (Mr. MANDERSON in the chair). Does the Senator from Connecticut yield?

Mr. PLATT. Yes, sir.

Mr. GEORGE. The Senator has emphasized in several parts of his interesting address this point: The power of the Senate to inquire, and stopped there. I should like to ask the Senator this question: Does he conceive that the Senate has the right to make an inquiry when under no possible result of the inquiry it can take action; or, in other words, can the Senate institute an inquiry merely for the purpose of being informed of the facts inquired about, without reference to the power of the Senate to take action upon the facts when reported to it?

Mr. PLATT. I do not think the question proposed by the Senator from Mississippi is important to this issue, because if I succeed in maintaining anything it will be that we have the power of expulsion, and if we have the power of expulsion, we have the power of inquiry and the right of inquiry.

I understand that in the Hallet Kilbourn case, as it is called, the Supreme Court is supposed to have intimated that the legislative body had no right to inquire into a matter where they could not take any definite action upon the facts. I never read the decision exactly in that way, but I know that is claimed to be the effect of that decision.

I have spoken of the Marshall case. The case of John Smith, which was referred to yesterday, is not important upon this point, because that was for something that he was guilty of, if at all, during the time he was a Senator—for a participation in the conspiracy of Aaron Burr; but it would be a perfect answer if it were set up that there had been no prosecution, there had been no conviction, there had been no passing by a court upon these charges made against the Senator from North Dakota—if that was the defense set up, then the case of John Smith would be conclusive that that was not a good reply.

Benjamin Stark presented credentials from the governor of Oregon on the 6th day of January, 1862, to fill a vacancy in the Senate. Objection was made, when Mr. Stark's credentials were presented, to his admission, on the ground that he was disloyal. The Senator from Indiana would have said, "What difference does that make? Suppose he is disloyal? The 'sovereign State' of Oregon is clothed by the Constitution with determining whom it will send here, and if it sends a disloyal man the Senate has nothing to do with it." The Senator said yesterday that we ought not to suppose cases that are not supposable; but this was not a supposable case; it was an actual case. The State of Oregon had sent a Senator here against whom disloyalty was charged.

The Senator from Indiana would have quoted the Constitution and he would have said: "Mr. Stark is 30 years of age, he has been a citizen of the United States nine years, and he lives in the State of Oregon"—the amendment to the Constitution was not passed then—"and the Senate can not inquire further. Loyal or disloyal, his State has sent him here, here he must be admitted, and here he must sit." But the Senate did inquire, and inquired at great length, and finally passed a resolution admitting him without prejudice to the Senate's right of expulsion. That was how he got in. It was a long case. From the headnote it is said:

After a debate on the *prima facie* right of Mr. Stark to the seat, the resolution was agreed to. February 7—

A whole month; it had been in the mean time referred to the Judiciary Committee and reported back—

February 7, the committee, "without expressing any opinion as to the effect of the papers before them upon any subsequent proceedings in the case," reported a resolution that Mr. Stark was entitled to take the oath of office.

* * * * * * * * *

February 27 the resolution reported by the committee passed after amendment, and Mr. Stark took his seat. February 28—

The very next day—

a resolution was submitted that the papers relating to the loyalty of Benjamin Stark be referred to the same committee, with instructions to investigate the charges preferred against him. March 18 this resolution passed the Senate, having been so amended that the papers were referred to a select committee, instead of to the Committee on the Judiciary.

A great amount of testimony was taken, a great many affidavits were presented, and a very elaborate report was made. It is true that this report found that Benjamin Stark "is disloyal," and it is true that the resolution for his expulsion did not pass by a two-thirds vote. I do not know that it received even a majority vote. I think it did, however; but I am now on the question of inquiry, and the Senate inquired. It did not for a moment set up this new doctrine, this startling doctrine, that the Senate could not inquire into the question of whether a man sent here by a sovereign State was disloyal, though he had all the other constitutional qualifications. If the Senate has a right to inquire into the disloyalty of a man, if the Senate has a right to reject or expel a man for treasonable conduct, for being engaged in levying war, then it has a right to inquire into some other qualifications than those which the Senator from Indiana says are the only qualifications which it may consider.

If Aaron Burr had been elected by his State to come here to the doors of the Senate, even after the dismissal of the proceedings against him in the court of Virginia, and said, "I am 30 years of age, I am an inhabitant of the State of New York, and I have been nine years a citizen of the United States," would the Senate have been powerless to have made any other inquiry into his qualifications? Would not that great notorious fact, even though he had escaped the clutches of the law, that he had been engaged in a treasonable conspiracy against the United States, have been a fact which the Senate could have considered? Would the Senator from Indiana then have said that we had no power to sit upon the morals of a man who may present himself here, that we had no power to determine whether he was agreeable to us or not, and that Senators who asked for an inquiry were Pharisees and hypocrites and inquisitors?

It would not have taken long to settle that question. Had Aaron Burr presented himself here with the credentials of a "sovereign State" back of him, the Senate would have discovered that it had some power to inquire into other qualifications of a person claiming a seat in this body. In the Stark case there was beyond question an inquiry into acts antecedent to the election.

So also in the Rice case, referred to yesterday, which did not result in expulsion. I do not know that this inquiry would result in expulsion. It is possible there is some palliating circumstance to be urged in the case of the Senator from North Dakota; it is possible that the charges so directly and specifically made may not be proved to be true; it is possible that this Senate may think that a man fleeing from justice to a sparsely settled State, living with his crime unknown, and coming back for the first time to the scene of his acts as a Senator of the United States, is a concatenation of circumstances which makes it improper for the Senate to visit the penalty of expulsion upon him; but the Senate has the right to inquire, a right never denied, and a right repeatedly exercised by the Senate.

As to the case of Mr. Rice, who was Senator from Minnesota from May 12, 1858, to March 3, 1863, I find:

May 12, 1858, the credentials of Mr. Rice were presented, and he took his seat in the Senate. On the same day the following resolution was submitted by Mr. Harlan, of Iowa, for consideration:

"*Resolved*, That a committee be appointed to investigate the allegation of fraud and extortion made against Henry M. Rice, as agent of the Secretary of War, in the sale of the Fort Crawford reservation, by settlers on said reservation, and that said committee have power to send for persons and papers.

That was for acts committed before he became a Senator. There were pretty good Senators and there were pretty able men in the Senate at that time, but no one of them rose to his feet and said: "Mr. Rice is 30 years of age, an inhabitant of the State of Minnesota, and nine years a citizen of the United States, and that is all you have a right to inquire about." The Senate passed a resolution—

That a committee be appointed to investigate the allegation of fraud and extortion made against Henry M. Rice, as agent of the Secretary of War, in the sale of the Fort Crawford reservation, by settlers on said reservation, and that said committee have power to send for persons and papers.

That was on the 12th of May, 1858. On the 14th of May Mr. Rice submitted a similar resolution, which was amended, and agreed to May 15, 1858.

On the 9th day of June a report was made, nearly a whole month having been consumed in the process of inquiry, in which it was said that there was—

Nothing in the developments of the investigation which, in the opinion of the committee, tend to disqualify him for a seat in the Senate; they herewith submit the record in the case as a part of this report, and ask to be discharged from the further consideration of the subject.

They went to the merits of the case. They never for a moment had conceived this new-fangled doctrine, put up for the first time now, to shield a man against whom there are charges of the gravest character from an investigation; that is, that the Senate could only inquire as to how old a man he was, where he lived, and what his citizenship was. I will not take time to refer to the particular circumstances of three other cases, those of Powell Clayton, Lafayette Grover, and Stanley Matthews. They were stated yesterday by the Senator from New Hampshire [Mr. CHANDLER]. In each of these cases the Senate inquired into the truth or falsity of charges as to acts occurring before their election as Senators.

I submit, Mr. President, that after these six precedents in the Senate, and none to the contrary, and after the House of Representatives, in a contested case where the question was made, affirmed the right of inquiry into the conduct of a member for acts committed prior to election, it is too late to bring forward and press here this narrowest of all the narrow attempts to construe the Constitution in the direction of State rights.

What Mr. Adams said in the Smith case is quoted approvingly in a note on page 236 of Kent's Commentaries, Lacy's edition:

The power of expulsion is in its nature discretionary, and its exercise of a more summary character than the power of judicial tribunals.

Mr. President, the people of this country will be hardly able to understand the position of the Democratic side of this Chamber. The people of the country will hardly be able to understand the fine-spun arguments upon which an inquiry into these serious charges is to be denied. There has been a good deal said by the people of the country, and a good deal, I think, which is unjust, about the character of the Senate. I have heard a Senator on this floor within three days charge that the Senate was coming under the influence of aggregated capital and corporate wealth.

There is a great deal said among the people about the character of the Senate, and they will not understand why it is that when a resolution is introduced to inquire whether one of its members, charged since his election with criminal embezzlement occurring before election—charges unknown at the time of his election or at the time of his admission here—is or is not guilty of such embezzlement, the Senate refuses to consider it. They will hardly understand how it is that the Senate, when that Senator himself stands up, not denying the charges, but asking to have them investigated, refuses to investigate and lays the resolution on the table.

They will not follow the Democratic side of the Chamber in the other excuse which they make. They will not hold that the Senate is justified in refusing to investigate this charge because, forsooth, it is said that there are other Senators here who ought to be investigated. They may believe that there are other Senators here who ought to be investigated, but they will not hold that to be a valid excuse for laying upon the table and thus finally disposing of a resolution which proposes to proceed to the investigation of one Senator.

Mr. President, there are political sides in this Chamber. We are either Republicans or Democrats or Populists; but whatever we may be in our political views, we are Senators, and we have some duties to perform as Senators. For one, speaking for myself, I desire to say that no amount of sneers, no amount of insinuations by Senators on the other side of the Chamber will deter me from the performance of what I conceive to be a plain duty in this matter.

Now, I want to say one other word. If there be any Senator here against whom any other Senator can bring the charge of criminal dishonesty for anything he did before he became a member of this body, I not only will but I want to vote for an inquiry into the facts and circumstances of that Senator's conduct. I agree that the Senator from Indiana is a man who, as he yesterday proclaimed, would hesitate about wounding the character of any man, and especially the character of any Senator, by insinuations or aspersions or by giving credence to newspaper reports. I therefore absolve him from any delinquency in this matter; but if it were believed for a moment, if it had been at any time in the past five years believed for a moment, that any Senator was sitting on this side of the Chamber against whom there was a reasonable presumption raised of having been guilty of criminal dishonesty before he became a member of this body, there would have been found some Senator sitting on the other side of the Chamber not so tender-hearted, not so fearful of wounding the sensibilities of his brother Senators as the Senator from Indiana, who would have introduced a resolution of investigation.

Mr. DOLPH. On this side, too.

Mr. MILLS. Mr. President——

Mr. HARRIS. Will the Senator from Texas yield to me for a single moment?

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Tennessee?

Mr. MILLS. I do.

NOTIFICATION TO THE PRESIDENT.

Mr. HARRIS. I should like to have the resolution, which was passed some days ago, to appoint a committee to wait upon the President disposed of. The Senator from Massachusetts [Mr. HOAR] moved to reconsider the vote by which the resolution was agreed to.

The PRESIDING OFFICER. The resolution will be read for information.

The Secretary read the resolution, as follows:

Resolved, That a committee consisting of two Senators be appointed by the Chair to wait upon the President of the United States and inform him that unless he may have some further communication to make the Senate is ready to adjourn without day.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution? The Chair hears none.

Mr. HOAR. I wish to make a suggestion to the Senator from Tennessee, if the Chair please. It is my desire, and it is the desire of Senators on this side of the Chamber, that there should be a roll call upon the resolution in regard to the investigation of the Senator from North Dakota [Mr. ROACH]. I understand that a motion to lay the resolution upon the table has been proposed; indeed, it was made and withdrawn. If that motion

should be renewed and the call be had on it I should be content, or if the vote should be on the amendment of the Senator from Maryland [Mr. GORMAN] I am willing in that case to withdraw my motion to reconsider the pending resolution, with the understanding that before the Senate adjourns that question will be put and voted upon in the Senate. I withdraw the motion to reconsider the vote by which the pending resolution was agreed to, as I understand the Senator from Tennessee, as far as he is concerned, assents to that proposition.

The PRESIDING OFFICER. The motion to reconsider being withdrawn, the resolution has heretofore been adopted by the Senate,

Mr. HOAR. So I understand.

Mr. HARRIS. The Chair will appoint the committee.

The PRESIDING OFFICER. The Chair appoints the Senator from Tennessee [Mr. HARRIS] and the Senator from Ohio [Mr. SHERMAN] as the committee under the resolution.

CHARGES AGAINST SENATOR ROACH.

Mr. MILLS. Mr. President, the inquisitorial proceeding which is now sought to be instituted by the Senate must rest upon one of two propositions; either that this body has it in its power to add to the constitutional qualifications prescribed for Senators and prevent the Senator from North Dakota from retaining his seat by a majority vote, or that the body must exercise its constitutional power to expel him by a two-thirds vote.

It was announced by the Senator who has just yielded the floor [Mr. PLATT] that it is a "new-fangled" doctrine in this Government that Senators must possess the three constitutional qualifications of age, citizenship, and residence, and those alone. I beg to assure the distinguished Senator from Connecticut that he has not thoroughly investigated the question, or he would not announce that as a "new-fangled" doctrine either in this body or in any part of the United States.

One of the most, if not the most, distinguished of all the commentators who have written upon the Constitution, and a gentleman who took the latitudinous views of the Senator from Connecticut and resided in his own section of the country, long ago laid down the proposition, which has been announced and sustained by the great lawyers and statesmen of the United States for a century, that the Constitution of the United States prescribes three qualifications for a Senator and three alone, and that the expression of those three excludes all others. He must have United States citizenship for nine years; he must be an inhabitant of the State which he represents; and he must have attained to the age of 30 years. There are these three, and only these three, qualifications.

As to whether a Senator possesses the other qualifications that commend him to the acceptance of the people of a State, it rests with them to determine and not with this body. He may possess the three constitutional qualifications and still not be qualified in the judgment of the State to be chosen their Senator. He may be ignorant, untruthful, untrue to his constituency, or he may have and maintain political opinions opposed to theirs. For these qualifications they are the judges, and they alone. But for the necessary qualifications to hold the office when chosen the Constitution permits this body to consider but three, and the three prescribed by the Constitution. Having satisfied themselves that a Senator has these three, the investigations and labors of Senators are at an end.

I call the attention of the Senator from Connecticut [Mr. PLATT], who has entertained us so learnedly on this question, to the first volume of Story on the Constitution, section 625. He says:

> It would seem but fair reasoning, upon the plainest principles of interpretation, that when the Constitution established certain qualifications as necessary for office, it meant to exclude all others as prerequisites.

It is unnecessary to read extendedly. What I have read is sufficient. It declares the principle clearly that no qualifications can be added to those prescribed by the supreme law. This is the rule in the courts and should be the rule here. This principle was ratified in both branches of Congress many years ago. There were two cases brought to Congress, one to the Senate and the other to the House. Both of them came from the State of Illinois and both arose under the same provision of her State constitution, which rendered ineligible to Federal office any officer holding under the State government. In both cases it was declared that the State itself in organizing the powers of its government could not add one single qualification to that prescribed in the Federal Constitution, and that Congress could look no further than to see that the person elected had the qualifications defined in that instrument.

I call the attention of the Senate to the case of Trumbull, as reported in Bartlett's Decisions, where it was claimed that he was disqualified because of the provision in the State constitution of Illinois. This body at that time had among its members the ablest lawyers and statesmen then in the country, and it was decided by a vote of 35 to 8 that it was not in the power of the State to add a single item to the qualifications prescribed by the Federal Constitution. Let me read an extract from the remarks of Senator Crittenden, who was recognized in his day as one of the greatest lawyers in the country. He said:

> According to the plain meaning of the Federal Constitution, every inhabitant of a State, 30 years of age, who has been nine years a citizen of the United States, is eligible to the office of Senator. What more can be said about it? It is now supposed by those who contend that Mr. Trumbull is not entitled to his seat that it is competent for a State, by its constitution—and I suppose they would equally contend by any law which the Legislature might from time to time pass—to superadd additional qualifications. The Constitution of the United States, they say, has only in part regulated the subject, and therefore it is no interference with that Constitution to make additional regulations.
>
> This, I think it will be plain to all, is a mere sophism, when you come to consider it. If it was a power within the regulation of and proper to be regulated by the Constitution of the United States, and if that Constitution has qualified it, as I have stated, prescribing the age, prescribing the residence, prescribing the citizenship, was there anything more intended? If so, the framers of the Constitution would have said so. The very enumeration of these qualifications excludes the idea that they intended any other qualifications. That is the plain rule of ordinary construction; but, for a reason above all technical considerations, it is applicable here. The object of the Federal Constitution was to have a body framed by a uniform rule throughout the United States, coming here to constitute this great council of the country—coming here by the agency of the same elective power, the State Legislatures—coming here under the same requirements and with the same qualifications, and standing here upon a perfect and exact equality in all respects to represent the nation justly and equally, and with a sole regard to the common welfare of the Republic.
>
> Must not this have been the idea in the contemplation of the framers of the Constitution? Undoubtedly it must. We can not in justice to them impute any other view or any other motive. We are told now that they have only regulated the subject in part, and therefore, as to the residue, the States may regulate. That is the argument. How can you say they have only regulated it in part? I say they have given to it all the regulation which they intended it should have. They have prescribed but few qualifications. They have prescribed a broad and almost universal rule of eligibility. They intended to leave the honor of these seats open to every man coming within the prescribed qualification. This was the broad general principle of republicanism on which the Government was founded. Every man of the requisite age, if he has been a citizen for nine years and is an inhabitant of a State, is eligible to the Senate of the United States from that State. Out of this broad circle the Legislatures were told to make their own selection. That is the constitutional principle and the constitutional rule by which the Senate exists, and there is no other.
>
> We are told, however, that the States may superadd to what the Constitution of the United States regulates! Why, sir, the whole object of the Constitution of the United States could not be more completely subverted by eradicating from the Constitution the positive qualifications which it requires than it would be in substance and virtually by superadding qualifications. If the Constitution has not thought proper to make further qualifications, what is the reason of it? It is because its framers did not desire any other to be made. Did they intend carefully to make these qualifications, and then to leave it to the States to make any which, according to their casual will or wish or caprice, they might from time to time make! Was this grave body, intended to be the great council of the country, left to be changed and diversified by different tests to be made and applied in one State and in another State?
>
> I suppose, if that were the case, we should now have ringing in our ears calls for conventions to make new constitutions to denounce and disqualify Nebraska-bill men in one State and anti-Nebraska-bill men in another State. In one State we should be told none but a Catholic could be elected, and in another State none but an anti-Catholic. When these qualifications were once made, of course the States could change them from time to time as the public whim or public passion, animated and actuated by personal interests, by selfish purposes, and selfish projects, might dictate. One party would proscribe one party to-day and another to-morrow. You might use it for all these purposes; and would that accomplish the purposes of the framers of the Constitution? Surely not.

Now, let me give the vote of those who agreed to the proposition that the State could not add to the qualifications prescribed in the Constitution: Adams, Allen, Bell of Tennessee, who was not a small man; Bright, Brown, Butler of South Carolina, one of the ablest lawyers who ever sat in this Chamber, I believe at that time the chairman of the Judiciary Committee; Cass, a great statesman; Collamer, another; Crittenden, Dodge, Durkee, Evans, Fessenden, Fish, Foot, Foster, Geyer, Hale, Hamlin, Harlan, Sam Houston, Robert M. T. Hunter, James, Mallory, Mason, Pearce, Reid, Rusk, Sebastian, Seward, Sumner, Toucey, Wade, Wilson, and Yulee, the vote being 35 to 8.

These are the great lawyers and statesmen who said nearly forty years ago that no qualifications could be added to those prescribed by the national Constitution, and I respectfully submit that it is not a new doctrine, but an old and accepted doctrine both in the courts and in Congress. If the States can not add to the qualifications of the servants they choose to represent them, certainly the Federal Congress to which they are sent can not do it, and if both branches can not do it by law, neither can one do it.

It is said: Suppose a man had just served out his term in the penitentiary, could he be admitted here? If he had complied with the provisions of the law, paid the penalty of his crime, been restored, if it were possible, under the constitution and laws of his State, to full citizenship, and then his State had thought proper to send him to represent her here, he is entitled to be admitted. Is he to be punished twice for the same offense? Is he to suffer imprisonment by his State and proscription by this body for the same act? Is the Senate to get itself up on stilts and say that he shall not sit with us and be one of our members

because he is not acceptable to us? That he shall not be in fact what he is chosen to be, a representative of his State; but that he shall be the creature of the Senate?

It is an old adage, "Like priest, like people," and it applies to the representative as well as the priest. The representative will be a type of his constituency. Democratic constituencies do not send Republican representatives or Republican constituencies Democratic representatives, unless serious objections intervene to prevent the operation of the general rule. Protestants do not have Catholic priests nor Catholics Protestant priests. The people of North Dakota in accord with the general law, have sent a Senator who is the representative of his people, and Senators think he should represent them and their ideas. They say that grave charges are made against him and he must be investigated, and if they think the charges are true he is not acceptable to them, and his seat must be vacated. Let us reverse the proposition and see if it does not hold equally good. Suppose a State, having attained the highest civilization, touched the highest point of moral perfection, were to send to this body one of its most illustrious exemplars, and the Senate should be composed of blackguards, could they hold that the representative should not be admitted because he did not measure down to the moral standard of the body?

The position, of course, is extreme and the argument in its support either way is absurd. The Senate has nothing to do with the religion or morals of the person chosen, nor with his politics, nor with any feature of his past life. These are things with which his constituents have to deal, and they alone are the judges of everything touching his fitness to represent them except his United States citizenship, his age, and his inhabitancy of the State for which he is chosen; and when they elect a representative possessing these qualifications he is entitled to his seat, and he can not be denied it except by a palpable infraction of that Constitution which we have all sworn to support.

I invite the attention of the Senate to the case of Marshall, of Illinois, in the House of Representatives. This case, as I have said, arose under the same provision of the Constitution as that of Trumbull. It was decided the same way. The headnote to that case reads:

The State can not add to the qualifications prescribed for the Representative in Congress by the Constitution of the United States.

The report in this case was made by Mr. Bingham, of Ohio, then one of the ablest Representatives in that body, to which I refer, but from which I will not stop to quote. I do not know where any other doctrine prevails, except in this body at this time, where it is sought to start an investigation which can accomplish nothing, and the discussion can accomplish nothing further than to cast odium upon the representative of a sovereign State.

If we investigate, what can we do? Suppose the Senate should find in their judgment probable cause to believe him guilty, what then? You say he is charged with embezzlement. Has this body jurisdiction to try felony cases or even misdemeanors? This body is a part of the legislative assembly of the nation. Its duty is to help make laws, not to try and punish offenses. Courts have power to hear and determine, but this body has not. Courts have power to summon witnesses and to confront the accuser and the accused, but this body has no such power except in support of the jurisdiction given to it by the Constitution.

It has been deemed absolutely essential to the preservation of free government that the legislative shall be divorced from the judicial department of the Government, and that the executive, legislative, and judicial departments should be independent of each other. If the Senator from North Dakota has committed a crime, he is entitled to trial under the Constitution and laws of the United States before a jury of his peers. Until he is convicted he is presumed innocent. Englishmen have called the trial by jury the bulwark of English liberty. We have placed it in all our constitutions and laws, and we have made it the bulwark of American liberty.

When the Constitution of the United States was made it did not contain the guaranty of personal liberty, because the Government was one of delegated powers, and the power to try without jury was not given; but the jealous love of liberty caused its insertion in that instrument at the very beginning of the National Government.

The fifth and sixth amendments of the Constitution of the United States came to us from the revolution of 1688. I read from the first clause of the fifth article:

No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury—

except in certain cases in the Army and Navy. It is charged that the Senator from North Dakota has been guilty of embezzlement. If that be true, he is entitled to be tried by a jury of his peers, not by his enemies in this body, not by Senatorial accusers, not by political partisans. He is entitled to a fair public trial before the courts of his State and in the district in which he lives, and to be tried by men who are his peers, who will give him a fair trial.

In all criminal prosecutions—

The sixth amendment says—

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

He can have none of these in this body. Hence the Constitution of the United States prohibits this body from bringing him to its bar for trial. But it is said we do not propose to try him; we only propose to investigate him; that is all. We know that we can not impose any penalty on him; we know that we can not punish him; we simply want to investigate.

Suppose you begin the investigation. How are you going to investigate? You must summon witnesses. That is the way to investigate. You have got to take testimony. Suppose a witness refuses to testify, as Hallet Kilbourn did when the House of Representatives undertook to investigate something they had no rightful power to investigate and demanded of him to answer questions and he refused to answer, then what are you going to do? You are going to incarcerate your witnesses in jail, are you? Then what? They sue you for damages. Then what? The Government responds in an enormous verdict, as it did in the Kilbourn case, and the taxpayers of the country have got to pay for this little business of investigating where the Senate and House have no business to investigate. You can not enforce an investigation. You can not accomplish anything by it. Let me read a short extract from the opinion of the court in the Kilbourn case, 103 U. S., page 189:

As we have already said, the Constitution expressly empowers each House to punish its own members for disorderly behavior. We see no reason to doubt that this punishment may in a proper case be imprisonment, and that it may be for refusal to obey some rule on that subject made by the House for the preservation of order.

So, also, the penalty which each House is authorized to inflict in order to compel the attendance of absent members may be imprisonment, and this may be for a violation of some order or standing rule on that subject.

Each House is by the Constitution made the judge of the election and qualification of its members. In deciding on these it has an undoubted right to examine witnesses and inspect papers, subject to the usual rights of witnesses in such cases; and it may be that a witness would be subject to like punishment at the hands of the body engaged in trying a contested election for refusing to testify that he would if the case were pending before a court of judicature.

The House of Representatives has the sole right to impeach officers of the Government and the Senate to try them. Where the question of such impeachment is before either body, acting in its appropriate sphere on that subject, we see no reason to doubt the right to compel the attendance of witnesses and their answer to proper questions in the same manner and by the use of the same means that courts of justice can in like cases.

Whether the power of punishment in either House by fine or imprisonment goes beyond this or not, we are sure that no person can be punished for contumacy as a witness before either House, unless his testimony is required in a matter into which that House has jurisdiction to inquire and we feel equally sure that neither of these bodies possesses the general power of making inquiry into the private affairs of the citizen.

I plead to the jurisdiction of this court. It has no power to invade the sanctuary of a private citizen and inquire how he has lived or whether he has committed any offense or not. That belongs to the grand jury of his State and the grand jury of the district where it is charged that he has committed an offense. There he may go. There he may have the benefit of counsel to represent him. There he can have the witnesses to testify in his behalf and have a fair and impartial public trial, and that before an impartial jury. He can not have that here. The Constitution has, fortunately for the American people and for the liberties which they cherish and which are guarded by that instrument, slammed the door in the face of the Senate and House of Representatives against passing bills of attainder.

Mr. MITCHELL of Oregon. May I ask the Senator a question?

Mr. MILLS. Certainly.

Mr. MITCHELL of Oregon. Suppose the Senator who holds a seat on this floor commits a felony.

Mr. MILLS. I am coming to that question.

Mr. MITCHELL of Oregon. Would the Senate be compelled to wait until he was indicted and tried in the courts before proceeding against him?

Mr. MILLS. You may expel him for an offense he commits here. The gentleman is anticipating me. I am coming to that question. Perhaps I have said enough on the first point. I will now come to the other provision. If the Senator can not be ousted from his seat by a majority vote on the ground that he has not an additional qualification prescribed by the Senate in addition to that prescribed by the Constitution of the United States, then the only way to get rid of him is to expel him. For what may you expel him and for what may you punish any member of this body?

The power of this body is not unlimited. This is not a legislative despotism by any means. This body is clothed with certain limited enumerated powers, and the Government has been declared by the highest court in the land to be a government of enumerated powers. This body is vested with certain enumerated powers to enable them to execute the functions charged upon it by the Constitution. It may compel the attendance of its members. It may use whatever force is necessary to compel the attendance of its members. The decisions of the Supreme Court say it may imprison. It is a very high exercise of judicial power to deprive the citizen of his liberty. It may fine. That is lighter, but still it may be a severe punishment. It may reprimand, and that is regarded both in the Senate and House of Representatives as an intensely severe punishment. The Constitution fixes the limit to the punishment which it may inflict by saying that it may expel by a two-thirds vote.

Now let me read what that other new-fangled authority on the Constitution says on this subject. I read from Story, first volume, section 837:

> The next clause is, "Each House may determine the rules of its proceedings"—

That is a part of the sentence. It is not a whole paragraph. The subject is not broken—

> "Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member".

Expel a member.

> No person can doubt the propriety of the provision authorizing each House to determine the rules of its own proceedings. If the power did not exist, it would be utterly impracticable to transact the business of the nation, either at all, or at least with decency, deliberation, and order. The humblest assembly of men is understood to possess this power, and it would be absurd to deprive the councils of the nation of a like authority. But the power to make rules would be nugatory unless it was coupled with a power to punish for disorderly behavior or disobedience to those rules.

Here is where your punishment comes in; first, to make the rules for your procedure to enable you to carry out the functions charged to you by the Constitution of the United States. When you make those rules, then to punish for disorderly behavior in the execution of those rules or in prohibiting others from executing those rules.

Mr. MITCHELL of Oregon. Is not that wholly disconnected from the power to expel?

Mr. MILLS. Will my friend just wait until I get to the end of that? Judge Story says:

> But the power to make rules would be nugatory unless it was coupled with a power to punish for disorderly behavior or disobedience to those rules. And as a member might be so lost to all sense of dignity and duty as to disgrace the House by the grossness of his conduct or interrupt its deliberations by perpetual violence or clamor, the power to expel for very aggravated misconduct was also indispensable, not as a common but as an ultimate redress for the grievance.

Now, then, Mr. President, the power to expel follows the power to establish rules, and the power to expel follows as the highest exhibition of punishment for misbehavior in preventing the House in the exercise of its functions from proceeding in the orderly discharge of its duties. You may imprison. You may fine. You may reprimand. You may expel. You may not take life. Now, then, you can choose which horn of this dilemma you will hang on. If you want to expel this man, it must be because he has been guilty of disorderly behavior since he has been a member of this body, infracting its rules, interfering with its deliberations. That is the consistent, common-sense interpretation of this provision of the Constitution, and that which is given to it by the most distinguished commentator who has ever written on that instrument, and, as I said before, not a strict constructionist by any means.

Mr. GEORGE. Free.

Mr. MILLS. Yes, sir; a free and liberal construer; but he has never gone so far as to say that this body or the other, for any purpose except to punish for disorderly behavior, may exercise the power of expulsion. The power of expulsion of course, among civilized and honest men, men who have consciences and intelligence, must be withheld until the offense becomes so aggravated and so monstrous as that no other remedy exists for the preservation of order in the body.

Mr. President, I think I have shown that this body can not try. You can not try for an offense committed against the laws of the District of Columbia. You can not try for an offense committed against the laws of North Dakota or any State or Territory in the Union. You can not try a Senator for any offense he has committed against a private citizen anywhere in the United States before he came here. You can only try him for disorderly conduct since he came here. The only power you have to punish a member of this body is to punish under that provision of the Constitution one who infracts the rules of this House by his disorderly behavior, and to inflict your punishment in proportion to the magnitude of the crime which he commits.

I do not pretend to deny that you can find instances, and you can run over them, where investigating committees have been appointed. They are the fruits of a mad partisan feeling, and I do not say that it exclusively belongs to that side of the Chamber. All men are more or less partisan. What I mean to say is, that whether it occurred fifty years ago or to-day, and however numerous the instances are, they are infractions of the constitutional right.

The Supreme Court of the United States in this very case called attention to that fact, very delicately of course, but they intimate to the Senate and House of Representatives that there have been tendencies, and sometimes not without success, to encroach upon the domain granted by the Constitution to the judicial department of the Government, and whenever it does so and an appeal is made to the courts of the country, it is their duty to enforce the Constitution and the rights of the citizens. We might return the compliment by saying, in a very delicate sense too, that they sometimes come very near encroaching upon the legislative territory confined by the Constitution to the Senate and House of Representatives.

Construction sometimes becomes very elastic. I do not believe in the soundness of everything I read in the decisions of the courts, and yet in a court-house when one is arguing a case he must of course abide by the decisions of the courts, because they constitute the law of the land. But in this body, where we make laws, make them for the government of the courts and for the government of the people of the United States, we ought to adhere rigidly, strictly, narrowly to this great charter of our liberties. We ought to conform our own conduct and require of every other citizen and every officer of this Government, in whatever department he is chosen, to adhere to the letter and spirit of this instrument; and we ourselves should set the example.

Mr. President, I have said all I wish to say. I have an aversion to saying unkind things about people. I never prosecuted anybody when I was a practicing lawyer. I undertook it once and gave up the business. I do not like it. I am glad that I can discuss the question of power and of right without interfering with persons. These things have always been disagreeable to me, and I mean now to assert that no Senator has the right, having sworn to support the Constitution of the United States, to refuse admission to a fellow-Senator who is sent here possessing the three constitutional qualifications from any State in this Union. When he does it, and does it upon the ground that a Senator's moral character is not what it ought to be, he offers a gratuitous insult to the constituency whom that Senator represents; for, as I said, the representative will represent his constituency.

Suppose that man should have erred, and erred a long way, from the path of rectitude and integrity in his younger days, thank God there is something, especially in the civilized heart of man, that forgives. Suppose a great people have seen a young man struggling and rising out of these embarrassments and establishing a character that commends itself to their approval, and they become attached to him and cast the veil of oblivion and go backward as Japheth did, who threw the cloak back upon the prostrate body of his father, refusing to look upon it, and trust him with the high office of ambassador from his State, have we the right to say that that act of clemency shall become null and void by the disposition of the Senate of the United States to go back into the past years of one's life to see if they can not dig up something between the cradle and the grave to smirch the reputation of an honorable man who has risen to the high honor of the representative of a sovereign State in this body and by the unchallenged consent of the constituency he represents?

I say, sir, we have no right to do anything of the sort. I say we have no right to add to the qualifications. I say we have no right to expel except for an infraction of the rules, and having no right to do either, we have no right to investigate. If we attempt to investigate and compel witnesses to testify to enable us to obtain the information necessary to render a correct judgment, and a witness, knowing what his rights are under the Constitution, stands before your mock tribunal and refuses to testify, and then if you punish him to make him testify, the result will be that the Government will have to pay the damages for having made its officer infract the Constitution and laws and put in peril the liberty of its citizens.

Mr. HAWLEY. Mr. President, I have had the pleasure of an acquaintance with the distinguished Senator from Texas [Mr. MILLS] these many years. We were associated in the House of Representatives. I have heard him on numerous occasions. I thought I understood his character tolerably well, but he will allow me to say to him that there was no such feebleness or lack of aggressiveness in his character as to induce me to suppose that he could never prosecute anybody, as he affirms. It often seemed to me that he was prosecuting his fellow-citizens of the Republican party with quite as much vigor as it would have been necessary to display as a State's attorney in a court of justice.

But if all men were such as he thinks he is, if they had such an exceeding degree of gentle mercy, there would be no civil government, for somebody must prosecute someone occasionally. It may be a very unpleasant duty, as unpleasant as that of the surgeon.

I do not rise this morning because I find any special pleasure in it. I might say, indeed, I am up because it is an exceedingly painful and disagreeable business that everybody must not run away from. I decided to put myself on record upon what I thought was the right side after what I heard the Senator from New Hampshire [Mr. CHANDLER] and the Senator from Massachusetts [Mr. HOAR] speak. I did not know my colleague [Mr. PLATT] was to deliver his long and able speech. However, I will not retreat now, though I will not attempt an elaborate legal argument, and will only indicate my general position.

Permit a preliminary remark or two concerning some things the Senator from Texas has said. Firstly, the famous Kilbourn case to which he has referred has nothing on earth to do with our discussion here. Everybody understands that who listened to the closing words of his quotation from the decision of the court upon that subject. The House of Representatives, by committee, was engaged in a long and laborious investigation.

The committee called up Mr. Kilbourn and attempted to go into an elaborate inquiry concerning his real-estate transactions—his private business—not relevant to the legitimate inquiry. Nobody could see the relation, and the Supreme Court expressly gave its judgment in favor of Mr. Kilbourn when he brought suit against the Sergeant-at-Arms upon the ground not that inquiries on that subject were not legitimate, but that the special inquiry of Kilbourn was too remote. That is all.

Now the Senator gives us to understand that a Senator can not be censured or in respect or degree punished for any crime whatever that he may commit while a Senator, or at any time before. The whole matter must be relegated to the criminal courts, and there must not be even an investigation by this body. Mr. President, the records abound in cases where there have been investigations into the conduct of members of Congress and there have been numerous censures and expulsions, some for offenses of which the courts of law would have taken no cognizance.

I think it was while the Senator from Texas was in the House of Representatives that a certain member—I do not like to mention names any more than is necessary—a certain member of the House was found by the House (and not by a judgment of other peers in another tribunal) to have been guilty of selling his appointment to a cadetship at West Point. Forthwith, by general consent, he was expelled from the House. Not only that, sir; his constituents reëlected him to the next Congress. The people, who are sometimes spoken of here as if they were divine, do make mistakes. His constituents reëlected him to the House of Representatives, to the next Congress, I think, was it not?

Mr. HOAR. If the Senator from Connecticut will pardon me, he resigned when the resolution of expulsion was under debate.

Mr. HAWLEY. I thought the vote was taken.

Mr. HOAR. No.

Mr. HAWLEY. It is practically the same thing. He was practically expelled, for he ran away from the coming vote for expulsion and was reëlected notwithstanding this record of disgrace, but the next Congress refused to receive him.

On what ground was Mr. Bright expelled? I will not catalogue the cases, but on what grounds were these various Senators and Representatives censured or expelled? In some cases their offenses were such that they might have been properly taken up in the ordinary courts of justice; but men have been again and again expelled from legislative bodies in this country and analogous bodies in foreign countries for offenses, if touched by the civil law, touched by it very slightly. I can easily imagine cases in which a Senator would be censured or expelled from this body, and yet that for which he would be tried in the criminal courts might amount to little or nothing.

My colleague kindly hands me a marked passage in Story's Commentaries. It is as follows:

> It seems, therefore, to be settled by the Senate, upon full deliberation, that expulsion may be for any misdemeanor which, though not punishable by any statute, is inconsistent with the trust and duty of a Senator.

I thank my colleague. That is exactly what I was endeavoring to say. So the Senator from Texas makes a ridiculous thing of the power of this great legislative body to protect its honor, a very ridiculous thing if the Senate can not for its own purposes and necessities decree censure or expulsion in any case whatever, while leaving the same offenses, in their relation to public justice, to be punished by the criminal courts. A Senator might be sent to the penitentiary for burglary and, as the result of an entirely disconnected inquiry, at the same time expelled from this body.

It seems hardly necessary to say this. Let me record my protest against the pending attempt to put this whole matter out of sight, to ignore the bill, in the language of the courts, at the very threshold, without calling a single witness, making a single inquiry of any description, refusing not only to go into a trial, but refusing to make a preliminary inquiry as to whether we might do so. I believe, though, the proposition has been made to instruct the Committee on Privileges and Elections to inquire whether an offense committed by a Senator before his election can be the subject of investigation or censure here. But the pending attempt is to evade the whole question.

Senators on the other side say there is nothing of consequence in the charges against the Senator from North Dakota; but there is something very serious in them.

It is a very serious case. It is charged that while a cashier of a bank in this city some twelve years ago he was guilty of falsifications of books of account and a long series of embezzlements, amounting to $64,000, a large part of which is still unpaid. That is the gravamen of the charge; and the man who is in this painful and most unhappy position went away shortly from the scene of his offenses and never returned to it until he came here protected by the Constitution, which forbids the arrest of a Senator for any offense except treason, felony, and breaches of the peace while he is here or on his way to or from this place. Is not this a serious case? And is it made upon idle rumor?

With great particularity and vigor these things are asserted by men of responsibility, the conductors and publishers of great journals, asserted everywhere in ordinary conversation and in the speech of men. They are not trifles; they are not mere rumors. The statements are supported by the records of the bank that was sinned against. They are supported by the records and reports in the office of the Comptroller of the Currency.

There are two inconsistent positions taken: one that the facts are known and properly estimated and do not amount to much. Why not, then, inquire and vindicate? They are sufficiently known in such a way as to be accepted as facts indeed by the people in general, and they have not been denied by any human being, so far as I know.

But it is said again that no matter what the case may be, the occurrences having taken place before the defendant came into the Senate and before he was elected, the Legislature of North Dakota is supposed to be satisfied that, whether guilty or innocent, he is a fit man to represent them and that is an end of it. There is a point in the case that has not been mentioned in my hearing. It does not appear that the Legislature of North Dakota knew what it was doing when it elected Mr. ROACH. I do not speak lightly. I am assured by men who would be likely to know that probably not two men in the Legislature of North Dakota knew that there were any disagreeable charges or rumors in connection with the gentleman whom they elected to the Senate.

But it is said that a "sovereign State" sent him here, and that if he has the three qualifications spoken of in the Constitution, the requisite age, citizenship, and residence, that is the end of the law; he can not be called in question. That has not been the doctrine of any legislative body in the world.

The constitutional provision that the Senate shall be the judge of the qualifications of its members, in my judgment, goes further than the mere legal, bare skeleton of the three points spoken of. At any rate we may argue as John Quincy Adams and Story and great men of that kind have argued again and again, that a body of this description has something more in its charge than mere technical legal qualifications in the defense of ts honor and the honor of the United States.

We are asked why does not North Dakota protest? I do not know. The Legislature has adjourned, and if it protests, if it asks us to take this matter up, that is the extent to which it can go. It is absolutely powerless to act, and so are we.

But have the other 65,000,000 people in the United States nothing to do with it? Has the Senate or the House of Representatives no responsibilities and duties in such cases as well as the State from which the offender comes? Is it to be really taken for granted in our extreme devotion to State rights doctrine that the blessed people never made a mistake?

Sir, the Constitution is full of provisions against the possible omissions and errors and mistakes of the dear people. It is full of them. It is taken for granted that they will make mistakes and will do wrong. What does it mean when the Constitution says that Congress may prescribe the times and places and manner of electing Representatives? It may; it is not obliged to do it; but there is the power, because our fathers, who were accustomed to tales of sedition and faction and revolution all around the world, saw that times might come when the dear people of the States or of certain localities would not be faithfully discharging their duty in electing Representatives to Congress, and then as an absolute necessity for the preservation of national life the Congress of the United States would have the right to come in and prescribe not only the times—we have done that already, because the States did not seem to conduct themselves wisely in

that matter—but the places, down even to the precincts for voting, and the manner of it, the manner of putting in and counting and returning ballots. All that may be prescribed. This may be done by Congress, because the dear people may do wrong or fail to do right. The time and manner of electing Senators is already prescribed in imperative detail, because serious evils arose under the old manner.

The Senator from Indiana [Mr. VOORHEES] says very truly that the rational theory is that the States will do their duty and that the people will do their duty. Certainly; the idea is in the very foundation of the Constitution that the people will be intelligent and patriotic; and yet I tell you, beginning with the laws against treason and insurrection and regulation of elections, it is everywhere provided that no mistakes or blunders, no crimes, no temporary insurrections, no rebellions shall stand in the way of the preservation of the life and honor of the Republic.

It is well once in a while, I think, to take the side of the Government against that mysterious man so often called "the people," and yet it is not against the people, because it is in the roundabout, conservative, and careful ways provided by the fathers that the people themselves have guarded against their own possible mistakes and crimes by constitutions and statutes. The fifteen amendments to the Constitution were in the nature of limitations of the power of the people, as that power might be manifested here in Congress and in State Legislatures.

The Senator from Massachusetts [Mr. HOAR] suggests to me that this is a question between the Legislature of North Dakota and the Senate of the United States, both representative bodies, and not a question between the Senate and the people of North Dakota. It does not appear what the people of North Dakota would do to-day upon this matter if with the knowledge of to-day they were again called to act.

Mr. President, I am not disposed to continue. If my colleague had not spoken there were certain points that I should have touched, but with nothing like his ability and his legal acumen. Indeed, it is a most monstrous proposition that we are absolutely powerless not only in this case, but in cases of far greater mischief and wrong.

We are told here, we have heard in various ways, in conversation and in public speech, something very like threats as to what will be done if we, meaning the Republicans, persist in demanding investigation. Yet I doubt whether on a free private ballot of the Senate party lines would be strictly drawn. It is the intimation that if we insist upon investigation and upon action in this case there will be retaliation and Republicans will be assaulted. I can dispose of that very briefly, Mr. President, and with that I close. That is in the style of children's arguments—"So are you;" "You are another;" "Go yourself;" "I will tell your mother." Or if it be not of that childish kind, it is quite analogous to blackmailing.

HAWAIIAN AFFAIRS.

Mr. CHANDLER. Mr. President——

Mr. LODGE. I desire to offer a resolution.

The VICE-PRESIDENT. Without objection the resolution proposed by the Senator from Massachusetts [Mr. LODGE] will be read.

The Secretary read the resolution, as follows:

Resolved, That the Secretary of State be, and he is hereby, directed to inform the Senate by whose authority the American flag was hauled down from the Government building at Honolulu on April 1.

The VICE-PRESIDENT. What disposition does the Senator from Massachusetts desire to have made of the resolution?

Mr. LODGE. I ask unanimous consent for its present consideration, unless there be objection.

Mr. GORMAN. Let it lie over.

The VICE-PRESIDENT. The resolution will lie over, objection being made.

Mr. COKE. I ask for the adoption of an order.

Mr. HOAR. Was my colleague's resolution objected to?

The VICE-PRESIDENT. An objection being interposed, the resolution will lie over.

Mr. HOAR. By whom was an objection interposed?

The VICE-PRESIDENT. The objection was interposed by the Senator from Maryland [Mr. GORMAN].

Mr. GORMAN. I ask that it may go over until to-morrow under the rule.

The VICE-PRESIDENT. The resolution goes over under the rule.

WITHDRAWAL OF PAPERS.

On motion of Mr. COKE, it was

Ordered, That leave be granted, subject to the rule, to withdraw from the files of the Senate the papers in the case of Daniel Woodson and Ely Moore.

Ordered, That leave be granted, subject to the rule, to withdraw from the files of the Senate the papers in the case of John A. Whitfield.

INTERNATIONAL MONETARY CONFERENCE.

Mr. DAVIS submitted the following resolution; which was referred to the Committee on Printing:

Resolved, That there be printed and bound for the use of the Senate 1,500 additional copies of Executive Document No. 82, Fifty-second Congress, second session, being the proceedings of the International Monetary Conference.

DISBURSEMENTS BY RECESS COMMITTEES.

Mr. WHITE of Louisiana. I ask leave to call up at this time the resolution of the Senator from Missouri [Mr. COCKRELL], reported by me from the Committee on Contingent Expenses yesterday.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution, as follows:

Resolved, That the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to ascertain and fix the sums necessary to be disbursed by the various standing or special committees authorized to sit during the recess; that, when the said sum or sums be so ascertained and fixed by the said committee, the expenses of the various committees, standing or select, authorized to sit during the recess be absolutely limited to the amount so fixed by the said committee.

Resolved further, That the said Committee to Audit and Control the Contingent Expenses of the Senate, in ascertaining and fixing the said sums, be, and hereby is, directed to so fix the amounts as to keep the aggregate sum within the appropriation.

Mr. GORMAN. I desire to make a statement in regard to the resolution. The present efficient Secretary of the Senate during the last session called the attention of those of us who are on the Appropriations Committee to the difficulty under which he has always labored in the matter of the proper distribution of the contingent fund to the various committees authorized to sit and investigate questions during a recess. This resolution would have been offered at the last session, but it was overlooked in the hurry of business. It was a valuable suggestion, made by that officer at the time, and one which will relieve him or his successor from the annoyance and difficulty and trouble of settling questions of this character between Senators. I wished to make this statement before the resolution is passed.

Mr. GEORGE. Mr. President——

Mr. HOAR. If this resolution is to give rise to debate to any extent I must object to its coming in now.

Mr. GORMAN. I thought it was proper that this statement should be made.

Mr. HOAR. Let the debate proceed by unanimous consent, only reserving the right to object hereafter.

The VICE-PRESIDENT. Without objection that course will be pursued.

Mr. GEORGE. Is the resolution before the Senate for action at this time?

The VICE-PRESIDENT. By unanimous consent, subject to objection.

Mr. HARRIS. It was reported a day or two ago.

Mr. GEORGE. Reported from what committee?

Mr. HARRIS. From the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The resolution called up by the Senator from Louisiana, the Chair will state, was reported by him yesterday.

Mr. GEORGE. I desire to call the attention of the Senate——

Mr. CHANDLER. I object to the consideration of the resolution for the present.

Mr. WHITE of Louisiana. Mr. President——

Mr. GEORGE. I am entitled to the floor, I think.

Mr. HOAR. Oh, no.

Mr. GEORGE. I was proceeding to address the Senate. I shall be through in five minutes.

Mr. HOAR. I expressly reserved the right to object.

Mr. WHITE of Louisiana. I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Chair will hear the inquiry of the Senator from Louisiana.

Mr. GEORGE. I am entitled to the floor and have been recognized. I claim the right to the floor, and I object to the Chair recognizing anybody while I am on the floor without my consent.

Mr. HOAR. I rise to a question of order.

The VICE-PRESIDENT. The Chair will state to the Senator from Mississippi that when a Senator rises and makes a point of order the point of order must be stated.

Mr. GEORGE. If a point of order is made on my remarks I have no objection to its being stated.

The VICE-PRESIDENT. The Chair desires to hear the Senator from Massachusetts state his question of order.

Mr. HOAR. My point of order is, that while another matter was pending unanimous consent was asked to report this resolution. I rose and said that if it was to give rise to no debate I should make no objection, but if there was to be a debate I desired to reserve the right to object and desired that the debate should only proceed subject to unanimous consent. That the

Chair announced. I have no objection to the Senator from Mississippi making a statement, but I do object to the Senator from Mississippi claiming the floor and saying that no Senator has a right to interpose if the debate is prolonged. There is another subject being taken away from the Senate, and the Senator from New Hampshire, I understand, now objects. That is the attitude of the matter.

Mr. GEORGE. I should like to know whether I am entitled to the floor.

Mr. WHITE of Louisiana. There is a mistake of fact in the statement made by the distinguished Senator from Massachusetts. I did not rise and ask unanimous consent to report the resolution. The resolution was reported yesterday. I simply rose and asked to call the resolution up. As to the reservation which the distinguished Senator says he made when I made a motion, he is mistaken. He only made his statement after the Senator from Maryland had taken the floor and was speaking in favor of the resolution.

Mr. HOAR. But the Senate has given no consent to take up the resolution. The Senator from Maryland asked consent to explain what it was, and we heard the explanation, as we always should, out of courtesy. Certainly the Senator from Louisiana would be the last person to desire that such a request as he made, when another matter was going on and a Senator had risen and got the floor from the Chair, should be treated as taking a subject out of the possession of the Senate. He did not mean to ask any such thing as that.

Mr. WHITE of Louisiana. If anybody else had had the floor I certainly would not have asked for the consideration of anything, but nobody else had the floor and there was no business before the Senate. There was not the slightest impropriety in my asking leave to call up the resolution. So I say the resolution is not limited to unanimous consent under the circumstances. With the greatest respect for the judgment of the Senator as to what is courteous, my opinion is that in this particular instance no courtesy exacts unanimous consent whatever.

Mr. HOAR. The Chair will state whether he did not understand me to reserve that right, and to reserve it seasonably. I will abide by the decision of the Chair on the subject.

Mr. PASCO. I should like to state the attitude of the question.

The VICE-PRESIDENT. The Chair will state, if the Senator from Florida will permit, that this matter came up by unanimous consent. The Chair understood the Senator from Massachusetts to reserve the right to object. For that reason the Chair interrupted the Senator from Mississippi. The Chair will hear the statement of the Senator from Florida.

Mr. PASCO. I should like to call the attention of the Senator from Massachusetts and of the Chair to the fact that the matter which the Senator from Massachusetts [Mr. HOAR] claims is before the Senate was laid aside some time ago. It was laid aside when the junior Senator from Massachusetts [Mr. LODGE] was recognized and brought up another matter. That was disposed of, and then the Senator from Louisiana rose and asked leave to bring to the attention of the Senate still another matter. So two subjects have been brought to the attention of the Senate since the matter which the senior Senator from Massachusetts refers to.

The Senator from New Hampshire had not been recognized. I have been seated here all the time and he has not been accorded the floor. That subject passed away from the attention of the Senate when the junior Senator from Massachusetts rose and presented another matter. After that, as I said, the Senator from Louisiana presented this third matter, which is now claiming the attention of the Senate. I thought I would call the attention of the Chair to the exact condition of business so that it might be seen no unanimous consent was necessary and that none was asked for.

Mr. HOAR. The Chair stated otherwise both recently and before. My colleague merely did what is done a thousand times; he got the leave of the Senate to put in a resolution to be acted upon and disposed of.

HAWAIIAN AFFAIRS.

Mr. BUTLER. I wish now to offer an amendment to the resolution of the Senator from Massachusetts [Mr. LODGE] to be printed. I should like to have it read.

Mr. CHANDLER. Mr. President——

The VICE-PRESIDENT. The amendment will be read for information.

The Secretary read as follows:

And also by whose authority the same was hoisted on said building.

Mr. BUTLER. Read the resolution as it will read if amended as I propose.

The VICE-PRESIDENT. The resolution is not before the Senate, the Chair will state.

Mr. BUTLER. But an amendment is, and I want the resolution read as proposed to be amended. I have a right to have that done. I ask the Secretary to read it as amended.

Mr. CHANDLER. And both the resolution and amendment to go over.

Mr. BUTLER. Both to go over; but I want it read as it would read amended.

The VICE-PRESIDENT. The resolution will be read as proposed to be amended.

The Secretary read as follows:

Resolved, That the Secretary of State be, and he is hereby, directed to inform the Senate by whose authority the American flag was hauled down from the Government building at Honolulu, April 1, and also by whose authority the same was hoisted on said building.

DISBURSEMENTS BY RECESS COMMITTEES.

Mr. CHANDLER. I ask the Chair whether a short time ago I was recognized to speak on the pending question. I understood that I was so recognized and was asked to yield. I am always disposed to yield to such requests when I have the floor, and intended to yield to business that any Senator might propose that would not lead to debate. The moment that debate ensued, I understood the Senator from Massachusetts [Mr. HOAR] to reserve the right to object; but I am willing to yield to any resolution of the Senate that will not lead to debate. I was then; I am now.

The VICE-PRESIDENT. The Chair recognized the Senator from Louisiana to report a resolution, which was done by unanimous consent.

Mr. WHITE of Louisiana. If the Chair will allow me, I will beg pardon and make a correction. The resolution was reported yesterday.

The VICE-PRESIDENT. It was reported yesterday.

Mr. WHITE of Louisiana. It was carried over under objection yesterday and was regularly called up. I did not rise to ask unanimous consent; I rose to call up the resolution; and I am yet entirely uninformed as to what rule requires unanimous consent for such a proceeding.

The VICE-PRESIDENT. The Chair will state to the Senator from Louisiana that, as the Chair understands, it requires unanimous consent because of a resolution then pending.

Mr. WHITE of Louisiana. What was the resolution pending?

The VICE-PRESIDENT. The resolution will be read.

The Secretary read the resolution reported by Mr. HOAR from the Committee on Privileges and Elections March 27, 1893, as follows:

Resolved, That Lee Mantle is entitled to be admitted to a seat as a Senator from the State of Montana.

The VICE-PRESIDENT. This is the pending resolution.

Mr. GORMAN. I trust that the resolution called up by the Senator from Louisiana will be considered by unanimous consent, as it relates to the business of the Senate and is one of some importance unquestionably.

Mr. HOAR. If it leads to no debate I make no objection. If it is to be debated, I object.

Mr. GORMAN. If the Senator from Massachusetts will permit me but a moment——

The VICE-PRESIDENT. Is there objection?

Mr. CALL. There will be debate, Mr. President. I offer an amendment to the resolution.

Mr. GORMAN. I think I have the floor. I have not yielded the floor. I understand that the Senator from Louisiana proposes to move to proceed to the consideration of the resolution, and such a motion is of course always in order. That question must be determined by a vote of the Senate without debate.

Mr. CALL. What is the resolution?

The VICE-PRESIDENT. The resolution will be again read for the information of the Senate.

The Secretary read the resolution of Mr. COCKRELL, reported yesterday by Mr. WHITE of Louisiana from the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to ascertain and fix the sums necessary to be disbursed by the various standing or special committees authorized to sit during the recess; that, when the said sum or sums be so ascertained and fixed by the said committee, the expenses of the various committees, standing or select, authorized to sit during the recess, be absolutely limited to the amount so fixed by the said committee.

Resolved further, That the said Committee to Audit and Control the Contingent Expenses of the Senate, in ascertaining and fixing the said sums, be, and hereby is, directed to so fix the amounts as to keep the aggregate sum within the appropriation.

Mr. HOAR. I rise to a question of order. I understood the Chair just now to announce that the Lee Mantle resolution was before the Senate.

The VICE-PRESIDENT. That is the pending resolution.

Mr. HOAR. This matter then has not come before the Senate?

The VICE-PRESIDENT. The Senator from Florida inquired what was the resolution called up by the Senator from Louisiana.

Mr. HOAR. The Senate has not voted to take up that resolution.

Mr. CALL. I propose to offer an amendment to the resolution just read.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. HOAR. I object, unless it can be disposed of without debate.

Mr. WHITE of Louisiana. I move to proceed to the consideration of the resolution.

Mr. HOAR. On that I call for the yeas and nays.

The VICE-PRESIDENT. The Senator from Louisiana moves that the Senate proceed to the consideration of the resolution reported by him yesterday to ascertain and fix the sums necessary to be disbursed by various standing or special committees authorized to sit during the recess. The question is on agreeing to the motion.

Mr. HOAR. On that I demand the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BERRY (when his name was called). I am paired with the Senator from Colorado [Mr. TELLER]. If he were present I should vote "yea."

Mr. BUTLER (when his name was called). I should like to inquire of some Senator on the opposite side whether this is a political question or not, to determine how the contingent fund shall be disbursed?

Mr. HOAR. I regard the taking of this question up to displace the pending resolution, speaking for one, as clearly a political and party question. If Senators on the other side desire unanimous consent to take the resolution up without debate, I do not suppose there will be any objection; but I regard the present question as a party question.

Mr. BUTLER. Then I suppose the opinion of the Senator from Massachusetts, speaking *ex cathedra*, will be conclusive of my vote. I therefore withhold my vote, and announce my pair with the Senator from Pennsylvania [Mr. CAMERON], looking upon the Senator from Massachusetts, of course, as the leader on the other side.

The VICE-PRESIDENT. The Chair desires to inquire of the Senator from South Carolina whether he voted upon this question?

Mr. BUTLER. No. I have announced my pair with the Senator from Pennsylvania [Mr. CAMERON].

Mr. CAREY (when his name was called). I am paired with the Senator from South Carolina [Mr. IRBY].

Mr. GORDON (when Mr. COLQUITT'S name was called). My colleague [Mr. COLQUITT] is paired with the Senator from Iowa [Mr. WILSON].

Mr. GORMAN (when his name was called). I am paired generally with the Senator from Maine [Mr. FRYE], who is now absent from the city. I shall refrain from voting on any question that is purely political, but I have the right to vote on any question where my vote may be necessary to make a quorum, or upon questions affecting the ordinary business of the Senate. I therefore vote "yea."

Mr. HIGGINS (when his name was called). I am paired with the senior Senator from New Jersey [Mr. MCPHERSON]. In his absence I withhold my vote.

Mr. MILLS (when his name was called). I am paired with the Senator from New Hampshire [Mr. GALLINGER], but I transfer that pair to the Senator from Nebraska [Mr. ALLEN] and vote "yea."

Mr. MITCHELL of Oregon (when his name was called). I am paired with the Senator from Wisconsin [Mr. VILAS]. In his absence I withhold my vote.

Mr. DUBOIS (when Mr. SHOUP'S name was called). I announce the pair of my colleague [Mr. SHOUP] with the junior Senator from California [Mr. WHITE].

Mr. SQUIRE (when his name was called). I am paired with the Senator from Virginia [Mr. DANIEL], and therefore withhold my vote.

Mr. STOCKBRIDGE (when his name was called). I am paired with the junior Senator from Maryland [Mr. GIBSON], and withhold my vote.

The roll call was concluded.

Mr. BLACKBURN. My colleague [Mr. LINDSAY] is paired with the Senator from South Dakota [Mr. PETTIGREW]. Were my colleague present he would vote "yea."

Mr. BUTLER. I announced a moment ago that I was paired with the Senator from Pennsylvania [Mr. CAMERON]. If I can get the gracious permission of my friend from New Hampshire [Mr. CHANDLER] and my friend from Massachusetts [Mr. HOAR], to transfer that pair to the Senator from Missouri [Mr. VEST], I shall be very glad to do so. [A pause.] In the absence of any opposition on their part, I will announce the pair between the Senator from Missouri [Mr. VEST] and the Senator from Pennsylvania [Mr. CAMERON], and I vote "yea."

Mr. CAREY. I will inform the Senator from South Carolina that the Senator from North Dakota [Mr. HANSBROUGH] has paired the Senator from Missouri [Mr. VEST] with the Senator from Colorado [Mr. WOLCOTT].

Mr. PASCO. The Senator from Ohio [Mr. BRICE] is paired with the Senator from Colorado, unless that pair has been transferred.

Mr. HANSBROUGH. I was requested by the Senator from Missouri [Mr. VEST] to arrange a pair for him. I supposed the Senator from Colorado [Mr. WOLCOTT] was absent without a pair, and so I arranged the pair in that way. However, if the Senator from Colorado is not paired——

Mr. PASCO. He is already paired.

Mr. HANSBROUGH. I paired him with the Senator from Missouri [Mr. VEST] this afternoon.

Mr. BUTLER. Mr. President, does that cut me out of my privilege of voting? It seems so.

The VICE-PRESIDENT. That is not a matter for the Chair to decide, but for the Senator himself to decide.

Mr. BUTLER. I wish it were. It seems that it is being decided on the other side by the two recognized leaders on that side, the Senator from Massachusetts [Mr. HOAR] and the Senator from New Hampshire [Mr. CHANDLER].

Mr. CHANDLER. If debate is in order, I should like to be heard.

The VICE-PRESIDENT. Debate is not in order. The Chair will state that the Senator from South Carolina must determine for himself as to his vote.

Mr. BUTLER. I am not debating anything. Of course, if there is another pair arranged for the Senator from Missouri, I withdraw my vote.

The VICE-PRESIDENT. The Senator from South Carolina withdraws his vote.

Mr. DUBOIS. I inquire whether the junior Senator from New Jersey [Mr. SMITH] has voted?

The VICE-PRESIDENT. He has not voted, as the Chair understands.

Mr. DUBOIS. I have a general pair with that Senator, which is quite liberal in its terms. Either of us can vote whenever we see fit, provided that there is nothing of a political question concerned. I regard this as a political question, and therefore withhold my vote.

Mr. BERRY. I suggest to the Senator from Idaho that he may vote, and the Senator from New Jersey [Mr. SMITH] can be paired with the Senator from Colorado [Mr. TELLER], which will enable me to vote also.

Mr. DUBOIS. Very well. I vote "nay."

Mr. BERRY. I vote "yea."

Mr. BRICE. I have a general pair with the junior Senator from Colorado [Mr. WOLCOTT], but with the understanding that I have a right to vote on any question by assuming the responsibility to him, which I do, and I vote on this question. I vote "yea."

Mr. CAMDEN. I desire to say that I have a general pair on all questions with the Senator from Minnesota [Mr. WASHBURN], but with the right to vote to make a quorum and on questions concerning the ordinary business of the Senate. Therefore I vote "yea;" but I shall observe the pair on any question of a political nature.

The result was announced—yeas 33, nays 16; as follows:

YEAS—33.

Bate,	Faulkner,	Jones, Ark.	Pugh,
Berry,	George,	Kyle,	Roach,
Blackburn,	Gibson,	Martin,	Turpie,
Brice,	Gordon,	Mills,	Vance,
Caffery,	Gorman,	Mitchell, Wis.	Voorhees,
Call,	Gray,	Murphy,	White of La.
Camden,	Harris,	Palmer,	
Cockrell,	Hill,	Pasco,	
Coke,	Hunton,	Peffer,	

NAYS—16.

Chandler,	Dubois,	Jones, Nev.	Morrill,
Cullom,	Hansbrough,	Lodge,	Platt,
Davis,	Hawley,	McMillan,	Proctor,
Dolph,	Hoar,	Manderson,	Sherman.

NOT VOTING—35.

Aldrich,	Frye,	Pettigrew,	Teller,
Allen,	Gallinger,	Power,	Vest,
Allison,	Hale,	Ransom,	Vilas,
Butler,	Higgins,	Shoup,	Walthall,
Cameron,	Irby,	Smith,	Washburn,
Carey,	Lindsay,	Squire,	White, Cal.
Colquitt,	McPherson,	Stanford,	Wilson,
Daniel,	Mitchell, Oregon	Stewart,	Wolcott.
Dixon,	Morgan,	Stockbridge,	

So the motion was agreed to; and the Senate proceeded to consider the resolution yesterday reported from the Committee to Audit and Control the Contingent Expenses of the Senate in relation to disbursements by recess committees.

Mr. CALL. I offer an amendment to the resolution, which I send to the desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out the first and second clauses of the resolution and insert:

That the sum appropriated for the contingent expenses of the Senate shall be divided between the following committees, and the said committees shall be authorized to sit during the recess of Congress, as follows: The Committee on Territories, $7,000; the Committee on Interstate Commerce, $7,000; the Committee on Indian Affairs; the Committee on Agriculture, $5,000; the Committee on Civil Service and Retrenchment, $2,000; the Committee on Privileges and Elections, $3,000.

The said committees are authorized to incur such additional expense as the performance of the duty imposed on them by the order of the Senate shall render proper or necessary.

Mr. CALL. Mr. President, I have endeavored for some time to have a resolution reported favorably to this body authorizing the Committee on Civil Service and Retrenchment to examine into the condition of the civil service in respect to the persons who are holding office in the different Departments from the different States and from the District of Columbia. I have had a letter sent to me which contains the statement that there are about five thousand persons in the District of Columbia holding office, and that the proportion which under the statutes of the United States citizens of the District are entitled to hold is not one-tenth of that number. I send the communication to the Secretary to be read.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

101 SECOND STREET N. W.,
Washington, D. C., April 10, 1893.

DEAR SIR: The inclosed paper shows to what an extent the people of your State are defrauded out of their rights of representation in Government employ by the natives and legal residents of the District of Columbia. At a very low estimate there are five thousand persons, residents of Washington, D. C., holding Government positions, who should be discharged and their places given to the legal residents and voters of the various States, according to the law of apportionment according to population. This has been the state of affairs for many years; before 1890 it was even worse than it is at the present time; in those days scarcely anyone had a chance of employment in the departmental service unless he was a resident of the District of Columbia.

Very respectfully,

A. ROSS, *of Iowa.*

HON. WILKINSON CALL,
United States Senate.

Florida's quota as compared with the appointments held by residents of the District of Columbia.

Department.	Florida.		District of Columbia.

NOTES.—Of the above 68 clerks charged to Florida, 48 are males, 17 are females; they drew in 1890-'91, an aggregate salary of $61,305.50. There are five natives of the District of Columbia charged to Florida.

The aggregate salary for the fiscal year of 1890-'91 of the District of Columbia clerks was $3,378,709.86. In addition should be included the thousands of natives of the District of Columbia who are charged to various States, and the people who have lost their residence and votes in their native States, but are shrewd enough to continue to have themselves charged to those States.

Mr. HARRIS. By whom is that paper signed?

The VICE-PRESIDENT. The Chair will state, in response to the inquiry of the Senator from Tennessee, that the paper just read is signed "A. Ross, of Iowa."

Mr. CALL. I do not know anything about the accuracy of the statements contained in that paper, nor am I in the habit of making war upon the clerks in the Government Departments who may have come from different States and remained here some time. Certainly, however, there should be some reasonable apportionment of these places under the statutes of the United States, and, if there were no statute, under any principle of equity between the different States.

If the committee which has been appointed be a real Committee on Civil Service and Retrenchment, to which I have been assigned, as to which I have much doubt; if it is its duty under the orders of the Senate to investigate the condition of the civil service in all respects, the demand made upon me in behalf of my own State by this communication, whether correct or not, requires me to attempt at least to do what I may for the equal rights of the people of Florida under the laws of the United States in respect to these appointments. That is one reason why I have sought to have a resolution passed authorizing the Committee on Civil Service to sit during the recess of this body.

Another reason is that in the appropriation bill it is declared by the two Houses that an examination into this service is absolutely necessary, and it is there undertaken to appoint a committee by the Speaker of the last House and the President of the last Senate to perform the duty which at this session of the Senate has been imposed upon the committee of which I am chairman.

Recognizing as I do that the Constitution confers upon the Senate the right, the duty, and the power to prescribe its own committees and its own rules of proceeding, I have asked that this duty should be recognized in this committee, and that they should be assigned to its performance and leave given to them to sit during the recess of the Senate, when alone there is an opportunity for a full examination of this subject.

Another reason I have asked for it is, that it is known that there have been great irregularities in the certification of the public lands in that State. I hold in my hand a map by which it will be seen by the colors that almost the entire soil of the State of Florida has been certified under various pretended acts of Congress, chiefly swamp and overflowed land grants and some old railroad land grants, which have no existence whatever, to corporations and foreigners, under which they have endeavored to give away the land in the State, and that practically the ownership of the soil is taken away from the people of the State, the homestead law is nullified, and the land attempted to be transferred into foreign ownership.

This question has been the subject of political division in that State, and great sums of money have been expended to influence elections to this Senate. I have gone through an experience of that kind. Two hundred thousand dollars have been expended by great corporations to carry the elections of that State, not in the interest of the Democratic party, not in the interest of the Republican party, for Republicans and Democrats, all the people, are a unit upon that subject in that State, as they are in every other.

I have charged that these certifications were fraudulent and made without authority of law—as fraudulent as it would be for the Secretary of the Treasury to certify that the Treasury building was under some act of Congress subject to approval to some corporation, State, or individual. There is no authority whatever for it, and repeatedly has the Senate, by a majority of both Democrats and Republicans, passed resolutions for the reference of these questions to the judicial tribunals of the country, declaring that these fraudulent acts of officials conveyed no title.

That process of certification has been going on. I believe it has been procured through corrupt means. The records show that charges of this kind have been made and sworn to, and when I have asked that a committee should be appointed and that the committee to which I have been assigned, and which has charge of examining into the honesty and fidelity with which the civil service is performed, should sit during the recess, an adverse report has been made by the three gentlemen to whom it has been committed to say what shall be the rights of Senators and of States upon this floor.

For that reason I have moved this amendment. I want the vote of the Senate, to know whether Senators are to be disfranchised of their right and power of representation by three Senators, who are charged with the duty and the power of vetoing the expenditures of these committees. I wish the people of the United States to sit in judgment on this question.

Mr. President, there have been various committees authorized by these three Senators, of one of which the Senator from West Virginia [Mr. FAULKNER], now in the chair, is the distinguished chairman, of which I am a member, charged with the duty of going out to Utah to see if they can find any Mormons there who have more than one wife, and, if so, how many, and whether they are qualified for the performance of the duties of citizenship and admission to statehood. I have never been one

of the persecutors of these people and do not believe in persecution of any one.

There has been appointed another committee for an investigation, as the Senator from Maryland [Mr. GORMAN] said, of the question of the transportation routes of this country and of the Canadian routes—a question which he conceives to be of greater importance than that of the whole financial system of this Government. Why? To ascertain whether or not the American citizen can have his freight transported more cheaply over Canadian railroads and himself go over them cheaper than over our own railroads; whether or not he shall not be compelled to pay a higher price to our American system of roads; but upon this subject, where more than 26,000,000 acres of public lands have been made the property of a few private individuals and nearly 400,000 people have been deprived of their privilege under the homestead laws of this country without the authority of a single word in any act of Congress or any act of the Legislature of the State of Florida, as I have contended time and time again, and I have challenged the production of the law that authorized or pretended to authorize it—it is not conceived by these three Senators to be a matter of sufficient importance for a committee of investigation to sit in the recess of the Senate; the State of Florida, with her 400,000 people, is not to be regarded; this investigation can not go on, and it does not matter how much fraud is committed I have not expected any consideration of the people's right from this committee.

Mr. President, the people have every confidence in the great man who is the President of the United States, in his great heart and sympathy with the people, and in his great ability and patriotism, as well as his able advisers. I know that the poorest man in this country and of every State in it can rely upon the President's protecting him in his rights to any and every extent, and so of his able counselors; that is the only hope and the sure reliance I have of protection to the people from the great corporations who seek to deprive them of their freedom and to impoverish and oppress them and deprive them of their humble homes; but it needs the assistance of this body and its investigations; and I should be untrue to myself if I did not at least endeavor to obtain some action which would authorize an investigation into these questions.

I ask leave, if there be no objection, to print as part of my remarks some extracts and statements of facts from speeches which I have made and from the records of the General Land Office on this subject. The poor people of Florida who live on this land and earn a frugal but honest living have a right to be protected against these robberies and frauds and to have their perpetrators indicted and punished. I shall continue to expose them and demand their punishment and the restoration of the land to the people, protecting all innocent and bona fide purchasers of limited quantities of land.

I ask leave to print here with my remarks a statement of a small part of this land, showing one of the most flagrant of these robberies, as follows. No such record of fraud can be found in any other State. It is a black record. I know how powerful are the influences of corporations, but the people will have justice in the end.

LAND FROM PENSACOLA TO LAKE CITY, FLA.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., April 28, 1890.

SIR: In compliance with your request of the 26th instant, relative to lands listed or approved to the State of Florida on account of the grant made by the act of May 17, 1856 (11 Stat., 18), for the Pensacola and Georgia Railroad Company, I submit herewith a statement, by counties, showing approximately the amounts so listed.

Very respectfully,

W. M. STONE,
Assistant Commissioner.

Hon. WILKINSON CALL,
United States Senate, Washington, D. C.

Lands listed, or approved, to the State of Florida on account of the act of May 17, 1856, for the Pensacola and Georgia Railroad Company.

Name of county.	Acres.	Name of county.	Acres.
Calhoun	55,605.80	Liberty	11,056.35
Columbia	29,077.39	Madison	72,113.36
Gadsden	24,149.32	Santa Rosa	214,502.02
Hamilton	46,707.59	Suwannee	122,128.45
Holmes	74,245.69	Taylor	1,717.53
Jackson	117,776.02	Walton	316,068.17
Jefferson	9,902.43	Washington	166,960.24
La Fayette	5,814.28		
Leon	14,006.35	Total	1,273,890.99

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 24, 1890.

SIR: Referring to your request of this day relative to the quantity of land reserved in certain counties under the act of May 17, 1856, making a grant of lands to the State of Florida to aid in the construction of a railroad from Amelia Island (Fernandina) on the Atlantic to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico, you are advised that an approximate estimate shows as follows:

	Primary limits.	Indemnity limits.
	Acres.	*Acres.*
Marion County	138,240	207,360
Hernando County	46,080	120,960
Sumter County	138,240	157,440
Polk County	39,360	84,480
Hillsboro County	89,240	104,800
Alachua County	37,440	126,720

These figures represent in the aggregate the actual quantities covered by the withdrawal made for the benefit of said grant within the counties mentioned, without deducting therefrom the lands excepted or in anywise lost to the grant.

Respectfully,

W. M. STONE,
Assistant Commissioner.

Hon. WILKINSON CALL,
United States Senate.

MAY 27, 1890.

SIR: The area of the selections made by the State of Florida prior to the confirmatory act of March 3, 1857, is 11,630,271.61 acres.

Total swamp selections up to this date is 22,222,439.60 acres.

Total swamp land patented up to this date is 16,114,669 acres.

These subjects require an investigation. We need to know whether money has been paid or corrupt inducements offered for the alienation of a whole State. We need to know if great corporations of this country can affect the legislation of the country and of the States and the execution of the law in the different Departments of this Government.

I have taken this position and made this contest throughout the State of Florida and amongst my people, and we are a unit upon the subject without reference to party lines. I ask of the Senate here to-day that they give us the opportunity of investigating carefully every branch of the civil service of this Government connected with the certification of land.

Let us have the opportunity of showing that great corporations of the country have used improper influences. I believe that such influences have been used. I do not know the fact. I do know that the records of the Attorney-General's Department show a statement that an agent of one of these corporations, as sworn to by Mr. Dickerson, the vice-president of one of these great corporations, retained $6,000, according to his (Mr. Dickerson's) affidavit, which he said had been used improperly with public officials.

Is not that enough to require investigation by a committee? Is not the alienation of 26,000,000 acres of public land, a whole State, with hundreds of millions of dollars of valuable phosphate deposits upon it; is not the imposition of a mortgage of thirty or forty million dollars upon the poor people of that State, without authority of law and under suspicious circumstances, sufficient to require, when asked for by a Senator of the State, the privilege of an investigation during the recess of the Senate? That is the object of my amendment.

Mr. President, I desire to have a vote upon the amendment, and I think that it is quite as important as the question whether or not there is one or whether there are 50,000 Mormons in Utah who have more than one wife, and that a committee should be sent out to investigate that question, and that it is quite as important as to ascertain whether citizens of the United States who may make use of the Canadian system of railroads shall be compelled to make use of those upon this side of the border and pay the interest on their watered stock, and pay a higher price for their transportation and travel. The people are beginning to wake up from their sleep and take an interest in these subjects, and to know that they mean their poverty and want and degradation, and the unlawful and unearned wealth and luxury of a few men.

Then, again, there is another feature of this subject. The resolution of the Senator from Missouri proposes to cast a reflection upon the integrity of all the members of this body, to say that they can not be trusted upon these committees, that they must be governed by the superior integrity and judgment of the three Senators who compose the Committee to Audit and Control the Contingent Expenses of the Senate, and if the committee appointed to visit Utah and the Indians and the Pacific coast shall find that they require the examination of a greater number of witnesses than the three Senators think proper to allow and the money at their command shall be exhausted, they must return here and abandon the investigation, and fail to perform the duty imposed by the Senate.

Is no confidence to be reposed in their judgment? Can not Senators from States, charged with the performance of a great public duty, be trusted to incur any expense or any obligation necessary and proper for the performance of their duty? In all these respects I think the amendment I have offered is a proper one, and I submit it to the judgment of the Senate.

The appointment of three Senators who shall have it in their power to authorize and limit investigations, to select favorites, to suppress investigations, to punish or protect wrongs in the public service is a great advance towards an autocratic government. It is an abandonment of democracy and democratic principle; it will not have my support, and I believe the democratic people of the country will regard it with alarm and distrust.

Mr. HARRIS. I move to lay the amendment of the Senator from Florida on the table.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). The Senator from Tennessee moves to lay the amendment of the Senator from Florida on the table. The question is on that motion.

The motion was agreed to.

The PRESIDING OFFICER. The question recurs on the adoption of the resolution reported by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. DUBOIS. I desire to offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment submitted by the Senator from Idaho will be read.

The SECRETARY. It is proposed to add to the resolution the following:

Resolved, That a select committee of seven Senators be appointed by the President of the Senate, whose duty it shall be to investigate and report to the Senate the facts in relation to the recent serious difficulties existing between the employing silver-mine owners and the working miners of Idaho, as to the employment for private purposes of armed bodies of men, or detectives, in connection with said difficulties. The investigation shall extend to and embrace, in addition, an inquiry into the causes and necessity for the employment of United States soldiers, and the conduct of such soldiers. The committee shall ascertain if present serious difficulties exist between employers and employés, or if justice has been or is being denied any one through a suspension of the writ of habeas corpus, or through any dereliction of duty on the part of United States courts.

The committee shall also inquire into the character, objects, and purposes of the miners' union; and whether the obligations required of its members conflicts or conflicted with the obligations and duties these members owe to the State and Government as law-abiding citizens. In addition to the testimony and conclusions of fact the committee will consider and report, by bill or otherwise, what legislation, if any, will tend to prevent a recurrence of similar troubles. Said committee, either as a full committee or through subcommittees thereof, shall have authority to send for persons and papers, administer oaths to witnesses, and take testimony in Washington or elsewhere, according to its discretion, during the present session or approaching recess of Congress, and to employ a clerk, messenger, and stenographer; the expenses of the investigation to be paid from the contingent fund of the Senate.

Mr. DUBOIS. Mr. President, I had the honor of introducing on January 30 last this same resolution, which was referred to the Committee on Education and Labor, and from that committee reported favorably. The Senator from Missouri [Mr. COCKRELL] objected to this resolution at that time on the ground that it proposed a junketing trip. Every Senator on the other side of the Chamber who was on the Committee on Education and Labor combated this investigation. All the Republicans and Senator KYLE, Populist, favored the investigation.

During this session there have been six committees of investigation appointed, none of which deal with a question as serious as that embodied in my resolution. There was no protest from the Senator from Missouri that they were junketing expeditions.

I have not been able during this session, although I introduced this resolution on the 22d of March, to get it out from the Democratic Committee to Audit and Control the Contingent Expenses of the Senate. The troubles which I want to investigate were the most serious labor troubles which occurred in this country during the past year. There were several men killed; there was a large amount of property destroyed; several hundred miners were in arms, and took possession of that section of the country. In the judgment of the President of the United States it was necessary to send, and he sent, to that country one thousand United States troops. In addition, the State militia was also sent there. The county in which these troubles occurred was under martial law for six months.

The Democrats in that State charged that during the last campaign these labor troubles were brought about by Republicans and that it was a political proposition, and the Democrats throughout the country stated that these labor troubles occurred on account of the tariff. The resolution which I have sent to the desk embraces every phase of the labor question in this and similar controversies. There is no better chance than this to investigate these troubles, and I think the committee ought to report in favor of the resolution.

I desire to present a communication, dated Boise City, Idaho, January 9, 1893, which reads:

To all whom it may concern:

Notice.—We have this day appointed the Hon. D. R. Munro, of Shoshone, Idaho, as our agent to intercede for us with the Congress of the United States in obtaining a Congressional investigation of the Cœur d'Alene troubles which occurred last July.

THOMAS O'BRIEN,
President Central Committee of Miners' Union.
J. F. POYNTON,
Secretary Central Committee of Miners' Union.

Here is a letter signed by D. R. Munro, who was a Presidential elector in that State, and who is a representative labor man, in which he states:

Having been designated by the miners of Idaho, through their official representatives, as indicated by the attached credentials, to request of the representatives of the State of Idaho in Congress that they endeavor to secure at the hands of Congress the selection and appointment of a committee to inquire into and investigate the recent as well as present serious difficulties existing between the employing silver-mine owners and the working miners of our State.

This is asked for by reason of the fact that—

First. Much bitterness and feeling exists on the part of the working classes of the State, they believing the courts to have dealt unjustly with them in the conduct of the case.

Second. That 1,000 United States troops, more or less, were sent into the State in connection with this trouble.

Third. That the right of habeas corpus is now virtually suspended in the Northwest, from the fact that application was made some two months ago to the appellate court at San Francisco for a writ granting the right of habeas corpus to miners now lying in jail at Boise City, Idaho, charged with contempt of the United States court, a response to which application had not been received up to the 10th day of January.

Trusting that this matter may receive early and earnest consideration, and that a committee may be appointed, I am,

Very truly, yours,

D. R. MUNRO.

I will say, in addition to that, that the Supreme Court of the United States about a month ago overturned the ruling and decision of the court in Idaho and set these men at liberty. I believe myself that the district judge in Idaho is an honest, conscientious, and fair man. I do not believe that these statements of the laboring men will be borne out by the facts; but they believe nevertheless that they can not get justice. There is uneasiness and bad feeling, which a fair investigation would help to allay.

On the other hand, here is a telegram from W. B. Heyburn, who represented the mine-owners in the courts in all these trials. He says:

SPOKANE, WASH., *April 15, 1893.*

To Hon. FRED T. DUBOIS,
United States Senate:

Spare no effort to secure appointment of committee to investigate labor troubles. We all desire it strongly. Wire me prospects.

W. B. HEYBURN.

Here is a telegram from John A. Finch and A. B. Campbell, leading mine-owners of that country, in which they say:

WALLACE, IDAHO, *April 13, 1893.*

Senator FRED T. DUBOIS:

We will heartily approve your efforts to secure appointment of committee of investigation. We will welcome same and earnestly hope appointments will be made before Senate adjourns.

JOHN A. FINCH.
A. B. CAMPBELL.

I am in receipt of telegrams and communications from both mine-owners and miners in great numbers, also from labor organizations, all of whom unite in the opinion that an investigation will be of great advantage to labor and the State.

There is great confusion in that country now, not only in Idaho, but throughout the Northwest. Two banks have recently failed in the Cœur d'Alene country, a number of mines have been closed down, and hundreds of men have been thrown out of employment. There is almost a similar condition of affairs to that in Idaho now existing in Utah. An investigation will clear the atmosphere. It will show who was right and who was wrong; it will help adjust differences; it will destroy a great deal of the bitterness which has sprung from this contention, and will be of great advantage.

I have offered the amendment because I can find no other way by which I can get the question before the Senate, and I desire my friends on the other side, if they see fit to do so, to vote against the resolution. I want them to make their record now. My political associates favor my resolution.

Mr. DOLPH. Mr. President, I exceedingly regret that I feel compelled to take a moment of the time of the Senate at this late hour in the session, and I regret that my friend from Florida [Mr. CALL] has seen fit to again bring up the question of the adjustment of the swamp-land grant and the railroad land grants in Florida during the last moments of the session, and make the remarks he has, which I consider to some extent a reflection upon the administration of the General Land Office and upon the conduct of the Secretary of the Interior.

The Senator introduced a resolution upon this subject before I was taken sick and was compelled to leave the Senate, prior to the adjournment of the last regular session. I think during the first session of that Congress he had also introduced a resolution, which was referred to the Committee on Public Lands and either adversely reported or suffered to die with the Congress; and at the present session he has introduced a resolution, which I think still lies upon the table. I intended, if I had not been taken sick, to answer some of the statements of the Senator during the last session.

Mr. President, ever since I entered this body I have been a member of the Committee on Public Lands. After the death of Senator Plumb I become chairman of that committee, and re-

mained chairman until the Senate was reorganized at this executive session. I think that at every Congress the Senator from Florida has introduced resolutions calling for investigations in regard to the lands in Florida, either the railroad grants or the swamp-land grants. At first these resolutions were considered by the Committee on Public Lands and adverse reports made, but the Senator does not seem at all daunted with the adverse action taken by the committee. He seems disposed rather to find fault with the committee and to criticise the administration of the General Land Office and the disposition of the public lands in Florida under every administration.

I can not take time now to reply to the Senator, but, as he has asked to have quotations from his previous speeches printed in the RECORD as part of his remarks—and how long they will be no one knows—I will ask to submit as part of my remarks a communication of the late Secretary of the Interior to the Commissioner of the General Land Office, communicating with his approval "clear list No. 3 of lands within the Gainesville land district, Florida, selected on account of the grant made by the act of May 17, 1856, to aid in the construction of a railroad 'from Amelia Island, on the Atlantic, to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico,' which road is now known as the Florida Central and Peninsular Railroad Company."

I do this because it contains a statement of the facts and the legal propositions concerning this grant and the motives which actuated the late Secretary of the Interior and probably the action of his predecessor, and because it will be a complete refutation of any charges or complaints against the Secretary of the Interior or the General Land Office in regard to their action concerning this railroad grant.

The Senator insists here from time to time—and I discussed the question at length with him, when we were discussing the general forfeiture bill, that this railroad company and the other railroad companies to which he has referred in Florida never had a grant, that there was never any legal act of the State transferring the lands to the railroad companies. The officers of his State, however, have contended from time to time, and the governor at the time the matter was investigated before the Committee on Public Lands, that the lands had been transferred to the railroad company. That question can be investigated, can be litigated and determined in regard to any quarter section of land in the State covered by the grant; because when the railroad company claims a quarter section of land which is claimed by a homesteader, that raises a question of title which can be tried and determined in the courts of the State, or in the courts of the United States.

Besides that, ever since the honorable colleague of the Senator from Florida [Mr. PASCO] has been a member of the Senate, he has been a member of the Committee on Public Lands, and the committee has heard no complaint from him in regard to the treatment of the questions concerning lands in Florida by the committee. I submit this communication and ask to have it printed as part of my remarks.

The PRESIDING OFFICER. If there be no objection, it will be so ordered.

The communication referred to is as follows:

DEPARTMENT OF THE INTERIOR,
Washington, March 2, 1893.

SIR: Referring to my letter of February 15, 1893, returning to your office, with my approval, clear list No. 3 of lands within the Gainesville land district, Florida, selected on account of the grant made by the act of May 17, 1856, to aid in the construction of a railroad "from Amelia Island, on the Atlantic, to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico," which road is now known as the Florida Central and Peninsular Railroad Company, I have deemed it proper to submit for your information the reasons that prompted the decision and action of the Department in said matter.

On March 16, 1891, I addressed you a letter stating that the Department was in receipt of a communication from Mr. Wayne MacVeagh, complaining of the delay in the adjustment of said grant, in which I stated that I had not taken action thereon for the following reasons:

First. That Senator CALL, of Florida, has been urging upon the consideration of Congress for several years a forfeiture of this grant.

Second. The possibility that Congress might take some action looking to a forfeiture thereof.

It appearing that it was not the policy of Congress to forfeit any land grants where the road had been constructed, although built out of time, I could see no necessity for further delay in the adjustment of this grant under the provisions of the act of March 3, 1887, and directed that, unless some reason existed why such adjustment should not be proceeded with, you will prepare a clear list of the pending selections of said company and present it for my approval.

At the time such instructions were given there was pending before the Department a motion filed by Senator CALL for review of the decision of Secretary Schurz of January 28, 1881, in the matter of the reservation of lands granted to the State of Florida, under the act of May 17, 1856, for the construction of a road from Amelia Island to Tampa Bay and Cedar Keys.

The effect of these instructions was to deny said application, no sufficient reason being shown why the decision of Secretary Schurz, which had been affirmed by Secretaries Teller and Lamar, should be disturbed.

Said decision of Secretary Schurz held that a map showing the definite location of said road from the junction of the Cedar Keys branch at Waldo to the waters of Tampa Bay was filed in the Department December 14, 1860, and within the time required by the act for the construction of the road, all other portions of the road having been previously exhibited by maps filed in and recognized by the Department. By this decision the Commissioner of the General Land Office was directed to make the necessary withdrawal of lands to protect the rights of the company and to secure the proper adjustment of the grant upon the line designated. It was made upon the application of the Atlantic, Gulf and West India Transit Company, formerly the Florida Railroad Company, for a review of the decision of Secretary Chandler of April 29, 1876, rejecting a claim for a withdrawal of lands and the recognition of the rights of said company under the act of May 17, 1856.

Secretary Chandler held that no map showing the definite location of the road from Waldo to Tampa Bay had ever been filed in the Department, and the failure of the company to perform this important act within a reasonable time after the date of the grant should be taken as conclusive evidence of the abandonment of the grant.

It is urged by Senator CALL, in support of his application, that the action of Secretary Chandler in this matter was binding upon his successors and could not be revoked by Secretary Schurz, and that if it was competent for Secretary Schurz to reverse the decision of Secretary Chandler it was equally competent for any subsequent Secretary to reverse the decision of Secretary Schurz.

The company resisted this application upon the ground that it was clearly shown that the map of definite location of the entire road had been filed in the Department and the greater part of the road completed long prior to the expiration of the time allowed for the completion of the road. It requested the Department to proceed with the adjustment of the grant in accordance with said decision.

In passing upon this application Secretary Lamar, in an elaborate opinion in which all the issues were carefully presented (5 L. D., 107), concurred in the ruling of Secretary Schurz—which had also been concurred in by Secretary Teller in his decision of January 30, 1884—that the map of definite location was filed by the Florida Railroad Company within the time required, and it was held that under the facts presented Secretary Schurz had the right to entertain jurisdiction of the subject; but he declined to direct the Commissioner to proceed with the adjustment of the grant because proceedings were then pending in Congress looking to the forfeiture of said grant.

Congress having failed to provide for the forfeiture of this grant, the company, on March 7, 1887, again urged that the Commissioner of the General Land Office be directed to proceed without delay with the adjustment of said grant, and pending the consideration of this application Senator CALL again filed in the Department a request that no action be taken looking to the certification of lands to the Florida Railway and Navigation Company, upon the following grounds:

1. That no location was ever made under this grant within the lifetime of the grant, under any authority from the State, or its Legislature, or its executive.
2. That no grant was ever made by the State of this land to the Florida Railway Company or its successors, or to any other company.
3. That none has ever been made up to this date.
4. That the State is the grantee named in the act.
5. That no road has ever been built under the grant or upon the line of any survey made by authority of the State during the lifetime of the grant.
6. That the Supreme Court of the United States has in numerous cases decided that a location under a grant was a condition-precedent to the vesting of any title.
7. That the grant being for lands within 6 miles of either side of a road between certain designated points, that it could describe no land or line of road which was not built.
8. That no road has ever been built on any line of survey or location made by authority of the State under the grant of May 17, 1856.
9. That the State of Florida has, by continuous legislation since the year 1858, repeatedly denied to the Florida Railroad Company any of the benefits of this grant, and has granted a right of way and incorporated various other companies for the construction of a railway between Waldo and Tampa, giving, however, to none of them the benefit of the grant of May 17, 1856.
10. That the governor of Florida, M. S. Perry, in 1856, in his message to the Legislature of Florida, officially declares that no survey and no location of any road had been made from Waldo to Tampa, and that he had refused to approve the location of the lands under the road then projected to be built by the Pensacola and Georgia Railroad Company to Pensacola.

This is the motion above referred to, the several grounds of which may be embraced under three general heads:

1. That no location of the road was made under proper authority within the time required.
2. That no grant was made by the State of this land to the Florida Railroad Company or its successors.
3. That the State of Florida has denied to the Florida Railroad Company the benefits of this grant, and has incorporated and granted to other roads the right of way between Waldo and Tampa, giving to none the benefits of the grant of May 17, 1856.

The first ground was fully settled and disposed of by Secretary Lamar's decision of August 30, 1886, reaffirming the decision of Secretary Teller, who by that decision reaffirmed the decision of Secretary Schurz, holding that a map of definite location of the whole line of road was filed in the General Land Office within the time required for the construction of the road. (See 2 L. D., 561; 5 L. D., 107, and Ex. Doc. in record, page 12.)

It is further alleged by Senator CALL "that no grant was made by the State of this land to the Florida Railroad Company, or its successors."

This question was also considered by Secretaries Lamar and Teller, in the decisions above referred to, in which it was distinctly held that the benefits of the grant of May 17, 1856, were conferred by the State of Florida upon the Florida Railroad Company, whose rights and interests thereunder have been assigned and transferred, through its successors, to the Florida Railway and Navigation Company.

The act of January 5, 1855, known as the internal-improvement act of the State of Florida, by section 4, provided for the building of certain roads, among which was one from Amelia Island on the Atlantic to the waters of Tampa Bay, in South Florida, with an extension to Cedar Keys, in East Florida. This was done in anticipation of a grant of lands from the United States for the purpose of aiding in the construction of said roads. (Ex. Doc., page 18.) Section 5 of said act then provides—

"That the several railroads now organized or chartered by the Legislature, or that may hereafter be chartered, any portion of whose route as authorized by their different charters and amendments thereto shall be within the line or routes laid down in section four (4), shall have the right and privilege of constructing that part of the line embraced by their charter, on giving notice to the trustees of the internal-improvement fund of their full acceptance of the provisions of this act, specifying the part of the route they propose to construct; and upon the refusal or neglect of any railroad company now organized to accept within six months from the passage of this act the provisions of the same, any other company duly authorized by law may undertake the construction of such part of the line as they may desire to make, and which may not be in progress of construction under a previous charter."

The Florida Railroad Company, which has previously been incorporated

with authority to build a road from the Atlantic Ocean across the State to the Gulf of Mexico, accepted the provisions of said act March 6, 1855, within three months after the passage of said act. (Journal, 1858, page 72; documents accompanying governor's message.)

By act of December 14, 1855, the charter of said company was amended, authorizing it to construct its road from Amelia Island, on the Atlantic, to the waters of Tampa Bay, in South Florida, with an extension to Cedar Keys, in East Florida, under the provisions of the internal-improvement act.

By act of Congress of May 17, 1856, a grant of lands was made to the State of Florida to aid in the construction of a railroad "from Amelia Island on the Atlantic to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico," being the precise line designated in the internal-improvement act, and in the amended charter of the Florida Railroad Company.

Acting under this authority, the Florida Railroad Company, in 1857, filed in the General Land Office the map of definite location of that part of the main line of said road from Fernandina (Amelia Island) to Waldo, and of the branch line from Waldo to Cedar Keys, and commenced the construction of the road on this part of the line, completing it in 1860. On December 14, 1860, the company filed a map of definite location of the remaining portion of the road from Waldo to Tampa Bay.

Passing upon the question as to the right of the Florida Railway and Navigation Company to the benefits of this grant, as successors of the Florida Railroad Company, Secretary Lamar, in his decision of August 20, 1886, said:

"The act of May 17, 1856, granted to the State of Florida, for the purpose of constructing the road aforesaid, six sections per mile on each side of said road, prescribing the manner in which the State might dispose of said lands, and providing that if said road or branch is not completed within ten years no further sales shall be made and the lands unsold shall revert to the United States. The benefit of this grant was conferred by the State of Florida upon the Florida Railroad Company, whose rights and interests thereunder have been assigned and transferred, through its successors, to the Florida Railway and Navigation Company. The road was completed from Fernandina, via Waldo, to Cedar Keys in 1860, and lands inuring for that portion of the road were certified to the State in 1858 and 1860, a map of definite location for such portion having been filed and accepted as the basis of the adjustment of the grant."

Secretary Teller, in his decision of January 30, 1884, passing upon the same question, said:

"This company was formerly known as the Florida Railroad Company, and by the act of the Florida Legislature, made in anticipation of the grant, said company became the beneficiary of the grant. In 1872 the name of the company was changed to the Atlantic, Gulf and West India Transit Company. The route of the road from Amelia Island to Cedar Keys was definitely located in 1857, and the road was constructed in 1860, such construction being that of all of the branch line and that part of the main line from Fernandina to Waldo."

It will be seen from the extracts above quoted that the Department has directly considered and recognized that the benefits of the grant of May 17, 1856, were conferred upon the Florida Railroad Company, and, acting upon this, the Department, in 1858 and in 1860, certified to the State lands inuring for that portion of the road from Fernandina, via Waldo, to Cedar Keys, which was completed in 1860.

The only question remaining for consideration is as to the right of the Florida Railway and Navigation Company to the benefits of the grant of May 17, 1856, for that part of the road between Waldo and Tampa Bay.

In a speech delivered by Senator CALL in the United States Senate, March 3, 1887, and filed with and made part of his application, he says:

"The fact that the State of Florida had expressly denied to this company (referring to the Florida Railroad Company) the right to the grant of 1856, has never been considered by the Interior Department."

In the same speech he also says:

"I had supposed that on the production of the acts of the Legislature of Florida and the message of her governor, and the opinion of her attorney-general, in December, 1858, that this fact was established: that by an act of sovereign legislation, of full force and effect, the State of Florida did, in 1858, deny to the Florida Railroad Company the benefits of the internal-improvement act of 1856, and granted it to another company."

It is evident from what follows, in the speech above referred to, that he has reference solely to that portion of the road from Waldo to Tampa Bay not completed within the ten years required by the act.

This is shown by the ninth ground of objection, embodied in the third general ground, as follows:

"That the State of Florida has denied to the Florida Railroad Company the benefits of this grant and has incorporated and granted to other roads the right of way between Waldo and Tampa, giving to none the benefits of the grant of May 17, 1856."

The act of the Legislature of Florida (January 10, 1859) referred to by Senator CALL is the act incorporating the Florida Peninsular Railroad Company and granting to said company the right of way from a point on the Florida Railroad to Tampa Bay. (Statutes 1858, page 62.)

It is urged by Senator CALL that this act denied to the Florida Railroad Company the benefits of the internal-improvement act of 1855 by conferring it upon another road, and by necessary implication also denied to the Florida Railroad Company the benefits of the grant of May 17, 1856. He also insists that this was the opinion of the attorney-general of the State, to whom the matter was referred when the bill to incorporate the Florida Peninsular Railroad Company was pending before the Legislature.

The question submitted to the attorney-general was whether the "bill to be entitled an 'Act to construct a railroad from a point on the Florida Railroad, in East Florida, to Tampa Bay, under the style of the Florida Peninsular Railroad Company,' in any of its provisions does or does not conflict with the chartered rights or privileges of any other company."

He was considering the question with reference to the internal-improvement act solely, and makes no reference whatever to the rights of any other road under the act of May 17, 1856. The question was whether, under the internal-improvement act, the Florida Railroad Company had the exclusive right to build a road between Waldo and Tampa Bay. He says:

"* * * While, therefore, the Florida Railroad Company may be entitled to build their road to the waters of Tampa Bay under authority of the amended charter, they are not, in my opinion, entitled to the benefit of the restriction against the building of a lateral road, and hence I conclude there is no provision of the bill referred to your committee which conflicts with the chartered rights of any other company.

* * * * * * * *

"The authority of the Florida Railroad Company to build the road from the point of divergence to the waters of Tampa is claimed to be derived from the act to amend the act incorporating the said company, approved 14th December, 1855. There is nothing in this act that I can discover which conflicts with the bill referred to your committee, unless it is determined that all exclusive rights and benefits of the internal-improvement act are, by the terms of the said first section, unconditionally conferred on said company. I am, however, inclined to the opinion that the real intent of the first section of the amended act was simply to grant to the Florida Railroad Company the privilege of building their road to the waters of Tampa Bay, and that if they desired the exclusive privileges offered in the internal-improvement law, they must conform to the conditions and adopt the course which only secures them to other companies, because to come under the internal-improvement law is to come under its conditions as well as its benefits."

But whatever may have been the opinion of the attorney-general as to the right of the State to grant the right of way from Waldo to Tampa to another road and to confer upon it the benefits of the internal-improvement act to the exclusion of any other road, it does not appear that any such bill was passed.

The act granted to the Florida Peninsular Railroad Company the right of way from a point on the Florida Railroad to Tampa Bay, and also the benefits of the "internal-improvement fund," to aid in the construction of said road, but it did not deny to the Florida Railroad Company the benefits of the grant of 1856, or of the internal-improvement act, or attempt in any manner to impair or affect the rights of any other company. On the contrary, it provided "that the provisions of this act shall not be so construed as to prejudice the chartered rights of any other company."

The internal-improvement act of the State of Florida, approved January 6, 1855, provided that so much of the 500,000 acres of land granted to the State for internal-improvement purposes by the act of Congress of March, 1845, as remains unsold and of the proceeds of the sale of such lands remaining unappropriated; and also of the swamp lands granted by the act of 1850 and of the proceeds of the sale of such lands that have accrued shall be set apart as a fund to be called the internal-improvement fund of the State of Florida, to be applied according to the provisions of the act.

The act then described what lines of road were proper improvements to be aided from said fund, among which was the line from Amelia Island to Tampa Bay.

Section 21 of said act provided—

"That should the Government of the United States grant land to the State of Florida for the purpose of aiding in the construction of the lines of railroad indicated and their extensions, by general or special act, said lines of railroad shall be entitled to all the benefits and advantages arising from said grant that the State of Florida would be entitled to by the construction of said lines of railway and their extensions." * * *

The Florida Railroad Company was incorporated by an act of the Legislature of Florida approved January 8, 1853, and under section 5 of the internal-improvement act was entitled to the benefits of that act, being a chartered company authorized to build upon one of the routes laid down in section 4 of said act, having accepted the provisions of the act within three months after its passage.

By act of December 14, 1855, of the Legislature of Florida, the charter of the Florida Railroad Company was amended, "so that the said company shall have power to construct the railroad from Amelia Island, on the Atlantic, to the waters of Tampa Bay, in South Florida, with an extension to Cedar Keys, in East Florida, under the provisions of an act to encourage a liberal system of internal improvements in this State, approved the 6th day of January, A. D. 1855." This is the precise line designated in the act of May 17, 1856, passed thereafter.

Now, as the twenty-first section of the internal improvement act provided that the company authorized to construct the road upon any of the lines designated by said act should be entitled to all the benefits and advantages of any grant made the United States to aid in the construction of said road, there can be no question that the Florida Railroad Company, by the terms of its charter and the provisions of the internal improvement act, was entitled to the benefits of the grant of May 17, 1856, upon complying with its provisions.

The act of May 17, 1856, gave the company ten years in which to complete its road. In pursuance of the requirements of said act, the Florida Railroad Company filed a map of definite location of its road from Fernandino (Amelia Island) to Cedar Keys via Waldo in 1857, and completed that portion of the road in 1860. In 1860 the company also filed a map of definite location of the remaining portion of the road from Waldo to Tampa Bay, thereby causing the grant to attach to the specific sections contemplated by the grant along the entire line of the road.

In 1858 the company had contracted for the building of 40 miles of the road from Waldo to Tampa Bay, with a continuous extension 12 miles farther, and before the commencement of the war a distance of 45 miles of the road was graded with culverts and trestles constructed.

At the date of the act incorporating the Florida Peninsular Railroad Company, the right of the Florida Railroad Company under the grant of May 17, 1856, had attached along the entire line of the road, and having by the terms of that act ten years in which to complete the road, that right could not be divested by the State by incorporating another road with the right to build a lateral line, even if the act pretended to divest the Florida Railroad Company of the rights acquired under the act of May 17, 1856, or of its initial right to this grant under the internal improvement act of January 8, 1855, because the title of the State was that of a mere trustee, and it had no power to divest the rights of the beneficiary which had then attached, having up to that time fully complied with the terms of the grant.

But a reference to the act incorporating the Florida Peninsular Railroad Company shows that it was not intended to impair, or in any manner affect or divest, the rights of the Florida Railroad Company; nor was the grant to the Florida Peninsular Company of the benefits of the internal-improvement act inconsistent with the rights previously conferred upon the Florida Railroad Company, or a denial of the benefits of the grant of May 17, 1856.

It is also urged by Senator CALL that the grant has expired and that the Legislature of Florida made declaration of the fact that the company was not entitled to the benefits of this act after the expiration of the time required by the act for the construction of the road.

The declaration referred to is the following resolution of the Legislature of Florida of 1868 and 1869:

"Whereas by reason of the conflict of arms which prevailed in this State between the years of 1861 and 1865, it became impracticable to proceed with the construction of the roads comprehended in the system of internal improvement adopted by this State, whereby the grant of lands made by the United States in aid thereof, so far as applicable to the unconstructed portion of said system, expired by the operation of the limitation contained in the fourth section of the act of Congress making said grant; and

"Whereas this State is now desirous of promoting the completion of the said system, or so much of the unfinished part as leads from Amelia Island to Tampa Bay: Therefore,

"*Be it resolved*, That our Senators and Representatives in Congress be requested to urge the early passage of an act reviving the grant contained in the act of Congress entitled 'An act granting public lands in alternate sections to the States of Florida and Alabama, to aid in the construction of certain railroads in said States,' approved May 17, 1856, and that the operation of said act be extended to a term of —— years from the passage of an act reviving the aforesaid grant; but nothing herein contained shall be construed as a request to grant any lands to companies heretofore chartered by any State of the Union or by any act of Congress."

I see nothing in this resolution to warrant the conclusion arrived at by Senator CALL, but, on the contrary, it shows that the State was anxious to have the grant revived for the purpose of completing the road commenced

by the Florida Railroad Company. The resolution merely shows that the Legislature supposed at the time that the grant had lapsed, but the decision of the Supreme Court of the United States in the case of Schulenberg *vs.* Harriman (21 Wall., 44), rendered shortly thereafter, in construing a grant precisely similar in this respect, corrected this error.

By an act of the Legislature of Florida, approved January 18, 1872, the name of the Florida Railroad Company was changed to the Atlantic, Gulf and West India Transit Company, continuing the rights, franchises, privileges, etc., the same as if no change had been made.

By section 4 of the act of December 14, 1855, amending the charter of the Florida Railroad Company, it was provided—

"That the president and directors of the Florida Railroad Company may set off any portion of their line to persons desirous of constructing the same, and in that event such portion may have a distinct organization, with all the grants, rights, powers, duties, and privileges conferred on the Florida Railroad Company, with the right to adopt a different name, in order to keep the stock account and liabilities separate."

Acting under this authority, the Atlantic, Gulf and West India Transit Company by proper assignment, set off and gave authority to the Peninsular Railroad Company to build that part of the road from Waldo to Ocala, a distance of 44.88 miles, and on July 1, 1882, the governor of the State of Florida made the following certificate to the Secretary of the Interior:

"SIR: I have the honor to certify that the railroad from Waldo to Ocala, in the State of Florida, being a part of the line of railroad from Amelia Island, on the Atlantic, to the waters of Tampa Bay, specified in the act of Congress approved May 17, 1856, and entitled 'An act granting public lands in alternate sections to the States of Florida and Alabama to aid in the construction of certain railroads in said States,' has been completed, and is in actual operation, and that said railroad from Waldo to Ocala is of a continuous length of 44.88 miles."

Acting under the authority conferred by section 4 of the act of December 14, 1855, above referred to, the Atlantic, Gulf and West India Transit Company by proper assignment set off and authorized the Tropical Florida Company to build that portion of their line of road from Ocala to Tampa Bay, and on August 5, 1882, the governor of the State of Florida made the following certificate to the Secretary of the Interior:

"I have the honor to certify that 26 miles 520 feet of railroad, commencing at Ocala, in Marion County, State of Florida, and running southwardly toward Tampa Bay, the same being a part of the line of railroad designated in the act of Congress approved May 17, 1856, entitled 'An act granting public lands in alternate sections to the States of Florida and Alabama to aid in the construction of certain railroads in said States;' to run from Amelia Island, on the Atlantic, to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico, are completed, and that the said 26 miles 520 feet of railroad is owned and operated by the Tropical Florida Railroad Company."

By act of March 8, 1881, the Legislature of Florida incorporated the Tropical Peninsular Railroad Company, with the right to construct a road from a point at or near Ocala to the city of Tampa, with a grant of alternate sections of swamp and overflowed lands to the extent of six sections per mile on each side of said road.

The act incorporating the said railroad company was not intended to divest the rights of the Florida Railroad Company, or its successor, the Atlantic, Gulf and West India Transit Company, nor was the grant of lands made by said act given in lieu of lands granted to another road by the act of May 17, 1856, because the act expressly provided "that the grant of lands herein made shall not interfere with any other rights heretofore granted to any other railroad company."

Under its charter, the Tropical Peninsular Railroad Company had the right to build a line of road from Ocala to Tampa, and to receive therefor the benefit of the grant made by the act; but this did not impair or in any wise diminish the right of the Atlantic, Gulf and West India Transit Company from also building its line of road from Ocala to Tampa Bay, either with its own funds or by authorizing another company to build said line under the authority conferred by section 4 of the act of December 14, 1855, and to receive therefor the benefit of the grant of May 17, 1856.

The chartered privileges of the Tropical Peninsular Company are not inconsistent with the rights of the Florida Railroad Company and its successors, under the grant of May 17, 1856, and the governor of the State of Florida recognized that right when he certified to the Secretary of the Interior that 26 miles of said road, commencing at Ocala and running south in the direction of Tampa Bay, were completed, "the same being a part of the line of railroad designated in the act of Congress approved May 17, 1856," and that said 26 miles of railroad is owned and operated by the Tropical Florida Railroad Company.

Whether a company receiving a grant from the State to aid in constructing a lateral line of road between the same points named in the charter of the Florida Railroad Company would by the acceptance of authority from the Florida Railroad Company, or its successors, to build the road upon its line be entitled to the benefits of the grant from the State, is not necessary to be considered in connection with the right of the Florida Railroad Company or its successors or its assignees under the act of May 17, 1856, because that is a question solely between the State and the company, in which the Government has no interest.

In January, 1883, the Peninsular Railroad Company and the Tropical Florida Railroad Company were merged and consolidated under the name of the Florida Transit Peninsular Railroad Company, and on March 5, 1884, all of the several companies that built any part of the line of road from Amelia Island to Tampa Bay, with a branch to Cedar Keys, were consolidated and merged into one company, under the name of the Florida Railway and Navigation Company, which now represents all right, title, and interest in said line of road.

These several consolidations were all made under and in accordance with the laws of Florida, and the legality of said consolidation has been certified to by the officials of said State and seems not to be questioned.

With the exception of the grant for the road in question, the grants made by the act of May 17, 1856, have been practically adjusted. This road has been entirely constructed, the portion between Fernandino and Waldo (85 miles) having been built in time, the remaining portion between Waldo and Tampa (152.65 miles) after the expiration of the time limited by law, and in each instance the governor of the State has certified to the construction of these roads, as they progressed under and in accordance with the provisions of the fourth section of the act of Congress making the grants, and in other ways gave recognition to the companies claiming through the State.

The grant in question was the subject of departmental report of January 10, 1883, in response to Senate resolution of December 27, 1882, and again in report of February 7, 1884, in response to Senate resolution of February 7, 1884, and since that time numerous reports have been made in each instance upon bills introduced by Senator CALL looking to the forfeiture of this grant.

It will thus be seen that since 1883 Congress has been at regular intervals kept informed as to the status of this grant, and during this time, more than ten years, no action has been taken looking to the forfeiture of the same.

After a careful consideration of all the objections that have been urged against this grant and the listing of lands on account thereof, I became satisfied that the right to the grant of May 17, 1856, had not been forfeited by any act of the Florida Railroad Company or its successors; that the State of Florida has, by none of the acts referred to, denied to said company the benefits of said grant, but that the State of Florida, through its governors, has recognized the right of the company to receive the benefits of said grant since the dates of the acts referred to, and that the Florida Central and Peninsular Railroad being now the successor of every company having a right to build any part of said road, under articles of consolidation made under and according to the laws of Florida, and so recognized by said State, and the road having been constructed under the provisions of the act of March 3, 1887 (24 Stat., 556), it became my duty to adjust the grant, the approval of the list in question being a step in that direction.

Since the approval of these lists I have received a letter from Senator CALL, directing my attention to the provision in the last general appropriation act, the object and intention of which he states "was to suspend any further action by the Department in regard to these lands until Congress should otherwise provide."

The portion of the act referred to is found on page 370 of the unbound volume of the Statutes, containing the acts passed by the first session of the Fifty-second Congress. It is that portion of the act making appropriation for surveys, and in appropriating $125,000 for the survey of lands in railroad limits, the following provision is found: "*Provided*, That no part of this sum of money shall be used for any land embraced in any grant to the State of Florida."

It is sufficient to say that none of the lands contained in the approved list referred to were surveyed under the appropriation above referred to, and I am unable to so construe the pr ovision to that act to have the effect claimed for it.

I have thus reviewed all the objections heretofore made against this grant, and the recent objections of Senator CALL, embodied in his letter above referred to, and can find no good reason to cause me to reconsider the action already taken in directing that the adjustment of this grant be proceeded with and in approving the list referred to.

For the reasons above set forth I have also approved lists numbered 1 and 2 of lands within the Gainesville land district, Florida, selected on account of the grant made by the act of May 17, 1856, to aid in the construction of a railroad "from Amelia Island on the Atlantic to the waters of Tampa Bay, with a branch to Cedar Keys on the Gulf of Mexico," which road is now known as the Florida Central and Peninsular Railroad Company, which are returned herewith.

Very respectfully,

JOHN W. NOBLE, *Secretary.*

THE COMMISSIONER OF THE GENERAL LAND OFFICE.

Mr. DOLPH. I will also ask to have printed the report, which is short, made by myself at the first session of the Fiftieth Congress on a resolution introduced by the Senator from Florida [Mr. CALL], not including the testimony of witnesses and the statement of the Senator from Florida, which constitutes about fifty printed pages. The report itself contains only about five pages, and deals with the title to the swamp lands in Florida, what is being done to segregate them and the rights of persons, homesteaders and others, who contest the claim of the State to alleged swamp lands, their rights to make contest either in the Department or in the courts, and have the character of the lands determined.

The PRESIDING OFFICER. If there be no objection the report will be printed in the RECORD as part of the Senator's remarks. The Chair hears no objection.

The report is as follows:

The Committee on Public Lands, to whom was referred the Senate resolution, passed April 18, 1888, directing said committee or a subcommittee of their number to investigate the facts concerning alleged illegal and fraudulent conveyances of public lands in the State of Florida, have had the same under consideration, and respectfully report:

The following is a copy of said resolution:

"IN THE SENATE OF THE UNITED STATES, *April 18, 1888.*

"Whereas it has been alleged by the Senator from Florida that he is satisfied, from petitions presented by reputable citizens of Florida, that illegal and fraudulent conveyances of public lands have been made in said State, in derogation of the rights of the United States and of settlers upon said lands, and that a remedy for such evils can be provided by law: Therefore be it

"*Resolved*, That the Committee on Public Lands, or a subcommittee of their number, be, and is hereby, directed to investigate all the facts bearing upon the general allegations referred to, and that for the purpose of such an investigation said committee is authorized to employ a stenographer, and shall have power to administer oaths, send for persons and papers, to sit in Washington or such other place as may be necessary, the expenses of the same to be paid from the contingent fund of the Senate; and said committee shall report, by bill or otherwise as the circumstances shall seem to require, such plan for remedy of the evils, if any shown, as they may deem necessary.

"Attest:

"ANSON G. MCCOOK, *Secretary.*

In order to ascertain the class of lands concerning which an investigation was desired by the author of the resolution, the senior Senator from Florida [Senator CALL], he was invited to appear before the committee and make a statement. From his statement it appeared that an investigation was only desired in regard to swamp and overflowed lands granted to the State by the act of September 28, 1850.

The committee thereupon proceeded to take the testimony of certain witnesses, and have received a statement from the trustees of the internal improvement fund of the State of Florida, and from Mr. Hamilton Disston, on behalf of the Florida Land and Improvement Company, all of which are appended to this report.

By the act of September 28, 1850, above referred to, there was granted to the State of Florida the whole of the swamp and overflowed lands within her borders made unfit thereby for cultivation, which remained unsold at the date of the passage of the act, to enable said State to construct the necessary levees and drains for their reclamation.

By the second section it was made the duty of the Secretary of the Interior, as soon as practicable after the passage of the act, to make accurate lists and plats of the lands described in the grant, and to transmit the same to the governor of the State, and at the request of the governor to cause a patent to be issued to the State therefor. By the third section it was provided that, in making out lists and plats of such land, all legal subdivisions the greater part of which was wet and unfit for cultivation should be included in said lists and plats, but when the greater part of a subdivision was not of that character the whole of it should be excluded therefrom.

A circular of instruction as to the manner of proceeding under said act was issued by the Secretary of the Interior November 21, 1850, to the surveyors-generals of the several swamp-land States in which that office had not been discontinued, and to the registers and receivers in the other States to which the grant applied. Copies of this circular were sent to the governors of all the States in interest, with the request that the State authorities would elect which of the two methods for the selection of the swamp lands therein proposed they would adopt. These methods were:

1. The field notes of the Government survey to be taken as the basis for selection, and all lands shown by them to be swamp or overflowed within the meaning of the act to be placed in the lists to be reported to the General Land Office.

2. The States to select the lands by their own agents and report the same to the surveyor-general with proof as to the character of the lands.

The State of Florida elected to select the swamp lands granted to her under said act by her own agents. The total number of acres of swamp lands and overflowed lands selected as inuring to the State under the swamp-land grant of September 28, 1850, reported to the Commissioner of the General Land Office by the United States surveyor-general of Florida, to June 1, 1888, was 20,259,323.59 acres; amount so selected and reported prior to March 3, 1857, was 11,630,271.51; amount reported since March 3, 1857, 8,629,052.08.

By the act of Congress approved March 3, 1857 (11 Stat., 251) selections of swamp and overflowed lands under the act of 1850 theretofore made and reported to the General Land Office so far as the lands remain vacant and unappropriated and not interfered with by an actual settlement under any existing law of the United States, were confirmed to the States and the approval and patenting of the same to the several States was directed and required. By this act 11,630,271.51 acres of swamp land selected and reported to the Commissioner of the General Land Office prior to March 3, 1857, were confirmed to the State of Florida, whether in fact swamp lands or not.

Of the 8,629,052.08 acres reported since March 3, 1857, there have been approved by the Secretary of the Interior 5,131,944.32 acres. Of the lands so approved there have been patented to the State 4,953,333.50; and there are remaining unpatented of such selections 3,675,718.58 acres. But a comparatively small quantity of lands have been approved or patented to the State since September, 1879, and none have been approved or patented since June, 1885.

Among the witnesses examined before the committee was Mr. S. R. Edwards, chief of the swamp-land division in the General Land Office. From his statement it appears that in every case where the lands selected by the State of Florida as swamp and overflowed lands have not passed beyond the control of the General Land Office, either by confirmation of the selection, by the act of 1857, or by approval and patent of selection since that date, persons filing affidavits alleging that lands selected by the State are not swamp or overflowed lands within the meaning of the grant are allowed to contest the State's claim to the lands; and that in such contest for lands which have not been patented the burden of proof of the character of the land is upon the State.

It appears also that the State makes no defense, but allows her claims to be rejected in such cases without protest or objection. Before selected lands are approved or patented to the State they are thoroughly and carefully examined in the field by an agent of the Government appointed by the Secretary of the Interior, and are not approved to the State unless his report shows them to be, in fact, swamp and overflowed lands.

Under this state of the law and of the practice in the Department, it does not appear to the committee that any further legislation is required to secure to settlers upon the public lands in Florida the right to assert their claims and to secure title to lands which have been selected by the State as swamp lands, but have not been approved to it.

The next subject of inquiry is whether any legislation should be had to authorize the institution of legal proceedings to set aside patents which have been issued to the State for lands selected by the State under said act of 1850 as swamp and overflowed lands. As to the manner of selecting these lands we quote the following from the statement of the trustees of the internal improvement fund of Florida above referred to:

"As to the selection of swamp and overflowed lands we have only to say that they are selected by agents under the employment of this board, but the proof of their character is made not to us but to the Secretary of the Interior of the United States, who considers the proof, causes the lands to be examined by his own agents, and determines whether or not the lands selected are swamp and overflowed."

A serious question arises as to the power of Congress in the premises if it shall be proposed to authorize proceedings to be instituted to set aside patents which have been issued to the State for lands selected in the manner above described. By the act of September 28, 1850, it was made the duty of the Secretary of the Interior to pass upon the question of the character of the lands selected under it, and to make out accurate lists and plats of the lands granted by the act when they had been selected, and to cause a patent to be issued to the State therefor.

Without passing upon the question as to whether the approval of the selections of lands under this act is not a final and binding adjudication between the State and the General Government as to the character of the lands selected by the State, the committee will proceed to consider the question of the policy of legislation authorizing the institution of legal proceedings for the purpose of canceling such patents.

It appears from the statement of the trustees of the internal-improvement fund of Florida that there have been received by the State patents for 15,992,251 acres; that there have been disposed of by sales, preëmptions, homesteads, etc., 6,158,610 acres; conveyed to railroads, 5,940,010 acres; conveyed to Florida Coast Line Canal and Transportation Company, 92,156 acres; conveyed to Atlantic and Gulf Coast Canal and Okechobee Land Company, on drainage contract, 1,174,942 acres; and that of the patented lands, the title to 2,626,532 acres remains in the trustees of the internal improvement fund of Florida.

It appears further that the lands so conveyed to corporations have been largely pledged for the moneys which have been expended in their works or sold to individuals, including not only speculators, but large numbers of settlers and immigrants, all of whom have purchased upon the faith of the patents of the United States issued after a determination of the question of the character of the land by the Secretary of the Interior, who was, by the act making the grant, invested with the power to finally determine the character of the land so far as the United States is concerned; that as to the lands the title of which remains in the trustees of the internal improvement fund, a large portion is involved in contracts with drainage and canal companies who have invested their money on the faith of the patents for the same, and that other portions of said land are held by said trustees to pay the liabilities of said fund.

It appears that the swamp lands granted to the State by the said act of September 20, 1850, were, by a statute of Florida of January 6, 1855, vested in the trustees of the internal-improvement fund, and that the governor, controller, treasurer, attorney-general, and commissioner of lands and immigration are *ex-officio* such trustees. The trusts to which the lands are devoted by the original act and all amendatory acts may be stated as follows:

1. Internal improvements, by railroads and canals.

2. Drainage, by work devoted immediately to that purpose.

3. Encouragement of actual settlement and cultivation of said lands, by allowing premiums of not exceeding one section to any one settler.

A number of railroad companies in the State have special land grants from this fund varying in quantity but subject to the general trusts of the act creating such fund and its amendments; and every railroad, or canal, or company incorporated under the general corporation acts of the State becomes entitled to receive the alternate sections of State land within 6 miles of its line, and indemnity within 20 miles of the road or canal as the road or canal is completed in sections of 6 miles.

It further appears that under the statutes of the State and the rules of the board, any person may acquire swamp lands still held by the trustees and not reserved by paying $1 per acre therefor; that any citizen of Florida who is the head of a family, or is 21 years of age, can acquire 80 acres of such land at 25 cents per acre, by making affidavit that he desires it for his own settlement and cultivation; that any person who is an actual settler on such land can preëmpt and acquire the title to such land, not exceeding 160 acres in a compact form in legal subdivisions, by applying for the same and paying $1 an acre therefor in three installments, one-third on entry, one-third in two years thereafter, and one-third in three years thereafter.

It appears, also, that in the grant of these lands to railroad companies, and in the sales of lands in large quantities, the rights of settlers have been protected. Upon this point the committee quote the following from the statement of the trustees of the improvement fund:

"The policy of the laws of Florida as to actual settlers on these lands has been liberal, and the administration of the trustees has been and is governed by an earnest and diligent solicitude for the interests of such settlers and to secure to them all the rights, privileges, and opportunities possible, and any intimations to the contrary, or that action is required of Congress or otherwise to secure the rights of actual settlers in lands of which these trustees have control, they repel as gratuitous and without any foundation of fact.

"Of course this board is not able to authorize persons to now enter upon or to convey to them lands which have been previously conveyed to some one else; but in all contracts, reservations, and conveyances the board has been careful and diligent in protecting the interests of all actual settlers whether occupying under color of any right or merely as squatters. Previous to the Disston sale, above mentioned, the most of these lands were unoccupied, but here and there persons had squatted on them, who lived on them without paying anything for them and without making any effort to acquire title. This may have been in some cases on account of poverty, and in some cases because of ignorance of the method of proceeding to get title, but in some cases it was because of a desire to enjoy the use of land without paying anything for it in purchase or in taxes.

"When the sale was made to Disston in 1881 the trustees entered into an agreement with him that all persons settled on any of the lands bargained or conveyed to him should have the lands on which they were settled at the State prices, the maximum of which was $1 per acre, and that they should have until January 1, 1883, to pay for such lands. Notice of this was published by the trustees in the newspapers of the various counties where the lands were situated, and blanks or forms of application sent to all persons so situated who made application to purchase such lands, and deeds were executed to them free of any cost other than the schedule price as aforesaid.

"In fact the limitation to January 1, 1883, has never been enforced, but upon a showing of bona fide settlement prior to the sale to Mr. Disston he has always been willing, if the land remained subject to his control, to convey it to the settler and to receive other lands from the trustees instead thereof, and the trustees have always been willing and anxious to make such arrangements. If any cases of individual hardship have occurred to settlers they have not arisen from any lack of care or provision by the board for their protection. There have been contests alleging attempts fraudulently to take advantage of these provisions for the protection of actual settlers by land speculators and persons having no bona fide settlements on the lands, also contests as to who of several was the actual settler on a certain piece of land; and the board has from time to time sent out agents to investigate and report upon these matters free of cost to the alleged settlers, and in determining whether or not a person was an actual settler their decisions have been liberal to the settlers.

"The general rule as to all reservations for railroads made since 1881, since which time nearly all the reservations under which railroads have acquired lands have been made, has been and is that the reservation is made 'subject to the rights of actual settlers and subject to the further order of the board.' And the board has exercised their reserved power liberally and freely in favor of actual settlers in all meritorious cases brought to their attention, and these opportunities of relief are generally known in the localities where the lands are situated, and settlers frequently and freely avail themselves of them. There are no fees, costs, or technical requirements in these proceedings, nor is there anything strict or difficult in the proof of settlement required.

* * * * * *

"Where reservations have been made for railroads or canals and by reason of delay in the work it has appeared to the board that the settlement of the lands was being impeded, the board has in several such reservations allowed actual settlers to go into such reservations and purchase homesteads at the schedule price of $1 per acre."

It seems more than probable that considerable tracts of land were confirmed to the State of Florida by the act of March 3, 1857, which were not swamp lands in fact, and that there have been since selected and approved and patented to the State lands which did not fairly come within the description of land granted to the State by the act of 1850. But it would be impossible at this late day to ascertain with any degree of precision what lands have been so erroneously patented to the State or the relative proportion of the same. It appears that large bodies of land are swamp or overflowed at certain seasons of the year, generally in the summer and fall, and during wet years, so as to be periodically too wet for cultivation or habitation, which in dry seasons or in dry years are dry.

It also appears that lands which, at the date of the swamp-land act, September 28, 1850, were undoubtedly swamp and overflowed within the meaning of the act, have since that date, by the construction of railroads, canals, and ditches, by the settlement, clearing, and cultivation of the land, and in some cases by trails made by stock, become comparatively dry and fit for cultivation.

The committee believe that in other States which received the benefit of the act of September 20, 1850, large quantities of land have been selected and patented to the State which were not swamp lands in fact, and if legislation is to be had authorizing legal proceedings for the purpose of setting aside patents issued for land in the State of Florida, it should be extended to such States.

In view of the fact that by the terms of the grant of the swamp and overflowed lands to the States the Secretary of the Interior was empowered to pass upon and determine the question of the character of the lands; of the fact that most of the lands patented to the States have been sold and conveyed by them and are now held by persons who have purchased them upon the faith of the United States patents; in view of the impracticability of de-

termining at this time with certainty the character of lands selected by the States as swamp and overflowed lands at the date of the grant, the committee believe that as a matter of sound public policy the United States should be bound by the action of the Secretary of the Interior, and that it would be unwise to throw a cloud over the title of these lands by any legislation authorizing proceedings to set aside and cancel the patents heretofore issued for them to the States.

Mr. DOLPH. I ask to have printed a report made by me at the first session of the Fifty-first Congress, September 19, 1890, on a resolution offered by the Senator from Florida, which is very short, and also one more on another resolution upon the same subject the same day. That will constitute my answer to the Senator.

The PRESIDING OFFICER. The reports referred to will be printed in the RECORD in the absence of objection.

The reports referred to are as follows:

The Committee on Public Lands, to whom was referred the Senate resolution introduced by Mr. CALL January 8, 1890, to direct the Secretary of the Interior to report to the Senate all the evidence in the General Land Office touching frauds alleged in the report of the Commissioner of the General Land Office for 1888 to have been perpetrated in regard to the claims of the State of Florida to swamp lands, have had the same under consideration, and respectfully report:

The following is a copy of said resolution:

[Senate Mis. Doc. No. 43, Fifty-first Congress, first session.]

"Whereas the Commissioner of Public Lands states in his annual report to Congress as follows:

"'In the report for 1888 (p. 45) special mention was made of the frauds that had been perpetrated in regard to the claims of Florida under the swamp grant. There can be no doubt that large quantities of land, amounting to millions of acres, have been patented to this State erroneously as being swamp, when, in fact, they were and are good agricultural lands.

"'It would seem that before action is taken for the approval of current claims by this State the lands claimed should be carefully scrutinized and examined by reliable agents of the Government in the field, and that some action should be provided for by Congress to recover for the public domain the lands fraudulently obtained before any more lands are patented under these grants. The total area of Florida is 37,931,520 acres, while the lists already filed from that State amount to 22,221,469 acres, of which amount 16,061,129.98 acres have been patented. Only 711.59 acres were patented to Florida during the past year. I call attention to the fact that no lists have yet been filed for lands in that part of the State most notoriously swampy in character, viz, in the extreme southern part of the peninsula, in the vicinity of the Everglades.

"'It is probable, therefore, that in the future several million acres more will be claimed of lands that may be more genuinely swampy than the bulk of those previously claimed.

"'It thus appears that fully two-thirds of the public lands in the State have been or will be claimed as swamp, a claim which I am not prepared to admit by any means."

"'And whereas the trustees of the board of internal improvement of the State of Florida deny the statements of the report and assert that the selections of land under the act of 1850, made since the confirmatory act of 1857, are swamp and overflowed land unfit for cultivation, and that the statements of the report impute a fraud to the State of Florida. Therefore it is

"*Resolved by the Senate*, That the Secretary of the Interior is directed to report to the Senate all the evidence in the General Land Office touching this subject, and upon which the statements of this report were made."

In response to a letter from the chairman of the committee to the honorable Secretary of the Interior asking for such information as the Department had upon the subject-matter of the resolution, the Secretary reported by letter, of date June 4, 1890, inclosing a letter from the honorable Commissioner of the General Land Office, and a letter from the honorable Assistant Commissioner, which are appended hereto. In the opinion of your committee these communications contain all the information upon the subject that is of practical value to the Senate, and they therefore recommend that the resolution do not pass.

DEPARTMENT OF THE INTERIOR,
Washington, June 4, 1890.

SIR: I have the honor to acknowledge the receipt of your letter of April 14 last, inclosing a "resolution by Mr. CALL in relation to the claims of Florida under the swamp-land grant," and asking what information, if any, the General Land Office has on the subject-matter of the resolution.

In reply I inclose herewith a copy of the report of the Commissioner of the General Land Office, dated the 22d ultimo, and a copy of the letter referred to therein, for your information.

The resolution transmitted by you is returned herewith.

Very respectfully,

JOHN W. NOBLE, *Secretary.*

CHAIRMAN OF THE SENATE COMMITTEE ON PUBLIC LANDS.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 22, 1890.

SIR: I have had the honor to receive, by reference from the Hon. Cyrus Bussey, Assistant Secretary, dated the 16th ultimo, for report in duplicate and return of papers, a letter of the 14th of the same month, from the Hon. P. B. Plumb, chairman of the Senate Committee on Public Lands, which reads as follows, viz:

"The Committee on Public Lands of the Senate desire to know what information, if any, the General Land Office has touching the subject-matter of the inclosed resolution."

The resolution inclosed by Mr. Plumb reads as follows, viz:

"Whereas the Commissioner of Public Lands states in his annual report to Congress as follows:

"In the report for 1888 (page 45) special mention was made of the frauds that had been perpetrated in regard to the claims of Florida under the swamp grant. There can be no doubt that large quantities of land, amounting to millions of acres, have been patented to this State erroneously as being swamp, when, in fact, they were and are good agricultural lands.

"It would seem that before action is taken for the approval of current claims by this State the lands claimed should be carefully scrutinized and examined by reliable agents of the Government in the field, and that some action should be provided for by Congress to recover for the public domain the lands fraudulently obtained before any more lands are patented under these grants. The total area of Florida is 37,931,520 acres, while the lists already filed from that State amount to 22,221,469 acres, of which amount 16,061,129.98 acres have been patented. Only 711.59 acres were patented to Florida during the past year. I call attention to the fact that no lists have yet been filed for lands in that part of the State most notoriously swampy in character, viz., in the extreme southern part of the peninsula, in the vicinity of the Everglades.

"It is probable, therefore, that in the future several million acres more will be claimed of lands that may be more genuinely swampy than the bulk of those previously claimed.

"It thus appears that fully two-thirds of the public lands in the State have been or will be claimed as swamp, a claim which I am not prepared to admit by any means.

"And whereas the trustees of the board of internal improvement of the State of Florida deny the statements of the report and assert that the selections of land under the act of 1850, made since the confirmatory act of 1857, are swamp and overflowed land unfit for cultivation, and that the statements of the report impute a fraud to the State of Florida. Therefore, it is

"*Resolved by the Senate*, That the Secretary of the Interior is directed to report to the Senate all the evidence in the General Land Office touching this subject, and upon which the statements of this report were made."

In reply, I have to state that the annual report of this office for 1888, page 45, issued under a former administration, contains the following in reference to swamp selections by the State of Florida, viz:

"The area of the State of Florida is 37,931,520 acres, and the selections of swamp and overflowed land made by the agents of said State reported to this office cover 20,259,389 acres. The selections in many cases embrace whole townships.

"In one of these townships, containing about 20,000 acres, all selected and returned as swamp, and reported as such by former agents of this office August 18, 1879, and patented to the State February 14, 1880, the field notes of survey, under the most liberal construction that can be placed on them, show but 1,560 acres to be swamp land, and in no case does it appear from the field notes that anything near the quantity claimed by the State is of the character of land contemplated by the grant.

The total area of the State of Florida is understood to be, as stated in the extract from the annual report of this office for 1889, given in the proposed resolution above quoted. That the number of acres selected by that State under the swamp grant and the number of acres so selected which have been patented are as stated in that report appears from the lists of selections on file and the patents recorded in this office. It appears to be the general opinion that a large proportion of the land so selected, much of which has been patented, is not swampy, within the meaning of the statute making the grant, but agricultural land, not intended to be granted thereby.

This understanding is apparently based upon a consideration of the total area of the State and the very large proportion which the area selected as swamp, a great portion of which has been patented as such, bears to the total area, it being considered highly improbable that so large a proportion of the State is actually swamp. This conclusion is strengthened by the field notes of surveys and reliable reports, official or unofficial, which from time to time have reached this office as to the actual character of portions of the land so selected. It seems to rest upon what may be called moral evidence—found in the circumstances of the case, as above indicated. To obtain legal evidence of the true character of all the tracts embraced in the lists of selection made, or in the patents issued thereon, many millions of acres would require a great and a costly investigation, covering the whole field, which has not been made, and therefore such evidence is not available to be reported to the Senate should the proposed resolution, above quoted, be adopted.

The Hon. W. M. Stone, the Assistant Commissioner, who was Acting Commissioner when the annual report of this office for 1889 was prepared, and who signed that report, addressed a communication to the honorable Secretary, under date of the 9th instant, in which he gives his reasons for the statements made therein on the subject of the Florida swamp-land claims, and I herewith inclose two copies thereof, returning also Mr. Plumb's letter and its inclosure.

Very respectfully,

LEWIS A. GROFF, *Commissioner.*

The SECRETARY OF THE INTERIOR.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., May 9, 1890.

SIR: In answer to your letter of January 25, 1890, referring to this office a communication from the governor and other officers of Florida as "trustees of the internal-improvement fund" of that State, complaining of alleged inaccuracies in the report of the General Land Office for the last fiscal year, prepared and submitted by me as Acting Commissioner, having been referred to me by Commissioner Groff, I have the honor to submit for your consideration the following:

The particular grounds of complaint presented in the communication of the said trustees is contained in the following extract from the annual report:

"In the report for 1888 (see p. 45) special mention was made of the frauds that had been perpetrated in regard to the claims of Florida under the swamp grant. There can be no doubt that large quantities of land, amounting to millions of acres, have been patented to this State erroneously as being swamp when in fact they were and are good agricultural lands.

"It would seem before action is taken for the approval of current claims by this State the lands claimed should be carefully scrutinized and examined by reliable agents of the Government in the field, and that some action should be provided for by Congress to recover for the public domain the lands fraudulently obtained before any more lands are patented under these grants. The total area of Florida is 37,931,520 acres, while the lists already filed from that State amount to 22,221,469 acres, of which amount 16,061,129.98 acres have been patented. Only 711.59 acres were patented to Florida during the past year. I call attention to the fact that no lists have yet been filed for lands in that part of the State most notoriously swampy in character, viz, in the extreme southern part of the peninsula, in the vicinity of the Everglades.

"It is probable, therefore, that in the future several million acres will be claimed of lands that may be more genuinely swampy than the bulk of those previously claimed.

"It thus appears that fully two-thirds of the public lands in the State have been or will be claimed as swamp, a claim which I am not prepared to admit by any means."

Commenting upon the foregoing extract from the annual report, and as embodying the gravamen of their complaints, the Florida officials say:

"It is difficult to understand how a high official of the Government, with the records of his office accessible to him, could make the statement so at variance with the facts, that no lists have yet been filed for lands in that part of the State most notoriously swampy in character, viz, the Everglades.

"The facts are, that long anterior to the date of such report, lists embracing the whole of the Everglades, and the vast area of swamp and overflowed lands contiguous thereto, and within what is known as the Ocklocknee drainage system (the submerged lands contracted to be drained by the Atlantic and Gulf Coast Canal and Okeechobee Land Company) had been filed in the General Land Office. The lands embraced within this list (59), which

is the list of 1,662,080 acres referred to by Acting Commissioner, are within the above territory. That these facts may readily appear by a glance at the map, we have caused to be marked upon a map showing the Everglade region of the State and the Okeechobee drainage system on each township therein, the number of the list which contains the unpatented selections within the respective townships, in red figures.

"We have also prepared, and transmit herewith, lists of the selections therein patented and unpatented, giving the township and range and areas; the first designated as list 'A,' being the patented lands, amounting to 4,818,465 acres, and the second designated as list 'B,' being the unpatented selections, estimated at 4,498,950 acres. Thus it will appear that 9,317,415 acres have been selected within the Everglade region, and the notoriously overflowed lands embraced in the drainage system contiguous thereto, not going further north than township 25 south.

"In his charge of fraud against the State of Florida, and the statement that 'there can be no doubt that large quantities of land, amounting to millions of acres, have been patented to this State erroneously as being swamp, when, in fact, they were and are good agricultural lands,' the Acting Commissioner appears to have ignored the fact that there had been selected up to March 3, 1857, 11,630,271.51 acres, which were confirmed to the State by act of Congress of that date, and patents directed to be made therefor (all but a small portion of which have been patented), which was, in effect, a special grant to the State by said act of such lands, eliminating therefrom any question as to their swampy character.

"This would leave of the patent lands about 5,500,000 in addition to those so confirmed by the act of 1857, of which, as shown by list 'A' above mentioned, 4,818,465 acres lie within the Everglade and drainage region. There remains, therefore, only about 631,535 acres of the patented to be accounted for outside of the grant of 1857, and the submerged lands of the Everglade region and drainage system. And we respectfully submit there is no reason to believe that those remaining lands are not swamp as claimed.

"The Acting Commissioner reports the aggregate selections of Florida under the swamp land act to be 22,221,469 acres; of this, 11,630,271.51 acres were confirmed to the State by the said act of 1857, and 9,317,415 acres lie in the Everglade and the drainage system, as aforesaid, aggregating 20,947,686 acres, which being deducted from the total selections leave 1,273,783 acres of selections to be accounted for outside of the Everglade region and drainage system and the grant of 1857, and we do not hesitate to make the statement that there is sufficient land outside thereof 'wet and unfit for cultivation' (the test under the act of 1850) for the selection, without fraud, of that number of acres."

The Florida officers conclude their complaint to the honorable Secretary with the following prayer for relief:

"We have the honor to request that you will take such action as may be necessary to correct the erroneous statement and unjust imputations of fraud contained in the said report of the Acting Commissioner, and that justice may be done the State of Florida in the premises."

Reviewing the foregoing complaint of the governor and his official associates, I may be permitted to say that I fail to perceive in the annual report any expression of phraseology calculated in the slightest degree to reflect upon either the personal or official integrity of the officers named, or upon their predecessors. Certainly it was not designed to impute to State officers any intentional fraud in their swampland transactions.

Dealing in general terms with a condition of affairs that has for many years been the subject of profound concern and of extraordinary embarrassment to this Department, to which former Secretaries and Commissioners have repeatedly called attention, and that the facts connected herewith can not have escaped the knowledge of the State officers and authorized agents of Florida, I deemed it my official duty in submitting the annual report to invite the attention of the present Secretary to the subject. This I endeavored to do in language as appropriate and respectful as the evidence in this office impeaching the integrity of these selections would permit.

In using the terms "fraud" and "fraudulently obtained" I fully understood the recognized difference between fraud in law and fraud in fact. There is no evidence before me justifying the charge that any governor of Florida, or other State officer, has knowingly participated in, or approved of, any frauds in the swamp-land selections now on file in this office or that have been patented to that State. That the governors of Florida, however, have repeatedly urged the approval and patenting of fraudulent selections of alleged swamp and overflowed lands is established to a degree of certainty that would render a denial of the fact altogether preposterous. There may be fraud in fact, or fraud in law, or both.

If agents appointed by the State make and urge the approval of swamp-land selections before this Department, knowing that they are dry and arable, or not knowing with reasonable certainty that they are swamp and overflowed, and thereby secure their being patented to the State, it would be no abuse of technical phraseology to designate it as a fraud in law and fact. If a governor of Florida, misled by his agents, urges upon and secures from this Department the approval and patenting of swamp-land selections that are not so in fact, it becomes a fraud in law, because contrary to the declared object and purpose of the grant. In either case, if called upon to characterize the transaction, I should be constrained to say that such patents were "fraudulently obtained."

I do not undertake to say that agents appointed from time to time by the Department have displayed more trustworthiness than those employed by the State; that instances of personal rectitude and sincere devotion to duty have existed among both classes of agents I do not question; yet, with the evidence on the files and records of this office at hand, I am unable to resist the belief that those who have been lacking in these qualities, if not the most numerous, have been by far the most active and successful.

Undeniable facts are abundant to warrant the foregoing observations.

These swamp-land transactions have extended over a period of nearly forty years. They constitute a part of the history of ten administrations of the Federal Government, beginning with that of President Fillmore. During this time swamp-land agents have appeared and disappeared. In the very nature of things I can only comment upon the doings of those who have figured in more recent years. Many of these agents are remembered only among the traditions of the General Land Office and the meager record preserved of their operations. Without descending to details, or attempting to reproduce the statements of different agents, whose reports are on file in this office, I respectfully invite the attention of the Secretary to the following significant and instructive facts upon the subject.

The total area of Florida is 37,931,520 acres, while the lists of alleged swamp and overflowed lands from that State aggregate the enormous amount of 22,221,469 acres, of which 16,064,129.98 acres have been patented—an extent of country about one million acres larger than the combined areas of Connecticut, Massachusetts, New Hampshire, Rhode Island, and Vermont, and larger than many of the kingdoms of Europe.

In order that any of this vast area could rightfully have passed to that State, the acts of 1850 and 1857 required that it should have been "swamp and overflowed lands made unfit thereby for cultivation," and such was the only description of lands which Congress intended to grant to the State for reclamation purposes. If this hypothesis be true it certainly presents a novel feature in the topography of Florida. I can not believe it, nor will it be accepted as true by the people of that State. It will astonish the outside world to be informed that nearly two-thirds of Florida is an actual swamp, unfit for cultivation, and necessarily exposed to all the disagreeable and unhealthful influences naturally incident to such regions.

In further answer to the communication of the Florida officers, I respectfully call your attention to the following facts, which I feel assured can not, upon any material point, be successfully disputed.

As shown by our plats, nearly all of the 16,061,129.98 acres already patented are situated north of township 37, above Lake Okeechobee, and several miles north of the upper line of the Everglades. These patented lands extend entirely across the State from east to west and in the regions where its driest and most arable lands are found. These portions of the peninsula attain an altitude notoriously above the swampy level, and many feet higher than the Everglades.

In these regions, as I am informed, are found the most prosperous agricultural communities in the State and where lands are most valuable and desirable. These lands rarely have water upon them beyond what falls from the clouds, and, if any of them are swamp and overflowed, they are limited in extent and notably exceptional. That over 16,000,000 acres of swamp and overflowed lands, rendered unfit thereby for cultivation, should be found in these upper portions of the peninsula is absolutely phenomenal.

That illegal selections have been made (and by this is meant those that do not come within the meaning of the grant) seems to be understood among the people of Florida. In corroboration of this I cite a resolution unanimously adopted by the senate of that State April 12, 1888, page 113 of senate journal, as follows:

By Mr. Birrong: Senate joint resolution No. 23, instructing our governor and Senators and requesting our Representatives in Congress to cause an investigation to be made to ascertain as to the legality of selections of swamp and overflowed lands and have such as have been legally selected patented to the State."

From this it appears that suspicions existed as to the legality of these swamp land selections, and it is to the credit of the honorable senators of the State that they courted investigation on the subject, desiring that patents should issue only for such as have been "legally selected." They certainly were not induced to adopt this resolution by remarks contained in the annual report, which was not published until October following. This resolution was vetoed by his excellency Governor Fleming for the following, among other, reasons therefor:

* * * * * * *

"The Department of the Interior possesses ample means without further Congressional legislation to ascertain whether lands rejected come within the terms of the act of September 28, 1850, and eliminate therefrom any lands which may be improperly selected, and examinations are now being made by the Government as to the State selections; nor is Congressional action necessary to authorize the issue of patents to the State to which she may be entitled."

It is quite obvious that his excellency was not disposed to permit the question as to the legality of these selections to undergo the scrutiny of a Congressional investigation. He preferred to cast the labor and responsibility of such an undertaking solely upon the Interior Department, with its limited means under the inadequate appropriations made therefor by Congress.

Millions of acres of valuable land have unjustly been placed beyond the reach of actual settlers, and given over to illicit purposes of individual and corporate aggrandizement. And in this way also we can in part account for the rapidly diminishing area of our public lands.

In this connection I speak not alone of Florida, as she differed in this respect from some other swamp-land States only in degree.

As serving to illustrate what has been said as to the attitude and conduct of agents, both State and departmental, I cite the Secretary to the following well-known cases.

I quote the from the report of Mr. P. W. White and Dr. Mitchell, commissioners of immigration of Florida:

	Acres.
S. I. Walles, indemnity certificate assigned for services	75,010.22
Sold S. I. Walles, on his account as State agent at Washington for adjusting land	70,782.97
1881-'82, entered by S. I. Walles under his contract with trustees of April 13, 1878	21,664.03
Certificate No. 1, being 20 per cent of the whole amount for recovering same under his contract with trustees	1,072.96
November, 1821, 8 per cent of patents	1,956.92
July 25, 1881	5,800.60
May 31, Indemnity certificates assigned S. I. Walles, agent at Washington	1,667.92
Assigned Mr. Walles for services	17,141.76
To Mr. Walles $25,810.36 in land	5,162.07
April 23, Mr. Walles for services	4,639.51
Total	214,909.37

This magnificent compensation makes the energetic Mr. Walles one of the greatest individual land-owners in the world.

There is still another item to be considered, as follows:

This gentleman's contract for these services entitles him to 2 cents per acre for all the swamp lands patented to the State.

The lists of selections now pending aggregate 6,100,340 acres, and if secured will yield him under his contract $123,206.40 in addition to what he has heretofore received, and if we estimate the land at $1 per acre, and that is below the present actual value, it will swell the total of his compensation in this business to the comfortable sum of $338,214. This large sum to one agent alone.

But there are other agents which this enterprising State has in its employ, among whom are the following:

Charles Pomeroy, clerk and agent of L. G. Dennis, has received 5,800 acres for making selections; William Swan & Co., 3,614 acres for making selections; John A. Henderson, 29,589 acres; making in all 253,000 acres of land already paid to agents for making selections and securing approval of the Department, and $140,000 cash yet to be paid, depending upon success. I shall not attempt to give the amounts paid to other agents for similar services. I need not say that these payments of land to agents for their services are in direct contravention of the express condition of the swamp-land grant and a palpable misappropriation of the land.

No one will attempt to dispute the perfect right of the State to employ all the swamp-land agents it may deem necessary and pay them such compensation as it chooses, but I submit that it is a gross violation of the express conditions of the grant to pay them either in swamp land or indemnity money for their services.

I quote from the act of September 28, 1850, as follows:

"SEC. 1. That to enable the State of Arkansas to construct the levees and drains to reclaim the swamp and overflowed lands therein, the whole of these swamp and overflowed lands made unfit for cultivation which shall remain unsold at the passage of this act shall be and the same are hereby granted to said State."

By the fourth section of said act its provisions were thereby extended to

all the States in which swamp and overflowed lands were known to be situated. Under this act Florida acquired her right to these lands.

It will be observed that the grant thus made was for the specific purpose of "enabling the State * * * to construct the necessary levees and drains to reclaim the swamp and overflowed lands, made thereby unfit for cultivation, and for no other purpose." Nothing can be plainer.

Section 2 of the act provides as follows:

"* * * And on that patent the fee-simple to said lands shall vest in the said State of ——, subject to the disposal of the Legislature thereof: *Provided, however*, That the proceeds of said lands, whether from sale or direct appropriation in kind, shall be applied exclusively, so far as necessary, to the purpose of reclaiming said lands by means of the levees and drains aforesaid."

This evidently is not to pay agents for making selections, or agents for engaging, with their importunities, the time of the chiefs and clerks of the General Land Office. Congress intended that every acre of land and every dollar of cash indemnity should be faithfully and exclusively applied to reclaiming the lands so granted "by means of the levees and drains aforesaid."

I am justified by the observation and experience of the Department in saying that this swamp-land business years ago degenera ed into a system of lobbying as offensive as it was disreputable. Under the demoralizing incentive of a contingent compensation for his services, the State agent in his inordinate zeal frequently transgressed the limits of propriety and inadvertently drifted away from the moorings of conscience.

CONDUCT OF SPECIAL AGENTS.

In order to illustrate the character and conduct of some of the agents appointed by the Department to investigate these Florida swamp-land cases, I invite attention to the following report of Capt. J. G. Hester, a special agent of the Department, who, as this office understands it, is an honorable and reliable gentleman, directed to Hon. J. A. Williamson as Commissioner of the General Land Office, dated November 18, 1877, as follows:

"Information has come to me of other wrongs against the United States relative to public lands which I feel would be a neglect of duty were I to permit it to pass unnoticed. I therefore have the honor to invite your attention to the following:

"It appears that 896,915 acres of swamp and overflowed lands were granted to the State of Florida under act of Congress approved September 28, 1850. I refer to list No. 8, selections for the State of Florida, approved June 28, 1876. The lands included in this list are situated mainly in Manatee and Monroe Counties, on the Caloosahatchie Creek, Brush Creek, Peace Creek, Tsaloapopka Creek, Josh Creek, Prairie Creek, Halpatahatchie Creek, Caloosahatchee River, and along the coast of Charlotte Harbor. * * *

"Much of these lands have been sold and not one dollar has been expended as the law requires (section 2480, Revised Statutes), and in fact the lands in question, or at least a very small proportion of them, needed no such drainage, it being nearly all as high and dry as any lands in Florida. As evidence of this fact Mr. R. S. Fuller, of Hainesville, was recently in the State land office at Jacksonville, where he heard Mr. William H. Kendrick, a salesman in the State land office, negotiating the sale of some of these lands, state that he aided in the selection of the said lands, and that they were not overflowed or swamp lands.

"Any amount of evidence can be obtained to confirm the fact. * * * Evidence can also be had to fully establish the fact that the affidavits upon which the selections in this list (No. 8) are based were false. The facts in the foregoing are the same, to a great extent, in other lists and other grants previously made; this I assert from personal observation.

"Having recently traveled over much of the State land which was granted to the State of Florida, I can positively state that three-fourths of all the land granted to Florida under the act of September 28, 1850, is high dry land and has never been subject to overflow.

"It is perfectly clear that the act of Congress, September 28, 1850, so liberal in its provisions, has been greatly abused by a set of land sharks, swindlers, and railroad rings perverting its true intent and using it to their own personal advantage by making up lists of alleged swamp and overflowed lands and furnishing proof of the same as required by law, which is in most instances wholly or in part false. A recent selection of this kind has been made. I refer now to the list of State selections (No. 101), amounting to 530,176 acres, which I understand has been submitted to the honorable Commissioner of the General Land Office, asking for approval and patent.

"Three hundred and ninety-one thousand acres of this land is situated on the coast of the Gulf of Mexico, between latitude 26 and 27; it embraces the mouth of Corkscrew River and Ostego Bay; the greater portion of it is represented by persons who were well informed to be high dry land, and very valuable for the growth of sugar cane and tropical fruits. One hundred and fifteen thousand acres of this land is located on the Atlantic coast, between latitude 25 and 26, and embraces the whole of the coast with some of the adjacent islands from Barnes Sound to Biscayne Bay. It is represented by persons well informed to be high dry land, and only a very small portion of it swamp or in any way subject to overflow; it embraces one of the best harbors on the peninsula, and with slight improvement on the bar would be the best south of Fernandina.

"Twenty-four thousand one hundred and seventy-six acres is located on the Caloosahatchie River, at the head of navigation, and is represented by persons well informed to be one of the best timbered bodies of land on that river and not in any way subject to overflow. It embraces the land around Fort Thompson. It is the head of navigation, and if owned by a ring or set of land sharks would give them the complete monopoly of the timber on the river above that point."

Report of Albert Akers, special agent, to Commissioner Stockslager, September 29, 1888, as follows:

"* * * I proceeded to the State of Florida in the month of January, 1888, and made a personal examination in the field of the lands in question. I was accompanied by a competent surveyor and other assistants. Two lists were given, to wit, lists No. 27 and No. 44, together with maps and field notes of the original Government survey, verified by the surveyor-general and approved by the General Land Office. All of these lands lie in south Florida, commencing in township No. 46, range 31, and ending in township No. 53, range 32, running to the extreme southern portion of the State bordering on the 'Everglades.'

"Florida is a much larger State than Iowa or Illinois. * * * No State in the Union has received as much, in the way of grants from the Government, for works of internal improvement. According to the record of the General Land Office there have been sold 1,832,431 acres; entered under the homestead law, about 500,000 acres; granted military services, 465,942 acres; officially approved railroad grants, —— acres; approved as swamp lands to the State, over 16,000,000 acres; granted for internal improvements, —— acres; granted for schools and universities, 1,000,663 acres; granted to individuals and corporations, 53,114 acres; granted to deaf and dumb asylums, 20,024 acres; confirmed private land claims, 3,362,529 acres.

"The surface of this State is generally undulating, in some cases rising into well-defined hills, and the climate is so attractive that from October till May more than 100,000 tourists and invalids annually seek it and convert the State into a pleasure resort and sanitarium.

"The Gulf of Mexico makes up five-sixths of its western boundary. Below the twenty-ninth parallel of latitude the State is a true peninsula. The rainy season is in the summer and it does not consist of steady rains, but of afternoon showers, which come up in the heat of the day with purifying thunder and lightning. This disproportion of summer rain leaves the winter an agreeable excess of clear days.

"Pine is the principal timber of Florida and is of many grades. The first-rate pine land is unlike any soil to be found in other States. The surface soil is usually several inches deep, of light sandy loam, mixed with vegetable mold or humus. Beneath this, to a depth of several feet, is a layer of light soil, resting generally on a final subsoil of clay, marl, or limestone. These first-class pine lands usually bear about sixty to seventy trees to the acre, and the trees are in most cases very large. The land is more or less rolling, well drained, easy to break, and being free from undergrowth is easily cleared. They are the healthiest lands in the State for residence, and experience has shown them to be adapted to the cultivation of the orange and all of the field crops. Other pine lands are more or less interspersed with a growth of oak and hickory. This variety of land is held by many to be the best for oranges, bananas, and pineapples.

"Most of all of the lands I have examined in Southern Florida claimed by the State are in a wild state and uncultivated, except here and there a few settlers and squatters waiting to enter homesteads. I found the great majority of these lands dry and fit for cultivation and situated in that part of Florida which, at some near future day, will become very valuable for timber and agricultural purposes. I have been informed that a former agent of the General Land Office had been sent to examine these lands, and he claims to have made an examination of the same and reported them to the General Land Office some time in the year 1879 or 1881, or thereabout, that the claim of the State was good, and that the lands were of the character contemplated by the swamp-land grant of 1850, and that the majority of the tracts were swamp and overflowed.

"From all the information I could obtain from old settlers and citizens of that part of Florida, J. W. Childs (said agent) had never visited, seen, or examined these lands, nor had he made inquiries in reference to their character and nature. I made diligent inquiry among the settlers and citizens of the county and it was universally conceded that Special Agent J. W. Childs had never made a personal examination or ever inquired about the lands that he afterwards reported to the General Land Office as swamp and overflowed.

"I am informed by two credible citizens of South Florida, men who have resided in that country for many years and regarded as the oldest citizens of Lee County, that Mr. Childs spent most of his time at Punta Rassa and Fort Myers, and never made an effort to reach these lands except in one instance, when he took a buggy at Fort Myers and traveled some 30 or 40 miles to the interior in the locality of township No. 46, range 31, and reported on sections 19 and 30 of that township.

"It would be impossible to find in the whole State of Florida, not excepting the entire 16,000,000 acres already reported and patented as swamp and overflowed, one township without a few 40-acre tracts that would produce any of the cereals without artificial drainage. The whole thing is a stupendous fraud on its face. Mr. Childs reports more than eleven townships, commencing at section 1, going to section 36, only omitting section 16 (reserved for school purposes), as swamp land unfit for cultivation without artificial means of reclamation, and not one-quarter of a quarter-section (40 acres) would produce tame grass or hay without ditching or some kind of surface drainage.

"It is well known in Florida by all old settlers and citizens that nineteen-twentieths of these lands reported and patented to the State as swamp are high, dry, rolling, and arable lands, free from overflow or swamp. There is no drainage in Florida to amount to anything; the lands that require drainage are not sought after by the State or by individuals. None of the 16,000,000 acres patented to the State, and disposed of by it, show any evidence, as far as I can see or learn, of artificial means of reclamation. What is artificial drainage? Artificial drainage, as considered by the Department, includes anything and everything done to render land drier than it was in its natural state, such as open ditches, blind ditches, and draining with tile, levees and embankments, and surface drainage. * * * The Department has always regarded this style of drainage of sufficient moment to adjust the claims of the several States for indemnity.

"The rule of the Department requires that the special agent shall go over the lands and examine them in person, noting in a book furnished for that purpose the topography of the country and describe the timber, shrubs, grasses, etc., growing on the land, and if there is any evidence of reclamation note that also, describing the same in full, giving the lakes and streams on or near the land, and state what effect, if any, they have upon it; he is also required to make inquiries of persons residing on or near the land of its character at the date of the grant (if any can be found), and if such persons can not be found, of those who have known it for the longest period of time.

"In a contest between a citizen of Florida and the State over a homestead entry, the question was asked on behalf of the State, when the settler went to prove the tract was not swamp and overflowed, under the act of 1850, how he (the witness) knew the land in question was not swamp and overflowed in 1850; for at that time the country was new and unsettled, and the oldest citizen could only date back to 1860, and no man in South Florida living could give any information as to the true nature and character of the soil when the grant was made, September 28, 1850.

"The witness, who is a very intelligent man, stated that he could tell by the growth of the timber; and the land in dispute was proven to be pine land, and the decision rendered established a precedent that has been followed ever since, and the growth of the timber always goes to prove the character of the soil at the date of the grant. Out of the great multitude of contests between the citizens and the State, the State has never been known to gain a case; the decision is invariably given to the settler, and very justly so. The State may, by long litigation, drive the poor man from his claim, but it is not because his claim is invalid, but because he has not the means to fight the case to successful termination.

"Pine trees never grow on swamp or overflowed land. Cypress grows on either one, and so will mangrove; mangroves only grow in salt water; cypress grows in fresh water only, and the soil must be continuously wet. During my examination of lands in Florida I frequently had to dig wells to obtain a supply of water; this was during the months of January, February, and March. We depended mainly for our water supply on cypress ponds along our line of travel. I have often gone as far as ten miles for water; it is a well-known fact that we have sometimes traveled 20 miles without finding a drop of water of any sort—not enough for man or beast. This, in a country put down by State selectors and by Special Agent Childs as swamp and overflowed lands unfit for cultivation until drained by artificial means. * * *

"Another very convincing proof that the lands reported by the State authorities, and passed by the special agents, were never seen or examined by them, is that the lands lie remotely from the coast, and in order to reach them a line had to be run by a surveyor and the trees blazed through a howling wilderness, over obstacles apparently insurmountable, and the only evidence that man had ever passed over the land was the marks on the trees made by the surveyors of the original Government survey. We found these marks with great difficulty, as they were grown over, almost obli-

erated. It required a surveyor of many years' experience to locate the line. The original survey was in 1872. * * * The field notes of the Government survey shows a very large majority of the land dry, arable, and covered with forests of pine and other timber.

"The State of Florida did not elect to take the field notes of the Government survey as a basis of settlement, as some States did, in dividing the swamp and overflowed lands from the dry, but preferred to make her own selections. This opened the door to all sorts of frauds in taking lands that were not of the character contemplated by the grant.

"The State, in making selections of so-called swamp land, never examined the land with a view to ascertain the fact whether or not it was swamp, but reported to the General Land Office all lands desired at the time, commencing at section 1 and running to section 36, omitting only section 16, reserved for school purposes. This egregious, flagrant, and high-handed outrage on the public domain deserves the highest condemnation. These lands were intended for actual settlers as homes, and to take them for any other purpose is a crime."

In harmony with the conduct of Special Agent Childs, as stated by Mr. Akers, is that of R. V. Ankeny, appointed by the Department in 1879. This gentleman was highly recommended for the position of special agent by prominent citizens of his State, and was supposed to be honest and reliable. He was sent to Florida on proper instructions, to make a special and thorough examination of certain lists of selections filed by that State. In May, 1879, he reported that he had made the proper examinations and that most of the lands described and included in the list were high and arable. After remaining in the State for several months he reported that he had made another and further examination of the lands and reported them swampy and overflowed within the meaning of the act of September 28, 1850.

This agent undoubtedly went to Florida with upright intentions, and his very radical change of opinion as to the character of the lands he examined has never been satisfactorily explained to the Department. What influence the climate of Florida and association with her swamp-land agents may have exerted upon his judgment remains a matter of conjecture. I simply state the facts, leaving the Secretary to draw his own conclusions.

These cases serve to show how difficult it is for the Department to obtain entirely truthful and trustworthy information from special agents sent to Florida to make these examinations. Some of these agents, I am happy to say, have shown industry and thoroughness in their examinations, and their reports are regarded as entirely reliable, but I regret to say that such has not been the general rule.

I have endeavored to afford the Secretary all the information upon this subject I could possibly obtain, but the task has been a difficult one. Many reports said to have been made to this office years ago, I have not been able, after much delay and great labor, to find. What has become of them, those now in charge of the swamp-land division are unable to inform us. I am satisfied, however, that no blame in this matter can be justly imputed to the present chief of that division, or to any of the clerks under his charge.

In their communication to the Secretary, the Florida officials complain of alleged erroneous statements contained in the Annual Report, as follows:

"In his charges of fraud against the State of Florida, and the statement that 'there can be no doubt that large quantities of land, amounting to millions of acres, have been patented to this State erroneously as being swamp, when in fact they are and were at the time good agricultural lands,' the Acting Commissioner appears to have ignored the fact that there had been selected up to March 3, 1858, 11,630,271.51 acres, which were confirmed to the State by act of Congress of that date, and patents directed to be made therefor (all but a small portion of which have been patented), which was in effect a special grant to the State by said act of such lands, eliminating therefrom any question as to their swampy character.

"This would leave of the patented lands about 5,500,000 acres in addition to those so confirmed by the act of 1857 of which, as shown by list A, above mentioned, 4,818,465 acres lie within the said Everglade and drainage region. There remains, therefore, only about 681,535 acres of the patented lands to be accounted for outside of the grant of 1857 and the submerged lands of the Everglade region and drainage system. And we respectfully submit there is no reason to believe that those remaining lands are not swamp, as claimed."

In their anxiety to diminish the force of the statement that over 16,000,000 acres of lands claimed to be swamp have already been patented to the State of Florida, these officers are compelled to resort to the desperate expedient of perverting the plain purpose and obvious meaning of the act of March 3, 1857. In order to do this they are driven to the unwarranted assumption that said act " * * * was, in effect, a special grant to the State by said act of such lands, eliminating therefrom any question as to their swampy character."

The act of 1857 was what may be properly termed an "omnibus bill," passed for the benefit of all the recognized swamp-land States, especially referring to Louisiana and Arkansas. Florida is not even named in the act, and it applies to that State only because it was an act in general terms for the benefit of the several swamp-land States. The title of the act itself sufficiently contradicts this assumption of the Florida officers. The following is the title of said act of March 3, 1857:

"An act to confirm to the several States the swamp and overflowed lands selected under the act of September 28, 1850, and the act of the 2d of March, 1849."

It was, by its very terms, an act to confirm to the several States the swamp and overflowed lands selected by them under the acts of 1849 and 1850. It was known that under said acts the so-called swamp-land States had made and reported their selections to the General Land Office, and the act of 1857 was passed to confirm them without further delay. It can not now be ascertained that Congress took any steps to verify those selections, or to determine as to their swampy character; but it did, without examination and without inquiry, undertake to relieve itself from further trouble and responsibility by a general and sweeping act of confirmation.

It is confidently asserted that no act can be found wherein Congress has made a grant of public lands to an individual, corporation, or State, except for a declared and specific purpose, and usually the amount of land intended to be granted had been in some manner clearly expressed, either in an aggregate quantity or by numbered sections, whether odd or even, with defined limits. But, from the very nature of the case, this certainly could not be attained in granting swamp and overflowed lands to the States. Hence, by a general provision the lists of selections then on file in the Department referred to were confirmed and granted.

It may not be regarded as disingenuous to say that the Florida officers now, for the first time, assert this claim, and for the obvious reason that they are unwilling to face the full measure of the fact that there are, as claimed by them, patented and unpatented selections in a total area of less than 38,000,000 acres, over 22,000,000 acres of swamp and overflowed lands "rendered unfit thereby for cultivation," and because they do not desire to be confronted with this damaging admission in view of their unsettled claim for nearly 6,000,000 acres now on file in this Department.

So far as this office is advised Florida is the only State that has made this claim under the act of 1857.

INDEMNITY LANDS.

Included in the lands patented are 92,980.57 acres given to the States as indemnity for alleged swamp land sold by the Government, as provided by section 2, act March 2, 1855, and claimed to have been swamped and overflowed in September, 1850. While the act of 1855 did not require that these indemnity lands should be from swamped and overflowed, yet it is notoriously true that in selecting them the State picked out the very best tracts it could find, thus obtaining arable and valuable lands for those that were swampy and inferior.

By the said act of March 2, 1855, it is also provided: "That upon proof by the authorized agent of the State or States, before the Commissioner of the General Land Office, that any of the lands purchased were swamp lands, within the true intent and meaning of the act aforesaid, the purchase money should be paid over to the said State or States."

Under this provision there has been paid to the State of Florida up to March 20, 1890, the sum of $69,214.83 in money, representing 70,403.86 acres of land at the graduated prices provided by law.

FLORIDA KEYS.

Still another fact may be cited illustrating the assiduity and admirable tact of these Florida agents. They have not confined their efforts alone to the peninsula, but have gone beyond its limits and invaded the waters of the Atlantic in their persistent hunt for swamp and overflowed lands. It is a noteworthy fact that they have selected 55,544.26 acres, over 22,000 acres of which have been patented, situated upon the Florida Keys, an archipelago or chain of islands along the straits, which begin at Dry Tortugas, its extreme western terminus, running thence in a northeasterly direction entirely around the southern end of the peninsula, several miles in front of its eastern shore.

These islands are situated from 6 to 50 miles out from the mainland, and are of coral formation, generally covered with a sandy soil, in many places showing alluvial deposits that are arable and rich, producing some of the choicest semitropical fruits. Occasionally their lowest portions are washed by the waves or covered by high tides. South of these keys, and separated from them by a navigable channel, is a narrow coral reef or ridge, known as the "Florida Reef," which here constitutes the left bank of the Gulf Stream.

From these circumstances, it would appear that these keys are not formations upon which swamp and overflowed lands can exist within the meaning of the granting acts. This proposition is so apparent as to exclude the necessity of illustration or argument.

But their selection as such by her agents seems to show that the State of Florida has been prompt and vigilant in pursuing all the chances suggested to her by the several acts of Congress. Her merest possibilities have been developed into an astonishing measure of success. Over 22,000 acres of the lands selected on the keys have already been patented to the State.

GRANTED TO RAILROADS.

Not only have large bodies of these swamp lands been absorbed by State agents in payment of their services, but an immense area has been donated to railroads and other corporations.

I find in the senate journal of the State, for the year 1889, page 761, that 9,125,541.69 acres have been conveyed by said State to railroads and canals, by far the largest portion of which being to the former. I shall not enter into a discussion of the question as to the right, under the granting act, of the State to divert these swamp and overflowed lands to the purpose of subsidizing railroads and canals. It is possible that inasmuch as the patents issued by the Department vested the fee-simple title to these lands in the State, it had the power thereby to divert them from the specific purpose expressed in the grant, and that the United States Government retained no power to interfere with such disposal.

In accepting the grant with its limitations and purposes so plainly expressed, the State pledged itself to apply the land granted to the purposes therein specified. To this the faith of the State was solemnly committed. By providing that the reclamation of these lands should be accomplished by the particular "means of the levees and drains aforesaid," it thereby, under all recognized canons of construction, excluded the idea that the lands granted for that purpose should be used in experimenting with other and untried agencies. It became a trustee for a particular specified trust and was bound to carry that trust into effect according to its terms.

Still another feature worthy of comment is connected with this giving of lands to the railroads and canals of the State. I am informed by citizens of Florida, and others in a position to know the facts, that a large portion of these lands were given to railway companies many miles distant from their respective lines of road. They were not confined to coterminous sections, but were allowed lands varying in distance from 25 miles to over 100 miles therefrom, thus excluding all pretense that they were given for reclamation purposes.

When it is considered that Florida has within her limits, according to her own showing, more than 22,000,000 acres of swamp and overflowed lands, rendered unfit thereby for cultivation, which, by accepting the grant made by Congress, she is under a solemn obligation to reclaim to the extent at least of the means provided for that purpose by the grant, it becomes apparent that she can not divert so large a portion of these lands, and so much of the cash indemnity, without seriously impairing her ability to discharge the obligation she has undertaken to perform.

In this view of the case the people of Florida are themselves doubly and most vitally interested, first, because every acre of land approved to the State as swamp and overflowed that is not so in fact is a loss of so much to actual settlers for homestead purposes; and second, because every acre, or its proceeds, should be faithfully and exclusively applied to the reclamation and rendering fit for cultivation of all the swamp and overflowed lands within her borders.

It was to effectually guard the State against the possible contingency of misappropriation that Congress wisely provided in the grant that every acre of said land, or its proceeds, should be "applied exclusively, so far as necessary, to the purpose of reclaiming said land, by means of the levees and drains aforesaid."

I allude to this feature of the case because, in my judgment, it serves to show still more clearly the extent to which the State of Florida has gone in disregarding the provisions of these swamp-land grants, rendering still more imperative the necessity for a thorough investigation of her selections now on file, embracing about 6,000,000 acres in addition to the enormous aggregate already obtained.

LANDS RECLAIMED.

That a very large majority of the lands patented to the State of Florida as swamp and overflowed have been absorbed by corporations and appropriated to the purposes of corporate and individual aggrandizement instead of being faithfully applied to the purposes of reclamation, as contemplated by the several acts of Congress on the subject, is a fact so clearly established as to place it beyond successful controversy.

The evident purpose of Congress was that the lands granted should be so appropriated as to procure their own reclamation—that is, the identical lands so granted—and it was for this purpose only that the grant was made. It

certainly never entered into the contemplation of Congress that they should be diverted from the declared purpose of reclamation and used for corporate or individual profit. Yet I regret to say that such has largely been the fate of the enormous acreage of the so-called swamp and overflowed lands patented to the State of Florida.

In the reports made by the trustees of the internal-improvement fund of that State, I find no statement as to the actual number of acres of land that have been reclaimed from their swamp and overflowed condition, and this office has no information that any lands have been reclaimed, nor have we been able to ascertain that, in this respect, the purpose of Congress in making the grant has in any manner been accomplished. I therefore respectfully submit that this subject should arrest the profound attention of the Secretary of the Interior, and of Congress, especially so as there are still selections pending in this office for considerably more than 6,000,000 additional acres from that State that are unadjusted.

For the information of the honorable Secretary I append the following table, showing the number of acres already patented to the several States, and the number of acres selected awaiting examination, viz:

Area of the swamp-land selections made by the several States up to May 3, 1890.

States.	Area.	States.	Area.
	Acres.		*Acres.*
Alabama	531,365.60	Michigan	7,293,159.28
Arkansas	8,655,210.10	Minnesota	4,389,252.94
California	1,883,555.90	Mississippi	3,602,963.30
Florida	22,232,439.60	Missouri	4,843,583.34
Illinois	3,981,784.10	Ohio	116,766.26
Indiana	1,377,727.70	Oregon	410,671.66
Iowa	4,567,959.33	Wisconsin	4,567,123.67
Louisiana, act March 2, 1849	11,214,996.32	Total	80,213,009.03
Louisiana, act September 28, 1850	55,459.51		

Area of the swamp lands patented to the several States up to May 3, 1890.

States.	Area.	States.	Area.
	Acres.		*Acres.*
Alabama	411,189.26	Michigan	5,667,304.64
Arkansas	7,647,709.36	Minnesota	2,890,547.25
California	1,469,340.25	Mississippi	3,259,153.20
Florida	16,114,669.00	Missouri	3,415,452.85
Illinois	4,456,641.45	Ohio	25,640.71
Indiana	1,257,863.05	Oregon	140,623.87
Iowa	1,183,815.20	Wisconsin	3,332,900.51
Louisiana, act March 2, 1849	8,708,588.53	Total	57,205,111.45
Louisiana, act September 28, 1850	225,172.32		

It will be seen that of the immense acreage of selections made by the sixteen swamp-land States more than one-fourth comes from the State of Florida alone. The average of selections per State is a little over 5,000,000 acres, Florida claiming over four times that amount.

In view of all the facts herein presented, I respectfully urge upon the honorable Secretary that no more selections be approved to the State of Florida until thorough and reliable examinations are made by competent and trustworthy agents, who go out under specific instructions, provided with competent surveyors, with orders to trace and report upon each section embraced in the lists of selections according to the field notes of the original surveys.

The limits of this communication, already too much extended, will not permit me to enter into a discussion of the important and somewhat difficult question as to the right and duty of the Government to institute proceedings for setting aside patents granted to the State upon the ground that they were procured through fraud and mistake. Upon this subject I am not now prepared to express an opinion. I therefore respectfully suggest that it be referred to the honorable Attorney-General for his consideration.

Very respectfully,

W. M. STONE,
Assistant Commissioner.

Hon. JOHN W. NOBLE,
Secretary of the Interior.

The Committee on Public Lands, to whom was referred the Senate resolution, introduced December 4, 1889, proposing to direct said committee or a subcommittee to investigate the facts concerning alleged illegal and fraudulent conveyances of public lands in the State of Florida, have had the same under consideration and respectfully report.

The following is a copy of said resolution:

"[Senate Mis. Doc. No. 12, Fifty-first Congress, first session.]

"Whereas the Secretary of the Interior in a communication to the Senate in 1885 stated that, at an estimated number, there were between two and three thousand contests and homestead cases in the State of Florida alleging unlawful selections of the land covered by their homesteads under alleged railroad and swamp-land grants; and

"Whereas the Secretary of the Interior and the Commissioner of the General Land Office, in several communications to Congress in the years 1885, '86, '87, '88, called the attention of Congress to the fact that 'numerous letters were on file in the Interior Department from citizens of Florida complaining of unlawful selections of their homes, under alleged railroad and swamp-land grants, and recommended legislation for the protection of these people in their rights;' and

"Whereas many petitions have been presented to the Senate to the same effect, praying for protection to actual settlers: Therefore,

"*Be it resolved*, That the Committee on Public Lands, or a subcommittee of their number, be, and is hereby, directed to investigate all the facts bearing upon the general allegations referred to, and that for the purpose of such an investigation said committee is authorized to employ a stenographer, and shall have power to administer oaths, send for persons and papers, to sit in Washington or such other place as may be necessary, the expense of the same to be paid from the contingent fund of the Senate; and said committee shall report, by bill or otherwise as the circumstances shall seem to require, such plan for remedy of the evils, if any shown, as they may deem necessary."

In answer to a letter from the chairman of the committee to the honorable Secretary of the Interior requesting information, the Acting Secretary, with a letter dated May 8, 1890, inclosed a letter from the Commissioner of the General Land Office (both of which are hereto appended), from which it appears that in the opinion of the Commissioner no legislation would be of benefit to applicants whose entries are in conflict with land claimed by the railroad company except the passage of bills looking to the forfeiture of the land grant—bills since disposed of by the passage of the general land-grant forfeiture bill—and that no "further legislation could benefit the swamp-land contestants or hasten the adjustment of the cases of conflict in the General Land Office."

A similar resolution passed the Senate during the Fiftieth Congress, and the committee investigated the facts and reported that no legislation was practical which would be beneficial to such contestants. A copy of the report, omitting the testimony accompanying it, is hereto appended.

Your committee therefore recommend that the resolution be indefinitely postponed.

DEPARTMENT OF THE INTERIOR,
Washington, May 8, 1890.

SIR: I am in receipt of your communication of the 14th ultimo, inclosing a resolution offered by Senator CALL relative to an alleged unlawful selection of land in the State of Florida and asking of this Department information as to the difference, if any, which exists between the contests mentioned in said resolution and those arising in other States, and whether any, and, if so, what, legislation is necessary to hasten their settlement.

In reply thereto I transmit herewith a report from the Commissioner of the General Land Office upon said subject, which contains all the information in the possession of this Department relative to the matters inquired about.

Very respectfully,

GEO. CHANDLER,
Acting Secretary.

Hon. P. B. PLUMB,
Chairman Committee on Public Lands, United States Senate.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE,
Washington, D. C., April 24, 1890.

SIR: I am in receipt, by reference from the Department, on April 16, 1890 (for report in duplicate), of a communication from the chairman of the Senate Committee on Public Lands, inclosing a resolution offered by Senator CALL, relative to the alleged unlawful selection of land in the State of Florida.

The first paragraph of said resolution reads as follows: "Whereas the Secretary of the Interior in a communication to the Senate, in 1885, stated that, at an estimated number, there were between two and three thousand contests and homestead cases in the State of Florida, alleging unlawful selections of the land covered by their homestead under alleged railroad and swamp-land grants."

The honorable chairman of the Committee on Public Lands, in his letter dated April 14, 1890, states that he would like to have information as to the difference, if any, which exists between the contests mentioned in the inclosed resolution, and those arising in other States, and whether any, and if so, what, legislation is needed to hasten their settlement.

Pursuant to said request I have the honor to submit the following report:

1. As regards the railroad contests, they are conducted in the same manner as in other States.

There are pending in this office about five hundred applications, on appeal from the rejection of the same, for conflict with the grant under the act of May 17, 1856 (11 Stat., 15), to aid in the construction of a railroad from Amelia Island (Fernandina), on the Atlantic, to the waters of Tampa Bay, with a branch to Cedar Keys, on the Gulf of Mexico.

The present owner of this grant is the Florida Railway and Navigation Company.

The road was completed from Fernandina to Waldo within the time prescribed, and from Waldo to Plant City after that time. It remains uncompleted from Plant City to Tampa.

The Cedar Keys branch, from Waldo to Cedar Keys, was constructed in time.

These applications are mostly opposite the road constructed out of time, and a few may be opposite the unconstructed portion.

Should action now be taken upon their applications it would be adverse to the applicants, and for this reason action has been suspended awaiting the result of the proposed legislation looking to the forfeiture of the grant.

I can not see how any legislation can benefit applicants whose entries are in conflict with land claimed by the railroad, except by disposing of the bills pending, looking to the forfeiture of the grant to the railroad company.

2. Relative to the swamp-land contests there is no difference in the manner of conducting the class of contests mentioned in said resolution from those arising in other States over which the swamp-land grant has been extended.

On December 13, 1886, the rules previously in force relative to the admission of entries and filings on land selected as swamp, which had not been approved or certified by the Secretary of the Interior, were modified so as to read as follows:

"1. When any settler upon such lands, or applicant to enter the same under the public land laws of the United States, shall apply to make a filing or entry under said laws, accompanied by a statement under oath, corroborated by two witnesses, that the land in its natural state is not swamp and overflowed, and rendered thereby unfit for cultivation, the register and receiver will allow such filing or entry 'subject to the swamp-land claim.'

"2. Upon the admission of any such filing of entry the register will at once notify the governor of the State thereof and allow him sixty days within which to object to the perfection of the entry and to apply for a hearing in behalf of the State to prove the swampy character of the land.

"3. When a hearing is ordered between the State and claimant, under the public land laws, the burden of proof will be upon the State to establish the character of the land.

"4. When no protest or application for a hearing is presented on the part of the State, as herein provided, the State will be deemed concluded from thereafter asserting a claim to the land under the swamp-land grant."

The foregoing rules are applicable to the State of Florida, and it will be observed that parties who desire to enter land that has been selected by the State as swamp land may do so, and the burden of proof to establish the character of the land is placed on the State; consequently the applicant is put to no expense in the matter of clearing the records of the swamp-land claim, unless the State objects to the perfection of such entries and applies for hearings, and even then the applicant is not required to be present, as the State must establish the swampy character of the land without expense to the applicant.

Nearly all the swamp-land contests initiated under the old methods, which place the burden of proof on the contestant, have been adjusted.

I am unable to see how further legislation could benefit the swamp-land contestants or hasten the adjustment of the cases pending in the General Land Office.

Very respectfully,

LEWIS A. GROFF, *Commissioner.*

The SECRETARY OF THE INTERIOR.

[Senate Report No. 2288, Fiftieth Congress, first session.]

The Committee on Public Lands, to whom was referred the Senate resolution, passed April 18, 1888, directing said committee or a subcommittee of their number to investigate the facts concerning alleged illegal and fraudulent conveyances of public lands in the State of Florida, have had the same under consideration, and respectfully report.

The following is a copy of said resolution:

IN THE SENATE OF THE UNITED STATES, *April 18, 1888.*

Whereas it has been alleged by the Senator from Florida that he is satisfied, from petitions presented by reputable citizens of Florida, that illegal and fraudulent conveyances of public lands have been made in said State, in derogation of the rights of the United States and of settlers upon said lands, and that a remedy for such evils can be provided by law: Therefore, be it

Resolved, That the Committee on Public Lands, or a subcommittee of their number, be, and is hereby, directed to investigate all the facts bearing upon the general allegations referred to, and that for the purpose of such an investigation said committee is authorized to employ a stenographer, and shall have power to administer oaths, send for persons and papers, to sit in Washington or such other place as may be necessary, the expenses of the same to be paid from the contingent fund of the Senate; and said committee shall report, by bill or otherwise as the circumstances shall seem to require, such plan for remedy of the evils, if any shown, as they may deem necessary.

Attest:

ANSON G. McCOOK, *Secretary.*

In order to ascertain the class of lands concerning which an investigation was desired by the author of the resolution, the senior Senator from Florida [Senator CALL], he was invited to appear before the committee and make a statement. From his statement it appeared that an investigation was only desired in regard to swamp and overflowed lands granted to the State by the act of September 28, 1850.

The committee thereupon proceeded to take the testimony of certain witnesses, and have received a statement from the trustees of the internal improvement fund of the State of Florida, and from Mr. Hamilton Disston, on behalf of the Florida Land and Improvement Company, all of which are appended to this report.

By the act of September 28, 1850, above referred to, there was granted to the State of Florida the whole of the swamp and overflowed lands within her borders made unfit thereby for cultivation, which remained unsold at the date of the passage of the act, to enable said State to construct the necessary levees and drains for their reclamation.

By the second section it was made the duty of the Secretary of the Interior, as soon as practicable after the passage of the act, to make accurate lists and plats of lands described in the grant, and to transmit the same to the governor of the State, and at the request of the governor to cause a patent to be issued to the State therefor. By the third section it was provided that, in making out lists and plats of such land, all legal subdivisions the greater part of which was wet and unfit for cultivation should be included in said lists and plats, but when a greater part of a subdivision was not of that character the whole of it should be excluded therefrom.

A circular of instruction as to the manner of proceeding under said act was issued by the Secretary of the Interior November 21, 1850, to the surveyor-generals of the several swamp-land States in which that office had not been discontinued, and to the registers and receivers in the other States to which the grant applied. Copies of this circular were sent to the governors of all the States in interest, with the request that the State authorities would elect which of the two methods for the selection of the swamp lands therein proposed they would adopt. These methods were:

1. The field notes of the Government survey to be taken as the basis for selection, and all lands shown by them to be swamp or overflowed within the meaning of the act to be placed in the lists to be reported to the General Land Office.

2. The States to select the lands by their own agents and report the same to the surveyor-general with proof as to the character of the lands.

The State of Florida elected to select the swamp-lands granted to her under said act by her own agents. The total number of acres of swamp lands and overflowed lands selected as inuring to the State under the swamp-land grant of September 28, 1850, reported to the Commissioner of the General Land Office by the United States surveyor-general of Florida, to June 1, 1888, was 20,259,323.59 acres; amount so selected and reported prior to March 3, 1857, was 11,630,271.51; amount reported since March 3, 1857, 8,629,052.08.

By the act of Congress approved March 3, 1857 (11 Stat., 251), selections of swamp and overflowed lands under the act of 1850 theretofore made and reported to the General Land Office, so far as the lands remain vacant and unappropriated and not interfered with by an actual settlement under any existing law of the United States, were confirmed to the States and the approval and patenting of the same to the several States was directed and required.

By this act 11,630,271.51 acres of swamp land selected and reported to the Commissioner of the General Land Office prior to March 3, 1857, were confirmed to the State of Florida, whether in fact swamp land or not. Of the 8,629,052.08 acres reported since March 3, 1857, there have been approved by the Secretary of the Interior 5,131,944.32 acres. Of the lands so approved there have been patented to the State 4,953,333.50; and there are remaining unpatented of such selections 3,675,718.58 acres. But a comparatively small quantity of lands have been approved or patented to the State since September, 1879, and none have been approved or patented since June, 1885.

Among the witnesses examined before the committee was Mr. S. R. Edwards, chief of the swamp-land division in the General Land Office. From his statement it appears that in every case where the lands selected by the State of Florida as swamp and overflowed lands have not passed beyond the control of the General Land Office, either by confirmation of the selection, by the act of 1857, or by approval and patent of selection since that date, persons filing affidavits alleging that lands selected by the State are not swamp or overflowed lands within the meaning of the grant are allowed to contest the State's claim to the lands; and that in such contest for lands which have not been patented the burden of proof of the character of the land is upon the State.

It appears also that the State makes no defense, but allows her claims to be rejected in such cases without protest or objection. Before selected lands are approved or patented to the State they are thoroughly and carefully examined in the field by an agent of the Government appointed by the Secretary of the Interior, and are not approved to the State unless his report shows them to be in fact swamp and overflowed lands.

Under this state of the law and of the practice in the Department it does not appear to the committee that any further legislation is required to secure to settlers upon the public lands in Florida the right to assert their claims and to secure title to lands which have been selected by the State as swamp lands, but have not been approved to it.

The next subject of inquiry is whether any legislation should be had to authorize the institution of legal proceedings to set aside patents which have been issued to the State for lands selected by the State under said act of 1850 as swamp and overflowed lands. As to the manner of selecting these lands we quote the following from the statement of the trustees of the internal improvement fund of Florida above referred to:

"As to the selection of swamp and overflowed lands, we have only to say that they are selected by agents under the employment of this board, but the proof of their character is made not to us but to the Secretary of the Interior of the United States, who considers the proof, causes the lands to be examined by his own agents, and determines whether or not the lands selected are swamp and overflowed."

A serious question arises as to the power of Congress in the premises if it shall be proposed to authorize proceedings to be instituted to set aside patents which have been issued to the State for lands selected in the manner above described. By the act of September 28, 1850, it was made the duty of Secretary of the Interior to pass upon the question of the character of the lands selected under it, and to make out accurate lists and plats of the lands granted by the act when they had been selected, and to cause a patent to be issued to the State therefor.

Without passing upon the question as to whether the approval of the selections of lands under this act is not a final and binding adjudication between the State and the General Government as to the character of the lands selected by the State, the committee will proceed to consider the question of the policy of legislation authorizing the institution of legal proceedings for the purpose of canceling such patents.

It appears from the statement of the trustees of the internal-improvement fund of Florida that there have been received by the State patents for 15,992,251 acres; that there have been disposed of by sales, preemptions, homesteads, etc., 6,158,610 acres; conveyed to railroads, 5,940,010 acres; conveyed to Florida Coast Line Canal and Transportation Company, 92,155 acres; conveyed to Atlantic and Gulf Coast Canal and Okechobee Land Company on drainage contract, 1,174,942 acres, and that of the patented lands the title to 2,626,532 acres remains in the trustees of the internal-improvement fund of Florida.

It appears further that the lands so conveyed to corporations have been largely pledged for the moneys which have been expended in their works or sold to individuals, including not only speculators, but large numbers of settlers and immigrants, all of whom have purchased upon the faith of the patents of the United States issued after a determination of the question of the character of the land by the Secretary of the Interior, who was, by the act making the grant, invested with the power to finally determine the character of the land so far as the United States is concerned; that as to the lands the title of which remains in the trustees of the internal-improvement fund, a large portion is involved in contracts with drainage and canal companies, who have invested their money on the faith of the patents to the same, and that other portions of said land are held by said trustees to pay the liabilities of said fund.

It appears that the swamp lands granted to the State by the said act of September 20, 1850, were, by a statute of Florida of January 6, 1855, vested in the trustees of the internal-improvement fund, and that the governor, controller, treasurer, attorney-general, and commissioner of lands and immigration are *ex officio* such trustees. The trusts to which the lands are devoted by the original act and all amendatory acts may be stated as follows:

1. Internal improvements, by railroads and canals.
2. Drainage, by work devoted immediately to that purpose.
3. Encouragement of actual settlement and cultivation of said lands, by allowing premiums of not exceeding one section to any one settler.

A number of railroad companies in the State have special land grants from this fund, varying in quantity, but subject to the general trusts of the act creating such fund and its amendments; and every railroad, or canal, or company incorporated under the general corporation acts of the State becomes entitled to receive the alternate sections of State land within 6 miles of its line, and indemnity within 20 miles of the road or canal as the road or canal is completed in sections of 6 miles.

It further appears that under the statutes of the State and the rules of the board any person may acquire swamp lands still held by the trustees and not reserved by paying $1 per acre therefor; that any citizen of Florida who is the head of a family, or is 21 years of age, can acquire 80 acres of such land, at 25 cents per acre, by making affidavit that he desires it for his own settlement and cultivation; that any person who is an actual settler on such land can preempt and acquire the title to such land, not exceeding 160 acres in a compact form in legal subdivisions, by applying for the same and paying $1 an acre therefor in three installments, one-third on entry, one-third in two years thereafter, and one-third in three years thereafter.

It appears, also, that in the grant of these lands to railroad companies, and in the sales of lands in large quantities, the rights of settlers have been protected. Upon this point the committee quote the following from the statement of the trustees of the improvement fund:

"The policy of the laws of Florida as to actual settlers on these lands has been liberal, and the administration of the trustees has been and is governed by an earnest and diligent solicitude for the interests of such settlers and to secure to them all the rights, privileges, and opportunities possible, and any intimations to the contrary, or that action is required of Congress or otherwise to secure the rights of actual settlers in lands of which these trustees have control, they repel as gratuitous and without any foundation of fact. Of course this board is not able to authorize persons to now enter upon or to convey to them lands which have been previously conveyed to some one else; but in all contracts, reservations, and conveyances the board has been careful and diligent in protecting the interests of all actual settlers whether occupying under color of any right or merely as squatters.

"Previous to the Disston sale, above mentioned, the most of these lands were unoccupied, but here and there persons had squatted on them, who lived on them without paying anything for them, and without making any effort to acquire title. This may have been in some cases on account of poverty, and in some cases because of ignorance of the method of proceeding to get title, but in some cases it was because of a desire to enjoy the use of land without paying anything for it in purchase or in taxes.

"When the sale was made to Disston in 1881 the trustees entered into an agreement with him that all persons settled on any of the lands bargained or conveyed to him should have the lands on which they were settled at the State prices, the maximum of which was $1 per acre, and that they should have until January 1, 1883, to pay for such lands. Notice of this was published by the trustees in the newspapers of the various counties where the lands were situated, and blanks or forms of application sent to all persons so situated who made application to purchase such lands, and deeds were executed to them free of any cost other than the schedule price as aforesaid.

"In fact the limitation to January 1, 1883, has never been enforced; but upon a showing of bona fide settlement prior to the sale to Mr. Disston he has

always been willing, if the land remained subject to his control, to convey it to the settler and to receive other lands from the trustees instead thereof, and the trustees have always been willing and anxious to make such arrangements. If any cases of individual hardship have occurred to settlers they have not arisen from any lack of care or provision by the board for their protection.

"There have been contests alleging attempts fraudulently to take advantage of these provision for the protection of actual settlers by land speculators and persons having no bona fide settlements on the lands; also contests as to who of several was the actual settler on a certain piece of land; and the board has from time to time sent our agents to investigate and report upon these matters free of cost to the alleged settlers, and in determining whether or not a person was an actual settler their decisions have been liberal to the settlers.

"The general rule as to all reservations for railroads made since 1881, since which time nearly all the reservations under which railroads have acquired lands have been made, has been and is that the reservation is made 'subject to the rights of actual settlers and subject to the further order of the board.' And the board has exercised their reserved power liberally and freely in favor of actual settlers in all meritorious cases brought to their attention, and these opportunities of relief are generally known in the localities where the lands are situated, and settlers frequently and freely avail themselves of them. There are no fees, costs, or technical requirements in these proceedings, nor is there anything strict or difficult in the proof of settlement required.

* * * * * * *

"Where reservations have been made for railroads or canals and by reason of delay in the work it has appeared to the board that the settlement of the land was being impeded, the board has in several such reservations allowed actual settlers to go into such reservations and purchase homesteads at the schedule price of $1 per acre."

It seems more than probable that considerable tracts of land were confirmed to the State of Florida by the act of March 3, 1857, which were not swamp lands in fact, and that there have been since selected and approved and patented to the State lands which did not fairly come within the description of land granted to the State by the act of 1850. But it would be impossible at this late day to ascertain with any degree of precision what lands have been so erroneously patented to the State or the relative proportion of the same. It appears that large bodies of land are swamp or overflowed at certain seasons of the year, generally in the summer and fall and during wet years, so as to be periodically too wet for cultivation or habitation, which in dry seasons or in dry years are dry.

It also appears that lands which, at the date of the swamp-land act, September 28, 1850, were undoubtedly swamp and overflowed within the meaning of the act, have since that date, by the construction of railroads, canals, and ditches, by the settlement, clearing, and cultivation of the land, and in some cases by trails made by stock, become comparatively dry and fit for cultivation.

The committee believe that in other States which received the benefit of the act of September 20, 1850, large quantities of land have been selected and patented to the State which were not swamp lands in fact, and if legislation is to be had authorizing legal proceedings for the purpose of setting aside patents issued for land in the State of Florida it should be extended to such States."

In view of the fact that by the terms of the grant of the swamp and overflowed lands to the States the Secretary of the Interior was empowered to pass upon and determine the question of the character of the lands; of the fact that most of the lands patented to the States have been sold and conveyed by them and are now held by persons who have purchased them upon the faith of the United States patents; in view of the impracticability of determining at this time with certainty the character of lands selected by the States as swamp and overflowed lands at the date of the grant, the committee believe that as a matter of sound public policy the United States should be bound by the action of the Secretary of the Interior and that it would be unwise to throw a cloud over the title of these lands by any legislation authorizing proceedings to set aside and cancel the patents heretofore issued for them to the States.

Mr. WHITE of Louisiana. I move to lay the amendment of the Senator from Idaho on the table.

Mr. CALL. I ask permission to say a few words.

Mr. WHITE of Louisiana. The Senator will have an opportunity subsequently to do that.

Mr. CALL. Then I shall call for the yeas and nays on the motion.

Mr. WHITE of Louisiana. Very well, then; the Senator may call for the yeas and nays.

The PRESIDING OFFICER. The Senator from Louisiana moves to lay the amendment submitted by the Senator from Idaho on the table.

Mr. DUBOIS. On that motion I ask for the yeas and nays.

Mr. GORMAN. I trust the Senator will be content to ask for a division, without calling for the yeas and nays, as his object will be accomplished by that just as well. To save time and for the convenience of the Senate, I trust the Senator will not ask for the yeas and nays.

Mr. DUBOIS. I regard this as an extremely important matter, certainly as to the section of country which I have the honor in part to represent.

The yeas and nays were not ordered.

Mr. WHITE of Louisiana. I make the point of order that the amendment of the Senator from Idaho is out of order, from the fact that under the law the subject-matter of the Senator's amendment must be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The PRESIDING OFFICER. The point of order, the Chair thinks, is well taken, and it is sustained.

NOTIFICATION TO THE PRESIDENT.

Mr. HARRIS and Mr. SHERMAN, the committee appointed to wait upon the President, appeared below the bar, and—

Mr. HARRIS said: Mr. President, the committee appointed by the Senate to wait upon the President of the United States and inform him that if he shall have no further communication to send to the Senate at its present session, it was ready to adjourn without day, have performed that duty, and were informed by the President that he had no further communications for the Senate at its present session.

DISBURSEMENTS BY RECESS COMMITTEES.

The Senate resumed the consideration of the resolution reported by the Committee to Audit and Control the Contingent Expenses of the Senate relative to disbursements by committees during the recess.

Mr. CALL. Mr. President, the Senator from Oregon [Mr. DOLPH] has thought all along, in connection with his membership of the Committee on Public Lands, that a report made by him was sufficient to divest the right of every settler upon the public lands and every *bona fide* purchaser from an entry man to his home. It is true the Senator's reports have always been in the interests of the corporations and against the people of the country; but I affirm here to-day, whatever any Secretary of the Interior may have reported, that there is not a word in any law of the United States or of the State of Florida which gives even the pretense of a right to this land, unless, as the Senator has repeatedly claimed, in reference to another subject, two fraudulent statements made by officers of the Land Department in reference to the character of public lands, stating dry, arable lands to be swamp lands, and falsifying the facts of the case—unless, as he has maintained time and again, this fraud destroyed the force and effect of an act of Congress, and where a poor man's interests were at stake deprived him of his land, there is no law to authorize this shameful fraud and robbery.

What mockery to talk about a poor man, living upon 40 or 80 or 160 acres, going to the courts for the protection of his rights! Who would furnish the money? He is scarcely able to support his poor family, while these corporations and paid agents are disbursing their money in the Departments here to obtain false certifications of the land.

Here is the whole State of Florida [exhibiting a map]. Look at it. That is the railway company's map, which the Senator from Oregon, in his capacity as a member of the Committee on Public Lands, has endeavored to make valid, but fortunately for the poor people the decision of the Senator does not make the law, and can not divest the poor man and his family of his right to his home.

Mr. DOLPH. I beg to say to the Senator that I never examined or passed upon the question of the title of the railroad company.

Mr. CALL. Then the Senator ought not to have made the suggestion, and he ought not to have risen here to-day——

Mr. DOLPH. I said that if the railroad company claim as against the grant of the State or any other party, the State can contest it, or any person who claims can contest it, and have the question settled.

Mr. CALL. Not when a powerful corporation affects the election and spends hundreds of thousands of dollars to control public opinion and the selection of officers. I do not mean to say that there have been any improper acts on the part of any official of the State of Florida, but I do mean to say that an opinion has been created which has paralyzed action, while the fact is that there is no law of the United States or of the State of Florida which even looks in that direction.

In 1856, on the 17th of May, Congress passed a statute by which they gave to Florida and Alabama alternate sections of land upon the condition that the Legislatures of those States should dispose of it, and that the Legislatures should not dispose of it except as the roads should be thereafter built. It does not require two ideas to know that that required a subsequent disposal by the Legislatures. From that day to this there has been no disposal by the Legislature of the State of Florida. The governor of the State certified here in 1858, and it is upon the records, that there had never been a disposal of the land, and the Legislature so declared, and has repeatedly so declared.

Why talk about it, when I have here time and time again proved the fact to be as I state it? I have consulted with the former Assistant Attorney-General, Mr. Jenks, under a former Administration, and we have taken the statutes of Florida, and only the day before yesterday he said to me in the Executive Mansion, referring to that, that we went over very la w and there was not a vestige or a pretense of a disposal by the State of Florida. Is it not fraudulent then? Why does the Senator from Oregon get up here and justify it?

It is true that I have persistently, in season and out of season, claimed that this attempted alienation of the whole soil of the State of Florida was to the injury of all the people, Democrats, Republicans, old soldiers, Confederates, and everybody, and seeking to give it away to foreigners—a great outrage and a crime. I am no assailant of the railroads or other corporations of the

country, but when they take possession of the entire soil of a State under such circumstances, it is my duty, and as long as I remain here I shall endeavor to perform it, to protect these poor people upon this domain in their rights.

I shall insist upon the indictment and punishment of these criminals who have taken from the families of the poor people of Florida their hard-earned money in order that they may live in luxury, who seek to control a State with bribery, corruption, and free passes or tickets. I know that this resolution will be laid on the table now, but the time will come when it will not be laid on the table, but will become law and restore their homes to these people, with restitution of the money taken from them.

The record which the Senator produces condemns on its face the official who made it. Secretary Teller is a man of ability and fidelity to duty; Secretary Lamar was a man of great intellect and integrity, and Secretary Noble is a man of very considerable merit and attainments, and this being true it is certain that neither of them ever read the opinions which bear their signature; the absence of all reasonable argument and the self-evident fallacy and untruth of the propositions of these papers is clear to any mind.

Let us examine the points of the case. First, there is an alleged grant made to the State of Florida in the act of Congress approved May 17, 1856.

This act requires the Legislature of the State to dispose of it. It also requires the Legislature to dispose of it after the passage of the act of May 17, 1856, because it forbids the Legislature from disposing of it except as each 10 miles shall be completed, and only authorizes the Legislature to dispose of a specified quantity before the completion of the first 10 miles.

Again, it requires no act of Congress to show that the disposal by the Legislature was required to be subsequent to the passage of the act of Congress, viz, subsequent to 17th May, 1856, because the Legislature of Florida could not dispose of land belonging to the United States, and up to the time of passing the act of May 17, 1856, and its taking effect the land was the property of the United States.

Again, a subsequent disposal by the Legislature was required, because under the act there had to be a subsequent location of the line of road under authority of the Legislature, certified by the governor; and until that was done there could not be any alternate sections for 6 miles on either side of a "line" of road which had neither existence nor authority to exist.

It is quite as plain to any sane mind as that two halves make a whole, and that a whole quantity is equal to its two halves, that this act of Congress of 17th May, 1856, required first a disposal by the Legislature to some person.

Second. That this disposal should be subsequent to the passage of the act; that is, subsequent to 17th May, 1856.

Third. That there should be a location of the line of road by some person authorized by the disposal to make such location.

Fourth. That there could not be a line of road under this act nor any alternate section for 6 miles on either side of it until such subsequent disposal and location was made.

The question is plain, Was there such subsequent disposal by the Legislature of Florida and a location of the line under it? This is a very plain and simple question; there is no room for mistaken or fraudulent construction. Then surely the officials of a great Government can not be excused for robbing hundreds and thousands of poor people of their homes because of any possibility of mistake in determining the fact whether the published laws of Florida from the 17th of May, 1856, to this day contain any disposal of this grant and any location made under such disposal.

I affirmed that there was no such disposal of the grant by the Legislature, and as there was no such disposal there could be no location of a line under it.

This fact was officially notified to the United States by the governor of Florida, M. S. Perry, in 1858, that no disposal of the land had been made.

That this official notification of the governor, who was required to approve and certify the location of the line under a disposal by the Legislature, could not be set aside forty years after it was made by the opinion of any Secretary of the Interior. This, also, is too plain for argument.

That this official notification of the governor was further confirmed by the Legislature of the State on repeated occasions.

First. By a declaration in 1858, by act of the Legislature, that the Florida Railroad Company was not entitled to the benefits of the internal-improvement act of January, 1855, under which this land is claimed from Waldo to Tampa, and by the charter of another company to build the road from Tampa to Waldo, and in terms giving them the benefits of the internal-improvement act of January, 1855.

Second. By the act of the Legislature of 1868, notifying the United States that the State had not complied with the requirements of the act of 1856, and did not claim the land, and so far from disposing of the land to the Florida Railroad Company, expressly asked Congress to make a new grant, on the condition that the Florida Railroad Company should not have the benefit of it.

Thus in express terms, in the most absolute form of legislation, the State of Florida, so far from disposing of the land to the Florida Railroad Company, confirmed in 1858–'59, 1868, the official declaration of Governor M. S. Perry to the United States, made in 1858, in respect to the location of the line of road, viz, that there had been no "disposal" by the Legislature, and that there could be no location nor valid selection of land under the grant, and that the nominal and provisional reservation from sale under the grant was void and without authority.

But this shameless record does not stop here. Continuously the Legislature of the State of Florida by other repeated solemn acts of legislation ratified and confirmed the official declaration of 1858–'68, that the State Legislature had never disposed of this grant of May, 1850, and made no claim to it. In 1866 the provisional government, and internal-improvement trustees of the State of Florida, sold the Florida Railroad from Fernandina to Cedar Keys as a "completed road" under the act of the State Legislature of January 5, 1855, called the "internal-improvement act," under which the right to this grant is claimed.

At the time of that sale and purchase of a completed road there was no road from Waldo to Tampa being built by the Florida Railroad Company, or claimed by them. The State had given a charter to other companies. So far from disposing of this grant to them or any other company, had not even ever mentioned it, and the Florida Railroad Company had declared itself to be a completed road and to have abandoned all intention of building a road to Tampa. By repeated and by continuous acts of the Legislature of Florida this sale of the Florida Railroad from Fernandina to Cedar Keys as a completed road was confirmed and ratified.

By other acts the Legislature granted, continued, and confirmed to the purchasers of Florida Railroad Company all the rights acquired under the internal-improvement act of 1855, so far as the road was completed or built at the time of the sale in 1866. The Legislature could not have done otherwise, because the act of 1855, when it gave lands of the State to any railroad company, only gave them as each 10 miles should be built.

The road with all its chartered rights having been sold and bought as a completed road it needs no argument to show that the purchasers could claim no rights as an uncompleted road, even if such had existed before the sale, which was not the fact. The statement, therefore, as a fact that the Florida Navigation and Railway Company was the successor of the Florida Railroad Company and derived any rights from that company to the line from Waldo to Tampa is a pure invention and false, having no warrant whatever in fact.

The Florida Navigation and Railway Company derives all its rights of every nature from a purchase made in 1866, at a sale made by the trustees of the "completed road," required by the law to be completed before a sale could be made, and from an act of the Legislature in 1866, 1869, and 1870, ratifying their purchase of this "completed road" from Fernandina to Cedar Keys.

The Legislature further confirmed the official declaration of Governor M. S. Perry of 1856 and of the Legislature of 1866 and 1870–1872 by granting a new charter to the Florida Railroad Company to build a road from Waldo to Tampa, and giving them no land under the act of 1855—the internal-improvement act—but by giving them money bonds indorsed by the State, and by disposing of all of the land belonging to the State to other and different lines of railroad in other and different parts of the State, thus, while maintaining the policy of constructing a line of railroad from Fernandina to Tampa Bay, with an extension to Cedar Keys, abandoned the line from Jacksonville to Pensacola, or Escambia Bay, provided for in the act of July, 1855, and also provided for in the act of Congress of 17th May, 1856, which made the grant dependent on the condition that a line of road should be built from Jacksonville, on the St. Johns, to some point on Escambia Bay (Pensacola) for a line from "Jacksonville to Mobile."

The Legislature by these new charters gave money bonds instead of lands to these new chartered companies. Since that time the Legislature has continuously granted new charters to different companies without ever mentioning this grant of 1856. It is therefore manifest that there was no disposal of the land in this grant of May 17, 1856, by the Legislature of Florida, and no location of any line of road ever made by authority under the act of May 17, 1856, and that the Florida Raidroad Company and the Florida Navigation and Railway Company (a company chartered in, I think, about 1880 or 1881, under the general incorporation laws of Florida) never was nor had any claim to be the successor of the defunct Florida Railroad Company, whose completed line of road from Fernandina to Cedar Keys was sold as a

completed road and bought as a finished and completed road and held as a completed and finished road, and is now held and owned under this sale and by this title.

Every allegation of fact on which the Secretary's opinion is based is absolutely false, and official notice is required to be taken of these facts, because it is a matter of public law, and therefore knowledge of it is binding on all public officials. It is a plain, shameful robbery of the poor people of Florida, perpetrated in the interest of a few rich men, resident in other States.

If this be true there could be no location and no inception of a grant. In support of this statement reference was made—

First. To the letters of the United States Commissioner of Public Lands in 1856-'57 to the governor of Florida, that no lawful reservation could be made under the act until the Legislature should dispose of the land but that a provisional and temporary reservation would be made in anticipation of an act of the Legislature making a disposal of it.

Second. To the letter of Governor M. S. Perry, then governor of Florida, in 1858, officially giving notice to the Commissioner of Public Lands of the United States that no disposal had up to that time been made by the Legislature of the land in the grant of May, 1856, from Pensacola to St. Johns River or from Fernandina to Tampa and the extension to Cedar Keys. Neither the governor nor the Commissioners of Public Lands of the United States nor the chartered railroad companies nor the Legislatures then considered that a disposal had been made in conformity with the act of Congress of 1856 by the act of the State Legislature passed in January, 1855.

The act of the Legislature disposing of the land embraced in the grant of May, 1856, from Pensacola to the Alabama and Florida boundary line, and making no disposal of the land from Pensacola to Jacksonville, and none from Fernandina to Tampa, and the absence of any legislation since that time proves conclusively that the Legislature did not consider that any disposal had been made of the land embraced in the grant of May 17, 1856, by the act of January 5, 1855.

Third. The act of the Legislature of 1868 declaring to Congress that the State had not complied with the conditions of the act of 1856 and asking for a new grant, with a condition in the new grant that the Legislature should be required to dispose of it to new companies, thus declaring, first, that the Legislature had not disposed of it; second, that no right to the land had vested in the State or anyone under the State.

Fourth. That so far from disposing of it to the Florida Railroad Company, or any other company chartered before the war, the Legislature would not dispose of it to such companies.

Fifth. That the State had not complied with the conditions of the act of 1850—not any one condition, but none of them—for the term "conditions" of the act is used referring to all of the conditions.

The Secretary's reply to these statements of fact, none of which are denied, is—

First. That an attorney at law had complained of delay in the adjustment of this grant, that is, that he wanted this land for himself and his clients. That is really the reason for all these opinions and the only possible ground for them.

A wealthy and influential lawyer wanted the land for himself and his clients to sell and make money out of it, and the people of Florida, on the other hand, wanted the land to live and labor upon as free homes for themselves and their families, and reasons must be found for giving it to this attorney and his clients.

It has not the merit of plausibility even to sustain it.

Now let us examine the pretenses of this opinion, signed by Secretary Noble in answer to the foregoing statement, viz, that the Legislature had not disposed of the grant, and, so far from disposing of it to any company, had given notice to the United States that they had not complied with its conditions and that no location of any line of road had ever been made under its authority.

The following provision is contained in the sundry civil appropriation law for the year ending June 30, 1893:

> For the survey of the public lands lying within the limits of land grants made by Congress to aid in the construction of railroads, and the selection therein of such lands as are granted therefor, to enable the Secretary of the Interior to carry out the provisions of section 1 of the act of March 3, 1887, entitled "An act to provide for the adjustment of land grants made by Congress to aid in the construction of railroads, and for the forfeiture of unearned lands, and for other purposes," being chapter 376 of volume 24 of the Statutes at Large, page 556, $125,000; *Provided*, That no part of this sum of money shall be used for any land embraced in any grant to the State of Florida.

The object and effect of this provision of law was to forbid the adjustment of any land grants in the State. It will be observed that this law contains these words:

> To enable the Secretary of the Interior to carry out the provisions of section 1 of the act of March 3, 1887, entitled "An act to provide for the adjustment of land grants made by Congress to aid in the construction of railroads and for the forfeiture of unearned lands," * * * $125,000: * * * *Provided*, That no part of this sum of money shall be used for any land embraced in any grant to the State of Florida.

Notwithstanding this law, an attorney of a railroad corporation demands and the Secretary orders the approval of lists of this land, and it has been made upon the paltry plea that preceding the words I have quoted the following words are found in the law:

> For the survey of the public lands lying within the limits of land grants made by Congress to aid in the construction of such railroads and the selection therein of such lands as are granted therefor.

And therefore the prohibition in terms does not extend to the selection for adjustment of lands lying within the limits of grants made by Congress to aid in construction of railroads, but only to land within the limits of land surveyed with the money appropriated in the act, and as the Florida land grant was not so surveyed the selection may be made and the land approved.

The words and the intent and spirit of this law are perfectly plain, and can not be mistaken by any intelligent person.

The words prohibit the selection of or the adjustment of any land grant in the State of Florida with the money appropriated—the intent and spirit of the law prohibits any selection or adjustment of such land. The object of the appropriation is to carry out the provisions of an act of Congress for the selection of lands for adjustment of railroad land grants. The law says none of this money shall be used for the selection or adjustment of Florida land grants, and the Secretary says:

> I will select and adjust these Florida grants because they were not surveyed with the money appropriated.

The answer is, they were selected with the money appropriated; and if they were not, the law required them to be, and a law of Congress can not be defeated by unlawfully using other money, or the approval of any lists of lands relating thereto, but the Secretary found the act of Congress forbidding his approval of the list no obstacle in the way of his attempting to give this land to the owners of the railroad corporation and its foreign and domestic bondholders.

This donation to the foreign owners of the corporation of a right to levy tribute on the poor people of Florida amounts to not less than two or three millions of dollars, and would be a princely gift, were it not that the act of Congress forbids the Secretary from making it, and makes his act void.

The second ground taken by the Secretary is, that the fact that no location of the road was made under proper authority within the time required was fully settled by Secretary Lamar's decision of August 30, 1889, confirming Secretary Teller's decision, reaffirming Secretary Schurz's decision that a map of definite location was filed in the General Land Office within the time required.

The objection is the fact that there was no "proper authority to make a location because no disposal of the grant by the Legislature had then or has ever been made." To this Mr. Secretary Noble says, "Mr. Schurz, Mr. Lamar, and Mr. Teller decided that a location of a line was, in fact, made, and a map filed in the time required."

The fact of an unauthorized location of a line of road and the fact of a location under proper authority are two different propositions. Whatever these three Secretaries may have given as their opinions as to this fact, the records of the General Land Office show Governor M. S. Perry's letter written after this alleged location within the proper time and after the pretended filing of this map in the Land Office, officially stating that there was not any disposal of the land to the Florida Railroad Company, and no authority to make a location of a line of road, as the grantee of the land embraced in the act of Congress of May 17, 1856.

It is not difficult to see that there might be authority in a charter granted by a State to a railroad company to locate and build a line of railroad between two points without granting to them particular land or without granting them land or anything else.

This is precisely the fact. The old Florida Railroad Company had a charter to build a road from Waldo to Tampa, but it was never the grantee of the land embraced in grant of May 17, 1856, and it never built a road from Waldo to Tampa, and it was sold out as a completed road and bought as a completed road from Fernandina to Cedar Keys in 1866, and its franchise confirmed to it by act of Legislature in 1868, 1870, 1872, as a completed road from Fernandina to Cedar Keys, and a new charter granted to it to go from Waldo to Tampa with money bonds and not with lands; and these being facts, and declared in the laws of Florida and by the governor of the State at the time authorized by law to make such declaration, the case was concluded, and no subsequent authority by a statement that the fact was otherwise could set aside these laws and the official declaration of the governor of the State.

Secretaries Schurz, Teller, and Lamar all assumed that the Florida Railroad Company had a disposal of this grant made to them of the land by the Legislature of Florida. They also as-

sumed it to be a fact that the Florida Navigation and Railway Company was the successor of the Florida Railroad Company, not in time, but in law.

The laws of Florida and the official declarations of the governor at the time and the records of the Land Office all gave them notice that this was not a fact but a falsehood. Now the question arises, of what force and effect is the act of an executive officer based on an assumption of the existence of a law or a fact which he has official notice does not exist?

To illustrate, what force and effect would an official opinion of these four Secretaries have that an act of Congress had granted to the Florida Railroad Company Fort Marion, at St. Augustine, to build a railroad and that the company had made a location of a line of road within the time required by law, and therefore they approved Fort Marion to be the property of the Florida Railroad Company?

This proposition of Mr. Noble is that this opinion would create such an act of Congress where none existed before, and all that is necessary to make an act of Congress which shall be binding on the subsequent Secretaries is for some Secretary to say in some opinion that there is such an act of Congress.

It will be borne in mind that all the statements of fact and the propositions of law in the Secretary's statement rest, first, on the assumption that the Florida Railroad Company was the grantee of the land embraced in the act of May 17, 1856; this cardinal fact must in some way be established. Second, on the fact that the Florida Railroad Company transmitted its right in some way to the Florida Navigation and Railway Company.

His first proposition is that whatever may be the law of Florida in respect to this grant, and although he had official notice and was bound to know that there is no such law, yet these Secretaries were of the opinion there was such a law, although they had notice there was no such law, he was bound by their statement and not by the record of the laws of the State of which he had official notice.

But leaving this proposition, he consents to examine the several statements of fact made by me, to wit:

No disposal of land made by Legislature under act of 1856, subsequent to said act.

No previous disposition by Legislature could be made because the land was not subject to the authority of the State.

No location because no disposal by State.

No succession because Florida Railroad was sold as a completed road from Fernandina to Cedar Keys in 1866 and purchasers hold under a new act of Legislature. To these several propositions, no disposal by Legislature, no succession, let us examine in detail Secretary Noble's answer and argument.

To no disposal by Legislature he says, in substance:

Before the act of 17th May, 1856, was passed, by act of State Legislature the State of Florida granted the land embraced in the act of May 17, 1856, of the United States to any chartered railroad company that would promise to build the whole or any part of the line of the road from Fernandina to Tampa, with extension to Cedar Keys, on two conditions: First, that Congress should give the land to the State; second, that such railroad company should actually build the road under the provisions of the internal-improvement act of January, 1855, viz, accept benefits of the act, build 20 miles, in designated time.

Issue bonds guarantied as to interest by trustees of internal-improvement fund, pay one-half of net earnings to State until net earnings would pay interest on bonds, and one-half of 1 per cent semi-annually as a sinking fund. This is no denial of the statament that the Legislature had not disposed of the grant subsequent to the 17th of May, 1856.

Nor is it an assertion that the Florida Railroad Company ever built any railroad from Waldo to Tampa, or ever issued bonds for that part of the line, or ever paid any net earnings, or ever complied with any of the conditions of the act of the State Legislature of 5th January, 1855, or ever acquired any right to the benefits of the internal-improvement act of 5th January, 1855, to the line from Waldo to Tampa.

In fact, the ground on which the Florida Peninsular road from Waldo to Tampa was chartered by the Legislature was that the Florida Railroad Company was not building a line of road to Tampa under the internal-improvement act, and had not acquired any right under such act, and this is expressly stated in these words in the message of Governor Perry to the Legislature in 1858.

The opinion of the attorney-general of the State is referred to by Secretary Noble as to whether the act of 1858, chartering the Florida Peninsular road and giving to that road all the benefits of the act of 1856 was in conflict with the right of the Florida Railroad Company under its charter to build any part of the line to Tampa. The attorney-general said that in his opinion the Florida Railroad Company might build any part of the line from Waldo to Tampa under its general charter, and the Florida Peninsular road might build any part of the line and the latter have the benefits of the internal-improvement act of 1856, and so might any other company that should be authorized by law to build a railroad, viz, accept the benefits of the act and obtain them for such part of the line as it should actually build, and this certainly was the plain intent and meaning of the act; but in deciding that the act of the Legislature chartering the Peninsular Railroad Company and expressly and in terms giving to it the benefits of the internal-improvement act from Waldo to Tampa was valid and not in conflict with any right of the Florida Railroad Company, he gave it as his opinion that no right was thus vested in the Florida Railroad Company to the benefits of the internal-improvement act from Waldo to Tampa, but that the Florida Peninsular or any other railroad company might be authorized by the Legislature and have the benefits of the internal-improvement act from Waldo to Tampa. This was deciding that no right had vested in the Florida Railroad Company.

The case is very plain on this point, and the surprising fact is that a Secretary of the Interior should be so careless as to allow his name to be signed to such a paper, evidently prepared by an incapable law clerk. The opinion of the attorney-general of the State is of no importance unless it is true, but in this case we can easily understand his statement, and it is not, as claimed in the Secretary's paper, that the Florida Railroad Company had acquired a right to the benefits of the internal-improvement act from Waldo to Tampa by accepting and building 20 miles of the line, and therefore the Peninsular Railroad Company could not have the same right and the same benefits for the same line, but that the Florida Railroad Company had not acquired the right to those benefits which were given to the Peninsular road; but that if the Florida Railroad Company should build any part of the line under its general charter the Peninsular road might commence from the end of that part of the line, and the benefits of the act would commence from the point to which under its charter, and not under the internal-improvement act, the Florida Railroad Company might construct its road, and the Legislature might or might not give the Florida Railroad Company the benefit of the act for such part so constructed.

In fact, the Florida Railroad Company never constructed any part of the line from Waldo to Tampa, and was seized by the trustees as a completed road, declared by the company to be a completed road, and to have abandoned the right to be extended to Tampa, and it was sold as a completed road from Fernandina to Cedar Keys and purchased as a completed road from Fernandina to Cedar Keys and the sale confirmed as a completed road from Fernandina to Cedar Keys.

Does it need any argument to show that even if the provisions of the act of January 5, 1885, of the State Legislature had been a disposal of the conditional grant made by Congress in May, 1866, which it was not, that the purchasers of a completed road could not have a right to an uncompleted road and to privileges and lands which the Legislature had declared in 1858 they had no right to, but which they had given in express terms to another company?

It will be observed that immediately preceding the advent of the new administration this fraudulent grant is hastily approved.

The Secretary in his statement of the reasons for this approval quotes from Secretary Lamar's opinion, as follows:

> The benefit of this grant was conferred by the State of Florida upon the Florida Railroad Company, whose rights and interests thereunder have been assigned and transferred through its successors to the Florida Railway and Navigation Company.

The laws of Florida give official notice that this statement is untrue in all respects and without any warrant of fact. It was doubtless written by some law clerk and never examined, and perhaps not even read, by either Secretary Teller, Lamar, or Noble. Neither of these distinguished men would have signed a paper, knowing its contents, which was indisputably untrue in its statements of fact. The internal-improvemen act of the State of Florida was approved in January, 1855. In May, 1856, one year and four months afterwards, Congress passed the act of 1856—of May 17—granting the land on the condition of a disposal by the Legislature, and the subsequent location and construction of a railroad from Fernandina to Tampa, with an extension to Cedar Keys, and of a line of road from Jacksonville to Pensacola, and in terms declaring that both lines should be entirely built in ten years, and if not then completed the lands should revert to the United States.

The laws of the State show that the Legislature did not dispose of the land to the Florida Railroad Company or any other company.

They also show that neither the Florida Railroad Company nor the Peninsular Railroad Company built any line of road to Tampa.

They also show that the Florida Railroad Company did not

transfer its rights to the Florida Railway and Navigation Company.

They also show that the Florida Railway and Navigation Company was not the successor either in law or in fact of the original Florida Railroad Company chartered before the internal-improvement act of 1855, and by amended charter after said act, and referred to by Secretaries Schurz, Teller, Lamar, and Noble, but that there was no kind of connection between these two corporations.

They also show that the internal-improvement act did not grant any benefits or land to the old Florida Railroad Company from Waldo to Tampa.

They also show that the old Florida Railroad Company did not build any line of road from Waldo to Tampa, and did not have, under the internal-improvement act of the State of Florida of May, 1855, a right to a single foot of land and never claimed to have a right to a foot of land or to have built an inch of railroad.

These are indisputable facts set forth in the public laws of the State, and the alleged facts on which the claim of the Florida Railway and Navigation Company is based is only a fabric of falsehood.

In the first place we must bear in mind that the claim to this land made by the Florida Railway Company and its successors is founded—

First, on the statement that a disposal of it was made in the internal-improvement act to the Florida Railroad Company.

Second, on the statement that the Florida Railroad Company transferred its rights to the Florida Railway and Navigation Company.

The internal-improvement act of Florida did not attempt to dispose of the land embraced in the grant made by Congress of May 17, 1856.

That act in terms declared that if Congress should grant land to the State to build a line of road from Fernandina to Tampa with extension to Cedar Keys, and Jacksonville to Escambia Bay via Pensacola, and the railroad companies authorized under that act should build the road to Tampa with extension to Cedar Keys, such companies as should build any part of the line in compliance with and under the provisions of the act of January 5, 1855, should have the land so far as they should build the road.

No one pretends that the Florida Railroad Company ever built any line or road or any part of a line from Waldo to Tampa. All that these Secretaries claim is that the Florida Railroad Company claimed the right to build the road from Waldo to Tampa in 1860, and commenced to build it.

The act does not grant the land to a railroad company that claimed the right to build the railroad and commenced to build it.

This opinion contends that these two facts, viz, claiming the right to build the road, and commencing to build it, created a vested right which continued for centuries, and was transferable to others.

This proposition, even if there were any facts on which to base it, would be a monstrous fraud on the people—leaving out of view for the moment all other facts. The Florida Railroad Company of 1855–1860 abandoned in 1866 the construction of the road from Waldo to Tampa before building a single foot of the line and notified the State of Florida that their road from Fernandina to Cedar Keys was a completed road and subject to sale as a completed road, and that they were not able and did not intend to build the road to Tampa; and the road was sold as a completed road, and bought as a completed road, and held as a completed road, and the sale confirmed to the purchasers by the Legislature as a completed road, and a new franchise granted to the purchasers to build a road to Tampa, not with a land grant, but with money bonds indorsed by the State, and in this new franchise the new company was limited to a period of time in which the franchise to build the road to Tampa, and the time expired without the new company building any road to Tampa.

See, then, what an enormous fraud is this statement of a vested right claimed by the new company in the old Florida Railroad Company which abandoned all claim of right to build the road to Tampa, became extinct by the sale of its road as a completed road, the validity of its sale and purchase by a new company, being by the law dependent on the fact of its being a completed road and having no right to build a road to Tampa, this new company having obtained from the Legislature an act confirming to them all the rights and franchises of the old company under the internal-improvement act of 1855, only so far as the road was built at the time of the sale.

This new Florida Railroad Company having also obtained an act of the Legislature authorizing them to build the road from Waldo to Tampa with money bonds and not with lands limited to a certain time and having failed to build it.

New charters having been repeatedly given to other companies to build the road with money bonds and with a grant of swamp and overflowed lands, without any mention of the grant of May 17, 1856, and without even a reservation of the grant under the act of May 17, 1856.

The Florida Railway and Navigation Company was incorporated as a new corporation in 1881, under the general laws of the State authorizing corporations to be made. This corporation had no kind of connection with the old Florida Railroad Company, which had become extinct by the sale of the road in 1866 as a completed road, fourteen years before this corporation was created, and which had abandoned the construction of a road to Tampa and all right to its construction, which was defunct by act of law and in fact, and which, so far from transferring any right to the Florida Railway and Navigation Company, had abandoned and declared to the State its abandonment of any right to build the road to Tampa.

In Searles *et al. vs.* Jacksonville, Pensacola and Mobile Railroad Company, Justice Bradley says:

> But although the road had not been constructed on the entire length of line or route projected and authorized by its charter, yet the company had stopped construction at Quincy, and the road seems to have been mutually regarded by the company and trustees as a completed road to this point. (2 Wood's Ct. Cl. Repts., 628.)

Upon this subject of abandonment by the Florida Railroad Company of a right to build the road to Tampa, Mr. Justice Bradley, in an interlocutory motion in a case pending before him between the creditors of the Pensacola and Georgia Railroad Company and the new company and its stockholders which had been sold in like manner under the same act, held that the company had abandoned the further completion of the road.

It is really amazing that the Secretary of the Interior should have even a law clerk who would write such an opinion, discussing the opinion of Attorney-General Papy in 1858 on the point whether the charter of the Peninsular Railroad Company enacted by that Legislature, which charter granted the benefits of the internal-improvement act from Waldo to Tampa to that company, and not to the Florida Railroad Company, conflicted with the chartered right of the Florida Railroad Company.

The Secretary's law clerk, for I am sure he never read the paper he signed, commits the egregious mistake of not understanding the meaning of the language of the State attorney-general. The proposition was that the old Florida Railroad Company never acquired any vested right under the internal-improvement act of 1855 to build a road from Waldo to Tampa. The Florida Railroad and Navigation Company claimed that they had; and that this was a vested right and had been transferred to them, and that with this vested right there was also transferred the right to the lands in the grant of May 17, 1856, which the Florida Railroad Company had acquired by accepting the benefits of the internal-improvement act of 1855 and locating a line and filing a map.

The governor of the State, M. S. Perry, in his message, declared that the Florida Railroad Company accepted the terms of the act of 1855 for a road from Fernandina to Tampa, with an extension to Cedar Keys, but that the Florida Railroad Company was not building a railroad from Fernandina to Tampa, with an extension to Cedar Keys, but was building a railroad from Fernandina to Cedar Keys, and that it was not therefore entitled to any of the benefits of the internal-improvement act either in respect to lands or bonds beyond the point of divergence from the line to Tampa, and recommended the charter of another railroad company, and giving to this new company the right to build the road and all the benefits of the internal-improvement act of 1855.

A bill to this effect having been presented, the Legislature referred the question whether the chartering of a new company to build the road to Tampa and giving such new company the benefits of the internal-improvement act conflicted with any right of the old Florida Railroad to build the road from Waldo to Tampa, to the Attorney-General, and heheld that it did not; that under the internal-improvement act of 1855 the Florida Railroad Company might build a road and the Legislature might authorize the new company to build a lateral road to it and give such new company all the benefits of the internal-improvement act of 1855, or might authorize such new company to commence at any point to which the Florida Railroad Company had completed the road, and therefore there was no conflict with any right of the Florida Railroad Company, because it had no exclusive right under its charter to build the road and no right at all to any of the benefits of the internal-improvement act, and further, because the internal-improvement act required not only an acceptance of the benefits of the act, but also a compliance with its terms by actually building the road.

But the important fact is, that the Legislature did give the exclusive benefits of the internal-improvement act for the line from Waldo to Tampa to another company, and neither the Florida Railroad Company nor the Peninsular Railroad Company or the

new company ever built the road, and both of the corporations died and became extinct without building any road.

The facts, then, on which this mountain of fraud and falsehood has been erected, by which many millions of dollars have been and will be taken from the people of Florida, unless prevented by President Cleveland and Secretary Smith, to enrich a few men, are as shown by the laws of the State of Florida, to be as follows:

An act of the Legislature of Florida conveyed all the swamp and overflowed lands granted to the State and all the internal-improvement lands, viz, 500,000 acres, granted to the State on her admission to the Union, to the governor and other State officers and their successors, as *ex officio* trustees, in trust, to sell them and apply the proceeds to the payment of the interest on $10,000 to the mile of first-lien bonds of any companies which should be chartered to build and should actually build any part of the lines of road from Fernandina to Tampa and Cedar Keys and Jacksonville and Pensacola, in conformity with the provisions of said act, and also gave them the alternate sections of the swamp and overflowed lands and the internal-improvement land for 6 miles on either side of the road actually built.

The trustees had nothing to do with the land embraced in the act of Congress of May 17, 1856, and it was not a part of their trust, but one section of the act promised that if Congress should grant land for this purpose the Legislature would grant it to the companies which should build any part of the line under that act; and no companies ever built any part of the line from that day to this from Waldo to Tampa or from Quincy to Pensacola under that act; and the companies thus chartered and which accepted the benefits of that act for any part of the said lines of road became extinct, and these roads have been sold by the State as completed roads, and their charters by act and operation of law and by statutory enactment became extinct *functus officio*.

The land embraced in the trust has all been granted by the Legislature to other and different roads in other and different parts of the State. The act itself, as to all the benefits and rights embraced in it, has been repealed by the passage of other and inconsistent acts, viz:

An act prohibiting the Pensacola and Georgia Railroad Company from building the line to Escambia Bay, Pensacola, and providing for a line of road from Jacksonville to Mobile, and granting State bonds instead of lands to such road, and by an act authorizing the new Florida Railroad Company, holding the completed road to Cedar Keys, to build from Waldo to Tampa, and authorizing them to issue money bonds for $15,000 a mile without any grant of land, not even mentioning the grant in the act of Congress of May 17, 1856. We have, then—

First. A grant of lands and a guarantee of interest on bonds on condition that a railroad should be built.

Second. No road built.

Third. A sale by the State of so much of the road as was built as a completed road.

Fourth. The charter of new companies without any grant of land or any guarantee of interest.

Fifth. A grant of the lands promised the companies first chartered to other companies for other purposes on other lines and not to the Florida Railroad.

Sixth. A new company, chartered fourteen years after the old companies became extinct, to build a railroad over a part of the same lines claiming to derive a right to the land not embraced in the trust, but subject to the conditions of the act of 17th May, 1856, from these old extinct companies which abandoned the construction of the road, and were sold out as completed roads, and which did not build any part of the lines of road between the points in question.

This claim to this land is sought to be derived from these old companies under an act which in terms grants land only as each 10 miles shall be built, and which requires the companies receiving the land to issue bonds, have the interest guaranteed by the internal-improvement fund and paid by the internal-improvement fund, and when paid the internal improvement fund to have paid-up stock in the roads, and which requires the railroad companies under it to pay one-half of the net earnings to the internal-improvement fund, none of which conditions were contained in the new charters.

From all this it is evident that neither the old Florida Railroad Company nor any other of the companies chartered and authorized to build any part of the lines of road mentioned in that act ever acquired, or could by any possibility acquire, any right to any land on the uncompleted part of the line, or transmit any right to build the road over the uncompleted part of the line, or transfer to any other company rights which they did not have themselves to land on either side of the uncompleted lines.

Second. That none of the roads built under charters granted since the sale of these roads as completed roads are built under the internal-improvement act of 1855, because none of them are built with guaranteed interest bonds, none of them are built with donations of the swamp and overflowed land for 6 miles on either side of a line from Fernandina to Tampa, with extension to Cedar Keys; none of them are required to pay one-half of their net earnings to the State, none to pay one-half of 1 per cent to the internal-improvement fund as a sinking fund, none of them are required to be subject to all the provisions of the act of January 5, 1855—and the provisions of the internal-improvement act of 1855 have been repealed by numerous acts entirely inconsistent with its requirements.

The internal-improvement act conveyed all the swamp and overflowed lands and the 500,000 acres of internal-improvement land, granted the State by Congress, to trustees, to sell and apply the proceeds to the payment of the interest on bonds of two lines of railroad, on certain conditions. The roads were not built. The lands, by acts of the Legislature, have been withdrawn from the trust and appropriated to other purposes. The parts of the lines of road which were built have been sold as completed roads.

New charters have been granted to other companies to build the uncompleted parts of the line without any of the conditions required in the original trust.

The old companies became insolvent and extinct, and it is now claimed that the new corporations derived a right from those old, insolvent, defunct corporations to land not embraced in the trust, but under a section of the act of January 5, 1855, which promised to give the land to these old defunct corporations if they should build the parts of the line which they did not build, and also under an act of Congress of May 17, 1856, which expressly declared that the Legislature should dispose of the land subsequent to the passage of the act and made the grant dependent on the disposal by the Legislature as *each* 10 miles should be built.

The proposition is that a defunct corporation which could only have had a right to land by building a railroad which it did not build, but abandoned, could transfer a valid right to the land to some other company organized and chartered many years after its failure and after the original corporation became extinct and without life.

The proposition is so false and so utterly without reason that it is evident that the Secretaries whose names are signed to these opinions never read them. In 1866 the Florida Railroad Company's road was sold by the State officers as ex-officio trustees as a completed road, on the ground that it had abandoned all intention and right to build any further. In 1868, two years after this sale, the State Legislature declared to Congress that the State had not complied with the conditions of the act of May 17, 1856, and asked for a new grant in which none of the companies chartered before the war should have any interest or right.

There was never a claim of succession of any of the newly chartered companies to any of the rights of the old extinct companies to the uncompleted parts of the line of road.

There was never any transfer, real or pretended, by either act of parties or by act of the Legislature, of any right of the old companies to land on the uncompleted parts of the lines of road mentioned in the act of 1855. But this is not all of this enormous fraud. Great quantities of land lying along surveyed routes of these old extinct companies, which have not been followed by the newly chartered companies, the Florida Railway and Navigation Company, nor the Florida Central and Peninsular Railroad Company, and the Pensacola and Atlantic Railroad Company have been fraudulently claimed and certified to these companies, land not embraced in the act, beyond the limits fixed in the law, and beyond the alternate sections within 6 miles of the road actually built by the new companies, many years after the old companies had become extinct. Great areas of the land, I am informed, are outside of even the false and fraudulent indemnity limits prescribed in the act of May 17, 1856, and greatly in excess of the amount of land embraced in the act of Congress, if the Legislature had disposed of it, and the roads had been built under such disposal.

Sixty thousand acres of valuable land in the counties of Jackson and Calhoun, in Florida, on which there are many poor people living, have been approved, as I am informed, to Pensacola and Atlantic Railroad Company and attempted to be passed by deed from that corporation to the Florida Central and Peninsular Railroad Company, as the successor of the Pensacola and Georgia Railroad Company, alleged to be under the act of May 17, 1856, which gives land to the State as each 10 miles of road should be built.

The Florida Central and Peninsular Railroad Company has never built a foot of road on the west side of the Apalachicola River, and has no connection with, and is not the successor, either in fact or law, to any rights on the west side of the river, from the Pensacola and Georgia Railroad Company, which did build the completed line of road from Lake City to Quincy, which was sold by the State officers as a completed road in 1869, and was

prohibited from building any further by an act of the Legislature of Florida.

I have been on this land and know the people who are living on it, and I know from them and from the attorney of the Florida Central Peninsular Railroad Company, Mr. Benjamin Liddon, an able and zealous lawyer, that he has been taking the acknowledgment of these poor people of a tenancy of their homes under this corporation for the purpose of compelling them either to buy their homes or be ejected from them by judgments obtained by proof of acknowledgments of title by tenant to his landlord.

Such are the artifices by which in the courts the poor man, without money to defend his rights, is robbed of his home, his labor, and his property by corporations by the unlawful and fraudulent certification based on alleged facts by the Interior Department which the public laws declare to be false.

What a condition of government is exhibited by these plain and indisputable facts, as to which there can be no denial or doubt! It is one to awaken the most serious apprehensions for the preservation of the rights of the people, the security of their homes, and the enjoyment of the fruits of their labor.

The same causes which have been powerful enough without the authority of law to deprive the people of Florida of their homes on this land and subject them and their children to the payment of many millions of dollars will be sufficient in the future to levy unlawful tribute upon the homes and labor of all the people of the United States unless they shall be removed.

In a government where the rights of the people are dependent on the integrity of courts, where the executive officers are charged with taking care that the laws for their protection shall be faithfully executed, shall we find neither courts nor executive officers to prevent millions of acres of land from being unlawfully taken possession of by great corporations, and the people living upon it either dispossessed and driven away from them or subjected to the payment of tribute to the corporations?

The public servants who seek to protect the people are pursued with the slander and detraction of the hireling correspondents of venal newspapers. The power of these great corporations is felt in the Legislatures, the Congress, the Executive Departments, the judicial tribunals.

If the Senate in this executive session shall not find time and opportunity to take some steps towards redressing this great wrong I am persuaded the approaching Congress will not fail to find a remedy; and if Congress shall fail to protect the people and bring to justice the criminals who have perpetrated this great wrong on them, on the majesty of the law, and on the purity of the Government, I have confidence that the President, who is the fearless friend and defender of public right and the rights and liberties of the people, and his able and learned Secretary of the Interior, will find it to be within the range and competency of their executive power to uncover these frauds, set them aside, and furnish protection to those who have been wronged.

These, then, are a true recital of the facts as stated in the public laws of the United States and the State of Florida. As to their absolute truth there can be neither denial nor doubt. These facts show, in connection with similar facts relating to the swamp and overflowed land grant made in the act of Congress of 1850 and supplementary acts, a case where the soil of an entire State has been taken in violation of law and appropriated to the personal use and emolument of a few individuals, a case in which tribute for their benefit has been imposed and is sought to be imposed on every man who cultivates the soil now and for all time to come, a case where a large share of the labor and the comforts of every family, the education of every child, the means of support of every church and of all charities is taken away from them to be applied to the uses and enjoyments of strangers and nonresidents and very largely of aliens.

It rests with Mr. Cleveland, the President of the United States, the firm and fearless friend of the people and of justice and right, and his able Secretary of the Interior, Mr. Hoke Smith, or with the Congress, or with the Legislature of the State to prevent the consummation of this great wrong, this monstrous and inexcusable robbery of the people, this betrayal of all the principles and pledges of the Democratic party, and to bring to punishment all persons who have been criminally connected with the perpetration of this conspiracy against the United States.

The question remains for us to consider, to what extent the official declaration of three Secretaries of the Interior of the existence of a law and facts which the journals of Congress and of State legislatures show does not exist can create such a law and such a fact and deprive citizens of their rights and of their homes.

The act of Congress (R. S., 2449) is as follows:

When lands have been, or may hereafter be, granted by any law of Congress to any of the several States and Territories, and where such law does not convey the fee-simple title of the lands or require patents to be issued therefor, the list of lands which have been, or may hereafter be, certified by the Commissioner of the General Land Office under the seal of his office, either as originals or copies of the original deeds, shall be regarded as conveying the fee simple of all the lands embraced in such lists that are of the character contemplated by such act of Congress and intended to be granted thereby; but when lands embraced in such lists are not of the character embraced by such acts of Congress, and are not intended to be granted thereby, the lists, so far as these lands are concerned, shall be perfectly null and void, and no right, title, claim, or interest shall be conveyed thereby (10 Stats., 346; 18 *id.*, 475; R. S., 2449; House Miscellaneous Documents, Forty-seventh Congress, second session, volume 16; Digest of Decisions).

This statute is very plain, and makes any certification by a commissioner or approved by a Secretary of the Interior of land not embraced in an act of Congress and not intended to be granted thereby absolutely null and void.

It is attempted to explain away the force of this act of Congress in its application to this grant by the statement that the act of May 17, 1856, and the swamp-land grant convey a fee-simple title, and therefore the Secretary's approval of these fraudulent lists is not within the term and meaning of the act.

This contention is manifestly untrue. No fee-simple title can, *eo instanti*, on the approval of a law, be conveyed to anything which has not and can not have an existence until some subsequent act occurs or some subsequent condition be performed.

This proposition, if reason has anything to do with law or its interpretation, is self-evident.

The act of May 17, 1856, makes the grant dependent on several subsequent conditions before it could take effect, viz:

On a disposal by the State Legislature;

On a location by authority of the State of a line of railroad under such disposal;

On the actual building of such line of road under such disposal;

On the continuous performance of these conditions by the State; and this latter condition requires that the State should not abandon the performance of these several conditions and declare its failure to comply with them and the purpose never to comply with them, and her abandonment of their performance, as did the State of Florida in respect to this grant.

The same proposition is true of the swamp and overflowed land grant of 1850 and the supplementary acts. These acts of Congress provide not that a fee-simple title was conveyed *eo instanti* to the State on the approval of the act, but that when from the field notes of surveys by the United States it should be ascertained that on each 40 acres of land there was a greater part of it, viz, 21 acres, so swamp and overflowed as to be thereby rendered unfit for cultivation, a title should then vest, but subject to the condition that the State should sell the land and apply the proceeds to the construction of the levees and ditches necessary to make it dry and fit for cultivation.

The acts of Congress granting swamp and overflowed land to the States nowhere provide that a fee-simple title to areas of 40 acres of land on which there is 21 acres of dry land fit for cultivation shall vest immediately on the passage of the law.

Neither do they provide that the fact whether they are swamp or overflowed shall be determined by two false statements in regard to the facts. Not only the words of this act, before quoted, but also its object and spirit, are clear and unmistakable. Its purpose was that all lands which required to be selected, which required an approval by a Commissioner of Public Lands or a Secretary of Interior, should be subject to its provisions, and that if a Commissioner or a Secretary should in any list of lands approve any not embraced in an act of Congress and not intended to be embraced thereby, such approval should be void and convey no interest whatever. The answer is plain and self-evident. The approval is absolutely null and void, as much so as his approval of the Capitol or Executive Mansion of the United States to some corporation.

It requires no argument to show that the only object and purpose of the law was to prevent unlawful certifications of the public lands and to make all unlawful certifications absolutely void. The only question to ask is whether an approval of land by a Secretary thirty-seven years after the passage of this act of Congress, which required a disposal by the Legislature and the building of railroads under such disposal, and requires that it should be done within ten years, when no such disposal was made and no such railroad built under such disposal, is embraced in the terms of such an act of Congress and intended to be conveyed thereby?

Let us look at another side of this case. Are the officials who have been connected with the unlawful appropriation of the public lands of the United States in Florida liable under the criminal laws and is it the duty of the officers of the United States to take care that the laws shall be executed?

LAW OF THE UNITED STATES.

There is a statute of the United States which may properly be applied to such a case. It reads as follows:

If two or more persons conspire either to commit any offense against the United States, or to defraud the United States in any manner or for any purpose, and one or more of such persons do any act to effect the object of the conspiracy, all the parties to such conspiracy shall be liable to a penalty of

not less than $1,000 and not more than $10,000, and to imprisonment not more than two years.—*Section 5440, Revised Statutes.*

Is procuring unlawful certifications of vast bodies of the public lands of the United States on false statements of law and fact, which the public laws of the United States and of the State of Florida prove to be false, attempting to defraud the United States or defrauding the United States?

The question answers itself. There can be no doubt that this act is within the terms of the law.

The questions presented by this record profoundly concern the perpetuity of our Government. If the public lands of our country, dedicated by the established policy of our laws to be free homes for our people, can be changed into the vast properties of individuals, and thousands of millions of dollars be exacted from our people as purchase money by unlawful methods and without the sanction of Congress and no remedy be found, then indeed our democracy is a pretense and a fraud and our Republic a failure.

The PRESIDING OFFICER. The question recurs on the resolution reported by the Committee on Contingent Expenses.

Mr. GEORGE. Mr. President, I feel some reluctance in bringing this matter before the Senate now, but I feel under a very deep obligation to do so, and I will do it in a very few words. I shall offer an amendment, which I hope the Senate will adopt.

I stated a few days ago, when I introduced the resolution which I have converted into an amendment to the pending resolution, that at the last session of Congress the following resolution was passed, which I will read, so that the Senate may understand the scope of the investigation which was then imposed upon the committee:

APRIL 19, 1892.

Resolved, That the Committee on Agriculture and Forestry be, and they are hereby, authorized and directed to ascertain in every practicable way, and report from time to time to the Senate, the present condition of agriculture in the United States, and the present prices of agricultural products; and if there be any of which the prices are depressed, then the causes of such depression and the remedies therefor. And particularly whether the reports of the Department of Agriculture on the distribution and consumption of farm products, published from time to time by authority of the Secretary of Agriculture, contribute in any way to such depression of the market prices of such products, and whether any proper governmental purpose is subserved by such publication, and whether such publication should be continued.

And for this purpose that they be authorized, by subcommittee or otherwise, to sit during the recess and sessions of the Senate, at such times and places as they may deem advisable, to employ a stenographer and such clerical assistance and such experts as they may deem necessary, and that they be authorized to send for persons and papers, the expense of such investigation to be paid from the contingent fund of the Senate.

If the Senate will give me their attention for a moment or two I shall state what we did under that resolution. In the first place, we applied to the Secretary of the Senate for funds to carry on the investigation. We were informed that the contingent fund had been about absorbed by other committees, and only the sum of $1,000 was allowed us. We employed an expert, and we have spent nearly $1,000 in paying his salary. We have collected information from nearly all the countries in the world. We applied to the Secretary of State, and he issued a circular to our consuls in all countries which are producing cotton, making inquiries in relation to the subject. We have secured a good deal of information, though we are very far from having complied with the order of the Senate.

Before the last Congress adjourned, fearing that the committee would be swamped again in relation to funds, I introduced a resolution continuing the committee. I estimated that about the sum of $5,000 could be economically expended in these investigations. That would not be enough, but that sum could be economically expended. Two subcommittees were appointed, one on cotton, and the other embracing all the other agricultural products of the country.

I wish now to submit to the Senate whether they will at this time provide that committee with the means of prosecuting their investigation. If we have to go before the Committee on Contingent Expenses, it is very certain, from the number of similar resolutions which have been passed, that we shall get far less than a sufficient sum. So I merely want to put the question to the Senate now, whether on this great matter of the agricultural interests of the country, they will provide the funds necessary for an investigation. Of course, if the Senate vote down my amendment and we can not have the funds in order to make the investigation, that ends it; we can do nothing, and we must wait for a more favorable time.

If the Senate will adopt the resolution, then I hope that the investigation is in such a state of progress that we shall be enabled to reach a conclusion and to finish our labors by the meeting of the next session of Congress.

Mr. GORMAN. Mr. President, I trust the Senator from Mississippi will not press his amendment at this time.

Mr. GEORGE. I shall call for the yeas and nays on the amendment.

Mr. GORMAN. The appropriation which has been already made on this account is very limited, only $25,000, and there is but one of two things to do, either to confine the expenditure within that amount, or to have a deficiency at the beginning of the next session of Congress.

Mr. GEORGE. I do not propose to go beyond the appropriation.

Mr. GORMAN. I submit to the Senator from Mississippi that, under the resolution as reported by the Committee to Audit and Control the Contingent Expenses of the Senate, the committee will take up the whole subject and adjust it fairly. I have no doubt when the Committee to Audit and Control the Contingent Expenses of the Senate come to consider the matter they will give due importance to the resolution of the Senator from Mississippi, which was the first to pass, and what the Senator has now said upon the floor will have great weight with the committee.

Mr. GEORGE. Why can not the Senate act?

Mr. GORMAN. Because there is no precedent for it. Of course the Senate can take control of such a matter as this, but it never has done so.

Mr. GEORGE. Is there any precedent for the Committee on Contingent Expenses dividing this fund?

Mr. GORMAN. That committee have always supervised it.

Mr. GEORGE. But have the committee always divided and apportioned it?

Mr. GORMAN. That has been done in the way I indicated this morning, by the Secretary of the Senate.

Mr. GEORGE. Yes; but not by the Committee on Contingent Expenses.

Mr. GORMAN. The Secretary of the Senate at the last session, as I stated this morning, had in view all the difficulties of arriving at a proper conclusion, and with the natural embarassment under which an officer of the Senate would labor at any time in such a case, he desired this rule to be adopted as one which would better accommodate the Senate and promote the public interest. Under the peculiar conditions in which that officer stands now, it is absolutely necessary for his comfort and for the comfort of everybody that his former request should be complied with. That is all there is in the resolution. I have no doubt in the world from what I know of the condition of the funds that the Senator from Mississippi will accomplish what he desires.

Mr. GEORGE. Mr. President, I want to be understood perfectly about this matter. In the first place, there is just as much precedent for the introduction of my amendment for the action of the Senate as there was for the resolution authorizing the Committee on Contingent Expenses to make their apportionment.

I do not wish to do anything which would show that I had any disrespect or distrust of the Committee on Contingent Expenses, but I have stated the facts which the Senate can understand, that its order made at the last session of the Senate was defeated because the contingent fund was used up or apportioned so as to leave nothing, or next to nothing, for the Committee on Agriculture.

Mr. HARRIS. Allow me to ask the Senator if the very fact that he states does not furnish the strongest argument for submitting this question to a responsible committee of this body to apportion the funds for the investigations which have been ordered? The Senator states that his committee was left out in the cold.

Mr. GEORGE. No; not that. The fund was apportioned before the committee was raised. That was what I intended to say.

Mr. HARRIS. Still, I understand the Senator to say that the appropriations for these investigations had been so distributed by the Secretary as to leave no funds to enable the Senator's committee to proceed with their investigation.

Mr. GEORGE. That was not my statement exactly, and it does not convey a fair and just idea of what I intended to present to the Senate. I intended to say to the Senate that I applied to the Secretary of the Senate as soon as practicable after the adoption of the resolution to which I have referred in April last, and I found at that time that the money had been apportioned in the way I have stated, so that the Secretary had no discretion in deciding between that committee and the others.

Mr. HARRIS. The money was already apportioned.

Mr. GEORGE. The money was already gone. I wish to get the Senate, if they want this investigation to go on, to give the committee out of the contingent fund the sum of $5,000. If the Senate do not want to do that, if they want the Committee on Agriculture and Forestry to stop the investigation which it has begun, I am perfectly content; I have done my duty. I ask the Senate to adopt the amendment which I have offered in accordance with the views of several of the oldest and most experienced members of this body.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add to the pending resolution:

Provided, That the said committee be, and they are hereby, instructed to set apart for the investigation of the condition of agriculture in the United States, etc., as directed by the resolution of the Senate, to be made by the Committee on Agriculture and Forestry, the sum of $5,000, $1,000 of which to be paid out of the contingent fund available for the present fiscal year, and the remainder out of the contingent fund for the next fiscal year; which said sum of $5,000 is to be first deducted for the use aforesaid, and the balance remaining of said sum only shall be apportioned by said committee.

Mr. WHITE of Louisiana. Mr. President, there can not be a doubt, I take it, if this resolution passes, that some of the committees which have been already authorized will be placed in exactly the position which the Senator describes himself as having been placed in at the last session of Congress.

Resolutions have already been passed authorizing six committees to sit during the recess. There are pending before the Committee on Contingent Expenses now, I think, six other resolutions covering a like order.

Many Senators think that some of the pending resolutions involve matters of considerable importance, and should be reported; but take the six already authorized, take the sum disposable, and deduct from that sum the sum covered by this resolution, and it follows as inevitably as the rule of subtraction would follow that there will not be the wherewith to apply to the other committees.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Mississippi [Mr. GEORGE].

Mr. BATE. I should like to know, for I am not exactly informed, precisely what is the situation. I know we passed a resolution in regard to having the matter spoken of by the Senator from Mississippi investigated. I think it is highly important that that should be done. I know of no investigation which could take place that would be more beneficial to the Senate or of greater interest to the public. I should like to know where the other money has gone and to what particular committees it is assigned. I was not aware of any distinction being made as to the amount except a thousand dollars to this committee, and that committee, and the other committee. I should like very much to have a statement as to what committees will get the $25,000, and let us see if we can not make a partition that will be agreeable to the Senator from Mississippi, representing the Committee on Agriculture and Forestry.

Mr. GEORGE. I wish to make only one statement in reply to the Senator from Louisiana. It is no objection to the adoption of this amendment that it does not leave funds enough for the other committees. The very object I had in view in offering the amendment was because the fund was not sufficient for all the committees; and I wanted the Senate to decide upon the relative importance of the work to be done by several committees; that is all.

Mr. WHITE of Louisiana. The Senator did not understand my statement as objecting to his amendment. I simply made my statement so that the Senate might be in possession of the facts.

Mr. HARRIS. I merely desire to say that we confer by this resolution upon the Committee to Audit and Control the Contingent Expenses of the Senate the apportionment of the appropriations for that purpose. The Senator from Mississippi, as every other Senator, it seems to me, should recognize the fact that that committee will take into consideration the character, the importance, and the necessity of the investigation proposed, and will exercise a sound discretion and judgment as to how the fund shall be apportioned between the various committees proposing to investigate different subjects.

Now, the Senator from Mississippi proposes to deprive that committee of the discretion or the power in the light of such facts as may control its action as to the relative importance of investigations. He proposes by an order of the Senate to deprive it of any discretion or judgment whatever in respect to this particular matter, while I suppose the Senator from Mississippi is willing for it to have the discretion in respect to all other matters.

I have a very kindly side towards the Committee on Agriculture, but unfortunately for me, I have a kindly side towards all committees. If it be a proper rule to allow a committee of this body to apportion that fund there should be no exception.

I shall vote against the amendment of the Senator from Mississippi and all other kindred amendments.

Mr. GEORGE. Mr. President, I do not intend to have it inferred from anything that has been said here that I have any desire to cast any suspicion upon the fairness, judgment, etc., of the Committee on Contingent Expenses. I respect that committee, and I would not have introduced the resolution if I had not first obtained the consent of the chairman of the committee to do it.

The Senate has a right, and it is its duty, to decide upon the relative importance of these investigations when it is conceded that the money is insufficient. That is all I ask the Senate to do. If the Senate believes that the investigation ordered to be made by the Committee on Agriculture and Forestry is not of more importance to the country than all the rest put together, then it can vote down my amendment. My opinion is that it is the most important duty the Senate has committed to any of its committees in the last or the present Congress.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Mississippi to the resolution of the Senator from Missouri [Mr. COCKRELL].

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

Mr. CHANDLER. I ask the Senator from Maryland to withhold the motion that I may rise to a question of personal privilege. It will take but a few moments.

Mr. GORMAN. As a matter of course I yield for a personal matter.

The PRESIDING OFFICER. The Senator from New Hampshire will proceed.

PERSONAL EXPLANATIONS.

Mr. CHANDLER. Mr. President, I desire, while the Senator from Indiana [Mr. VOORHEES] is in his seat, to make some reference to statements made by him with regard to myself in his remarks on yesterday.

I did not distinctly understand whether the Senator from Indiana stated that he might have heard certain facts about my official action as Secretary of the Navy or that he had heard those facts. I looked in the RECORD this morning for the speech of the Senator, but it has not yet been published in the RECORD, and may not be until after the extraordinary session of the Senate has closed. I find, however, what purports to be a verbatim report of the Senator's remarks in the Washington Post of this morning, April 15, and I read as follows:

I have heard alleged of the Senator from New Hampshire various grave and ugly things which I have not credited. I have heard men say that while he was Secretary of the Navy he built three or four ships that made but one trip in their lives, and that was to the bottom of the sea. [More laughter in the galleries.] I have heard it alleged that the contractors who built them retired from their work rich, contented, and infamous, all at the same time. I have heard these things said.

Mr. President, I thought I had kept a pretty good track of the various attacks which have been made upon me from time to time, both personal and official. If I had been called upon to frame an indictment for the Senate against myself for the Senator from Indiana to use in this Chamber, I could have given him one with more semblance of correctness than the one which it has pleased him to bring forth against me.

It so happens that I never heard of either of these charges. I have heard many statements about myself, true and false, but never until now did I hear that I had been charged as Secretary of the Navy with building three or four ships which made but one trip and that was to the bottom of the sea.

The only ships that were built while I had the honor to occupy that office were the Chicago, the Boston, the Atlanta, and the Dolphin; and those ships I think are very much afloat at this day. When the great review takes place in Hampton Roads and in New York Harbor those ships will appear as fine ships as exist in the world, of the period when they were constructed. While the Dolphin will contain on board the President of the United States, the Cabinet, and possibly Senators now upon this floor, I devoutly hope that she will not go, as she never has yet gone, to the bottom of the sea.

I built no other ships; I made no other contracts. All the contracts for those ships were made with Mr. John Roach. It can not be Mr. Roach that the Senator meant when he said, "I have heard it alleged that the contractors retired from their work rich, contented, and infamous, all at the same time." Senators and the country know what became of John Roach. He became a failed contractor through the injustice of my successor as Secretary of the Navy. His affairs went into the hands of assignees and he died a broken-hearted man.

It has not been my purpose, I have not thought it becoming in me, to bring at any length at any time the circumstances of Mr. Roach's failure before the Senate, and I do it now only for the purpose of showing to the Senate that the Senator from Indiana was very much mistaken when he gave an intimation to the country that the allegations here narrated were correct and true. I desire to interpose a distinct denial to those charges, and also to deny any imputation that has ever found its way into the public prints in any way affecting either my personal or my official integrity.

Mr. President, it has not been my custom to notice mere general charges, but since I have been old enough to hold a pen and write, there has never been any specific charge of any kind made against me that I have not promptly noticed by my voice and my pen.

I certainly am not willing to be deterred from pressing the resolution concerning the Senator from North Dakota by any suggestions of this kind. If at any time any Senator sees fit to make a serious allegation against me, either as an individual or as a public official before my entrance into the Senate, I shall promptly meet the allegations and close by a request for an investigation.

But, Mr. President, I desire to call the attention of the Senator from Indiana and other Senators upon that side of the Chamber to the position which they have taken in the late debate. It is one that never will allow any Senator to have an investigation of any charges made against him, however injurious they may be, concerning his life before he became a member of this body. Senators can come in here and make allegations of any sort they please about a brother Senator, and if they relate to transactions happening before he was elected, the only remedy for that Senator is to make denial upon the floor of the Senate. If the doctrine which the Senators upon the other side of the Chamber are asserting is the correct one, under no circumstances is there any constitutional right of this body to investigate for the purpose of relieving a Senator upon this floor from the opprobrium which may attach to unjust charges.

That has not been hitherto the precedent of the Senate, and I trust that it is not hereafter to be the precedent of the Senate. I trust that the request of the Senator from North Dakota that he may be investigated will be granted, and that the request of the Senator from Montana that he be investigated may be granted; and it will be entirely agreeable to me to be myself investigated concerning any charge which any Senator will undertake seriously to make upon the floor of the Senate.

Mr. President, I do not know that the Senator from Indiana intended that anyone should understand in this broad land that the charges which he said he had heard against me were true, but for fear that some person might say that I sat silent in the Chamber after the Senator had stated that he had heard these things, I deemed it my duty and my privilege to make the statement which I now submit to the Senate.

Mr. VOORHEES. Mr. President, the Senator from New Hampshire says I was mistaken in what I said yesterday. I was not mistaken. I was making no accusation against that Senator; I was bringing no charge against him; but I was illustrating the conduct of the other side of the Chamber. I was alluding to the fact that for years past the country has rung with charges against Senators on that side of the Chamber, imputing to them faults and offenses graver even than those imputed to the Senator from North Dakota; and in illustration of the fact that they had sat silent, had never taken up the spirit of accusation or investigation while their own people were affected, I alluded *en passant*, without any intention of being responsible for the truth of the charge, that I had even heard the Senator himself gravely accused. I have, and others have.

The very language which I used I heard used by others, and at not a very remote period of time from the present. Papers have been sent to me. I am no dumping ground either, as the Senator from Maryland [Mr. GORMAN] so well said yesterday. I toss those things into the waste basket and the fireplace; I have great contempt for them. But I was illustrating the fact that the Senators on the other side of the Chamber, especially the Senator from New Hampshire, were swift to avenge what the Senator termed the purity of the Senate when he could make a point against a political adversary, but he was silent and dumb in the presence of charges affecting not merely himself, but other Senators on that side of the Chamber. It was in that spirit I brought it forward and in none other.

I am not an accusing spirit. I hold that those accusations should not be investigated if the offenses imputed took place prior to the election here. That was my argument yesterday. I stand on it now. I said yesterday that I did not arraign that side of the Chamber for what they have not done in the past, but what they were trying to do now in the present, totally inconsistent with what their career had been heretofore, betraying a hypocrisy and a phariseeism inconsistent with what I conceive to be a manly and true position, especially under the limitations of our Constitution.

I say to the Senator from New Hampshire if he is never arraigned or accused until I do it he will go very free and cheerful through life, unless it might be necessary, as I thought it was yesterday, to confront him with an illustration growing out of accusations even against himself. I have none to make, and I make none now.

I believe this is all I desire to say.

Mr. GORMAN. I renew my motion that the Senate proceed to the consideration of executive business.

Mr. HANSBROUGH. I hope the Senator from Maryland will yield to me. I desire to occupy the attention of the Senate for a few moments.

Mr. GORMAN. If it is a personal matter, I will yield; but the Senator must understand and appreciate that we ought to proceed with the business before us.

Mr. HANSBROUGH. It is a personal matter. I think it can be construed as a personal matter.

Mr. GORMAN. Then, of course, I will yield.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Dakota.

Mr. HANSBROUGH. I will occupy the attention of the Senate a very short time.

Mr. President, I trust the Senate will not adjourn until it gives my colleague the opportunity which he has asked to have an investigation of the serious allegations and accusations made against him. I believe when my colleague rose in his place in the Senate yesterday and said that he courted an investigation here, that through him the State of North Dakota was speaking and demanding a right that its representative in this body be heard. That, it seems to me, is a very high ideal of State rights.

Mr. VOORHEES. Mr. President, I rise to a question of order. The Senator from North Dakota is not speaking to a question of personal privilege. He is arguing a question that it would require unanimous consent for him to pursue.

The PRESIDING OFFICER. The Chair will state to the Senator from Indiana that the floor was given to the Senator from Maryland; that he yielded the floor, and the Chair recognized the Senator from North Dakota. As to the question of the propriety of the remarks of the Senator from North Dakota, that is a matter he must judge of himself. It is not a question of order. The Chair recognizes the Senator from North Dakota.

Mr. HANSBROUGH. I think that this matter is personal to me, as it relates to my colleague and to the State I have the honor in part to represent here.

Mr. President, I claim that no political party has a right to come here and deny the privilege asked for by my colleague. I hope, as I said in the beginning, that the Senate will not adjourn without giving him the opportunity he has asked to be investigated. I do not want him to go back to his people and to rest under this cloud all summer until we convene here again next December. I believe the Senate should grant him the request he has made here. I ask unanimous consent that the resolution submitted by the Senator from Massachusetts [Mr. HOAR] may be adopted.

Mr. VEST. I object.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

The PRESIDING OFFICER. The Senator from North Dakota asks unanimous consent——

Mr. GORMAN. I move that the Senate proceed——

Mr. CHANDLER. I rise to a question of order.

Mr. COCKRELL. I object, and that ends it.

The PRESIDING OFFICER. The Chair is of the opinion that the Senator from North Dakota, being on the floor, had a right to make the request as part of his remarks, and that his request the Chair is bound to submit to the Senate. Is there objection to the request of the Senator from North Dakota?

Mr. COCKRELL. There is.

Mr. HARRIS. Pending which, a motion to proceed to the consideration of executive business was unquestionably in order.

The PRESIDING OFFICER. Before a motion can be made to proceed to the consideration of executive business by a Senator the Senator must be recognized by the Chair. The Chair had recognized no one but the Senator from North Dakota. The Chair understands that there is objection to the request of the Senator from North Dakota.

Mr. COCKRELL. There is; I object.

The PRESIDING OFFICER. Objection is made.

ANTITRUST AND INTERSTATE-COMMERCE DECISIONS.

Mr. MANDERSON. I dislike at this moment to ask the privilege, but as I feel compelled to leave the Chamber I wish to make a request.

A few days ago, in that latitude of debate which is permitted here, the decisions that have excited some comment throughout the country, made by Judge Ricks, in Ohio, and Judge Speer, in Georgia, were referred to. It was very evident, when I read the comments made upon the decision of Judge Speer, that the same misapprehension the newspapers seemed to be under had also obtained with some Senators who addressed themselves to that subject.

I have in my hand the full decision of Judge Speer, transmitted to me by that judicial officer. It bears upon questions of moment and of exceeding importance that have excited very great interest. Referring as the decision does more particularly to the antitrust act and the interstate-commerce law, I think it would be well that the decision, which is not of length, should appear in the RECORD. I ask the unanimous consent of

the Senate that it be printed in the RECORD of to-day's proceedings.

Mr. BUTLER. I object.

The PRESIDING OFFICER. The Senator from South Carolina objects to the request of the Senator from Nebraska.

Mr. HOAR. I should like to ask if there is any objection to publishing as a document the three decisions which were referred to.

Mr. MANDERSON. I was on the point of asking that it be printed as a document.

Mr. HOAR. That is what I desire.

Mr. MANDERSON. I know a great many will desire to see it.

Mr. VEST. Let that be done.

Mr. MANDERSON. Does the Senator from South Carolina object to that request?

Mr. BUTLER. No, sir.

Mr. HOAR. I should like to add to the request to print the decision of Judge Speer, that the document also include the decisions of Judge Taft and Judge Ricks, to be printed under the direction of the Committee on Printing, if the chairman will undertake it.

Mr. VEST. That is right.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nebraska, as amended by the Senator from Massachusetts, that the decisions be printed as a document? The Chair hears none, and it is so ordered.

Mr. BUTLER. All three decisions are to be printed?

Mr. MANDERSON. All three are to be printed.

The PRESIDING OFFICER. That is the understanding of the Chair.

The order was reduced to writing and entered on the Journal, as follows:

Resolved, That the late decisions of Judge Speer, of Georgia, Judge Ricks, of Ohio, and Judge Taft, of Ohio, made in certain cases involving the rights and duties of railroad employés and construction of the antitrust and interstate-commerce laws be printed in document form for the use of the Senate.

EXECUTIVE SESSION.

Mr. GORMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After one hour and thirty minutes spent in executive session the doors were reopened.

INTERNATIONAL MONETARY CONFERENCE.

Mr. GORMAN, from the Committee on Printing, to whom was referred the resolution submitted this day by Mr. DAVIS, reported it without amendment, and it was considered by unanimous consent, and agreed to, as follows:

Resolved, That there be printed and bound for the use of the Senate 1,500 additional copies of Executive Document No. 82, Fifty-second Congress, second session, being the proceedings of the international monetary conference.

REPORT OF IMMIGRANT COMMISSIONER SCHULTEIS.

Mr. GORMAN, from the Committee on Printing, to whom was referred the resolution submitted yesterday by Mr. CHANDLER, reported it without amendment, and it was considered by unanimous consent, and agreed to, as follows:

Resolved, That the Public Printer be, and is hereby, directed to print for the use of the Senate, with a title page, 12,000 additional copies of the report of Immigrant Commissioner H. J. Schulteis, contained in Part I, House Executive Document No. 235, first session Fifty-first Congress, pages 263 to 323, inclusive.

Mr. GORMAN. The reports accompanying these resolutions will be printed under the rule?

The PRESIDING OFFICER (Mr. FAULKNER). The reports will be printed under the rule.

THANKS TO THE VICE-PRESIDENT.

Mr. MANDERSON. I offer, with great pleasure, the resolution I send to the desk.

The PRESIDING OFFICER. The resolution will be read.

The resolution was read, as follows:

Resolved, That the thanks of the Senate are due, and are hereby tendered, to the Vice-President for the impartiality and courtesy with which he has presided over the Senate during its present extraordinary session.

The Senate, by unanimous consent, proceeded to consider the resolution; and it was agreed to *nem. con.*

INVESTIGATION BY COMMITTEE ON AGRICULTURE AND FORESTRY.

Mr. GEORGE. I ask leave to call up the resolution, which I introduced several days ago, in relation to the investigation of the agricultural interests of the country.

The PRESIDING OFFICER. Does the Chair understand the Senator from Mississippi that he desires to call up the resolution which he offered as an amendment to the resolution of the Senator from Missouri [Mr. COCKRELL]?

Mr. GEORGE. No; the independent resolution.

The PRESIDING OFFICER. The resolution will be read.

The Secretary read the resolution submitted by Mr. GEORGE on the 10th instant, as follows:

Resolved, That the Secretary of the Senate be, and he is hereby, instructed to set apart for the investigation of the condition of agriculture in the United States, etc., as directed by the resolution of the Senate to be made by the Committee on Agriculture and Forestry, the sum of $5,000, one thousand of which to be paid out of the contingent fund available for the present fiscal year and the remainder out of the contingent fund for the next fiscal year.

Mr. HARRIS. Mr. President, I rise to a question of order. When the Senate went into executive session the measure pending before it was the resolution of the Senator from Missouri [Mr. COCKRELL] reported by the Committee to Audit and Control the Contingent Expenses of the Senate, to which the Senator from Mississippi [Mr. GEORGE] had offered an amendment, and the amendment of the Senator from Mississippi was the pending question. That is the matter now before the Senate, according to my conception of the rules of the Senate.

Mr. GEORGE. I move to take up the resolution which has just been read.

The PRESIDING OFFICER. The Chair will state that in the judgment of the Chair the point of order raised by the Senator from Tennessee is well taken, and the business properly before the Senate is the resolution of the Senator from Missouri, the pending question being on the amendment submitted by the Senator from Mississippi.

Mr. GEORGE. I move to take up the resolution just read.

The PRESIDING OFFICER. The Senator from Mississippi now moves that the resolution just read be taken up for consideration by the Senate.

Mr. HARRIS. Before we get into a wrangle here——

Mr. GEORGE. I do not want any wrangle about it. I merely want a vote on my motion.

Mr. HARRIS. I beg the Senator from Mississippi to test the strength of his case upon his amendment, which presents precisely the same question. Why should he move to divert the Senate from the consideration of the resolution reported by one of its standing committees?

The PRESIDING OFFICER. The Chair rules that a motion to proceed to the consideration of any other than the regular order is not debatable. The question is on agreeing to the motion of the Senator from Mississippi, that the Senate proceed to the consideration of the resolution submitted by him. [Putting the question.] The Chair is in doubt.

Mr. COCKRELL. Let us have the yeas and nays and be done with it.

Mr. HOAR. I rise to a parliamentary inquiry. I desire to know whether if this resolution be taken up it must not under the law go to the Committee to Audit and Control the Contingent Expenses of the Senate?

The PRESIDING OFFICER. The Chair would hold that a reference would not be necessary, as a resolution has already been passed authorizing an appropriation for the purpose.

Mr. GEORGE. The resolution for that purpose has already passed the Senate.

Mr. HOAR. If the Chair will pardon me, this resolution provides that $1,000 of the sum is to be paid out of the contingent fund for this year, the remainder to be paid out of the contingent fund for next year. The resolution creates for the first time a charge upon a particular contingent fund, I submit. I will not press the question if the Chair is not in doubt about it.

The PRESIDING OFFICER. The question is not properly now before the Chair for it to rule upon. The question is on the motion of the Senator from Mississippi to proceed to the consideration of the resolution. [Putting the question.] The noes seem to have it.

Mr. GEORGE. I call for the yeas and nays.

Mr. HARRIS. Very well; let the yeas and nays be ordered if the Senator from Mississippi wants them.

The yeas and nays were ordered.

Mr. JONES of Arkansas. I move that the Senate adjourn.

Mr. HAWLEY. *Sine die.*

Mr. CALL. I hope the Senator will allow me one moment. I withdraw the objection I made to the consideration of the resolution reported by the committee, and will state that my objection was only to the consideration of the resolution in executive session.

Mr. CHANDLER. I ask the Senator from Mississippi to allow by unanimous consent the two resolutions which have been reported from the Committee to Audit and Control the Contingent Expenses of the Senate to be adopted first, so as to show what special committees are to be authorized to sit in vacation, and then dispose of his resolution.

Mr. GEORGE. I desire to have a vote of the Senate upon the question whether they will give the money, in preference to all other appropriations out of the contingent fund, to the Agricul-

tural Committee. For that reason I desire to have the vote on my motion now.

Mr. COCKRELL. Mr. President——

The PRESIDING OFFICER. The Chair will recognize the Senator from Missouri, with the understanding that debate is proceeding by unanimous consent.

Mr. COCKRELL. I do not rise under unanimous consent, but to a question which is in order. I move that the Senate do now adjourn *sine die*.

Mr. HIGGINS. I hope that will not be done.

Mr. GEORGE. I call for the yeas and nays on that motion.

The PRESIDING OFFICER. The Senator from Missouri moves that the Senate do now adjourn *sine die*. On that question the yeas and nays are demanded by the Senator from Mississippi.

The yeas and nays were ordered.

Mr. MANDERSON. I desire to understand the question. Is the motion to adjourn *sine die?*

The PRESIDING OFFICER. The motion is to adjourn *sine die*. The roll will be called on agreeing to the motion of the Senator from Missouri.

The Secretary proceeded to call the roll.

Mr. CAREY (when his name was called). I am paired with the Senator from South Carolina [Mr. IRBY].

Mr. PUGH. All pairs are off now.

Mr. CAREY. I am informed that all pairs are off. I vote "yea."

Mr. DUBOIS (when his name was called). I am paired with the junior Senator from New Jersey [Mr. SMITH].

Mr. BERRY. The Senator from Idaho is at liberty to vote.

Mr. DUBOIS. Then I vote "nay."

Mr. DUBOIS (when Mr. SHOUP'S name was called). I desire to announce the pair of my colleague [Mr. SHOUP] with the junior Senator from California [Mr. WHITE].

The roll call having been concluded, the result was announced—yeas 23, nays 23, as follows:

YEAS—23.

Berry,	Dolph,	Hill,	Pasco,
Blackburn,	Faulkner,	Jones, Ark.	Platt,
Brice,	Gibson,	Lodge,	Pugh,
Butler,	Gorman,	McMillan,	Turpie,
Carey,	Harris,	Morrill,	Vest.
Cockrell,	Hawley,	Palmer,	

NAYS—23.

Bate,	Dubois,	Hunton,	Peffer,
Call,	George,	Jones, Nev.	Roach,
Chandler,	Gordon,	Kyle,	Stockbridge,
Coke,	Hansbrough,	Manderson,	Voorhees,
Cullom,	Higgins,	Martin,	White, La.
Davis,	Hoar,	Murphy,	

NOT VOTING—38.

Aldrich,	Gallinger,	Pettigrew,	Teller,
Allen,	Gray,	Power,	Vance,
Allison,	Hale,	Proctor,	Vilas,
Caffery,	Irby,	Ransom,	Walthall,
Camden,	Lindsay,	Sherman,	Washburn,
Cameron,	McPherson,	Shoup,	White, Cal.
Colquitt,	Mills,	Smith,	Wilson,
Daniel,	Mitchell, Oregon	Squire,	Wolcott.
Dixon,	Mitchell, Wis.	Stanford,	
Frye,	Morgan,	Stewart,	

The PRESIDING OFFICER. The vote being a tie, the motion to adjourn *sine die* does not prevail.

Mr. PASCO. I move that the Senate do now adjourn.

Mr. BUTLER. I trust that will not be done. We ought to be able to get through with the business here this evening.

Mr. BATE. The motion is not debatable.

Mr. BUTLER. The idea of coming back here on Monday on a trifle like this seems to be absolutely childish. There will be no quorum here on Monday.

Mr. PASCO. I made the motion because I feel very well satisfied that it will be impossible for the different elements to get together and arrange the business this evening; but if there is any prospect of accomplishing anything by remaining here I will withdraw the motion.

The PRESIDING OFFICER. The motion to adjourn is withdrawn. The question recurs on the motion of the Senator from Mississippi [Mr. GEORGE] to proceed to the consideration of his resolution, on which the yeas and nays have been ordered.

Mr. CALL. I move that the Senate adjourn.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the roll will be called.

Mr. PLATT. What is the motion.

Mr. GEORGE. The yeas and nays have already been ordered on my motion.

Mr. CALL. I move that the Senate adjourn.

The PRESIDING OFFICER. The question before the Senate is on proceeding to the consideration of the resolution of the Senator from Mississippi.

Mr. COCKRELL. The Senator from Florida has moved that the Senate do now adjourn. That motion is certainly in order.

The PRESIDING OFFICER. The Senator from Florida moved that the Senate adjourn, which motion of the Senator from Florida has been withdrawn.

Mr. CALL. Mr. President, I move that the Senate do now adjourn.

Mr. COCKRELL. The Senator from Florida has three times moved that the Senate adjourn.

The PRESIDING OFFICER. If the senior Senator from Florida so moved, the Chair did not hear him.

Mr. HOAR. He can not make a motion until he is recognized by the Chair.

Mr. MANDERSON. I appeal to the Senator from Florida that he change his motion to adjourn to a motion that we take a recess say for an hour, that the two wings on the opposite side may get together, and I think we can then meet and probably adjourn *sine die*.

The PRESIDING OFFICER. The Chair recognizes the Senator from Florida [Mr. CALL] if he desires to move an adjournment.

Mr. CALL. I am perfectly willing to try a recess for half an hour if Senators desire it. I withdraw my motion.

The PRESIDING OFFICER. The motion to adjourn is withdrawn. The question recurs on the motion of the Senator from Mississippi, upon which the yeas and nays have been ordered, to proceed to the consideration of the resolution submitted by him. The roll will be called.

The Secretary proceeded to call the roll.

Mr. CAREY (when his name was called). I am paired with the Senator from South Carolina [Mr. IRBY], and therefore withhold my vote.

The roll call having been concluded, the result was announced—yeas 21, nays 26; as follows:

YEAS—21.

Bate,	George,	Martin,	Stockbridge,
Butler,	Gordon,	Morrill,	Turpie,
Caffery,	Hunton,	Murphy,	Voorhees.
Call,	Kyle,	Peffer,	
Coke,	McMillan,	Proctor,	
Davis,	Manderson,	Roach,	

NAYS—26.

Berry,	Dubois,	Higgins,	Pasco,
Blackburn,	Faulkner,	Hill,	Platt,
Brice,	Gibson,	Hoar,	Pugh,
Chandler,	Gorman,	Jones, Ark.	Vest,
Cockrell,	Hansbrough,	Jones, Nev.	White, La.
Cullom,	Harris,	Lodge,	
Dolph,	Hawley,	Palmer,	

NOT VOTING—27.

Aldrich,	Gallinger,	Pettigrew,	Vance,
Allen,	Gray,	Power,	Vilas,
Allison,	Hale,	Ransom,	Walthall,
Camden,	Irby,	Sherman,	Washburn,
Cameron,	Lindsay,	Shoup,	White, Cal.
Carey,	McPherson,	Smith,	Wilson,
Colquitt,	Mills,	Squire,	Wolcott.
Daniel,	Mitchell, Oregon	Stanford,	
Dixon,	Mitchell, Wis.	Stewart,	
Frye,	Morgan,	Teller,	

So the motion was not agreed to.

DISBURSEMENTS BY RECESS COMMITTEES.

Mr. WHITE of Louisiana. I call up the resolution of the Senator from Missouri [Mr. COCKRELL]. That, I think, is the pending question, is it not?

Mr. HARRIS. It is.

The PRESIDING OFFICER. That is the pending question before the Senate.

Mr. BUTLER. Let the resolution be read.

The PRESIDING OFFICER. The Secretary will read the resolution.

The Secretary read the resolution submitted by Mr. COCKRELL, reported from the Committee to Audit and Control the Contingent Expenses of the Senate by Mr. WHITE of Louisiana, as follows:

Resolved, That the Committee to Audit and Control the Contingent Expenses of the Senate be instructed to ascertain and fix the sums necessary to be disbursed by the various standing or special committees authorized to sit during the recess; that when the said sum or sums be so ascertained and fixed by the said committee, the expenses of the various committees, standing or select, authorized to sit during the recess, be absolutely limited to the amount so fixed by the said committee.

Resolved further, That the said Committee to Audit and Control the Contingent Expenses of the Senate, in ascertaining and fixing the said sums, be, and hereby is, directed to so fix the amounts as to keep the aggregate sum within the appropriation.

The PRESIDING OFFICER. The amendment of the Senator from Mississippi [Mr. GEORGE] will be read.

The SECRETARY. It is proposed to add to the resolution the following proviso:

Provided, That the said committee be, and they are hereby, instructed to set apart for the investigation of the condition of agriculture in the United

States, etc., as directed by the resolution of the Senate to be made by the Committee on Agriculture and Forestry, the sum of $5,000, one thousand of which to be paid out of the contingent fund available for the present fiscal year and the remainder out of the contingent fund for the next fiscal year, which said sum of $5,000 is to be first deducted for the use aforesaid, and the balance remaining of said sum only shall be apportioned by said committee.

Mr. WHITE of Louisiana. I move to lay the amendment on the table.

The PRESIDING OFFICER. The Senator from Louisiana moves to lay the amendment submitted by the Senator from Mississippi upon the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on agreeing to the resolution of the Senator from Missouri.

Mr. CALL. Mr. President, I have only one word to say. I think this is a very dangerous resolution. It gives opportunity for the rule of the Senate by a few men. It opens the way to all corrupt influences to control this body. I believe it is unconstitutional to delegate the legislative powers of this body to any three Senators on this floor, and I shall vote against the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

INVESTIGATION BY COMMITTEE ON INDIAN AFFAIRS.

Mr. CHANDLER. I ask that the reports from the Committee to Audit and Control the Contingent Expenses of the Senate be taken up for consideration in their order.

The PRESIDING OFFICER. The Chair hears no objection, and the first resolution in order reported by the committee will be read.

The Secretary read the resolution submitted by Mr. JONES of Arkansas April 10, 1893, as follows:

Resolved, That the Committee on Indian Affairs be instructed, either by full committee or such subcommittee or committees as may be appointed by the chairman thereof, with the full power of such committee to continue, during the recess of Congress, the investigations authorized by the resolution of May 13, 1890, and February 27, 1891, with the authority and in the manner and to the extent provided in said resolutions, and in the pursuance of such investigations to visit the several Indian reservations, Indian schools supported in whole or in part by the Government, and the five nations in the Indian Territory, or any reservation where, in the opinion of said committee, it may be necessary to extend their investigations.

2. That said committee or subcommittee shall have power to send for persons and papers, to administer oaths, and to examine witnesses under oath touching the matters which they are hereby empowered to investigate, and may hold their sessions during the recess of the Senate at such place or places as they may determine; and the necessary and proper expense incurred in the execution of this order shall be paid out of the contingent fund of the Senate upon vouchers approved by the chairman of said committee.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent, and agreed to.

INTERSTATE-COMMERCE INVESTIGATION.

Mr. BUTLER. Let the next resolution be reported.

The PRESIDING OFFICER. The next resolution will be read.

The Secretary read the resolution reported by Mr. BUTLER from the Committee on Interstate Commerce April 10, 1893, as follows:

Resolved, That the Committee on Interstate Commerce be, and is hereby, authorized to inquire whether or not the methods prevailing in the transportation of freight and passengers over the great railroad lines of the country and the conditions and necessities of travelers and shippers and of the transportation companies justify or require a repeal or modification of section 5 of the interstate-commerce act of February 4, 1887, which prohibits pooling under any circumstances; and that said committee be further authorized to inquire whether the system of closing and sealing cars engaged in transporting merchandise from one of the States of the Union into another State through foreign territory, or from such territory into any State, or from such territory through the United States into foreign territory, or any system of bonding merchandise so transported, needs to be modified or further regulated by law, and whether all railroads engaged in such traffic should either be required to conform to all the provisions of the said interstate-commerce act or be prohibited from continuing such transportation business, and whether any modifications should be made of the existing provisions of law concerning the relations between common carriers and their employés; the said committee being hereby empowered to sit during the recess of the Senate, to act by subcommittees if deemed necessary, to take testimony at convenient points, to send for witnesses, books, and papers, and employ a stenographer, and to have its expenses paid from the contingent fund of the Senate; and it is expressly provided that no additional expense whatever shall be allowed for clerical hire under the terms of this resolution.

Mr. HOAR. I move to amend the resolution, to make clear what the Senator from South Carolina understands is already in it, in line 9, after the word "circumstances," to insert "and also the provisions relating to long and short hauls."

Mr. BUTLER. I have no objection personally to that amendment, and I do not suppose any objection can be urged to it. I hope the amendment will be adopted.

Mr. HARRIS. I have no objection to the investigation of the question, but I shall have very serious objection to repealing either the long and short haul clause or the pooling clause of the interstate-commerce act.

Mr. HOAR. The resolution proposes to confer on the committee in terms the power to reconsider or modify or improve in anyway the pooling clause.

Mr. HARRIS. To investigate.

Mr. HOAR. I wish to have that clearly within the power of the committee.

Mr. BUTLER. There is no proposition to repeal.

Mr. HARRIS. I comprehend. It is an investigation resolution.

Mr. DOLPH. Let the amendment be reported.

The SECRETARY. In line 9, after the word "circumstances," it is proposed to insert:

And also the provisions relating to long and short hauls.

Mr. BUTLER. That is sufficient.

Mr. HARRIS. Insert the words "of section 4" after the word "provisions." That is the section which relates to the long and short haul.

Mr. HOAR. I suggest that we insert the words "of said statute."

Mr. HARRIS. That will be satisfactory.

The VICE-PRESIDENT. The amendment will be so modified. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The VICE-PRESIDENT. The question now is on the resolution as amended.

The resolution as amended was agreed to.

SENATE EMPLOYÉS AT MALTBY BUILDING.

Mr. WHITE of Louisiana. I beg leave to report at this time a resolution from the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE-PRESIDENT. The resolution will be read.

The Secretary read as follows:

Resolved, That the Sergeant-at-Arms be, and he is hereby, authorized to continue the present session employés at the Maltby Building, authorized under the resolution of July 26, 1892, until June 30, 1893.

Mr. WHITE of Louisiana. I ask for the present consideration of the resolution.

The resolution was considered by unanimous consent, and agreed to.

FINAL ADJOURNMENT.

Mr. HILL (at 6 o'clock and 15 minutes p. m.). I move that the Senate do now adjourn *sine die*.

The VICE-PRESIDENT. The Senator from New York moves that the Senate do now adjourn *sine die*. [Putting the question.]

Senators, before announcing the result of the vote just taken, I beg to express my earnest appreciation of the uniform courtesy shown me by the members and officers of this body during the session now closing.

For the resolution personal to myself, so kindly adopted by the Senate, I am profoundly grateful.

In accordance with the vote just taken, I now declare this extraordinary session of the Senate adjourned without day.

NOMINATIONS.

Executive omiations received by the Senat e April 15, 1893.

UNITED STATES MARSHAL.

Hewson E. Lannan, of Delaware, to be marshal of the United States for the district of Delaware, vice Henry C. Mahaffy, to be removed.

PRINCIPAL CLERK OF PRIVATE LAND CLAIMS.

William L. Kee, of West Virginia, to be principal clerk of private land claims in the General Land Office, vice Isaac R. Conwell, resigned.

COLLECTOR OF CUSTOMS.

John H. Wise, of California, to be collector of customs for the district of San Francisco, in the State of California, to succeed Timothy Guy Phelps, whose term of office will expire by limitation April 16, 1893.

PROMOTIONS IN THE MARINE HOSPITAL SERVICE.

Assistant Surgeon Alexander C. Smith, of New York, to be a passed assistant surgeon in the Marine Hospital Service of the United States.

Assistant Surgeon James C. Perry, of North Carolina, to be a passed assistant surgeon in the Marine Hospital Service of the United States.

COMMISSIONER OF INTERNAL REVENUE.

Joseph S. Miller, of West Virginia, to be Commissioner of Internal Revenue, to succeed John W. Mason, resigned.

SECRETARY OF LEGATION TO TURKEY.

John W. Riddle, of Minnesota, to be secretary of the legation of the United States to Turkey, vice H. R. Newberry, recalled.

CONFIRMATIONS.

Executive omiation confirmed by the Senate April 8, 1893.

INDIAN AGENT.

Francisco Estudillo, of San Jacinto, Cal., to be agent for the Indians of the Mission Tule River (consolidated) Agency in California.

Executive nominations confirmed by the Senate April 13, 1893.

THIRD ASSISTANT SECRETARY OF STATE.

Edward H. Strobel, of New York, to be Third Assistant Secretary of State.

APPOINTMENT IN THE NAVY.

Charles Edward Riggs, a resident of Iowa, to be an assistant surgeon in the United States Navy.

Executive nominations confirmed by the Senate April 14, 1893.

SURVEYOR OF CUSTOMS.

Andrew Fyfe, of Michigan, to be surveyor of customs for the port of Grand Rapids, in the State of Michigan.

PROMOTIONS IN THE ARMY.

Cavalry arm.

Maj. John M. Bacon, Seventh Cavalry, to be lieutenant-colonel.
Capt. Edward M. Hayes, Fifth Cavalry, to be major.
First Lieut. Homer W. Wheeler, Fifth Cavalry, to be captain.
Second Lieut. Malvern-Hill Barnum, Third Cavalry, to be first lieutenant.

APPOINTMENT IN THE REVENUE CUTTER SERVICE.

Levin T. Jones, of Maryland, to be a second assistant engineer in the Revenue Cutter Service.

PROMOTIONS IN THE REVENUE CUTTER SERVICE.

Third Lieut. Godfrey L. Carden, to be second lieutenant in the Revenue Cutter Service.
Henry L. Peckham, of Rhode Island, to be a third lieutenant in the Revenue Cutter Service.

POSTMASTERS.

Jackson Silbaugh, to be postmaster at Viroqua, in the county of Vernon and State of Wisconsin.
Frank S. Thomas, to be postmaster at Topeka, in the county of Shawnee and State of Kansas.
Joseph C. Thompson, to be postmaster at Quincy, in the county of Adams and State of Illinois.
George B. Gibson, to be postmaster at New Castle, in the county of Lawrence and State of Pennsylvania.
Albert J. Almoney, to be postmaster at Rockville, in the county of Montgomery and State of Maryland.
Manellans Ellis, to be postmaster at Laurel, in the county of Sussex and State of Delaware.
Robert G. Wright, to be postmaster at Waynesboro, in the county of Augusta and State of Virginia.
Richard H. Adams, to be postmaster at Radford, in the county of Montgomery and State of Virginia.
John M. Seigfreid, to be postmaster at Warren, in the county of Warren and State of Pennsylvania.
Patrick Sheridan, to be postmaster at Elizabeth, in the county of Union and State of New Jersey.
Joseph F. Upleger, to be postmaster at Mount Clemens, in the county of Macomb and State of Michigan.
Isaac Holton, to be postmaster at Plainfield, in the county of Hendricks and State of Indiana.

Executive nominations confirmed by the Senate April 15, 1893.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

FIFTY-THIRD CONGRESS, FIRST SESSION.

CONGRESSIONAL RECORD.

PROCEEDINGS AND DEBATES OF THE FIFTY-THIRD CONGRESS.

FIRST SESSION.

SENATE.

MONDAY, *August 7, 1893.*

The first session of the Fifty-third Congress commenced this day at the Capitol, in the city of Washington, in pursuance of the proclamation of the President of the United States of the 30th day of June, 1893. The Senators assembled in the Senate Chamber.

The VICE-PRESIDENT of the United States (Hon. ADLAI E. STEVENSON, of the State of Illinois) called the Senate to order at 12 o'clock meridian.

PRAYER.

Rev. J. G. BUTLER, D. D., Chaplain to the Senate, offered the following prayer:

Our eyes are toward Thee, Lord God Almighty, the governor among the rulers and the unseen leader in life's great battle. We pray for abiding faith in God, in His presence and power, in His wisdom and love and mercy. Are we not Thy children, chastened but not destroyed? We come confessing our sins. Thou art the God of pardon. We open our hearts to the indwelling of Thy spirit, and pray that these Thy servants may be filled with the wisdom that is pure and peaceable and gentle and easy to be entreated, which is without partiality and without hypocrisy, the wisdom that cometh from Thee, the only wise God.

Thou art overturning and overturning, O God. Thy kingdom is coming, the kingdom of truth and of righteousness. Establish it in our hearts and in the hearts of all the rulers and in the hearts of all the people.

Remember Thy servants, the President and the members of the Cabinet. Bless the two Houses of Congress now assembling, and so guide, O God, in their councils that the best interests of the people may be advanced in this time of doubt and perplexity, of unrest and agitation among the nations, and in our own land, which Thou hast led all through our history. Guide this day by Thy counsel. Have these Thy servants in Thy holy care and keeping, in their persons and in their families; bless them in their social and in their official relations; and grant, O God, so to order all things concerning us and concerning Thy kingdom that very soon the power of iniquity may be destroyed and truth and righteousness everywhere prevail. Grant us grace. Blot out our transgressions, and may the peace of God, which passeth all understanding, keep our hearts and minds through Jesus Christ our Lord.

Our Father who art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done in earth, as it is in Heaven. Give us this day our daily bread. And forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil. For Thine is the kingdom, and the power, and the glory, forever. Amen.

THE PROCLAMATION.

The VICE-PRESIDENT. The Secretary will read the proclamation of the President of the United States, convening the Congress in extraordinary session.

The Secretary (Mr. ANSON G. MCCOOK) read the proclamation, as follows:

By the President of the United States of America.

A PROCLAMATION.

EXECUTIVE MANSION, *Washington, D. C., June 30, 1893.*

Whereas the distrust and apprehension concerning the financial situation which pervade all business circles have already caused great loss and damage to our people, and threaten to cripple our merchants, stop the wheels of manufacture, bring distress and privation to our farmers, and withhold from our workingmen the wage of labor;

And whereas the present perilous condition is largely the result of a financial policy which the executive branch of the Government finds embodied in unwise laws which must be executed until repealed by Congress:

Now, therefore, I, Grover Cleveland, President of the United States, in performance of a constitutional duty, do by this proclamation declare that an extraordinary occasion requires the convening of both Houses of the Congress of the United States at the Capitol in the city of Washington, on the 7th day of August next, at 12 o'clock noon, to the end that the people may be relieved through legislation, from present and impending danger and distress.

All those entitled to act as members of the Fifty-third Congress are required to take notice of this proclamation and attend at the time and place above stated.

Given under my hand and the seal of the United States at the city of Washington, on the 30th day of June, in the year of our Lord 1893, and of the Independence of the United States the 117th.

[SEAL.] GROVER CLEVELAND.

By the President:

ALVEY A. ADEE,

Acting Secretary of State.

SENATOR FROM PENNSYLVANIA.

Mr. CAMERON. Mr. President, the credentials of my colleague, Hon. Matthew S. Quay, have been heretofore presented, read, and placed on the files of the Senate. He is present, and I ask that he be now sworn in.

The VICE-PRESIDENT. The Senator-elect from Pennsylvania will please come forward and receive the oath of office.

Mr. Quay was escorted to the Vice-President's desk by Mr. CAMERON, and, the oath prescribed by law having been administered to him, he took his seat in the Senate.

SENATOR FROM FLORIDA.

The VICE-PRESIDENT presented the credentials of Samuel Pasco, chosen by the Legislature of Florida a Senator from that State for the term beginning March 4, 1893; which were read.

Mr. Pasco was escorted to the Vice-President's desk by Mr. CALL, and, the oath prescribed by law having been administered to him, he took his seat in the Senate.

SENATORS PRESENT.

The following Senators were present:

From the State of—

Alabama—James L. Pugh.

Virginia—Eppa Hunton.
Washington—Watson C. Squire.
West Virginia—Johnson N. Camden and Charles J. Faulkner.
Wisconsin—William F. Vilas.
Wyoming—Joseph M. Carey.

SENATOR FROM WYOMING.

The VICE-PRESIDENT laid before the Senate the following communication; which was read, and ordered to lie on the table:

[The Beckwith Commercial Company. Merchants. Incorporated 1887.]

EVANSTON, WYO., *July 11, 1893.*

DEAR SIR: Owing to a combination of circumstances over which I had no control I have been obliged to hand in my resignation to Governor Osborne of my appointment as United States Senator from Wyoming.

I beg to remain,
Your obedient servant,

A. C. BECKWITH.

Hon. ADLAI E. STEVENSON,
Washington, D. C.

REPORTS OF SECRETARY OF THE SENATE.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Senate, submitting, in obedience to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under the proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in his possession, from July 1, 1892, to June 30, 1893; which was read, and, with the accompanying papers, ordered to lie on the table and be printed.

He also laid before the Senate a communication from the Secretary of the Senate, submitting, in obedience to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under the proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in his possession, from July 1, 1893, to August 7, 1893; which was read, and, with the accompanying papers, ordered to lie on the table and be printed.

He also laid before the Senate a communication from the Secretary of the Senate, submitting, in obedience to law, a full and complete account of all property belonging to the United States in his possession on the 7th day of August, 1893; which was read, and, with the accompanying papers, ordered to lie on the table and be printed.

LIST OF PRIVATE CLAIMS.

The VICE-PRESIDENT laid before the Senate the following communication; which was read:

UNITED STATES SENATE, OFFICE OF THE SECRETARY,
Washington, August 7, 1893.

SIR: In compliance with the provisions of a resolution of the Senate of September 30, 1893, directing me to prepare an index of private claims from the Forty-seventh to the Fifty-first Congress, inclusive, I have the honor to state that the work has been completed, and the manuscript is in the office of the Secretary, subject to the order of the Senate.

Respectfully yours,

ANSON G. McCOOK.

Hon. A. E. STEVENSON,
President of the Senate.

Mr. COCKRELL. Let that be referred to the Committee on Printing.

The VICE-PRESIDENT. It will be so ordered.

Mr. COCKRELL. The accompanying document ought to be printed.

CATALOGUE OF SENATE LIBRARY.

The VICE-PRESIDENT laid before the Senate the following communication from the Secretary of the Senate; which was read:

UNITED STATES SENATE, OFFICE OF THE SECRETARY,
Washington, August 7, 1893.

SIR: About a year ago I directed Mr. E. T. Cressey, assistant librarian, to prepare a catalogue of books in the Library, including those stored in the basement, and in addition to search for certain documents of the earlier Congresses, in order to complete the files of the Senate from the beginning of the Government. On the 28th of July he finished the work and made his report, and I have the honor to transmit the report and manuscript of the catalogue for such action as the Senate may deem proper. Mr. Cressey is entitled to great credit for the intelligent manner in which he has discharged a very arduous duty, and the recommendations made are of value.

Yours respectfully,

ANSON G. McCOOK.

Hon. A. E. STEVENSON,
President of the Senate.

Mr. COCKRELL. What is the size of the accompanying papers?

Mr. MANDERSON. I suggest that the letter of the Secretary of the Senate and the accompanying report from his clerk be printed, and that the question of printing the catalogue of books be referred to the Committee on Printing. The catalogue is quite voluminous.

Mr. COCKRELL. I was going to suggest that all the papers be referred to the Committee on Printing, but let the accompanying report be printed.

The VICE-PRESIDENT. It will be so ordered.
